- Demonstrating the required foreign language proficiency level in a foreign language professional skills course offered through the Elliott School. The instructor tests the student during the course (<https://elliott.gwu.edu/foreign-language-proficiency-requirement/>) to determine if the required proficiency level has been achieved.

MASTER OF INTERNATIONAL POLICY AND PRACTICE

The demands of globalization are dramatically changing career and employment practices for individuals and organizations in international affairs. Professionals who want to excel in the international arena must have knowledge of international economic, political, and social trends. They must possess the analytical and management skills necessary to formulate

and advocate policies on key international issues, as well as the ability to negotiate and work effectively in cross-cultural settings.

The master of international policy and practice (MIPP) program enhances the capacities of mid-career students to lead change and take on the challenges of the twenty-first century by providing them with the tools and insights of cutting-edge scholarship.

The program's interdisciplinary curriculum combines three foundation courses with a wide variety of course options selected to suit the student's professional goals and intellectual interests. Most courses are offered in the late afternoon and early evening to accommodate student work schedules, making it ideal for working professionals. Cohort events throughout the year provide additional venues for professional networking with other students, faculty, and guest speakers.

Students in the MIPP program also benefit from the events and programs sponsored by the Elliott School's exceptional research centers and institutes. The Elliott School's active calendar of lectures, conferences, and workshops feature leading scholars and practitioners from the national and international policy communities.

Visit the program website (<https://elliott.gwu.edu/international-policy-and-practice/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 27 credits, including 9 credits in required courses and 18 credits in elective courses.

Students are required to have undergraduate-level background coursework in microeconomics and macroeconomics before enrolling in a graduate economics course. Undergraduate courses do not count toward the master's degree. Students who do not have prior coursework should consult with the Program Director regarding available options.

Code	Title	Credits
Required (9 credits)		
IAFF 6212	Strategy and Leadership	
IAFF 6213	Leadership Capstone	
One of the following courses in international economics:		
ECON 6250	Survey of Economic Development	
ECON 6280	Survey of International Economics	
ECON 6283	Survey of International Trade Theory and Policy	

ECON 6284	Survey of International Macroeconomics and Finance Theory and Policy
-----------	--

IAFF 6216	Economic Tools for Global Policy
-----------	----------------------------------

Electives (18 credits)

18 credits tailored to the individual student's needs and selected in consultation with an advisor and the Program Director. May include up to 3 credits of one-credit, skills-based workshops.

Students must complete degree requirements within three years of their admission to the program. Students who are temporarily unable to continue their studies may request a leave of absence not to exceed one year. Extensions beyond the three-year period may be granted in exceptional circumstances, but the student is required to register for Continuous Enrollment.

No more than 6 graduate credits may be transferred into the MIPP program from accredited institutions or from non-degree status. All credits considered for transfer must have been earned from accredited institutions. Transfer credits may be accepted only under limited conditions, including length of time since the courses in question were completed, grades earned, and relevance to the student's program. The sole exception to the transfer credit policy is made for students who attend one of the Elliott School's International Exchange Partner schools. Such students may transfer a maximum of 10 graduate credits, provided no prior transfer credit has been accepted. No student may transfer more than a total of 10 credits from all sources combined. Credit from foreign language courses is not eligible for transfer. Credit from a previously earned degree may not be counted toward the MIPP degree.*

Visit the MIPP program page (<http://elliott.gwu.edu/international-policy-and-practice/>) for additional information.

MASTER OF INTERNATIONAL POLICY AND PRACTICE-ONLINE

The demands of globalization are dramatically changing career and employment practices for individuals and organizations in international affairs. Professionals who want to excel in the international arena must have knowledge of international economic, political, and social trends. They must possess the analytical and management skills necessary to formulate and advocate policies on key international issues, as well as the ability to negotiate and work effectively in cross-cultural settings.

The international policy and practice program (MIPP) enhances the capacities of mid-career students to lead change and take on the challenges of the 21st century by providing them with the tools and insights of cutting-edge scholarship.

The program's interdisciplinary curriculum combines three foundation courses with a wide variety of course options that are selected to suit the student's professional goals and intellectual interests. Most courses are offered in the late afternoon and early evening to accommodate student work schedules, making it ideal for working professionals. All offerings under IAFF 6222 may be used for elective requirements and repeated for credit provided the topic differs.	

MASTER OF INTERNATIONAL STUDIES

The master of international studies (MIS) program creates an opportunity for students at our international partner institutions to spend a year at the Elliott School.

To thrive in today's international arena, successful professionals must possess knowledge of global and regional issues and a keen ability to communicate, negotiate, and lead in a multicultural environment. For many international affairs professionals, experience in Washington, DC, is an invaluable opportunity that strengthens and enhances their academic, professional, and cultural understanding of our globalized world.

The MIS is a unique program open to current students and recent alumni from MA programs at Elliott School partner institutions around the globe. MIS students complete an additional academic year of full-time study in Washington,

DC. Students pursue expanded study of a complementary global issue or world region, building upon the foundation of coursework completed at the partner school.

Whether one's interests are in global trade, the development world, international public health, security and conflict resolution, or other global and regional issues, the Elliott School's MIS program prepares students for careers in diplomacy, public service, international and non-governmental organizations, and multi-national organizations.

REQUIREMENTS

The following requirements must be fulfilled: 28 credits, including 9 to 12 credits in core field courses, a 4-credit capstone sequence, 12 credits in a major field, and 0 to 3 credits in elective courses. In addition, all students are required to fulfill a foreign language proficiency requirement.*

See notes regarding special topics, skills, and LAW courses**

Code	Title	Credits
Required		
Core field (9-12 credits)		
Three or four required courses in economics, history, and international affairs/political science, as described below. If the MIS candidate has taken an equivalent course at the partner institution, the student may transfer credit to satisfy that core field requirement with approval of the Program Director.		
3 credits in political science		
IAFF 6101	International Affairs Cornerstone (Fall)	
3 credits in history		
HIST 6030	History and Its Uses in International Affairs	
3-6 credits in economics using one of the following options:		
ECON 6280	Survey of International Economics	
or		
ECON 6283 & ECON 6284	Survey of International Trade Theory and Policy and Survey of International Macroeconomics and Finance Theory and Policy	
ECON 6280 is designed for students who have little background in economics. Those with a stronger prior background in economics may wish to substitute ECON 6280 with the ECON 6283 and ECON 6284 sequence for 6 credits. The ECON 6283 and ECON 6284 sequence is required for the international economic affairs concentration.		

Capstone (4 credits)

Students complete a two-course capstone sequence that most closely matches the thematic area of their project. The capstone sequence includes a 2-credit capstone workshop taken before the 2-credit capstone seminar. The two 2-credit capstone courses must be taken consecutively.

IAFF 6898 Capstone Workshop

IAFF 6899 Capstone Course

Specialization (12 credits)

Specializations in the MIS program consist of four courses (12 credits) selected from one of the global issues or regional areas listed below. Students should choose courses from more than one academic discipline to complete their specialization and are encouraged to discuss these choices with the MIS Program Director. Subject matter covered in special topics courses may vary each semester. If the student has taken a related course at the partner institution, this may be transferred to satisfy as a specialization course, with approval of the MIS Program Director. Requirements for the specialization are outlined below. Note that the focus of special topics courses vary by semester. Consult the Schedule of Classes for each semester's offerings. With permission of the Program Director, other topics courses not listed here may be used to fulfill program requirements.

Electives (0 to 3 credits)

Students who take ECON 6280 to fulfill the core requirement must take 3 credits in elective courses, which may be selected from disciplines including anthropology; business, economics, education, history, public administration, political sciences, among others. Up to 3 credits may be taken in skills courses.

Specializations

Thematic specializations

- Conflict and Conflict Resolution (p. 1015)
- Global Energy and Environmental Policy (p. 1016)
- Global Gender Policy (p. 1017)
- Global Health (p. 1018)
- International Affairs and Development (p. 1019)
- International Economic Affairs (p. 1021)
- International Law and Organizations (p. 1022)
- International Security Studies (p. 1022)
- Nuclear Policy (p. 1026)
- Technology and International Affairs (p. 1026)
- U.S. Foreign Policy (p. 1026)

Regional specializations

- Africa (p. 1014)
- Asia (p. 1015)

- Europe, Eurasia, and Russia (p. 1016)
- Latin America (p. 1025)
- Middle East (p. 1025)

*Foreign language proficiency requirement

Students in the master of international studies program are required to demonstrate proficiency in a modern language other than English. Students may fulfill this requirement in one of the following ways:

- Having earned a minimum grade of *B* in a sixth-semester university-level advanced language course completed no more than three years prior to matriculation in the Elliott School's master's degree program.
- Having earned a minimum grade of *B* in a sixth-semester university-level advanced language course at GW, or in an approved course taken at another institution of higher learning, including Elliott School exchange partner institutions, while enrolled in the Elliott School master's program.
- Passing the Elliott School-administered foreign language proficiency reading and speaking examination at the currently-required level of proficiency (<https://elliott.gwu.edu/foreign-language-proficiency-requirement/>). The Elliott School administers foreign language proficiency examinations once in the fall and once in the spring semesters. Students should plan to take the language proficiency examination as soon as possible following their matriculation in the program. Students have three opportunities to pass the examination. Failure to pass the examination for a third time results in dismissal from the program.
- Achieving the required proficiency level in a reading and speaking examination administered by an Elliott School-approved foreign language assessment institution, at the student's expense, while enrolled in the Elliott School's Master's Degree Program.
- Demonstrating the required foreign language proficiency level in a foreign language professional skills course offered through the Elliott School. The instructor tests the student during the course (<https://elliott.drupal.gwu.edu/international-affairs-masters/foreign-language/#skills>) to determine if the required proficiency level has been achieved.

As of fall 2018, the above policy applies to new and current students in the Elliott School's non-regional studies master's programs with a foreign language requirement. Consult the Program Director for more information.

**Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes (<http://my.gwu.edu/mod/pws/>) for each semester's offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the Program Director.

Additional information regarding skills courses (<https://elliott.gwu.edu/professional-skills-courses/>) is available on the Elliott School website.

Students may, with permission of their advisor, include courses offered by the Law School in their major field. Enrolling in a LAW course also requires permission of the Law School dean of students. Students should consult the Elliott School's Office of Academic Advising and Student Service before enrolling in LAW courses.

SPECIALIZATIONS

Specializations

Thematic specializations

- Conflict and Conflict Resolution (p. 1015)
- Global Energy and Environmental Policy (p. 1016)
- Global Gender Policy (p. 1017)

DUAL MASTER OF ARTS IN ELLIOTT SCHOOL PROGRAMS AND MASTER OF PUBLIC HEALTH

The Elliott School for International Affairs and the Milken Institute School of Public Health cooperate to offer a dual master of arts (MA) and master of public health (p. 1357) (MPH) degree program. Students must be admitted separately to both schools. Application for the dual degree program can be made after matriculation in either program but prior to completion of the initial degree.

The following MA/MPH areas of combined study are available:

Milken Institute School of Public Health

Master of Public Health in the following programs:

- Global health epidemiology and disease control
- Global health policy
- Global health program design, monitoring and evaluation
- Humanitarian Health

Elliott School of International Affairs

- Master of Arts (any program)

The Elliott School accepts up to 12 credits in MPH coursework toward requirements for the MA and the School of Public Health accepts up to 6 credits in Elliott School MA coursework towards requirements for the MPH.

All requirements for both programs must be fulfilled. Students completing the requirements for one program may apply to graduate with that degree prior to completing the second degree. Students also may request to withdraw from either program at any time to pursue a single degree. All degree requirements must be completed within five years of the student's date of matriculation in either program.

Visit the Elliott School (<https://elliott.gwu.edu/joint-and-dual-degrees/>) and School of Public Health (<https://publichealth.gwu.edu/programs/joint-degree-ma-mph/>) websites for additional information.

JOINT MASTER OF ARTS IN THE ELLIOTT SCHOOL AND JURIS DOCTOR DEGREE

The Elliott School of International Affairs cooperates with the Law School in offering a program of study leading to a joint master of arts and juris doctor degree. Student must be accepted for admission by both schools; applications should be made separately to each school, with a notice of interest in the joint program. The Law School stipulates that the first year of coursework for the Juris Doctor degree must be taken as a unit; students should consult with the Law School's Associate Dean for Student Affairs.

As part of this program, each school accepts up to 12 credits of coursework from the other school in fulfillment of its degree requirements. The Elliott School MA portion of the program may not include a thesis. The joint program takes approximately four years of full-time study for completion. All requirements for both degrees must be fulfilled. As degrees in joint programs are awarded simultaneously, degree requirements for both programs must be met before either degree is awarded. Joint degree students must apply for graduation from both schools. All work for this joint degree program must be completed in five years, unless an extension of time is granted by the respective deans.

Visit the Elliott School (<https://elliott.gwu.edu/joint-and-dual-degrees/>) and Law School (<https://www.law.gwu.edu/joint-degrees/>) websites for additional information

JOINT MA IN THE ELLIOTT SCHOOL AND MBA

The Elliott School of International Affairs and the GW School of Business offer a joint degree program leading to any of the master of arts degrees in the Elliott School (p. 833) and the master of business administration (p. 574) (MBA). Students must be admitted to both schools separately, and each school must approve the student's application to pursue the joint degree program.

The Elliott School counts up to 12 credits of business courses taken as part of the MBA toward the completion of the MA degree. The School of Business counts up to 12 credits of coursework completed in the MA program toward completion of the MBA. All requirements for both degrees must be fulfilled. As degrees in joint programs are awarded simultaneously, degree requirements for both programs must be met before either degree is awarded. Students should consult an advisor regarding detailed joint program requirements.

Visit the Elliott School (<https://elliott.gwu.edu/joint-and-dual-degrees/>) and School of Business (<https://business.gwu.edu/academics/programs/mba/joint-dual-degree-mba/>) websites for additional information.

CERTIFICATE PROGRAMS

Graduate certificate programs

The Elliott School of International Affairs offers a series of graduate certificates covering topics of specialized interest. The certificate programs are open to all graduate students presently enrolled in the Elliott School, Columbian College of Arts and Sciences, Graduate School of Education and Human Development, School of Business, and Milken Institute School of Public Health. The programs also are open to graduate students from other universities, individuals who already have earned a graduate degree, and individuals with a bachelor's degree and a minimum of eight years of relevant professional work experience. Applicants who have less than eight years of work experience are eligible to apply but must submit the same application materials required of other MA degree programs. Transfer credit from non-GW institutions is not accepted into any graduate certificate program. No more than 6 credits of graduate coursework taken in any degree or non-degree status within the University, including the Elliott School, may be included in any graduate certificate program. Additional information is available in the Elliott School Graduate Admissions office (<http://elliott.gwu.edu/graduate-admissions/>).

- Graduate certificate in global gender policy (p. 1037)
- Graduate certificate in international science and technology policy (p. 1038)
- Graduate certificate in nuclear policy (p. 1039)

GRADUATE CERTIFICATE IN GLOBAL GENDER POLICY

As gender inequality continues to challenge society, global gender policy continues to grow within international affairs. The graduate certificate program in global gender policy prepares students to become leaders in promoting gender equality around the world. Students in the program will take a cornerstone course on global gender policy, as well as a rigorous methods course that explores the challenges and best practices of gender-specific data collection and analysis. In addition to these core requirements, students can choose from elective courses on subjects from gender and disaster to human trafficking, as well as several one-credit skills courses related to this field.

REQUIREMENTS

Visit the program website (<http://elliott.gwu.edu/graduate-certificates/global-gender-policy/>) for additional program information.

The following requirements must be fulfilled: 15 credits, including one 3-credit core course and 12 credits in supporting courses. Up to 3 credits of skills courses may be applied to the supporting course requirements.

See notes regarding special topics and skills courses.*

Code	Title	Credits
Core Requirement (3 credits):		
IAFF 6102	Global Gender Policy	
Supporting Courses (12 credits)		
At least three courses from the following:		
ANTH 6501	Gender and Sexuality	
EDUC 6640	Selected Topics in International Education (Gender in International Education and Development)	
IAFF 3190W	Special Topics (Masculinities in International Affairs; open to graduate students)*	
IAFF 6118	Special Topics in International Affairs (Gender and Security)*	
IAFF 6118	Special Topics in International Affairs (Gender, War, and Peace)*	

IAFF 6118	Special Topics in International Affairs (Research Methods in Global Gender Issues) *
IAFF 6136	Gender and Development
IAFF 6138	Special Topics in International Development Studies (Gender and Development) *
IAFF 6138	Special Topics in International Development Studies (Gender, Disaster, and Development) *
IAFF 6138	Special Topics in International Development Studies (Gender, Power, and Sexuality in East Asia) *
IAFF 6138	Special Topics in International Development Studies (Human Trafficking)
IAFF 6138	Special Topics in International Development Studies (Violence, Gender, and Humanitarian Assistance) *
LAW 6350	Domestic Violence Law
LAW 6394	Sexuality and the Law
LAW 6570	International Human Rights of Women
LAW 6608	Feminist Legal Theory
PUBH 6399	Topics in Health Policy (Reproductive Health Policy)
SOC 6273	The Sex Industry
WGSS 2135	A Study of Women and Media
WGSS 6220	Fundamentals of Feminist Theory
WGSS 6221	Research Issues in Women's, Gender, and Sexuality Studies
WGSS 6230	Global Feminisms
WGSS 6238	Feminist Ethics and Policy Implications
WGSS 6240	Gender and Public Policy
WGSS 6241	Gender, Law, and Politics
WGSS 6268	Race, Gender, and Class
WGSS 6270	Seminar: Selected Topics **

Recommended Skills Courses

Up to three credits from the following can be applied to supporting course requirements:

IAFF 6502	Professional Skills I (Advocating for Women's Rights) *
IAFF 6502	Professional Skills I (Developing Effective Proposals)
IAFF 6502	Professional Skills I (Negotiation Skills)
IAFF 6502	Professional Skills I (Participatory Monitoring and Evaluation for Development)
IAFF 6502	Professional Skills I (Participatory Planning)
IAFF 6503	Professional Skills II (Feminist Research Methods for Post-Conflict Contexts) *
IAFF 6503	Professional Skills II (Gender Advisor: Roles and Skills) *
IAFF 6503	Professional Skills II (Gender Monitoring & Evaluation) *
IAFF 6503	Professional Skills II (Gender Responsive Budgeting) *
IAFF 6503	Professional Skills II (Political Analysis)

*These courses are directly affiliated with the Elliott School's Gender Equality Initiative in International Affairs and are strongly recommended to be taken as part of students' program of study.

**Only specific topics that are determined by the director to be relevant to the student's program of study may be used to fulfill this requirement. Any topic intended to be used for this requirement must be approved by the director prior to enrollment. Specific subject matter covered in special/selected topics courses varies by semester. Consult the Schedule of Classes for each semester's offerings. Topics courses not listed here may be used to fulfill program requirements if approved by the director.

Additional information regarding skills courses (<https://elliott.gwu.edu/professional-skills-courses/>) is available on the Elliott School website.

GRADUATE CERTIFICATE IN INTERNATIONAL SCIENCE AND TECHNOLOGY POLICY

Scientific and technological advances provide the basis of international competitiveness and account for the bulk of national growth and the improvement of the quality of life around the world. The ability to create, adapt, and adopt new technologies defines modern societies. In today's global environment, the need for innovation is essential for solving societal problems and staying ahead of competition. Developments in information technology, space exploration,

genetic modification, and advances in material science are governed and shaped by institutions that set science and technology policy. T

The Elliott School offers a graduate certificate in international science and technology policy, consisting of 18 credits (6 courses), for professionals and students interested in exploring this topic outside their primary field of study.

Visit the program website (<https://elliott.gwu.edu/graduate-certificates/international-science-technology-policy/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: a minimum of 15 credits, including one 3-credit core course and 12 credits in courses for a self-designed science and technology specialization.

At least three of the five courses required for the certificate must be taught by faculty in the International Science and Technology Policy (ISTP) MA program.

Code	Title	Credits
Core course (3 credits)		
One course from the following:		
IAFF 6141	International Science and Technology Policy Cornerstone	
Science and technology specialization (12 credits)		
Students work with the program director to develop a self-designed science and technology specialization consisting of four 3-credit courses. At least two of these courses must be selected from the following:		
ECON 6237	Economics of the Environment and Natural Resources	
ECON 6250	Survey of Economic Development	
ECON 6255	Economics of Technological Change (same as IAFF 6158: Economics of Technological Change)	
ECON 6283	Survey of International Trade Theory and Policy	
ECON 6295	Special Topics (Energy Economics)	
ECON 6301	Applied Microeconomic Theory	
ECON 6305	Applied Macroeconomic Theory	
IAFF 6118	Special Topics in International Affairs (Applied Qualitative Methods)	

IAFF 6118	Special Topics in International Affairs (Data Analytics in International Affairs)
IAFF 6142	Technology Creation/Diffusion
IAFF 6143	Science and Technology Policy Analysis
IAFF 6145	U.S. Space Policy
IAFF 6146	Space Law
IAFF 6148	Space and National Security
IAFF 6151	Environmental Policy
IAFF 6153	Science, Technology, and National Security
IAFF 6158	Special Topics in International Science and Technology Policy (Climate Change and Energy Policy)
IAFF 6158	Special Topics in International Science and Technology Policy (Economics of Space)
IAFF 6158	Special Topics in International Science and Technology Policy (Economics of Technological Change. Same as ECON 6255)
IAFF 6158	Special Topics in International Science and Technology Policy (Energy Policy)
IAFF 6186	Special Topics in Security Policy Studies (Cybersecurity)

GRADUATE CERTIFICATE IN NUCLEAR POLICY

The 15-credit graduate certificate in nuclear policy provides a broad knowledge of nuclear security, non-proliferation and arms control issues, as well as broader security and energy policy issues in an international affairs context. Unique to this certificate is the requirement of a hands-on scientific analysis course for non-scientists. Students will gain detailed knowledge of contemporary issues, critical thinking skills, and laboratory experience from expert faculty within the Elliott School of International Affairs.

Visit the program website (<https://elliott.gwu.edu/graduate-certificates/nuclear-policy/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 15 credits, including a 3-credit core course and 12 credits in supporting courses.

Code	Title	Credits
------	-------	---------

Required (3 credits)

One course from the following. The course not selected may be used as a supporting course.

IAFF 6106	Nuclear Weapons
-----------	-----------------

IAFF 6107	The Science of Nuclear Materials
-----------	----------------------------------

Supporting courses (12 credits)

Four courses from the following:

IAFF 6106	Nuclear Weapons *
-----------	-------------------

IAFF 6107	The Science of Nuclear Materials *
-----------	------------------------------------

IAFF 6118	Special Topics in International Affairs (Nuclear Energy)
-----------	---

IAFF 6118	Special Topics in International Affairs (Nuclear Security Policy)
-----------	--

IAFF 6158	Special Topics in International Science and Technology Policy (Energy Policy)
-----------	--

IAFF 6186	Special Topics in Security Policy Studies (Nuclear Strategy)
-----------	---

Other related courses may be counted toward supporting course requirements with the approval of the program director.

*If not used as the core course.

SCHOOL OF MEDICINE AND HEALTH SCIENCES

Dean B. Bass

Senior Associate Dean for Health Sciences R. Bushardt

Associate Deans A. Artino, C. Golden, R. Goldberg, T. Mallinson, L. Norris

Assistant Dean A. King

The George Washington University (GW) School of Medicine and Health Sciences (SMHS) is dedicated to improving the health of local, national, and global communities by:

- Educating a diverse workforce of tomorrow's leaders in medicine, science, and health sciences.
- Healing through innovative and compassionate care.
- Advancing biomedical, translational, and health services delivery research with an emphasis on multidisciplinary collaboration.
- Promoting a culture of excellence through inclusion, service, and advocacy.

As a globally recognized academic medical center, GW SMHS embraces the challenge of eliminating health disparities and transforming health care to enrich and improve the lives of those we serve.

Medical Programs

For information about GW medical programs, please refer to the medicine and health sciences website (<http://smhs.gwu.edu/>).

GW Health Sciences

GW Health Sciences (<http://smhs.gwu.edu/academics/health-sciences/>) comprises four (<https://smhs.gwu.edu/academics/health-sciences-programs/departments/>) academic departments: Biomedical Laboratory Sciences (<https://smhs.gwu.edu/academics/health-sciences-programs/departments/ihs-programs/>); Clinical Research and Leadership (<http://smhs.gwu.edu/crl/>); Health, Human Function, and Rehabilitation Sciences (<https://smhs.gwu.edu/academics/health-sciences-programs/departments/hhfrs-programs/>); and Physician Assistant Studies (<http://smhs.gwu.edu/pas/>). SMHS Health Sciences Programs prepare professionals for roles in selected specialties within health care. These programs emphasize the interdependent roles and responsibilities of professionals in health care practice, research, and leadership.

The mission of GW Health Sciences is built upon five tenets:

- Interdisciplinary education provides a foundation for the future of health care delivery and generates collaborative structures and models for benchmarking and improvement.
- Clinical training is a foundation for professional development in clinical practice.

- Community service learning applies to communities broadly and is an important component of education for the transformation of communities of practice, research, and access in health care.
- Cultivating leadership capacity development within the health sciences, medical, and scientific communities that we serve.
- Scholarship among faculty, staff, and students alike contribute to the process of new knowledge creation and are a foundation for advancing translational science in health care.

REGULATIONS

General Information

Vision

The George Washington University School of Medicine and Health Sciences (GW SMHS) is dedicated to improving the health of local, national, and global communities by:

- Educating a diverse workforce of tomorrow's leaders in medicine, science, and health sciences.
- Healing through innovative and compassionate care.
- Advancing biomedical, translational, and health services delivery research with an emphasis on multidisciplinary collaboration.
- Promoting a culture of excellence through inclusion, service, and advocacy.

As a globally recognized academic medical center, GW SMHS embraces the challenge of eliminating health disparities and transforming health care to enrich and improve the lives of those we serve.

Health Sciences Campus Locations

GW Health Sciences (<http://smhs.gwu.edu/academics/health-sciences/>) is a vibrant, diverse community of faculty, staff, and students across 50 academic and research programs, representing 34 fields of study. Our highly ranked academic programs and translational research initiatives are housed within four academic departments: Biomedical Laboratory Sciences (<https://smhs.gwu.edu/academics/health-sciences-programs/departments/ihs-programs/>), Clinical Research and Leadership (<http://smhs.gwu.edu/crl/>), Health, Human Function, and Rehabilitation Sciences (<https://smhs.gwu.edu/academics/health-sciences-programs/departments/hhfrs-programs/>), and Physician Assistant Studies (<http://smhs.gwu.edu/pas/>). Our division is also home to the Office of Integrative Medicine and Health (<https://smhs.gwu.edu/oimh/>), the GW Biomedical Informatics Center (<https://smhs.gwu.edu/biomedinfo/>), the GW Collaboratory for Health Research and Education (<https://smhs.gwu.edu/impact/collaboratory/>), an Advanced Metrics Lab, and a HRSA-funded Health Careers Opportunity Program (<https://smhs.gwu.edu/gwhcop/>). We value strategic partnerships, such as our collaboration with

the Alexandria City Public Schools in the Governor's Health Sciences Academy (<https://smhs.gwu.edu/hssp/>) at T.C. Williams High School.

We offer certificate, associate's, bachelor's, master's, and doctoral degree programs on two campuses - Foggy Bottom in Washington, D.C. and the Virginia Science and Technology Campus in Ashburn, Virginia - and in blended and online formats.

Health Sciences Mission and Vision

GW Health Sciences' mission is to drive innovation and quality in health and health care delivery through education, scholarship, and service. We strive to reflect our core values of diversity & inclusion, collaboration, and innovation by investing in people, living our social mission, influencing health professions education, health care policy and practice, and catalyzing innovation and entrepreneurship. Our vision is to be a leader in transforming health and health care delivery - locally, nationally, and globally. This vision aligns with the aspirations of the university: "Framed by our nation's capital, inspired by our namesake's vision, we the George Washington University aspire to preeminence as a comprehensive, global, research university."

Preamble

Students enrolled in GW Health Sciences are required to conform to all rules, regulations, and policies with University-wide applicability, including those contained in the Guide to Student Rights and Responsibilities (<https://studentconduct.gwu.edu/guide-student-rights-responsibilities/>) (hereinafter "the Guide"). The Guide is the University's primary document concerning student behavior, and it includes ten sections which address the following issues:

- # Student Rights and Responsibilities
- # Equal Opportunity
- # Sexual and Gender Based Harassment and Interpersonal Violence
- # Student Grievance Procedures
- # Student Conduct
- # Additional Conduct Regulations
- # Academic Integrity
- # Privacy of Student Records
- # Other University Policies
- # Security

Because of the unique curricular and degree-related requirements of health care professional and clinical research training programs, GW Health Sciences imposes higher standards than the University describes in the Guide. Therefore, the following GW Health Sciences Regulations (hereinafter "Regulations") have been adopted. In the event GW Health Sciences simply adopts University policy as published within the Guide, this is reiterated within the Regulations.

GW Health Sciences publishes its bulletin and Regulations on the SMHS bulletin website (<http://bulletin.gwu.edu/medicine-health-sciences/>). Additionally, select programs of study produce supplemental program handbooks (hereinafter "Handbooks") with additional guidance, policies, and resources for students. Handbooks, as applicable, are also published online and can be found within the Student Resources section available from the specified program's primary website. A full list of program primary websites can be found on the GW Health Sciences programs website (<https://smhs.gwu.edu/programs/>).

To the extent these Regulations or Handbooks are silent as to a particular right or procedure, such right or procedure is not intended to be afforded under these Regulations or Handbooks. In the case of any inconsistency or ambiguity between these Regulations and University-wide rules, regulations, and policies, including the Guide, these Regulations shall govern. Students are expected to comply with all University and GW Health Sciences policies and regulations; failure to do so may result in disciplinary action, including dismissal.

Admission

To be considered for admission, applicants must submit a completed application form online, together with all required supporting documentation and a non-refundable application fee. All applicants should review the technical standards and essential functions policies prior to application. Students applying to programs that require completion of clinical rotations or a supervised clinical experience should review Background Check and Drug Screen ([https://smhs.gwu.edu/sites/default/files/Background%20Check%20%20Drug%20Screening%20Policy%20\(mlr%20redline%202-22-18\)-1_RB%20FINAL\(mlr%20redline%203-1-18\)-1_RB%203_1_18\(1\).pdf](https://smhs.gwu.edu/sites/default/files/Background%20Check%20%20Drug%20Screening%20Policy%20(mlr%20redline%202-22-18)-1_RB%20FINAL(mlr%20redline%203-1-18)-1_RB%203_1_18(1).pdf)) prior to application.

Bachelor of Science in Health Sciences (BSHS) programs are designed for transfer students; applicants are expected to have completed a minimum of 45 credits of coursework from a regionally accredited post-secondary institution prior to entry. Applicants to the post-baccalaureate and graduate programs must hold a bachelor's degree from a regionally accredited college or university, with the exception of the doctoral programs which require a master's degree or entry-level professional doctorate. Official transcripts must be submitted from each academic institution attended, regardless of whether credit was earned or is desired. The transcript(s) must indicate a minimum cumulative grade-point average of 2.5 on a scale of 4.0 for undergraduate and post-baccalaureate applicants, and a 3.0 on a scale of 4.0 for graduate students. The applicant must be in good standing and eligible to return to the academic institution most recently attended. Dual degree applicants may have increased higher cumulative grade-point average requirements beyond these posted minimums; dual degree applicants should refer to the respective program's website under "Admissions Requirements" for guidance.

With evidence of special promise, an applicant whose academic record falls short of the minimum GPA may be accepted on a conditional basis; see Conditional Admission, below. Students who have been suspended or dismissed academically from GW will not be considered for admission for at least one year from the date of their last suspension or dismissal.

Applicants should refer to the individual program descriptions for information on prerequisites and supporting documents since these vary by program. It is the responsibility of applicants to ensure that all required application materials are submitted by the designated deadlines. Unofficial copies, facsimiles, or photocopies of transcripts, certificates, or diplomas are not accepted. All records become the property of the University and will not be returned.

Conditional Admission—Admission with conditions to GW Health Sciences may be offered at the discretion of the senior associate dean for health sciences (or delegate) and/or the respective program director. The terms of admission will be outlined in a letter of acceptance from GW. When any conditions of admission have not been satisfied, notification is sent from the Health Sciences Dean's Office regarding the student's academic standing and eligibility to continue in the program of study, which may include dismissal. Students dismissed for not meeting the conditions of their admission from non-clinical programs must sit out one calendar year before re-applying. Readmission is not guaranteed. Students enrolled in clinical programs should consult their program handbook for program-specific dismissal policies and procedures.

Advance Tuition Deposit—Upon notification of acceptance to GW Health Sciences, an orientation fee and/or advance tuition deposit may be required (including readmission). Programs requiring an orientation fee and/or advance tuition deposit publish this requirement on their website and notify students in writing of this deposit requirement at the time of acceptance.

Advance tuition deposits are credited toward tuition and are non-refundable. An orientation fee, if required by the program, must be submitted along with the tuition deposit and is also non-refundable.

Readmission—Students who were previously registered in GW Health Sciences but who did not register during the immediate preceding semester (summer sessions excluded) and who did not receive an approved leave of absence, must apply for readmission. In some cases, an abbreviated process for applying for readmission is available and students are notified of this option by their advisor. Otherwise, readmission requires completion of a new application. Students seeking to enroll in a different degree or field of study should complete a new application to the respective program. An abbreviated process for applying for readmission is not available for the following disciplines: clinical microbiology, medical laboratory sciences, molecular diagnostic science, laboratory medicine, leadership in clinical practice and education, physician assistant, physical

therapy, pre-medicine, and translational health sciences. Students who have subsequently earned academic credit from another academic institution while not enrolled at GW must submit complete official transcripts to the Health Sciences Dean's Office as a requirement for readmission. Readmission is not guaranteed.

Transfer Credit for Graduate Students—A maximum of one quarter of the credits of graduate coursework required for a degree or certificate may be approved for transfer to a graduate program in GW Health Sciences. These credits may come from enrollment in non-degree coursework at GW, or from another degree-granting school or college of GW, or another regionally accredited college or university. Eligible coursework must: be graduate-level credit, not be applied toward completion of requirements for another degree, and earned with a minimum acceptable grade of a *B* (grades of *B-* and below do not transfer). Requests for transfer credit must be submitted in writing and approved by the program director and the Health Sciences Dean's Office after admission to the program. The University reserves the right to determine course equivalency and degree applicability. Students in the clinical microbiology, laboratory medicine, leadership in clinical practice and education, molecular diagnostic science, occupational therapy, physician assistant, physical therapy, and translational health sciences programs should refer to the respective program handbook for specific transfer credit policies and procedures.

Transfer Credit/Advanced Standing for Undergraduates—Transfer credit may be awarded for appropriate coursework completed at other regionally accredited institutions provided minimum grade requirements have been met. The minimum acceptable grade is *C* for coursework to be applied toward an undergraduate degree (grades of *C-* and below do not transfer). Transfer credit may also be considered from Advanced Placement (AP) and International Baccalaureate Credit (IB) credit, as well as the College Level Examination Program (CLEP exams). Please refer to GW U (<https://undergraduate.admissions.gwu.edu/>) for information on maximum credits, minimum scores, and GW course equivalents for AP and IB credits. Advanced standing may also be awarded for non-traditional classroom or clinical experience as determined by the individual programs. The University reserves the right to determine course equivalency and degree applicability. Health Sciences degree programs vary in the amount of advanced standing they award. For bachelor's programs, no more than 60 credits are accepted as advanced standing. Degree candidates who are currently enrolled at the University and plan to take courses at other regionally accredited institutions for transfer credit must first obtain program approval. Students in the medical laboratory sciences and molecular diagnostic science programs should refer to the respective program handbook for specific transfer credit policies and procedures.

International Applicants—The following additional requirements pertain to international applicants. Additional guidance is available from the GW International Services Office (<https://internationalservices.gwu.edu/>).

Required Records—An evaluation of the applicant's official transcripts from institutions attended outside of the United States must be completed by an accredited international evaluation service and must be submitted whether or not the official record is in English. Refer to the program's admissions website for additional information on specific documents to submit and links to accepted accredited evaluation services.

Language Tests—Applicants whose native language is not English or who are not citizens of countries where English is the official language must submit official test scores for academic IELTS, TOEFL, or PTE. The following are the minimum scores for admission consideration:

- Academic IELTS: An overall band score of 7.0, with no individual band score below 6.0.
- TOEFL: 600 paper-based or 100 Internet-based.
- PTE: Overall score of 68

The IELTS/TOEFL/PTE requirement may be waived for applicants who hold a bachelor's degree or higher from a regionally accredited U.S. college or university; applicants who hold a bachelor's degree or higher from an international higher education institution must demonstrate through transcript evaluation from an accredited international evaluation service that the institution is equivalent to a U.S. regionally accredited college or university, and that English is the language of instruction at the institution where the degree was completed. Waivers may exist for citizens of countries where the official language is English, as determined by the GW International Services Office.

Financial Certificate—A Financial Certificate must be completed and submitted with the application for admission by all international students planning to study at the University under the authorization of either a student (F) or exchange visitor (J) visa. Satisfactory completion and submission of the Financial Certificate is required for the issuance of a Form I-20 or IAP-66. Please note that for online learners the financial certificate is not required.

Unclassified Students—A student who wishes to take individual courses in GW Health Sciences must obtain permission to register as an unclassified student by Health Sciences Dean's Office. If permission is granted, application is made with the Office of Non-Degree Students (<https://registrar.gwu.edu/non-degree-students/>). Permission to take individual courses, if granted, is generally limited to a total of 6 credits. Credit earned for courses taken as an unclassified student may be transferred to a degree program at the University if the courses are applicable to the program, have been taken for credit, and have been completed with the minimum grade required in the program. This should not exceed 6 credits. Successful

completion of coursework taken as an unclassified student does not guarantee admission to a degree program.

Student Progress and Records

Complete Withdrawal from the University—A student who wishes to withdraw from all courses, and the University, must complete a Complete Withdrawal Form (<https://registrar.gwu.edu/sites/g/files/zaxdzs2171/f/downloads/completewithdrawal.pdf>) and submit it to the Office of the Registrar via the student's program advisor. The deadline for complete withdrawal from all courses without academic penalty is the end of the tenth week of classes, with the exception of summer and accelerated courses, which may have different deadlines. Complete withdrawal after the tenth week requires a petition to the appropriate dean. A student who wishes to withdraw from one or all courses, but not the University, should submit a Registration Transaction Form (https://registrar.gwu.edu/sites/g/files/zaxdzs2171/f/downloads/reg_transaction_form.pdf) via the student's program advisor. A student who wishes to withdraw from the University upon completion of currently registered courses should notify their program director and the Health Sciences Dean's Office. It is highly recommended that before doing anything a student should contact their advisor to discuss their options.

All charges for courses from which the student withdraws are subject to the refund policy listed under Fees and Financial Regulations (<http://bulletin.gwu.edu/fees-financial-regulations/>) in this Bulletin. Failure to complete a Complete Withdrawal Form can result in an extended financial obligation and the recording of grades of F (Failure) or notations of Z (Unauthorized Withdrawal). There is no automatic drop for non-payment or no show.

Course Withdrawal—GW Health Sciences offers courses in many formats, including those that follow the traditional academic calendar, and those that have an alternative format (e.g. summer term, accelerated course). Course start date and end dates may be found on the Schedule of Classes (<https://my.gwu.edu/mod/pws/>). For a course following the traditional academic calendar, after the fourth week of classes, a dropped course is considered a withdrawal and a notation of 'W' will appear on the transcript. Students may withdraw through the end of the tenth. Withdrawals after the tenth week of classes require a petition to the Health Sciences Dean's Office. For courses that do not follow the traditional academic calendar (e.g. summer term, accelerated courses), withdrawal dates vary. Information related to the course withdrawal dates for courses that do not follow the traditional academic calendar may be found on the Health Sciences Student Services Course/Drop Refund Schedule (<http://smhs.gwu.edu/academics/health-sciences-programs/student-services/course-drop-refund-schedule/>).

Leave of Absence—A student who must interrupt active pursuit of the degree or certificate may petition the senior associate dean for health sciences (or delegate) through the respective program director, for a leave of absence for a

specified period of time, generally limited to one calendar year. If the petition is approved, the student must register for leave of absence in the specified fall and/or spring semester, following regular registration procedures. The request should be made using the Leave of Absence/Continuous Enrollment (https://registrar.gwu.edu/sites/g/files/zaxdzs2171/f/LOA_CE201901.pdf) form. Students who discontinue their studies without being granted a leave of absence, and students granted leave who do not return to active study at the close of the period of approved absence, must apply for readmission and are subject to the regulations and requirements then in force. The right to use University facilities is suspended while the leave is in effect.

Privacy of Student Records (academic records)– The University and its faculty and staff protect the privacy of students' education records as required by federal law and regulations and as set forth in this policy. Refer to Privacy of Student Records (<https://studentconduct.gwu.edu/privacy-student-records/>) within the Guide.

Privacy of Records (student health and wellness records)– The University is committed to implementing the best practices associated with privacy and security of health information for the protection of its students, faculty, staff, and those served by University clinics, counseling centers, and other programs or departments that provide health or health-related services. For students enrolled in programs that require completion of clinical rotations or a supervised clinical experience, additional requirements or procedures may apply; refer to the GW Health Sciences Health Screening and Immunization Policy ([https://smhs.gwu.edu/sites/default/files/Health%20Screening%20and%20Immunization%20Policy_rb%20\(1\)\(1\).pdf](https://smhs.gwu.edu/sites/default/files/Health%20Screening%20and%20Immunization%20Policy_rb%20(1)(1).pdf)).

Request for Accommodation for Students with Disabilities– GW is committed to providing an inclusive and welcoming environment that is accessible for everyone, including individuals with disabilities. Accessibility is an essential part of a positive experience and a critical component of the University's academic environment for students with disabilities, as well as for faculty, staff, and visitors who have disabilities. Refer to Technical Standards and Essential Functions within the Regulations. Refer also to program-specific technical standards and essential functions published within the respective Handbook. Additional guidance for students is available from GW Disability Support Services (<https://disabilitysupport.gwu.edu/>).

Students Called to Active Military Duty – Refer to the Policy Regarding Student Called to Active Military Service published within the University Bulletin (<http://bulletin.gwu.edu/university-regulations/#military>).

Tuition Refund–It is the policy of the GW Health Sciences to refund student tuition if notified of the class change, or dropped classes, within an appropriate period of time. Courses dropped prior to the first day of the semester will have 100% of the tuition charges cancelled. Courses dropped on or after

the first day of the semester are subject to Refund Schedules (<https://smhs.gwu.edu/academics/health-sciences-programs/student-services/course-drop-refund-schedule/>) which govern the prorated cancellation of semester tuition charges in cases of program adjustment or withdrawal. Refer to the Health Sciences Student Services Course/Drop Refund Schedule (<https://smhs.gwu.edu/academics/health-sciences-programs/student-services/course-drop-refund-schedule/>).

Student Expectations

Student Conduct–In addition to complying with the Guide (<https://studentconduct.gwu.edu/guide-student-rights-responsibilities/>), students enrolled in GW Health Sciences must adhere to additional Regulations regarding student conduct. Students enrolled in a program which publishes a separate Handbook, must also comply with the additional conduct requirements stated in the handbook. Violation of conduct standards described in the Guide, the Regulations, or the Handbook may result in disciplinary action, including dismissal. All students must be familiar with and abide by published conduct standards. Student orientation for and the assignment of a program advisor to each GW Health Sciences student provide additional means to support student understanding of and compliance with these standards.

Computer-Based Exams–Students in GW Health Sciences Programs, either online or on campus, who are required to take computer-based exams must utilize the remote proctoring system Remote Proctor NOW (RPNOW) by Software Secure, unless the student's particular health sciences program requires a different system approved by GW SMHS. Students are expected to follow all remote testing requirements before and during each quiz/exam. Each session is reviewed by Software Secure, Inc. (SSI) and GW Health Sciences program faculty/administration for violations and/or suspicious activity. GW SMHS expects that all students will demonstrate academic honesty in all academic endeavors, including but not limited to computer-based testing, as identified in the Guide (<https://studentconduct.gwu.edu/guide-student-rights-responsibilities/>). Refer to the Computer-Based Exam (<https://smhs.gwu.edu/sites/default/files/Computer-Based%20Exam%20Policy.pdf>) Policy (p. 1042).

Criminal Background Check and Drug Screens–Some criminal offenses preclude students from participating in patient care. In addition, some professional licensure boards prohibit licensure for those convicted of specific offenses. Thus, students from professional programs are subject to the statutory and/or regulatory requirements independently imposed by law, or as required by affiliating entities. Students must meet any and all requirements of the clinical facilities to which they are assigned for clinical rotations or supervised clinical experiences. Such requirements may be more extensive than referenced herein. Inability to participate in patient care or being subject to any other exclusion prescribed by law will preclude successful completion of the requisite curriculum. As such, affected students may not be eligible for

matriculation, continuation in the program, or graduation. Refer to Background Check and Drug Screening ([https://smhs.gwu.edu/sites/default/files/Background%20Check%20%20Drug%20Screening%20Policy%20\(mlr%20redline%202-22-18\)-1_RB%20FINAL\(mlr%20redline%203-1-18\)-1_RB%203_1_18\(1\).pdf](https://smhs.gwu.edu/sites/default/files/Background%20Check%20%20Drug%20Screening%20Policy%20(mlr%20redline%202-22-18)-1_RB%20FINAL(mlr%20redline%203-1-18)-1_RB%203_1_18(1).pdf)) Policy ([https://smhs.gwu.edu/sites/default/files/Background%20Check%20%20Drug%20Screening%20Policy%20\(mlr%20redline%202-22-18\)-1_RB%20FINAL\(mlr%20redline%203-1-18\)-1_RB%203_1_18\(1\).pdf](https://smhs.gwu.edu/sites/default/files/Background%20Check%20%20Drug%20Screening%20Policy%20(mlr%20redline%202-22-18)-1_RB%20FINAL(mlr%20redline%203-1-18)-1_RB%203_1_18(1).pdf)).

Dress Code in Patient Care (or Simulated) Settings–

All students must dress in a professional manner. Jeans, shorts, cutoffs, t-shirts, recreational clothing, clothing that obstructs movement required to meet training functions, or clothing that exposes areas of the chest, abdomen, or back are unacceptable attire. Only closed toed shoes are allowed in the clinical setting. Avoid wearing perfumes, scented lotions, or colognes in all clinical settings. With the exception of small, non-dangling earrings, no body piercings are acceptable in the clinical setting. For specific dress code requirements related to a program of study, please refer to the respective program's Handbook.

Ethical Behavior and Professionalism–GW Health Sciences expects its faculty, staff, and students to engage in ethical behavior and demonstrate professionalism in all aspects of their academic life. Refer to Ethical Behavior and Professionalism (https://smhs.gwu.edu/sites/default/files/Ethical%20Behavior%20and%20Professionalism%20Policy_MLR%20redline.pdf) Policy (https://smhs.gwu.edu/sites/default/files/Ethical%20Behavior%20and%20Professionalism%20Policy_MLR%20redline.pdf). This regulation provides expectations that exceed conduct standards published within the Guide (<https://studentconduct.gwu.edu/guide-student-rights-responsibilities/>).

Social Media–Refer to the University Social Media Policy. (<http://my.gwu.edu/files/policies/SocialMediaPolicyFINAL.pdf>)

Student Documentation in the Medical Record–It is the policy of GW SMHS to permit students in select clinical programs (e.g., physician assistant, physical therapy) to document in the medical record for educational purposes consistent with the policies of clinical facilities in which students rotate. Refer to the Student Documentation in the Medical Record Policy ([https://smhs.gwu.edu/sites/default/files/Student%20Documentation%20in%20the%20Medical%20Record%20Policy%20\(mlr%20redlined%202-22-18\)-1%20\(1\)%20RB%20FINAL.pdf](https://smhs.gwu.edu/sites/default/files/Student%20Documentation%20in%20the%20Medical%20Record%20Policy%20(mlr%20redlined%202-22-18)-1%20(1)%20RB%20FINAL.pdf)).

Technical Standards and Essential Functions–Regardless of the specific discipline of study, students within GW Health Sciences must demonstrate competency in the intellectual, physical, and social tasks that cumulatively represent the essential functions of professional practice within health science-related careers. Further, GW Health Sciences expects every graduate of its programs of study to demonstrate

the capacity and a personal commitment to address the challenge of eliminating health inequities and transforming health care to enrich and improve the lives of those we serve. Refer to Technical Standards and Essential Functions (<https://smhs.gwu.edu/sites/default/files/TECHNICAL%20STANDARDS%20and%20ESSENTIAL%20FUNCTIONS%20FINAL%20030618.pdf>). Students within select clinical programs (e.g., Medical Laboratory Sciences, Physician Assistant, Physical Therapy) must also comply with program-specific technical standards and essential functions, which may be found in the respective Handbook.

Campus Life and Safety

Diversity and Inclusion–Refer to University Policy on Equal Opportunity in the Guide (<https://studentconduct.gwu.edu/guide-student-rights-responsibilities/>) and the University Policy on Diversity and Inclusion (<https://smhs.gwu.edu/sites/default/files/Policy%20Statement%20on%20Diversity%20and%20Inclusion.8.25.15.JF.pdf>).

Exposure to Infectious and Environmental Hazards (Potential Health Risks)– For students in programs of study who are at risk of exposure to Bloodborne Pathogens or Environmental Hazards, GW Health Sciences adopts the Policy and Procedures on Health Sciences Clinical Student Occupational Exposures (https://smhs.gwu.edu/sites/default/files/Policy%20and%20Procedures%20on%20Health%20Sciences%20Clinical%20Student%20Occupational%20Exposures_Final_2020_06_15.pdf). The procedures detail the process through which students should seek evaluation and treatment for occupational exposures with blood and other potentially infectious material while training or performing their duties.

Right to Change Rules and Programs–The University reserves the right to modify or change requirements, rules, and fees as well as make changes in programs without notice whenever circumstances warrant such changes. Such regulations shall go into force whenever the proper authorities may determine. It is the practice of GW Health Sciences to communicate in writing (e.g. email, digital newsletter) to students should a change occur to the Health Sciences Bulletin and Regulations outside of the routine annual Bulletin revision process.

Sexual and Gender Based Harassment and Interpersonal Violence–Refer to the University's Sexual and Gender Based Harassment and Interpersonal Violence Policy in the Guide (<https://studentconduct.gwu.edu/guide-student-rights-responsibilities/>).

Student Health Insurance–All on-campus and international students (holding a J1 or F1 visa) enrolled in GW Health Sciences are required to carry student health insurance while they study at GW. Degree-seeking students who meet these criteria are automatically enrolled in the GW Student Health Insurance Plan (SHIP) and must submit an opt-out waiver if they have another insurance plan that meets required waiver criteria. Certificate-seeking students who meet these criteria will need

to opt-in in order to be enrolled in the GW SHIP. Please see Colonial Health Center (<https://healthcenter.gwu.edu/student-health-insurance/>) for more information, including how to waive and opt into GW student health insurance.

Substance Use—GW expects its community to support a “drug free” campus and abide by published regulations on the possession and/or use of alcohol and other substances that have the capacity to produce impairment. Refer to the University’s Code of Student Conduct and Alcoholic Beverage Consumption & Distribution Policy in the Guide (<https://studentconduct.gwu.edu/guide-student-rights-responsibilities/>). The Guide (<https://studentconduct.gwu.edu/guide-student-rights-responsibilities/>) also includes a copy of the most current Drug-Free Schools Disclosure Statement. GW Health Sciences provides additional guidance and student conduct expectations related to substance use which also includes resources for any individual affected by a substance use disorder.

Academic Standing

An enrolled student is considered to be in good academic standing provided that they are not on academic probation or suspension. The information outlined below applies to all GW Health Sciences students. Students are also expected to comply with any program-specific guidelines as detailed in the respective Handbook, including higher standards and additional requirements related to student academic progress and academic standing.

Evaluation of Academic Performance—Faculty members are responsible for evaluating the performance of students in a meaningful, useful, and timely manner and for assigning grades on a basis that is rational, just, and unbiased. Official grades for coursework may be obtained from the Office of the Registrar. Unofficial grades for coursework are available via the GWeb Information System.

Grades in Undergraduate Degree or Certificate and Post-Baccalaureate Certificate Programs—The following grading system is used: *A*, Excellent; *B*, Good; *C*, Satisfactory; *D*, Low Pass; *F*, Fail. At the discretion of the program and individual faculty, “+” or “-” (plus or minus) grades also may be assigned. Except for courses that specifically state that repetition for credit is permitted, a student enrolled in a program for an undergraduate degree or undergraduate-level certificate (including post-baccalaureate certificate) may not repeat a course in which a minimum grade of *C* was received, unless a petition to do so is approved by the senior associate dean for health sciences (or delegate) upon recommendation of the respective program director. If a course is repeated, the first grade remains on the student's record and is included in the cumulative GPA. GW Health Sciences is excluded from the Academic Forgiveness Policy. Symbols that may appear on the transcript include *CR*, Credit; *AU*, Audit; *P*, Pass; *NP*, No Pass; *I*, Incomplete; *IPG*, In Progress; *W*, Authorized

Withdrawal; *Z*, Unauthorized Withdrawal. These symbols are not considered in determining the GPA.

Grades in Graduate Degree and Certificate Programs—The following grading system is used: *A*, Excellent; *B*, Good; *C*, Minimum Pass; *F*, Fail. At the discretion of the program and individual faculty, “+” or “-” (plus or minus) grades also may be assigned. Except for courses that specifically state that repetition is permitted, a student enrolled in a program for a graduate degree or certificate may not repeat a course in which a minimum grade of *C* was received, unless a petition to do so is approved by the senior associate dean for health sciences (or delegate) upon recommendation of the respective program director. For graduate courses where a grade of *C-* or below was received, the course must be repeated for credit. If a course is repeated, the first grade remains on the student's record and is included in the cumulative GPA. Symbols that may appear on the transcript include *CR*, Credit; *AU*, Audit; *P*, Pass; *NP*, No Pass; *I*, Incomplete; *IPG*, In Progress; *W*, Authorized Withdrawal; *Z*, Unauthorized Withdrawal. These symbols are not considered in determining the GPA.

Incomplete/In Progress—The symbol of *I* indicates that the instructor has received a satisfactory explanation for the student's inability to complete the required work of the course and an extension has been granted. The grade may be used only if the student's prior performance in the course has been satisfactory. Any failure to complete the work of a course that is not satisfactorily explained to the instructor before the date when grades must be turned will result in the grade of *F* for the course. Incomplete work must be made up by a date agreed upon by the instructor and the student but no later than the last day of the examination period for the semester immediately following the semester or summer session in which the notation of *I* is assigned. An extension of one additional semester can be requested by the student and may be approved by the program director. When work for the course is completed, the grade earned replaces the symbol *I* on the transcript. An Incomplete that is not changed within the allotted time reverts to an *F*.

The symbol of *IPG* is reserved for courses (such as special projects) in which the final class date extends beyond the official University deadline for submitting grades. Once the course has been completed, the *IPG* is removed from the transcript and the earned grade recorded.

Unauthorized Withdrawal—The symbol of *Z* is assigned when students are registered for a course that they have not attended or have attended only briefly, and in which they have done no graded work. At the end of the academic year, students' records are reviewed; if there is more than one *Z* per semester, a student's record may be encumbered until released by the student's advisor or academic dean. The symbol *Z* is not a grade, but an administrative notation.

The Grade-Point Average—Scholarship is computed in terms of the grade-point average, based only on the student's record

in this University. The grade-point average is computed from grades as follows: A, 4.0; A-, 3.7; B+, 3.3; B, 3.0; B-, 2.7; C+, 2.3; C, 2.0; C-, 1.7; D+, 1.3; D, 1.0; D-, 0.7; F, 0, for each credit for which the student has registered in a degree program. In undergraduate courses, grades of F will be computed in the grade-point average but will not be considered as fulfilling degree requirements. In graduate programs, final course grades below C- are recorded as F.

Appeal Procedures for Cases of Alleged Improper

Academic Evaluation—Students who believe that a grade or evaluation is unjust or inaccurate may use the following appeal procedures:

- Step 1: Attempt resolution with the relevant faculty member and the student's program director.
 - The student must complete Section 1 of the Appeal Form for Cases of Alleged Improper Academic Evaluation (<https://smhs.gwu.edu/academics/health-sciences/student-services/policies-forms/>) and submit this written appeal to the relevant faculty member within ten calendar days of the time the grade is posted, with a copy to the program director.
 - The faculty member will review the student's Appeal and complete Section 2 of the form. Upon completion, the faculty member will submit the form to the program director with the student in copy.
 - A review shall be conducted by the program director, consulting with the student and respective faculty member(s) involved with the grade or evaluation under review as the program director finds appropriate. If the program director is the faculty member who assigned the grade or evaluation under review, then a senior academic official (e.g., department chair, associate dean) conducts the review process.
 - Following the program director's review, the program director's decision will be input in Section 3 of the Appeal Form. The completed Appeal Form will be provided to the student and the faculty member.
- Step 2: Escalate the appeal to the senior associate dean for health sciences.
 - If a mutually satisfactory resolution is not achieved in Step 1, the student may, within five calendar days of the decision of the program director (or senior academic official, if applicable) being rendered, appeal to the senior associate dean for health sciences.
 - The student must submit to the senior associate dean for health sciences a written letter of appeal, accompanied by the completed Appeal Form used in Step 1 and any other supporting documentation that the senior associate dean for health sciences permits.
 - Appeal requests are reviewed by the senior associate dean for health sciences, consulting with the student and all respective faculty members involved with the grade or evaluation under review, as the senior associate dean for health sciences finds appropriate, to

determine whether the grading procedures employed were fair, equitable, objective, and consistent. Appeal requests may be referred to the Health Sciences Student Evaluation Committee by the senior associate dean for health sciences to provide additional guidance and recommendations.

- The senior associate dean for health sciences (or delegate) will render a decision in writing to the student with the student's program director in copy. The decision of the senior associate dean for health sciences is final.

Warning—An undergraduate whose GPA falls at or above 2.5 but below 2.7, and a graduate student whose GPA falls at or above 3.0 but below 3.2 will receive a warning notification. The warning may be delivered to the student the form of an email. A record of warning notifications is maintained by the Health Sciences Dean's Office.

Academic Probation—*Undergraduate Program:* A full- or part-time student in an undergraduate degree or certificate program whose cumulative GPA falls below 2.5 will be placed on academic probation, and that status will be noted on the student's transcript. This probation extends over the period during which the student attempts an additional 12 credits of coursework. While on probation, students are allowed to register for no more than 12 credits per semester, unless approved by the program director and the senior associate dean for health sciences (or delegate). *Graduate Program:* A full- or part-time graduate degree or certificate candidate whose cumulative GPA falls below 3.0 will be placed on academic probation. For full-time students, probation extends for 9 credits or "full-time" as defined by the program; for part-time students, probation during the period in which the student attempts 9 credits of coursework. While on probation, full-time students may register for no more than a total of 9 credits (or "full-time" as defined by the program) unless an exception is approved by the program director and the appropriate dean; part-time students may register for a combination of 9 credits, but may not register for additional credits; e.g., a part-time student who attempts 6 credits in one semester would be restricted to 3 credits in the following semester of enrollment.

If the program director determines that extenuating and valid circumstances exist, a student may be granted an extension of the probationary period. If granted, the student will be notified by the program director outlining conditions to be met by the student. The student must return a statement to the program director by mail or email confirming that he/she has read, understands, and agrees to the conditions.

If the student fails to attain the conditions in the time specified, the student will be suspended (see Suspension, below). If the student succeeds in raising his/her cumulative GPA to the minimum scholarship requirements, academic probation is lifted. A student who has been placed on probation more than one time will be recommended for dismissal.

Suspension—Students on probation who have not raised their cumulative GPA within the allowed number of credits (12 for undergraduate and 9 for graduate students) may be suspended. A student suspended for poor scholarship may not register for any coursework at the University, even as an auditor. The Health Sciences Dean's Office mails or emails a Letter of Suspension notifying the student of suspension.

A student who is suspended for failure to raise the cumulative GPA may apply for readmission after one calendar year. Evidence must be presented to the student's program director, demonstrating that the student is better prepared to pursue academic coursework. Any student suspended twice for poor scholarship will not be readmitted. If the student fails to achieve the minimum GPA at the end of the semester following readmission, the program director may recommend that the student be dismissed and further enrollment prohibited; such a recommendation is reviewed by the appropriate dean, whose recommendation is forwarded to the senior associate dean for health sciences.

Dismissal—A dismissal represents a summary determination of program faculty that a student has failed to attain and apply the necessary knowledge, skills and behaviors within a program of study, or that the conduct of the student is inconsistent with published standards of ethical conduct and professionalism. Each program of study designates a faculty coordinator or faculty committee to continuously monitor and evaluate student academic progress and conduct. This coordinator or committee provides recommendations to the program director regarding individual student academic progress, including dismissal. The program director is responsible for making final determinations of student academic progress, including dismissal from a program of study.

The faculty and director of an academic program are responsible for ensuring students meet minimum performance expectations and demonstrate the competencies as defined for the respective program of study. The most common reason for a student dismissal is failure of the student to maintain minimum academic standards. Reasons for a student dismissal include, but are not limited to, the following:

- Academic dishonesty.
- Failure to comply with University or Program policies, procedures, or requirements.
- Failure to maintain minimum academic standards.
- Failure to make satisfactory progress in completing program requirements.
- Failure to support a safe, healthy learning environment.
- Inability to meet essential functions or technical standards required for a program of study.
- Performance in a patient care setting that threatens the delivery of safe, high quality, patient-centered care.
- Unethical or unprofessional behavior.

A dismissal is generally the final outcome of numerous informal and formal communications with the student regarding their unsatisfactory progress in the program. A program director informs any student subject to dismissal of this action in writing, which includes guidance on exit procedures, and will generally work with the student through the University exit process. A student who is dismissed from a program of study may apply for readmission after the lapse of one calendar year. Readmission is not guaranteed. Students should refer to the respective Handbook, if applicable, for more details on academic progress policies and procedures.

Dismissal Appeal—If a student believes they have been unfairly or unjustly dismissed from a program of study, an opportunity for appeal exists. A student who wishes to appeal a program dismissal decision must submit a request in writing within ten (10) calendar days of notification of the dismissal to senior associate dean for health sciences. This may be submitted via email to hsp@gwu.edu. The student's written appeal must clearly state which of the following conditions applies and set forth specific facts and relevant supporting materials to justify the merits of the appeal request:

- Procedural error as set forth in policy,
- Dismissal decision was inappropriate based on the circumstance, and/or
- Evidence is available now that was not available at the time of the dismissal to warrant an appeal.

Upon receipt of a dismissal appeal process that demonstrates at least one of the conditions stated above, the senior associate dean for health sciences refers the request to the Health Sciences Student Evaluation Committee, which is a SMHS standing committee (<http://smhs.gwu.edu/faculty/faculty-assembly/standing-committees/>). This committee investigates the dismissal decision and applicable policies, in consultation with the student and program faculty. After adequate investigation, the Committee makes a nonbinding recommendation to the senior associate dean, who subsequently renders a decision to uphold or reject the program dismissal decision. The decision of the senior associate dean is final.

The student may address the Committee and provide information to support the appeal. The Committee may prescribe, in its sole discretion, the manner, time, and form of any such address and/or information. Should the student choose not to meet with the Committee, the student may submit a written statement and any supporting documentation to the committee chair no later than the date the appeal is scheduled to be heard. While the student may have advisors, counsel, or other individuals available to lend support throughout the process, only the student who is appealing the dismissal is permitted to meet with the Health Sciences Student Evaluation Committee. The Committee may seek further information, testimony, or witnesses at their discretion during the appeals process. Students who provide testimony at the request of the committee abide by the Student Code

of Conduct in the Guide (<https://studentconduct.gwu.edu/guide-student-rights-responsibilities/>) and the Ethical Behavior and Professionalism Policy (https://smhs.gwu.edu/sites/default/files/Ethical%20Behavior%20and%20Professionalism%20Policy_MLR%20redline.pdf).

Programs of Study

Undergraduate Programs and Advisement—Students enrolled in undergraduate degree or undergraduate-level certificate programs (including post-baccalaureate certificates) must meet with their academic advisor (in person or electronically) to review a program of study, listing all coursework required for the degree or certificate, including applicable transfer credit. Changes to the program of study can be made through petition to the program, and changes may require approval by the senior associate dean for health sciences (or delegate).

Transfer within GW Health Sciences—To apply for a transfer from one health sciences program to another, a written request must be submitted to the senior associate dean for health sciences, along with the necessary supporting documentation required by the program. To change from certificate to degree program may require an admissions application.

Transfer outside Health Sciences Programs—No internal transfers are permitted from a program of study within GW Health Sciences to another GW school or college. To transfer outside of GW Health Sciences, a student must follow the full admission processes for the other GW program.

Changes within GW Health Sciences—A student may not substitute one course for another without approval of the program director, the department chair, and the appropriate dean. After the deadlines for adding or dropping courses, a student must obtain the permission of the course instructor, the program director, and the appropriate dean to change status from credit to audit or from audit to credit.

Adding and Dropping Courses—During the registration period (typically before the end of the second week of classes) students may add or drop courses using GWeb. There is no automatic drop for non-payment or no show. After the second week of classes, students who wish to add a course must complete a Registration Transaction Form and submit the form to the senior associate dean for health sciences via their program advisor. Adding a course after the second week requires a signature of the instructor or other authorized member of the department. For accelerated courses, adds may be restricted to the first week of classes given the compressed nature of the course format. Note that courses added after the term has begun will be subject to a late fee.

For courses following the traditional academic calendar, a course dropped during the first four weeks of classes does not appear on the student's transcript. Students may drop a course via GWeb through the end of the fourth week of classes. A course dropped after the fourth week but before the end

of the tenth week is assigned a notation of W (Authorized Withdrawal). After the end of the tenth week of classes, dropping a course without academic penalty is only possible after the student presents a petition to the senior associate dean for health sciences (or delegate) and receives written permission. Deadlines for summer or accelerated courses may vary. Refer to the Health Sciences Student Services Course/Drop Refund Schedule (<https://smhs.gwu.edu/academics/health-sciences-programs/student-services/course-drop-refund-schedule/>).

All charges for courses which the student drops or withdraws from are subject to the refund policy listed under Fees and Financial Regulations in this Bulletin. Students taking summer or accelerated courses should refer to the Health Sciences Student Services Course/Drop Refund Schedule for additional information. Failure to withdraw by these procedures can result in an extended financial obligation and the recording of a grade of F (Failure) or a notation of Z (Unauthorized Withdrawal).

Graduation Requirements

Degrees and certificates are conferred in January, May, and August. Degree-seeking students graduating from GW Health Sciences may participate in the commencement ceremony held each year in May.

To be recommended for graduation by the faculty, students must have met admission requirements; have completed satisfactorily the scholarship, curriculum, residence, and other requirements for the degree; have filed an application for graduation prior to the published deadline; and be free from all indebtedness to the University. Registration, either for coursework or for continuous enrollment, is required for the semester or summer session of which the degree is to be conferred.

Applications for graduation must be filed by October 1 for fall graduation, February 1 for spring graduation, and July 1 for summer graduation.

Undergraduate Residence Requirements—Bachelor of Science in Health Sciences programs follow the Residence Requirement under University Regulations.

Graduate and Doctoral Residence Requirements—Graduate and doctoral programs may set higher residency requirements; students should consult the program office or program handbook, if applicable.

Honors—Bachelor's degrees with honors are awarded to students whose academic records give evidence of particular merit. The student's grade-point average determines the level of honors as follows: *cum laude*, 3.4 to 3.59; *magna cum laude*, 3.6 to 3.79; *summa cum laude*, 3.8 to 4.0. The grade-point average includes all coursework completed at GW and is not rounded off. To be eligible for an honors designation, a student must complete at least 60 credits of coursework at GW.

The grade-point average is calculated by the Office of the Registrar, and the honors designation is entered on the transcript and the diploma of those students who earn an honors designation. If honors are entered in the commencement program, honors status is determined on the basis of work completed by the end of the seventh term and entered only for those students who have completed seven-eighths of the credits required for the degree. Honors indicated on the diploma are calculated on the basis of all coursework completed. The diploma and transcript are the official indication that a degree was conferred and honors awarded.

Certificate Completion—Students planning to complete a certificate by the end of a semester must submit an Application for Certificate Completion (https://registrar.gwu.edu/sites/g/files/zaxdzs2171/f/downloads/Certificate_Completion.pdf) by April 1 for spring semester, July 1 for summer sessions, and December 1 for fall semester. Completed applications should be sent to the Health Sciences Dean's Office via email to hspgrad@gwu.edu. Students completing a certificate are not recognized at the University Commencement and are not issued tickets to the ceremonies.

Financial Aid

Financial assistance for undergraduate students at GW is described in the Financial Aid Sourcebook from The George Washington University Office of Student Financial Assistance (<https://financialaid.gwu.edu/>). Undergraduate aid consists of two basic types: awards for academic achievement or talent without reference to financial circumstances (merit scholarships) and scholarships, grants, loans, and employment based on academic achievement and demonstrated financial need. All undergraduate gift aid (institutional scholarships and grants, and federal grants) requires that the recipient be working on the first undergraduate degree and be registered for a full-time workload at GW. Students are limited to ten semesters of institutional aid. Institutional aid is not available for online programs nor graduate programs. Loans and resident assistantships not based on financial need are available.

Several offices on campus provide information on financial assistance for graduate and certificate students. Information about funding opportunities is provided by the Office of Graduate Student Assistantships and Fellowships (<https://www2.gwu.edu/~fellows/>). Forms and information on federal loans for graduate students can be obtained from the Office of Student Financial Assistance (<https://financialaid.gwu.edu/>). Information on the Federal Work-Study Program, cooperative education opportunities, and on- and off-campus employment is available from the GW Center for Career Services (<https://careerservices.gwu.edu/>). Gift aid (scholarships, grants, fellowships, assistantships, etc.) is taxable to the extent that it exceeds the allowable costs of tuition, fees, and required books and supplies or is dedicated to other costs, such as room and board. Federal grants may be taxable if, together with other gift assistance, they exceed the allowable costs. In the case of a

student who is awarded tuition scholarships, grants, or awards from more than one source, the combined amount cannot exceed tuition charges; institutional aid is adjusted to this limit.

In general, consideration for financial aid is restricted to students in good academic standing who meet the minimum grade-point average for particular awards and are not financially encumbered by any other University office. Applications for institutional or federal aid cannot be processed if the relevant tax returns have not been filed in accordance with the IRS Code. Documents submitted as part of aid applications become the property of the University and cannot be returned. Federal regulations require that the University report suspected cases of fraud or misrepresentation to the appropriate federal, state, and local authorities.

Any student who is a member of a military reserve unit or the National Guard and is activated or called to active duty early in a semester or summer session is entitled to a full refund of all tuition and fees that they have paid toward the expenses of that academic term. If the notification of the call to active duty comes after the mid-term examinations or after other substantial graded work has been completed, the student has the option of either taking a full refund of tuition and fees or taking an Incomplete in their courses with the privilege of returning to complete all required coursework at some future date without payment of any further tuition and fee charges. It is the responsibility of the student to present evidence of their activation to the Health Sciences Dean's Office and the Office of Student Accounts and to request the appropriate refund.

All students on active duty are automatically exempted from the request for a \$50 voluntary library contribution without requiring any communication from them or their initials on the bill. Students can opt out of the fee with a button click on the Student Accounts bill pay site.

Students not meeting financial aid satisfactory academic progress (SAP) requirements may appeal to the Office of Financial Aid for review. The Office of Financial Aid notifies the student if they must complete the appeal process for reinstatement of aid. The appeal must state the reasons for failing to meet SAP requirements, such as special circumstances that contributed to the student's failure to make satisfactory academic progress (e.g., the death of a relative, an injury or illness of the student, or other special circumstances).

All appeals must be submitted to the Office of Financial Aid within two weeks of the date of notification that a student has not passed financial aid SAP.

Information on financial aid is accurate at the time each Bulletin is prepared for press. Future changes in federal regulations or institutional policies may alter the application requirements or program guidelines.

Policies and Definitions

Academic Residency—To earn a bachelor's degree, students must earn at least 60 credits at or through GW, which may

include a University-authorized study abroad and study away program. At least 30 of the 60 credits earned at or through GW must be in upper-level courses (numbered 2000 or above); at least 12 credits in upper-level courses must be in the major field, and at least 6 credits in upper-level courses must be in the minor field, if sought.

Attendance—Students may attend only those classes for which they are officially registered. Regular attendance is expected. A student suspended for any cause may not attend classes during the period of suspension. Students are held responsible for all of the work of the courses in which they are registered, and all absences must be excused by the instructor before provision is made to make up the work missed.

Auditing—A student who has been admitted to GW Health Sciences may register as an auditor in a class only with the permission of the instructor, the faculty advisor, and the appropriate dean. An auditor receives no academic credit and is not required to take active part in the class or to pass examinations. A student who takes a course as an auditor may not repeat it later for credit. The regular program tuition rate is charged for audited courses.

Continuous Enrollment—Once entered in a degree or certificate program, a student is expected to be continuously enrolled and actively engaged in fulfilling the requirements each semester of the academic year until such time as the degree is conferred or certificate completed. Students who break continuous enrollment at the University and do not request and receive a leave of absence (see Student Progress and Records above) must apply for readmission and, if granted, are subject to the requirements and regulations then in force. Students who plan to attend other institutions and apply credit earned toward graduation from this University must first obtain written approval from the program director and the appropriate dean.

Credit—Credit is awarded only after registration for a course and satisfactory completion of the required work, or upon assignment of advanced standing.

Transcripts of Record—Official transcripts of student records are issued by the Office of the Registrar (<https://registrar.gwu.edu/>) and may be requested through GWeb (https://banweb.gwu.edu/PRODCartridge/twbkwbis.P_WWWLogin/) or TranscriptsPlus (<https://www.credentials-inc.com/CGI-BIN/dvcgitp.pgm?ALUMTRO001444>) by any student or former student who has paid all charges, including any outstanding student loan installments, due to the University at the time of the request. A fee is charged for each transcript. Partial transcripts are not issued. Unofficial transcripts can be obtained via the Office of the Registrar and through the GWeb Information System.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Science in Health Sciences with a major in bioinformatics (p. 1054)
- Bachelor of Science in Health Sciences with a major in biomedical informatics (p. 1055)
- Bachelor of Science in Health Sciences with a major in clinical health sciences (p. 1057) (military contract)
- Bachelor of Science in Health Sciences with a major in clinical embryology and assisted reproductive technology (p. 1056)
- Bachelor of Science in Health Sciences with a major in clinical operations and health care management (p. 1059)
- Bachelor of Science in Health Sciences with a major in clinical research administration
- Bachelor of Science in Health Sciences with a major in emergency medical services management
- Bachelor of Science in Health Sciences with a major in global leadership in disaster response
- Bachelor of Science in Health Sciences with a major in leadership for emergency action and disaster response (military contract)
- Bachelor of Science in Health Sciences with a major in medical laboratory science
- Bachelor of Science in Health Sciences with a major in molecular diagnostic sciences (p. 1066)

Combined programs

- Dual Bachelor of Science in Health Sciences with a major in clinical operations and healthcare management and Master of Science in Health Sciences in the field of health care quality (p. 1067)
- Dual Bachelor of Science in Health Science with a major in clinical research administration and Master of Science in Health Sciences in the field of biomedical informatics (p. 1068)
- Dual Bachelor of Science in Health Sciences with a major in clinical research administration and Master of Science in Health Sciences in the field of clinical research administration
- Dual Bachelor of Science in Health Sciences with a major in clinical research administration and Master of Science in Health Sciences in the field of clinical translational research
- Dual Bachelor of Science in Health Sciences with a major in clinical research administration and Master of Science in Health Science in the field of regulatory affairs
- Dual Bachelor of Science in Health Sciences with a major in medical laboratory sciences and Master of Science in Health Sciences in the field of molecular diagnostic sciences (p. 1068)
- Dual Bachelor of Science in Health Sciences with a major in molecular diagnostic sciences and Master of Science

in Health Sciences in the field of clinical microbiology (p. 1069)

Minors

- Minor in anatomy (p. 1069)
- Minor in blood banking for medical laboratory science (p. 1069)
- Minor in emergency health services

MASTER'S

Master's programs

- Master of Science in Health Sciences in the field of biomedical informatics (p. 1070)
- Master of Science in Health Sciences in the field of clinical microbiology (p. 1071)
- Master of Science in Health Sciences in the field of clinical operations and health care management (p. 1071)
- Master of Science in Health Sciences in the field of clinical research administration (p. 1072)
- Master of Science in Health Sciences in the field of clinical and translational research (p. 1073)
- Master of Science in Health Sciences in the field of correctional health administration (p. 1074)
- Master of Science in Health Sciences in the field of health care quality (p. 1074)
- Master of Science in Health Sciences in the field of immunohematology and biotechnology (p. 1075)
- Master of Science in Health Sciences in the field of integrative medicine (p. 1076)
- Master of Science in Health Sciences in the field of laboratory medicine (p. 1077)
- Master of Science in Health Sciences in the field of medical laboratory science (p. 1077)
- Master of Science in Health Sciences in the field of molecular diagnostic science (p. 1078)
- Master of Science in Health Sciences in the field of regulatory affairs (p. 1078)
- Master of Science in Health Sciences in the field of physician assistant (p. 1079)
- Master of Science in Health Sciences in the field of translational microbiology (p. 1080)

Joint degree programs

- Master of Science in Health Sciences in the field of physician assistant and Master of Public Health (Milken Institute School of Public Health) (p. 1081)

Military contract program

- Master of Science in Health Sciences in the field of immunohematology (p. 1075)

DOCTORAL

Doctoral programs

- Doctor of Health Sciences in the field of leadership in clinical practice and education (p. 1088)
- Doctor of Philosophy in the field of translational health sciences (p. 1089)
- Doctor of Physical Therapy (p. 1090)
- Advanced Practice Clinical Doctorate in Occupational Therapy (p. 1092)

CERTIFICATES

Post-baccalaureate certificates

- Post-baccalaureate certificate in blood banking for medical laboratory science (p. 1097)
- Post-baccalaureate certificate in chemistry for medical laboratory science (p. 1098)
- Post-baccalaureate certificate in clinical microbiology (p. 1098)
- Post-baccalaureate certificate in hematology for medical laboratory science (p. 1099)
- Post-baccalaureate certificate in medical laboratory science (p. 1099)
- Post-baccalaureate certificate in microbiology for medical laboratory science (p. 1099)
- Post-baccalaureate certificate in molecular diagnostic sciences (p. 1100)
- Post-baccalaureate certificate in pre-medicine (p. 1101)

Graduate certificates

- Graduate certificate in biomedical informatics (p. 1092)
- Graduate certificate in clinical operations and health care management (p. 1093)
- Graduate certificate in clinical research administration (p. 1093)
- Graduate certificate in clinical and translational research (p. 1094)
- Graduate certificate in clinical research practice (p. 1094)
- Graduate certificate in correctional health administration (p. 1095)
- Graduate certificate in health care quality (p. 1095)
- Graduate certificate in health sciences (p. 1096)
- Graduate certificate in health services and outcome research (p. 1096)
- Graduate certificate in integrative medicine (p. 1096)
- Graduate certificate in regulatory affairs (p. 1097)

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
 - Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
 - Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
 - The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office
-
- Anatomy and Regenerative Biology (ANAT) (p. 1407)
 - Clinical Embryology and Reproductive Technology (CERT) (p. 1462)
 - Clinical Management Leadership (CML) (p. 1463)
 - Clinical Research and Administration (CRA) (p. 1466)
 - Clinical Translational Science (CTS) (p. 1467)
 - Correctional Health Administration (CHA) (p. 1517)
 - Emergency Health Services (EHS) (p. 1564)
 - Health Care Quality (HCQ) (p. 1617)
 - Health Sciences (HSCI) (p. 1619)
 - Human Function and Rehabilitation (HFR) (p. 1645)
 - Informatics (INFR) (p. 1651)
 - Integrative Medicine (INTM) (p. 1657)
 - Medical Laboratory Science (MLS) (p. 1699)
 - Occupational Therapy (OT) (p. 1713)
 - Pharmacogenomics (PHRG) (p. 1718)
 - Physician Assistant (PA) (p. 1729)
 - Physical Therapy (PT) (p. 1725)
 - Regulatory Affairs (RAFF) (p. 1806)
 - Translational Health Sciences (THS) (p. 1852)

UNDERGRADUATE PROGRAMS

Bachelor's programs

- Bachelor of Science in Health Sciences with a major in bioinformatics (p. 1054)
- Bachelor of Science in Health Sciences with a major in biomedical informatics (p. 1055)
- Bachelor of Science in Health Sciences with a major in clinical health sciences (p. 1057) (military contract)
- Bachelor of Science in Health Sciences with a major in clinical embryology and assisted reproductive technology (p. 1056)
- Bachelor of Science in Health Sciences with a major in clinical operations and health care management (p. 1059)
- Bachelor of Science in Health Sciences with a major in clinical research administration

- Bachelor of Science in Health Sciences with a major in emergency medical services management
- Bachelor of Science in Health Sciences with a major in global leadership in disaster response
- Bachelor of Science in Health Sciences with a major in leadership for emergency action and disaster response (military contract)
- Bachelor of Science in Health Sciences with a major in medical laboratory science
- Bachelor of Science in Health Sciences with a major in molecular diagnostic sciences (p. 1066)

Combined programs

- Dual Bachelor of Science in Health Sciences with a major in clinical operations and healthcare management and Master of Science in Health Sciences in the field of health care quality (p. 1067)
- Dual Bachelor of Science in Health Science with a major in clinical research administration and Master of Science in Health Sciences in the field of biomedical informatics (p. 1068)
- Dual Bachelor of Science in Health Sciences with a major in clinical research administration and Master of Science in Health Sciences in the field of clinical research administration
- Dual Bachelor of Science in Health Sciences with a major in clinical research administration and Master of Science in Health Sciences in the field of clinical translational research
- Dual Bachelor of Science in Health Sciences with a major in clinical research administration and Master of Science in Health Science in the field of regulatory affairs
- Dual Bachelor of Science in Health Sciences with a major in medical laboratory sciences and Master of Science in Health Sciences in the field of molecular diagnostic sciences (p. 1068)
- Dual Bachelor of Science in Health Sciences with a major in molecular diagnostic sciences and Master of Science in Health Sciences in the field of clinical microbiology (p. 1069)

Minors

- Minor in anatomy (p. 1069)
- Minor in blood banking for medical laboratory science (p. 1069)
- Minor in emergency health services

BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN BIOINFORMATICS

Bioinformaticists use computers to analyze, organize, and visualize biological data in ways that increase the understanding of this data and lead to new discoveries. Graduates of this program will be well-qualified for many

rewarding careers, including those in bioinformatics software development, biomedical research, biotechnology, comparative genomics, genomics, molecular imaging, pharmaceutical research and development, proteomics, and vaccine development.

Visit the program website (<https://smhs.gwu.edu/bioinformatics/>) for more information.

REQUIREMENTS

The following requirements must be fulfilled:

Code	Title	Credits
60 credits of general education including:		
3 credits English composition		
3 credits humanities		
6 credits social science		
8 credits biology with lab		
8 credits of general or inorganic chemistry with lab		
4 credits of organic chemistry with lab or 4 credits of genetics with lab		
8 credits in computer science (or related coursework in programming languages)		
4 credits in calculus		
3 credits in statistics		
13 credits in elective courses. Additional courses in biology, chemistry, computer science, mathematics, and/or statistics are recommended.		
Required		
HSCI 2105	Current Issues in Bioethics	
HSCI 2112W	Writing in the Health Sciences	
HSCI 4106	Introduction to Epidemiology for Health Sciences	
HSCI 4112W	Research and Writing in Health Sciences	
INFR 3101	Introduction to Bioinformatics	
INFR 3102	Scripting	
INFR 3103	Genomics	
INFR 4120	Bioinformatics Algorithms	
INFR 4121	High Performance Computing	
INFR 4122	Advanced Scripting	

INFR 4123	Statistical Genetics
INFR 4203	Seminar in Computational Biology
6 credits from the following (may be repeated for credit):	
INFR 4204	Bioinformatics Internship
INFR 4205	Bioinformatics Research Project
Electives	
9 credits from the following:	
INFR 3104	Human Genetics
HSCI 3105	Biochemistry
HSCI 3106	Microbiology for Health Sciences
HSCI 3117	Principles of Biostatistics for Health Sciences
9 credits from the following:	
INFR 4101	Introduction to Medical Informatics
INFR 4102	Survey of Medicine for Informaticians
INFR 4104	Medical Informatics Terminology & Standards
INFR 4105	Consumer Health Informatics
INFR 4106	Population Health for Medical Informatics

BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN BIOMEDICAL INFORMATICS

The introduction of electronic health records and health databases within the clinical setting has transformed health care. Informatics serves as the bridge between human-computer interactions in the health care space, as well as how the data we collect in these settings can be leveraged to improve patient safety, outcomes, and quality.

Visit the program website (<https://smhs.gwu.edu/biomedical-informatics/programs/undergraduate/>) for more information.

REQUIREMENTS

The following requirements must be fulfilled: 120 credits, 60 of which must be completed at GW. Up to 60 credits from coursework taken elsewhere may be transferable.

Code	Title	Credits
General education and advanced standing		
3 credits in English composition		
3 credits in the humanities		
6 credits in social sciences		
4 credits in biology with lab. Anatomy and physiology with lab is acceptable.		
3 credits in mathematics (college algebra level or above)		
4 credits in computer science		
37 transfer credits and electives. Credit from non-traditional sources, i.e., other than from academic coursework, may be considered on a case-by-case basis. This may include military coursework, credit-by-exam, and non-college based health programs.		
60 credits in major coursework, which must be completed at GW.		
HSCI 2105	Current Issues in Bioethics	
HSCI 2112W	Writing in the Health Sciences	
HSCI 3117	Principles of Biostatistics for Health Sciences	
HSCI 4112W	Research and Writing in Health Sciences	
INFR 3102	Scripting	
INFR 4101	Introduction to Medical Informatics	
INFR 4102	Survey of Medicine for Informaticians	
INFR 4103	Programming for Informaticians	
INFR 4104	Medical Informatics Terminology & Standards	
INFR 4105	Consumer Health Informatics	
INFR 4106	Population Health for Medical Informatics	
INFR 4107	Clinical Decision Support	
INFR 4108	Information Extraction for Medical Informatics	
INFR 4109	Evaluation Methods in Medical Informatics	
INFR 4110	Biomedical Data Science	
INFR 4122	Advanced Scripting	

One of the following courses selected with the advisor's approval:

INFR 4197 Medical Informatics Internship *

INFR 4198 Medical Informatics Research Project *

Electives

Three courses selected from the following with the advisor's approval:

HSCI 2101 Psychosocial Aspects of Health and Illness

HSCI 2102 Pathophysiology

HSCI 2103 Health Policy and the Health Care System

HSCI 2108 Quality Improvement in Health Care

HSCI 4106 Introduction to Epidemiology for Health Sciences

INFR 4121 High Performance Computing

*Students may repeat INFR 4197 or INFR 4198 as an elective once other degree requirement have been met. Alternative elective courses may be approved by the advisor.

BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN CLINICAL EMBRYOLOGY AND ASSISTED REPRODUCTIVE TECHNOLOGY

The bachelor of science in health sciences with a major in clinical embryology and assisted reproductive technology program is designed prepare graduates with the theoretical knowledge and practical skills for positions in assisted reproductive technology laboratories, biotechnology companies, research institutes and hospitals. In addition, program graduates will be eligible to take the embryology and andrology board of certification examination (ELS and ALS) offered by the American Board of Bioanalysis (ABB). The curriculum will also ensure that graduates will be prepared to pursue an advanced degree beyond the baccalaureate if they so choose.

Visit the program website (<https://healthsciencesprograms.gwu.edu/program/the-george-washington-university-bshs-in-clinical-embryology-and-assisted-reproductive-technology-bachelor-1571160919685/>) for more information.

REQUIREMENTS

The following requirements must be fulfilled:

Code	Title	Credits
General education and advanced standing ¹		
3 credits of English composition ²		
8 credits of biology with lab		
8 credits of general or inorganic chemistry with lab		
3 credits of college math (algebra, statistics, or higher)		
3 credits of humanities ²		
6 credits of social sciences ²		
A minimum of 29 credits in elective coursework. Elective coursework may include courses in pathophysiology or anatomy and physiology, ethics or values, and global/cross-cultural perspectives. Credit from non-traditional sources, i.e., other than from academic coursework, may be considered on a case-by-case basis. This may include military coursework, credit-by-exam, and non-college based health programs. ¹		
60 credits in major coursework, which must be completed at GW		
HSCI 2112W	Writing in the Health Sciences	
HSCI 4112W	Research and Writing in Health Sciences	
MLS 3000	Clinical Laboratory Mathematics	
MLS 3001	Professional Ethics for Medical Laboratory Scientists	
MLS 3003	Biochemistry for Laboratory Science	
MLS 4141	Immunology and Serology	
MLS 4151	Molecular Diagnostics	
MLS 4251	Molecular Diagnostics Laboratory	
MLS 4158	Laboratory Management and Operations	
MLS 4171	Human Genetics	
CERT 3004	Endocrinology for Health Sciences	
CERT 3005	Topics in Biomedical Science	
CERT 4010	Clinical Human Embryology	
CERT 4011	Human Embryology Laboratory	
CERT 4012	Clinical Human Andrology	

CERT 4013	Human Andrology Laboratory
CERT 4014	Human Reproductive Cryobiology
CERT 4015	Human Cryobiology Laboratory
CERT 4016	Preimplantation Genetic Diagnosis Laboratory
CERT 4017	Clinical Experience in Embryology
CERT 4018	Clinical Experience in Andrology
CERT 4019	Clinical Experience in Cryobiology
CERT 4020	Clinical Experience in Preimplantation Genetic Diagnosis

3 credits in elective MLS or HSCI courses approved by the program director.

¹ Up to 60 credits may be transferable from coursework taken elsewhere. Students should contact the program office for an assessment on the transferability of previous coursework. To be considered for transfer credit, coursework must be:

- College-level
- Academic in nature
- Completed at a regionally accredited institution
- Earned with a minimum grade of C (C- grades do not transfer)

² Students missing coursework in these areas may be considered for admission to the program if they have at least 45 college credits, and those credits include all other prerequisite courses. Students will need to complete missing coursework after admission to fulfill degree requirements.

BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN CLINICAL HEALTH SCIENCES

The bachelor of science in health sciences (BSHS) with a major in clinical health sciences degree program is available only to active-duty Navy IDCs, Army 18Ds, and Air Force IDMTs. Coast Guardsmen who completed a Navy IDC School may be eligible, depending on their current duty assignment.

This distance learning program offers active-duty Navy IDCs, Army Special Forces Medical Sergeants (18Ds), and Air Force Independent Medical Technicians (IDMTs) a way to formalize their specialized military training with a GW degree. All courses are offered online in a flexible, asynchronous format allowing students to pursue their degree, regardless of time zone, station, or overseas assignment. The clinical rotations are

arranged by students in their current duty station or location, and must be completed while on active-duty.

Visit the program website (<https://online.gwu.edu/bachelor-science-health-sciences-clinical-health-sciences/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 120 credits divided into three degree components.

Code	Title	Credits
------	-------	---------

Advanced standing and electives (60 credits):

During the first semester the student is enrolled in the program, advanced standing for eligible military courses will be noted on the student's record and applied towards the bachelor's degree.

General education (24 credits):

3 credits of English composition

4 credits of natural or physical science with lab

8 credits of mathematics, science, or statistics

6 credits of social sciences

3 credits of humanities

If a student still needs general education coursework, GW offers online coursework for some of these requirements.

Code	Title	Credits
------	-------	---------

Recommended coursework at GW (for those missing general education requirements)

General education

English composition

HSCI 2100	Writing and Composition in the Health Sciences
-----------	--

Humanities

HSCI 2107	Health Care in Literature
-----------	---------------------------

Social sciences

HSCI 2103	Health Policy and the Health Care System
-----------	--

HSCI 2111	Development of the Health Care Professions
-----------	--

HSCI 4103	Health Care Law/Regulation
-----------	----------------------------

Science or statistics

HSCI 2117	Introduction to Statistics for Health Sciences
-----------	--

HSCI 3106	Microbiology for Health Sciences
-----------	----------------------------------

HSCI 3117	Principles of Biostatistics for Health Sciences
-----------	---

MLS 2000	Biology for Health Sciences
----------	-----------------------------

MLS 2001	Chemistry for Health Sciences
----------	-------------------------------

Code	Title	Credits
------	-------	---------

At least 36 credits of GW coursework including:

Foundation courses

EHS 2109	Infectious Diseases and Bioterrorism
----------	--------------------------------------

HSCI 2050	Foundations of Health Equity
-----------	------------------------------

HSCI 2101	Psychosocial Aspects of Health and Illness
-----------	--

HSCI 2105	Current Issues in Bioethics
-----------	-----------------------------

HSCI 2110	Disease Prevention and Health Promotion Concepts
-----------	--

or HSCI 2114	Health Care in Developing Nations
--------------	-----------------------------------

HSCI 2112W	Writing in the Health Sciences
------------	--------------------------------

HSCI 2130	Primary Care Skills Practicum *
-----------	---------------------------------

HSCI 2131	Adult Primary Care Practicum *
-----------	--------------------------------

HSCI 2133	Specialized Clinical Experience *
-----------	-----------------------------------

HSCI 3117	Principles of Biostatistics for Health Sciences
-----------	---

or HSCI 2117	Introduction to Statistics for Health Sciences
--------------	--

HSCI 4102	Human Physiology in Extreme Environments
-----------	--

HSCI 4112W	Research and Writing in Health Sciences
------------	---

Electives

One of the following selected in consultation with advisor

EHS 2160	Disaster Response Planning and Management
----------	---

EHS 2161	Principles of Hazardous Materials and CBRNE Incident Management
----------	---

EHS 2211	Introduction to Telemedicine
----------	------------------------------

EHS 3101	Leadership Concepts
EHS 3105	Integrated Response to High Impact Violent Incidents
HSCI 2114 or HSCI 2110	Health Care in Developing Nations Disease Prevention and Health Promotion Concepts
HSCI 4106	Introduction to Epidemiology for Health Sciences

*Must be completed while on active-duty. Students arrange rotations at their current duty stations. All rotations require a MD or PA preceptor.

Students who complete HSCI 2117 to meet the general education requirement in science or statistics must then take HSCI 3117 to meet the major requirement.

Students may choose to take either HSCI 2110 or HSCI 2114 to meet a major requirement; the alternate course may be used towards the elective requirement. One course cannot not meet two different degree requirements simultaneously.

Transferable Coursework (84 credits maximum)

For an assessment on the transferability of your previous coursework, please contact the program office. Coursework will be evaluated for transfer using the following criteria:

- College-level
- Academic in nature
- Completed at a regionally accredited institution
- Earned with a C or above (C- grades do not transfer)

BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN CLINICAL OPERATIONS AND HEALTH CARE MANAGEMENT

As health care continues to grow as a core workforce area needed to meet the needs of an aging population, there is an associated increased need for administrative oversight. The BSHS with a major in clinical operations and health care management degree prepares graduates to be administrative professionals in this field.

REQUIREMENTS

Code	Title	Credits
General Education and Advanced Standing		
3 credits English composition		

4 credits in natural or physical science with lab

6 credits in social sciences

3 credits humanities

44 transfer credits. Credit from non-traditional sources, i.e., other than from academic coursework, may be considered on a case-by-case basis. This may include military coursework, credit-by-exam, and non-college based health programs.

60 credits in major coursework, which must be completed at GW.

CML 2140	Management of Human Resources in Health Sciences Organizations
CML 4144	Seminar in Health Science Leadership
COHM 2141	Marketing for Healthcare Leaders
COHM 2142	Finance for Health Care Managers
COHM 4145	Case Studies for Clinical Healthcare Management and Leadership
COHM 4150	Practicum in Clinical Operations
HSCI 2103	Health Policy and the Health Care System
HSCI 2104	Management of Health Science Services
HSCI 2105	Current Issues in Bioethics
HSCI 2108	Quality Improvement in Health Care
HSCI 2112W	Writing in the Health Sciences
HSCI 2117	Introduction to Statistics for Health Sciences
HSCI 4103	Health Care Law/Regulation
HSCI 4105	Case Studies in Health Care
HSCI 4106	Introduction to Epidemiology for Health Sciences
HSCI 4112W	Research and Writing in Health Sciences
INFR 4101	Introduction to Medical Informatics

Electives

Three elective courses selected from the following with the advisor's approval.

HSCI 2101	Psychosocial Aspects of Health and Illness
HSCI 2102	Pathophysiology

HSCI 2107	Health Care in Literature
HSCI 2110	Disease Prevention and Health Promotion Concepts
HSCI 3117	Principles of Biostatistics for Health Sciences
Alternative electives may be approved by the Program Director.	

BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN CLINICAL RESEARCH ADMINISTRATION

Offered in a distance learning format, the bachelor of science in health sciences with a major in clinical research administration prepares students for meeting the increasing global needs for a highly qualified workforce within the clinical research arena. This program creates a learning environment that supports student and faculty excellence in clinical research competencies such as scientific concepts and research design, ethical and patient safety considerations, drug development, clinical trial operations, human subject protection, Good Clinical Practice (GCP), regulatory requirements, and key business components. To achieve this mission, the program draws upon its diverse, multidisciplinary student body; outstanding, collaborative, practice-based faculty; and the vast resources available at the university.

Visit the program website for more information.

REQUIREMENTS

The following requirements must be fulfilled: 120 credits, 60 credits of which must be completed at GW. Up to 60 credits from coursework taken elsewhere may be transferable.

Code	Title	Credits
60 credits of general education and advanced standing including:		
3 credits of English composition		
4 credits of natural or physical science with lab		
6 credits of social sciences		
3 credits of humanities		
44 credits of advanced standing*		
Additional academic coursework. Non-traditional credit sources may be considered on a case-by-case basis (i.e. military coursework, credit-by-exam, and non-college based health programs). *		

Requirements for the major	
At least 60 credits of GW coursework including:	
CRA 2101	Basics of Clinical Research
CRA 2102	Processes of Clinical Research
CRA 2103	Good Clinical Practices
CRA 2104	Business of Clinical Research
CRA 2105	Capstone in Clinical Research Administration
CRA 2107	Introduction to Monitoring Clinical Trials
HSCI 2102	Pathophysiology
HSCI 2103	Health Policy and the Health Care System
HSCI 2105	Current Issues in Bioethics
HSCI 2107	Health Care in Literature
HSCI 2112W	Writing in the Health Sciences
HSCI 2117	Introduction to Statistics for Health Sciences
HSCI 4103	Health Care Law/Regulation
HSCI 4105	Case Studies in Health Care
HSCI 4106	Introduction to Epidemiology for Health Sciences
HSCI 4112W	Research and Writing in Health Sciences
INFR 4101	Introduction to Medical Informatics

Electives

3 courses from the following with advisor approval:

CRA 4106	Clinical Research Administration Internship
HSCI 2050	Foundations of Health Equity
HSCI 2101	Psychosocial Aspects of Health and Illness
HSCI 2104	Management of Health Science Services
HSCI 2108	Quality Improvement in Health Care
HSCI 2110	Disease Prevention and Health Promotion Concepts

BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN EMERGENCY MEDICAL SERVICES MANAGEMENT

Emergency medical services (EMS) is a challenging and rapidly emerging discipline at the intersection of traditional EMS, public health, public safety, and health care. The bachelor of science in health sciences in emergency medical services management (EMSM) is designed to prepare students for leadership positions in the field and to improve the quality of out-of-hospital care domestically and internationally.

Visit the program website (<https://smhs.gwu.edu/emergency-medical-services/programs/undergraduate/bshs/>) for more information.

REQUIREMENTS

The following requirements must be fulfilled: 120 credits, at least 60 of which must be completed at GW. Up to 60 credits from coursework completed elsewhere may be transferable.

Code	Title	Credits
------	-------	---------

60 credits of general education and advanced standing including:

3 credits of English composition

4 credits of natural or physical science with lab

6 credits of social sciences

3 credits of humanities

44 credits of advanced standing*

Additional academic coursework. Non-traditional credit sources may be considered on a case-by-case basis (i.e., military coursework, credit-by-exam, and non-college based health programs).

Requirements for the major:

At least 60 credits of GW coursework including:

CML 2140	Management of Human Resources in Health Sciences Organizations
----------	--

CML 2142	Financial Management in the Health Sciences
----------	---

EHS 2174	Foundations of Emergency Health Services Systems
----------	--

EHS 4110	Operations Management in Emergency Health Services Systems
----------	--

EHS 4111	Leadership Concepts in EHS
----------	----------------------------

EHS 4112	Special Operations and Disaster Management
----------	--

EHS 4144	Seminar in EHS Leadership
----------	---------------------------

HSCI 2103	Health Policy and the Health Care System
-----------	--

HSCI 2104	Management of Health Science Services
-----------	---------------------------------------

HSCI 2105	Current Issues in Bioethics
-----------	-----------------------------

HSCI 2108	Quality Improvement in Health Care
-----------	------------------------------------

HSCI 2112W	Writing in the Health Sciences
------------	--------------------------------

HSCI 2117	Introduction to Statistics for Health Sciences
-----------	--

HSCI 4103	Health Care Law/Regulation
-----------	----------------------------

HSCI 4106	Introduction to Epidemiology for Health Sciences
-----------	--

HSCI 4112W	Research and Writing in Health Sciences
------------	---

Three elective courses from the following (advisor approval is required):

EHS 2211	Introduction to Telemedicine
----------	------------------------------

EHS 4101	Humanitarian Relief Operations
----------	--------------------------------

HSCI 2101	Psychosocial Aspects of Health and Illness
-----------	--

HSCI 2102	Pathophysiology
-----------	-----------------

HSCI 2110	Disease Prevention and Health Promotion Concepts
-----------	--

HSCI 2111	Development of the Health Care Professions
-----------	--

HSCI 3117	Principles of Biostatistics for Health Sciences
-----------	---

HSCI 4102	Human Physiology in Extreme Environments
-----------	--

HSCI 4105	Case Studies in Health Care
-----------	-----------------------------

Transferring credits

Up to 60 credits of coursework may be transferable from coursework taken elsewhere provided it is:

- College-level
- Academic in nature
- Completed at a regionally accredited institution
- Earned with a minimum grade of C (C- grades do not transfer)

BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN GLOBAL LEADERSHIP IN DISASTER RESPONSE

Offered in a distance learning format, the bachelor of science in health sciences (BSHS) in global leadership disaster response degree program is available to active-duty and veteran service members from the civil affairs medic community or related health care fields and to civilians in the health care fields with international experience and interest. All courses are offered online in a flexible, asynchronous format allowing students to pursue their degree, regardless of time zone, station, or overseas assignment.

Drawing heavily from both civilian and military challenges and successes experienced during natural as well as man-made disaster and crisis events, both domestically and internationally, the program allows civil affairs medics to build on their existing academic, military, and training experiences. Students are called upon to work individually as well as collaboratively in the development of broadened view of and holistic approach to delivery of aid and relief to the individuals, families, and communities affected by catastrophic events.

Visit the program website (<https://smhs.gwu.edu/health-intervention-disaster-response/>) for more information.

REQUIREMENTS

The following requirements must be fulfilled: 120 credits, 60 of which must be completed at GW. Up to 60 credits from coursework taken elsewhere may be transferable.

Code	Title	Credits
------	-------	---------

General education (16 credits)

3 credits English Composition

4 credits Natural or Physical Science with Lab

6 credits of Social Sciences

3 credits Humanities

Advanced standing (44 credits)

Up to 44 credits in prior academic coursework is evaluated for transferability. Academic credit also may be awarded for ACE-recognized military courses and other non-traditional learning, as appropriate. *

Courses in the major (60 credits)

Required

EHS 2109	Infectious Diseases and Bioterrorism
----------	--------------------------------------

EHS 2160	Disaster Response Planning and Management
----------	---

EHS 2211	Introduction to Telemedicine
----------	------------------------------

EHS 3101	Leadership Concepts
----------	---------------------

EHS 3103	Technology in Critical Incident Response
----------	--

EHS 3107	Financial Management for the Disaster Cycle
----------	---

EHS 4101	Humanitarian Relief Operations
----------	--------------------------------

EHS 4103	Advanced Topics in Leadership
----------	-------------------------------

EHS 4105	Operations Management in Asymmetric Conditions
----------	--

EHS 4160	Project Management and Leadership Capstone
----------	--

HSCI 2105	Current Issues in Bioethics
-----------	-----------------------------

HSCI 2110	Disease Prevention and Health Promotion Concepts
-----------	--

HSCI 2112W	Writing in the Health Sciences
------------	--------------------------------

HSCI 2114	Health Care in Developing Nations
-----------	-----------------------------------

HSCI 2117	Introduction to Statistics for Health Sciences
-----------	--

HSCI 4102	Human Physiology in Extreme Environments
-----------	--

HSCI 4106	Introduction to Epidemiology for Health Sciences
-----------	--

HSCI 4112W	Research and Writing in Health Sciences
------------	---

Electives

Two courses selected from the following with the advisor's approval:

EHS 2161	Principles of Hazardous Materials and CBRNE Incident Management
----------	---

EHS 3105	Integrated Response to High Impact Violent Incidents
EHS 4198	Administrative Internship
HSCI 2102	Pathophysiology
HSCI 2104	Management of Health Science Services
HSCI 4105	Case Studies in Health Care

*Additional academic coursework. Non-traditional credit sources may be considered on a case-by-case basis (i.e., military coursework, credit-by-exam, and non-college based health programs).

Transferring credits

Up to 60 credits may be transferable from coursework taken elsewhere. Students should contact the program office for an assessment on the transferability of previous coursework. Coursework is evaluated for transfer using the following criteria:

- College-level
- Academic in nature
- Completed at a regionally accredited institution
- Earned with a minimum grade of C (C- grades do not transfer)

BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN LEADERSHIP FOR EMERGENCY ACTION AND DISASTER RESPONSE

The BSHS in leadership for emergency action and disaster response (LEADR) is 120-credit hour degree-completion program. This is a military partnership program, and only current or former Special Operations Forces (SOF) operators and enablers across the Army, Navy, Air Force, and Marines are considered for admission. As a closed admission military program established via military partnership, additional coursework above 60 credits may be considered for equivalency to courses in the major at the discretion of the program director. On a case-by-case basis, up to 75 credits may be transferred from traditional and non-traditional learning.

Upon completion of the bachelor of science in health sciences with a major in leadership for emergency action and disaster response degree program, the graduate is prepared in the following areas:

- Leadership: Compare leadership approaches for implementation and execution of complex projects in diverse, interagency environments;

- Technology: Analyze methods of technology application in asymmetric conditions;
- Resources: Appraise resource utilization and management in emergency and disaster settings;
- AEM/CEM: Analyze four phases of the disaster activity (i.e., mitigation, preparedness, response, and recovery) for all risks (i.e., attack, man-made, and natural) and the role of actors and stakeholders in the cycle;
- Management: Synthesize key agency roles and collaboration throughout critical incident responses; and
- Communication: Communicate effectively with diverse stakeholders, individually and in group settings, using verbal, written, and electronic modes of communication.

Visit the program website (<https://smhs.gwu.edu/military-affiliated-programs/bshs-leadership-emergency-action-disaster-response/>) for more information.

REQUIREMENTS

The following requirements must be fulfilled: 120 credits, 60 credits of which may be considered for equivalency to courses in the major; at the discretion of the program director, additional coursework above 60 credits may be considered. On a case-by-case basis, up to 75 credits may be transferred from traditional and non-traditional learning.

Code	Title	Credits
------	-------	---------

General education: 19 credits

3 credits English Composition

4 credits Natural or Physical Science with lab (Biology recommended)

6 credits Social Sciences

3 credits Humanities

3 credits Statistics

Advanced standing and electives: 41 credits

During the student's first semester of enrollment in the program, advanced standing for eligible military courses and other non-traditional learning will be noted on the student's record and applied toward the bachelor's degree.

Courses in the major: 60 credits

EHS 2109	Infectious Diseases and Bioterrorism
EHS 2160	Disaster Response Planning and Management
EHS 2161	Principles of Hazardous Materials and CBRNE Incident Management
EHS 3101	Leadership Concepts

EHS 3103	Technology in Critical Incident Response
EHS 3105	Integrated Response to High Impact Violent Incidents
EHS 3107	Financial Management for the Disaster Cycle
EHS 4101	Humanitarian Relief Operations
EHS 4103	Advanced Topics in Leadership
EHS 4105	Operations Management in Asymmetric Conditions
EHS 4160	Project Management and Leadership Capstone
HSCI 2105	Current Issues in Bioethics
HSCI 2112W	Writing in the Health Sciences
HSCI 4102	Human Physiology in Extreme Environments
HSCI 4112W	Research and Writing in Health Sciences
Major Electives - 15 credits	
EHS 2211	Introduction to Telemedicine
EHS 4198	Administrative Internship
HSCI 2101	Psychosocial Aspects of Health and Illness
HSCI 2102	Pathophysiology
HSCI 2103	Health Policy and the Health Care System
HSCI 2110	Disease Prevention and Health Promotion Concepts
HSCI 2114	Health Care in Developing Nations
HSCI 4105	Case Studies in Health Care
HSCI 4106	Introduction to Epidemiology for Health Sciences

BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN MEDICAL LABORATORY SCIENCE

Online or hybrid online/on campus

Medical laboratory science combines medicine, basic sciences, and clinical sciences. Professionals in the field investigate and

determine the causes of disease, using the latest biomedical instruments and molecular techniques to perform both routine and complex testing.

The bachelor of science in health sciences (BSHS) with a major in medical laboratory science (MLS) is a degree completion program offered in two formats: online or a hybrid of online and on-campus study. Both program formats also are offered as a second bachelor's degree.

BSHS in Medical Laboratory Science—Fully Online. (<http://smhs.gwu.edu/medical-laboratory-sciences/programs/bshs/fully-online-mlt/mlt-mls-bshs-medical-laboratory-science-fully-online/>) The online BSHS in MLS is for students who have successfully completed a medical laboratory technician (MLT) program and currently are board certified MLTs.

BSHS in Medical Laboratory Science—Hybrid (<https://healthsciencesprograms.gwu.edu/program/the-george-washington-university-blended-bshs-in-medical-laboratory-sciences-bachelor-1588610227621/>). The hybrid BSHS in MLS is for students who have completed 60 credits towards an associate's degree or who have earned an associate's degree along with the required prerequisite science and general education courses.

Second bachelor's degree program

The BSHS in MLS program is offered in both formats as a second bachelor's degree to students who already hold a baccalaureate degree from a regionally accredited college or university with the required prerequisite and general education coursework. For the online program, students also must have completed a medical laboratory technician (MLT) program and currently be board certified MLTs.

This program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS) (<http://www.naacsls.org/>).

Visit the program website (<http://smhs.gwu.edu/medical-laboratory-sciences/programs/bshs/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 120 credits, including a minimum of 60 credits in required courses completed at GW and up to 60 transfer credits in courses taken elsewhere. Eligible students admitted through approved SMHS Guaranteed Admission Agreements (<http://smhs.gwu.edu/academics/health-sciences-programs/guaranteed-admission-agreements/>) partnerships must complete a minimum of 52 required credits at GW; eligibility is reviewed on a case-by-case basis.

Code	Title	Credits
Completion of the following prerequisite coursework from a regionally accredited college or university with a grade of C or above:		
3 credits of English composition		
8 credits of biology with lab ^{1,3}		
8 credits of general or inorganic chemistry with lab ^{1,3}		
4 credits of microbiology with lab ^{1,3}		
3 credits of organic chemistry or biochemistry ¹		
3 credits of college math (algebra, statistics, or higher)		
3 credits of humanities		
6 credits of social sciences		
A minimum of 22 credits in elective coursework. Elective coursework should include courses in pathophysiology or anatomy and physiology, ethics or values, and global/cross-cultural perspectives. ²		
Required for the major		
HSCI 2112W	Writing in the Health Sciences	
HSCI 4112W	Research and Writing in Health Sciences	
MLS 4116	Clinical Bacteriology I	
MLS 4117	Clinical Bacteriology II	
MLS 4119	Parasitology, Mycology, and Virology	
MLS 4130	Hematology I	
MLS 4131	Hematology II	
MLS 4141	Immunology and Serology	
MLS 4145	Clinical Biochemistry I	
MLS 4146	Clinical Biochemistry II	
MLS 4150	Immunohematology	
MLS 4151	Molecular Diagnostics	
MLS 4158	Laboratory Management and Operations	
MLS 4159	Capstone Seminar	
Additional requirements for the fully online BSHS program		
MLS 3000	Clinical Laboratory Mathematics	

MLS 3001	Professional Ethics for Medical Laboratory Scientists
MLS 4136	Clinical Experience I
MLS 4137	Clinical Experience II
MLS 4138	Clinical Experience III
MLS 4139	Clinical Experience IV
8 Credits of Electives selected with advisor approval	
Additional requirements for the hybrid BSHS program	
MLS 4160	Blood Bank Practicum
MLS 4161	Clinical Biochemistry Practicum
MLS 4162	Hematology Practicum
MLS 4164	Clinical Microbiology Practicum
MLS 4165	Urinalysis Practicum
MLS 4166	Coagulation Practicum
MLS 4216	Clinical Bacteriology Laboratory
MLS 4219	Parasitology, Mycology, and Virology Laboratory
MLS 4230	Hematology Laboratory
MLS 4246	Clinical Biochemistry Laboratory
MLS 4250	Immunohematology Laboratory
MLS 4251	Molecular Diagnostics Laboratory

¹ Medical laboratory technicians (MLTs) may receive transfer credit for biological sciences, general microbiology, general chemistry, and organic chemistry/biochemistry courses.

² Additional academic coursework. Non-traditional credit sources may be considered on a case-by-case basis (i.e. military coursework, credit-by-exam, and non-college based health programs).

³ Hands-on lab required. Online lab not acceptable.

SECOND BACHELOR'S

The BSHS in MLS program is offered as a second bachelor's degree to students who already hold a baccalaureate degree from a regionally accredited college or university with the required prerequisite and general education coursework.

The following requirements must be fulfilled: 120 credits, including a minimum of 60 credits in required courses completed at GW and up to 60 transfer credits in courses taken elsewhere.

Code	Title	Credits
Completion of the following prerequisite coursework from a regionally accredited college or university with a grade of C or above:		
3 credits of English composition		
8 credits of biology with lab ^{1,3}		
8 credits of general or inorganic chemistry with lab ^{1,3}		
4 credits of microbiology with lab ^{1,3}		
3 credits of organic chemistry or biochemistry ¹		
3 credits of college math (algebra, statistics, or higher)		
3 credits of humanities		
6 credits of social sciences		
A minimum of 22 credits in elective coursework. Elective coursework should include courses in pathophysiology or anatomy and physiology, ethics or values, and global/cross-cultural perspectives. ²		
Required for the major		
HSCI 2112W	Writing in the Health Sciences	
HSCI 4112W	Research and Writing in Health Sciences	
MLS 4116	Clinical Bacteriology I	
MLS 4117	Clinical Bacteriology II	
MLS 4119	Parasitology, Mycology, and Virology	
MLS 4130	Hematology I	
MLS 4131	Hematology II	
MLS 4141	Immunology and Serology	
MLS 4145	Clinical Biochemistry I	
MLS 4146	Clinical Biochemistry II	
MLS 4150	Immunohematology	
MLS 4151	Molecular Diagnostics	
MLS 4158	Laboratory Management and Operations	
MLS 4159	Capstone Seminar	
Additional requirements for the fully online BSHS program		
MLS 3000	Clinical Laboratory Mathematics	

MLS 3001	Professional Ethics for Medical Laboratory Scientists
MLS 4136	Clinical Experience I
MLS 4137	Clinical Experience II
MLS 4138	Clinical Experience III
MLS 4139	Clinical Experience IV
8 Credits of Electives selected with advisor approval	
Additional requirements for the hybrid BSHS program	
MLS 4160	Blood Bank Practicum
MLS 4161	Clinical Biochemistry Practicum
MLS 4162	Hematology Practicum
MLS 4164	Clinical Microbiology Practicum
MLS 4165	Urinalysis Practicum
MLS 4166	Coagulation Practicum
MLS 4216	Clinical Bacteriology Laboratory
MLS 4219	Parasitology, Mycology, and Virology Laboratory
MLS 4230	Hematology Laboratory
MLS 4246	Clinical Biochemistry Laboratory
MLS 4250	Immunohematology Laboratory
MLS 4251	Molecular Diagnostics Laboratory

¹ Medical laboratory technicians (MLTs) may receive transfer credit for biological sciences, general microbiology, general chemistry, and organic chemistry/biochemistry courses.

² Additional academic coursework. Non-traditional credit sources may be considered on a case-by-case basis (i.e. military coursework, credit-by-exam, and non-college based health programs).

³ Hands-on lab required. Online lab not acceptable.

BACHELOR OF SCIENCE IN HEALTH SCIENCES WITH A MAJOR IN MOLECULAR DIAGNOSTIC SCIENCES

The bachelor of science in health sciences with a major in molecular diagnostic sciences is offered both in fully online and hybrid formats. The program provides students with the theoretical knowledge and practical skills needed for positions

in diagnostic clinical molecular laboratories, public health laboratories, biotechnology companies, government agencies, law enforcement agencies, and research institutes. In addition, students who complete the program are eligible to take the Molecular Biology Board of Certification examination offered by the American Society for Clinical Pathology (ASCP).

Visit the program website (<https://healthsciencesprograms.gwu.edu/program/the-george-washington-university-bshs-in-molecular-diagnostic-science-bachelor-1571165426562/>) for more information.

REQUIREMENTS

The following requirements must be fulfilled:

Code	Title	Credits
Completion of the following prerequisite coursework from a regionally accredited college or university with a grade of C or above:		
3 credits of English composition		
8 credits of biology (lecture and lab)		
4 credits of microbiology (lecture and lab)		
8 credits of chemistry (lecture and lab)		
3 credits of organic chemistry or biochemistry		
3 credits of college mathematics (algebra, statistics, or higher)		
3 credits in humanities		
6 credits in social sciences		
A minimum of 22 credits in elective coursework. Elective coursework should include courses in pathophysiology or anatomy and physiology, ethics or values, or global/cross-cultural perspectives.		
Required for the major		
HSCI 1106	Introduction to Biotechnology for Health Sciences	
HSCI 2112W	Writing in the Health Sciences	
HSCI 3117	Principles of Biostatistics for Health Sciences	
HSCI 4106	Introduction to Epidemiology for Health Sciences	
HSCI 4112W	Research and Writing in Health Sciences	
MLS 3000	Clinical Laboratory Mathematics	

MLS 3001	Professional Ethics for Medical Laboratory Scientists
MLS 4141	Immunology and Serology
MLS 4151	Molecular Diagnostics
MLS 4158	Laboratory Management and Operations
MLS 4170	Introduction to Molecular Biology
MLS 4171	Human Genetics
MLS 4172	Molecular Diagnostics Capstone
MLS 4217	Molecular Techniques
MLS 4242	Applications of Molecular Testing
MLS 4266	Molecular Diagnostics Practicum

Additional requirements for the fully online BSHS program

9 credits in elective coursework selected in consultation with the program advisor.

Additional requirements for the hybrid BSHS program

MLS 4251	Molecular Diagnostics Laboratory
MLS 4252	Applications of Molecular Testing Laboratory

6 credits in elective coursework selected in consultation with the program advisor.

DUAL BSHS WITH A MAJOR IN CLINICAL OPERATIONS AND HEALTHCARE MANAGEMENT AND MSHS IN THE FIELD OF HEALTH CARE QUALITY

The School of Medicine and Health Sciences offers a dual bachelor of science in health sciences with a major in clinical operations and healthcare management (p. 1059) and master of science in health sciences in the field of health care quality (p. 1074) degree program. The program allows students to take 9 graduate credits as part of their undergraduate program, thereby decreasing the number of credits normally required for the master's degree. All requirements for both degrees must be fulfilled.

DUAL BSHS IN CLINICAL RESEARCH ADMINISTRATION AND MSHS IN BIOMEDICAL INFORMATICS

The School of Medicine and Health Sciences offers a dual bachelor of science in health sciences with a major in clinical research administration (p. 1060) and master of science in health sciences in the field of biomedical informatics (p. 1070) degree program. The program allows students to take 9 graduate credits as part of their undergraduate program, thereby decreasing the number of credits normally required for the master's degree. All requirements for both degrees must be fulfilled.

Visit the School of Medicine and Health Sciences website (<https://smhs.gwu.edu/>) for additional information.

DUAL BSHS WITH A MAJOR IN CLINICAL RESEARCH ADMINISTRATION AND MSHS IN THE FIELD OF CLINICAL RESEARCH ADMINISTRATION

The School of Medicine and Health Sciences offers a dual bachelor of science in health science with a major in clinical research administration (p. 1060) and master of science in health sciences in the field of clinical research administration (p. 1060) degree program. The online program allows students to take 9 graduate credits as part of their undergraduate program, thereby decreasing the number of credits normally required for the master's degree. All requirements for both degrees must be fulfilled.

Visit the program website (<https://smhs.gwu.edu/clinical-research-administration/programs/dual-degrees/curriculum/dual-degree-bshsmshs-clinical-research-administration/>) for additional information.

DUAL BSHS IN CLINICAL RESEARCH ADMINISTRATION AND MSHS IN CLINICAL AND TRANSLATIONAL RESEARCH

The School of Medicine and Health Sciences offers a dual bachelor of science in health sciences with a major in clinical research administration (p. 1060) and master of science in health sciences in the field of clinical and translational research (p. 1073) degree program. The program allows students to take 9 graduate credits as part of their undergraduate program, thereby decreasing the number of credits normally

required for the master's degree. All requirements for both degrees must be fulfilled.

Visit the School of Medicine and Health Sciences website (<https://smhs.gwu.edu/>) for additional information.

DUAL BSHS WITH A MAJOR IN CLINICAL RESEARCH ADMINISTRATION AND MSHS IN THE FIELD OF REGULATORY AFFAIRS

The School of Medicine and Health Sciences offers a dual bachelor of science in health science with a major in clinical research administration (p. 1060) and master of science in health sciences in the field of regulatory affairs (p. 1078) degree program. This online program allows students to take 9 graduate credits as part of their undergraduate program, thereby decreasing the number of credits normally required for the master's degree. All requirements for both degrees must be fulfilled.

Visit the program website (<https://smhs.gwu.edu/clinical-research-administration/programs/dual-degrees/curriculum/dual-degree-bshs-clinical-research-administrationmshs-regulatory/>) for additional information.

DUAL BSHS WITH A MAJOR IN MEDICAL LABORATORY SCIENCES AND MSHS IN THE FIELD OF MOLECULAR DIAGNOSTIC SCIENCES

The School of Medicine and Health Sciences offers a dual bachelor of science in health sciences with a major in medical laboratory sciences (<http://bulletin.gwu.edu/medicine-health-sciences/undergraduate-programs/bshs-medical-laboratory-science/>) and master of science in health sciences in the field molecular diagnostic sciences (<http://bulletin.gwu.edu/medicine-health-sciences/graduate-programs/ms-molecular-diagnostics/>) (<http://bulletin.gwu.edu/engineering-applied-science/computer-science/ms/>) degree program. The program allows students to take 6 graduate credits as part of their undergraduate program, thereby decreasing the number of credits normally required for the master's degree. All requirements for both degrees must be fulfilled.

Visit the program website (<https://healthsciencesprograms.gwu.edu/program/the-george-washington-university-dual-degree-bshs-in-medical-laboratory-sciences-mshs-in-molecular-diagnostic-sciences-master-1540388661589/>) for more information

DUAL BSHS IN MOLECULAR DIAGNOSTIC SCIENCES AND MSHS IN CLINICAL MICROBIOLOGY

The School of Medicine and Health Sciences offers a dual bachelor of science in health sciences with a major in molecular diagnostic sciences (p. 1066) and master of science in health sciences in the field of clinical microbiology (p. 1071) degree program. The program allows students to take 9 graduate credits as part of their undergraduate program, thereby decreasing the number of credits normally required for the master's degree. All requirements for both degrees must be fulfilled.

Visit the School of Medicine and Health Sciences (<https://smhs.gwu.edu/>) website for additional information.

MINOR IN ANATOMY

The Department of Anatomy and Regenerative Biology (<http://smhs.gwu.edu/anatomy/>) in the School of Medicine and Health Sciences (<http://smhs.gwu.edu/>) offers courses required for the 12-credit minor in human anatomy.

Code	Title	Credits
ANAT 2130	Human Embryology	
ANAT 2150	Human Microscopic Anatomy	
ANAT 2160	Human Functional Neuroanatomy	
ANAT 2181	Human Gross Anatomy	

Visit the program website (<https://smhs.gwu.edu/anatomy/education/minor-human-anatomy/>) for additional information.

MINOR IN BLOOD BANKING FOR MEDICAL LABORATORY SCIENCE

REQUIREMENTS

The following requirements must be fulfilled: 16 credits, including a 4-credit practicum course.

Completion of this minor qualifies the student to take the Technologist in Blood Banking examination offered by national certifying agencies.

Code	Title	Credits
Required		
MLS 4141	Immunology and Serology	
MLS 4150	Immunohematology	

MLS 4151	Molecular Diagnostics
MLS 4158	Laboratory Management and Operations
MLS 4160	Blood Bank Practicum

All courses for the minor are taught online, with the exception of the clinical practicum. The clinical practicum is taken upon completion of didactic coursework. Students typically are in a clinical laboratory eight hours per day (daytime hours), five days per week. Students must be able to fulfill the necessary time requirement for the practicum.

Visit the program website (<https://smhs.gwu.edu/medical-laboratory-sciences/programs/certificate/curriculum/blood-banking/>) for additional information.

MINOR IN EMERGENCY HEALTH SERVICES

REQUIREMENTS

The minor in emergency health services requires successful completion of at least 18 credits with a GPA of 2.5 or above.

Code	Title	Credits
Required		
EHS 1040	Emergency Medical Tech-Basic *	
EHS 1041	EMT - Basic Lab *	
EHS 2174	Foundations of Emergency Health Services Systems	
EHS 2175	Community Risk Management and Safety in EHS	
HSCI 2101	Psychosocial Aspects of Health and Illness	
Electives		
At least five credits from the following:		
EHS 1002	CPR and First Aid	
EHS 1058	EMT Instructor Development	
EHS 2107	Theory and Practice of Research in a Clinical Setting	
EHS 2108	Emergency Medicine Clinical Scribe	
EHS 2109	Infectious Diseases and Bioterrorism	
EHS 2110	Emergency Department Critical Care Assessment and Procedures	

EHS 2162 Introduction to the Principles of Tactical Medicine

EHS 4112 Special Operations and Disaster Management

HSCI 2105 Current Issues in Bioethics

*Alternative elective courses may be selected with program approval.

*For students who have EMT-Basic Certification, a minimum of 4 credits in elective courses may be substituted for EHS 1040 and EHS 1041 with the approval of the program.

MASTER'S PROGRAMS

Master's programs

- Master of Science in Health Sciences in the field of biomedical informatics (p. 1070)
- Master of Science in Health Sciences in the field of clinical microbiology (p. 1071)
- Master of Science in Health Sciences in the field of clinical operations and health care management (p. 1071)
- Master of Science in Health Sciences in the field of clinical research administration (p. 1072)
- Master of Science in Health Sciences in the field of clinical and translational research (p. 1073)
- Master of Science in Health Sciences in the field of correctional health administration (p. 1074)
- Master of Science in Health Sciences in the field of health care quality (p. 1074)
- Master of Science in Health Sciences in the field of immunohematology and biotechnology (p. 1075)
- Master of Science in Health Sciences in the field of integrative medicine (p. 1076)
- Master of Science in Health Sciences in the field of laboratory medicine (p. 1077)
- Master of Science in Health Sciences in the field of medical laboratory science (p. 1077)
- Master of Science in Health Sciences in the field of molecular diagnostic science (p. 1078)
- Master of Science in Health Sciences in the field of regulatory affairs (p. 1078)
- Master of Science in Health Sciences in the field of physician assistant (p. 1079)
- Master of Science in Health Sciences in the field of translational microbiology (p. 1080)

Joint degree programs

- Master of Science in Health Sciences in the field of physician assistant and Master of Public Health (Milken Institute School of Public Health) (p. 1081)

Military contract program

- Master of Science in Health Sciences in the field of immunohematology (p. 1075)

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF BIOMEDICAL INFORMATICS

The biomedical informatics program prepares professionals for a rewarding career in health care leadership and research. Graduates will be skilled in the integration of programming, data analysis and data manipulation skills to solve biomedical problems. Students learn how to apply data analytics to improve the quality of healthcare and patient outcomes. This interdisciplinary education includes components of clinical healthcare, computer science, data analytics, ethics and translational medicine. Our innovative curriculum include courses in statistics, leadership, computer programming, and clinical care and the healthcare system. Students develop informatics analytics and tools in support of clinical decision-making, clinical research, and patient engagement. Graduates are well-prepared for informatics careers working at hospitals and medical centers, pharmaceutical companies, global health care organizations, consulting groups, and in government agencies.

Visit the program website (<https://smhs.gwu.edu/biomedical-informatics/>) for additional information.

REQUIREMENTS

Code	Title	Credits
Required		
HSCI 6223	Topics in Health Care Leadership	
HSCI 6240	Issues and Trends in the Health Care System	
HSCI 6263	Biostatistics Translational Research	
HSCI 6264	Epidemiology Translational Research	
INFR 6101	Principles of Medical Informatics	
INFR 6102	Principles of Medicine for Informaticians	
INFR 6105	Health Care Quality for Informatics	
INFR 6121	High Performance Computing	
INFR 6197	Biomedical Informatics Practicum *	
INFR 6198	Biomedical Informatics Capstone	
INFR 6540	Medical Decision Making and Decision Support Systems	

Elective

One 3-credit elective course selected from the following with the advisor's approval:

HSCI 6265	Grantsmanship in Translational Research
HSCI 6273	Bioinformatics for Genomics
INFR 6103	Advanced Computing Applications for Biomedical Informatics
INFR 6197	Biomedical Informatics Practicum

*Students may repeat INFR 6197 as an elective once other degree requirement have been met.

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF CLINICAL MICROBIOLOGY

This online program provides students with clinical microbiology and laboratory science coursework as well as a hands-on microbiology practicum that will prepare students for a diagnostic microbiology laboratory position and provides eligibility for national certification examinations in clinical microbiology. The program also includes additional graduate coursework to prepare students for careers in research institutions, public health laboratories, biotechnology firms, pharmaceutical companies or governmental agencies.

Visit the program website (<https://smhs.gwu.edu/medical-laboratory-sciences/programs/mshs/curriculum/clinical-microbiology/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits in required courses.

Code	Title	Credits
Required		
HSCI 6263	Biostatistics Translational Research	
MLS 6116	Advanced Clinical Bacteriology I	
MLS 6117	Advanced Clinical Bacteriology II	
MLS 6119	Advanced Parasitology, Mycology, and Virology	
MLS 6141	Advanced Immunology and Serology	
MLS 6151	Advanced Molecular Diagnostics	
MLS 6158	Advanced Laboratory Management and Operations	

MLS 6216 Microbial Pathogenesis

MLS 6217 Medical Biotechnology

MLS 6244 Research Ethics and Integrity

MLS 6251 Advanced Clinical Microbiology Practicum

Electives

6 credits in HSCI or MLS courses selected in consultation with the advisor.

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF CLINICAL OPERATIONS AND HEALTHCARE MANAGEMENT

George Washington University's (GW) online master of science in Health Sciences (MSHS) in clinical operations and healthcare management prepares healthcare professionals to take the next step in their healthcare leadership career through learning the skills of day-to-day operations in today's complex, health-service delivery. The program is interdisciplinary, competency-based, rigorous, and innovative. The MSHS in clinical operations and healthcare management provides students with core competency knowledge to become leaders in clinical operations via a curriculum that emphasizes professional and practical skills and career and leadership development.

The program is aligned with the National Center for Healthcare Leadership and its Health Leadership Competency Model. Academic programs adopt this model when designing curriculum for healthcare administration and clinical programs as it is considered the industry standard. Additionally, the MSHS in clinical operations and healthcare management curriculum follows the Competencies Assessment Tool Model developed by the American College of Healthcare Executives (ACHE). The American College of Healthcare Executives is the premier professional society for healthcare leaders committed to improving health.

With this flexible online program, with low faculty/student ratios, you'll learn what it takes to lead a healthcare delivery system that is clinically effective, cost-efficient, and improves overall patient care and safety. With a focus on population healthcare, you'll learn ways to improve your own communication skills for optimal interprofessional practice, lead efforts in quality improvement, and understand the technological tools needed to conduct effective data analyses for strategic development.

When you complete the masters in clinical operations and healthcare management program, you'll be able to pursue a

clinical operations career in a variety of healthcare and related health organizations.

Program Outcomes

The online Clinical Operations and Healthcare Management masters degree program leverages distinguished faculty, innovative curriculum, and real-world experience. You'll gain the comprehensive skills you need to succeed in the field of clinical operations, so when you graduate, you'll be able to:

- Communicate effectively across a variety of platforms to optimize interprofessional practice and operations
- Evaluate healthcare systems to enhance ethical, efficient, and financially sound operations
- Conduct effective data analyses for operational and strategic development in the healthcare setting continuum
- Lead efforts to continuously improve the quality and value across healthcare operations
- Improve organizational performance in healthcare organizations by successfully implementing change management
- Apply the knowledge and skill necessary to sit for the Project Management Professional exam

Visit the School of Medicine and Health Sciences website (<https://smhs.gwu.edu/>) for additional information.

REQUIREMENTS

Code	Title	Credits
Course Requirements:		
CML 6202	Human Resource Development	
CML 6275	Leadership and Change in Clinical Management	
COHM 6210	Strategic Communications	
COHM 6215	Population Health for Health Care Innovators	
COHM 6220	Finance for Health Care Operations	
COHM 6320	Informatics for Operational Leadership and Health Care Quality	
COHM 6430	Health Care Systems Operations	
COHM 6465	Practicum in Clinical Operations	
COHM 6470	Applications in Clinical Operations and Health Care Management	
HSCI 6223	Topics in Health Care Leadership	
HSCI 6241	The Health Care Enterprise	

Elective

One 3-credit elective course selected with the advisor's approval.	
HSCI 6263	Biostatistics Translational Research
HSCI 6264	Epidemiology Translational Research
An alternate elective may be approved by the program director.	

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF CLINICAL RESEARCH ADMINISTRATION

Clinical research administration is a vast and expanding field that involves the processes in which products—drugs, devices, biological and treatment protocols are developed for patient care. Both the master's degree and graduate certificate programs prepare health sciences professionals to participate in the science and business of the development process. Our rigorous curriculum focuses on regulatory requirements, ethical issues, processes for product development, the business of clinical research and scientific method processes. The distance education format, offered online, provides a convenient option for self-disciplined and self-directed students to pursue the program and prepare for professional advancement while maintaining their work and other commitments.

Professionals with a bachelor's degree and relevant clinical research or health science experience may apply for the master of science in health sciences program in clinical research administration.

A multi-level dual degree program offers academically qualified individuals a seamless and accelerated pathway for completing both the bachelor of science in health sciences (BSHS) in clinical research administration and the master of science in health sciences (MSHS) in clinical research administration.

Visit the program website (<https://smhs.gwu.edu/clinical-research-administration/>) for additional program information.

REQUIREMENTS

The MSHS in the field of clinical research administration (CRA (<https://smhs.gwu.edu/clinical-research-administration/>)) requires successful completion of 36 credits, including: 18 credits in clinical research administration, 9 credits of strategic leadership courses, 6 credits of graduate research coursework, and a 3-credit elective course.

Code	Title	Credits
Required		
Clinical research administration courses		
CRA 6201	Critical Analysis Clinical Research	
CRA 6202	Medicines Development	
CRA 6203	Partnerships with Human Subjects	
CRA 6204	The Clinical Research Industry	
CRA 6209	Quality and Risk Management	
CRA 6211	Monitoring, Auditing, and Oversight in Clinical Research	
CRA 6275	Leadership and Change in Clinical Research Administration	
Strategic leadership courses		
COHM 6235	Leadership Development in Health Care Systems	
COHM 6245	Strategic and Operational Decision Making for Health Care Leaders	
Graduate research courses		
HSCI 6263	Biostatistics Translational Research	
HSCI 6264	Epidemiology Translational Research	
Elective		
One course from the following:		
CRA 6208	International Clinical Research	
RAFF 6201	Introduction to Global Regulatory Affairs	

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF CLINICAL AND TRANSLATIONAL RESEARCH

The master of science in health sciences (MSHS) clinical and translational research provides high quality education to researcher professionals through the use of a creative and innovative online format. The program was developed as a component of the Clinical and Translational Science Award granted to Children's National Health System and George Washington University. It prepares graduates to meet the needs of a more "translational" approach to research. The curriculum includes a combination of courses focused on translational, interdisciplinary and health care research and

leadership. Thus, the MSHS equips research professionals with the knowledge and skills to fill any number of clinical and translational research professions from funded scientist, clinical personnel, and those who mediate for better policy about health.

Visit the program website (<http://smhs.gwu.edu/clinical-translational-research/programs/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits in required courses, including 27 credits in required courses and 9 credits in elective courses.

Code	Title	Credits
Required		
Clinical research		
CTS 6201	Critical Analysis in Clinical Research	
CTS 6205	Clinical Investigations	
Graduate research		
CTS 6273	Bioinformatics for Genomics	
HSCI 6263	Biostatistics Translational Research	
HSCI 6264	Epidemiology Translational Research	
Translational research		
CTS 6261	Foundations in Clinical and Translational Research	
CTS 6264	Clinical and Translational Research Capstone Project	
CTS 6265	Grantsmanship in Translational Health Science	
CTS 6275	Transdisciplinary Research Proposal	
CTS 6285	Collaboration and Team Science in Practice and Research	
Electives		
6 credits in elective courses selected in consultation with the advisor.		

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF CORRECTIONAL HEALTH ADMINISTRATION

The correctional health administration program provides a solid foundation for professionals seeking a career in correctional health care administration as well as valuable training for current correctional health care administrators seeking career advancement. Students will learn how to design a health care services plan for incarcerated patient populations; develop health care administration management skills for staffing and leading a correctional health care team; acquire strategies for cost containment while ensuring the delivery of quality health care; and adopt strategies for facilitating the continuity of health care for incarcerated patients returning to their communities.

Visit the program website (<https://smhs.gwu.edu/correctional-health-administration/>) for more information

REQUIREMENTS

The following requirements must be fulfilled: 36 credits, including 27 credits in required courses, a 6-credit practicum, and one 3-credit elective course.

Code	Title	Credits
Required		
CHA 6210	Correctional Health Administration for Behavioral Health Populations	
CML 6020	Fundamentals of Correctional Health Care	
CML 6021	Correctional Health Care Administration for Special Populations	
CML 6023	Correctional Health Care Fiscal Management	
CML 6025	Correctional Health Care Oversight	
CML 6050	Correctional Health Care Delivery	
CML 6202	Human Resource Development	
HSCI 6223	Topics in Health Care Leadership	
INFR 6101	Principles of Medical Informatics	
Master's Practicum		
CHA 6275	Correctional Health Care Administration Practicum	
Elective		

One 3-credit elective course selected in consultation with program advisor.

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF HEALTH CARE QUALITY

The master of science in health sciences in the field of health care quality program is designed to meet an emerging demand for quality and patient safety specialists who have the capacity and competence to grow and sustain a culture of continuous improvement at all levels and within every sector of the health care delivery system. The program helps prepare graduates for quality and patient safety leadership, management, and research positions within health care organizations or policy agencies. Upon completion of this program, students are able to:

- Develop, implement, and evaluate quality and patient safety improvement initiatives;
- Cultivate strategies to lead organizational change toward a quality-focused culture;
- Translate national quality expectations into daily operations;
- Apply processes and tools to measure, analyze, and interpret quality improvement data;
- Design and implement information technology systems to support quality assurance;
- Conduct research to drive clinical and operational decision-making.

Visit the program website (<https://smhs.gwu.edu/health-care-quality/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits in required courses.

Code	Title	Credits
Required		
Graduate research courses		
HSCI 6263	Biostatistics Translational Research	
HSCI 6264	Epidemiology Translational Research	
Professional courses		
COHM 6235	Leadership Development in Health Care Systems	
COHM 6245	Strategic and Operational Decision Making for Health Care Leaders	
Health care quality courses		

HCQ 6200	Introduction to Health Care Quality *
HCQ 6201	Building a Quality Culture
HCQ 6202	Health Care Quality Landscape
HCQ 6203	Quality Improvement Science
HCQ 6204	Health Care Quality Analysis
HCQ 6205	Patient Safety Systems
HCQ 6206	Health Information, Quality and Outcomes
HCQ 6275	Leadership and Change

*Certified Professional in Healthcare Quality (CPHQ) credential accepted as equivalent.

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF IMMUNOHEMATOLOGY

Please note: The Immunohematology program is open to military contract students only.

The goal of the Immunohematology program is to prepare individuals who will be competitive for careers in management, research and education in the area of immunohematology.

Master's Degree

The Master of Science in Health Sciences program is designed for clinical laboratory scientists currently enrolled in Specialist in Blood Banking Technology Programs accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP) or who have been certified as a Specialist in Blood Banking (S.B.B.) within the last seven years. The program incorporates aspects of blood transfusion medicine at the graduate level with research methods, current topics in transfusion medicine, immunology, biochemistry and research in an area of immunohematology. Students take 22 hours of online courses through the health sciences programs at The George Washington University. The program culminates in a research project.

Visit the program website (<https://smhs.gwu.edu/military-affiliated-programs/immunohematology/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 55 credits in required courses.

Code	Title	Credits
Required:		
HSCI 6263	Biostatistics Translational Research	

HSCI 6297	Independent Study for Health Professionals (taken for 1 credit)
MLS 6141	Advanced Immunology and Serology
MLS 6151	Advanced Molecular Diagnostics
MLS 6158	Advanced Laboratory Management and Operations
MLS 6203	Clinical Immunohematology I
MLS 6204	Clinical Immunohematology II
MLS 6207	Clinical Practicum: Blood Banking I
MLS 6208	Clinical Practicum: Blood Banking II
MLS 6209	Clinical Pract:Blood BankingIII
MLS 6211	Hematopoiesis &Blood Pathophys
MLS 6212	Organization and Management of Blood Banks
MLS 6213	Seminar in Immunohematology
MLS 6214	Specialized Practicum
MLS 6245	Current Topics in Medical Laboratory Science
MLS 6246	Capstone Project

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF IMMUNOHEMATOLOGY AND BIOTECHNOLOGY

Immunohematology, also called blood banking, is a field within the medical laboratory science profession that focuses on studying human immunologic reactions as they relate to disease processes and clinical manifestations of blood disorders. The clinical laboratory has traditionally used conventional methods to perform tests and assays for the purpose of aiding in human disease diagnosis. Over the years, there have been significant advances in biotechnologies.

Although conventional lab methods are still utilized in the clinical laboratory, more labs are starting to integrate molecular-based tests and to replace some of the more traditional technologies with cutting edge methods. The program has been designed to provide certified blood bankers with a strong foundation in Immunohematology as well as molecular biology and biotechnology.

Visit the program website (<http://smhs.gwu.edu/medical-laboratory-sciences/programs/mshs/curriculum/>)

immunohematology-biotechnology/) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 35 credits, including 29 credits in required courses and 6 credits in elective courses.

Code	Title	Credits
Required		
HSCI 6263	Biostatistics Translational Research	
MLS 6141	Advanced Immunology and Serology	
MLS 6158	Advanced Laboratory Management and Operations	
or MLS 6159	Leadership in Laboratory Medicine	
MLS 6213	Seminar in Immunohematology	
MLS 6217	Medical Biotechnology	
MLS 6218	Genetics	
MLS 6219	Molecular Biology	
MLS 6244	Research Ethics and Integrity	
MLS 6245	Current Topics in Medical Laboratory Science	
MLS 6246	Capstone Project	
Electives		

6 credits in elective courses selected in consultation with the Program Director.

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF INTEGRATIVE MEDICINE

THE GRADUATE PROGRAM IN INTEGRATIVE MEDICINE PREPARES PHYSICIANS AND HEALTH PRACTITIONERS IN ADVANCED PRINCIPLES AND PRACTICES OF WELLNESS AND LIFESTYLE MEDICINE. THE CURRICULUM IS TAUGHT BY INTERNATIONALLY RECOGNIZED LEADERS FROM THE CLINICAL AND RESEARCH SCIENCES, INCLUDING NOBEL-PRIZE WINNERS AND NASA SCIENTISTS, WITH A FOCUS ON PREVENTIVE, PROGNOSTIC, AND PATIENT-CENTRIC APPROACHES TO CARE.

Visit the program website (<https://smhs.gwu.edu/integrative-medicine/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits, including 27 credits in required courses and 9 credits in elective courses.

Code	Title	Credits
Required		
INTM 6101	Nutrition I: Assessment, Diagnosis, and Intervention	
INTM 6102	Nutrition II: Life Cycle	
INTM 6201	Foundations in Integrative Medicine	
INTM 6202	Self-Care Methods for Health Care Professionals	
INTM 6203	Nutritional Metabolism and Environmental Exposure	
INTM 6204	Metabolic Networks in Integrative Medicine	
INTM 6206	Legal and Medical Ethics in Integrative Medicine	
INTM 6207	Business of Integrative Medicine and Health Care	
INTM 6210	Practical Application of Integrative Medicine I	
INTM 6212	Clinical Research in Integrative Medicine	

Electives		
9 credits in elective courses selected from the following:		
INTM 6105	Advanced Nutrition: Biochemistry	
INTM 6110	Food Technology and Health	
INTM 6111	Topics in Nutrition	
INTM 6120	Nutritional Immunology	
INTM 6205	Clinical Genomics, Proteomics, and Metabolomics	
INTM 6211	Practical Application of Integrative Medicine II (or)	
INTM 6213	Clinical Approaches in Integrative Medicine	

Other elective courses may be selected in consultation with the program advisor.

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF LABORATORY MEDICINE

Medical laboratory sciences (MLS) is a challenging and rewarding health care profession that has great impact on patient care. Working in a variety of settings, medical laboratory scientists are essential members of the health care team who provide vital information about the status and function of the body and its systems. The data obtained by medical laboratory scientists is utilized in the diagnosis, treatment, and prevention of disease.

The MSHS in laboratory medicine is designed for individuals who have a baccalaureate degree in a science or health science related field and wants to be eligible to become certified as a medical laboratory scientist.

Visit the program website (<https://smhs.gwu.edu/medical-laboratory-sciences/programs/mshs/curriculum/mshs-laboratory-medicine/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 52 credits in required coursework.

Code	Title	Credits
Required		
MLS 6116	Advanced Clinical Bacteriology I	
MLS 6117	Advanced Clinical Bacteriology II	
MLS 6119	Advanced Parasitology, Mycology, and Virology	
MLS 6130	Advanced Hematology I	
MLS 6131	Advanced Hematology II	
MLS 6141	Advanced Immunology and Serology	
MLS 6145	Advanced Clinical Biochemistry I	
MLS 6146	Advanced Clinical Biochemistry II	
MLS 6150	Advanced Immunohematology	
MLS 6151	Advanced Molecular Diagnostics	
MLS 6158	Advanced Laboratory Management and Operations	
Practicum		
MLS 6247	Advanced Clinical Biochemistry Practicum	

MLS 6248	Advanced Blood Bank Practicum
MLS 6249	Advanced Coagulation Practicum
MLS 6250	Advanced Hematology Practicum
MLS 6251	Advanced Clinical Microbiology Practicum
MLS 6252	Advanced Urinalysis Practicum
Research	
HSCI 6263	Biostatistics Translational Research
MLS 6244	Research Ethics and Integrity
MLS 6245	Current Topics in Medical Laboratory Science
MLS 6246	Capstone Project

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF MEDICAL LABORATORY SCIENCE

The of science in health sciences (MSHS) in medical laboratory science (MLS) provides high quality education for health professionals through the use of a creative and innovative online format. The curriculum in the program includes a combination of courses focused on leadership, research, teaching and assessment strategies, ethics and health policy.

Additionally, the program incorporates course work designed to provide students with a deeper understanding of the technologies and techniques upon which modern medical laboratory diagnostics are based, and insights on new trends and emerging technologies in laboratory science. Thus, the MSHS in MLS will equip certified laboratory scientists with the knowledge and skills to assume leadership positions in the laboratory, as managers, educators, clinicians or researchers.

Visit the program website (<http://smhs.gwu.edu/medical-laboratory-sciences/programs/mshs/curriculum/medical-laboratory-sciences/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits, including 15 credits in courses in the field and a mentored research project, 6 credits in strategic leadership courses, 12 credits in graduate research courses, and one 3-credit elective course.

Code	Title	Credits
Required		
Medical laboratory science		

MLS 6242	Molecular Pathology
MLS 6243	Education and Assessment in MLS
MLS 6244	Research Ethics and Integrity
MLS 6245	Current Topics in Medical Laboratory Science
MLS 6246	Capstone Project
Strategic leadership	
MLS 6158	Advanced Laboratory Management and Operations
MLS 6159	Leadership in Laboratory Medicine
Graduate research	
HSCI 6263	Biostatistics Translational Research
MLS 6132	Molecular Epidemiology
MLS 6160	Data Analytics and Research Methods in Laboratory Medicine

Electives

6 credits in graduate distance learning courses in medical laboratory sciences, clinical operations and health care management, health care quality, regulatory affairs, and clinical research administration, selected in consultation with the program advisor.

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF MOLECULAR DIAGNOSTIC SCIENCE

Molecular diagnostic testing uses highly sensitive and specific laboratory techniques to detect and identify biomarkers at the nucleic acid (DNA and RNA) level. Common molecular-based applications include medical diagnosis, establishing prognosis, monitoring the course of disease, and selecting optimal therapies. The master of science in health sciences (MSHS) in molecular diagnostic sciences prepares both MLS certified and non-certified individuals for careers in clinical or public health laboratories, research institutions, law enforcement agencies, as well as biotechnology or pharmaceutical companies.

The proposed curriculum has been designed so that students can complete the entire program in two academic years and offers the flexibility of allowing students to enroll either on a full-time or part-time basis. Furthermore, the program of study provides practical experience to individuals with no previous clinical molecular diagnostic experience in the form of a molecular diagnostics practicum course.

Visit the program website (<https://smhs.gwu.edu/medical-laboratory-sciences/programs/mshs/curriculum/molecular-diagnostic-science/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 35 credits, including 32 credits in required courses and a 3-credit elective course.

Code	Title	Credits
Required		
HSCI 6263	Biostatistics Translational Research	
MLS 6216	Microbial Pathogenesis	
MLS 6217	Medical Biotechnology	
MLS 6218	Genetics	
MLS 6219	Molecular Biology	
MLS 6158	Advanced Laboratory Management and Operations	
MLS 6166	Molecular Diagnostics Practicum *	
MLS 6242	Molecular Pathology	
MLS 6244	Research Ethics and Integrity	
MLS 6245	Current Topics in Medical Laboratory Science	
MLS 6246	Capstone Project	

Elective

One 3-credit MLS or HSCI course selected in consultation with the academic advisor.

* May be substituted with an elective course for students with current clinical molecular laboratory experience.

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF REGULATORY AFFAIRS

The regulation of clinical research is in itself a dynamic and emergent field. It brings together the science in which products—drugs, devices, biologics and vaccines—and treatment protocols are developed for improved global health care. Both the master's degree and graduate certificate programs prepare scientists and regulatory professionals to manage the key elements of the clinical research regulatory process. The rigorous curriculum focuses on regulatory strategy, regulatory guidance, legal and ethical issues, processes for product development and the business and political components

of regulation in clinical research, all while reinforcing the science behind the methods. Master's Degree Graduates of this program master the fine line between regulatory leadership and guidance.

They manage partnerships with sponsors and emerging pressures to further take into account global health, outcomes research and health care cost containment. Contemporary regulatory affairs leadership requires a foundation in data analysis and research. This program has been designed to meet all of these objectives. The distance education format provides a contemporary option for self-directed professionals who work in the field with industry or who may be just entering the field with one of the health and human services agencies charged with providing oversight and guidance to industry. Our course work has been developed in partnership with colleagues in industry and public regulatory agencies. The curriculum is taught by faculty members who bring both the perspectives of the sponsor and those of public health agencies.

As a result, the program provides each graduate with a robust academic education, while giving the student access to key leaders and practitioners in regulatory affairs. This program has been strategically designed to generate leaders who will meet the needs of the emerging trends in regulatory affairs.

Visit the program website (<https://smhs.gwu.edu/regulatory-affairs/>)for additional program information.

REQUIREMENTS

The master of science in health sciences in the field of regulatory affairs (RAFF) requires successful completion of 36 credits, including: 9 credits of the research coursework, 6 credits of strategic leadership courses, 18 credits in the field of regulatory affairs, and a 3-credit elective course.

Code	Title	Credits
Required		
Regulatory affairs courses		
RAFF 6201	Introduction to Global Regulatory Affairs	
RAFF 6202	Regulatory Drug Biologics	
RAFF 6203	Regulatory Device Diagnostics	
RAFF 6204	Clinical Research for Regulatory Affairs	
RAFF 6205	Regulatory Affairs Compliance	
RAFF 6275	Leadership in Regulatory Affairs	
Graduate research courses		
HSCI 6263	Biostatistics Translational Research	

HSCI 6264	Epidemiology Translational Research
Strategic leadership courses	
HSCI 6223	Topics in Health Care Leadership
HSCI 6240	Issues and Trends in the Health Care System
HSCI 6241	The Health Care Enterprise
Electives	
One of the following:	
CML 6274	Health Economics and Finance
CRA 6203	Partnerships with Human Subjects
CRA 6208	International Clinical Research
CRA 6209	Quality and Risk Management
CRA 6210	Medical Writing/Clinical Research
HCQ 6201	Building a Quality Culture

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF PHYSICIAN ASSISTANT

The physician assistant degree is a 24 or 36-month, full-time educational program divided into an academic and a clinical phase. The academic, or didactic phase, of the program is 12 months in duration and consists of four components: basic sciences, behavioral sciences, clinical medicine and pre-clinical skills. The academic phase also includes patient experiences designed to enhance the student's familiarity with the clinical environment.

The dual MPH./MSHS plan requires one additional year of academic coursework specific to public health. The clinical phase consists of a series of rotations in a variety of inpatient and outpatient settings. Students participate in the care of patients under the supervision of a licensed health care provider. Required experiences include inpatient medicine, surgery, pediatrics, emergency medicine, behavioral medicine and an elective rotation.

Visit the program website (<https://smhs.gwu.edu/physician-assistant/>)for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 104 credits in required courses.

MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF TRANSLATIONAL MICROBIOLOGY

The master of science in health sciences in the field of translational microbiology program, offered in a distance learning format, prepares students with the theoretical knowledge and practical skills for research positions in public health microbiology laboratories, biotechnology companies, government agencies, and research institutes. This program is ideal for students who already have microbiology or medical laboratory sciences (MLS) certification, or for individuals who do not have an interest in becoming certified microbiologists.

Visit the program website (<https://smhs.gwu.edu/medical-laboratory-sciences/programs/mshs/curriculum/translational-microbiology/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits, including 30 credits in required courses and 6 credits in elective courses.

Code	Title	Credits
Required		
Medical laboratory science courses		
MLS 6119	Advanced Parasitology, Mycology, and Virology	
MLS 6217	Medical Biotechnology	
MLS 6244	Research Ethics and Integrity	
MLS 6245	Current Topics in Medical Laboratory Science	
MLS 6246	Capstone Project	
Strategic leadership courses		
One course from the following two options:		
MLS 6158	Advanced Laboratory Management and Operations	
MLS 6159	Leadership in Laboratory Medicine	

Graduate research courses

HSCI 6263 Biostatistics Translational Research

MLS 6216 Microbial Pathogenesis

MLS 6132 Molecular Epidemiology

MLS 6160 Data Analytics and Research Methods in Laboratory Medicine

Electives

6 credits in elective courses in Medical Laboratory Science (MLS) selected with the approval of program director.

JOINT MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF PHYSICIAN ASSISTANT AND MASTER OF PUBLIC HEALTH

Applicants with a strong interest in public health may wish to consider the joint master of science in health sciences (MSHS) in the field of physician assistant and master of public health (MPH) degree program. The three-year program provides both clinical and academic preparation for careers in medicine and public health. Students receive advanced training in the design of health studies, epidemiological methods, application of computers to public health, community medicine, and techniques of health promotion. Students also design a special research project in collaboration with faculty of the Milken Institute School of Public Health and local, national, or international public health organizations.

For the MPH degree, students choose from among the following tracks: community-oriented primary care, environmental health science and policy, epidemiology, global environmental health, and health policy.

Visit the master of science in health sciences in the field of physician assistant (<https://smhs.gwu.edu/physician-assistant/>) and the master of public health (<http://publichealth.gwu.edu/academics/graduate/masters-programs/#joint>) program websites for additional information.

COMMUNITY-ORIENTED PRIMARY CARE

Community-Oriented Primary Care Track

The following requirements must be fulfilled: 137 credits, including 100 credits in physician assistant courses, 13 credits in MPH core, 10 credits in prevention and community health courses, and 14 credits in community-oriented primary care track courses.

DOCTORAL PROGRAMS

Doctoral programs

- Doctor of Health Sciences in the field of leadership in clinical practice and education (p. 1088)
- Doctor of Philosophy in the field of translational health sciences (p. 1089)
- Doctor of Physical Therapy (p. 1090)
- Advanced Practice Clinical Doctorate in Occupational Therapy (p. 1092)

DOCTOR OF HEALTH SCIENCES IN THE FIELD OF LEADERSHIP IN CLINICAL PRACTICE AND EDUCATION

Gain a mastery of the design, implementation and evaluation of health care programs, lead interprofessional teams, and evaluate evidence to advance health care. The program

prepares those in clinical health positions from a range of backgrounds who seek to build competencies in advanced professional practice, whether that be in the clinical or academic environments.

The curriculum is primarily online, meaning you continue in your profession full-time, learning when and where it is most convenient to you. There are two residencies required over separate weekends, and the program culminates with a finalized manuscript ready for submission to a peer review journal. The program offers two concentrations in either clinical or educational practice. By graduation you'll be able to:

- Design strategies to improve clinical practice guidelines, clinician performance, and improved outcomes in a health care environment
- Collaborate with interprofessional teams to address a common goal such as improved efficiency and effectiveness, or improved satisfaction among patients and health care providers
- Analyze gaps between the outcomes of best practice and current practice in health care practice environments

REQUIREMENTS

The following requirements must be fulfilled: 48 credits as outlined below.

Students complete one of two tracks based on desired career outcomes. One track focuses on enhancing skills related to advancing clinical practice in leadership positions and the other track emphasizes skills related to providing education for health professions students as well as leadership for health professions education in a higher-education setting.

Code	Title	Credits
Core (24 credits)		
HFR 8101	Interprofessional Collaboration in Practice	
HFR 8107	Program Theory and Health Innovations	
HFR 8116	Academic and Clinical Leadership in the Health Professions	
HFR 8270	Research Methods in the Health Professions I	
HFR 8271	Research Methods in the Health Professions II	
HFR 8203	Bioethical Implications of Health Research	
HFR 8102	Health Professions Practicum I	
HFR 8103	Health Professions Practicum II	

Track-specific (9 credits)

Clinical practice leadership track

Three courses from the following:

HCQ 6200 Introduction to Health Care Quality

CML 6203 Health Information Quality and Outcomes

HFR 8314 Health Care Research

HFR 8313 Knowledge Translation in Health Care

Or

Educational leadership track

Three courses from the following:

HFR 8212 Teaching Strategies in the Health Professions

HFR 8213 Curriculum Development in the Health Professions

HFR 8214 Assessment in Health Profession Education

HFR 8215 Technology and Education in the Health Professions

Electives (6 credits)

Research elective

At least one course from the following:

THS 8123 Qualitative Methods in Translational Health Sciences

THS 8125 Advanced Statistical Methods for Clinical and Translational Research

THS 8221 Mixed Methods Research in Translational Health Sciences

THS 8127 Systematic Reviews of Health Care Innovations

Additional elective

With the advisor's approval, students select an additional track or research course or select one of the following as a second elective:

OT 8220 Measurement of Human Function and Learning

HSCI 6297 Independent Study for Health Professionals

HSCI 6241 The Health Care Enterprise

COHM 6220 Finance for Health Care Operations

Seminars (9 credits)

HFR 8996 Seminar I

HFR 8997 Seminar II

HFR 8997 Seminar II

DOCTOR OF PHILOSOPHY IN THE FIELD OF TRANSLATIONAL HEALTH SCIENCES

Graduates of the PhD in translational health sciences program will generate, implement, and disseminate evidence to improve health and healthcare. Graduates will work across organizational barriers to engage a range of stakeholders (including scientists, policymakers, and consumers) in identifying, designing, and testing innovations in everyday healthcare practice and education. The PhD program is designed to prepare change leaders in three areas: professional healthcare education, healthcare practice, and translational research. This program is targeted primarily toward licensed health practitioners, educators, healthcare administrators, and public health professionals who are interested in affecting positive change to the health of society.

The program requires 52 credits beyond a master's degree, successful completion of two comprehensive examinations, a proposal defense, and a defended dissertation. The curriculum is low residency, with facilitated learning activities delivered online and on campus (2 weekends per semester) at the Virginia Science and Technology Campus in Ashburn, Virginia. Graduates of the PhD program will generate, implement, and disseminate evidence to improve health and healthcare. Graduates will work across organizational barriers to engage a range of stakeholders (including scientists, policymakers, and consumers) in identifying, designing, and testing innovations in everyday healthcare practice and education.

The PhD program is designed to prepare change leaders in three areas: professional healthcare education, healthcare practice, and translational research. This program is targeted primarily toward licensed health practitioners, educators, healthcare administrators, and public health professionals who are interested in affecting positive change to the health of society.

Visit the program website (<http://smhs.gwu.edu/translational-health-sciences/>) for additional information.

REQUIREMENTS

DOCTOR OF PHYSICAL THERAPY

The DPT program reflects the mission of GW's School of Medicine and Health Sciences: teaching with creativity and dedication; healing with quality and compassion; and discovering with imagination and innovation. The program is an eight-semester full-time entry-level professional program that prepares graduates to examine, evaluate, diagnose, develop plans of care, provide interventions and assess outcomes for patients with a wide range of musculoskeletal, neuromotor, cardiopulmonary and integumentary dysfunctions.

Students explore the legal and ethical aspects of patient care as well as issues of communication, patient education, health promotion, health policy and practice management. The program is committed to the development of generalist practitioners prepared to practice autonomously; reflective practitioners who think critically and use best evidence to effectively solve problems; compassionate practitioners who demonstrate excellence in communication and interpersonal skills, a respect for individual and cultural differences, and the core values of the profession; and dedicated practitioners who value the tenets of lifelong learning.

Small classes enable students to engage in critical thinking activities that facilitate effective clinical decision making and problem solving. Faculty members use innovative teaching strategies and integrate clinical experiences to facilitate learning and retention throughout the curriculum. The DPT program is accredited by the Commission on the Accreditation of Physical Therapist Education (CAPTE) of the American Physical Therapy Association (APTA). Students are eligible to sit for the national licensing examination upon graduation.

Visit the program website (<https://smhs.gwu.edu/physical-therapy/dpt-program/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 109 credits to be taken in the following sequence:

Elective		

DOCTOR OF OCCUPATIONAL THERAPY

The advanced practice occupational therapy doctorate (OTD) program trains practicing occupational therapists to engage as clinician-scholars in a multidirectional and interprofessional integration of basic research, client-oriented research, and population-based research, with the long-term aim of measuring and improving the health of the public, especially in the clinical area of post-acute care.

The 36-credit program is delivered in a creative and innovative online format. The curriculum includes a combination of courses focused on leadership, research, teaching and assessment strategies, and quality. Additionally, the program incorporates elective course work and a mentored capstone designed to provide students with a deeper understanding of evidence-based occupational therapy.

Visit the program website (<https://smhs.gwu.edu/occupational-therapy/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits, including 24 credits in required courses and 12 credits in elective courses.

Visit the program website (<https://smhs.gwu.edu/occupational-therapy/>) for additional information.

OT 8276	Doctoral Capstone	
Electives		

12 credits in elective courses selected in consultation with the Program Director.

CERTIFICATE PROGRAMS

Post-baccalaureate certificates

- Post-baccalaureate certificate in blood banking for medical laboratory science (p. 1097)
- Post-baccalaureate certificate in chemistry for medical laboratory science (p. 1098)
- Post-baccalaureate certificate in clinical microbiology (p. 1098)
- Post-baccalaureate certificate in hematology for medical laboratory science (p. 1099)
- Post-baccalaureate certificate in medical laboratory science (p. 1099)
- Post-baccalaureate certificate in microbiology for medical laboratory science (p. 1099)
- Post-baccalaureate certificate in molecular diagnostic sciences (p. 1100)
- Post-baccalaureate certificate in pre-medicine (p. 1101)

Graduate certificates

- Graduate certificate in biomedical informatics (p. 1092)
- Graduate certificate in clinical operations and health care management (p. 1093)
- Graduate certificate in clinical research administration (p. 1093)
- Graduate certificate in clinical and translational research (p. 1094)
- Graduate certificate in clinical research practice (p. 1094)
- Graduate certificate in correctional health administration (p. 1095)
- Graduate certificate in health care quality (p. 1095)
- Graduate certificate in health sciences (p. 1096)
- Graduate certificate in health services and outcome research (p. 1096)
- Graduate certificate in integrative medicine (p. 1096)
- Graduate certificate in regulatory affairs (p. 1097)

GRADUATE CERTIFICATE IN BIOMEDICAL INFORMATICS

The biomedical informatics program prepares professionals for a rewarding career in health care leadership and research. Graduates will be skilled in the integration of programming, data analysis and data manipulation skills to solve biomedical problems. Students learn how to apply data analytics to improve the quality of healthcare and patient outcomes. This interdisciplinary education includes components of clinical healthcare, computer science, data analytics, ethics and translational medicine. Our innovative curriculum include courses in statistics, leadership, computer programming, and

clinical care and the healthcare system. Students develop informatics analytics and tools in support of clinical decision-making, clinical research, and patient engagement. Graduates are well-prepared for informatics careers working at hospitals and medical centers, pharmaceutical companies, global health care organizations, consulting groups, and in government agencies.

REQUIREMENTS

The introduction of electronic health records and health databases within the clinical setting has transformed health care. Informatics serves as the bridge between human-computer interactions in the health care space, as well as how the data we collect in these settings can be leveraged to improve patient safety, outcomes, and quality.

Program Requirements

Course ListCode Title Credits

Required

INFR 6101	Principles of Medical Informatics
INFR 6102	Principles of Medicine for Informaticians
INFR 6105	Health Care Quality for Informatics
INFR 6121	High Performance Computing
INFR 6540	Medical Decision Making and Decision Support Systems

Elective

One 3-credit elective course selected from the following with the advisor's approval. The advisor may approve an alternative elective.

INFR 6103	Advanced Computing Applications for Biomedical Informatics
HSCI 6273	Bioinformatics for Genomics
HSCI 6265	Grantsmanship in Translational Research

Visit the program website for additional information

GRADUATE CERTIFICATE IN CLINICAL OPERATIONS AND HEALTHCARE MANAGEMENT

The online graduate certificate in clinical operations and healthcare management prepares you to effectively lead clinical operations and strategic development initiatives for a variety of healthcare organizations across the continuum of care. In GW's flexible online graduate certificate program, you will study ways to improve your own communication skills for optimal interprofessional practice, lead efforts in quality

improvement, and utilize the technological tools needed to conduct effective data analyses for strategic development.

When you complete the graduate certificate program, you'll be able to pursue a clinical operations career in a variety of healthcare organizations. All 18 credit hours are transferable to the MSHS program in clinical operations and healthcare management.

Program Outcomes

- Communicate effectively across a variety of platforms to optimize interprofessional practice and operations
- Evaluate healthcare systems to enhance ethical, efficient, and financially sound operations
- Conduct effective data analyses for operational and strategic development in a healthcare setting continuum
- Lead efforts to continuously improve the quality and value across healthcare operations
- Improve organizational performance by successfully implementing change management.

Visit the program website (<https://smhs.gwu.edu/cohm/programs/graduate-certificate-program/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses.

Code	Title	Credits
Required Courses:		
COHM 6210	Strategic Communications	
COHM 6220	Finance for Health Care Operations	
COHM 6320	Informatics for Operational Leadership and Health Care Quality	
COHM 6430	Health Care Systems Operations	
COHM 6470	Applications in Clinical Operations and Health Care Management	
HSCI 6223	Topics in Health Care Leadership	

GRADUATE CERTIFICATE IN CLINICAL RESEARCH ADMINISTRATION

Clinical research administration is a vast and expanding field that involves the processes in which products—drugs, devices, biological and treatment protocols are developed for patient care. Both the master's degree and graduate certificate programs prepare health sciences professionals to participate in the science and business of the development process. Our

rigorous curriculum focuses on regulatory requirements, ethical issues, processes for product development, the business of clinical research and scientific method processes. The distance education format, offered online, provides a convenient option for self-disciplined and self-directed students to pursue the program and prepare for professional advancement while maintaining their work and other commitments.

A Clinical Research Administration Certificate program is available at GW. The certificate requires 18 semester hours in clinical research administration course work. Those credits are transferable to the M.S.H.S. degree.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits, including 15 hours in required courses and one 3-credit elective course. Courses successfully completed in this program are transferable to the master of science in health sciences (MSHS) in clinical research administration degree program.

Code	Title	Credits
Required		
CRA 6201	Critical Analysis Clinical Research	
CRA 6202	Medicines Development	
CRA 6203	Partnerships with Human Subjects	
CRA 6204	The Clinical Research Industry	
CRA 6209	Quality and Risk Management	
Elective		
One of the following		
CRA 6208	International Clinical Research	
CRA 6211	Monitoring, Auditing, and Oversight in Clinical Research	

Visit the program website (<https://smhs.gwu.edu/clinical-research-administration/programs/certificate/curriculum/>) for additional information.

GRADUATE CERTIFICATE IN CLINICAL AND TRANSLATIONAL RESEARCH

The master of science in health science (MSHS) in clinical and translational research provides high quality education to researcher professionals through the use of a creative and innovative online format. The program was developed as a component of the Clinical and Translational Science Award granted to Children’s National Health System and George

Washington University. It prepares graduates to meet the needs of a more “translational” approach to research. The curriculum includes a combination of courses focused on translational, interdisciplinary, and health care research and leadership. Thus, the MSHS and graduate certificates will equip research professionals with the knowledge and skills to fill any number of clinical and translational research professions from funded scientist, clinical personnel, and those who mediate for better policy about health.

Visit the program website (<https://smhs.gwu.edu/clinical-translational-research/programs/graduate-certificates/graduate-certificate-clinical-translational-research/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 21 credits, including 18 credits in required courses and a 3-credit elective course.

Code	Title	Credits
Required		
CTS 6201	Critical Analysis in Clinical Research	
CTS 6205	Clinical Investigations	
CTS 6261	Foundations in Clinical and Translational Research	
CTS 6264	Clinical and Translational Research Capstone Project	
CTS 6265	Grantsmanship in Translational Health Science	
CTS 6275	Transdisciplinary Research Proposal	
CTS 6285	Collaboration and Team Science in Practice and Research	

GRADUATE CERTIFICATE IN CLINICAL RESEARCH PRACTICE

The online graduate certificate in clinical research practice prepares you for evidence-based practice in the role of a Principal or co-investigator (Co-I or Co-PI) in clinical research. There are six online courses (15 credits) that can be applied toward the master of science in health sciences (MSHS) in clinical and translational research.

In earning the certificate, you learn how the Institutional Review Board (IRB), the Data Safety and Monitoring Board, protocol development, implementations, standard operating procedures, guidelines, regulations, and ethical considerations inform clinical research practice so you can collaborate with sponsored research programs.

In as little as 1 year, students complete 15 credit hours and learn to:

- Oversee clinical research at the study site level
- Ensure compliance with Good Clinical Practice (GCP)
- Use biostats and epidemiology to inform clinical practice in a research study site
- Improve the practice's potential for serving as a clinical study site

Visit the program website (<https://smhs.gwu.edu/clinical-translational-research/programs/graduate-certificates/graduate-certificate-clinical-research-practice/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 15 credits, including 12 credits in required courses and 3 credits in elective courses.

Code	Title	Credits
Required		
CTS 6202	Research Methods for Clinical and Translational Research	
CTS 6203	Legal and Ethical Issues in Clinical and Translational Research	
CTS 6205	Clinical Investigations	
HSCI 6263	Biostatistics Translational Research	
HSCI 6264	Epidemiology Translational Research	
Electives		
3 credits in elective coursework selected in consultation with the academic advisor.		

GRADUATE CERTIFICATE IN CORRECTIONAL HEALTH ADMINISTRATION

The correctional health administration program provides a solid foundation for professionals seeking a career in correctional health care administration, as well as valuable training for current correctional health care administrators seeking career advancement. Students will learn how to design a health care services plan for incarcerated patient populations; develop health care administration management skills for staffing and leading a correctional health care team; acquire strategies for cost containment while ensuring the delivery of quality health care; and adopt strategies for facilitating the continuity of health care for incarcerated patients returning to their communities.

Visit the program website for additional information.

REQUIREMENTS

This certificate program provides a solid foundation for individuals seeking a career in correctional healthcare administration and valuable training for current correctional healthcare administrators seeking career advancement. Healthcare administrators are the key managers for ensuring the effective delivery of health care to these incarcerated patient populations. Capable correctional healthcare administration results in improved clinical outcomes for patients, more prudent allocation of limited healthcare resources and safer jails and prisons.

Program Requirements

Code	Title
15 credits of coursework from the following:	
CML 6020	Fundamentals of Correctional Health Care
CML 6021	Correctional Health Care Administration for Special Populations
CML 6023	Correctional Health Care Fiscal Management
CML 6025	Correctional Health Care Oversight
CML 6050	Correctional Health Care Delivery

Visit the program website (<https://smhs.gwu.edu/correctional-health-administration/curriculum/>) for additional information.

GRADUATE CERTIFICATE IN HEALTH CARE QUALITY

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses. All credits earned in this program are transferable to the Master of Science in Health Sciences in the field of health care quality (<http://bulletin.gwu.edu/medicine-health-sciences/graduate-programs/ms-health-care-quality/>) degree program.

Code	Title	Credits
Required		
HCQ 6200	Introduction to Health Care Quality	
HCQ 6201	Building a Quality Culture	
HCQ 6202	Health Care Quality Landscape	
HCQ 6203	Quality Improvement Science	

HCO 6204	Health Care Quality Analysis
----------	------------------------------

HCO 6205	Patient Safety Systems
----------	------------------------

Visit the program website (<https://smhs.gwu.edu/health-care-quality/curriculum/#grad>) for additional program information.

GRADUATE CERTIFICATE IN HEALTH SCIENCES

As more information about the structure, process and outcomes of health care emerges and the science of quality expands, quality improvement is emerging as an area of expertise in the industry. GW's master's program, delivered online, was developed to meet the emerging demand for quality and for patient-safety specialists who have the capacity and competence to grow and sustain a culture of continuous improvement at all levels and within all sectors of the health care delivery system.

Graduates will be prepared to lead the design, development, implementation and evaluation of health care quality and patient safety initiatives. They will have the skills and knowledge needed for success in quality and patient-safety leadership, management and research positions within health care organizations or policy agencies.

REQUIREMENTS

The following requirements must be fulfilled: 15 credits in required courses.

Code	Title	Credits
CML 6205	Case Studies in Clinical Management and Leadership	
HCO 6200	Introduction to Health Care Quality	
HCO 6202	Health Care Quality Landscape	
HSCI 6240	Issues and Trends in the Health Care System	
RAFF 6201	Introduction to Global Regulatory Affairs	

GRADUATE CERTIFICATE IN HEALTH SERVICES AND OUTCOME RESEARCH

Health services research is a multidisciplinary field that requires researchers to apply concepts from variety of disciplines. A certificate in health services and outcome research contributes to the field by providing the targeted training to develop much needed and less emphasized skills in research design and methods for clinicians, physicians, nurses, medical students,

and residents who wish to expand their knowledge on the aforementioned areas. Clinicians in many cases lead health services research studies, and this is despite the fact that there is often a gap in their knowledge of research designs and methods.

Visit the program website (<https://online.gwu.edu/health-services-and-outcome-research-graduate-certificate/>) for additional information.

REQUIREMENTS

Code	Title	Credits
Required		
HSCI 6263	Biostatistics Translational Research	
HSCI 6265	Grantsmanship in Translational Research	
HSCI 6270	Research Methods for the Health Professions I	
THS 6101	Survey of Advanced Quantitative Methods for Health Services and Outcomes Research	
THS 6102	Decision Making and Economic Evaluation in Health Care	
Elective*		
One 3-credit elective course.		
COHM 6107	Economics of Health Care Systems	

*COHM 6107 is strongly recommended for the elective. An alternate elective may be approved by the program director.

GRADUATE CERTIFICATE IN INTEGRATIVE MEDICINE

THE GRADUATE PROGRAM IN INTEGRATIVE MEDICINE PREPARES PHYSICIANS AND HEALTH PRACTITIONERS IN ADVANCED PRINCIPLES AND PRACTICES OF WELLNESS AND LIFESTYLE MEDICINE. THE CURRICULUM IS TAUGHT BY INTERNATIONALLY RECOGNIZED LEADERS FROM THE CLINICAL AND RESEARCH SCIENCES, INCLUDING NOBEL-PRIZE WINNERS AND NASA SCIENTISTS, WITH A FOCUS ON PREVENTIVE, PROGNOSTIC, AND PATIENT-CENTRIC APPROACHES TO CARE.

Visit the program website (<https://smhs.gwu.edu/integrative-medicine/integrative-medicine-programs/graduate-certificate/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 21 credits in required courses.

Code	Title	Credits
Required		
INTM 6201	Foundations in Integrative Medicine	
INTM 6202	Self-Care Methods for Health Care Professionals	
INTM 6203	Nutritional Metabolism and Environmental Exposure	
INTM 6204	Metabolic Networks in Integrative Medicine	
INTM 6205	Clinical Genomics, Proteomics, and Metabolomics	
INTM 6206	Legal and Medical Ethics in Integrative Medicine	
INTM 6207	Business of Integrative Medicine and Health Care	
INTM 6210	Practical Application of Integrative Medicine I	

GRADUATE CERTIFICATE IN REGULATORY AFFAIRS

The regulation of clinical research is in itself a dynamic and emergent field. It brings together the science in which products—drugs, devices, biologics and vaccines—and treatment protocols are developed for improved global health care. Both the master's degree and graduate certificate programs prepare scientists and regulatory professionals to manage the key elements of the clinical research regulatory process.

The certificate program is ideal for the scientist with an advanced degree who may be just entering the regulatory affairs profession within industry or the government sector. The certificate requires 18 semester hours in regulatory affairs course work. The certificate coursework is transferable to the MSHS degree.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses.

All credits earned in this program are transferable to the master of science in health sciences in the field of regulatory affairs (<http://bulletin.gwu.edu/medicine-health-sciences/graduate-programs/ms-regulatory-affairs/>) degree program.

Code	Title	Credits
Required		
HSCI 6263	Biostatistics Translational Research	

RAFF 6201 Introduction to Global Regulatory Affairs

RAFF 6202 Regulatory Drug Biologics

RAFF 6203 Regulatory Device Diagnostics

RAFF 6204 Clinical Research for Regulatory Affairs

RAFF 6205 Regulatory Affairs Compliance

Visit the program website (<https://healthsciencesprograms.gwu.edu/program/the-george-washington-university-regulatory-affairs-certificate-graduatecertificate-1527569596799/>) for additional program information.

POST-BACCALAUREATE CERTIFICATE IN BLOOD BANKING FOR MEDICAL LABORATORY SCIENCE

The online post-baccalaureate certificate in blood banking for medical laboratory science is designed to teach you the ins and outs of testing, storing and transporting blood for transfusions. You'll learn how to test blood for viruses, identify blood types and antibodies, and separate blood into its component parts, such as red and white blood cells and plasma. This certificate can be completed in as little as one year and allows you to qualify to sit for the ASCP Technologist in Blood Banking (BB) exam.*

When you complete this certificate program, you'll be able to:

- Apply principles of traditional and molecular laboratory procedures to perform diagnostic analyses
- Correlate laboratory data and quality control data to assess patient test results
- Apply knowledge of laboratory science principles as they relate to human disease diagnosis
- Maintain a safe work environment
- Comply with laboratory safety regulations and regulatory policies
- Apply ethical decision-making to issues related to clinical laboratory practice

REQUIREMENTS

Students complete required courses either on a part-time or full-time basis. Courses in the major are designed to broaden the student's foundation in the sciences in preparation for the clinical phase of the program. All courses are taught online, with the exception of the clinical practicum. The clinical practicum usually is taken on a full-time basis upon completion of didactic coursework. Students are typically in a clinical

laboratory eight hours per day (daytime hours), five days per week. Students must be able to fulfill the necessary time requirement for the practicum.* Visit the program website (<https://smhs.gwu.edu/medical-laboratory-sciences/programs/certificate/curriculum/blood-banking/>) for additional program information.

Completion of the certificate qualifies the graduate to take the Technologist in Blood Banking examination offered by national certifying agencies.

The following requirements must be fulfilled: 16 credits in required courses, including the clinical practicum.

Code	Title	Credits
Required		
MLS 4141	Immunology and Serology	
MLS 4158	Laboratory Management and Operations	
MLS 4150	Immunohematology	
MLS 4151	Molecular Diagnostics	
MLS 4160	Blood Bank Practicum	

*Clinical rotations, lasting between one to four weeks each, are completed at an approved clinical site.

POST-BACCALAUREATE CERTIFICATE IN CHEMISTRY FOR MEDICAL LABORATORY SCIENCE

The online post-baccalaureate certificate in clinical chemistry for medical laboratory science is designed to provide the knowledge and hands-on skills needed to become a certified technologist in clinical chemistry. Students learn how to use chemistry to evaluate patient health, study DNA and examine tissue, along with developing laboratory procedures that help physicians make earlier, more precise patient diagnoses and determine treatment.

This certificate can be completed in as little as one year and allows students to qualify to sit for the Technologist in Chemistry (C) exam offered by national certifying agencies. Students who complete this certificate program learn to:

- Apply principles of traditional and molecular laboratory procedures to perform diagnostic analyses.
- Correlate laboratory and quality control data to assess patient test results.
- Apply knowledge of laboratory science principles as they relate to human disease diagnosis.
- Maintain a safe work environment.

- Comply with laboratory safety regulations and regulatory policies.
- Apply ethical decision making to issues related to clinical laboratory practice.

REQUIREMENTS

Students complete required courses either on a part-time or full-time basis. Courses in the major are designed to broaden the student's foundation in the sciences in preparation for the clinical phase of the program. All courses are taught online, with the exception of the clinical practicum. The clinical practicum is usually taken on a full-time basis upon completion of didactic coursework. Students are typically in a clinical laboratory eight hours per day (daytime hours), five days per week. Admitted students must be able to fulfill the necessary time requirement for the practicum.* Visit the program website (<https://smhs.gwu.edu/medical-laboratory-sciences/programs/certificate/curriculum/chemistry/>) for additional program information.

The following requirements must be fulfilled: 19 credits in required courses, including the practicum.

Code	Title	Credits
Required		
MLS 4141	Immunology and Serology	
MLS 4145	Clinical Biochemistry I	
MLS 4151	Molecular Diagnostics	
MLS 4161	Clinical Biochemistry Practicum	
MLS 4146	Clinical Biochemistry II	
MLS 4158	Laboratory Management and Operations	

Clinical rotations are completed at an approved clinical site and vary in length, lasting between 1 to 4 weeks each.

POST-BACCALAUREATE CERTIFICATE IN CLINICAL MICROBIOLOGY

REQUIREMENTS

The following requirements must be fulfilled: 13 credits in required courses.

Code	Title	Credits
Required		
MLS 4119	Parasitology, Mycology, and Virology	

MLS 4121	Applied Microbiology
MLS 4164	Clinical Microbiology Practicum
MLS 4179	Microbiology Laboratory Operations

POST-BACCALAUREATE CERTIFICATE IN HEMATOLOGY FOR MEDICAL LABORATORY SCIENCE

The online post-baccalaureate certificate in hematology for medical laboratory science is designed for students looking to be at the forefront of blood-related disease detection and treatment. Students learn to collect and test blood and its elements, establish procedures vital to the processing of these blood samples, and use the latest biomedical instruments and molecular techniques to investigate and determine the causes of disease.

Completion of this certificate qualifies students to take the Technologist in Hematology (H) exam offered by national certifying agencies. Students who complete this certificate program learn to:

- Apply principles of traditional and molecular laboratory procedures to perform diagnostic analyses.
- Correlate laboratory and quality control data to assess patient test results.
- Apply knowledge of laboratory science principles as they relate to human disease diagnosis.
- Maintain a safe work environment.
- Comply with laboratory safety regulations and regulatory policies.
- Apply ethical decision making to issues related to clinical laboratory practice.

POST-BACCALAUREATE CERTIFICATE IN MEDICAL LABORATORY SCIENCE

In the post-baccalaureate certificate in medical laboratory science program, students complete required courses either on a full- or part-time basis. Courses in the major are designed to broaden the student's foundation in the sciences in preparation for the clinical phase of the program. All courses are taken through distance learning, with the exception of the four months of clinical practica. The clinical practica are usually taken on a full-time basis upon completion of didactic coursework. Students typically are in a clinical laboratory eight (daytime) hours per day, five days per week. Students must be able to fulfill the necessary time requirement for the practica. Visit the program website (<https://smhs.gwu.edu/medical->

[laboratory-sciences/programs/certificate/curriculum/mls/](#)) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 48 credits in required courses, including the practica.

Code	Title	Credits
Didactic courses		
MLS 4141	Immunology and Serology	
MLS 4145	Clinical Biochemistry I	
MLS 4146	Clinical Biochemistry II	
MLS 4116	Clinical Bacteriology I	
MLS 4117	Clinical Bacteriology II	
MLS 4119	Parasitology, Mycology, and Virology	
MLS 4130	Hematology I	
MLS 4131	Hematology II	
MLS 4158	Laboratory Management and Operations	
MLS 4150	Immunohematology	
MLS 4151	Molecular Diagnostics	
MLS 4159	Capstone Seminar	
Practicum courses		
MLS 4160	Blood Bank Practicum	
MLS 4161	Clinical Biochemistry Practicum	
MLS 4162	Hematology Practicum	
MLS 4164	Clinical Microbiology Practicum	
MLS 4165	Urinalysis Practicum	
MLS 4166	Coagulation Practicum	

POST-BACCALAUREATE CERTIFICATE IN MICROBIOLOGY FOR MEDICAL LABORATORY SCIENCE

The online post-baccalaureate certificate in microbiology for medical laboratory science is designed for those seeking to advance their career and become board certified as a laboratory technologist. Program participants learn to analyze blood, urine, tissue and other body specimens to detect,

diagnose and treat disease, as well as the latest molecular techniques to investigate and determine the causes of disease.

Coursework may be completed on a full- or part-time basis. The clinical practicum is usually taken on a full-time basis upon completion of didactic coursework. Program participants are typically in a clinical laboratory eight hours per day (daytime hours), five days per week. Students must be able to fulfill the time requirement for the practicum*.

The certificate program teaches students what they need to qualify to sit for the ASCP Medical Laboratory Scientist (MLS) exam*.

Those who complete the program coursework and hands-on practicum will be prepared to:

- Apply principles of traditional and molecular laboratory procedures to perform diagnostic analyses.
- Correlate laboratory data and quality control data to assess patient test results.
- Apply knowledge of laboratory science principles as they relate to human disease diagnosis.
- Maintain a safe work environment.
- Comply with laboratory safety regulations and regulatory policies.
- Apply ethical decision making to issues related to clinical laboratory practice.

REQUIREMENTS

The following requirements must be fulfilled: 19 credits in required courses, including the practicum.

Code	Title	Credits
Required		
MLS 4116	Clinical Bacteriology I	
MLS 4117	Clinical Bacteriology II	
MLS 4119	Parasitology, Mycology, and Virology	
MLS 4141	Immunology and Serology	
MLS 4151	Molecular Diagnostics	
MLS 4158	Laboratory Management and Operations	
MLS 4164	Clinical Microbiology Practicum	

*Clinical rotations are completed at an approved clinical site and vary in length, lasting between one to four weeks each.

Visit the program website (<https://smhs.gwu.edu/medical-laboratory-sciences/programs/certificate/curriculum/microbiology/>) for additional program information.

POST-BACCALAUREATE CERTIFICATE IN MOLECULAR DIAGNOSTIC SCIENCES

Given the rise of commercialized, at-home DNA testing kits and recently proven medical capabilities particularly in cancer diagnosis and treatment, the need for diagnostic molecular scientists who can ethically and properly manage the challenges of molecular testing and the data it provides is great.

The post-baccalaureate certificate in molecular diagnostic sciences is designed to help students launch their laboratory careers with a curriculum dedicated to the up-and-coming field of molecular diagnostic testing. This online program gives students the knowledge and hands-on experience to work with DNA, RNA, proteins, and lipids to detect, diagnose, and monitor disease and select optimal therapies.

Program participants learn the specific clinical laboratory techniques to detect and identify biomarkers at the nucleic acid levels in major areas of medicine including genetic disorders, infectious diseases, cancer, pharmacogenetics, and identity testing. Through a series of online coursework and a clinical practicum, they complete the certificate ready for a career in helping people get well through effective testing and diagnostics.

Graduates of the molecular diagnostic science certificate program are prepared to work as technologists in a diagnostic molecular laboratory, public health laboratory, research institution, law enforcement agency, the molecular section of hospital laboratories, reference laboratory, biotechnology firm, or pharmaceutical company. They are prepared to:

- Take the Molecular Biology (MB) Board of Certification examination offered by the American Society for Clinical Pathology (ASCP).
- Explain the methods of collection, transport, and handling of various specimen types for molecular analysis.
- Apply molecular-based testing for laboratory utilization and clinical decisions for patient/client outcomes.
- Implement preventive and corrective maintenance programs for equipment and assays.
- Troubleshoot and evaluate appropriate actions for problem resolution.

REQUIREMENTS

The following requirements must be fulfilled: 24 credits in required courses.

Code	Title	Credits
MLS 4158	Laboratory Management and Operations	

MLS 4170	Introduction to Molecular Biology
MLS 4171	Human Genetics
MLS 4172	Molecular Diagnostics Capstone
MLS 4217	Molecular Techniques
MLS 4242	Applications of Molecular Testing
MLS 4266	Molecular Diagnostics Practicum

POST-BACCALAUREATE CERTIFICATE IN PRE-MEDICINE

The post-baccalaureate pre-medicine program offers two tracks for individuals who want to pursue a career in medicine, but have not taken core science courses. Through personalized advising, standardized test (MCAT or GRE) preparation, and access to clinical and research experiences, the program prepares graduates to successfully apply to medical school or a physician assistant (PA) program. Each track is an intensive year-long, face-to-face, cohort program offered at the GW Virginia Science and Technology Campus (VSTC) in Ashburn, VA.

The one-year program is designed to provide future health professionals with foundational coursework, standardized test preparation, and access to real-world experience necessary for a successful medical school or PA program application. Students who successfully complete the program will receive a post-baccalaureate pre-medicine certificate.

REQUIREMENTS

The post-baccalaureate certificate in pre-medicine is designed to provide students with the foundational coursework, standardized test preparation, and access to real-world experience necessary for a successful medical school application. This full-time program, which can be completed in 12 months, is offered at GW's Virginia Science and Technology Campus (VSTC). Visit the program website (<https://smhs.gwu.edu/postbac-premed/>) for additional program information.

The following requirements must be fulfilled: 36 credits in required courses.

Code	Title	Credits
Required		
HSCI 3101	General Chemistry I	
HSCI 3102	General Chemistry II	
HSCI 3103	Organic Chemistry I	
HSCI 3105	Biochemistry	

HSCI 3201	Biology I
HSCI 3202	Biology II
HSCI 3301	Physics I
or HSCI 3501	Human Anatomy and Physiology I
HSCI 3302	Physics II
or HSCI 3502	Human Anatomy and Physiology II
HSCI 3401	Current Topics in Health Care I
HSCI 3402	Current Topics in Health Care II
Electives	
3-4 credits of elective coursework:	
HSCI 2503	Survey of Medical Terminology
HSCI 3104	Organic Chemistry II
HSCI 3107	Introduction to Biochemical Pharmacology
HSCI 3117	Principles of Biostatistics for Health Sciences
Other elective courses may be approved by the program.	

SCHOOL OF NURSING

Dean P. Jeffries

Senior Associate Dean for Academic Affairs P. Slaven-Lee

Assistant Deans for Programs M. Echevarria, K. Griffin, C. Padovano, M. Tanner

Established in 2010, the George Washington University School of Nursing (GW Nursing) has a proven record of innovation, entrepreneurship and leadership. GW Nursing educates and inspires nurses to provide high-quality, compassionate, person-centered health care. It develops leaders who actively engage in health promotion, patient advocacy, and health care innovation, and prepares nurse educators to pursue quality and advance the profession.

GW Nursing programs include the bachelor of science in nursing (BSN), master of science in nursing (MSN), doctor of nursing practice (DNP), doctor of philosophy in the field of nursing (PhD), and post-master's and graduate certificates. These programs emphasize the integration of nursing practice, research and policy with a strong focus on solving practical problems. This approach promotes strong nursing practice and leadership skills in GW Nursing graduates.

Vision

Compelled by the belief that all people deserve quality health care, we aspire to be trusted advocates for the advancement of societal well-being in the clinic, community and statehouse.

Mission

Prepare leaders and providers to improve the health of all people by leveraging our presence in the nation's capital.

Diversity Statement

We cultivate excellence in teaching, learning, research and service through equal access to resources, opportunities and advancement for all members of our community. We foster a culture in which we acknowledge, discuss and address privilege to increase success among marginalized people. Our community is committed to the promotion of equity and social justice.

Values

GW Nursing supports and upholds GW's values, which guide our students, faculty, and staff to strengthen and improve our community. These values include:

- Integrity. We are honest and fair in our words and actions
- Collaboration. We achieve more by engaging others in shared processes and decision-making.
- Respect. We value people as individuals and treat them with fairness, compassion and care.
- Excellence. We achieve distinction through knowledge and innovation.

- Openness. We are accessible, receptive and share information freely.
- Diversity. We value and include people from different cultures, backgrounds and perspectives in the pursuit of our common goals.
- Courage. We encourage risk-taking, learning from failure and perseverance in our pursuit of excellence.

Accreditation

The George Washington University is accredited by its regional accrediting agency, the Middle States Association of Colleges and Schools. The BSN, MSN, DNP and post-graduate advanced practice registered nurse certificate programs are accredited by the Commission on Collegiate Nursing Education (<https://www.aacnursing.org/CCNE/>). The BSN program is approved by the Virginia Board of Nursing (<https://www.dhp.virginia.gov/Boards/Nursing/>) and the MSN and DNP programs are approved by the District of Columbia Board of Nursing. (<https://dchealth.dc.gov/bon/>)

REGULATIONS

Admission

To be considered for admission to any GW Nursing program, an applicant must complete the online application and pay an \$80 fee on the TargetX (https://gw.force.com/TX_SiteLogin/?startURL=%2FTargetX_Portal__PB) platform application. Unofficial transcripts must be submitted from each academic institution attended, regardless of whether credit was earned. Detailed application information is available on the school website at nursing.gwu.edu. Applicants should refer to the individual program descriptions for details on prerequisites and supporting documentation, which varies by program. It is the responsibility of applicants to ensure that all required application materials are submitted by the designated deadlines. Official copies of all transcripts are required upon matriculation. All records become the property of GW Nursing and are not returned. In addition, admitted applicants may need to submit information from a criminal background check, drug screen, physical examination and evidence of required immunizations and health insurance coverage depending on the program option.

Conditional Admission

Admission with conditions may be offered at the discretion of the admissions committee and the program dean. The terms of admission are outlined in the letter of admission from GW Nursing. Students enrolled in clinical-based programs must complete a criminal background check and drug screen prior to enrollment in a clinical course. Criminal background checks and drug screens are conducted through CastleBranch® (<https://www.castlebranch.com/>). Students matriculating in clinical programs must also complete the pre-clinical

requirements outlined in the Clinical Compliance Management section of the GW Nursing Bulletin.

Advance Tuition Deposit

Upon notification of admission, the student is required to officially accept the offer of admission on the TargetX (https://gw.force.com/TX_SiteLogin/?startURL=%2FTargetX_Portal__PB) platform and submit an advance tuition deposit of \$500.00. The deposit is credited toward tuition and is nonrefundable. Failure to pay this deposit may result in the revocation of a student's offer of admission.

International Applicants

International applicants should refer to related policies on the GW Bulletin. Applicants whose native language is not English or who are not citizens of countries where English is an official language must submit test scores from either Test of English as a Foreign Language (TOEFL) or academic International English Language Testing System (IELTS). The following are the minimum scores for admission consideration:

- TOEFL: 600 on paper-based; 100 on Internet-based
- Academic IELTS: an overall band score of 7.0, with no individual band score below 6.0

The language test requirement may be waived for applicants who hold a degree from an accredited college or university located in a country in which English is the official language and also the language of instruction at the institution.

U.S. Citizens Living Abroad

GW Nursing welcomes applications from citizens of the United States who are living abroad. Students living abroad are required to attend all simulation-based learning events on campus that are included in the plan of study. Nurse practitioner students living abroad are expected to complete required clinical hours with a minimum of three different clinical preceptors. Clinical and practicum placements must be approved by the program director and the assistant dean for the MSN or DNP program. Students who fail to meet clinical objectives may be required to travel to the U.S. for additional remediation and supervision prior to program completion.

Non-Degree Seeking Students

A student who wishes to take individual courses at GW Nursing must obtain permission to register as a non-degree seeking student. The application should be submitted on the TargetX (https://gw.force.com/TX_SiteLogin/?startURL=%2FTargetX_Portal__PB) platform. The assistant dean of student affairs in conjunction with the appropriate program dean determines whether the applicant will be granted permission to register as a non-degree seeking student. Permission to take individual courses, if granted, is generally limited to a total of 6 credits of non-clinical coursework, excluding the GW Nursing-offered undergraduate prerequisite courses. Admission to take courses as a non-degree seeking

student does not guarantee admission to any GW Nursing academic program.

Readmission

Students who were previously registered in a GW Nursing program but did not register during the immediately preceding semester (summer sessions excluded) must apply for readmission. Students who have attended other academic institutions while not enrolled at GW Nursing must have official transcripts sent directly to the GW Nursing Office of Student Affairs from each institution attended. Applications for readmission are considered based on regulations currently in effect. Upon readmission, the student is subject to the regulations and requirements in place at the time of readmission. Readmission is not guaranteed.

Change of Specialty

A change of specialty request is treated like a new application for admission. The student must complete the same application process and meet the same deadlines as other prospective students. Requests are considered during the normal admission cycle and occur only during the specialties' regular admission term. There may be circumstances when the program director can make an exception to the timeline, in consultation with the program dean and Assistant Dean of Student Affairs. All deadlines for program- or track-specific clinical placement deadlines apply. Students already enrolled at GW Nursing do not receive preferential treatment in the selection process; their applications are considered along with all other applicants.

Student Progression

Course Withdrawal (p. 1103)

After the fourth week of classes, a dropped course is considered a withdrawal and a notation of *W* will appear on the transcript. Students may withdraw three weeks prior to the last day of the course. Course start date and end dates may be found on the Schedule of Classes (<https://my.gwu.edu/mod/pws/>). <https://my.gwu.edu/mod/pws/>

Leave of Absence

A leave of absence (LOA) is a temporary period of non-attendance available to continuing students. A student who must interrupt active pursuit of the degree may petition the Senior Associate Dean for Academic Affairs, through the assistant/associate dean of the respective program, for an LOA for a specified period of time, limited to a maximum of one calendar year. The LOA must be requested and approved by submitting the Leave of Absence and Continuous Enrollment Registration form (<http://nursing.gwu.edu/forms/>) to the program director and assistant dean of the respective program on or before the first day of the term in which the leave of absence is to be taken, and the date of return from the LOA must also be recorded on this form. The period of time designated as an LOA does not count toward the time of completion of the respective program. If the request is

approved, the student must register for absence LOA in each semester, following regular registration procedures.

Degree candidates who discontinue their studies without being granted an LOA and students granted leave who do not return to active study at the close of the period of approved absence must reapply for admission and are subject to the regulations and requirements in effect when they reenroll. The right to use university facilities is suspended while the leave is in effect. If required courses are not available at the time of a student's return from an LOA, the student will be placed on continuous enrollment status for the semester.

Return from Leave of Absence

Students returning from LOA must complete a Return from Leave of Absence (<http://nursing.gwu.edu/forms/>) form. If the program director imposes any conditions on the student's return from an LOA, they communicate the conditions to the student in writing and send copies to the Assistant Dean for Student Affairs and the Director of Student Services.

A hold is placed on the student's registration until the program director confirms in writing to the Director of Student Services that all conditions have been met for the student's return. If no conditions have been imposed by the program director for return from an LOA, students are not required to receive approval to return if they are returning within the predetermined period. Exceptions to this LOA policy must be approved by the assistant program dean in consultation with the Senior Associate Dean for Academic Affairs and the Assistant Dean of Student Affairs.

Transfer Credit

Undergraduate Students

Advanced standing may be awarded for appropriate non-nursing coursework completed at other accredited institutions, provided minimum grade requirements have been met. The minimum acceptable grade is 'C' for coursework to be applied toward an undergraduate degree. GW Nursing reserves the right to determine course equivalency and degree applicability. Students awarded advanced standing may need to take additional courses to satisfy credit requirements for degree conferral. BSN students may not transfer any nursing course to GW Nursing. Applicants or admitted students are counseled by the program dean and/or student affairs staff that nursing courses completed at other academic institutions are not eligible for transfer into their GW Nursing program of study. Up to nine 9 credits in the GW Nursing BSN program are eligible to be applied to the MSN program. The completed credits are eligible to be used for the graduate program within five years of graduation. Students completing the registered nurse to bachelor of science in nursing option may have up to nine 9 credits applied to the MSN program at GW Nursing.

Graduate Students

Up to 6 credits of coursework may be accepted as transfer credit for graduate students, provided the coursework was completed within the past five years at an accredited college or university with a minimum grade of B. A limited amount of

additional transfer credit may be approved upon petition to the assistant dean for the MSN or DNP program. GW Nursing reserves the right to determine course equivalency and degree applicability.

Degree candidates who are currently enrolled at this institution and plan to take courses at other accredited institutions for transfer credit must secure prior approval from the assistant dean for the MSN or DNP program and the Senior Associate Dean for Academic Affairs.

Gap Analysis

Applicants to certificate and graduate programs should request a gap analysis at the time of their application. GW Nursing gap analysis is performed by the director of the certificate, MSN or DNP specialty in which the student is enrolled to determine courses necessary to complete the degree or certification requirements. The gap analysis is part of the student's permanent record.

Financial Regulations

GW Nursing adopted the following financial regulations for the academic year covered by this Bulletin. Costs are expected to increase in subsequent years. Visit the University Financial Fees and Regulations website (<http://bulletin.gwu.edu/fees-financial-regulations/>) for additional information.

Drop-Refund Schedule

Drop-Refund schedule for on-campus students (BSN only)

Withdrawal	Percentage
On or before the end of the first week of classes	90%
On or before the end of the second week of classes	60%
On or before the end of the third week of classes	40%
On or before the end of the fourth week of classes	25%
After the fourth week of classes	None

On or before the end of the fourth week of classes	50%
After the fourth week of classes	None

Drop-Refund Schedule for Oregon Residents (Online Courses Only)

Oregon residents enrolled in an online education course are allowed a modified tuition refund policy in order to meet Oregon State Mandate OAR 583-030-0035(18)(c). An Oregon student who withdraws from an online course is eligible for a partial refund through the middle week of the term. Refunds are based on unused instructional time and are prorated on a weekly basis. Students must be current residents of Oregon at the time of course registration and withdrawal to be eligible for this modified refund policy.

Fall and Spring term (15 weeks) for (Oregon Residents Only)

Withdrawal	Percentage
During the first week of classes	100%
On or before the end of the second week of classes	87%
On or before the end of the third week of classes	80%
On or before the end of the fourth week of classes	74%
On or before the end of the fifth week of classes	67%
On or before the end of the sixth week of classes	60%
On or before the end of the seventh week of classes	50%
On or before the end of the eighth week of classes	50%
After the eighth week of classes	None

Summer session (10 weeks), Oregon Residents

Withdrawal	Refund
During the first week of classes	100%
On or before the end of the second week of classes	80%
On or before the end of the third week of classes	70%
On or before the end of the fourth week of classes	60%
On or before the end of the fifth week of classes	50%
After the fifth week of classes	None

Refund policies of the university are in conformity with guidelines for refunds adopted by the American Council on Education. Federal regulations require that financial aid recipients use such refunds to repay financial aid received for attendance that semester. This policy applies to institutional aid as well.

In no case is tuition reduced or refunded because of absence from classes. Authorization to withdraw and certification for work done is not given to a student who does not have a clear financial record.

Financial Aid

GW offers financial assistance to all eligible students from a variety of resources. Financial aid consists of awards for academic achievement or talent without reference to financial circumstances (merit scholarships) and scholarships, grants, loans and employment based on academic achievement and demonstrated financial need. GW Nursing scholarships are only applicable to tuition and must be accepted for the term in which they were offered. Scholarships cannot be deferred to future semesters.

Gift aid (scholarships, grants, fellowships, assistantships, etc.) is taxable to the extent that it exceeds the allowable costs of tuition, fees and required books and supplies or is dedicated to other costs, such as room and board. Federal grants may be taxable if, together with other gift assistance, they exceed the allowable costs. In the case of a student who is awarded tuition scholarships, grants or awards from more than one source, the

combined amount may not exceed tuition charges; institutional aid is adjusted to this limit.

In general, consideration for financial aid is restricted to students in good academic standing who are at least half-time, meet the minimum grade-point average for particular awards and are not financially encumbered by any other office of the university. Applications for institutional or federal aid may not be processed if the relevant tax returns have not been filed in accordance with the IRS Code. Documents submitted as part of aid applications become the property of GW and may not be returned. Federal regulations require that GW report suspected cases of fraud or misrepresentation to the appropriate federal, state and local authorities.

Information on financial aid is assumed to be accurate at the time the current academic year GW Bulletin is published. Future changes in federal regulations or institutional policies may alter the application requirements or program guidelines.

Health and Safety

Health and Accident Insurance

All GW students are required to have health and accident insurance. Students who fail to maintain such insurance may be placed on LOA without tuition refund. Undergraduate students are automatically enrolled in GW's student health insurance program through Aetna. Students who have acquired their own insurance must waive the GW student health insurance each academic year and have this item removed from their bill. Graduate students must submit verification of health insurance coverage to the GW Nursing Clinical Placement Team. (<https://nursing.gwu.edu/directory/>)

Verification of Health Status

GW Nursing requires all students to complete a full physical examination within twelve months prior to the beginning of clinical courses.

Compliance with HIPAA and OSHA Guidelines

The sites at which students pursue their clinical experience must comply with federal guidelines for the education of employees regarding prevention of the spread of bloodborne pathogens and patient privacy; therefore, such sites require that all students provide evidence of relevant annual training. Students must complete the required university module on HIPAA.

Immunization Requirements

It is the law in the District of Columbia that all students under the age of 26 have a record on file with GW Medical Services (<https://studenthealth.gwu.edu/>) documenting immunity to measles, mumps, and rubella (two immunizations with the initial dose given after the first birthday or positive titers), varicella (chickenpox—by immunization, documented history of disease, or positive titers), hepatitis B series, meningococcal vaccine (or

meningitis waiver), and a current tetanus/diphtheria booster (within 10 years prior to the beginning of the semester).

In addition, GW Nursing requires all clinical students to submit verification of health and immunization status prior to commencing any clinical coursework. All undergraduate and graduate students in clinical programs must submit the required documentation to Castle Branch (<https://www.castlebranch.com/>). All students must have a hepatitis screening test (see immunization policy (<https://registrar.gwu.edu/vaccination-requirements/>)). Students are responsible for providing proof of immunity to measles, mumps, rubella, and varicella by titer. Students must show documentation of Tdap (Tetanus, diphtheria, acellular pertussis) within the past seven years. Skin testing for tuberculosis exposure (PPD) is required on an annual basis. Annual influenza Immunization is required. GW Medical Services is available to provide any needed inoculations on a fee-for-service basis.

Undergraduate students who have not provided proof of necessary immunization by the end of the second week of classes may be removed from classes and are not permitted to register for the subsequent semester until such proof is provided. Graduate students are not permitted to enroll in clinical courses without completion of immunization requirements.

The sites at which students pursue their clinical experience must comply with federal guidelines for the education of employees regarding prevention of the spread of blood borne pathogens and patient privacy; therefore, such sites require that all students provide evidence of relevant annual training. Students must complete the required university module on HIPAA.

Academic Regulations

Accommodations for Disability

Reasonable accommodations are made for applicants with disabilities who can meet the requirements noted below after review by the GW Office of Disabilities Services. These accommodations must be accomplished without altering the essential requirements of the nursing curriculum. Inability to meet the technical standards throughout program enrollment necessitates further review which may delay or terminate progression and/or enrollment in the program.

Any need for special accommodations must be addressed specifically by the student with the GW Office of Disability Services. Only the GW Office of Disability Services can recommend accommodations or state the specific accommodations that faculty members will provide. Coursework undertaken prior to the student's application and approval for special accommodation is not subject to special accommodation. Such accommodations are not applied retroactively to completion of that process.

Technical and Academic Standards for Nursing Students

Technical standards are a necessary component to the complex discipline of nursing that all students must meet with or without reasonable accommodations. Students wishing to enter GW Nursing bachelor of science in nursing (BSN), master of science in nursing (MSN) and doctor of nursing practice (DNP) programs must demonstrate that they can meet these technical standards and continue to do so throughout their education program.

GW Nursing is committed to equal access for all persons in its programs, facilities, and employment without regard to race, color, religion, national origin, sex, age, marital status, disability, public assistance status, veteran status, sexual orientation, gender identity, or gender expression. The University abides by the Americans with Disabilities Act, Section 504 of the Rehabilitation Act of 1973 and other applicable statutes and regulations relating to equality of opportunity.

GW Nursing curricula leading to the eligibility for licensure as a registered nurse or advanced practice registered nurse require students to engage in diverse, complex, and specific experiences. Cognitive, affective, psychomotor, physical, and social abilities are required to satisfactorily perform these functions, which are essential to the successful completion of requirements for GW Nursing degree programs (BSN, MSN, DNP) and post-master's certificates. These abilities also are necessary to ensure the health and safety of patients, self, faculty and other healthcare providers. As outlined below, these functions comprise the technical standards performance requirements for students.

Technical standards include, but are not limited to, the following:

Motor Skills

- General: The student must have motor functions sufficient for the execution of movements needed to provide general care and treatment to patients in all health care settings.
- Specific: Student must possess the motor skills necessary to executing assessment and therapeutic procedures such as inspection, palpation, percussion, auscultation, and other diagnostic maneuvers and procedures. Such actions require coordination of both gross and fine muscular movements, equilibrium, and functional uses of the senses of touch, vision and hearing.
- Specific: The student must be able to perform basic life support (including CPR), transfer and position patients, and position and re-position self around patients. The student must also be able to operate equipment typically found in the health care environment (IV pumps, cardiac monitor, and electric and manual blood pressure equipment, safe patient handling equipment, etc.).

Sensory/Observation

- General: The student must be able to acquire information presented through demonstration and experience in the basic and nursing sciences.
- Specific: The student must be able to observe the patient accurately, at a distance and close at hand, and observe nonverbal communications when performing nursing assessments and interventions or administering medications. The student must be able to perceive the signs of disease and infection as manifested through physical examination. Such information may be derived from visual inspection and images of the body surfaces, palpable changes in various organs and tissues, and auditory information (patient voice, heart tones, bowel and lung sounds, etc.)

Communication

- General: The student must have the ability to communicate effectively and sensitively with other students, faculty, staff, patients, family, and other professionals.
- Specific: The student must be able to express their ideas and feelings clearly and demonstrate a willingness and ability to give and receive feedback. The student must be able to convey or exchange information at a proficiency level sufficient to obtain a health history, identify problems presented, explain alternative solutions, and give directions during treatment and post-treatment. The student must be able to effectively communicate in English through verbal, written, and electronic formats, with the ability to retrieve information from various sources of literature and computerized databases. The student must be able to communicate verbally in English in classroom presentations, seminars, simulation, practicum sites, practicum conferences, and online formats. The student must be able to process and communicate information on the patient's status with accuracy in a timely manner to members of the health care team. The appropriate communication also may rely on the student's ability to make a correct judgment seeking supervision and consultation in a timely manner.

Cognitive

- General: The student must be able to measure, calculate, reason, prioritize, analyze, integrate, and synthesize information and act with integrity and judgment (ability to manage impulsivity). The student must have the ability to sustain attention and memory to maintain patient safety.
- Specific: The student must be able to read and comprehend extensive written materials. The student also must be able to evaluate and apply information and engage in critical thinking in the classroom, lab, and clinical setting within the time constraints unique to each setting.

Behavioral/Emotional

- General: The student must possess the emotional health required for the effective use of their intellectual abilities, the exercise of good judgment, and the prompt completion

of all responsibilities attendant to the nursing care of patients and families.

- Specific: The student must be able to maintain mature, sensitive, and effective relationships with patients, students, faculty, staff, and other professionals in all circumstances, including highly stressful situations. They must have the emotional stability to function effectively under stress and to adapt to an environment that may change rapidly without warning and/or in unpredictable ways. The student must be able to experience empathy for the situations and circumstances of others and effectively communicate that empathy. They must know how their own values, attitudes, beliefs, emotions, and experiences affect their perceptions and relationships with others. The student must be able and willing to examine their behavior when it interferes with productive individual or team relationships. The student must possess skills and experience necessary for effective and harmonious relationships in diverse academic and work environments.
- Specific: The student must be able to meet School of Nursing attendance requirements. The student must be able to satisfy all requirements set forth by clinical affiliation agreements as well as any additional requirements of any clinical setting. The student must uphold professional nursing standards related to the student's scope of practice.

Professional Conduct

- General: The student must possess the ability to reason morally and practice nursing in an ethical manner.
- Specific: The student must be willing to learn and abide by professional standards of practice. They must possess attributes that include compassion, empathy, altruism, integrity, honesty, responsibility, and tolerance. The student must be able to engage in patient care delivery in all settings and be able to deliver care to all patient populations, including, but not limited to, children, adolescents, adults, individuals with disabilities, medically compromised patients, and vulnerable adults.

Scholarship Requirements

All students must maintain satisfactory academic progress in attempted coursework to be eligible to continue enrollment in their program. Undergraduate students must maintain a minimum grade-point average of 2.8 during their degree program and receive no more than one notation of *Z* or *W* in any given semester. A minimum grade of *B* is required in clinical courses and a minimum grade of *C* is required in didactic courses.

Graduate students must maintain a minimum grade-point average of 3.0 (3.3 for DNP) during their degree program and receive no more than one notation of *Z* or *W* in any given semester. A minimum grade of *B* is required in clinical courses and a minimum grade of *C* is required in didactic courses. Students must also earn a minimum grade of *B* in NURS 6220, NURS 6234, and NURS 6222. For DNP and PhD students a

minimum grade of *B* is expected in every course, including electives.

Although transfer credit may be assigned, courses taken at other institutions are not considered in computing the grade-point average. Symbols that may appear on the transcript include *CR* (Credit); *AU* (Audit) *P* (Pass); *NP* (No Pass); *I* (Incomplete); *IPG* (In Progress); *W* (Authorized Withdrawal); and *Z* (Unauthorized Withdrawal). These symbols are not included in determining the GPA. A student who earns a grade below *B* in a clinical course cannot progress in the clinical portion of the program until that course is successfully completed. Both grades remain on the student's transcript and are calculated in the final grade-point average.

Time to Program Completion

Students admitted to the GW Nursing BSN program are expected to complete all program requirements and graduate in four semesters, including summer sessions, from the point of matriculation. If a student falls out of progression because of a course failure or course withdrawal, the student will have a total of six semesters to complete all degree requirements and graduate. If the student does not graduate within six semesters, they are subject to academic dismissal from the program. These time limits do not apply to students on approved LOAs and/or those who are deployed for military duty.

Students admitted to a GW Nursing MSN program are allowed no more than four and a half years (thirteen semesters, including summer sessions) from the point of matriculation to complete all degree requirements and graduate. Students admitted to the GW Nursing APRN Certificate Program are allowed no more than two and a half years (eight semesters, including summer sessions) to complete the AGPCNP or FNP Certificate; and three years (six semesters, including summer sessions) to complete the AGACNP or PHMNP certificate. These time limits do not apply to students on approved LOAs and/or those who are deployed for military duty.

Students admitted to a GW Nursing DNP program who entered through the post-BSN to DNP pathway are allowed no more than seven years (twenty-one semesters, including summer sessions) from the point of matriculation to complete all degree requirements and graduate. Students who entered through the post-MSN to DNP pathway are allowed no more than five years (fifteen semesters, including summer sessions) from the point of matriculation to complete all degree requirements and graduate. These time limits do not apply to students on approved LOAs and/or those who are deployed for military duty.

Students admitted to the GW Nursing PhD program must have their doctoral dissertation written and defended within seven years (21 semesters, including summer sessions) from the point of matriculation. Exceptions to the seven-year limit are rarely given and only with compelling evidence that the student has made all practical efforts to complete within seven years. A student must be admitted to candidacy, which follows

successful PhD dissertation defense, within four years (twelve semesters, including summer sessions) after matriculation in the PhD program and at least one academic year before the date on which the degree is to be conferred. The student must complete all program requirements within three years (nine semesters, including summer sessions) following admission to candidacy.

If it becomes apparent that a student will not complete all degree requirements and graduate within the time allowed, the student may petition GW Nursing for an extension of time to complete their degree. To request an extension of time, students must complete a Request for Policy Exception (<https://nursing.gwu.edu/forms/>) form and submit the form to their program dean for review. If the request is approved, the student must maintain appropriate registration during the authorized period of the extension. An LOA is not permitted during the approved extension period.

Academic Probation

Undergraduate students who fail to achieve a cumulative GPA of 2.8, or who have more than one notation of *Z* or *W* in each semester, are placed on academic probation for a period of one semester. Students on academic probation are required to meet with their academic advisor to develop an Academic Success Plan. Students must submit the Academic Success Plan to their appropriate program dean and meet with their academic advisor prior to registration for the next semester to ensure progress is being made. While on probation, a student must achieve at least a 2.8 term GPA in each subsequent semester, be continuously enrolled or on an approved leave of absence or continuous enrollment, and not receive any unsatisfactory course grades as outlined in the Scholarship Requirements. While on probation, undergraduate students may register for no more than 13 credits per semester, unless approved by the program director and program dean.

Graduate students who fail to achieve a cumulative GPA of 3.0 (3.3 for DNP) or who have more than one notation of *Z* or *W* in each semester, are placed on academic probation for a period of one semester. Students on academic probation are required to meet with their academic advisor to develop an Academic Success Plan. Students must submit the Academic Success Plan to their appropriate program dean and meet with their academic advisor prior to registration for the next semester to ensure progress is being made. While on probation, a student must achieve at least a 3.0 (3.3 for DNP) term GPA in each subsequent semester, be continuously enrolled or on an approved leave of absence or continuous enrollment, and not receive any unsatisfactory course grades as outlined in the Scholarship Requirements.

Dismissal

A student who fails a required course must repeat the course. Students are only allowed to repeat a required course once. When a student earns an unsatisfactory grade in a required course a second time or earns two or more unsatisfactory

grades in one term the student is academically dismissed from the program. Notification of academic dismissal is communicated to the student in writing by the program dean, with copies to the senior associate dean for academic affairs, the assistant dean of student affairs and program director.

The dismissal notification letter is maintained in the official student record. It is the student's responsibility to maintain current information (address, phone number, email address, emergency contact, etc.) with GW Nursing and the University.

Additional specific conditions warranting academic dismissal include, but are not limited to:

- Two instances of academic probation.
- Failure to meet the requirements of an Academic Success Plan while on academic probation.
- Failure to complete all degree or certificate requirements within the time limit.
- Academic misconduct resulting in academic jeopardy or probation imposed as the result of a judicial board prehearing or hearing.
- Violation of professional comportment standards.
- Failure to meet the terms of a provisional admission.

Academic dismissal is final and may not be appealed. Students may reapply to the School of Nursing one calendar year from the time of dismissal.¹

Procedures on the Evaluation of Professional Comportment

Students enrolled in GW Nursing programs are required to conform to all rules, regulations and policies outlined in the GW Bulletin. In addition to the GW Bulletin, GW Nursing students must adhere to the regulations outlined below.

As members of the health care community, GW Nursing students are expected to behave in a manner consistent with the principles and obligations inherent to professional practice. Some behaviors or patterns, either during the didactic or clinical phase, may raise concerns as to the student's suitability to continue in the program of study. Inappropriate behaviors for a nursing student may include, but are not limited to, breaching patient confidentiality, using illegal drugs or abusing controlled substances, becoming sexually involved with a patient, undertaking a procedure or scope of practice beyond that of a student, disobeying or showing disrespect for others, threatening verbal or physical behavior toward others—including students, faculty or patients—showing a judgmental attitude toward patients, or revealing a lack of concern or compassion in practice. The process described below is intended to address behaviors that are unacceptable to GW Nursing and raise questions about the student's fitness for the practice of nursing.

When a problem with professional comportment (other than academic dishonesty) regarding a student is perceived, the observer communicates this concern to the relevant program

director. If the communication is verbal, it must be confirmed immediately by a signed written statement or else it is not pursued further. Upon receiving such a communication, the program director creates a confidential file in which all documents pertaining to the matter will be placed. The contents of the file are preserved for a period of time not less than five years from the date of separation or graduation from GW Nursing. Access to this file is restricted to the student under consideration, the program director, the assistant dean for the program, the Senior Associate Dean for Academic Affairs, the Dean, the Assistant Dean of Student Affairs and their staff, the GW Nursing Ad Hoc Committee, if one is constituted, and attorneys for GW and the student.

The assistant dean for the program notifies the student in writing that they have received a communication from an individual who perceives that the student has a problem with professional comportment. The notice includes a copy of these procedures. The assistant dean for the program meets informally with the student as soon as possible. At that meeting, or as soon thereafter as possible, the assistant dean for the program may do one or more of the following:

- Advise the student.
- Recommend that the student seek professional assistance, at the student's expense.
- Gather additional information through contacts with the student, their peers, faculty, professional consultants, and/or any other source deemed to have relevant information. With the student's concurrence, they may be referred for a medical, psychiatric, and/or psychological evaluation. With student consent, the written report from the health care provider will be included in the student case file.
- Refer the case to a GW Nursing Ad Hoc Committee ("Ad Hoc Committee").

An Ad Hoc Committee and its Chair is named by the assistant dean for the program. The Ad Hoc Committee, including the Chair, consists of three GW Nursing faculty members and the assistant dean of student affairs. The assistant dean for the program notifies the student, in writing, of the composition of the Ad Hoc Committee. The student is allowed ten calendar days from the mailing of this notice to object to any faculty member appointed to the Ad Hoc Committee. Such objection must be sent to the assistant dean for the program in writing. The assistant dean for the program, at their sole discretion, determines whether an objection warrants the appointment of one or more different persons to the Ad Hoc Committee. The Ad Hoc Committee investigates the allegation. The Ad Hoc Committee reviews the student's confidential file and interviews him or her.

The student under review and/or the student's advisor may attend the information gathering sessions. The information gathering sessions are transcribed. The student and/or their advisor may submit written questions to be answered by persons interviewed by the Ad Hoc Committee, but the

procedure regarding their questioning is left to the sole discretion of the Ad Hoc Committee, including whether the questions submitted by the student and/or their advisor are modified and/or posed to the persons interviewed. The student also may suggest persons be interviewed by the Ad Hoc Committee, but the decision to interview such persons is left to the sole discretion of the Ad Hoc Committee. The student may speak on their behalf and may submit other material. The student's advisor may not speak. The materials and/or testimony to be considered and the weight to be given to them are left to the sole discretion of the Ad Hoc Committee. The student and the student's advisor cannot be present when the Ad Hoc Committee meets in executive session.

Meetings of the Ad Hoc Committee are confidential. Minutes of the Ad Hoc Committee are placed in the student's confidential file upon the completion of the Ad Hoc Committee's review. The Chair and all members are required to be present for all meetings of the Ad Hoc Committee. The Ad Hoc Committee makes its final recommendation(s) to the assistant dean for the program. Such recommendation(s) are in writing and shall include findings of fact and the reasons for the recommendation(s). There is no required format for the recommendation(s). The content of the recommendation(s), including the nature and specificity of the findings and reasons, is left to the sole discretion of the Ad Hoc Committee. The Chair may review and sign the final recommendation(s) on behalf of the Ad Hoc Committee. The recommendation(s) could include, but is (are) not limited to, one or more of the following:

- Advising the student.
- Recommending that the student seek professional assistance, at the student's expense.
- Recommending conditions with which the student must comply in order to continue in GW Nursing.
- Recommending suspension from GW Nursing.
- Recommending dismissal from GW Nursing.

The Ad Hoc Committee must agree that its recommendation(s) is (are) supported by a preponderance of the evidence (more likely than not). The Ad Hoc Committee shall make an additional recommendation regarding whether the confidential file will be made part of the student's permanent academic record. The Ad Hoc Committee forwards its recommendation(s) to the Senior Associate Dean for Academic Affairs.

The Senior Associate Dean for Academic Affairs reviews the student's confidential file and the recommendation(s) of the Ad Hoc Committee. The Senior Associate Dean for Academic Affairs, at their sole discretion, may meet with the student prior to making their determination. The Senior Associate Dean for Academic Affairs takes whatever action they deem appropriate, including dismissal of the student from GW Nursing. The Senior Associate Dean for Academic Affairs informs the student in writing of their decision.

The student shall have fifteen calendar days in which to appeal the decision of the Senior Associate Dean for Academic Affairs. Such appeal shall be in writing sent to the GW Nursing Dean. The scope of this appeal is limited to the Dean or their designee's determination as to whether the procedures set forth in these procedures have been complied with. Failure to appeal the decision shall be deemed a waiver of any and all rights to challenge the Senior Associate Dean for Academic Affairs decision and shall be deemed an acceptance of the decision.

The Dean or their designee make a decision in the written record of the proceedings. Their decision is final. At any time during the process, if the student in question selects an attorney as their advisor, GW will have its attorney present. The student, therefore, is required to inform the assistant dean for the program seven days in advance of the hearing if counsel is to be present.

Evaluation of Academic Performance

Faculty members are responsible for evaluating the performance of students in a meaningful, useful and timely manner and for assigning grades on a basis that is rational, just and unbiased. The authority for assignment of grades rests with faculty members in the respective programs.

Appeal Procedures for Cases of Alleged Improper Academic Evaluation

The purpose of this process is to resolve student assertions of "cases of Alleged Arbitrary or Capricious Academic Evaluation" in the form of a course grade in the School of Nursing (SON) and in accordance with the GW Guide to Student Rights and Responsibilities.

Nature of grievances covered under this process—This policy and procedure pertains to a student assertion of arbitrary or capricious assignment of course grade (a "grade grievance"). Cases of academic dishonesty are not included here (see Statement of Student Rights and Responsibilities: Code of Academic Integrity), nor are allegations of illegal discrimination (see Statement of Student Rights and Responsibilities: Student Grievance Procedures).

Instructor responsibilities—It is the responsibility of the course instructor to provide a syllabus (or course outline) to each student in a course at the beginning of the semester that clearly sets forth the instructor's grading policy in the course. It is also the responsibility of the instructor to adhere to the grading policy stated in the syllabus, or, if changes are made, to announce and implement them in a manner that is not prejudicial to the evaluation any student receives from the course instructor.

Student responsibilities—It is the responsibility of the student to communicate clearly with the instructor and on a timely basis about any grading issues in a course. If the student is not clear about the syllabus, the grading policy or a grade on a

student assignment or other work product, the student should immediately initiate a discussion with the instructor.

Confidentiality—Students, faculty, instructors, academic administrators, and University employees shall maintain the confidentiality of matters related to grade grievances, in a manner consistent with University policies, including the Privacy of Student Records policy, and applicable privacy laws.

File retention—It shall be the responsibility of the SON Departments and Dean's Office to retain files regarding disputes beginning with a student's "Notification of Grade Grievance" filing. These files shall be retained for two academic years, and then discarded. No materials will be placed in individual student files in program offices, nor will notations be made on academic transcripts. See section above for instructor record retention requirements.

SON process: Appeal procedures for cases of alleged improper academic evaluation.

The only grounds for a grade appeal request is arbitrary and capricious grading, meaning that the grading standard was not properly applied. Arbitrary and capricious grading is considered in the event the assignment of the course grade is based upon something other than performance in the course; the assignment of the course grade is made based upon the unreasonable application of standards different from the standards that were applied to other students in that course; or when the assignment of the course grade is based upon a substantial and unreasonable departure from the written academic standards for that course. In the event a student believes the grade has been assigned in an arbitrary or capricious manner, a Grade Appeal Form (<https://nursing.gwu.edu/forms/>) may be submitted.

Students who believe that a grade or evaluation is capricious and/or arbitrary may use the following appeal procedures.

I. Attempt resolution with the relevant faculty member and the student's program director.

- a) The student must complete Section 1 of the Grade Appeal Form and submit this written appeal to the relevant faculty member within five calendar days of the time the grade is posted, with a copy to the program director.
- b) The faculty member will review the student's Grade Appeal and complete Section 2 of the form. Upon completion, the faculty member will submit the form to the program director with the student in copy.
- c) A review shall be conducted by the program director, consulting with the student and respective faculty member(s) involved with the grade or evaluation under review as the program director finds appropriate. If the program director is the faculty member who assigned the grade or evaluation under review, then a senior academic official conducts the review process.

d) Following the program director's review, the program director's decision will be input in Section 3 of the Grade Appeal Form. The completed Grade Appeal Form will be provided to the student and the faculty member.

II. Escalate the appeal to the senior associate dean for academic affairs.

- a) If a mutually satisfactory resolution is not achieved in Step 1, the student may, within five calendar days of the decision of the program director (or senior academic official, if applicable) being rendered, appeal to the senior associate dean for academic affairs.
- b) The student must submit to the senior associate dean for academic affairs a written letter of appeal, accompanied by the completed Grade Appeal Form used in Step 1 and any other supporting documentation that the senior associate dean for academic affairs permits.
- c) Appeal requests are reviewed by the senior associate dean for academic affairs, consulting with the student and all respective faculty members involved with the grade or evaluation under review, as the senior associate dean for academic affairs finds appropriate, to determine whether the grading procedures employed were fair, equitable, objective, and consistent. Appeal requests may be referred to the ASAC Progression Sub-Committee by the senior associate dean for academic affairs to provide additional guidance and recommendations.
- d) The senior associate dean for academic affairs (or delegate) will render a decision in writing to the student with the student's program director in copy. The decision of the senior associate dean of academic affairs is final.

Prerequisites and Corequisites

Students who want to take courses that have prerequisites must successfully complete prerequisites before the term in which they take the next course. When taking a course with a co-requisite, students must take the co-requisite during the same term as the course that requires it. Students should consult their plan of study and/or their syllabi for course-specific prerequisites and/or co-requisites.

Independent Study

The purpose of an independent study is to increase the student's exposure to and involvement in nursing research or practice under the direction of a faculty mentor. The student is responsible for identifying and initiating a contract with a faculty member involved in, or who has expertise in, their practice or research project area. Input from the student's advisor is required before the plan for independent study is finalized. The faculty mentor for an independent study must be qualified to teach at the appropriate level (doctoral for doctoral degrees), have expertise in the area of the independent study focus, and be an associate or regular member of the faculty. The faculty mentor can academically supervise the

independent study while the student works with the non-regular faculty. The student and faculty mentor must establish mutually agreed upon objectives and evaluation criteria. The agreement is recorded in an Independent Study Contract, and a signed copy is forwarded to the assistant dean of the student's program with a copy to the Assistant Dean of Student Affairs. Credit for independent study can vary from 1 to 3 credits per semester, depending on the program, the nature of the objectives, and requirements. Credit value is calculated as fifty to seventy clinical hours equaling 1 semester credit for practicum/clinical. One hour per week, for fifteen weeks in a semester, equals 1 semester credit for didactic coursework. At the completion of the independent study, students must meet with their faculty mentor for a final evaluation. The faculty mentor submits a grade when the student is deemed to have satisfactorily completed the independent study objectives. Independent studies may not extend beyond the semester of enrollment.

Audit

GW Nursing undergraduate students who have a cumulative grade-point average of at least 3.0 may take graduate-level non-clinical courses for audit. Written approval from the course instructor, advisor and associate deans for the MSN and DNP programs is required. Enrollment in a graduate-level course does not in any way imply subsequent GW Nursing approval for credit toward a graduate degree. Graduate-level tuition and fees apply. Students are responsible for additional costs.

Course Waiver

If a student takes a course at an institution other than GW, they must apply for a waiver to substitute a course if the course is in a GW Nursing required plan of study. The number of credits is not transferred to GW Nursing and the student will need to make up the waived number of credits. A course waiver must be requested in writing and must include justification for the request from the student's program director, who meets with the student to discuss how the waiver may affect their plan of study. For undergraduate students, the course waiver must be requested upon admission to the program and can only be for a pre-nursing course. No nursing courses can be waived based upon coursework at another institution. The student must have earned a grade of "B" or better in the course to be eligible for a waiver. MSN and DNP students must provide the program director with a course description or syllabus of the previously taken course, along with a transcript showing the grade the student received. The program director will make a recommendation regarding the waiver request. The student must then submit the program director's recommendation, waiver request, official transcript and course description to the assistant dean of their program. The advisor, the student, and program director are notified of the decision in writing. All students receiving course waivers will be required, with advisement, to take another course that will provide the appropriate number of credits to compensate for the waived course.

Relocation During Program of Study

Graduate students relocating during their program of study must contact their GW Nursing program director to discuss ramifications of moving to a state where GW Nursing does not operate or operates on a restricted basis. Students planning to relocate to a state where GW Nursing does not operate or operates on a restricted basis (LA, ND, AL, NY, TN), will not be able to complete their program of study as planned. Students should inform their program director and program associate of any planned relocation as soon as possible.

Advising and Mentoring

Each GW Nursing student is assigned a professional academic advisor in the Office of Student Affairs and a dedicated faculty mentor. The relationship is established to assure that the student is progressing satisfactorily in the program. Students enrolled in undergraduate, graduate, or certificate programs must meet with their professional academic advisor, in person or electronically, to review a program of study, listing all coursework required for the degree or certificate, including applicable transfer credit. Changes to the program of study can be made through petition to the program director. Professional academic advisors provide office hours and opportunities for advising by appointment. Should any other non-academic concerns (i.e., personal bereavement or medical issues) arise that hinders a student's academic success in their degree program, the student should first discuss the issue with their assigned professional academic advisor. The professional academic advisor may refer the student to the program director, program dean, the assistant dean for student affairs, or to one of the university services for consultation. Students may meet with their assigned faculty mentor at any point to discuss academic concerns or to solicit advice on career trajectory. Clinical MSN and BSN-DNP students are assigned a clinical experience faculty mentor to ensure successful completion of clinical requirements.

PhD advisors, mentors, and the dissertation chairperson: The advisor is assigned to the student at admission. The advisor provides guidance throughout the doctoral program and introduces students to the broader network of potential mentors. Students will form a network of formal and informal mentors, whose roles may include short-term research supervision, consultation, or dissertation committee membership. By the completion of semester four and with advisor assistance, the student will designate the dissertation chair. The primary advisor may serve as chair, or another GW faculty member may assume the role.

Changes in Course Enrollment

A student may not substitute one course for another without the approval of the program director and the assistant dean for the program. After the deadlines for adding or dropping courses, a student must obtain the permission of the course instructor, the program director, and the assistant dean for the program to withdraw from a course. Students are subject to all GW financial regulations with respect to change in

course enrollment as outlined in the GW Bulletin. Any refunds of tuition follow the guidelines related to Tuition Refunds described above.

Honor Society

The GW Nursing Phi Epsilon chapter is a chartered member of Sigma Theta Tau International, the national honor society of nursing. GW Nursing students who meet the qualifications specified by the constitution of Sigma Theta Tau are eligible for membership and may be nominated by an assistant dean for the program, faculty member or a Sigma Theta Tau member.

Graduate Student Clinical and Practicum Policies

Licensure

Graduate students, as well as RN to MSN students, must hold an active, unencumbered RN license in the state where they are completing their clinical rotation. This may require students to obtain additional RN licensure during their GW Nursing program. Students are responsible for understanding the terms and limitations of their RN license. Some states participate in the Nurse Licensure Compact (NLC) which gives multistate rights to RNs residing in a member state.

The GW Nursing Clinical Placement Team does not search the State Board of Nursing websites or NURSYS to obtain or verify a student's license. Students are not permitted to complete clinical hours in the states where GW Nursing does not operate. Students must allow adequate time before a clinical rotation to obtain any additional RN licenses for a clinical rotation and are responsible for submitting documentation to the GW Nursing Clinical Placement Team.

Students planning to complete clinical rotations outside of the United States must contact the GW Nursing Clinical Placement Team to verify licensure requirements. Any clinical hours accrued in the absence of the appropriate licensure are not counted toward the total number of hours required in the program of study.

Clinical Compliance Management

GW Nursing partners with a thorough background screening program called CastleBranch®. This service, in collaboration with the GW Nursing Clinical Placement Team, facilitates drug testing services. This service provides GW Nursing with the ability to assure safe student clinicians and keeps our clinical programs in compliance with the necessary regulations, accreditations and standards. Documentation of the following is required prior to starting clinical rotations:

- Criminal background check
- Urine drug test
- Proof of current RN license if applicable (in any and all states where you intend to complete clinical)
- Proof of current CPR certification (AHA or ARC)

- Proof of current personal health insurance (copy of health insurance card)
- Physical examination
- Immunization records: HepB, MMR, Varicella, Tdap, Seasonal flu, Meningococcal
- Annual TB test (PPD, QFT or chest X-ray if positive PPD or allergic)
- Verification of OSHA training
- Verification of HIPAA training
- Digital Photo

Students are not permitted to enter the clinical setting until all required items have been submitted to CastleBranch®. Entering the clinical setting prior to completing CastleBranch® requirements may be grounds for dismissal from their program of study. Any clinical hours accrued in the absence of required documentation are not counted toward the total number of hours required in the program of study.

Clinical Site Specific Requirements

In addition to GW Nursing clinical requirements, clinical sites may have additional requirements. Students are responsible for meeting these requirements prior to starting the clinical rotation. Students are expected to notify the GW Nursing Clinical Placement Team when all additional requirements have been met. Students are not permitted to start the clinical rotation until all site-specific requirements have been met and reported to the placement team. Any clinical hours accrued prior to meeting these requirements are not counted toward the total number of hours required in the program of study.

Clinical Rotation Data Forms and Deadlines

All nurse practitioner (NP) students are expected to submit a Clinical Rotation Data form (<http://nursing.gwu.edu/forms/>) indicating where and when they intend to start a clinical rotation, the clinical preceptor and other site-specific information. A new data form must be submitted for each rotation, regardless if the student has been with the preceptor or at the clinical site previously. Rotation data forms must be submitted by the semester deadlines posted in the Blackboard nurse practitioner community. Delay in form submission may result in a delay in the clinical placement or inability to place a student in time to meet course requirements.

Delay in Clinical Placement

Students who have not submitted a rotation data form 30 days in advance of the start of the semester are not permitted to enroll in the clinical course. Students who have not met clinical requirements and/or have not been cleared for clinical placement due to failure to secure a clinical site by the mid-semester [week five of a ten-week term; week seven of a fifteen-week term] are required to withdraw from the clinical course. A grade of "W" is awarded and the student is expected to repeat the course.

Notification of Clearance to Begin a Clinical Rotation

Once clinical requirements have been met and all required legal documents have been processed, students are notified by the GW Nursing Clinical Placement Team via email that they have been cleared to begin the clinical rotation. Clearance is sent to the student's GW email account. Permission to begin clinical may only be granted by the GW Nursing Clinical Placement Team. Students who enter the clinical setting prior to receiving clearance from the GW Nursing Clinical Placement Team may be dismissed from their program of study. Any clinical hours accrued prior to receiving clearance from the GW Nursing Clinical Placement Team are not counted toward the total number of hours required in the program of study.

Required Components of a Clinical Placement

Prior to submitting a Clinical Rotation Data form (<http://nursing.gwu.edu/forms/>), students are expected to discuss their plans for completing clinical hours with their clinical advisor. Students who have not yet been assigned a clinical advisor (those preparing to enter their first clinical course) should review the clinical requirements that can be found in the Blackboard GW Nursing nurse practitioner community. All Clinical Rotation Data forms are reviewed by faculty prior to initiation of the placement process to ensure appropriateness of the site. Clinical clearance includes the following:

- Faculty approval of site and preceptor
- A fully executed clinical affiliation agreement between GW Nursing and the clinical site
- Receipt of preceptor information
- An active, unencumbered RN license for the student in the state of the clinical site
- All GW Nursing preclinical requirements have been completed and uploaded to CastleBranch®
- All state regulatory requirements
- All site-specific requirements

Clinical Site Withdrawal

All nurse practitioner (NP) students are expected to submit a Clinical Rotation Data Form indicating where and when they intend to start a clinical rotation, the clinical preceptor data, and other site-specific information. Once a student submits a Clinical Rotation Data form (<http://nursing.gwu.edu/forms/>) to the GW Nursing Clinical Placement Team, it is the student's responsibility to notify the GW Nursing Clinical Placement Team if they no longer intend to complete clinical hours at that clinical site. In order to do so, students must complete the Clinical Site Withdrawal form (<http://nursing.gwu.edu/forms/>). Completion of this form informs the GW Nursing Clinical Placement Team that they should no longer devote resources to securing the clinical placement. GW Nursing works to enhance relationships with clinical site administrators and preceptors. Students are therefore required to notify the

clinical site directly if they no longer intend to complete clinical hours at that site. If the clinical site notifies GW Nursing that the site can no longer accept the student, a member of the GW Nursing Clinical Placement Team contacts the student directly.

Change of Preceptor

All GW Nursing graduate students must work with a licensed preceptor at an approved clinical site. The GW Nursing Clinical Placement Team reviews and verifies the credentials of all preceptors. When a student is notified of a change in the preceptor by a clinical site, they are required to complete the Preceptor Change form (<http://nursing.gwu.edu/forms/>). This form is required to:

- Change preceptor - This form should be used when the submitted preceptor can no longer precept a student and has been replaced by another preceptor at the same site.
- Add another preceptor - This form should be used when a student has more than one preceptor at the same site.
- Remove preceptor - This form should be used when the submitted preceptor can no longer precept a student and another preceptor has not yet been assigned.

The Preceptor Change form is to be used only after a Clinical Rotation Data form (<http://nursing.gwu.edu/forms/>) has been submitted for a clinical placement. Students must complete this form for any and all preceptor changes. Students may not begin working with a new preceptor until the form is reviewed and verified by the GW Nursing Clinical Placement Team. Preceptors are also required to submit information to the school. It is imperative that students notify the GW Nursing Clinical Placement Team of all preceptor changes to ensure timely and accurate clinical placement.

Formal Complaints

Purpose: provide a policy and procedure for filing a complaint arising from a person(s) internal or external to GW Nursing. All information regarding the complaint shall be kept confidential. Those investigating a complaint may only discuss it with those individuals who are immediately involved in the dispute. If GW Nursing deems a complaint to be "inappropriate" under this policy, the person submitting the complaint will be notified of a more appropriate avenue to pursue for resolution.

Non-Academic Complaint

A non-academic complaint is an allegation by a student concerning (1) a GW employee or affiliate, (2) a GW student, (3) administrative policies, procedures, regulations or requirements or (4) a service or activity.

If a student believes that they have been discriminated against on the basis of race, color, religion, sex, national origin, age, disability, veteran status, sexual orientation, or gender identity or expression in any of the policies, procedures, programs or activities of or by any individual employed by or acting in an official capacity for The George Washington University, please

see The George Washington University Guide to Student Rights and Responsibilities

Academic Complaint

An academic complaint is a formal complaint regarding a grade or evaluation of a student's performance. Faculty members are responsible for determining the curriculum of a course, for developing appropriate methods of evaluating student learning, for evaluating fairly, for upholding academic standards, and for enforcing policies concerning academic honesty. (See GW Code of Academic Integrity). To initiate a formal academic complaint, students should follow the procedures outlined in the Appeal Procedures for Cases of Alleged Improper Academic Evaluation in the GW Nursing Bulletin.

¹ Effective fall 2020, School of Nursing students can no longer appeal a dismissal. *Updated November 9, 2020.*

UNDERGRADUATE

Bachelor's programs

- Bachelor of Science in Nursing (<http://bulletin.gwu.edu/archives/2019-2020/nursing/bs-nursing/>)
- Registered Nurse to Bachelor of Science in Nursing (<http://bulletin.gwu.edu/archives/2019-2020/nursing/rn-to-bsn/>)

MASTER'S

Master's programs

- Master of Science in Nursing in the field of adult-gerontology acute care nurse practitioner (p. 1127)
- Master of Science in Nursing in the field of adult-gerontology primary care nurse practitioner (p. 1127)
- Master of Science in Nursing in the field of family nurse practitioner (p. 1128)
- Master of Science in Nursing in the field of nurse-midwifery (p. 1129) (collaborative program between GW School of Nursing and Shenandoah University (<http://www.su.edu/nursing/nursing-graduate-programs/nurse-midwifery-programs/>))
- Master of Science in Nursing in the field of nursing leadership and management (p. 1129)
- Master of Science in Nursing in the field of psychiatric mental health nurse practitioner (p. 1130)

DOCTORAL

Doctoral programs

- Doctor of Nursing Practice in the field of adult-gerontology acute care practitioner (p. 1131)
- Doctor of Nursing Practice in the field of adult-gerontology primary care practitioner (p. 1132)

- Doctor of Nursing Practice in the field of executive leadership (p. 1133)
- Doctor of Nursing Practice in the field of family nurse practitioner (p. 1133)
- Doctor of Nursing Practice in the field of health policy (p. 1134)
- Doctor of Nursing Practice in the field of nursing practice (p. 1134)
- Doctor of Nursing Practice in the field of psychiatric mental health nurse practitioner (p. 1135)
- Doctor of Philosophy in the field of nursing (p. 1136)

CERTIFICATES

Post-Master's Certificates

- Adult-Gerontology Acute Care Nurse Practitioner (<http://bulletin.gwu.edu/archives/2019-2020/nursing/pmc-adult-gerontology-acute-care-nurse-practitioner/>)
- Adult-Gerontology Primary Care Nurse Practitioner (<http://bulletin.gwu.edu/archives/2019-2020/nursing/pmc-adult-gerontology-primary-care-nurse-practitioner/>)
- Family Nurse Practitioner (<http://bulletin.gwu.edu/archives/2019-2020/nursing/pmc-family-nurse-practitioner/>)
- Psychiatric Mental Health Nurse Practitioner (<http://bulletin.gwu.edu/archives/2019-2020/nursing/pmc-psychiatric-mental-health-nurse-practitioner/>)

Graduate Certificates

- Health Policy and Media Engagement (<http://bulletin.gwu.edu/archives/2019-2020/nursing/health-policy-media-engagement/>)
- Nursing Education (<http://bulletin.gwu.edu/archives/2019-2020/nursing/pmc-nursing-education/>)

FACULTY

Professors J. Geiger-Brown, P. Jeffries, D. Keepnews, A. McNelis, C. Pintz, J. Pulcini, R. Ricciardi, Y.T. Yang

Associate Professors M. Batchelor, L. Briggs, C. Cox, K. Drenkard, A. Darcy-Mahoney, S. Davis, M. Echevarria, M. El-Banna, K. Griffith, J. Hahn, K. Kesten, E. Kurtzman, M. Leslie, K. Malliarakis, A. Pericak, L. Posey, M.J. Schumann, K. Whitt, Q. Zhou

Assistant Professors C. Allen, C. Braungart, K. Dawn, M. Dowling, A. Faraz, A. Glenn, C. Hogg, C. Lang, D. Le, B. Lunsford, J. Murphy, J. Park, M. Rumble, R. Schwindt, M. Venzke, S. Wallington, G. Wiersma

Associate Research Professor D. Lupu

Assistant Research Professor E. Athey

Clinical Professor K. Wyche

Clinical Associate Professor P. Slaven-Lee, M. Tanner

Clinical Assistant Professors A. Bankole, S. Bhati, L. Cassar, R. Mance, N. Marchi, B. Mullins, A.M. O'Brien, C. Reisenberg, L. Rilko, C. Seaton, C. Toulouse

Clinical Education Instructors M. Brown, E. Choma, C. Farina, W. Shanley, K. Stevens, J. Wavelet

Research Instructors L. Wilson

Visiting Professors J. Knestricks, A. Roberson

Visiting Instructor J. Clarke, J. Walsh

Adjunct Professors K. Leoffler, N. Rudner

Adjunct Instructor E. Emard

Adjunct Clinical Professor L. Henrikson

Adjunct Clinical Instructor H. Brown, A. Parks

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

NURS 3101. Ethical Foundations of Nursing. 3 Credits.

Ethical theory and principles as they relate to a variety of common ethical and moral dilemmas that challenge nursing professionals in their clinical practice.

NURS 3102. Nutrition for Health Professionals. 3 Credits.

Human nutrition fundamentals and the scientific foundation; nutritional requirements related to changing individual and family needs, food choices, health behaviors, food safety, prevention of chronic disease and nutrition-related public health in the United States and other countries.

NURS 3103. Human Anatomy and Physiology I. 4 Credits.

Fundamental structures and functions as they relate to the human body: homeostasis, anatomical language and body organization, tissues and histology, integumentary; skeletal; muscular; nervous, and endocrine systems. Students should have a basic background in introductory cell/molecular biology before enrolling.

NURS 3104. Human Anatomy and Physiology II. 4 Credits.

Fundamental structures and functions as they relate to the human body: homeostasis, anatomical language and body organization, tissues and histology, cardiovascular, lymphatic, respiratory, digestive, urinary, and reproductive systems. Students should have a basic background in introductory cell/molecular biology before enrolling. Prerequisite: NURS 3103.

NURS 3105. Microbiology for Health Professionals. 4 Credits.

The structural and functional characteristics of microbes; prokaryotic, eukaryotic, and viruses, in the context of human health.

NURS 3106. Introduction to Statistics for Health Professionals. 3 Credits.

A concepts-based course introducing students to the theory, practice, and application of probability and statistics to health care research questions.

NURS 3110W. Transition into the Nursing Profession. 2 Credits.

Values and characteristics of the nursing profession in the context of history and current legal, regulatory, and ethical contexts. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

NURS 3111. Health Assessment. 3 Credits.

Knowledge and skills necessary for conducting comprehensive and need-specific health assessments for individuals in both family and community contexts and determining areas in which health promotion activities should be implemented or reinforced. Corequisites: NURS 3112, NURS 3113, NURS 3118 and NURS 3119. Restricted to students enrolled in the bachelor of science in nursing program.

NURS 3112. Nursing Practice and Clinical Reasoning I: Adult and Aging Acute and Chronic Illness. 3 Credits.

Values, knowledge, and competencies at the foundation of safe, evidence-based, and professional holistic nursing care of adults with common medical and surgical needs. Restricted to students in the bachelor of science in nursing program.

NURS 3113. Clinical and Nursing Skills Lab: Adult Medical-Surgical I. 8 Credits.

Values, knowledge, skills, and competencies at the foundation of safe, evidence-based, professional, and holistic nursing care of adults with common medical and surgical needs; critical thinking and communication skills in clinical and laboratory environments. Corequisites: NURS 3111 and NURS 3118. Restricted to students in the bachelor of science in nursing program.

NURS 3114. Nursing Practice and Clinical Reasoning II: Advanced Adult Medical-Surgical. 3 Credits.

Builds on the basic concepts introduced in NURS 3112, incorporating complex, multi-system disease processes; assessing and managing clients/patients in a hospital environment; providing safe, evidence-based professional, and holistic nursing care related to the management of clients with advanced medical and surgical needs. Corequisite: NURS 3116. Restricted to students in the bachelor of science in nursing program. Prerequisites: NURS 3110W, NURS 3112 and NURS 3113.

NURS 3115. Clinical and Nursing Skills Lab: Adult Medical-Surgical II. 4 Credits.

Safe, evidence-based, professional, and holistic nursing care related to the management of clients with advanced medical and surgical needs; knowledge, skills, and competencies for assessing and managing clients/patients in a hospital environment. Restricted to students enrolled in the bachelor of science in nursing program. Prerequisites: NURS 3110W, NURS 3111, NURS 3112, NURS 3118, NURS 3119 and NURS 3213.

NURS 3116. Nursing Practice and Clinical Reasoning III: Psychiatric Mental Health Nursing. 3 Credits.

Theoretical principles, concepts, and skills needed to provide safe and effective nursing interventions to clients across the lifespan who are experiencing psychiatric and mental health conditions. Restricted to students in the bachelor of science in nursing program. Prerequisites: NURS 3110W, NURS 3111, NURS 3112, NURS 3213, NURS 3118 and NURS 3119.

NURS 3117. Nursing Practice and Clinical Reasoning IV: Maternity and Women's Health Care. 3 Credits.

Nursing interventions used in health promotion, risk reduction, clinical decision making and management of women's health issues, perinatal care of mothers and infants, gynecological health, and men's reproductive health. Includes clinical experiences. Restricted to students in the bachelor of science in nursing program. Prerequisites: NURS 3110W, NURS 3111, NURS 3112, NURS 3213, NURS 3114, NURS 3115, NURS 3116, NURS 3118, NURS 3119 and NURS 4118.

NURS 3118. Pharmacology I. 2 Credits.

The underlying principles of pharmacology and medication administration. Restricted to students in the bachelor of science in nursing program.

NURS 3119. Pathophysiology. 3 Credits.

Pathophysiology and diagnostic assessments of common disease conditions affecting individuals across the lifespan. Restricted to students in the bachelor of science in nursing program.

NURS 3120. Foundations of Professional Nursing. 6 Credits.

Basic nursing concepts and skills the beginning nurse needs to provide client- and family-centered care to diverse client populations. Prepares students to use the nursing process. Restricted to students in the BSN program.

NURS 3121. Health Assessment and Promotion. 3 Credits.

The knowledge and skills needed to conduct comprehensive and need-specific health assessments. Concepts of health promotion and disease prevention. Restricted to students in the BSN program.

NURS 3122. Principles of Safe Client Care. 2 Credits.

Client safety core concepts and values of professional nursing. Restricted to students in the BSN program.

NURS 3123. Quality Interprofessional Care of the Client. 2 Credits.

Basic concepts of improvement science in nursing and interprofessional health care. Builds on concepts of safety learned in NURS 3122.

NURS 3124. Adult and Geriatric Nursing I. 6 Credits.

Didactic/clinical course focusing on primary, secondary, and tertiary care in the adult and geriatric client. Incorporates the nursing process into the provision of client- and family-centered care. Restricted to students in the BSN program.

NURS 3125. Mental Health Nursing. 3 Credits.

Didactic/clinical course focusing on the application of theories and implementation of evidence-based care for clients with psychiatric/mental health issues. Restricted to students in the bachelor of science in nursing program.

NURS 3213. Adult Medical-Surgical Lab I. 4 Credits.

Values, knowledge, skills, and competencies at the foundation of safe, evidence-based, professional, holistic nursing care of adults with common medical and surgical needs; critical thinking and effective communication skills used in clinical and lab environments to deliver safe, evidence-based care. Laboratory fee. Corequisites: NURS 3111 and NURS 3112.

NURS 4099. Variable Topics. 1-6 Credits.

Assigned topics determined by the School of Nursing. Restricted to students with prior permission of the undergraduate division of the School of Nursing.

NURS 4109. Introduction to Perioperative Nursing. 3 Credits.

The role of the perioperative nurse and the fundamental knowledge, skills, and competencies needed to deliver safe, evidence-based, holistic care within a perioperative setting. Includes clinical experiences. Prerequisites: NURS 3110W, NURS 3111, NURS 3112, NURS 3213, NURS 3118, NURS 3119, NURS 3114, NURS 3115, NURS 3116 and NURS 4118.

NURS 4116. Children and Families. 3 Credits.

Focus on families with usual childhood issues and with children who require acute and chronic care. Working with persons of diverse backgrounds, nursing colleagues, and other members of the interdisciplinary team, students prioritize and provide nursing care in hospital and community-based settings. Includes clinical experiences. Restricted to students in the bachelor of science in nursing program. Prerequisites: NURS 3110W, NURS 3111, NURS 3112, NURS 3213, NURS 3118, NURS 3119, NURS 3114, NURS 3115, NURS 3116 and NURS 4118.

NURS 4118. Pharmacology II. 1 Credit.

Principles of pharmacology and mechanisms of action of drug prototypes used in clinical practice. Prerequisites: NURS 3110W, NURS 3111, NURS 3112, NURS 3213, NURS 3118 and NURS 3119.

NURS 4119. Patient Safety and Health Care Quality. 3 Credits.

Processes and skills needed to provide safe, quality nursing care, encompassing the five critical competencies: providing safe, patient-centered care; working in interdisciplinary teams; employing evidence-based practice; applying quality improvement; and using informatics. Restricted to students in the bachelor of science in nursing program. Prerequisites: NURS 3114, NURS 3115, NURS 3116 and NURS 4118.

NURS 4121. Nursing Advancement Portfolio. 15 Credits.

Collection of evidences to demonstrate student learning and competency throughout the curriculum as they relate to achievement of nursing baccalaureate program outcomes. The portfolio provides a means of organizing student accomplishments in their academic work and in their pursuit of professional career pathways.

NURS 4122. Capstone: Transition Into Professional Practice. 2 Credits.

Critically analyze, synthesize, and apply knowledge, theories, and concepts learned in the program to make the transition from nursing student to graduate nurse. Restricted to students in the bachelor of science in nursing program. Prerequisites: NURS 3110W, NURS 3111, NURS 3112, NURS 3213, NURS 3114, NURS 3115, NURS 3116, NURS 3117, NURS 3118, NURS 3119, NURS 4116, NURS 4118, NURS 4119, and NURS 6203.

NURS 4123. Senior Practicum: Transition Into Clinical Practice. 5 Credits.

Students partner with a registered nurse in a clinical setting to synthesize and apply concepts and skills learned in previous coursework in professional practice. Restricted to students in the bachelor of science in nursing program. Prerequisites: NURS 3110W, NURS 3111, NURS 3112, NURS 3213, NURS 3114, NURS 3115, NURS 3116, NURS 3117, NURS 3118, NURS 3119, NURS 4116, NURS 4118, NURS 4119, and NURS 6203.

NURS 4203. Dynamics of Nursing Leadership and Management. 3 Credits.

Introduction to concepts of nursing leadership and management, showcasing the importance of each, while noting the crucial differences between them.

NURS 4205. Nurse's Role in Health Care Policy. 3 Credits.

Framework for understanding the social, political, economic, and population based dimensions of U.S. health care policy using the "triad" of quality, access, and cost.

NURS 4207. Principles of Nursing Research and Evidence-Based Practice. 3 Credits.

Development of student skills in research and practice-related knowledge necessary to implement evidence-based practice. May be repeated for credit.

NURS 4217. Community and Public Health Nursing. 4 Credits.

Introduction to the principles of community and public health nursing with an emphasis on vulnerable populations. Prerequisites: NURS 3110W, NURS 3111, NURS 3112, NURS 3212, NURS 3114, NURS 3115, NURS 3116, NURS 3118, NURS 3119 and NURS 4116.

NURS 4417. Community and Public Health Nursing. 3 Credits.

Roles and responsibilities of nurses in community and population-based health. Concepts of community, public health, and health policy affecting culturally diverse and vulnerable populations locally, nationally, and globally. Identifying community health needs and appropriate primary, secondary, and tertiary prevention strategies. Restricted to students in the RN to BSN program.

NURS 6001. Clinical Experience in San Jose, Costa Rica. 0 Credits.

GW students work with nursing students and faculty from Universidad Hispanoamericana to provide basic health care, health screening, and patient education to children and adults in various community facilities and homes in San Jose, Costa Rica. Restricted to students enrolled in the School of Nursing.

NURS 6002. Clinical Experience in Quito, Ecuador. 0 Credits.

In collaboration with Universidad San Francisco de Quito, GW students work with local communities to provide basic health services and health education programs for adults and children in Quito and neighboring areas. Graduate students may have an opportunity to work with local physicians. Restricted to students enrolled in the School of Nursing who are fluent Spanish speakers.

NURS 6003. Clinical Experience in Mukono District, Uganda. 0 Credits.

In collaboration with GW partner Omni Med, students will focus on training volunteer community health workers to screen for hypertension and provide health education programs on topics such as maternal – child health, sanitation and nutrition in Mukono District, Uganda. Restricted to students enrolled in the School of Nursing.

NURS 6004. Clinical Experience in Thomonde, Haiti. 0 Credits.

Students and faculty from the GW's medical, physician assistant, and public health programs work in collaboration with partner organization Project Medishare to provide health services and education and disease prevention programs in rural clinics, schools, and villages in Thomonde, Haiti.

NURS 6005. Clinical Experience in Caracol, Haiti. 0 Credits.

In collaboration with health care providers from GW School of Nursing partner institution Pusan National University Yangsan Hospital, South Korea, and SAE-A Trading Company Ltd., students provide basic health services, health screening and education, and disease prevention programs to individuals and communities attending the medical mission clinic in Caracol, Haiti. Restricted to students enrolled in the School of Nursing.

NURS 6006. Clinical Experience in Maribor, Slovenia. 0 Credits.

In collaboration with the University of Maribor in Slovenia, GW students work with community health care workers to deliver basic nursing care to selected populations in the community. Students have opportunities to research selected health problems and their impact on the health of individuals and communities in Maribor.

NURS 6181. Creativity and Innovation in Health Care. 3 Credits.

The theoretical conceptualizations and practical applications to promote creativity and innovation in generating ideas, identifying opportunities, and solving problems.

NURS 6202. Concepts in Population Health. 3 Credits.

Students integrate and synthesize concepts associated with quality, health promotion, disease prevention, and chronic health problems within communities, the general population, and specific population groups; issues related to culturally diverse and vulnerable populations.

NURS 6203. Nursing Leadership. 3 Credits.

Evidence-based leadership skills as a core competency in nursing to improve patient care quality and strengthen nursing as a profession; theories of leadership, personal leadership, skill building, team building techniques, change, conflict resolution, motivation, and communication skills.

NURS 6204. Health Information and Technology. 3 Credits.

Key issues and concepts related to the use of technology and information management to support the provision of high quality health care and outcomes.

NURS 6205. Health Policy, Quality, and Political Process. 3 Credits.

Health policy process and analysis relevant to the three main components of policy: cost, quality, and access.

NURS 6207. Evidence-Based Practice for Health Care Researchers. 3 Credits.

Methodological issues of health care research; knowledge and skills needed to critically appraise and synthesize research results and evidence-based methods.

NURS 6208. Biostatistics for Health Care Research. 3 Credits.

Basic concepts and modeling approaches used in biostatistics through the use of health care research data.

NURS 6215. Pediatric Adversity and Early Childhood Development and Health. 3 Credits.

How major adversity in childhood can weaken developing brain architecture and impact physical and mental health; the impact of poverty and other social determinants of health on child well-being over the life cycle.

NURS 6220. Advanced Physiology and Pathophysiology. 3 Credits.

System-focused advanced physiology and pathophysiology for analysis of health deviations across the life span.

NURS 6222. Advanced Health Assessment and Diagnostic Reasoning. 4 Credits.

Nurse practitioner and nurse-midwifery students will acquire the knowledge, skills and clinical foundation for advanced health assessment and diagnostic reasoning in the ambulatory health care setting. This course is a prerequisite to all other clinical courses and includes a Campus Learning and Skills Intensive (CLASI).

NURS 6224. Adult/Gerontology Primary Care Nurse Practitioner I: Practice Introduction. 4 Credits.

First clinical practicum course in the adult-gerontology primary care nurse practitioner program; theoretical and practical foundations of common primary care conditions in the adult patient. Prerequisites: NURS 6220, NURS 6222, and NURS 6234.

NURS 6225. Adult/Gerontology Primary Care Nurse Practitioner II: Adolescent and Adult. 8 Credits.

Second clinical practicum course in the adult-gerontology primary care nurse practitioner program. Synthesis and integration of advanced decision making skills including diagnostic reasoning and clinical judgment, health assessment, health promotion, technology, and evidence-based practice. Prerequisites: NURS 6220, NURS 6222, NURS 6224, and NURS 6234.

NURS 6227. Family Nurse Practitioner Clinical Practicum. 1-7 Credits.

Clinical practicum providing foundations of family primary care; focus on chronic health problems faced by families from culturally diverse backgrounds. Corequisites: NURS 6250, NURS 6251 and NURS 6252 Prerequisites: NURS 6220, NURS 6222 and NURS 6234.

NURS 6229. Adult/Gerontology Primary Care Nurse Practitioner III: Adult, Older/Frail. 8 Credits.

Third clinical practicum course in the adult-gerontology primary care nurse practitioner program; theoretical and evidence-based practice foundations for assessment and management of the patient across the aging continuum. Prerequisites: NURS 6220, NURS 6222, NURS 6224, NURS 6225, and NURS 6234.

NURS 6230. Family Nurse Practitioner I: Lifespan Primary Care/Diagnosis/Management. 4 Credits.

First clinically-based course for family nurse practitioners. Didactic and clinical experiences in primary care focusing on common and chronic health problems across the lifespan. Prerequisites: NURS 6220, NURS 6222, and NURS 6234.

NURS 6231. Family Nurse Practitioner II: Lifespan Primary Care/Diagnosis/Management. 8 Credits.

Second clinically-based course for family nurse practitioners. Didactic and clinical experiences in primary care focusing on common and chronic health problems across the lifespan. Prerequisites: NURS 6230.

NURS 6232. Family Nurse Practitioner III: Professional Issues/Diagnosis/Management. 8 Credits.

Third clinically-based course for family nurse practitioner students. Didactic and clinical experiences in primary care focusing on common/chronic problems across the lifespan. Prerequisites: NURS 6220, NURS 6222, NURS 6223, NURS 6230 and NURS 6231.

NURS 6233. Genetics for Health Care Providers. 3 Credits.

Basic scientific principles of genetics and their clinical applications.

NURS 6234. Advanced Pharmacology for Nursing. 3 Credits.

Pharmacologic concepts commonly seen in advanced practice nursing; major pharmacological classes for selected disease states and application in therapeutic decision making to encounters across the lifespan. Prerequisite: NURS 6220.

NURS 6235. Adult-Gerontology Acute Care Nurse Practitioner I: Introduction to Practice. 4 Credits.

First clinical practicum course in the adult-gerontology acute care nurse practitioner program. Scientific underpinnings and practical management of complex acute and chronic conditions across a spectrum of care delivery situations from subacute rehabilitation, to urgent care, emergency department, hospital-based care, and critical care. Prerequisites: NURS 6220, NURS 6222, and NURS 6234.

NURS 6236. Adult-Gerontology Acute Care Nurse Practitioner II: Complex and Acute Illness. 8 Credits.

Second clinical course in the adult-gerontology acute care nurse practitioner program. Management of complex, acute stable, and unstable conditions experienced by a variety of age groups from adolescents, to middle-aged adults, to the elderly. Prerequisites: NURS 6220, NURS 6222, NURS 6234, and NURS 6235.

NURS 6237. Adult-Gerontology Acute Care Nurse Practitioner III: Complex and Chronic Disease Mgt Adolesc/Elderly. 8 Credits.

Third clinical practicum course for the adult-gerontology acute care nurse practitioner program. Scientific underpinnings and practical management of complex acute and chronic conditions across a spectrum of care delivery situations from subacute rehabilitation, to urgent care, emergency department, hospital-based care, and critical care. Prerequisites: NURS 6220, NURS 6222, NURS 6234, NURS 6235, and NURS 6236.

NURS 6241. The Health Care Enterprise. 3 Credits.

Overview of general management business principles related to health care systems; strategic management of patient-centered care delivery and strategic health care leadership. Same As: HSCI 6241.

NURS 6242. Psychopharmacology. 3 Credits.

Overview of the neurobiological and psychopharmacological principles for the clinical management of psychotropic medications in the treatment of mental illnesses across the lifespan; integrates neuroanatomy, pharmacogenomics, neurophysiology, pathophysiology, biochemistry, pharmacology and behavioral science. Prerequisites: NURS 6220, NURS 6222 and NURS 6234.

NURS 6243. Addiction and Change. 3 Credits.

Principles of addiction and change with a focus on correlating how changes in behavior lead to recovery in addictions. Models of addiction and change, the neurobiology of addiction, behavior change theories and models, and treating addictions through behavioral mechanisms.

NURS 6244. Psychiatric/Mental Health Nursing with Families and Groups Across the Life Span. 3 Credits.

Theoretical and conceptual models related to the developmental and functional processes within family systems, therapy groups, and psychoeducation groups; the PMHNP's scope of practice as it relates to conducting family and group psychotherapy. Concurrent clinical practicum under preceptor and faculty supervision for a minimum of 75 hours over the course of the semester. Prerequisites: NURS 6242 and NURS 6245.

NURS 6245. Psychiatric/Mental Health Diagnostic Assessment Across the Lifespan. 4 Credits.

Theoretical and foundational knowledge for assessing, diagnosing, treating, and managing mental illnesses across the lifespan. Concurrent clinical practicum under the supervision of preceptors and faculty. Students must complete a minimum of 150 clinical hours. Prerequisites: NURS 6220, NURS 6222, and NURS 6234.

NURS 6246. Psychiatric/Mental Health Advanced Practice Nursing with Individuals Across the Life Span. 3 Credits.

Examines, analyzes, and evaluates treatment models and evidence-based interventions for the care of individuals living with acute and chronic mental illnesses across the lifespan. Concurrent clinical practicum under the supervision of preceptors and faculty. Students must complete a minimum of 75 clinical hours. Prerequisites: NURS 6242 and NURS 6245.

NURS 6247. Population-Based Psychiatric/Mental Health Advanced Practice Nursing Across the Life Span. 3 Credits.

Clinical practicum designed to build psychiatric mental health nurse practitioner skills in a variety of clinical settings. Students integrate foundational knowledge from coursework to provide safe and competent behavioral healthcare to individuals across the lifespan. Prerequisites: NURS 6242, NURS 6244, NURS 6245, and NURS 6246.

NURS 6248. Integrated Application of Psychiatric/Mental Health Advanced Practice Nursing. 3 Credits.

Clinical practicum. Students develop competency in the psychiatric-mental health nurse practitioner role; integration of foundational knowledge from coursework to provide safe and competent behavioral healthcare to individuals across the lifespan. Prerequisites: NURS 6242, NURS 6244, NURS 6245, NURS 6246, and NURS 6247.

NURS 6250. Family Nurse Practitioner I for Nurse Practitioners: Adult Primary Care Diagnosis Management. 2 Credits.

First clinically-based course for family nurse practitioners. Didactic and clinical experiences in primary care focusing on prevention and common/chronic health problems across the lifespan. Corequisite: NURS 6227.

NURS 6251. Family Nurse Practitioner II for Nurse Practitioners: Lifespan Primary Care Diagnosis Management. 4 Credits.

Second clinically-based course for family nurse practitioners. Didactic and clinical experiences in primary care focusing on common/chronic health problems across the lifespan. Corequisite: NURS 6227. Prerequisite: NURS 6250.

NURS 6252. Family Nurse Practitioner III for Nurse Practitioners: Lifespan Primary Care Diagnosis Management. 4 Credits.

Third theory course for family nurse practitioner students nationally certified in another APRN population. Covers common acute and chronic problems across the lifespan. Corequisite: NURS 6227. Prerequisites: NURS 6250, NURS 6251.

NURS 6258. Leadership Capstone Practicum I. 3 Credits.

First course in a two-semester mentored internship practicum. Students apply knowledge and refine abilities related to leadership in a setting and practice area mutually agreed upon by the student and instructor. Prerequisites: NURS 6202, NURS 6203, NURS 6204, NURS 6205, NURS 6207, NURS 6241, NURS 6274 and NURS 6295.

NURS 6259. Leadership Capstone Practicum II. 3 Credits.

Second course in a two-semester mentored internship practicum. Students apply knowledge and refine abilities related to leadership in a setting and practice area mutually agreed upon by the student and instructor. Prerequisite: NURS 6258.

NURS 6262. Leadership Coaching in Nursing. 3 Credits.

Client health coaching and leadership and management coaching; theoretical foundations, evidence for leadership coaching in nursing, and applications of coaching in nursing management.

NURS 6263. Teaching and Learning in Health Care. 3 Credits.

Application of instructional design methods to develop, deliver, and evaluate academic and professional health care curricula and education.

NURS 6274. Health Economics and Finance. 3 Credits.

Health care economics, finance, and policy for effective management in a complex health care environment.

NURS 6282. Teaching and Learning in Health Care I: Foundations of Instructional Design. 3 Credits.

Principles of instructional design. Active, authentic learning and assessment methods in academic and health care delivery settings; analyzing needs, defining objectives, and assessing outcomes for learning; strategies to support learner mastery.

NURS 6284. Teaching and Learning in Health Care III: Program and Curriculum Development. 3 Credits.

Design, development, implementation and evaluation of academic, clinical, and professional educational programs in nursing and other health professions; analysis and integration of national, professional and institutional policies, requirements, and standards to develop an outcomes-based curriculum.

NURS 6290. Global Health for Health Care Professionals. 3 Credits.

Global health problems and issues from interdisciplinary and comparative perspectives.

NURS 6291. Advanced Topics. 1-9 Credits.

.

NURS 6295. Health Care Quality Process. 3 Credits.

Application of change processes that are critical to improving health quality by integrating theory and implementation; the role of systems assessment and measurement as fundamental to quality improvement.

NURS 6297. Independent Study. 1-9 Credits.

NURS 6298. NP Clinical Completion. 1-5 Credits.

NURS 6299. Nurse Practitioner Technology Enhanced Community Health. 0 Credits.

Prepares students to integrate social determinants of health while using telehealth and digital health technologies to improve care for people living in rural and urban underserved communities.

NURS 8400. Epidemiology and Population Health. 3 Credits.

Integration of population and determinants of health with epidemiological principles. Examination and application of biostatistical and epidemiological methods of analysis. Restricted to students in DNP program. Prerequisites: NURS 6208.

NURS 8401. Organizational Concepts in Nursing. 3 Credits.

Health care delivery systems, the nurse's role in interprofessional/interdisciplinary teams, and organizational development from a nursing perspective.

NURS 8402. Knowledge Management in Nursing. 3 Credits.

The use of knowledge management and information technology as it applies to health care; strategies to improve the efficiency and effectiveness of health care with the use of technology.

NURS 8403. Translating Research into Practice. 3 Credits.

Models and processes of evidence-based practice, strategies to translate evidence into practice, and tools useful for promoting practices in health care settings.

NURS 8405. Health Care Quality Improvement. 3 Credits.

Multidisciplinary background for the science of healthcare quality management; concepts, principles, and philosophy of quality improvement.

NURS 8407. Grant Writing. 3 Credits.

NURS 8409. Health Care Quality Practicum. 3 Credits.

Quality improvement (QI) processes and patient safety theories, models, methods, and tools in health care settings and their application to conceiving and executing a QI project in an organizational setting.

NURS 8410. Executive Presence I. 2 Credits.

NURS 8411. Executive Presence II. 2 Credits.

This is a continuation of Executive Presence I. In this course, the student will examine power shifts in leadership, revisit change as a stimulus for innovation, participate in an interactive session for individuals who can practice communicating their practicum proposals and receiving friendly feedback and constructive input from their peers, and re-evaluate the leadership development plan designed in Executive Presence I.

NURS 8412. HC Finance for Nurse Leaders. 3 Credits.

NURS 8413. Adult-Gerontology Acute Care Nurse Practitioner: Advanced Role Immersion. 3 Credits.

Students develop and integrate bedside with systems and population level competencies; role development, leadership, interdisciplinary collaboration, systems management, and evidenced-based practice are discussed and applied to concurrent clinical experiences; independent practice skills in the context of interdisciplinary teams. Prerequisites: NURS 6235, NURS 6236 and NURS 6237. Recommended background: prior enrollment in NURS 6220, NURS 6234 and NURS 6222.

NURS 8414. DNP Residency. 3 Credits.

Seminar and clinical practicum that focuses on developing and integrating DNP competencies; role development, leadership, interprofessional collaboration, population health, and evidence-based practice; the development of independent practice skills and integration of DNP program outcomes. Prerequisites: NURS 6220, NURS 6222, NURS 6233 and NURS 6234; NURS 6224 or NURS 6230; NURS 6225 or NURS 6231; and NURS 6229 or NURS 6232.

NURS 8416. Entrepreneurship for Nurse Leaders. 3 Credits.

Various aspects of entrepreneurship in the context of the nursing profession.

NURS 8417. Health Policy and Analysis. 3 Credits.

Application of evidence based methods, policy frameworks, cost effectiveness, and cost benefit analysis related to current policy issues.

NURS 8418. Health Care Economics, Finance, and Reimbursement. 3 Credits.

Application of economic concepts to health care financing and reimbursement policy; the effects of historical, current, and emerging models of financing on quality, access, and cost.

NURS 8419. Analytical Methods and Appraisal for Evidence-Based Practice. 3 Credits.

Examination of the merits of common methods and designs for evidence-based practice and practice inquiry. Acquire skills in searching for, critically appraising and grading evidence. Synthesis of research findings to develop practice recommendations. Restricted to students in DNP program. Prerequisites: NURS 6208.

NURS 8420. The Health Policy Process. 3 Credits.

The impact of governmental structures and processes on health policy, access, quality, and cost; the role of nurses in shaping health system change.

NURS 8421. The Legislative and Judicial Processes and Health Policy. 3 Credits.

Health policy legislation and the role of the judiciary. Students develop briefing materials, provide verbal or written testimony, give public comments regarding proposed bills, and assess impact of policy-oriented boards. Includes visits to Capitol Hill or state capitals.

NURS 8422. Health Policy Practicum. 3 Credits.

Students collaborate with a policy expert in a professional organization, government agency, advocacy group, or other entity to develop policy on a specific issue related to cost, quality, or access relevant to patient experience of care.

NURS 8423. The Regulatory Process and Health Policy. 3 Credits.

Knowledge and skills for analyzing rulemaking and regulatory processes that affect health-related issues; workforce scopes of practice; safety of the public; and roles and influence of federal agencies and private organizations charged with implementing newly passed legislation.

NURS 8440. Philosophy of Science and Theories. 4 Credits.
Philosophy of science and scientific methodology in historical context; competing philosophical viewpoints about the nature of scientific knowledge and the implication for knowledge development in nursing science; theoretical foundations of research studies. Restricted to Majors Only.

NURS 8441. Statistics for Health Care Research I. 3 Credits.
Intermediate-level statistics applicable to the analysis of health care data.

NURS 8442. Statistics for Health Care Research II. 3 Credits.
Advanced statistical methods commonly used in health care research. Analysis and interpretation of healthcare data using a variety of statistical techniques, including simple and multiple linear, linear-mixed effects, logistic, and Poisson regression, repeated measures designs, and survival analysis.

NURS 8443. Research Program Development Seminar I. 2 Credits.
Foundational content related to the conduct of research, including research ethics, data management, and modes of new knowledge dissemination. Ethical and other influences that impact the development, implementation, and sharing of discovery science.

NURS 8444. Research Program Development Seminar II. 1 Credit.
Introduction to select professional roles and guidance on preparation for associated responsibilities; forming an effective research team; generating meaningful and impactful scholarship.

NURS 8445. Experimental and Quasi-Experimental Research Designs. 3 Credits.
Formulation of research questions, hypotheses, measurement, sampling, data collection, and statistical approaches for various experimental and quasi-experimental research designs.

NURS 8446. Qualitative Research Design. 3 Credits.
Qualitative methods and designs applicable to translational health science research problems; qualitative epistemology, methods, data collection, and data analysis. Credit cannot be earned for this course and THS 8123.

NURS 8447. Measurement for Health Care Research. 3 Credits.
Measurement theories, principles, and techniques essential for the development and analysis of assessment instruments used in health care research; reliability and validity analysis, generalizability theory, item analysis, linking and scaling procedures, and adjustments for measurement error.

NURS 8448. Systematic Review and Meta-Analysis. 3 Credits.
Systematic reviews and meta-analyses, and their relative utility in answering research questions; formulating questions, defining criteria for including or excluding studies, methods for data extraction, grading the risk for various kinds of bias, and performing a meta-analysis.

NURS 8449. Non-Experimental Research Design. 3 Credits.
Evaluation of secondary data analysis, surveys, case-control studies, cohort studies, and mixed methods approaches.

NURS 8450. Research Rotation. 2 Credits.
Participatory research experience where students and faculty members interact on research-related activities; data collection, data management, data analysis, table and figure preparation, and abstract development.

NURS 8451. Research Practicum. 3 Credits.
Practical experience in an area designated as necessary for additional content expertise, such as systematic review of the literature, survey development, secondary data acquisition and cleaning, or data collection. Student will conduct preliminary research activities in support of the dissertation research. Restricted to doctoral candidates.

NURS 8452. Team Science and Collaboration. 3 Credits.
Measuring team effectiveness by integrating team science, cross-disciplinary research, and methodology; developing research designs to address complex health science problems; and team science and science of team science approaches to promoting team effectiveness. (Same as THS 8103, HSCI 6285).

NURS 8453. Leadership and Health Policy. 3 Credits.
Introduction to integration of health policy and leadership concepts in the use and analysis of research affecting systems and populations; exploration of social, political, and economic principles and theories as they relate to the incorporation of policy analysis and implementation.

NURS 8454. Proposal Development Seminar. 2 Credits.
Faculty supervision and ongoing peer feedback for development of the dissertation proposal.

NURS 8455. Dissertation. 10 Credits.
Culminating research experience for students in the doctoral program in nursing. Following defense of the dissertation proposal, students work with the research advisor and dissertation committee to design and implement a research study, analyze data, and interpret and contextualize findings using the study framework and current state of the science.

NURS 8489. DNP Project Scholarly Inquiry. 3 Credits.
Development of scholarly writing skills, exploration of a phenomenon of interest, and development of skills needed for the responsible conduct of translation of research into practice. Students identify a scholarly topic addressing a practice issue. Restricted to students in DNP program.

NURS 8490. DNP Project Planning. 3 Credits.
Foundational knowledge to support the student in creating a DNP project proposal that includes a project plan, implementation, and evaluation plan. Students identify a practice issue, develop a DNP project plan, and formulate a scholarly project development process. Prerequisite: NURS 8403.

NURS 8491. DNP Project Implementation. 3 Credits.

Implementation of DNP project using leadership, project management, and team building skills. Restricted to DNP students. Prerequisite: NURS 8490.

NURS 8492. DNP Project Evaluation and Dissemination. 3 Credits.

Data collection and evaluation of results from the DNP project using rigorous evaluation criteria and outcome measures. Restricted to DNP students. Prerequisite: NURS 8491.

UNDERGRADUATE PROGRAMS

Bachelor's programs

- Bachelor of Science in Nursing (<http://bulletin.gwu.edu/archives/2019-2020/nursing/bs-nursing/>)
- Registered Nurse to Bachelor of Science in Nursing (<http://bulletin.gwu.edu/archives/2019-2020/nursing/rn-to-bsn/>)

BACHELOR OF SCIENCE IN NURSING

The bachelor of science in nursing (p. 1124) (BSN) is an accelerated, 15-month program for second-degree or eligible military students. The program is offered at the Virginia Science and Technology Campus in Ashburn, Virginia, where students put theory into practice through the school's [Simulation Learning and Innovation Center](https://nursing.gwu.edu/simulation/) (<https://nursing.gwu.edu/simulation/>).

Second-degree students must hold a bachelor's degree in a non-nursing discipline from an accredited institution of higher learning and have taken all prerequisite courses to qualify for the program. Veterans may use their military experience to count toward the minimum of 60 college-level credits and prerequisites. All branches of the military are accepted, no prior medical experience is necessary.

Visit the GW Nursing (<https://nursing.gwu.edu/>) website (<https://nursing.gwu.edu/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 60 credits including the required curriculum and at least 500 clinical hours; clinical hours are a component of some required courses.

General Education and advanced standing

- 3 credits in ethics
- 8 credits in human anatomy and physiology
- 3 credits in microbiology
- 3 credits in nutrition
- 3 credits in statistics
- 3 credits in English composition
- 12 credits in humanities/social sciences
- 3 credits in mathematics

12 credits in natural sciences

Students must complete 60 credits of coursework, including core requirements and electives, in addition to the required curriculum, and at least 500 clinical hours.

The following requirements are applicable to students who matriculated prior to spring 2021:

Code	Title	Credits
Required		
NURS 3110W	Transition into the Nursing Profession	
NURS 3111	Health Assessment	
NURS 3112	Nursing Practice and Clinical Reasoning I: Adult and Aging Acute and Chronic Illness	
NURS 3114	Nursing Practice and Clinical Reasoning II: Advanced Adult Medical-Surgical	
NURS 3115	Clinical and Nursing Skills Lab: Adult Medical-Surgical II	
NURS 3116	Nursing Practice and Clinical Reasoning III: Psychiatric Mental Health Nursing	
NURS 3117	Nursing Practice and Clinical Reasoning IV: Maternity and Women's Health Care	
NURS 3118	Pharmacology I	
NURS 3119	Pathophysiology	
NURS 3213	Adult Medical-Surgical Lab I	
NURS 4116	Children and Families	
NURS 4118	Pharmacology II	
NURS 4119	Patient Safety and Health Care Quality	
NURS 4122	Capstone: Transition Into Professional Practice	
NURS 4123	Senior Practicum: Transition Into Clinical Practice	
NURS 4207	Principles of Nursing Research and Evidence-Based Practice	
or NURS 6207	Evidence-Based Practice for Health Care Researchers	
NURS 4217	Community and Public Health Nursing	
NURS 6203	Nursing Leadership *	
NURS 6205	Health Policy, Quality, and Political Process *	

Elective

One elective course selected from the following:

NURS 4109	Introduction to Perioperative Nursing
or NURS 6204	Health Information and Technology
or NURS 6290	Global Health for Health Care Professionals
or NURS 6215	Pediatric Adversity and Early Childhood Development and Health

or NURS 6290	Global Health for Health Care Professionals
or NURS 6215	Pediatric Adversity and Early Childhood Development and Health

The following requirements are applicable to students who matriculated in spring 2021 or after:

Code	Title	Credits
NURS 3118	Pharmacology I	
NURS 3119	Pathophysiology	
NURS 3120	Foundations of Professional Nursing	
NURS 3121	Health Assessment and Promotion	
NURS 3122	Principles of Safe Client Care	
NURS 3123	Quality Interprofessional Care of the Client	
NURS 3124	Adult and Geriatric Nursing I	
NURS 3125	Mental Health Nursing	
NURS 4118	Pharmacology II	
NURS 4124	Adult and Geriatric Nursing 2	
NURS 4125	Maternal and Women's Health Nursing	
NURS 4126	Nursing Care of Children and Families	
NURS 4127	Transition to Professional Nursing Practice	
NURS 4203	Dynamics of Nursing Leadership and Management	
NURS 4205	Nurse's Role in Health Care Policy	
NURS 4207	Principles of Nursing Research and Evidence-Based Practice	
NURS 4217	Community and Public Health Nursing	

Elective

One elective course selected from the following:

NURS 4109	Introduction to Perioperative Nursing
or NURS 6204	Health Information and Technology

REGISTERED NURSE TO BACHELOR OF SCIENCE IN NURSING

The online registered nurse (RN) to bachelor of science in nursing (BSN) degree program is available to students with an associate's degree who are eligible to take the National Council Licensure Examination-Registered Nurse (NCLEX-RN). Students enter the program with up to 84 credits in advanced standing, allowing them to progress quickly through the BSN program while continuing to work as professional nurses.

Students must become licensed as a registered nurse within the first semester of matriculation in the program. Students earn 6 graduate credits as part of the program, which may be applied toward the master of science in nursing (MSN) program within five years of the BSN being conferred.

Visit the GW Nursing (<https://nursing.gwu.edu/>) website (<https://nursing.gwu.edu/>) for additional information.

REQUIREMENTS

General education and advanced standing

3 credits in ethics
8 credits in human anatomy and physiology
3 credits in microbiology
3 credits in nutrition
3 credits in statistics
3 credits in English composition
12 credits in humanities/social sciences
3 credits in mathematics
12 credits in natural sciences

The following requirements must be fulfilled by all students in the registered nurse to bachelor of science in nursing program: 36 credits, including 33 credits in required courses (including 15 credits awarded for portfolio review) and one 3-credit elective course.

The following requirements apply to students who matriculated prior to fall 2018:

The following requirements apply to students who matriculated prior to spring 2020:

Code	Title	Credits
------	-------	---------

General Education and Advanced Standing

3 credits in ethics

6 to 8 credits in human anatomy and physiology

3 to 4 credits in microbiology

3 credits in nutrition

3 credits in statistics

6 credits in English composition

12 credits in humanities/social sciences

3 credits in mathematics

12 credits in natural sciences

Required

NURS 4119 Patient Safety and Health Care Quality

NURS 4121 Nursing Advancement Portfolio *

NURS 4417 Community and Public Health Nursing

NURS 6202 Concepts in Population Health

NURS 6203 Nursing Leadership

NURS 6205 Health Policy, Quality, and Political Process

NURS 6207 Evidence-Based Practice for Health Care Researchers

or NURS 4207 Principles of Nursing Research and Evidence-Based Practice

Elective

One of the following:

NURS 6204 Health Information and Technology

or NURS 6233 Genetics for Health Care Providers

or NURS 6262 Leadership Coaching in Nursing

or NURS 6274 Health Economics and Finance

or NURS 6290 Global Health for Health Care Professionals

or NURS 6292 Teaching with Technology in the Health Professions

*Assumes that review of a student's professional portfolio results in the awarding of 15 credits.

The following requirements apply to students who matriculated spring 2020 or after:

Code

Title

Credits

General Education and Advanced Standing

3 credits in ethics

6 to 8 credits in human anatomy and physiology

3 to 4 credits in microbiology

3 credits in nutrition

3 credits in statistics

6 credits in English composition

12 credits in humanities/social sciences

3 credits in mathematics

12 credits in natural sciences

Required

NURS 4119 Patient Safety and Health Care Quality

NURS 4121 Nursing Advancement Portfolio *

NURS 4203 Dynamics of Nursing Leadership and Management

NURS 4205 Nurse's Role in Health Care Policy

NURS 4207 Principles of Nursing Research and Evidence-Based Practice

NURS 4417 Community and Public Health Nursing

Electives

Two of the following:

NURS 6202 Concepts in Population Health

NURS 6203 Nursing Leadership

NURS 6204 Health Information and Technology

NURS 6205 Health Policy, Quality, and Political Process

NURS 6207 Evidence-Based Practice for Health Care Researchers

NURS 6233 Genetics for Health Care Providers

NURS 6262 Leadership Coaching in Nursing

NURS 6274 Health Economics and Finance

NURS 6290 Global Health for Health Care Professionals

*Assumes that review of a student's professional portfolio results in the awarding of 15 credits.

MASTER'S PROGRAMS

Master's programs

- Master of Science in Nursing in the field of adult-gerontology acute care nurse practitioner (p. 1127)
- Master of Science in Nursing in the field of adult-gerontology primary care nurse practitioner (p. 1127)
- Master of Science in Nursing in the field of family nurse practitioner (p. 1128)
- Master of Science in Nursing in the field of nurse-midwifery (p. 1129) (collaborative program between GW School of Nursing and Shenandoah University (<http://www.su.edu/nursing/nursing-graduate-programs/nurse-midwifery-programs/>))
- Master of Science in Nursing in the field of nursing leadership and management (p. 1129)
- Master of Science in Nursing in the field of psychiatric mental health nurse practitioner (p. 1130)

MASTER OF SCIENCE IN NURSING IN THE FIELD OF ADULT-GERONTOLOGY ACUTE CARE NURSE PRACTITIONER

The online master of science in nursing (MSN) in adult-gerontology acute care nurse practitioner (AGACNP) program prepares registered nurses to be advanced practice leaders and interprofessional team members providing care for critically ill patients and their families. Acute care nurse practitioners attend to adolescents and adults in a variety of clinical settings, including urgent care centers, critical care units and inpatient medical-surgical or specialty units.

Students are prepared to be eligible to sit for the nationally recognized American Nurses Credentialing Center certification examination for adult-gerontology acute care nurse practitioner. Clinical placements are selected by the program director and carried out in Northern Virginia, Maryland, or Washington, DC. All students attend several on-campus experiences related to MSN coursework and clinical skills development and assessment.

Visit the [GW Nursing website \(https://nursing.gwu.edu/\)](https://nursing.gwu.edu/) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 48 credits and completion of 600 clinical hours with a minimum of 500 direct patient care hours.

MASTER OF SCIENCE IN NURSING IN THE FIELD OF ADULT-GERONTOLOGY PRIMARY CARE NURSE PRACTITIONER

The master of science in nursing in the field of adult-gerontology primary care nurse practitioner (AGPCNP)

program provides the theoretical and practical foundations for registered nurses to become leaders in their role as advanced practice nurses, specifically working with adolescent (ages 13 and older) and adult patients. With an aging populace, adult-gerontology is an expanding area with abundant opportunities in home health, long-term care, assisted living, and other fields. Program graduates are qualified to sit for the ANCC and AANP certification exams.

Students may choose to enroll in the program on a full- or part-time basis. Students in the AGPCNP option are required to complete three on-campus components related to courses NURS 6222, NURS 6225, and NURS 6229. Students complete 500 clinical hours with an approved preceptor.

Visit the [GW Nursing website \(https://nursing.gwu.edu/\)](https://nursing.gwu.edu/) for additional information.

Completion of 500 direct patient care hours.

MASTER OF SCIENCE IN NURSING IN THE FIELD OF FAMILY NURSE PRACTITIONER

The family nurse practitioner program prepares registered nurses for leadership in providing primary care for children and adults alike in any number of clinical settings. With a focus on delivering high-quality, patient-centered primary care, we offer didactic and clinical experiences to prepare you to care for the physical, mental, emotional, social and spiritual health of patients, families and communities.

Visit the [GW Nursing website \(https://nursing.gwu.edu/\)](https://nursing.gwu.edu/) for additional information.

MASTER OF SCIENCE IN NURSING IN THE FIELD OF NURSE-MIDWIFERY

The master of science (MSN) in nursing in nurse-midwifery is a collaboration with Shenandoah University (SU). The program prepares graduates to be eligible to take the American Midwifery Certification Board's national certification examination. The nurse-midwifery degree program at SU is fully accredited by the Accreditation Commission for Midwifery Education.

Core courses required for the MSN are completed at GW, which awards the MSN degree, while the nurse-midwifery didactic and clinical components of the curriculum are fulfilled through SU, which awards the post-graduate certificate in midwifery. Students have access to the resources and experts at both institutions. Offered in a versatile distance learning format, the program allows professional nurses to advance their education while continuing to work. In addition, there are selected on-campus sessions for skills training and education as well as clinical practicums in sites across the country. Students may choose to enroll in the program on a full- or part-time basis.

Visit the [GW Nursing website \(https://nursing.gwu.edu/\)](https://nursing.gwu.edu/) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 47 credits, including 9 credits in professional core, 6 credits in research, and 13 credits in field-specific courses at GW and 19 credits in nurse-midwifery courses at Shenandoah University.

MASTER OF SCIENCE IN NURSING IN THE FIELD OF NURSING LEADERSHIP AND MANAGEMENT

The master of science in nursing in nursing leadership and management program, offered online, is designed to prepare graduates for upper-level positions in the field by enhancing the depth and breadth of the practicing clinical professional's knowledge and skills. The program focuses on leadership development by training nurses to think and act strategically, participate in policy decisions, and lead organizations through change and improvement. Students may choose to enroll in the program on a full- or part-time basis.

Visit the [GW Nursing website \(https://nursing.gwu.edu/\)](https://nursing.gwu.edu/) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits including 9 credits in professional core courses, 6 credits in research courses, and 21 credits in field-specific courses.

Students will complete 300 practicum hours in this program.

MASTER OF SCIENCE IN NURSING IN THE FIELD OF PSYCHIATRIC MENTAL HEALTH NURSE PRACTITIONER

The master of science in nursing in the field of psychiatric mental health nurse practitioner program offers registered nurses the opportunity to acquire the knowledge and skills to provide care to individuals, families, and groups with psychiatric/mental health needs. The lifespan curriculum is a synthesis of knowledge derived from nursing science, neuroscience, behavioral change theories, motivational theories, learning theories, and other psychotherapeutic frameworks to provide a holistic perspective from which to assess, diagnose, treat, manage, and evaluate acute and chronic mental illnesses. The program covers neuropsychopharmacology, interprofessional collaborative

practice, crisis intervention, trauma-informed care, health policy, family systems theory, psychotherapy, group therapy, care of vulnerable populations, promotion of mental health and prevention of mental illness, substance use and co-occurring disorders, and other mental illnesses across the lifespan.

Upon completion of our program students are eligible to sit for the American Nurses Credentialing Center certification as a Psychiatric/Mental Health Nurse Practitioner (lifespan).

Visit the School of Nursing website (<https://nursing.gwu.edu/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 50 credits, including 9 credits in professional core courses, 6 credits in research, 35 credits in field-specific courses, and completion of 600 clinical hours with a minimum of 500 direct patient care hours.

DOCTORAL PROGRAMS

Doctoral programs

- Doctor of Nursing Practice in the field of adult-gerontology acute care practitioner (p. 1131)
- Doctor of Nursing Practice in the field of adult-gerontology primary care practitioner (p. 1132)
- Doctor of Nursing Practice in the field of executive leadership (p. 1133)
- Doctor of Nursing Practice in the field of family nurse practitioner (p. 1133)
- Doctor of Nursing Practice in the field of health policy (p. 1134)
- Doctor of Nursing Practice in the field of nursing practice (p. 1134)
- Doctor of Nursing Practice in the field of psychiatric mental health nurse practitioner (p. 1135)
- Doctor of Philosophy in the field of nursing (p. 1136)

DOCTOR OF NURSING PRACTICE IN THE FIELD OF ADULT- GERONTOLOGY ACUTE CARE NURSE PRACTITIONER

The DNP adult-gerontology acute care nurse practitioner option prepares graduates to function as doctorally prepared nurses at the highest level of clinical practice, to translate knowledge into practice, to apply policy, as well as design, implement and evaluate innovations to improve health care systems and patient centered outcomes.

This option prepares registered nurses as advanced practice leaders and inter-professional team members providing care for acute and critically ill patients and their families. Acute care NPs attend to adolescents and adults across the continuum of care, including in urgent care centers, critical care units, and

inpatient medical-surgical or specialty units. Acute care offers a high-intensity environment that requires the fast-paced critical thinking skills you will develop in this program.

Clinical placements will be arranged by the program director and will take place in Northern Virginia, Maryland or Washington, D.C. At this time, this program option is only available to applicants who are able to do their clinical rotations in those areas.

ADMISSIONS

Admission Fall - Priority: October 15
deadline:

Recommendation Two letters of recommendation
Requirements:

Prior Transcripts from all post-secondary schools
academic records: attended are required.

Statement of Purpose: A personal statement describing your career goals relative to the doctoral study. You should include a general idea for your DNP project. Your vision for your post-DNP contributions to advance the nursing profession through scholarship and evidence-based practice must be emphasized in the statement. Also, briefly describe your professional nursing practice and indicate any current or previous leadership roles. The applicants with a clear idea of a potential DNP project and the ability of the project to enhance/improve/contribute to nursing practice will be given preference for admission.

Additional Requirements: - Bachelor of Science degree in nursing from a regionally accredited college or university with a preferred minimum cumulative GPA of at least 3.3 on a 4.0 scale.

- Active and unencumbered nursing licensure
- Current resume

International Requirements: The minimum English language scores required are:

Internet-based TOEFL: 100; or

IELTS: An overall band score of 7.0 with individual band scores of 6.0 or higher

Supporting documents not submitted online should be mailed to:

Office of Admissions
45085 University Drive, Suite 201-T
Ashburn, VA 20147

DOCTOR OF NURSING PRACTICE IN THE FIELD OF EXECUTIVE LEADERSHIP

The DNP: Executive Leadership (Post-MSN) program option is designed for nursing leaders in senior management positions or those with substantial leadership experience. The program focuses on intrapreneurial and entrepreneurial approaches to leadership and incorporates experiential projects, often within your organization or community. Learn to help navigate our nation's increasingly complex and dynamic health care environment.

Visit the [GW Nursing website \(https://nursing.gwu.edu/\)](https://nursing.gwu.edu/) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 43 credits

All DNP students are expected to complete a minimum of 1,000 post-baccalaureate practice hours as part of their academic program. Most advanced practice RN students will already have completed 500 hours in their master of science in nursing (MSN) program and the remaining 500 hours are included in the curriculum requirements for the DNP.

DOCTOR OF NURSING PRACTICE IN THE FIELD OF FAMILY NURSE PRACTITIONER

The DNP: Family Nurse Practitioner option prepares graduates to function as doctorally prepared nurses at the highest level of clinical practice, to translate knowledge into practice, to apply policy, as well as design, implement and evaluate innovations to improve health care systems and patient centered outcomes.

This option prepares registered nurses for leadership in primary care settings for treating families and individuals of all ages. This option offers didactic and clinical experiences that prepare you to deliver high-quality, patient-centered primary care.

We recommend that you have some clinical experience before starting this program option, but it is not required. Due to the rigorous nature of this program option and the clinical hours required, we strongly recommend that you not work full-time while pursuing this degree.

REQUIREMENTS

DOCTOR OF NURSING PRACTICE IN THE FIELD OF HEALTH POLICY

If you want the tools that will empower you to advance meaningful change in an increasingly complex health care system, a DNP in Health Policy is for you. Gain in-depth knowledge of the legislative, regulatory, and judicial processes that shape health policy. Deepen your understanding of the economic forces, research evidence and political developments that directly affect health care and the nursing profession. Develop new perspectives on effective advocacy and learn about the roles of nurses and other health professionals in improving access and advancing the health of patients, families and populations.

This distance-based program combines academic study with hands-on experience in addressing real-world policy issues. Graduates of the DNP Health Policy program can apply their policy expertise in any number of ways, from advancing within their current institutions/practice to roles such as

working for government agencies, legislative offices, research organizations, consumer groups, or professional associations as policy analysts, advocates or consultants.

The GW School of Nursing is known for its focus on health policy and our faculty include respected leadership in the field. The School also houses the GW Center for Health Policy and Media Engagement. Located in the nation's capital, our proximity to federal agencies, Congress, national health care associations, and other policy-makers provides an "only at GW" experience and a unique opportunity to prepare for a career in health policy.

DOCTOR OF NURSING PRACTICE IN THE FIELD OF PSYCHIATRIC MENTAL HEALTH NURSE PRACTITIONER

The DNP: Psychiatric Mental Health Nurse Practitioner option prepares graduates to function as doctorally prepared nurses

at the highest level of clinical practice, to translate knowledge into practice, to apply policy, as well as design, implement and evaluate innovations to improve health care systems and patient centered outcomes.

This option offers registered nurses the opportunity to expand their scope of practice to include the care of individuals, families and groups with psychiatric and mental health needs.

Our lifespan curriculum is a synthesis of knowledge derived from nursing science, neuroscience, behavioral change theories, motivational theories, learning theories and other psychotherapeutic frameworks to provide a holistic perspective from which to assess, diagnose, treat, manage and evaluate acute and chronic mental illnesses.

You will learn about neuropsychopharmacology, interprofessional collaborative practice, crisis intervention, trauma-informed care, health policy, family systems theory, psychotherapy, group therapy, care of vulnerable populations, promotion of mental health and prevention of mental illness, substance use and co-occurring disorders, and other mental illnesses across the lifespan.

DOCTOR OF PHILOSOPHY IN THE FIELD OF NURSING

To meet the demands of a growing health workforce, the nursing profession needs to increase the supply of doctorally prepared faculty and researchers trained to educate the next generation. The national shortage of faculty is reaching critical proportions, resulting in a significant impact on educational programs and their capacity to educate future generations of nursing students.

GW Nursing offers a low-residency PhD in nursing with opportunities to collaborate with faculty on subjects such as nursing education, symptom management, health equity, health services and more. Students will be prepared as nurse scientists and faculty with an emphasis on research. A dissertation and comprehensive exam is required.

Visit the [GW Nursing website \(https://nursing.gwu.edu/\)](https://nursing.gwu.edu/) for additional information.

- Nursing Education (<http://bulletin.gwu.edu/archives/2019-2020/nursing/pmc-nursing-education/>)

GRADUATE CERTIFICATE IN HEALTH POLICY AND MEDIA ENGAGEMENT

Embark on a focused, high-powered journey through the underpinnings of the political, executive and judicial processes and strategies essential to effective regulatory and legislative implementation. This 15-credit graduate certificate opportunity is available online for health-related professionals from various disciplines, including nursing, public health, medicine, law, business, public administration and more.

Highlights

Contribute to actual policymaking processes at the grassroots, state and federal levels in legislative and regulatory environments or within the justice system. Build an in-depth understanding of media as a policy stakeholder, analyze media accuracy and bias and engage with traditional and social media platforms to influence policy. Sharpen media and communication skills that include interviews, oral testimony, public comments, and opinion

pieces while shaping policy with local, state and federal decision-makers.

Apply a variety of tools and tactics as you explore and apply health care financing and reimbursement principles and strategies to policy solutions.

Develop skills to better engage in meaningful and productive dialogues with your colleagues while serving on a board or committee seat.

Gain access to a growing array of resources and learning opportunities through the GW Nursing Center for Health Policy and Media Engagement led by Executive Director Jean Johnson, and supported Senior Policy Service Professor Diana Mason.

Visit the [GW Nursing website \(https://nursing.gwu.edu/\)](https://nursing.gwu.edu/) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 15 credits in required courses.

Code	Title	Credits
Required		
NURS 8417	Health Policy and Analysis	
NURS 8418	Health Care Economics, Finance, and Reimbursement	
NURS 8420	The Health Policy Process	
NURS 8421	The Legislative and Judicial Processes and Health Policy	
NURS 8423	The Regulatory Process and Health Policy	

POST-MASTER'S CERTIFICATE IN ADULT-GERONTOLOGY ACUTE CARE NURSE PRACTITIONER

The post-master's certificate in adult-gerontology acute care nurse practitioner program prepares registered nurses to be advanced practice leaders and interprofessional team members to provide care for acute and critically ill patients and their families in settings such as urgent care centers, critical care units, and inpatient medical-surgical or specialty units. Offered on a part-time basis, the certificate can be completed in three semesters.

Visit the [GW Nursing website \(https://nursing.gwu.edu/\)](https://nursing.gwu.edu/) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 20 credits in required courses and completion of 600 clinical hours with a minimum of 500 direct patient care hours.

Code	Title	Credits
Required		
NURS 6235	Adult-Gerontology Acute Care Nurse Practitioner I: Introduction to Practice	
NURS 6236	Adult-Gerontology Acute Care Nurse Practitioner II: Complex and Acute Illness	
NURS 6237	Adult-Gerontology Acute Care Nurse Practitioner III: Complex and Chronic Disease Mgt Adolesc/Elderly	
Clinical hours		
Completion of 500 direct patient care hours.		

POST-MASTER'S CERTIFICATE IN ADULT-GERONTOLOGY PRIMARY CARE NURSE PRACTITIONER

The post-master's certificate in adult-gerontology primary care nurse practitioner is designed for advanced practice nurses who wish to expand their scope of practice. Coursework includes didactic and clinical experiences that focus on the primary care needs of patients, families, and communities from adolescence through adulthood.

Visit the [GW Nursing website \(https://nursing.gwu.edu/\)](https://nursing.gwu.edu/) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 20 credits in required courses and completion of 600 clinical hours with a minimum of 500 direct patient care hours.

Code	Title	Credits
Required		
NURS 6224	Adult/Gerontology Primary Care Nurse Practitioner I: Practice Introduction	
NURS 6225	Adult/Gerontology Primary Care Nurse Practitioner II: Adolescent and Adult	
NURS 6229	Adult/Gerontology Primary Care Nurse Practitioner III: Adult, Older/Frail	

Clinical hours

Completion of 500 direct patient care hours.

POST-MASTER'S CERTIFICATE IN FAMILY NURSE PRACTITIONER

The Family Nurse Practitioner Certificate allows masters-prepared nurses to expand their scope of practice across the lifespan. This program option features an array of didactic and clinical experiences that focus on the primary care needs of patients, families and communities.

Visit the [GW Nursing website \(https://nursing.gwu.edu/\)](https://nursing.gwu.edu/) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 20 credits in required courses and completion of 600 clinical hours with a minimum of 500 direct patient care hours.

Code	Title	Credits
Required		
NURS 6227	Family Nurse Practitioner Clinical Practicum	
NURS 6250	Family Nurse Practitioner I for Nurse Practitioners: Adult Primary Care Diagnosis Management	
NURS 6251	Family Nurse Practitioner II for Nurse Practitioners: Lifespan Primary Care Diagnosis Management	
NURS 6252	Family Nurse Practitioner III for Nurse Practitioners: Lifespan Primary Care Diagnosis Management	
Clinical hours		
Completion of 500 direct patient care hours.		

POST-MASTER'S CERTIFICATE IN PSYCHIATRIC MENTAL HEALTH NURSE PRACTITIONER

The post-master's certificate in psychiatric mental health nurse practitioner is a part-time, online program designed to give advanced practice registered nurses the opportunity to expand their scope of practice to include the care of individuals, families, and groups with psychiatric and mental health needs.

Visit the [GW Nursing website \(https://nursing.gwu.edu/\)](https://nursing.gwu.edu/) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 22 credits in required courses and 600 clinical hours with a minimum of 500 direct patient care hours.

Code	Title	Credits
Required		
NURS 6242	Psychopharmacology	
NURS 6244	Psychiatric/Mental Health Nursing with Families and Groups Across the Life Span	
NURS 6243	Addiction and Change	
NURS 6245	Psychiatric/Mental Health Diagnostic Assessment Across the Lifespan	
NURS 6246	Psychiatric/Mental Health Advanced Practice Nursing with Individuals Across the Life Span	
NURS 6247	Population-Based Psychiatric/Mental Health Advanced Practice Nursing Across the Life Span	
NURS 6248	Integrated Application of Psychiatric/Mental Health Advanced Practice Nursing	
Clinical hours		
Completion of 500 direct patient care hours.		

COLLEGE OF PROFESSIONAL STUDIES

Acting Dean M. Feuer

Associate Deans A. Ashkar, K.C. Homayounpour

The College of Professional Studies (CPS) offers an expanding range of degree programs leading to associate's, bachelor's, and master's degrees in professional studies, along with a variety of certificate programs.

CPS's innovative programs are typically co-developed through collaboration among University content specialists and outside partners—government agencies, professional associations, consulting organizations, and business and industry leaders.

Programs draw from multiple academic disciplines and are delivered in flexible formats: face-to-face on campus, through distance learning, or a blend of both.

By combining University faculty experts with accomplished practitioners, CPS is a catalyst for academic innovation, constructing credentials for the workforce that uphold the University's rigorous standards of academic excellence and respond to the needs of a wide variety of professionals. Professional studies degree and certificate programs are also offered to organizational clients under contract and can be presented in flexible formats, including series of short classroom-based modules and distance learning.

New programs not included in this bulletin may be found at the College of Professional Studies website (<https://cps.gwu.edu>).

CPS manages facilities and services for off-campus programs offered by other schools of the University. The staff of instruction includes members of the full-time faculty of the University and academically qualified adjunct faculty from the professional community. All University off-campus offerings in Maryland are approved by the Maryland State Board for Higher Education; those in Virginia are certified by the State Council of Higher Education for Virginia.

REGULATIONS

Enrollment Status

Once a student begins a degree or certificate program they are expected to be enrolled continuously and actively engaged in fulfilling the requirements for the degree each semester of the academic year until the degree is conferred or certificate completed. For the fall and spring semesters, students must register for one or more credits to maintain enrollment status. A student who must interrupt active pursuit of the degree or certificate may petition the Dean, through the Program Director, for a leave of absence for a specified period of time, generally limited to one calendar year. If the petition is approved, the student must register for Leave of Absence in each fall and spring semester, following regular registration

procedures. Students not wishing to enroll in courses for a summer session must notify the Program Director and Office for Student Engagement of such intent prior to the beginning of that summer session. Students who discontinue their studies without being granted a leave of absence and students granted leaves who do not return to active study at the close of the period of approved absence must apply for readmission and are subject to the regulations and requirements then in force.

Time Limits

A full-time student is allowed a maximum of three calendar years from the date of the first registration as a degree student (excluding time spent enrolled exclusively in English for Academic Purposes courses) to complete all degree requirements; a part-time student is allowed a maximum of five calendar years. The time limit does not include any period of registration as a non-degree student before admission to degree candidacy or any period spent on approved leave of absence. Students who do not complete degree requirements within the time allowed will have their degree candidate status terminated; such students may be readmitted to degree candidate status under conditions specified by the Program Director and approved by the Dean.

Scholarship Requirements

Undergraduate students must maintain a minimum cumulative grade-point average of 2.0. and graduate students must maintain a minimum grade-point average of 3.0. If a student's GPA falls below the required minimum, they are placed on academic probation and allowed one semester in which to raise the GPA to the required minimum; any such student who does not raise their GPA to the required minimum in one semester will be dismissed from the program. If it is mathematically impossible for the student's GPA to reach the required minimum in one semester, they are dismissed from the program without a probationary period.

See Grades under University Regulations (p. 27) for undergraduate and graduate grading systems.

Grade of F

A student who receives a grade of *F* is subject to dismissal from the program. If the student wishes to remain enrolled, they must present cause for consideration by the Program Director and to the Dean as to why continued study should be permitted. A student who receives a grade of *F*, if permitted to remain in the program, must repeat the course in which the failing grade was received and achieve a passing grade as well as maintain the minimum required GPA. Once a grade of *F* has been received it remains a part of the student's permanent record and is calculated into the grade-point average. Students may be granted permission to repeat a failed course only one time. Failure to receive permission to remain in the program and retake the failed course or to achieve a passing grade after having been permitted to repeat a failed course will result in dismissal from the program.

Incompletes

The symbol *I* (Incomplete) indicates that a satisfactory explanation has been given to the instructor for the student's inability to complete the required coursework during the semester in which the course was taken. At the discretion of the instructor, the symbol *I* may be recorded if a student, for reasons beyond the student's control, is unable to complete the work of the course, and if the instructor is informed of, and approves, such reasons before the date when grades must be reported. This symbol may be used only if the student's prior performance and class attendance in the course have been satisfactory. The instructor and student must sign an Incomplete Agreement, available through the Office of the Dean, which sets forth the requirements and due dates for successful completion of the course. The coursework must be completed within the designated time period agreed upon by the instructor and student in the Incomplete Agreement, but no more than one calendar year from the end of the semester in which the course was taken. All students who receive an Incomplete must remain continuously during the semester(s) in which the coursework is being completed. If not registered in other courses during this period, the student must register for Continuous Enrollment.

When work for the course is completed, the instructor completes a grade change form and submits it to the Office of the Registrar. The final grade replaces the symbol of *I*. If work for the course is not completed within the designated time period, the grade is converted to a grade of *F*, Failure, 0 quality points, and the grade-point average is recalculated and academic standing reassessed.

Transfer Credits

Transfer credit that is accepted and applied to a student's GW academic record counts toward the number of credits completed only. The grades from these courses are not used in calculating a student's GW grade-point average. The College of Professional Studies reserves the right to determine course equivalency and degree applicability.

Undergraduate students

Subject to individual program requirements, transfer credit may be awarded for coursework completed at other accredited institutions provided minimum grade requirements have been met and the coursework is appropriate to the degree. No more than 60 credits from a regionally accredited institution may be accepted for transfer. Coursework completed at another institution must have received a grade of *C* or above to be accepted for transfer credit.

Graduate students

A maximum of one-quarter of the credits required for the degree may be approved for transfer to a graduate program in the College of Professional Studies from credit earned while enrolled as a non-degree student at GW or from another degree-granting school of this University or another accredited college or university. For transfer credit to be approved, all of the following conditions must be met: the coursework must be

from an accredited institution and must have been taken within the two years prior to matriculation; it must be approved as part of the student's program of studies; it must not have been applied to the completion of requirements for another degree; it must be post-baccalaureate graduate-level coursework; and the student must have received a minimum grade of *B* in each course for which transfer credit is requested. Requests for transfer credit must be submitted in writing and approved by the Program Director and the Dean prior to or during the student's first year in the program. An official transcript of the coursework must be on file before the request can be considered.

Provisional Admission

Applicants with credentials that do not meet the minimum standards for the program of study, but who nonetheless show promise of successful work, are occasionally granted provisional admission by the Program Director/admissions committee. During the period of provisional status, students must meet the requirements set forth in their admission letter. Students who do not meet these requirements are dismissed from the program.

Readmission

The College of Professional Studies does not review any application for readmission to a program by a student who was dismissed from the same or any other program at the College or course of study at the University until at least one year after the student was dismissed. Students unable to achieve the required minimum GPA in one semester are not considered for readmission to the program.

Withdrawing From a Course

Undergraduate Students

Undergraduate students in the College of Professional Studies may withdraw from any or all undergraduate courses in the College through the last day of scheduled classes in a specific course. In order to withdraw from a course the student must submit a Registration Transaction Form (https://registrar.gwu.edu/sites/registrar.gwu.edu/files/downloads/reg_transaction_form.pdf) (RTF) to the Office for Student Engagement, but no supporting documentation is required. The Office for Student Engagement will process the RTF unless dropping the course would result in the student taking fewer credits than they are required to take. A course from which a student successfully withdraws will be assigned a notation of *W* (Authorized Withdrawal). Failure to withdraw by the stated deadlines can result in an extended financial obligation and the recording of a grade of *F* (Failure) or a notation of *Z* (Unauthorized Withdrawal).

Graduate Students

After the end of the eighth week of classes in a fifteen-week semester, or after the end of the third week of classes in a course scheduled over eight or fewer weeks, graduate students who wish to withdraw from a course must obtain the written permission of the Program Director and the Dean

by submitting a petition for academic exception. A course from which a student successfully withdraws will be assigned a notation of *W* (Authorized Withdrawal). Failure to withdraw by the stated deadlines can result in an extended financial obligation and the recording of a grade of *F* (Failure) or a notation of *Z* (Unauthorized Withdrawal).

See Adding, Dropping, and Withdrawing from Courses under [University Regulations \(http://bulletin.gwu.edu/university-regulations/\)](http://bulletin.gwu.edu/university-regulations/) for additional information governing all CPS students.

Academic Integrity

The University community, in order to fulfill its purposes, must establish and maintain guidelines of academic behavior. All members of the community are expected to exhibit honesty and competence in their academic work. Incoming students have a special responsibility to acquaint themselves with, and make use of, all proper procedures for doing research, writing papers, and taking examinations. Members of the community are presumed to be familiar with the proper academic procedures and held responsible for applying them. Deliberate failure to act in accordance with such procedures will be considered academic dishonesty. Acts of academic dishonesty are a legal, moral, and intellectual offense against the community and will be prosecuted through the proper University channels, possibly resulting in dismissal from the program together with other University sanctions. The University Code of Academic Integrity (<https://studentconduct.gwu.edu/code-academic-integrity/>) can be found at the Office of Academic Integrity (<http://studentconduct.gwu.edu/>).

UNDERGRADUATE

Bachelor's completion programs

- Bachelor of Professional Studies with a major in cybersecurity (p. 1143)
- Bachelor of Professional Studies with a major in homeland security (p. 1144)
- Bachelor of Professional Studies with a major in information technology (p. 1145)

Combined programs

- Dual Bachelor of Arts with a major in political communication and Master of Professional Studies in the field of political management (p. 1146)
- Dual Bachelor of Arts with a major in political science and Master of Professional Studies in the field of legislative affairs (p. 1146)
- Dual Bachelor of Arts with a major in political science and Master of Professional Studies in the field of political management (p. 1146)

- Dual Bachelor of Professional Studies with a major in information technology and Master of Science in the field of information systems technology (p. 1146)

GRADUATE

Master's programs

- Master of Professional Studies in the field of cybersecurity strategy and information management (p. 1147)
- Master of Professional Studies in the field of homeland security (p. 1150)
- Master of Professional Studies in the field of law firm management (p. 1153)
- Master of Professional Studies in the field of paralegal studies (p. 1155)
- Master of Professional Studies in the field of publishing (p. 1157)
- Master of Professional Studies in the field of sustainable urban planning (p. 1159)

Offered by the Graduate School of Political Management, through the College of Professional Studies:

- Master of Professional Studies in the field of legislative affairs (p. 1164)
- Master of Professional Studies in the field of political management (p. 1167)
- Master of Professional Studies in the field of political communication and governance (p. 1172) *Offered in Spanish only*
- Master of Professional Studies in the field of strategic public relations (p. 1173)

CERTIFICATES

Graduate certificates

The College of Professional Studies offers the following graduate certificates. In addition to those listed, graduate certificates in political management and strategic governance and in strategic communications campaigns are offered in Spanish to closed cohorts of students in Latin America and in Spain.

- California paralegal studies (p. 1162)
- Community advocacy (p. 1174)
- Digital communications (p. 1175)
- Digital politics (p. 1175)
- Global public relations (p. 1176)
- Healthcare corporate compliance (p. 1163)
- PACs and political management (p. 1176)
- Paralegal studies (p. 1163)
- Sustainable urban planning (p. 1163)

Additional information is available on the College of Professional Studies website (<https://cps.gwu.edu>).

FACULTY

Program Directors A.N. Ashkar, T. Belt, C. Burgat, J. Delinski, J. Garrett, R. Izurieta, E. Lammert, T.E. Marsh, L. Matos, L. Parnell, E. Rule, J. Thorpe, C.P. Uthoff, J. Warren, S. White, S. Whitehead

Professors C.J. Deering, T. Belt, M. J. Dallek

Associate Professors A.N. Ashkar, S.E. Billet, L.M. Brown, M. Cornfield, R. Izurieta, E. Lammert, T.E. Marsh, L.J. Parnell, J. Warren, S. White, S.L. Wiley

Visiting Associate Professor S. Whitehead

Assistant Professors C. Burgat, J. Delinski, N. Dinello, N.K. Houghtby-Haddon, E. Rule, C.P. Uthoff

Associate Research Professors L.R. Matos

Instructor J.L. Robinson

For additional faculty information see the CPS faculty directory (<https://cps.gwu.edu/faculty-directory/>).

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
 - Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
 - Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
 - The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office
-
- College of Professional Studies (CPS) (p. 1467)
 - Advocacy in the Global Environment (PSAD) (p. 1753)
 - Cybersecurity Strategy and Information Management (PSCS) (p. 1754)
 - Healthcare Corporate Compliance (PSHC) (p. 1756)
 - Homeland Security (PSHS) (p. 1757)
 - Integrated Information, Science, and Technology (PSIS) (p. 1759)
 - Landscape Design (PSLD) (p. 1760)
 - Law Firm Management (PSLM) (p. 1761)
 - Legislative Affairs (LGAF) (p. 1675)
 - Paralegal Studies (PSLX) (p. 1762)
 - Political Management (PMGT) (p. 1736)
 - Publishing (PSPB) (p. 1766)
 - Public Leadership (PSPL) (p. 1763)

- Public Relations (PSPR) (p. 1765)
- Urban Sustainability (PSUS) (p. 1769)

UNDERGRADUATE PROGRAMS

Bachelor's completion programs

- Bachelor of Professional Studies with a major in cybersecurity (p. 1143)
- Bachelor of Professional Studies with a major in homeland security (p. 1144)
- Bachelor of Professional Studies with a major in information technology (p. 1145)

Combined programs

- Dual Bachelor of Arts with a major in political communication and Master of Professional Studies in the field of political management (p. 1146)
- Dual Bachelor of Arts with a major in political science and Master of Professional Studies in the field of legislative affairs (p. 1146)
- Dual Bachelor of Arts with a major in political science and Master of Professional Studies in the field of political management (p. 1146)
- Dual Bachelor of Professional Studies with a major in information technology and Master of Science in the field of information systems technology (p. 1146)

BACHELOR OF PROFESSIONAL STUDIES WITH A MAJOR IN CYBERSECURITY

Director: S. White

The bachelor of professional studies with a major in cybersecurity program is intended for students with associate's or non-technical bachelor's degrees who are looking for entry-level positions and advancement in the field of cybersecurity.

The cybersecurity program provides students with skills and knowledge necessary to be successful in the IT security industry. The program's core curriculum includes courses related primarily to specialty areas identified by the National Institute of Standards and Technology (NIST) and the National Initiative for Cybersecurity Education (NICE).

Upon completion of the program, students are able to understand and implement cybersecurity requirements to protect computers, applications, and networks from unauthorized and malicious users or software. In addition, the curriculum covers cryptography, cyber forensics, and network security. The program will also address supporting concepts of information system security which are integral parts of cybersecurity.

Visit the program website (<https://cps.gwu.edu/cybersecurity-bachelors/>) for more information.

REQUIREMENTS

Students completing this program will have satisfied GW's university-wide general education requirement, which includes 22 credits in the following areas:

1. Mathematics or statistics (3 credits)
2. Natural or physical science with lab (4 credits)
3. Humanities (3 credits)
4. Social and behavioral sciences (6 credits)
5. Written communication or composition (6 credits)

In addition, students take a minimum of 60 credits at GW, comprising 15 required courses.

Code	Title	Credits
Required		
PSCS 2301	Cyber Investigation	
PSCS 2302	Digital Forensics	
PSCS 2303	Compliance and Risk Management	
PSCS 2304	Incident Response	
PSCS 3100	Principles of Cybersecurity	
PSCS 3103	Ethics, Law, and Policy	
PSCS 3107	IP Security and VPN Technology	
PSCS 3109	Network Security	
PSCS 3111	Information Technology Security System Audits	
PSCS 3113	Topics in IT Security Defense Countermeasures	
PSCS 3117	Project Management in Information Technology	
PSCS 4102	Intrusion Detection and Vulnerability Management	
PSCS 4103	Securing Operating Systems	
PSCS 4110	Data Communication and Networking Technologies	
PSCS 4202	Cyber Attack Tools and Techniques	

BACHELOR OF PROFESSIONAL STUDIES WITH A MAJOR IN HOMELAND SECURITY

OVERVIEW

Director J. Delinski

The bachelor of professional studies with a major in homeland security is intended for working professionals and community college graduates to complete their bachelor's degree. The degree enhances a student's job application potential, promotion prospects, and/or second career opportunities in today's job market. The subject of homeland security is currently at the forefront of study by law enforcement officials, security professionals, current and former military personnel, intelligence analysts, and government contractors. The knowledge, skills, and abilities needed to succeed in these positions require cutting-edge education and training. The degree will appeal to a wide range of first responders and intelligence analysts who wish to continue their education by studying the latest trends and industry best practices.

REQUIREMENTS

The following requirements must be fulfilled: 120 credits, including 22 credits in general education courses, 38 credits in elective courses, and 60 credits in core courses.

Code	Title	Credits
General education *		
22 credits in general education coursework completed at a regionally accredited institution of higher education:		
3 credits in arts and humanities		
6 credits in behavior or social science		
6 credits in English composition		
4 credits in physical or natural science with lab		
3 credits in quantitative and logical reasoning		
Electives *		
38 credits in elective courses.		
Required core courses **		
60 credits in core courses, to be completed at GW. *		
PSHS 3150	Transnational Threats and Security	
PSHS 3151	Combating Domestic Terrorism	
PSHS 3152	Cyber Terrorism	

PSHS 3160	Crisis and Emergency Planning
PSHS 3161	Intelligence Data Analysis
PSHS 3162	Crime Scene Investigation
PSHS 3170	Infrastructure Protection
PSHS 3171	Introduction to Forensic Science
PSHS 3172	Computer Crime Investigation
PSHS 4180	Security Threat Assessments
PSHS 4181	Incident Management
PSHS 4182	Emergency Public Health Issues
PSHS 4190	Capstone Project
PSHS 4191	Ethical Dilemmas in Policing
PSHS 4192	Media, Public Relations, and Crisis Communication

*General education and elective courses may be completed at any regionally accredited institution. A minimum grade of C is required for transfer credit to be approved. General education and elective coursework may be completed before, during, or within five years of completing the other requirements for the bachelor's degree.

**Core courses are offered during the fall and spring semesters and summer sessions.

BACHELOR OF PROFESSIONAL STUDIES WITH A MAJOR IN INFORMATION TECHNOLOGY

Program Director J. Garrett (Interim)

The bachelor of professional studies with a major in information technology (IT) program offers a unique educational opportunity for working professionals and community college graduates who wish to complete a bachelor's degree. Through an innovative curriculum that combines science, technology, and business, the program prepares students for the IT industry with strong scientific foundations and hands-on practice.

The IT program can be completed within two academic years (four semesters and one summer session). Students graduate with a firm grounding in problem solving, analytical thinking, written communication, and technical knowledge in information technology and computing. The knowledge acquired in the program is relevant to a number of fields, such as information technology, technology management and consulting, network administration and network security, health IT, and data analytics.

See the program website (<http://cps.gwu.edu/bachelors-completion/>) for additional information.

REQUIREMENTS

The BPS in information technology is a degree completion program that requires successful completion of 120 credits, 60 of which must be completed at GW. Up to 60 credits can be transferred from coursework taken at other regionally accredited institutions of higher education. The program is designed for individuals who currently hold an associate's degree or have earned at least 60 credits towards their undergraduate degree.

Students completing this program will have satisfied GW's university-wide general education requirement, which includes 22 credits in the following areas:

Mathematics or statistics (3 credits)
 Natural or physical science with lab (4 credits)
 Humanities (3 credits)
 Social and behavioral sciences (6 credits)
 Written communication or composition (6 credits)

Code	Title	Credits
Required		
Foundational courses		
PSIS 2101	Writing and Communication in the IT Field I	
PSIS 2102	Writing and Communication in the IT Field II	
PSIS 2103	Statistical Sciences and Data Analysis I	
PSIS 2104	Statistical Sciences and Data Analysis II	
PSIS 2105	Programming and Computing Foundations I	
PSIS 2106	Programming and Computing Foundations II	
PSIS 3122	Ethics in Science and Technology	
PSIS 4142	Relational Databases and Their Design	
PSIS 4191	Capstone Project and Senior Thesis I	
PSIS 4192	Capstone Project and Senior Thesis II	
Core courses *		
6 courses (24 credits) selected from the following:		
PSIS 4137	Alternative Energy Sources	
PSIS 4138	Introduction to Health Information Technology	

PSIS 4141	Computer and Telecommunication Networks
PSIS 4144	Information and Network Security
PSIS 4145	Software Systems Development Processes
PSIS 4152	Entrepreneurship and Technology Venture Creation
PSIS 4161	Data Visualization
PSIS 4195	Undergraduate Research
PSIS 4199	Special Topics

*Not all core courses are offered each year. See department for course availability.

DUAL BA WITH A MAJOR IN POLITICAL COMMUNICATION AND MPS IN THE FIELD OF POLITICAL MANAGEMENT

OVERVIEW

The School of Media and Public Affairs (<https://smpa.gwu.edu/>) (SMPA) and the Graduate School of Political Management (<https://gspm.gwu.edu/>) (GSPM) offer a combined BA/MPS degree program for undergraduate students who are interested in careers in the field of political management. The program allows students to take a specified number of graduate credits as part of their undergraduate degree, thereby allowing both degrees to be earned more quickly and at a lower cost. Students pursuing the combined program must meet all requirements of their respective SMPA program. To meet the requirements of the combined program, students take 6 credits in graduate-level courses as part of their BA program of study.

Consult the School of Media and Public Affairs (<https://smpa.gwu.edu/>) for admissions requirements and more details.

DUAL BA WITH A MAJOR IN POLITICAL SCIENCE AND MPS IN THE FIELD OF LEGISLATIVE AFFAIRS

The Department of Political Science and the Graduate School of Political Management work in cooperation to offer a dual bachelor of arts with a major in political science (p. 403) and master of professional studies in the field of legislative affairs (p. 1164) degree program. The program allows students to take 9 graduate credits as part of their undergraduate program, thereby decreasing the number of credits normally required for

the master's degree. All requirements for both degrees must be fulfilled.

Students interested in the dual degree program should confer with the department's graduate adviser early in their junior year. Visit the program website (<https://gspm.gwu.edu/dual-degree-programs/>) for additional information.

DUAL BA WITH A MAJOR IN POLITICAL SCIENCE AND MPS IN THE FIELD OF POLITICAL MANAGEMENT

The Department of Political Science and the Graduate School of Political Management work in cooperation to offer a dual bachelor of arts with a major in political science (p. 403) and master of professional studies in political management (p. 1167) degree program. The program allows students to take 9 graduate credits as part of their undergraduate program, thereby decreasing the number of credits normally required for the master's degree. All requirements for both degrees must be fulfilled.

Students interested in the dual degree program should confer with the department's graduate adviser early in their junior year. Visit the program website (<https://politicalscience.columbian.gwu.edu/dual-degree-political-science-political-management/>) for additional information.

DUAL BPS WITH A MAJOR IN INFORMATION TECHNOLOGY AND MPS IN THE FIELD OF INFORMATION SYSTEMS TECHNOLOGY

The College of Professional Studies and GW School of Business offer a dual bachelor of professional studies in information technology (p. 1145) and master of science in information systems technology (<http://bulletin.gwu.edu/business/information-systems-technology-management/ms-information-systems-technology/>) degree program. The program allows students to take 6 graduate credits as part of their undergraduate program, thereby decreasing the number of credits normally required for the master's degree. All requirements for both degrees must be fulfilled.

Students interested in the dual degree program should confer with the graduate adviser early in their junior year.

GRADUATE PROGRAMS

Master's programs

- Master of Professional Studies in the field of cybersecurity strategy and information management (p. 1147)

- Master of Professional Studies in the field of homeland security (p. 1150)
- Master of Professional Studies in the field of law firm management (p. 1153)
- Master of Professional Studies in the field of paralegal studies (p. 1155)
- Master of Professional Studies in the field of publishing (p. 1157)
- Master of Professional Studies in the field of sustainable urban planning (p. 1159)

Offered by the Graduate School of Political Management, through the College of Professional Studies:

- Master of Professional Studies in the field of legislative affairs (p. 1164)
- Master of Professional Studies in the field of political management (p. 1167)
- Master of Professional Studies in the field of political communication and governance (p. 1172) *Offered in Spanish only*
- Master of Professional Studies in the field of strategic public relations (p. 1173)

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF CYBERSECURITY STRATEGY AND INFORMATION MANAGEMENT

Program Director E. Lammert,

Associate Director C. Uthoff

With the precipitous rise in global cyber crime, espionage and terrorism, it is little surprise that cybersecurity is now the number one national security issue we face. Yet as these agents of chaos seem to multiply by the minute, we're facing a crucial shortage of cybersecurity leaders who can take on this fight. To solve the cybersecurity problem, we must fill this critical gap.

Designed in consultation with key government, military and law enforcement organizations, our cybersecurity strategy and information management master's program scrutinizes issues of law, policy and leadership expressly to create the next generation of cybersecurity's strategic leaders. With a degree that can be completed in as little as 16 months, you will learn from the field's top experts about the strategies and practices that protect critical information and make sure that the world's digital infrastructure remains secure.

Visit the program website (<https://cps.gwu.edu/masters-cybersecurity-strategy-information-management/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits in required courses.

Code	Title	Credits
Required:		
PSCS 6244	Information Systems Protection	
PSCS 6245	Cybersecurity Law and Policy	
PSCS 6246	Cyber Intelligence and Strategic Analysis	
PSCS 6247	Cyber Defense Strategy	
PSCS 6248	Introduction to Cyber Conflict	
PSCS 6255	Information Management for Justice and Public Safety Professionals	
PSCS 6256	Application of Technology to Data Analytics	
PSCS 6257	Enterprise Architecture and Standards	
PSCS 6258	Information Sharing and Safeguarding	
PSCS 6259	Strategic Information Technology Investment and Performance Management	
PSHS 6260	Methods of Analysis in Security	
PSHS 6270	Capstone Project	

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PSCS 2101. Writing and Communication in a Technical Field. 4 Credits.

The fundamentals of reading and writing with a clear sense of purpose and audience. How academic writing in virtually any subject area and on virtually any topic represents a formal engagement with larger scholarly debates. The writing process, including prewriting, drafting, and revision as well as basic research methods. Making clear oral presentations. (Same as PSIS 2101).

PSCS 2102. Fundamentals of Information Technology and Computing. 4 Credits.

Basic concepts of programming including elementary data types (numeric types, strings, lists, and files), control flow, functions, objects, loops, and methods are covered. Designing, maintaining, and implementing programs in a modern programming language. (Same as PSIS 2105).

PSCS 2301. Cyber Investigation. 4 Credits.

The investigative framework and tools needed for the investigation of cyber crime. Crimes that involve computer technology; procedural and tactical issues associated with the prosecution of cyber crime.

PSCS 2302. Digital Forensics. 4 Credits.

An introduction to digital forensic science and the systematic process of acquiring, authenticating, and analyzing digital evidence. Forensic methods and laboratories; tools, techniques, and methods used to perform computer forensics and investigation; and emerging technologies. Theoretical and practical experience using forensic equipment and software.

PSCS 2303. Compliance and Risk Management. 4 Credits.

Data protection from a risk management perspective. Data retention; security and protection technologies; technology requirements for compliance, governance, and data security; the importance of e-discovery for civil litigation; the impact of third-party services in conjunction with data protection; and data processing facets, such as the role of tiering and server and storage virtualization.

PSCS 2304. Incident Response. 4 Credits.

Principles and techniques for detecting and responding to current and emerging computer security threats. Data breaches, advanced malware, and targeted attacks. Law and policy related to incident response.

PSCS 2305. Practicum: Incident Response Techniques. 2 Credits.

Students integrate and apply acquired knowledge and technical skills in computer laboratory settings with a focus on cyber investigation and incident response techniques.

PSCS 3100. Principles of Cybersecurity. 4 Credits.

Basic principles and concepts in information security and information assurance; technical, operational, and organizational issues of securing information systems.

PSCS 3103. Ethics, Law, and Policy. 4 Credits.

Overview of ethical, legal and policy issues related to the impact of modern technology on society; ethical theories and decision making, professional responsibility and codes of ethics, copyright and intellectual property, information accountability, freedom of information and privacy, the Internet and considerations associated with information sharing and social networking.

PSCS 3107. IP Security and VPN Technology. 4 Credits.

Risks associated with an organization's network being connected to the public Internet; defensive technologies, types of encryption, enterprise firewalls, intrusion detection/prevention, and access control technologies; active threat agents and exploitation techniques used to compromise the digital infrastructure.

PSCS 3109. Network Security. 4 Credits.

Security aspects of networks and network technology; intrusion detection, virtual private networks (VPN), and firewalls; types of security threats, security policy design and management; and security technologies, products, and solutions.

PSCS 3111. Information Technology Security System Audits. 4 Credits.

Theory, methodology, and procedures related to IT system audits; proper audit procedures for discovering system vulnerabilities; documenting findings according to the standards of compliance based auditing.

PSCS 3113. Topics in IT Security Defense Countermeasures. 4 Credits.

Theory, methodology, and practical experience relating to IT defense countermeasures; system vulnerabilities and how adversaries can exploit them. Topics vary by semester. May be repeated for credit provided the topic differs. See department for more details.

PSCS 3117. Project Management in Information Technology. 4 Credits.

Concepts and basic functions of the project management body of knowledge, including scope, quality, time, cost, risk, procurement, human resource, and communication management and integration of these functions into a project management system; roles and responsibilities of various project staff.

PSCS 4102. Intrusion Detection and Vulnerability Management. 4 Credits.

The use of intrusion detection systems (IDS) as part of an organization's overall security mechanisms; implementation and testing of IDS security plans, security monitoring, intrusion detection, alarm management, analysis of events and trends, and vulnerability management.

PSCS 4103. Securing Operating Systems. 4 Credits.

The security techniques and technologies integrated into Microsoft operating systems, which are a frequent target of attacks; primary threats and protection mechanisms developed by Microsoft and others; tools used to defend against known risks and vulnerabilities; client and server operating systems, OS hardening, application security, and Active Directory.

PSCS 4104. Securing Network Devices. 4 Credits.

Key network components and devices that need to be secured in order to protect networks from attack; practical and theoretical perspectives on network protection technologies; weaknesses and vulnerabilities; mitigation strategies; viruses, worms and other threats.

PSCS 4105. Cyber Defense Techniques Practicum. 2 Credits.

Working with cybersecurity experts and other qualified computer laboratory personnel, students integrate, apply, and strengthen acquired knowledge and technical skills in laboratory settings.

PSCS 4110. Data Communication and Networking Technologies. 4 Credits.

Overview of the networking technologies deployed by modern enterprises. Hardware and software used to transfer information from source to destination, including switches, routers, firewalls, Ethernet, and the TCP/IP protocols suite. (Same as PSIS 4141).

PSCS 4190. Capstone Project. 4 Credits.

Students use the knowledge and skills acquired throughout the program to conduct significant, independent research or work on a real-life project relevant to their interest in the security field. (Same as PSIS 4190).

PSCS 4201. Cyber Threats and Exploitations Analysis. 4 Credits.

This course will focus on identifying, managing and mitigating cyber threats that an organization could face at any given time. Current and emerging cyber threats will be discussed and examples from real cyber attacks will be analyzed. Students will use various threat modeling tools and cyber intelligence techniques to simulate real counter-threat designs.

PSCS 4202. Cyber Attack Tools and Techniques. 4 Credits.

Linux-based introduction to traditional and contemporary attack tools and technologies used by threat actors. Constructing an effective computer network defense.

PSCS 4203. Analysis of the Intelligence Cycle. 4 Credits.

The intelligence cycle and sources. Target modeling and organizational analysis; quantitative and predictive techniques. The role of intelligence collectors, consumers, and analysts in developing a conceptual model of the intelligence target.

PSCS 4204. Computer Network Attack and Exploitation. 4 Credits.

Cyber attacks orchestrated by computer networks to distract, deny, degrade, or destroy other computer networks or information within large computer systems. Developing standardized attack scenarios to be used against specific targets and providing operational planning to conduct network attacks.

PSCS 4205. Practicum: Cyber Attack Techniques. 2 Credits.

Students integrate and apply acquired knowledge and technical skills in computer laboratory settings. Various cyber attack tools and techniques, including penetration testing and ethical hacking.

PSCS 6244. Information Systems Protection. 3 Credits.

Major areas of information security, including risk management, cybercrime, cyber conflict, and the technologies involved in both cyber attacks and information systems protection; root causes of insecurity in information systems and the processes involved in creating, implementing, and maintaining an information security program. Restricted to students in the MPS in CSIM program or with the permission of the instructor.

PSCS 6245. Cybersecurity Law and Policy. 3 Credits.

Law and policy perspectives on the federal government's response to cyber threats; legal concepts relating to investigation and enforcement activities; application of traditional laws of armed conflict in cyberspace; and national security concerns. Restricted to students in the MPS in CSIM program or with the permission of the instructor.

PSCS 6246. Cyber Intelligence and Strategic Analysis. 3 Credits.

National and international cyber strategies, law, and policy as they relate to cyber intelligence efforts with a review of current cyber threats to national security; identification of strategic, operational, and tactical cyber intelligence efforts, the cyber threat landscape, and intelligence-led policing relative to cyber enforcement and investigation. Restricted to students in the MPS in CSIM program or with the permission of the instructor.

PSCS 6247. Cyber Defense Strategy. 3 Credits.

The fundamentals of cyber defense strategy; understanding the organization's threatscape and building a threat matrix to prioritize and monetize cyber security defense needs; creating a sound cyber defense strategy through efficient use of known security management practices and establishing a management program to implement the defense strategy. Restricted to students in the MPS in CSIM program or with the permission of the instructor. Prerequisite: None.

PSCS 6248. Introduction to Cyber Conflict. 3 Credits.

The emerging concept of cyber conflict, its history over the last 25 years, and its integration into government and military strategies; technical, tactical, and strategic use of information technology between state and non-state actors; cyber conflict as an evolving phenomenon. Restricted to students in the MPS in CSIM program or with the permission of the instructor.

PSCS 6255. Information Management for Justice and Public Safety Professionals. 3 Credits.

Application of information management techniques to justice and public safety fields; governance structure, emerging modes of communication within and outside organizations, and processes that enable managers to make timely decisions. Restricted to students in the MPS in CSIM program or with the permission of the instructor.

PSCS 6256. Application of Technology to Data Analytics. 3 Credits.

Strategic application of technology to data analysis; introduction to leading edge software, including predictive and spatial analytics; principles of data visualization and application of analytics and visualization to solving justice and public safety problems; data collection, analysis, and production of usable information output. Restricted to students in the MPS in cybersecurity strategy and information management program.

PSCS 6257. Enterprise Architecture and Standards. 3 Credits.

Current and emerging trends in enterprise architecture domains; technology environments, including software, hardware, networks, applications, data, communications, and other relevant architecture disciplines; service-oriented architecture and similar innovations; conventions, principles, and practices for creating enterprise architectures; contemporary standards-based architectures for system development; industry guidelines and standards. Restricted to students in the MPS in CSIM program or with the permission of the instructor.

PSCS 6258. Information Sharing and Safeguarding. 3 Credits.

Key principles of privacy and safeguarding of information; how information is shared among government agencies, outside the federal government, and between the government and the private sector. Restricted to students in the MPS in CSIM program or with the permission of the instructor.

PSCS 6259. Strategic Information Technology Investment and Performance Management. 3 Credits.

The effective use of information technology within organizations; integration of IT in business processes, performance measurement, cost benefits analysis, and program evaluation; cross-disciplinary and comprehensive with examples from federal, justice and public safety, and industry organizations. Restricted to students in the MPS in CSIM program or with the permission of the instructor.

PSCS 6260. Methods of Analysis in Security. 3 Credits.

Methods and problems of data collection in security fields with a focus on cybersecurity related issues and readings; analytical design, instrument utilization, sampling, and measurement; data analysis techniques. Restricted to students in the MPS in CSIM program.

PSCS 6270. Capstone Project. 3 Credits.

Designed to help participants refine their conception of leadership in and knowledge of the cybersecurity field. Students must have completed the MPS in CSIM program curriculum before enrolling in this course. Restricted to students in the MPS in CSIM program.

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF HOMELAND SECURITY

Program Director E. Lammert

The master's of professional studies degree in homeland security provides a pioneering education on counter-terrorism, intelligence analysis, emerging security threats, and relevant legislation, enhancing the implementation of security practices in both public and private sectors.

This program offers innovative professional development opportunities for individuals involved in public and private safety sectors, have experience in law enforcement, emergency management, corporate security, transportation security, fire service, public safety, public health preparedness, or the military. Students are taught by acknowledged leaders in the field of homeland security who bring firsthand experience to the classroom, providing a strong focus on practical experience and strategic application of knowledge.

Visit the program website (<https://cps.gwu.edu/homelandsecurity/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits in required courses.

Code	Title	Credits
Required		
PSHS 6240	Political Violence and Terrorism	
PSHS 6241	Globalization of Threats and International Security	
PSHS 6242	Security and Civil Liberties	
PSHS 6243	Intelligence and Strategic Analysis	
PSHS 6244	Information Systems Protection	
PSHS 6250	Strategic Planning and Budgeting	
PSHS 6251	Inter-Agency Cooperation	
PSHS 6252	Emergency Management and Crisis Communication	
PSHS 6253	Managing the Politics of Leadership	

PSHS 6254	Strategic Change Management
PSHS 6260	Methods of Analysis in Security
PSHS 6270	Capstone Project

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PSHS 3150. Transnational Threats and Security. 4 Credits.

Understanding global threats to U.S. national security interests and potential responses. How criminal groups, terror organizations, and gangs operate on a global scale. Questions long-held legal norms such as the rule of law and sovereignty. Restricted to student in the BPS in homeland security program. Prerequisites: N/A.

PSHS 3151. Combating Domestic Terrorism. 4 Credits.

Provides an in-depth look at methods used to conduct attacks within U.S. borders. Topics include lone wolf, directed and coordinated attacks. Restricted to students in the BPS in homeland security program.

PSHS 3152. Cyber Terrorism. 4 Credits.

Analysis of tactics used effectively by cyber terrorists via the internet and social media platforms to spread propaganda and radicalize and recruit individuals to fight for their causes. Restricted to student in the BPS in homeland security program.

PSHS 3160. Crisis and Emergency Planning. 4 Credits.

Presents an all-hazards approach to crisis and emergency planning. Starting with the strategic assessment of common man-made and natural hazards, students examine planning strategies in the urban environment, the incident command system (ICS), and industry standards for response and recovery operations. Restricted to students in the BPS in homeland security program.

PSHS 3161. Intelligence Data Analysis. 4 Credits.

The intelligence cycle and explains many of the issues relating to the use of criminal intelligence for the purpose of securing the homeland. Restricted to students the BPS in homeland security program.

PSHS 3162. Crime Scene Investigation. 4 Credits.

Basic considerations, guidelines, and procedures that help investigating police officers avoid oversight, ensure thoroughness of the search, and comply with legal and scientific principles in the identification, collection, and transportation of physical evidence. Restricted to students in the BPS in homeland security program.

PSHS 3170. Infrastructure Protection. 4 Credits.

Specific security measures that may be used to protect critical infrastructure, public facilities, public gatherings, and open spaces. Restricted to students in the BPS in homeland security program.

PSHS 3171. Introduction to Forensic Science. 4 Credits.

Forensics and its role in criminal investigations. Physical evidence collection and preservation techniques; how different disciplines intersect with crime investigations; and courtroom procedures related to the legal use of scientific evidence. Restricted to students in the BPS in homeland security program.

PSHS 3172. Computer Crime Investigation. 4 Credits.

Introduction to the investigation of computer-based crimes and its importance to the law enforcement community on a transnational level. Review of the history of computer crime, associated terminology, and the types of crimes committed in cyberspace. Restricted to students in the BPS in homeland security and BPS in police and security studies programs.

PSHS 4180. Security Threat Assessments. 4 Credits.

Identification of security vulnerabilities of specific critical infrastructure. Identifying international, domestic, and cyber threats, analyzing intelligence data, and applying this information to a security threat assessment. Restricted to students in the BPS in homeland security program.

PSHS 4181. Incident Management. 4 Credits.

Introduction to basic concepts in management of critical incidents; its historical birth in wildland firefighting and its rebirth and reformation in the aftermath of 9/11 in Homeland Security Presidential Directive #5 (HSPD-5). Successes and failures in incident management and their implications in shaping future processes and procedures. Restricted to students in the BPS in homeland security and BPS in police and security studies programs.

PSHS 4182. Emergency Public Health Issues. 4 Credits.

Comprehensive introduction to public health emergency preparedness and response, including bioterrorism threats and events. Recognizing, responding to, and managing natural and unnatural public health emergencies. Restricted to students in the BPS in homeland security program.

PSHS 4190. Capstone Project. 4 Credits.

Application of the knowledge, skills, and abilities acquired in the BPS in homeland security program. Conduct case study involving a high-profile criminal case, perform independent analysis of the case, and prepare a written report and presentation. Restricted to student in the BPS in homeland security and BPS in police and security studies programs.

PSHS 4191. Ethical Dilemmas in Policing. 4 Credits.

Issues related to use of force, misconduct, and corruption. The historical foundation of ethics and moral philosophy. Restricted to students in the BPS in homeland security and BPS police and security studies programs.

PSHS 4192. Media, Public Relations, and Crisis Communication. 4 Credits.

Best practices for interacting with the media and other key stakeholders, spokesperson techniques for communicating during a crisis situation, and strategic messaging. Restricted to students in the BPS in homeland security program.

PSHS 6240. Political Violence and Terrorism. 3 Credits.

The evolution of terrorism and politically motivated violence; causes and origins in regional, national, and international terrorist and insurgent groups and so-called terrorist states; trends in terrorist modus operandi, including asymmetric attacks; formulating effective counterterrorist strategies. Restricted to students in the MPS in homeland security program.

PSHS 6241. Globalization of Threats and International Security. 3 Credits.

The intersection of globalization and national and international security; how globalization may create new threats while amplifying existing threats; the relationship of specific forms of globalized threat to globalization; responses of states and non-state actors to such threats; the role of international organizations. Restricted to students in the MPS in homeland security program.

PSHS 6242. Security and Civil Liberties. 3 Credits.

Examination of U.S. government activities designed to protect the security of American citizens while balancing those interests against citizens' civil liberties; limitations placed on government activities by the First and Fourth Amendments of the Constitution; complexities associated with the characterization of criminals and terrorists. Restricted to students in the MPS in homeland security program.

PSHS 6243. Intelligence and Strategic Analysis. 3 Credits.

The structure and components of the national intelligence community and law enforcement communities; international intelligence comparison; analysis of intelligence policies and strategies at the international, national, and regional levels. Restricted to students in the MPS in homeland security program.

PSHS 6244. Information Systems Protection. 3 Credits.

Exploration of the major areas of information security including risk management, cybercrime, cyberconflict, and the technologies involved in both cyberattacks and information systems protection; creating, implementing, and maintaining an information security program; root causes of insecurity in information systems.

PSHS 6250. Strategic Planning and Budgeting. 3 Credits.

The adaptation of strategic planning and performance measures beyond budgeting by government agencies dealing with long-term security issues; integrative approach to strategic planning and management, focusing on the implementation, evaluation, and oversight of strategy and policy; development of budgets, accountability plans, and risk management to ensure compliance with stated goals; analytical tools and techniques that inform organizational strategies and actions. Restricted to students in the MPS in homeland security program.

PSHS 6251. Inter-Agency Cooperation. 3 Credits.

In-depth study of interagency cooperation issues relevant to the U.S. Department of Homeland Security's organizational structure; cooperative initiatives through mutual assistance agreements and regional, national, and international structures; technology interoperability, legal, and interorganizational challenges. Restricted to students in the MPS in homeland security program.

PSHS 6252. Emergency Management and Crisis Communication. 3 Credits.

The role of crisis communications in the overall management of emergency operations; critical communications tasks, functions, and operations of the emergency operations center, incident command, and associated emergency personnel; strategies and tactics to enhance and promote effective crisis communications among government emergency managers. Restricted to students in the MPS in homeland security program.

PSHS 6253. Managing the Politics of Leadership. 3 Credits.

The role of power and influence in organizations; complexity and challenges of developing political strategies and mobilizing the political support and resources needed to implement objectives. Restricted to students in the MPS in homeland security program.

PSHS 6254. Strategic Change Management. 3 Credits.

The challenges, techniques, burdens, and successes associated with initiating and implementing major change within organizations; the process of organizational change from multiple theoretical perspectives. Restricted to students in the MPS in homeland security program.

PSHS 6260. Methods of Analysis in Security. 3 Credits.

Methods and problems of data collection in security fields; analytical design, instrument utilization, sampling, and measurement; data analysis techniques. Restricted to students in the MPS in homeland security program.

PSHS 6270. Capstone Project. 3 Credits.

Students refine their conception of leadership and knowledge of the homeland security field. Participants experience leadership in action and enhance independent learning while working in both small and large group dynamics. Restricted to students enrolled in the PSHS cohort. Prerequisites: All the curriculum in the PSHS must be completed before registering for this course.

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF LAW FIRM MANAGEMENT

This program is not accepting applications at this time.

Law Firm Management program provides law firm professionals with the business and leadership knowledge they need to succeed in the fast-growing law firm industry. Program faculty consists of professors from the GW School of Business and adjunct professors who are experts in their legal fields.

Students have attended the program from law firms of varying sizes located throughout the United States, Canada, Asia, the Middle East and Europe. Professional administrators from Arnold & Porter Kaye Scholer; DLA Piper; Jones Day; Vinson and Elkins; Morgan, Lewis & Bockius; Patterson Belknap; Hogan Lovells; Weil Gotshal; and Skadden Arps; as well as companies providing services to law firms, have attended the program.

All students have professional administrative experience in law firms or related settings. Positions held by students include: Administrator, Executive Director, Chief Operating Officer, Director of Human Resources, Director of Professional Development, Marketing Manager, Operations Manager, Finance Director, IT Manager, Managing Partner, Practice Group Leaders, Library, Senior Paralegals, Knowledge Management, and Counsel.

The Master of Professional Studies in Law Firm Management is a 30-credit program that can be completed in 18 months. The program combines Distance Learning and Short-Term Residencies at the GW Alexandria Graduate Education Center. The program begins each summer.

Visit the program website (<https://cps.gwu.edu/law-firm-management/>) for additional information.

REQUIREMENTS

This program is not accepting applications at this time.

The following requirements must be fulfilled: 30 credits in required courses.

Code	Title	Credits
PSLM 6201	Theories, Principles, and Practices of Law Firm Management	
PSLM 6202	Applying Strategic and Business Planning	
PSLM 6203	Practical Applications of Law Firm Management	
PSLM 6204	Principles of Leadership	

PSLM 6205	Application of Leadership Frameworks
PSLM 6206	Strategic Leadership for Sustainability and Change
PSLM 6207	Process Improvement in Law Firms
PSLM 6208	Legal Technology and Knowledge Management

See CPS regulations (p. 1140) for additional information regarding enrollment status and time limits.

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PSLM 5099. Variable Topics. 1-99 Credits.

PSLM 6201. Theories, Principles, and Practices of Law Firm Management. 6 Credits.

PSLM 6202. Applying Strategic and Business Planning. 3 Credits.

Team projects using a simulated law firm case study, including practice group and office profitability analysis, market assessments, creation of strategic plans, and merger analyses. Prerequisite: PSLM 6201.

PSLM 6203. Practical Applications of Law Firm Management. 3 Credits.

Presentation of strategic plans, analyses, and recommendations developed in PSLM 6202 before a panel of faculty, managing partners, and law firm professionals. Prerequisite: PSLM 6202.

PSLM 6204. Principles of Leadership. 6 Credits.

An intensive course focused on theories and principles of leadership within firms, including leading organizational change. Prerequisite: PSLM 6203.

PSLM 6205. Application of Leadership Frameworks. 3 Credits.

Concepts and frameworks that highlight leadership roles in firms. Prerequisite: PSLM 6204.

PSLM 6206. Strategic Leadership for Sustainability and Change. 3 Credits.

Integration of the content of PSLM 6204 and PSLM 6205 through a focus on strategic leadership. Prerequisite: PSLM 6205.

PSLM 6207. Process Improvement in Law Firms. 3 Credits.

Development of charters for major projects in law firms, applying skills pertaining to managing change and conflict. Prerequisite: PSLM 6206.

PSLM 6208. Legal Technology and Knowledge Management. 3 Credits.

Key elements of knowledge management, including development of a knowledge management strategy. Prerequisite: PSLM 6207.

Director C. Leonard

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PSLM 5099. Variable Topics. 1-99 Credits.

PSLM 6201. Theories, Principles, and Practices of Law Firm Management. 6 Credits.

PSLM 6202. Applying Strategic and Business Planning. 3 Credits.

Team projects using a simulated law firm case study, including practice group and office profitability analysis, market assessments, creation of strategic plans, and merger analyses. Prerequisite: PSLM 6201.

PSLM 6203. Practical Applications of Law Firm Management. 3 Credits.

Presentation of strategic plans, analyses, and recommendations developed in PSLM 6202 before a panel of faculty, managing partners, and law firm professionals. Prerequisite: PSLM 6202.

PSLM 6204. Principles of Leadership. 6 Credits.

An intensive course focused on theories and principles of leadership within firms, including leading organizational change. Prerequisite: PSLM 6203.

PSLM 6205. Application of Leadership Frameworks. 3 Credits.

Concepts and frameworks that highlight leadership roles in firms. Prerequisite: PSLM 6204.

PSLM 6206. Strategic Leadership for Sustainability and Change. 3 Credits.

Integration of the content of PSLM 6204 and PSLM 6205 through a focus on strategic leadership. Prerequisite: PSLM 6205.

PSLM 6207. Process Improvement in Law Firms. 3 Credits.

Development of charters for major projects in law firms, applying skills pertaining to managing change and conflict. Prerequisite: PSLM 6206.

PSLM 6208. Legal Technology and Knowledge Management. 3 Credits.

Key elements of knowledge management, including development of a knowledge management strategy. Prerequisite: PSLM 6207.

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF PARALEGAL STUDIES

Program Director T. Marsh

The master of professional studies in the field of paralegal studies is an advanced credential for those who wish to lead the profession in a variety of settings such as law, finance, insurance, consulting, and health care. The program curriculum balances a focus on analysis and critical thinking with the applied skills that employers seek, such as written and oral communication, research, and managing complex tasks and teams.

Students complete the 32-credit program in four semesters.

GW's College of Professional Studies also offers an 18-credit graduate certificate in paralegal studies (p. 1163), which is completed in two semesters.

The 24-credit graduate certificate California paralegal studies (p. 1162) complies with the law mandating that paralegals practicing in California must possess certain credentials. The certificate includes a highly recommended course on California law, practice, and ethics and typically is completed in three or four semesters.

Credits earned in both graduate certificate programs may be applied toward master's degree requirements.

The dual master of professional studies in paralegal studies and graduate certificate in healthcare corporate compliance (p. 1163) provides a solid legal education and coursework in healthcare corporate compliance that is accredited by the Compliance Certification Board (<https://www.compliancecertification.org/AboutCCB.aspx>).

Students may attend classes in the evenings at the GW Graduate Education Center in Alexandria, VA, at GW's Foggy Bottom Campus in Washington, DC, or online.

Visit the program website (<https://cps.gwu.edu/paralegal-studies-master-professional-studies/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 32 credits in required courses.

Code	Title	Credits
Required		
PSLX 6210	American Jurisprudence	
PSLX 6211	Legal Research and Writing	
PSLX 6212	Litigation	
PSLX 6214	Administrative Law	
PSLX 6215	Government Contracts Law	
PSLX 6223	Contracts	
PSLX 6224	Advanced Legal Writing	
PSLX 6225	Business Entities	
PSLX 6226	International Law	
PSLX 6227	Intellectual Property Law	
PSLX 6294	Independent Research in Legal Studies	
PSLX 6298	Paralegal Practicum

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PSLX 3210. Introduction to the U.S. Legal System. 4 Credits.

Introduction to the U.S. legal system. Foundations of law, issue spotting and legal writing, the Federal Rules of Civil Procedure, rules of court, ethics and professionalism, and the unauthorized practice of law.

PSLX 5099. Variable Topics. 1-99 Credits.

PSLX 6210. American Jurisprudence. 3 Credits.

An introduction to the foundations, theories, history, and applications of the American legal system; local, state, and federal courts and sources of law; and ethics and professionalism issues of especial importance to paralegals.

PSLX 6211. Legal Research and Writing. 3 Credits.

Fundamentals of legal research using print and online tools.

PSLX 6212. Litigation. 3 Credits.

Legal technology and the rules of court, procedure, and evidence; technical and substantive skills necessary for effective litigation support.

PSLX 6213. Corporations and Contracts Law. 3 Credits.

PSLX 6214. Administrative Law. 3 Credits.

An introduction to administrative and regulatory law; history and development of administrative law; agency, due process, agency actions, administrative investigation and hearings, and judicial review.

PSLX 6215. Government Contracts Law. 3 Credits.

The law of procuring, forming, and executing government contracts, including drafting and litigation; competition requirements, contract changes, and contract terminations; researching and drafting documents common to a government contracts practice.

PSLX 6223. Contracts. 3 Credits.

Contract elements, their attendant legal ramifications, and the processes necessary to make such determinations. Development of legal reasoning skills in evaluating issues arising from contract law.

PSLX 6224. Advanced Legal Writing. 3 Credits.

Advanced legal writing techniques and drafting for legal practice. Legal writing in plain English; strategies for effective writing; emphasis on legal memoranda, legal correspondence, and preparing and drafting legal pleadings and documents for court. Refines and advances skills in written legal analysis and legal citation.

PSLX 6225. Business Entities. 3 Credits.

Overview of business organizations, including partnerships, limited liability companies, and corporations. Key concepts applicable to business organizations, including regulation, business formation, document preparation. Application of legal analysis within the context of business entities and other topics applicable to paralegals in all disciplines.

PSLX 6226. International Law. 3 Credits.

Introduction and survey of international law, including international trade law and litigation. Rules and principles governing relations among sovereign states, international organizations, and sources of international law. Analysis of the rules and customs for handling international trade. International courts and tribunals; overview of the treaties, customary principles, and institutional structures governing international human rights law.

PSLX 6227. Intellectual Property Law. 3 Credits.

Introduction to the legal structure of an intellectual property practice. Trademarks, copyrights, and patents and the supporting practice concomitant to each element. Analysis of the processes, supporting documentation, laws, and rules regarding patent prosecution and litigation. This course complements and builds upon the legal issues and analysis introduced in the courses on contracts, business entities, and litigation.

PSLX 6228. California Law and Practice. 3 Credits.

Overview of the state of California's government and court structures, rules of court, litigation support procedures and technology, and professional ethics. May be used to satisfy the California paralegal continuing legal education requirement.

PSLX 6294. Independent Research in Legal Studies. 2 Credits.

Guided, independent research to demonstrate the higher level of competency in research, analysis, writing, and oral presentation. Restricted to students in the MPS in paralegal studies programs.

PSLX 6298. Paralegal Practicum. 3 Credits.

Students work in legal environments while completing their studies, taking active roles to obtain, manage, and maximize the value of their positions. Restricted to students in the MPS in paralegal studies program.

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF PUBLISHING

Program Director J. Warren

Designed for current and aspiring professionals, including post-bachelor and post-graduate students with degrees in other disciplines, the master of professional studies (MPS) in publishing program offers evening courses at GW's convenient Alexandria Graduate Education Center and Online, allowing students to complete the degree in two years while working. The curriculum is regularly reviewed by faculty, which includes nationally and internationally recognized leaders in print and digital publication. This ensures that the MPS provides a solid background for entry into all areas of publishing. Professionals already in the field of publishing can use this program to enhance their careers with exposure to the latest technological advances.

To earn the MPS, students must complete 30 credit hours. Core coursework provides a broad foundation of the entire industry, regardless of method of delivery (book, journal, or online), with five tracks focusing on professional roles: editorial, business, design, marketing, and technology. Tracks focusing on professional roles: business & marketing, editorial, or technology & design.

Visit the program website (<http://cps.gwu.edu/publishing/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits, including 16 credits in required courses and 14 credits in elective courses.

Code	Title	Credits
Required		
PSPB 6201	Book and Journal Publishing	
PSPB 6203	Business of Publishing	
PSPB 6205	Copyright Law in Print and Cyberspace	
PSPB 6207	Marketing Strategies	
PSPB 6232	Production Management	
PSPB 6251	Fundamentals of Electronic Publishing	
PSPB 6281	Ethics in Publishing	
At least one course in each of the following groups:		
Editorial group		

PSPB 6261 Editorial Content, Rights, and Permissions

PSPB 6262 Editing for Books, Journals, and Electronic Products

PSPB 6265 Managing Editorial Staff

Business and marketing group

PSPB 6221 Publishing Management, Organization, and Strategy

PSPB 6222 Accounting and Finance for Publishers

PSPB 6271 Sales Management, Strategy, and Positioning

PSPB 6272 Book Publicity and Promotion

Technology and design group

PSPB 6213 Book Design

PSPB 6253 Electronic Publishing Theory & Practice

PSPB 6257 Designing for E-Publishing Success

PSPB 6256 E-Publishing Technologies And Standards

PSPB 6259 E-Publishing Tools

Electives

Credits beyond those for all required courses are taken as electives; at least one elective must be taken in each group.

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PSPB 5099. Variable Topics. 1-99 Credits.

PSPB 6126. Children's Publishing and Media. 2 Credits.

Explores the children's media industry with a focus on book publishing. Overview of children's and YA print, digital, audio, and video segments. Reviews business opportunities, market analysis, trends, demographics, acquisition, and outreach.

PSPB 6201. Book and Journal Publishing. 3 Credits.

Fundamental aspects of the publishing industry, including business models, acquisitions, production, marketing, and sales for both books and journals. Challenges to the industry and strategic decisions formed and communicated by publishers.

PSPB 6203. Business of Publishing. 2 Credits.

Business operations in the publishing industry and how various business practices impact the publishing ecosystem. Book acquisitions, contracts, business plans, and distribution strategies.

PSPB 6205. Copyright Law in Print and Cyberspace. 3 Credits.

Foundations of copyright law for print and electronic media. History and development of copyright law and key concepts such as exclusive rights, fair use, remedies for infringement, and the overall challenges in application of the law to all media.

PSPB 6207. Marketing Strategies. 2 Credits.

Marketing and promotional strategies for print and digital book and journal publishing products. Decisions marketing departments must make to help increase the impact of publishing products.

PSPB 6213. Book Design. 2 Credits.

The role of design in the publishing process. How components of book design, such as typography, imagery, page layout, cover design, printing, and production, are affected by and affect content, tone, function, and intended audience.

PSPB 6214. Professional Editor. 3 Credits.

The editorial function and importance of editorial judgment as personified in the acquisitions, developmental, substantive, and copy editor roles. Freelance editing, editorial management, challenges facing the professional editor, and potential editorial career trajectories. Prerequisite: PSPB 6201.

PSPB 6215. Editing Special Projects. 1 Credit.

Practical experience editing special projects, which may include journals, open educational resources, monographs, and books. Restricted to students in the online MPS in the field of publishing program. Recommended background: prior completion of PSPB 6214.

PSPB 6221. Publishing Management, Organization, and Strategy. 2 Credits.

Publishing management, strategic planning, how publishers add value, and organizational change. How ethics, diversity, and social responsibility inform organizations. Issues that drive the strategic planning process, such as staff involvement, team building, and resource allocation.

PSPB 6222. Accounting and Finance for Publishers. 2 Credits.

Accounting and financial reporting for a publishing organization's operating results, with an emphasis on evaluating what these results mean in terms of financial success, new business ventures, and sustainability.

PSPB 6223. Global Publishing. 2 Credits.

Overview of the publishing industry around the world. National publishing industries and strategies for entering those markets. Global English language publishing. Acquisition, sales, and production strategies. Translation rights and global strategies. Recommended background: prior completion of PSPB 6203.

PSPB 6224. Budgeting, Fulfillment, and Distribution. 2 Credits.**PSPB 6232. Production Management. 3 Credits.**

Publishing production and product life cycles. Students develop products, plan and specify requirements, select vendors, and learn about integrating digital products into print production processes.

PSPB 6251. Fundamentals of Electronic Publishing. 2 Credits.

Digital technologies and trends that have transformed the publishing industry in recent decades, including standards, business models, and technologies and approaches used in electronic publishing.

PSPB 6253. Electronic Publishing Practice. 2 Credits.

Pragmatic, economic, and ethical aspects of electronic publishing for responsible decision making. Prerequisite: PSPB 6251.

PSPB 6255. Electronic Publishing: Infrastructure and Architecture. 3 Credits.

Emerging content technologies, including software and hardware components of a typical publishing system, the enabling standards, and an introduction to publishing systems architecture. Prerequisite: PSPB 6251.

PSPB 6256. E-Publishing Technologies And Standards. 2 Credits.

Overview of current and emerging content technologies, software and hardware components of a typical publishing system, enabling standards, and publishing systems architecture. Restricted to students in the MPS in publishing program. Prerequisite: PSPB 6251.

PSPB 6257. Designing for E-Publishing Success. 2 Credits.

Principles of digital design, usability testing, search engine optimization, iterative design, and multiple presentational models. Information architecture, usability, and design. Prerequisite: PSPB 6251.

PSPB 6258. User-Centric Design for Print and Electronic Publications. 2 Credits.**PSPB 6259. E-Publishing Tools. 2 Credits.**

Employs tools to produce both book and magazine page layouts, while delving into style sheets, master pages, importing different file types, and rendering on different platforms. Considers print-ready projects and ways to use multimedia. Prerequisite: PSPB 6251.

PSPB 6261. Editorial Content, Rights, and Permissions. 2 Credits.

Meaning and monetization of rights in the publishing world. What editors need to know to negotiate terms for rights that they wish to acquire. The effects of emerging electronic and digital marketplace on permissions and rights.

PSPB 6262. Editing for Books, Journals, and Electronic Products. 2 Credits.

Facets of editing related to books and journals and electronic editions and derivatives of both publication types, and born-digital information products.

PSPB 6265. Managing Editorial Staff. 2 Credits.

Roles and responsibilities, workflows, best practices, policies, and procedures within editorial offices and how these roles may vary from office to office. Tools and strategies for effectively managing an editorial department in scientific, technical, and medical (STM) journal publishing.

PSPB 6271. Sales Management, Strategy, and Positioning. 2 Credits.

Essentials of sales strategy and marketing for books, magazines, and e-content products.

PSPB 6272. Book Publicity and Promotion. 2 Credits.

Overview of strategies, objectives, and tactics for promoting and publicizing new books, monographs, and other publishing products, using examples from trade, academic, and electronic publishing.

PSPB 6273. Managing the Marketing Portfolio. 2 Credits.

PSPB 6280. Applied Ethics in Publishing. 1 Credit.

Students work with publishers, advocacy groups, or community groups on a project that applies ethical theories to real-world publishing situations.

PSPB 6281. Ethics in Publishing. 1 Credit.

Ethical issues in publishing, including censorship, intellectual property rights, plagiarism, open access, business practices, and environmentally-responsible publishing. Issues of diversity, inclusion, and accessibility. Restricted to second-year students in the MPS in publishing program.

PSPB 6298. Digital Publishing Special Projects. 2 Credits.

Students address a real-world problem using publishing theory and application and consideration of workflows, product life cycle, schedules, deliverables, and dissemination. Prerequisites: PSPB 6251; and PSPB 6256, or PSPB 6257, or PSPB 6259.

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF SUSTAINABLE URBAN PLANNING

Director S. Whitehead

The master of professional studies (MPS) in sustainable urban planning degree program is dedicated to helping students acquire the skills they need to face the challenges of modern urbanization, both in the United States and around the

globe. The program offers an array of high-level theoretical, philosophical, and historical courses in planning, urban issues, and new technological approaches that aim to prepare new planning professionals for success in the burgeoning field. Above all, the program gives students the ability to use their ideas to help forge better cities.

The complete sequence of classes required for the master's degree is offered each calendar year, including the summer session, and students may enroll on a full- or part-time basis.

The Sustainable Urban Planning Master's Degree is accredited by the Planning Accreditation Board (PAB). (<https://www.planningaccreditationboard.org/?id=30>) This is a high academic standard that recognizes professional planning programs in North America on the basis of performance, integrity, and quality. Successful completion of this program may reduce the time required to become certified through the American Institute of Certified Planners.

Visit the program website (<http://cps.gwu.edu/master-professional-studies-sustainable-urban-planning-0/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 48 credits, including 33 credits in required courses and 15 credits in elective courses.

Code	Title	Credits
Required		
PSUS 6201	Principles of Sustainable Urban and Regional Planning	
PSUS 6202	Urban and Environmental Economics	
PSUS 6203	Research Methods: Geospatial and Econometric Analysis	
PSUS 6204	Land Use Law	
PSUS 6210	Transportation Planning in City Systems	
PSUS 6211	Regional Development and Agricultural Economics	
PSUS 6212	Sustainable Communities I: Housing and Design	
PSUS 6220	Planning Resilient and Low-Carbon Cities	
PSUS 6221	The Scientific Basis of Climate Change	
PSUS 6230	Sustainable Community Design Studio	
PSUS 6233	Capstone in Sustainable Urban Planning	

Electives

15 credits in elective courses selected from the following:

FINA 6290	Special Topics
PSUS 6213	Advanced Research Methods Individual Mentoring
PSUS 6214	Food and Cities
PSUS 6215	Urban Health Impact Assessment
PSUS 6216	Megacities in a Globalized World
PSUS 6218	Urban Growth and Affordability
PSUS 6223	Sustainable Communities II: Reading Cities and Town
PSUS 6224	Sustainable Energy for Cities and the Environment
PSUS 6225	Sustainable Building: Energy Demand, Efficiency, and Supply
PSUS 6231	Practicum: Climate Change Management and Policy
PSUS 6235	Advanced Topics in Urban Sustainability
PSUS 6236	International Studio in Sustainable Urban Planning
PSUS 6260	Introduction to Sustainable Design
PSUS 6261	Ecology of the Built Environment
PSUS 6262	Tools for Sustainable Design
PSUS 6266	Ecological Restoration

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PSUS 5099. Variable Topics. 1-99 Credits.

PSUS 6201. Principles of Sustainable Urban and Regional Planning. 3 Credits.

The environmental, social, and economic elements of sustainability. Present and future challenges, including environmental management, energy policy, financial crises, global warming, inequality, public education, third and first world slums, the success and failure of nations, urban agriculture, urban economics, and more. The implications of sustainable development and conducting research based on evidenced-based policy. Students focus on the work of researchers outside of the planning field as they write a series of research essays containing reviews of relevant scientific literature.

PSUS 6202. Urban and Environmental Economics. 3 Credits.

The application of neoclassical economics to problems faced by practitioners of the field of sustainable urban and regional planning. Key economic concepts including supply and demand, consumption and production, markets and market failure, and measurement of environmental and other non-market commodities. An economist's perspective on the principals and methods for understanding urban and environmental challenges and solutions, urban growth, environmental quality, public policy, and other issues fundamental to contemporary development.

PSUS 6203. Research Methods: Geospatial and Econometric Analysis. 3 Credits.

Developing proficiency in geographic information systems (GIS) and econometric analysis; building and analyzing spatial datasets using ArcGIS and Stata statistical software.

PSUS 6204. Land Use Law. 3 Credits.

Understanding the legal context of land use planning as it applies to contemporary issues. The role of land use law in shaping the urban context and its implications for policy and practice.

PSUS 6210. Transportation Planning in City Systems. 3 Credits.

Transportation planning with long-run goals in mind, including reducing greenhouse gas emissions. The role of planning at local and regional scales within the broader framework of transportation engineering.

PSUS 6211. Regional Development and Agricultural Economics. 3 Credits.

The economics of land use patterns and development processes in the United States and elsewhere in the world. Introduction to the field of agricultural economics and examination of food deserts and other food-related problems relevant to the field of sustainable urban planning.

PSUS 6212. Sustainable Communities I: Housing and Design. 3 Credits.

Community development with a focus on policy and the various sectors of interest that affect contemporary urbanization. How policies, planning techniques, and implementation strategies form the core work of planning practitioners. Topics include water supply, food deserts, public health, and urban resilience. Pathways to more sustainable communities are explored through the policy arenas in which key decisions are made; key sectors that make up the fabric of communities; and special topics that have emerged as critical challenges for sustainable community development.

PSUS 6213. Advanced Research Methods Individual Mentoring. 3 Credits.

Builds on research skills learned in PSUS 6203. Students in the sustainable urban planning program work one-on-one with a faculty member of their choice on a project of joint design. Prerequisite: PSUS 6203.

PSUS 6214. Food and Cities. 3 Credits.

Examines agricultural systems, food production, consumption, and trade, and their links to urbanization, city growth, and public health, through lenses of history, technology, economic theory, geography, and public policy. The course explores the roles that food plays in the lives of urban inhabitants, and in shaping the urban landscape, and the role of cities in determining the geography, sustainability, and business of agriculture.

PSUS 6215. Urban Health Impact Assessment. 3 Credits.

Examines the relationship between the allied fields of urban planning and public health. Addresses the link between the built environment and various health outcomes and the value added incorporating health concerns into the planning and design processes.

PSUS 6216. Megacities in a Globalized World. 3 Credits.

Research-oriented course in which students identify, analyze, and recommend ways of addressing land use change and economic development within one of the world's megacities.

PSUS 6218. Urban Growth and Affordable Housing. 3 Credits.

Real estate economics, with an emphasis on urban growth and affordable housing; the process and outcome of economic development and the relationship between economic development and sustainable urban planning.

PSUS 6220. Planning Resilient and Low-Carbon Cities. 3 Credits.

International perspectives on urban planning, taking into consideration increased global temperatures resulting from greenhouse gas emissions-induced climate change. The course is taught with reference to the findings of the Intergovernmental Panel on Climate Change (IPCC) and considers how urbanization around the world must adapt to the reality of global warming and its consequences.

PSUS 6221. The Scientific Basis of Climate Change. 3 Credits.

The science underlying climate change policy and decision making. Earth systems, climate change projections, the need for mitigation, and impact assessment. Designed for non-scientists.

PSUS 6222. Climate Change Economics. 3 Credits.

Energy use in built environments with an emphasis on fundamental drivers of energy demand, strategies to promote energy efficiency, and essential features of energy supply; the relationship between energy demand and supply in development.; how advances in construction technology can help counter greenhouse gas emissions.

PSUS 6223. Sustainable Communities II: Tools for Assessment and Transformation. 3 Credits.

Builds on PSUS 6212 by further detailing the theory and tools relevant to the assessment and transformation of neighborhood and communities. Geospatial analysis explore the fundamental drivers of urban form, advanced transportation systems, theories of change, and various impact assessment tools used to inform policy implementation.

PSUS 6224. Sustainable Energy for Cities and the Environment. 3 Credits.

Resource management and renewable energy technologies. Vulnerabilities of existing urban structures, particularly the energy grid. Implications of and solutions to energy-related problems likely to arise in present and future cities.

PSUS 6228. Open Space and Public Facilities Planning. 3 Credits.

Relevant skills applicable to urban park planning. Students learn site assessment and analysis tools and produce a professional quality project.

PSUS 6230. Sustainable Community Design Studio. 3 Credits.

Students gain practical experience by applying research skills and creativity to analyze and resolve a real-world urban issue.

PSUS 6231. Practicum:ClimateChangeMgt&Pol. 3 Credits.

PSUS 6233. Capstone in Sustainable Urban Planning. 3 Credits.

The SUP Capstone is a self-paced project specific to individual students, conducted under the supervision of a faculty member/s of the student's choice. The capstone is a significant piece of research that ties the student's broader experience in the Sustainable Urban Planning Program together – and brings their cumulative learning to bear on a research question / topic / project of their choice and definition. The capstone is intended to be a piece of exemplary work that the student can use to help them get to the "next level." That is, the capstone is a project that demonstrates the students capabilities and ability to work independently – it might be used, for example, as a sample of work in the job application process. Capstone projects may take the form of academic research papers; applied policy briefs; posters; executive training courses; and more. The capstone is no less (and no more) than a full semester's worth of intensive work on a particular project; it is NOT a thesis, as defined by the George Washington University. Ideally, the capstone project is of sufficient quality that it is worth of being presented at a meeting of the American Planning Association (local chapter or national meeting) or other relevant professional context.

PSUS 6235. Advanced Topics in Urban Sustainability. 3 Credits.

PSUS 6236. International Studio in Sustainable Urban Planning. 3 Credits.

International immersion designed to promote an international exchange of research and scholarship on sustainable urban development and provide instruction on operating in a foreign setting.

PSUS 6260. Introduction to Sustainable Design. 2 Credits.

PSUS 6261. Ecology of the Built Environment. 2 Credits.

PSUS 6262. Tools for Sustainable Design. 3 Credits.

PSUS 6266. Ecological Restoration. 1 Credit.

PSUS 6269. Sustenance and the Landscape. 2 Credits.

CERTIFICATE PROGRAMS

Graduate certificates

The College of Professional Studies offers the following graduate certificates. In addition to those listed, graduate certificates in political management and strategic governance and in strategic communications campaigns are offered in Spanish to closed cohorts of students in Latin America and in Spain.

- California paralegal studies (p. 1162)
- Community advocacy (p. 1174)
- Digital communications (p. 1175)

- Digital politics (p. 1175)
- Global public relations (p. 1176)
- Healthcare corporate compliance (p. 1163)
- PACs and political management (p. 1176)
- Paralegal studies (p. 1163)
- Sustainable urban planning (p. 1163)

Additional information is available on the College of Professional Studies website (<https://cps.gwu.edu>).

GRADUATE CERTIFICATE IN CALIFORNIA PARALEGAL STUDIES

Director T. Marsh

As Washington DC's only academic-credit bearing paralegal studies program, the graduate certificate in paralegal studies provides powerful credentials and are a signal to the best employers that you withstood the academic rigor of one of the nation's best paralegal programs. You'll study with the nation's leading experts and get the critical knowledge and skills you need to enter legal, corporate, healthcare, or government practice with confidence and acumen.

The graduate certificate comprises the core course sequence plus any two of the legal practice areas courses, including the highly recommended California Law and Practice course. These eight courses, or 24 credits, builds on the foundational knowledge students gain in the early courses and expands on the knowledge in alignment with students' academic and professional objectives. Additionally, the certificate fully compiles with the educational requirements outlined in California Business and Professions Code, Chapter 5.6, §6450 (c), thereby allowing you to qualify as a paralegal in the state of California. Completion of this certificate typically takes three or four semesters.

Credits earned for the certificate can be counted toward the 32-credit master of professional studies in paralegal studies (p. 1155) degree. As a credit-bearing program, the certificate qualifies for military benefits and federal financial aid.

Visit the program website (<https://cps.gwu.edu/paralegal-studies-graduate-certificates/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 24 credits, including 18 credits in required courses and 6 credits in elective courses.

Code	Title	Credits
Required		
PSLX 6210	American Jurisprudence	

PSLX 6211	Legal Research and Writing
PSLX 6212	Litigation
PSLX 6223	Contracts
PSLX 6224	Advanced Legal Writing
PSLX 6225	Business Entities
Two courses from the following:	
PSLX 6214	Administrative Law
PSLX 6215	Government Contracts Law
PSLX 6226	International Law
PSLX 6227	Intellectual Property Law
PSLX 6228	California Law and Practice

GRADUATE CERTIFICATE IN HEALTHCARE CORPORATE COMPLIANCE

Director J. Thorpe

Designed for professionals working in the field of healthcare compliance or who aspire to work in the field, the 12-credit graduate certificate in healthcare corporate compliance provides students with a uniquely comprehensive view of the field. Drawing from GW's Department of Health Policy in the Milken Institute School of Public Health and a leading healthcare law firm in Washington, DC, the program offers education in healthcare laws and regulations as well as tools and strategies for creating effective corporate compliance programs. As the center of federal healthcare policy and enforcement, the District provides the ideal backdrop for study, allowing unparalleled access to experts in the field, including current and former regulators and policymakers and other compliance professionals.

Visit the program website (<https://cps.gwu.edu/healthcare-compliance/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits in required courses.

Code	Title	Credits
Required		
PSHC 6201	Introduction to Health Care Corporate Compliance	
PSHC 6202	Compliance with Laws and Regulations I	

PSHC 6204	Compliance with Laws and Regulations II
PSHC 6206	Case Studies in Health Care Corporate Compliance

See CPS regulations (p. 1140) for additional information regarding enrollment status, grade-point average requirements, and time limits.

GRADUATE CERTIFICATE IN PARALEGAL STUDIES

Program Director T. Marsh

The graduate certificate in paralegal studies is designed for students who wish to enter the paralegal profession. The certificate is universally recognized as the standard entry-level credential. GW's approach is academic and practical, emphasizing leadership and teamwork, written and oral communication skills, ethics, and time management in addition to substantive law and legal technology skills.

Credits earned for the certificate can be counted toward the 32-credit master of professional studies in paralegal studies (p. 1155) degree. As a credit-bearing program, the certificate qualifies for military benefits and federal financial aid.

Visit the program website (<https://cps.gwu.edu/paralegal-studies-graduate-certificates/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses.

Code	Title	Credits
Required		
PSLX 6210	American Jurisprudence	
PSLX 6211	Legal Research and Writing	
PSLX 6212	Litigation	
PSLX 6223	Contracts	
PSLX 6224	Advanced Legal Writing	
PSLX 6225	Business Entities	

See CPS regulations (p. 1140) for additional information regarding enrollment status and time limits.

GRADUATE CERTIFICATE IN SUSTAINABLE URBAN PLANNING

Program Director S. Whitehead

The graduate certificate in sustainable urban planning is tailored to students seeking a credential in the field, but who are not in need of a complete master's degree. If a student wishes to continue their studies, all credits earned for this certificate may be applied toward degree requirements for the master of professional studies in the field of sustainable urban planning. (p. 1159)

Visit the program website (<https://cps.gwu.edu/sustainable-urban-planning/graduate-certificate-sustainable-urban-planning/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits, including 12 credits in required courses and 6 credits in elective courses.

Code	Title	Credits
Required		
PSUS 6201	Principles of Sustainable Urban and Regional Planning	
PSUS 6202	Urban and Environmental Economics	
PSUS 6210	Transportation Planning in City Systems	
PSUS 6211	Regional Development and Agricultural Economics	
Electives		
6 credits in elective Professional Studies Urban Sustainability (PSUS) courses		

See CPS regulations (p. 1140) for additional information regarding enrollment status and time limits.

GRADUATE SCHOOL OF POLITICAL MANAGEMENT

The Graduate School of Political Management, through the College of Professional Studies, offers the master of professional studies in the fields of political management, legislative affairs, and strategic public relations. Each program has a prerequisite of a bachelor's degree with a minimum *B* grade-point average from an accredited college or university and is subject to the CPS regulations (<https://cps.gwu.edu>) that appear under the respective programs. In addition, graduate certificate programs are offered in digital politics, public relations, PACs and political management, and global public relations. The master of professional studies in political communication and governance; and graduate certificates in both political management and strategic governance, and strategic communications and campaigns are offered in

Spanish to closed cohorts of students in Latin America and in Spain.

GRADUATE

Master's programs

- Master of Professional Studies in the field of legislative affairs (p. 1164)
- Master of Professional Studies in the field of political management (p. 1167)
- Master of Professional Studies in the field of political communication and governance (offered only in Spanish) (p. 1172)
- Master of Professional Studies in the field of strategic public relations (p. 1173)

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office
- Political Management (PMGT) (p. 1736)
- Legislative Affairs (LGAF) (p. 1675)
- Professional Studies Public Relations (PSPR) (p. 1765)

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF LEGISLATIVE AFFAIRS

To survive in Washington's complex political environment, the legislative affairs professional must have a comprehensive understanding of how Congress operates, how decisions are made on Capitol Hill, how to influence those decisions, and how to accomplish specific objectives within the legislative process.

Developed in consultation with government relations experts and legislative specialists, this challenging program delivers the knowledge and skills you need to work more effectively in the national policymaking arena. Learn how Congress and the White House develop public policy and examine the workings of Congress from the perspective of both scholars and practitioners.

The master's degree in legislative affairs offers an 11-course (33-credit-hour) program. Classes meet Monday through Thursday evenings on Capitol Hill at the Hall of the States. The

degree can be completed in less than two years. The three-part curriculum covers the political process and policy analysis in such areas as political leaders and parties, Congressional committees, campaigns and elections, interest groups, public opinion, media and public affairs, national security and foreign affairs, energy and environmental policy, and presidential relations.

Visit the program website (<http://gspm.gwu.edu/legislative-affairs/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 33 credits, including 12 credits in required courses; at least 6 credits in courses in each of two elective areas; either 6 credits in thesis or 6 additional credits in one or both of the two elective areas; and successful completion of a master's comprehensive examination.

Code	Title	Credits
Required		
LGAF 6201	Politics and Public Policy	
LGAF 6202	Legislative Politics	
LGAF 6203	Executive–Legislative Relations	
LGAF 6204	Research Methods for Legislative Affairs Specialists	
Elective areas		
American Political Process		
At least two courses from the following:		
LGAF 6212	Congressional Committees	
LGAF 6217	Budgetary Politics	
LGAF 6218	Judicial Politics	
LGAF 6219	American Presidency	
LGAF 6222	Parties and Elections	
LGAF 6223	Public Opinion and Political Socialization	
LGAF 6224	Interest Group Politics	
LGAF 6228	Media and Congressional Politics	
LGAF 6233	Comparative Legislatures	
LGAF 6234	PACs and Congress	
LGAF 6235	Ethics and Congress	

LGAF 6241	Legislative Writing and Research
LGAF 6242	Legislative Drafting
LGAF 6243	Advanced Legislative Procedure
LGAF 6244	Running for and Serving in the U.S. Congress
LGAF 6247	Managing a Congressional Office

Public Policy Analysis

At least two courses from the following:

LGAF 6246	Congress and Foreign Policy
LGAF 6248	Religion and Politics
LGAF 6249	Congress and National Security Policy
LGAF 6251	Budgetary Policy
LGAF 6260	Special Topics: Domestic Policy
LGAF 6261	Congress and Defense Policy
LGAF 6262	Congress and Intelligence Policy
LGAF 6263	Congress and Cybersecurity Policy
LGAF 6264	U.S. Energy and Environmental Policy
LGAF 6266	Congress and Trade Policy
LGAF 6267	Congress and Healthcare Policy
LGAF 6270	Special Topics: Congress and Foreign Policy

Thesis option

LGAF 6299	Thesis
LGAF 6300	Thesis

Three additional credits in one of the elective areas, above.

Non-thesis option

Nine additional credits in one or both of the elective areas, above.

*With prior approval of the academic advisor, students may take up to three of the required number of elective courses in related disciplines.

Successful completion of a master's comprehensive examination is required.

See CPS regulations for additional information regarding enrollment status and time limits.

FACULTY

Director C. Burgat

Associate Professors S. Billet, S. Wiley

Professorial Lecturers R. Carr, G. Fisher, R. Whitlock

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

LGAF 5099. Variable Topics. 1-99 Credits.

LGAF 6201. Politics and Public Policy. 3 Credits.

Examination of political processes that influence policy formulation, policy implementation, and the uses of policy analysis. Topics include political and policy decision making, actors, and process.

LGAF 6202. Legislative Politics. 3 Credits.

Theory, structure, and process of the U.S. Congress, with emphasis on member-constituency relations, individual and collective decision making, party and committee activities, executive-legislative relations, and interest-group activities.

LGAF 6203. Executive-Legislative Relations. 3 Credits.

Political and institutional relationships between the executive and legislative branches of the federal government.

LGAF 6204. Research Methods for Legislative Affairs Specialists. 3 Credits.

Approaches to political analysis. Construction of research designs and problems of measurement.

LGAF 6212. Congressional Committees. 3 Credits.

Overview of the history, function, and influence of Senate and House committees in the U.S. Congress.

LGAF 6217. Budgetary Politics. 3 Credits.

Examination of federal budget policymaking and politics.

LGAF 6218. Judicial Politics. 3 Credits.

Role of the judiciary in policy formulation; emphasis on Congress and the Supreme Court.

LGAF 6219. American Presidency. 3 Credits.

Personalized and institutionalized aspects of the presidency, with emphasis on the politics of contemporary policymaking.

LGAF 6221. Executive Branch Decision Making. 3 Credits.

.

LGAF 6222. Parties and Elections. 3 Credits.

Nature and functions of American political parties: organizational status, nominating and electoral politics, and role in governing.

LGAF 6223. Public Opinion and Political Socialization. 3 Credits.

Sources and dynamics of public opinion and political socialization.

LGAF 6224. Interest Group Politics. 3 Credits.

Theory, structure, and activities of interest groups in American politics.

LGAF 6228. Media and Congressional Politics. 3 Credits.

Role of the media in American politics, with emphasis on news coverage, political debates, and political advertising, with their impact on the electorate.

LGAF 6233. Comparative Legislatures. 3 Credits.

Selected problems of legislative theory and behavior from a comparative perspective, with particular reference to the parliamentary systems of Germany, France, and Britain.

LGAF 6234. PACs and Congress. 3 Credits.

Examination of the structure and function of political action committees in the United States in the context of wider arenas of campaign finance, elections, and issue management.

LGAF 6235. Ethics and Congress. 3 Credits.

The role of ethics in the U.S. Congress.

LGAF 6240. Special Topics in Legislative Affairs. 3 Credits.

In-depth coverage of significant theoretical and empirical issues in American politics, including such topics as political behavior, electoral politics, and race and politics.

LGAF 6241. Legislative Writing and Research. 3 Credits.

Using specialized databases and policy journals and communicating research findings to a sophisticated, policy-driven audience.

LGAF 6242. Legislative Drafting. 3 Credits.

Introduction for non-lawyers to the process of legislative drafting in the U.S. Congress.

LGAF 6243. Advanced Legislative Procedure. 3 Credits.

Detailed study of the rules, procedures, traditions, and constitutional underpinnings that govern the work of the U.S. Senate and House of Representatives.

LGAF 6244. Running for and Serving in the U.S. Congress. 3 Credits.

Running for and serving in Congress from a member's perspective.

LGAF 6245. Congressional Committees. 3 Credits.

The lawmaking processes of the U.S. Congress. Focus on the legislative workshops of the House and the Senate. Committees and subcommittees.

LGAF 6246. Congress and Foreign Policy. 3 Credits.

The role of Congress in setting foreign policy.

LGAF 6247. Managing a Congressional Office. 3 Credits.

Practical consideration of the proper structure, organization, and management of a Congressional office.

LGAF 6248. Religion and Politics. 3 Credits.

The influence of religion on politics in the United States.

LGAF 6249. Congress and National Security Policy. 3 Credits.

The role of Congress in setting defense policy.

LGAF 6251. Budgetary Policy. 3 Credits.

Analysis of U.S. monetary and fiscal policy.

LGAF 6260. Special Topics: Domestic Policy. 3 Credits.

Analysis of U.S. policy on selected domestic problems.

LGAF 6261. Congress and Defense Policy. 3 Credits.

The role of Congress in U.S. defense policy.

LGAF 6262. Congress and Intelligence Policy. 3 Credits.

The role of Congress in U.S. intelligence policy.

LGAF 6263. Congress and Cybersecurity Policy. 3 Credits.

The role of Congress in U.S. cybersecurity policy.

LGAF 6264. U.S. Energy and Environmental Policy. 3 Credits.

An overview of energy and environmental policymaking in the United States.

LGAF 6266. Congress and Trade Policy. 3 Credits.

The role of Congress in setting U.S. trade policy.

LGAF 6267. Congress and Healthcare Policy. 3 Credits.

The role of Congress in U.S. healthcare policy.

LGAF 6270. Special Topics: Congress and Foreign Policy. 3 Credits.

Analysis of U.S. policy on selected issues, challenges, or world regions.

LGAF 6290. Independent Study. 1-3 Credits.

Directed readings in a topic related to Congress and public policymaking. Limited to Legislative Affairs degree candidates. Written permission of program director required.

LGAF 6299. Thesis. 3 Credits.

LGAF 6300. Thesis. 3 Credits.

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF POLITICAL MANAGEMENT

Director T. Belt

The master's degree in political management prepares students to influence the political process, be successful, and make a positive difference in their communities, whether they wish to work in the local, state, national, or international arena. The program's 36-credit curriculum helps aspiring political professionals to take their place in the emerging profession of politics. Students gain hands-on professional experience and

learn the strategy, tactics, and ethical principles they need for success.

The program may be tailored to specific career goals. Focus areas include advocacy politics, electoral politics, and advanced political skills. Classes meet Monday through Thursday evenings on GW's main campus in Foggy Bottom. The degree can be completed in as little as one year; however, students typically take two courses each semester and finish in two years.

Visit the program website (<https://gspm.gwu.edu/political-management/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits, including 12 credits in required courses, 18 credits in elective courses and 6 credits in the thesis, non-thesis, or distance learning option.

Code	Title	Credits
Required		
PMGT 6401	Fundamentals of Political Management	
PMGT 6402	Applied Political Communications	
PMGT 6403	Political Data and Analytics	
PMGT 6404	Principled Political Leadership	
Electives		
Six courses from the following:		
PMGT 6410	Grassroots Engagement	
PMGT 6412	Issues Management	
PMGT 6422	State and Intergovernmental Politics	
PMGT 6430	Campaign Strategy	
PMGT 6432	Managing Campaigns	
PMGT 6434	Running for Office	
PMGT 6436	National Campaign Dynamics	
PMGT 6438	State and Local Campaigns	
PMGT 6440	Targeting and Voter Contact	
PMGT 6442	Campaigns Around the World	
PMGT 6450	Rules, Laws, and Strategy	
PMGT 6452	Digital Strategy	
PMGT 6454	Fundraising and Budgeting	

PMGT 6456	Speechcraft
PMGT 6458	Crisis Management
PMGT 6460	Audience Research
PMGT 6462	Opposition Research
PMGT 6464	Influencing the Media
PMGT 6466	Political Advertising
PMGT 6468	Digital Advertising and Action
PMGT 6470	Digital Content Creation
PMGT 6472	Maximizing Social Media
PMGT 6474	Stereotypes and Political Strategy
PMGT 6476	Political Consulting
PMGT 6490	Special Topics
PMGT 6496	Independent Study
PMGT 6497	Graduate Internship

Non-thesis option

Students who select the non-thesis option take the capstone course, PMGT 6495, and one additional elective in either their penultimate or final semester.

PMGT 6495	Political Power and Practice
-----------	------------------------------

Thesis option

Students who select the thesis option take PMGT 6498 and PMGT 6499 over the course of their final two terms.

PMGT 6498	Thesis I
-----------	----------

PMGT 6499	Thesis II
-----------	-----------

Distance learning

Distance learning students take PMGT 6480 or PMGT 6482 as part of their program of study.

PMGT 6480	Washington Residency
-----------	----------------------

PMGT 6482	Applied Research Project
-----------	--------------------------

- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PMGT 1000. Dean's Seminar. 3 Credits.

PMGT 4101. Electoral and Legislative Processes. 3,4 Credits.

.

PMGT 4107. Practicum in Political Management. 3,4 Credits.

.

PMGT 4187. Professional Internship. 3-4 Credits.

PMGT 4192. Tutorial in American Electoral and Political Movements. 3-4 Credits.

.

PMGT 5099. Variable Topics. 1-99 Credits.

PMGT 6401. Fundamentals of Political Management. 3 Credits.

Main concepts, arenas, developments, roles, and practices in the field of political management. Assess rhetorical situations, write strategy memos, create and critique campaign messages, and engage citizens, professional colleagues and decision-makers. Taken in first semester of program. (Professors M. Cornfield and TBD.).

PMGT 6402. Applied Political Communications. 3 Credits.

Models and methods by which professionals plan, produce, and adjust strategic communication messages in democratic politics. Use a variety of communication forms and media, such as, fact sheets, blog posts, video releases, and public addresses, under typical constraints of time, money, information, reputation, talent, audience attentiveness, and institutional procedure. Students to enroll by their sixth course in the program. Core requirement. Must be completed before a student reaches 18 credits.

PMGT 6403. Political Data and Analytics. 3 Credits.

Introduction to the uses of quantitative data and statistics in politics. Learn to evaluate research designs, statistical associations, causal reasoning, methods for hypothesis testing, multivariate regression analyses, and data analytics. Consume and critique data and statistics for strategic purposes. Students to enroll by their sixth course in the program. Core requirement. Must be completed before a student reaches 18 credits.

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work

PMGT 6404. Principled Political Leadership. 3 Credits.

Theory and practice of ethically grounded political leadership. Consideration of the recurrent dilemmas, philosophical principles, management techniques, codes of conduct, and professional norms in the political management field. Application through self-assessment exercises, case study analysis, and individual and group simulations. Students to enroll by their sixth course in the program. Core requirement. Must be completed before a student reaches 18 credits.

PMGT 6410. Grassroots Engagement. 3 Credits.

Strategies and techniques to build advocacy support among and across general civic populations. Identification of potential supporters through database targeting and individual outreach. Motivation and training of interested supporters for grassroots action in campaigns, at public forums, and before decision-makers. Coalition and protest options; analytics of ongoing efforts. (Professors E. Greffe, S. Gagen).

PMGT 6412. Issues Management. 3 Credits.

Track, influence, and alter politically significant issue-related discourses and policy developments. Legislative, executive, and judicial venues and processes for policymaking; state referendum, initiative, and recall ballot opportunities; organizational structures, including digital procedures, for issue management. (Professors M. Edwards, E. Greffe).

PMGT 6414. Lobbying. 3 Credits.

Survey of and training for lobbying in the U.S. federal system. Students design a detailed lobbying plan for implementation and practice a variety of influence techniques, including those associated with digital media and communications technologies. Legal compliance, organizational and public accountability, professional standards and practices. (Professor J. Hobson).

PMGT 6416. International Lobbying. 3 Credits.

Survey of international lobbying practices, analysis of strategic models and best practices in a variety of different countries and political systems (e.g., EU, China, Brazil, and Turkey). Trends and innovations in lobbying techniques and communications technologies. Investigation and application of appropriate research to improve practice. (Professor TBD by AGE program) (Same as PSAD 6240).

PMGT 6418. Budget Politics. 3 Credits.

Politics of the budget process, including formal and informal mechanisms of appropriating U.S. federal funds. Lobbying strategies and tactics employed by private and public organizations seeking to influence budgetary agenda-setting in the White House; decision-making in Congress; and funding negotiations within and between executive agencies. (Professor M. Edwards).

PMGT 6420. Corporate Public Affairs. 3 Credits.

Exploration of major functional areas in corporate public affairs with a focus on the political and policy dynamics operating in the United States and other democracies. Development and deployment of appropriate strategies, research, and tactics for corporations managing the complexities related to a global economy and shifting political alliances.

PMGT 6422. State and Intergovernmental Politics. 3 Credits.

Examination of the electoral pressures on state and local legislators. Methods and techniques for advocacy in various state capitals. The governing responsibilities of constitutionally-delegated to states and the ever-changing historical relationship between states and the federal government. (Professors C. Shank).

PMGT 6424. Comparative Political Management Environments. 3 Credits.

The operating rules, customs, and processes by which laws are enacted and regulations written in countries around the world; governance systems and the realm of influencers; systems within which legislators, administrators, bureaucracies, and stakeholder's work. Restricted to graduate students. Credit cannot be earned for this course and PSAD 6260.

PMGT 6428. Cultural Aspects of Global Engagement. 3 Credits.

Understanding multicultural communities and diverse institutions, customs, and practices; effective and ethical public engagement on behalf of global organizations; communicating issues and commitments to diverse audiences and the general market; engagement strategies and techniques. Restricted to graduate Students. Same As: PSAD 6250.

PMGT 6430. Campaign Strategy. 3 Credits.

Orientation to the basic systems and technologies that must be created and managed to produce electoral victory. The campaign plan and campaign budget as the foundation for management of campaigns. Focus on development of a campaign plan. (Professor M. Meissner).

PMGT 6432. Managing Campaigns. 3 Credits.

Understanding the role of a campaign manager in staffing and running a campaign, while executing the campaign plan. Candidate handling, fundraising, website and technology, geographic and demographic targeting, field organization, canvassing, get-out-the-vote, press operations, budget control, and liaison with the party and interest groups. (Professors TBD) Prerequisites: PMGT 6430.

PMGT 6434. Running for Office. 3 Credits.

Electoral politics from the perspective of the candidate, strategic and personal factors involved in the decision to run and the consequences of victory or defeat. (Professor R. Fauchaux).

PMGT 6436. National Campaign Dynamics. 3 Credits.

Examination of the historical and systematic patterns in national elections. Differences between presidential and midterm elections; House and Senate contests; party nomination races and general elections; primaries and caucuses; Democratic and Republican party delegate selection rules; causes for "wave" elections; effect of the economy on election outcomes; and standard vice presidential selection models. The political and partisan structural conditions that exist before any of the candidates or the campaigns get involved.

PMGT 6438. State and Local Campaigns. 3 Credits.

Application of campaign strategy and management principles to electoral races at the state and local levels. Staffing, budgeting, and strategic challenges for what are typically lower-visibility contests that involve state and local candidates. Coordinated campaigns and the impact of the national party's reputation on these down-ballot races. (Professor TBD).

PMGT 6440. Targeting and Voter Contact. 3 Credits.

How to find voters for electoral and advocacy campaigns and tailor communications to them. Database analytics, list management, questionnaire design, target weighting, predictive modeling. Review of randomized and natural experiments in light of theoretic principles and findings from public opinion research. Skill development in use of spreadsheets and basic statistical packages. Lab fee. (Professors B. Russell, A. Strauss) Prerequisites: PMGT 6403.

PMGT 6442. Campaigns Around the World. 3 Credits.

Comparative examination of national-level campaigns in democratic countries outside of the United States. Strategies, techniques, and practices used in multi-party and/or parliamentary systems. Professional conduct, consulting rules and norms.

PMGT 6450. Rules, Laws, and Strategy. 3 Credits.

U.S. federal and state laws and regulations governing recognition of political parties and political organizations, campaign finance, political broadcasting and cablecasting, lobbying registration. Ballot access and voter registration. Ethical and strategic considerations (opportunities and constraints; benefits and drawbacks) related to rule construction. (Professor M. Braden).

PMGT 6452. Digital Strategy. 3 Credits.

Development of an integrated digital strategy for use in advocacy and electoral campaigns. Introduction to the theoretical concepts, distinctive technologies, applied skills, and managerial challenges associated with digital campaigning. Search engine optimization, GPS, online payment systems, customizing back- and front-end systems to meet strategic goals and budget parameters, working with IT vendors and distance volunteers, legal and cultural considerations in US and other regimes, site rollout and scaling, security and privacy. (Professor TBD).

PMGT 6454. Fundraising and Budgeting. 3 Credits.

Raising and spending money in political campaigns, referenda contests, issue advocacy, and lobbying efforts. Budgeting process, standard controls to check expenditures, accounting procedures, and general strategies for use in effective fundraising. (Professor N. Bocskor).

PMGT 6456. Speechcraft. 3 Credits.

Analysis and techniques used in speechwriting and presentations for public officials and candidates. Managing the political optics and understanding a speech's visual context and non-verbal communication capabilities (Rose Garden, Oval Office, campaign stump speech, ceremonial occasion, congressional testimony). Modulating speaker style, tone, and pacing, and staging the speech for effect. (Professors D. McGroarty, R. Lehrman).

PMGT 6458. Crisis Management. 3 Credits.

Management of crisis situations and defining moments in electoral, legislative, and public policy campaigns. Exploration of the causes and consequences of political scandals. Professional responsibilities and ethical considerations of crisis management and rapid response decisions. (Professor M. Edwards).

PMGT 6460. Audience Research. 3 Credits.

Processes by which citizens acquire political information and make decisions in politics. Survey research uses in electoral campaigns and issue advocacy. Designing and drawing samples, constructing and pretesting questionnaires, modes of interviewing, financial implications, practical problems in selecting and monitoring polling organizations, and interpretation of data. Focus groups and small-sample interviews; relationship between qualitative and quantitative research; reliability and validity. (Professors R. Johnson, D. Cantor, B. Tringali, M. Ward) Prerequisites: PMGT 6403.

PMGT 6462. Opposition Research. 3 Credits.

Practices and techniques associated with investigative opposition research. Public document and website searches, candidate tracking, and methods for information dissemination. Changes in practice as a result of technological innovations and a changing media environment. Professional responsibilities and ethics expected from opposition researchers.

PMGT 6464. Influencing the Media. 3 Credits.

Organization, practices, and norms of the major media; media coverage of public officials, political campaigns, legislative battles, interest groups, and issues of public policy. Formulation of strategies for getting favorable news coverage for the issue or candidate and for ending a media crisis. (Professor L. Ellenbogen).

PMGT 6466. Political Advertising. 3 Credits.

Strategies and techniques for using the various media (print, radio, television, cable, Internet) in political and advocacy campaigns, with emphasis on the use of television. Impact and uses of paid advertising; development of campaign messages; production, timing, and placement of television advertising; explanation of media markets. Students design print ads and brochures and produce a 30-second television spot. (Professor P. Fenn).

PMGT 6468. Digital Advertising and Action. 3 Credits.

Strategies and techniques for developing and leveraging digital advertising for mobilization. Manage an effective online ad campaign from initial concept to creation and from targeting to measuring the results. Prepare, design, and launch a variety of online ad types, including search, social, display, and video. Analyze success or failure based on analytics and benchmarking. Prerequisite: PMGT 6452.

PMGT 6470. Digital Content Creation. 3 Credits.

Developing and creating effective digital content that promotes campaign narratives and furthers strategic messages. Construct portfolios of original and aggregated digital media content. Skill development in infographics, video, GPS, photo collage, page and site architecture, and texts from 140 characters to blog posts and file attachments. Versioning for different communities, functionalities, and channels including mobile applications. Prerequisite: PMGT 6452.

PMGT 6472. Maximizing Social Media. 3 Credits.

Creating and integrating owned digital platforms and social media assets for political persuasion and action. Cultivation of online political communities, moderating and curating outside-generated content, integration and alignment with campaign message; event, reputation and crisis management. Review of constraints and potentials intrinsic to specific social media sites (e.g. Facebook, Google, LinkedIn, Twitter). Prerequisite: PMGT 6452.

PMGT 6474. Stereotypes and Political Strategy. 3 Credits.

Accounting for psychological constructs, social stereotypes, media framing, and the impression formation process in developing a political strategy. Review of empirical research; investigation of effective techniques or postures for overcoming biases; self-assessment of perceptual assumptions.

PMGT 6476. Political Consulting. 3 Credits.

Management principles, technical procedures, and legal requirements for starting and running a political consulting business. Effective practices for gaining a positive reputation, sustaining profitability across the variable political environment, and engaging on the international front. Start-up funding, mergers and acquisitions, exit strategies. (Professors G. Nordlinger, L. Purpuro, M. Meissner).

PMGT 6478. Strategic Government Consulting. 3 Credits.

How government agencies are organized and funded, how they support national strategies set by the president and Congress, and how expert consultants work with government leaders to operate and organize agencies to adapt to changing requirements and administrations.

PMGT 6480. Washington Residency. 3 Credits.

Capstone experience equivalent to PMGT 6495 for students in the online political management program. Exposure to and interaction with political consultants, advocacy specialists, elected officials, and applied researchers in Washington, DC. Integration of program curriculum toward an understanding of the federal political ecosystem and development of a robust political network. Restricted to PMGT online students in their last or penultimate term, or students with permission of the instructor.

PMGT 6482. Applied Research Project. 3 Credits.

A research option for students in the online Political Management program. Development of a campaign-relevant research report and related communications on behalf of a mock political client. The report describes the status quo of a political situation, analyze the factors and actors sustaining that status quo, identify what and who is potentially moveable in the direction the client seeks to go, and outline practical first steps a campaign can take in that direction. Restricted to PMGT online students in their last or penultimate term in the program.

PMGT 6490. Special Topics. 3 Credits.

Topic to be announced in the Schedule of Classes.

PMGT 6495. Political Power and Practice. 3 Credits.

Capstone seminar that develops and integrates knowledge of political strategies, tactics, and situational considerations, and applies that knowledge to advanced political problems. Topics include: gaining and wielding power, the complexity associated with making democracy work, conflict resolution, negotiation and bargaining skills, grappling with the consequences of winning and losing. Students to enroll during their last or penultimate term. (Professor L. Brown).

PMGT 6496. Independent Study. 3 Credits.

Independent research with a Political Management faculty member. Registration must be approved in advance by the supervising faculty member and the director of the political management program.

PMGT 6497. Graduate Internship. 0 Credits.

Experience at an organization focused on applied politics. Restricted to students in the MPS in political management program.

PMGT 6498. Thesis I. 3 Credits.

Master's degree candidates must apply to the program committee for thesis approval and have completed 24 credits with a 3.3 GPA.

PMGT 6499. Thesis II. 3 Credits.

Master's degree candidates must apply to the program committee for thesis approval and have completed 24 credits with a 3.3 GPA. Prerequisite: PMGT 6498.

PMGT 6501. Politics and Public Policy. 3 Credits.

Examination of political processes that influence policy formulation, policy implementation, and the uses of policy analysis. Topics include political and policy decision making, actors, and process.

PMGT 6502. ConfrontManag&AllianceBldg. 3 Credits.**PMGT 6503. Communication Strategy. 3 Credits.**

Formulation of political communications strategies. Elements necessary to create, introduce, and maintain an effective political profile in issue advocacy campaigns, candidate elections, and legislative advocacy campaigns. Application of principles of research, advertising, and marketing to the political landscape.

PMGT 6504. Political Management and Strategic Governance. 3 Credits.**PMGT 6505. Politica de bases. 3 Credits.**

Use of microtargeting and database-layering technology to identify potential advocates. Motivational techniques to mobilize volunteers for political campaigns, lobbying efforts, and community advocacy. Techniques used by grassroots organizers to help corporations, unions, civic and nonprofit organizations, and special interest groups achieve strategic goals.

PMGT 6506. Practicum. 3 Credits.**PMGT 6507. Democracia y elecciones en LA. 3 Credits.**

This course focuses on the recent history of Latin America, underscoring the struggle to establish and consolidate democracy and the preeminence of elections as the legitimate process to select and replace authorities at the national, regional and local levels. The course provides the student with concepts to understand the different types of democratic settings that exist in the region, that is the coexistence of fairly established and solid democracies, with low intensity democracies, and semi-authoritarian regimes, all of which utilize electoral processes to select public authorities. The main message of this course is that campaign designers need to understand and take a strategic advantage of the political context and the rules governing the political competition in order to obtain the most effective results.

PMGT 6508. Estrategia de campana LA. 3 Credits.

Organization of political campaigns. Strategic decisionmaking. Formulation of political communications strategies. Aspects necessary to introduce and maintain an effective political profile in the electoral campaigns in Latin America, including the specialized forms of communication which political professionals use to win support for their candidates. This course is taught entirely in Spanish.

PMGT 6509. Las encuestas-America Latina. 3 Credits.

The use of survey research in campaigns. Quantitative and qualitative survey research for political management in Latin America. The proper use of polls; methodology and survey design; reviewing poll results; drawing conclusions and recommendations from polls; and the practical problems of administering and interpreting survey data of public opinion in Latin America. PMGT 6509 is taught entirely in Spanish.

PMGT 6510. Organizacion y ejecucion-LA. 3 Credits.

Organizational choices facing campaign management teams in Latin America as they attempt to combine the resources and activities of a modern campaign into a winning effort.

PMGT 6511. Propoganda politica, La campan. 3 Credits.

The strategies, techniques, design and impact of paid political communications directed toward target audiences in Latin America, focusing upon the role of political advertising in a campaign, including radio, direct mail, print and internet, but with specific emphasis on television commercials.

PMGT 6512. Los medios, la politica-LA. 3 Credits.

The role of the media in the politics of Latin America. Who the media are, how they make their decisions, and how they influence outcomes in campaigns and other political situations. Strategic planning in dealing with the media as well as the particular dynamics that surround electronic, print, and the new media. Effective practices of media engagement. This course is taught entirely in Spanish.

PMGT 6513. Comunicacion Politica,Gobernon. 3 Credits.

The course builds upon the Practicum course of the Certificate in Governance and integrates the two processes of politics: campaigning and governing. PMGT 6513 is taught entirely in Spanish.

PMGT 6514. Manejo de Crisis. 3 Credits.

Manejo de Crisis. Management of crisis situations and defining moments in electoral, legislative, and public policy campaigns. Exploration of the causes and consequences of political scandals. Professional responsibilities and ethical considerations of crisis management and rapid response decisions.

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF POLITICAL COMMUNICATION AND GOVERNANCE (OFFERED IN SPANISH ONLY)

Program Director L. R. Matos

Offered entirely in Spanish to closed cohorts of students in Latin America and Spain, the online master's in political communication and governance program trains government officials, party leaders, campaign staff, candidates, CEOs, and NGO leaders to develop a professional approach to secure elective office and govern in a way that embraces values essential to democracy. Classes are taught by sophisticated

and seasoned political hands and government officials. Students learn directly how to win both elections and hearts and minds. Ultimately, with the insight gained in the program, graduates can advance the common good of their nation and embody the highly effective, practical political leadership needed for good governance.

Visit the program website (<https://online.gwu.edu/master-professional-studies-political-communications-governance/>) for additional information.

See CPS regulations (p. 1140) for additional information regarding enrollment status and time limits.

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF STRATEGIC PUBLIC RELATIONS

Director L. Parnell

The master's program in strategic public relations takes advantage of GW's connections in the nation's capital, focusing on the public policy system and the advocacy role played by PR firms and PR operations in corporations and associations in the Washington metropolitan area. The Graduate School of Political Management taps into experts in both the PR and political arenas, helping to prepare program graduates for professional advancement in the field. Focus areas include media and communications theory, ethics and law, new media strategies, evaluating communications programs, crisis communications, media relations, and management skills.

Classes for the 33-credit program meet Monday through Thursday evenings at GW's Alexandria Graduate Education Center.

Visit the program website (<http://gspm.gwu.edu/strategic-public-relations/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits, including 18 to 21 credits in required courses and 9 to 12 credits in elective courses.

Code	Title	Credits
Required		
PSPR 6201	Strategic Public Relations: Principles and Practice	
PSPR 6202	Advanced Writing for Public Relations Professionals (see note below)	
PSPR 6203	Research Methods for Public Relations and Public Affairs Managers	

PSPR 6204	Media Relations in a Digital World
PSPR 6205	Fundamentals of Business and Management for Public Relations and Public Affairs
PSPR 6206	Ethical Standards in Public Relations and Public Affairs
CPS 6300	Capstone Research Project

Electives

9 to 12 credits in elective courses chosen in consultation with the program director.

Note: Students may place out of PSPR 6202 based on review of their transcript and required writing samples. Such students take an additional elective course.

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PSPR 5099. Variable Topics. 1-99 Credits.

PSPR 6201. Strategic Public Relations: Principles and Practice. 3 Credits.

Basic rules and strategies in public relations. Major trends, major firms, and types of business and expertise. Digital media and integrated media communications.

PSPR 6202. Advanced Writing for Public Relations Professionals. 3 Credits.

The essentials of effective public relations and public affairs writing, emphasizing strategic thinking and compositional precision as the source of their efficacy and power.

PSPR 6203. Research Methods for Public Relations and Public Affairs Managers. 3 Credits.

PSPR 6204. Media Relations in a Digital World. 3 Credits.

Media relations from the perspective of public relations and public affairs; the state of contemporary media, both on- and offline, and its impact on commerce, politics, and the social contract; key factors influencing reportorial and editorial coverage of business, government, and nonprofit interests.

PSPR 6205. Fundamentals of Business and Management for Public Relations and Public Affairs. 3 Credits.

PSPR 6206. Ethical Standards in Public Relations and Public Affairs. 3 Credits.

PSPR 6207. Sustainability Communications Methods and Practices. 3 Credits.

PSPR 6208. Integrated Marketing Communications. 3 Credits.

The evolution of integrated marketing communications as a means by which for-profit and nonprofit enterprises extend the reach and influence of public relations and public affairs; traditional and non-traditional communications approaches and technologies. Recommended background: degree candidacy in the MPS in the Field of Strategic Public Relations program and/or graduate status in the School of Business or School of Media and Public Affairs.

PSPR 6210. Special Topics in Public Relations. 3 Credits.

PSPR 6211. Strategy and Practice for Nonprofit and Association Communications. 3 Credits.

This course is designed to help communicators currently working # or hoping to work # in trade associations and nonprofit organizations become more effective in the planning and execution of their programs. By its very nature, this course will be practical and reality#based, with guest speakers drawn from many organizations and communications backgrounds. In the context of this class, effective communications means understanding the goals, environments, structures, constraints, opportunities and challenges facing associations and nonprofit organizations, and developing and implementing communication plans to achieve those goals. Effective also means working within the limitations communicators often face, such as (but by no means limited to): dwindling budgets, divided membership, fragmented boards and hesitant leadership, the decline of traditional news media, the rise of blogs, the surge of social media and more. In short, "effective" means being strategic, proactive, and smart. But while these attributes are necessary, they are not sufficient. Effective communicators must understand the roles communications play - internal as well as external - for their organizations. They must know the organization's stakeholders and understand their "care and feeding." In short, they must understand their institutional roles - and the expectations of their internal and external stakeholders and audiences. Restricted to students in the MPS strategic public relations degree program; permission of the program director may be substituted. Prerequisites: PSPR 6201, PSPR 6202, PSPR 6203, PSPR 6204, PSPR 6205 and PSPR 6206.

PSPR 6221. Consumer Behavior. 3 Credits.

PSPR 6222. Multicultural Marketing. 3 Credits.

PSPR 6223. Public Opinion and Political Socialization. 3 Credits.

The process by which people become engaged in public debates and politics; how they acquire and maintain attitudes, biases, and beliefs, and the decisions they make as a result. Discussion centers on the forces that influence public opinion and political socialization, including the power of the press and its impact on our major institutions. Prerequisites: PSPR 6201 and PSPR 6202.

PSPR 6224. Global Public Relations and Public Affairs: Strategy and Practice. 3 Credits.

How global public relations strategies are developed and implemented to support advocacy efforts; communications theories that enable insight into challenges arising from differences in language, culture, politics, and economics worldwide Credit cannot be earned for this course and PSAD 6270.

PSPR 6225. Nonprofit and Association Communications Strategies. 3 Credits.

How communicators working in trade associations, nonprofit organizations, and labor unions become more effective in the planning and execution of their programs to achieve organizational goals.

PSPR 6226. Digital Communication Platforms and Strategies. 3 Credits.

Theories and approach to digital communications and review of major digital platforms used by companies, government agencies, nonprofits and associations to accomplish strategic communications goals and objectives.

PSPR 6227. Applied Digital Communications for Public Relations and Public Affairs Professionals. 3 Credits.

In-depth and holistic study of digital communications using case studies and collaborative exercises; how to blend creative writing with graphics production, social media management with audience segmentation, and digital advertising channels with analytics.

PSPR 6230. Crisis and Issues Management. 3 Credits.

The intersection of communications and policy disciplines, including environmental scanning, public policy analysis, public policy advocacy, strategic communications, media relations, grassroots mobilization, coalition management and corporate reputation management. How these issues work together to further the broad strategic goals of organizations.

GRADUATE CERTIFICATE IN COMMUNITY ADVOCACY

Program Director T. Belt

The graduate certificate in community advocacy program is designed for public affairs and advocacy professionals interested in updating their digital communications and

grassroots organizing skills. Students in the program learn to understand and employ grassroots techniques to mobilize citizens to seek policy outcomes at the state and local levels. They also learn how to generate digital content and create social media campaigns on behalf of their professional affiliation or organization.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits in required courses.

Code	Title	Credits
Required		
PMGT 6402	Applied Political Communications	
PMGT 6410	Grassroots Engagement	
PMGT 6470	Digital Content Creation	
PMGT 6472	Maximizing Social Media	

GRADUATE CERTIFICATE IN DIGITAL COMMUNICATIONS

The graduate certificate in digital communications is designed to attract public relations professionals interested in gaining a competitive edge by updating their digital communications skills. Students will learn how to apply the leading digital and social media platforms to the fields of strategic public relations and advocacy.

The program consists of 4 courses (12-credit-hours). Flexible credentials allow students to apply the graduate certificate toward the strategic public relations master's degree. Classes meet Monday through Thursday evenings in GW's Arlington Graduate Education Center.

REQUIREMENTS

The following requirements must be fulfilled: 12 credits in required courses.

Code	Title	Credits
Required		
PSPR 6201	Strategic Public Relations: Principles and Practice	
PSPR 6204	Media Relations in a Digital World	
PSPR 6226	Digital Communication Platforms and Strategies	

PSPR 6227

Applied Digital Communications for
Public Relations and Public Affairs
Professionals

GRADUATE CERTIFICATE IN DIGITAL POLITICS

Since the first serious use of online campaigning by John McCain in 2000, online tools such as web advertising, interactive websites, complex social networking, and virtual fundraising have become central to success in politics, and especially in campaigns. Today, digital tools such as web advertising, microtargeting, online fundraising, and social media are central to success in politics. The the graduate certificate in digital politics teaches professionals how to master the world of online engagement and financial development.

The 18 credits earned for the certificate can be counted toward the master of professional studies in political management degree (p. 1167).

Visit the program website (<https://gspm.gwu.edu/digital-politics/>) for additional information

REQUIREMENTS

The following requirements must be fulfilled: 18 credits, including 9 credits in required courses and 9 credits in elective courses

Code	Title	Credits
Required		
PMGT 6402	Applied Political Communications	
PMGT 6403	Political Data and Analytics	
PMGT 6452	Digital Strategy	
Electives		
9 credits from the following:		
PMGT 6440	Targeting and Voter Contact	
PMGT 6468	Digital Advertising and Action	
PMGT 6470	Digital Content Creation	
PMGT 6472	Maximizing Social Media	

Visit the program website (<https://gspm.gwu.edu/digital-politics/>) for additional information.

GRADUATE CERTIFICATE IN GLOBAL PUBLIC RELATIONS

The Graduate Certificate in Global Public Relations prepares students with the strategic and tactical skills needed to excel in the challenging profession of global public relations.

Visit the program website (<https://gspm.gwu.edu/global-public-relations/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses; or, with the advisor's approval, 12 credits in required courses and one 3-credit elective.

Code	Title	Credits
Required		
PMGT 6402	Applied Political Communications	
PMGT 6403	Political Data and Analytics	
PSPR 6204	Media Relations in a Digital World	
PSAD 6270	International Public Relations and Global Advocacy	
PSAD 6200	Global Perspective Residencies	
Electives		
In lieu of one required course, students may take, with the program director's approval, a 3-credit elective selected from the curricula of the graduate certificate in strategic public relations, legislative affairs, or political management programs or from another GW school or college.		

GRADUATE CERTIFICATE IN PACS AND POLITICAL MANAGEMENT

The challenges of coordinated political action and campaign finance uncertainty make it more important than ever that professionally trained and savvy leaders manage political action committees. The graduate certificate program in PACs and political management is designed to give professional PAC managers the fundamental skill set to effectively run their organization's political action committee and successfully tackle the daunting realities of political finance and action. The graduate certificate in PACs and political management's five-course curriculum provides the kind of flexibility today's political professionals want most - the ability to tailor course work to suit their particular goals while addressing their organization's needs.

The program was developed in close consultation with leading experts in the PAC, political action, and campaign finance arenas. The resulting certificate work addresses the gamut of

skills and knowledge necessary for successful PAC operation, from issue advocacy to solicitation, from fundraising to grassroots campaigns, from budgeting to candidate selection. Like the other certificate programs offered by the Graduate School of Political Management, any student who completes the certificate and successfully applies to the master's program can count all 18 credits towards the political management or legislative affairs master's degree.

Visit the program website (<https://gspm.gwu.edu/pacs-and-political-management/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 15 credits, including 3 credits in a required course and 12 credits in elective courses.

Code	Title	Credits
Required		
LGAF 6234	PACs and Congress	
Electives		
Two political management courses selected from the following:		
PMGT 6410	Grassroots Engagement	
PMGT 6412	Issues Management	
PMGT 6450	Rules, Laws, and Strategy	
PMGT 6454	Fundraising and Budgeting	
PMGT 6472	Maximizing Social Media	
Two legislative affairs courses selected from the following:		
LGAF 6202	Legislative Politics	
LGAF 6222	Parties and Elections	
LGAF 6224	Interest Group Politics	
LGAF 6260	Special Topics: Domestic Policy	

See CPS regulations (p. 1140) for additional information regarding enrollment status and time limits.

GRADUATE CERTIFICATE IN PUBLIC RELATIONS

The Public Relations Graduate Certificate program takes advantage of GW's connections in the nation's capitol, focusing on the public policy system and the advocacy role played by PR firms and PR operations in corporations and associations in the Washington metropolitan area. The Graduate School of Political Management taps into experts in both the PR and

political arenas. Plus, you'll graduate prepared for professional advancement in the field.

The Graduate Certificate in Public Relations consists of 6 courses (18-credit-hours). Flexible credentials allow you to apply the graduate certificate toward the Strategic Public Relations Master's Degree. Classes meet Monday through Thursday evenings in GW's Alexandria Graduate Education Center. Focus areas include Media & Communications Theory, Ethics & Law, New Media Strategies, Evaluating Communications Programs, Crisis Communications, Media Relations, Management Skills. MILKEN INSTITUTE SCHOOL OF PUBLIC HEALTH

Dean L.R. Goldman

Senior Associate Dean A. Hyder, J.H. Thorpe

Associate Deans L.C. Abrams, G.M. Gray, E.A. Migliaccio

Assistant Deans H. Renault, M. Partsch, S. Wilensky

Executive Deans S. DiLorenzo

Executive Associate Dean N. Kazeem

The Milken Institute School of Public Health (GWSPH) was formally established on July 1, 1997, as the first school of public health in Washington, DC. Located on the Foggy Bottom campus of the George Washington University, it remains the only public health school in the nation's capital. When the GWSPH opened its doors, it brought together a number of academic programs from across the University, including the signature master of public health (MPH) degree, which was then offered in the School of Medicine and Health Sciences. The founding of the GWSPH was an opportunity to integrate these disparate public health programs and build a preeminent school whose purpose is to educate future public health leaders and practitioners. The vigor and enthusiasm that created the vision for the school has been rekindled as the institution solidifies its place as a world-renowned hub for science, learning, research, community engagement, and applied practice.

GWSPH faculty and students are tackling some of public health's biggest problems through groundbreaking research. Whether by studying vectors and microbiomes to prevent infectious outbreaks and antimicrobial resistance in state-of-the-science laboratories and genomic core, or by working with government and community partners to end the HIV epidemic in the District of Columbia, or by using big data and environmental surveillance to study the impact of climate change, GWSPH is changing the world through the research it does, the students it educates, and the practice and policies it transforms.

GWSPH enrolls more than 2,000 students, who come from nearly every U.S. state and many other nations to pursue undergraduate, graduate, and doctoral-level degrees in public health. Seven departments form the school: Biostatistics and Bioinformatics, Environmental and Occupational Health, Epidemiology, Exercise and Nutrition Sciences, Global Health, Health Policy and Management, and Prevention and Community Health.

Mission

GWSPH advances population health, well-being, and social justice locally, nationally, and globally by:

- Applying public health knowledge to enhance policy, practice, and management;
- Conducting rigorous, basic, applied, and translational research; and,
- Educating the next generation of public health leaders, policymakers, practitioners, scientists, advocates, and managers.

Vision

Healthier and safer communities powered by public health.

Values

GWSPH shares the following core values:

- Achieving excellence in all endeavors;
- Promoting a culture of service that respects the contributions of all members of its community;
- Embracing social justice and diversity as we work to realize health equity for all individuals and communities, however they are identified;
- Aspiring to innovative, ethical and evidence-based policy, research, practice, management, and pedagogy; and
- Engaging in sustainable practices that promote healthy environments

Accreditation

The public health programs of the Milken Institute School of Public Health (GWSPH) are fully accredited by the Council on Education for Public Health (CEPH). In 2016, GWSPH was awarded a seven-year accreditation through July 1, 2023. The program in health administration is fully accredited by the Commission on Accreditation of Healthcare Management Education (CAHME). GWSPH is a member of the Association of Schools and Programs of Public Health (ASPPH).

REGULATIONS

Undergraduate Regulations

Graduation Requirements

Depending on the Milken Institute SPH degree program, students must complete 120 to 124 credits to earn their degrees. Students in the BS in exercise science and nutrition science degree programs must have a minimum cumulative GPA of 2.5 in courses in the exercise science or nutrition science core respectively; those in the BS in public health program must have a minimum overall cumulative GPA of 2.5. The University General Education Requirements are listed under each program's requirements tab in this Bulletin.

While degrees are awarded at the end of each semester, formal commencement ceremonies occur only in May. Students are eligible to graduate only after they have completed all degree requirements and have no financial obligations to the University. Students may include degree designations (BS, MS,

MPH, MHA, DrPh, or PhD) after their name only when they have completed all degree requirements.

Enrollment Status

Once entered in an undergraduate degree program, students are expected to be registered continuously during all fall and spring semesters and to be engaged actively in fulfilling the requirements for their degree.

- During the summer session, students do not have to be enrolled unless they are graduating during the summer; in this case, they should register for Continuous Enrollment.
- Some additional activities, such as study abroad programs, qualify as continuous enrollment.

Degree students who need to interrupt active pursuit of the degree may petition to take a leave of absence for a period of no more than one calendar year during their program. Students who discontinue active enrollment in degree studies without being granted a leave of absence, or students who are granted a leave but do not return to active study at the close of the period of approved absence, are no longer in status and must apply for readmission and be subject to the regulations and program requirements then in effect. Readmission to any program is a competitive process and not guaranteed.

Advising

Students are responsible for building a support system to help ensure their own academic success. Each student is assigned an professional academic advisor who may assist not only with academic counseling, but also in areas ranging from understanding University requirements to finding campus resources to help individual students connect with the GW the community. Faculty mentors, tutors, and/or counselors also should be part of the support system. The Center for Career Services and The Writing Center offer walk-in and by-appointment assistance. Personal counseling and other individualized services are available through Mental Health Services, Disability Support Services, Multicultural Student Services Center, and International Services Office.

Milken Institute SPH students may pursue a double major, either within the Milken Institute SPH or across the University.

Students in the exercise science and nutrition science majors who earn a grade of *D+* or below in the first course of a sequence (such as EXNS 1110 or EXNS 2111) **may not** take the second course in the sequence in the following semester. Students must earn a C- or above in the first course before taking the second course in the sequence. Please see your advisor for more information.

Timely Progress Toward the Degree

Students who fail to make adequate and timely progress toward the degree, through repeated leaves of absence or repeated failure to complete an appropriate number of credits per semester, may be dismissed from the University (see Right to Dismiss Students under University Regulations). Students

dismissed on these grounds may apply for readmission after supplying sufficient evidence of academic promise. Additionally, students must attain grades no lower than C- in required major field courses. If a student receives a grade of *D+*, *D*, or *D-* in a course specifically required for the major, the student is required to repeat the course until a satisfactory grade (C- or above) is earned. For the BS in public health program, this requirement applies to all courses that apply to the major, including required courses, pre-requisites for required courses, and elective coursework. Once the student has completed the course with a satisfactory grade, credits earned the first time the course was taken count toward the minimum number of credits required for the major. Credits earned toward the repetition do not count toward the degree.

Incompletes

Conditions under which the symbol *I*, Incomplete, may be assigned are described under **University Regulations**. In the Milken Institute SPH, the conditions for granting a notation of *I* must be documented in a **written contract** between the faculty member and the student, to be submitted prior to the last day of the term. The incomplete work must be completed as specified in the contract but no later than six months from the end of the semester in which the course was taken. If work for the course is not completed within the designated time, the grade is converted automatically to a grade of *F*. In cases of well-documented extenuating circumstances, an instructor and a student may jointly petition the dean for additional time in which to complete the work of the course.

Pass/No Pass Option

Junior or senior students in good standing may, with the permission of the instructor and program director, take one course each semester for a grade of *P*, Pass, or *NP*, No Pass. No student is allowed to take more than a total of four courses on a *P/NP* basis under this regulation. Students may, however, also receive grades of *P/NP* in courses that are graded only on that basis. Courses required for the University General Education Requirement or in the student's major or minor field (including those courses required for the major that are offered by other departments) may not be taken on the *P/NP* basis. A transfer student may not choose this option until the second semester of enrollment in the University. Under no circumstances may a student change from *P/NP* status to graded status, or vice versa, after the end of the eighth week of class. The Milken Institute SPH and the University do not allow LSPA courses to be counted toward the degree.

Academic Workload

To encourage academic performance of high quality, the Milken Institute SPH limits the number of credits an undergraduate student may register for in a given semester to 17. However, after freshman year, students who wish to request approval for a course overload may do so. Requests are reviewed based on prior academic performance. Students must be in good academic standing and have no pending incomplete grades, or grades of *F*, *W*, or *Z* from the previous

semester. Permission to take a workload of 18+ credits requires the written approval of the faculty advisor. Permission to take a workload of 18+ credits may be granted for full-time students who, during the immediately preceding semester, have received no grades below B- and have earned grades of A or A- in three courses totaling at least 9 credits with the written approval of a dean. Undergraduates taking more than 18 credits per semester are charged at the rate of 1 credit for each credit exceeding that limit.

Applying for Readmission to a Program

Undergraduate students who previously were registered in a SPH program but who did not register during the immediately preceding semester (summer sessions excluded) are out of status and must apply for readmission by completing an admissions petition. Filing the petition does not guarantee that the student will be readmitted. Milken Institute SPH departments are responsible for readmitting students and can do so only if the student is not in violation of other Milken Institute SPH or University policies. Students who have attended one or more academic institutions while absent from this University must have complete, official transcripts from each institution sent directly to the Milken Institute SPH Office of Admissions. Applicants for readmission are considered on the basis of policies and program requirements currently in effect and if readmitted, are subject to the policies and program requirements then in effect.

International Students--Less than Full-Time Status

International students on an F-1 or J-1 Visa are responsible for enrolling as a full-time student (minimum 12 credits for undergraduate students) for spring and fall semesters according to U.S. Immigration and Naturalization rules governing registration requirements. In certain circumstances, a reduced workload may be allowed; students should contact the International Services Office (<http://internationalservices.gwu.edu/>) to request approval for this exception.

Special Honors

In addition to meeting the general requirements stated under University Regulations, a candidate for graduation with Special Honors in exercise science and nutrition science must have a minimum GPA of 3.5 in required courses in the major and a minimum overall GPA of 3.25. The candidate must submit an honors paper and give a presentation on the findings. The student is recommended for graduation with special honors only if a committee of at least two faculty members approves the final products. Students interested in pursuing special honors should contact their academic advisor and program director early in the program to ensure that all requirements for special honors are met in a timely manner.

Independent Study Course Requirements

Independent study is designed to provide the student with an opportunity to gain or enhance public health knowledge and to explore an area of interest related to public health research or the delivery and/or administration of health services. Forms and instructions for registration are available online (<http://publichealth.gwu.edu/academics/forms/>). Independent study projects may not be used as a substitute for an available required or elective course and may not cover substantially the same subject matter that is available in a required or elective course.

Preparation for Medical School

A student who plans to apply to medical school fulfills the general requirements of their program. The pre-health advisors in the Columbian College Office of Undergraduate Studies (prehealth@gwu.edu) provide advice about academic preparation for medical school. For admission to most medical schools, the student must earn a bachelor's degree that includes the following coursework: Biology—8 credits of introductory biology, including laboratory. Students who receive credit for AP biology must complete 8 credits of upper-level biology coursework, including laboratory; chemistry—8 credits of general inorganic chemistry, including laboratory; organic Chemistry—8 credits, including laboratory; biochemistry—3 credits; physics—8 credits, including laboratory; and English—6 credits in introductory English composition courses (fulfilled by the University Writing Program). Many medical schools have additional entrance requirements, which may include courses in biochemistry, genetics, and mathematics; even when such courses are not required, they are strongly recommended. With the exception of the specified requirements, applicants are urged to follow their personal interests in developing their course of study.

Preparation for Law School

A broad liberal arts education is the best undergraduate preparation for law school. Students are encouraged to use elective credit to increase the breadth of their program of study. Advice about academic preparation for law school is provided by the pre-law advisor in the Columbian College Office of Undergraduate Studies (<https://advising.columbian.gwu.edu/>).

Other Regulations

Other regulations applicable to undergraduate students of the University can be found under University Regulations (<http://bulletin.gwu.edu/university-regulations/>).

Graduate Regulations

The Milken Institute SPH provides an online Graduate Student Handbook (<https://publichealth.gwu.edu/content/services-students/>), which contains additional updated information on policies, regulations, and other matters of concern to enrolled or admitted students. It is the responsibility of the student to

be aware of the information contained in both this Bulletin and the Handbook. Students should also consult departmental handbooks and guidelines.

Enrollment Status

Once entered in a graduate degree program, students are expected to be registered continuously during all fall and spring semesters and engaged actively in fulfilling the requirements for the degree.

During the summer session, students do not have to be enrolled unless they are graduating during the summer; in this case, they should register for Continuous Enrollment.

- Some additional activities, such as Master's International, qualify as continuous enrollment.

Degree students who need to interrupt active pursuit of the degree may petition to take a Leave of Absence for a period of no more than one calendar year during the their program. Students who discontinue active enrollment in degree studies without being granted a leave of absence, or students who granted a leave but does not return to active study at the close of the period of approved absence, are no longer in status and must apply for readmission and be subject to the regulations and program requirements then in effect. Readmission to any program is a competitive process and not guaranteed.

Advising

Students are responsible for building a support system to help ensure their own academic success. Each student is assigned a faculty advisor who may assist not only with academic counseling, but also in areas ranging from understanding University requirements to finding campus resources to help individual students connect with the GW the community. Other members of the faculty, professional advisors, tutors, and/or counselors also should be part of the support system. The University Career Center (<http://publichealth.gwu.edu/services/career-center/>) and Writing Center (<http://www.gwu.edu/%7Egwriter/>) offer walk-in and by-appointment assistance. Personal counseling is available through the office of the Dean of Student Affairs (<http://students.gwu.edu/>), Mental Health Services (<http://counselingcenter.gwu.edu/>), Disability Support Services (<https://disabilitysupport.gwu.edu/>), the Multicultural Student Services Center (<https://mssc.gwu.edu/>), and the International Services Office (<https://internationalservices.gwu.edu/>).

Academic Standing

Graduate students who are not suspended, on academic probation, or under extended provisional admission status are considered to be in good standing. Maintenance of a minimum GPA of 3.0 is required for the degree. All courses taken for graduate credit after matriculation as a degree candidate—including those the Milken Institute SPH transferred in from non-degree status, but excluding those audited or taken for the grade of *CR/NC*—are used to calculate the GPA.

Transfer Credits

Graduate students may be eligible to transfer up to 12 graduate credits from an accredited university if they have not been applied to a previous graduate degree. External credits must have been earned within the last 3 years with a grade of *B* (3.0) or better in each transferred course. SPH graduate certificate students may be eligible to transfer as many credits as meet program requirements—up to 18 credits—to a master's degree. SPH graduate certificate students wishing to transfer to a degree program may apply to do so via the online change of concentration petition after completion of 3 or more courses and a cumulative GPA of 3.0 or above, however only courses earning a *B* or better are eligible to be transferred.

Provisional Admission

Graduate program applicants with credentials that are weaker than expected for graduate study, but who nonetheless show promise of successful graduate work, occasionally are granted provisional admission by the Milken Institute SPH Admissions Committee. While on provisional admission status, students are required to see their advisors each semester prior to registration. Provisionally admitted graduate students must demonstrate their ability to maintain a minimum GPA of 3.0 in the first 9 credits of coursework attempted, and during this time are not allowed to receive an Incomplete or a grade lower than a *B*; provisionally admitted students who meet these requirements are granted good standing. Provisionally admitted students who do not meet these requirements are subject to suspension.

Semester Warning

Graduate students whose cumulative GPA is below 3.0 after attempting a minimum of 1 credit and a maximum of 8 credits are issued a warning at the end of the semester and are required to take corrective measures, such as meeting with their academic advisor to outline steps to raise the GPA.

Probation

Graduate students whose cumulative GPA falls below 3.0 at any point after completing 9 credits are placed on probation. This probation extends through the period in which the student next attempts up to 12 credits of work, including prescribed courses. A student's program may be restricted by the program director if deemed necessary. During this period, the student's performance is monitored to determine suitability for continued study. A student who fails to raise the cumulative GPA to 3.0 or above during the period of probation is subject to suspension. Incompletes and grades of *B-* or below are not permitted during the probationary period and are grounds for automatic suspension. A student who is subject to probation for a second time at any point during their degree program may be suspended automatically.

Grade of F

Graduate students who receive a grade of *F* are subject to suspension. If such students wish to remain enrolled, they must

present cause, for consideration by the dean and the director of their degree program, as to why continued study should be permitted. Once a grade of *F* is earned in a core, required, or elective course, it remains a part of the student's permanent record and is calculated into the GPA. A graduate student who receives the grade of *F* in a core or other required course and is permitted to continue in graduate studies must repeat the course and achieve a minimum grade of *B*. The repetition does not, however, expunge the grade of *F*, which remains part of the student's record. If the student receives a grade below *B* in the repeated course, they are suspended from the degree program.

Suspension

Graduate student who receive an *F* or do not meet the conditions of probation are subject to suspension. Suspended students may not register for or complete any courses at The George Washington University. The dean, in consultation with the student's academic advisor, may continue a student on probation (in lieu of suspension) if satisfactory progress is demonstrated during the probationary period, and sufficient evidence of academic promise, by way of a statement of appeal, is offered by the student. A student who is suspended or withdraws under these conditions may apply for readmission after one semester. To be readmitted, the student must submit evidence that suggests the probability of academic success. A student who is readmitted continues on academic probation and must achieve a minimum GPA of 3.5 in the next 12 credits of graduate study. Should the student fail to achieve this GPA, he or she is suspended and will not be readmitted.

Timely Progress Toward the Degree

A graduate student who fails to make adequate and timely progress toward the degree, through repeated leaves of absence or repeated failure to complete an appropriate number of credits per semester, may be suspended. Students suspended on these grounds may apply for readmission after supplying sufficient evidence of academic promise.

Summary of Academic Standing Policies for Graduate Students

- **Provisional Admission**—A student who receives a grade of *I* or of *B-* or below while on provisional admission status is subject to suspension.
- **Semester Warning**—A student with a cumulative GPA below 3.0 (with fewer than 9 credits completed) must take corrective action.
- **Academic Probation**—A student with a cumulative GPA below 3.0 (with 9 or more credits completed) is placed on academic probation. A student on academic probation who receives an unacceptable grade (*B-*, *C*, *F*, *I*, *Z*) or fails to raise the cumulative GPA to 3.0 within the next 12 credits taken is subject to suspension.
- **Grade of *F***—A student who receives a grade of *F* is subject to suspension. If a student wishes to remain enrolled they must present cause as to why continued study should be

permitted. If permitted to continue in graduate studies, the student must repeat the course (if core or required) and achieve a minimum grade of *B*.

- **Suspension**—A student who is suspended may not register for or complete any courses at GW. A student who is suspended or withdraws under these conditions may apply for readmission after one semester.

Incompletes

Incompletes - Conditions under which the symbol *I*, Incomplete, may be assigned are described under University Regulations (<http://bulletin.gwu.edu/university-regulations/>). In the Milken Institute SPH, the conditions for granting a notation of *I* must be documented in a written contract (<https://publichealth.gwu.edu/content/incomplete-course-grade-contract/>) between the faculty member and the student, to be submitted prior to the last day of the term. The incomplete work must be completed as specified in the contract but no later than six months from the end of the semester in which the course was taken. If work for the course is not completed within the designated time, the grade is converted automatically to a grade of *F*. In cases of well-documented extenuating circumstances, an instructor and a student may jointly petition the dean for additional time in which to complete the work of the course.

In Progress (IP)

The notation In Progress (*IPG*) is assigned for all thesis, residency, advanced reading, independent study, culminating experience, practicum, and dissertation research courses until the coursework is completed. Upon the satisfactory completion, the grade replaces the notation *IPG* on the transcript. An *IPG* may not be assigned to regular, semester-length courses.

Applying for Readmission to a Program

Students Who Have Taken Classes Within the Past Year:

Milken Institute SPH graduate degree or certificate students who were previously registered in the university but did not register during the immediate preceding semester/module (excluding summer sessions) are out of status and must apply for readmission by completing an admissions petition. (<http://publichealth.gwu.edu/academics/forms/>)

Students Who Have Not Taken Classes in More Than a Year:

Students who have not taken any courses at GW in more than one year must apply for readmission using SOPHAS Express (<https://sophasexpress.liaisoncas.com>).

Students Who Have Been Suspended:

Students who were suspended from the Milken Institute SPH must apply for readmission through SOPHAS Express (<https://sophasexpress.liaisoncas.com>). Students may only apply for readmission after at least one academic year has passed. Students should consult with the advisor concerning readmission requirements.

International Students---Less than Full-Time Status

International students on an F-1 or J-1 Visa are responsible for enrolling as full-time student (minimum 9 credits for graduate students) for the spring and fall semesters according to the U.S. Immigration and Naturalization rules governing registration requirements. Under certain circumstances, a reduced workload may be allowed. To request approval for a course reduction, students should submit the F-1/J-1 Request for Reduced Course Load Form (<https://internationalservices.gwu.edu/forms-handouts/>). More information is available by calling the ISO at (202) 994-4477.

Independent Study Course Requirements

Independent study is designed to provide students with an opportunity to gain or enhance public health knowledge and to explore an area of interest related to public health research or the delivery and/or administration of health services. Instructions and forms required for registration (<http://publichealth.gwu.edu/academics/forms/>) are available. Independent study projects may not be used as a substitute for an available required or elective course and may not cover substantially the same subject matter that is available in a required or elective course.

Graduation

While degrees are awarded at the end of each semester, formal commencement ceremonies occur only in May. Students are eligible to graduate only after they have completed all degree requirements and have no financial obligations to the University. Students may include degree designation (BS, MS, MPH, MHA, DrPh, or PhD) after their name only when they have completed all degree requirements.

Other Regulations

Other regulations applicable to graduate students of the University can be found under University Regulations. (<http://bulletin.gwu.edu/university-regulations/>)

UNDERGRADUATE

Bachelor's programs

- Bachelor of Science with a major in exercise science (p. 1304)
- Bachelor of Science with a major in exercise science, pre-athletic training/sports medicine concentration (p. 1307)
- Bachelor of Science with a major in exercise science, pre-medical professions concentration (p. 1310)
- Bachelor of Science with a major in exercise science, pre-physical therapy concentration (p. 1313)
- Bachelor of Science with a major in nutrition science (p. 1316)
- Bachelor of Science with a major in nutrition science, pre-medical professions concentration (p. 1319)
- Bachelor of Science with a major in public health (p. 1322)

- Bachelor of Science with a major in public health, pre-medical professions concentration (p. 1324)

Combined program

- Dual Bachelor of Science in nutrition science and Master of Public Health in public health nutrition (p. 1327)
- Dual Bachelor of Science in public health and Master of Public Health

Minors

- Minor in bioinformatics (p. 1327)
- Minor in exercise science (p. 1328)
- Minor in nutrition science
- Minor in public health

MASTER'S

Master of Public Health

- Master of Public Health in the field of biostatistics (p. 1334) (p. 1334)
- Master of Public Health in the field of community oriented primary care (p. 1335)
- Master of Public Health in the field of environmental health science and policy (p. 1336)
- Master of Public Health in the field of epidemiology (p. 1338)
- Master of Public Health in the field of global environmental health (p. 1339)
- Master of Public Health in the field of global health policy (p. 1341)
- Master of Public Health in the field of global health program design, monitoring, and evaluation (p. 1343)
- Master of Public Health in the field of global health epidemiology and disease control (p. 1344)
- Master of Public Health in the field of health policy (p. 1346)
- Master of Public Health in the field of health promotion (p. 1347)
- Master of Public Health in the field of humanitarian health (p. 1349)
- Master of Public Health in the field of maternal and child health (p. 1350)
- Master of Public Health in the field of physical activity in public health (p. 1351)
- Master of Public Health in the field of public health communication and marketing (p. 1353)
- Master of Public Health in the field of public health nutrition (p. 1355)
- Master of Public Health (MPH@GW) (p. 1357)

Master of Science

- Master of Science in the field biostatistics (p. 1358)
- Master of Science in the field of epidemiology (p. 1360)
- Master of Science in the field of exercise science with a concentration in strength and conditioning (p. 1361)
- Master of Science in the field of health and biomedical data (<http://bulletin.gwu.edu/public-health/biostatistics-bioinformatics/ms-health-and-biomedical-data-science/>)
- Master of Science in the field of public health microbiology and emerging infectious diseases (p. 1362)
- Master of Science in the field of management of health informatics and analytics (p. 1364)

Master of Health Administration

- Master of Health Administration (p. 1331)
- Master of Health Administration (MHA@GW) (p. 1333)

Specialist program

- Health Services Administration Specialist (p. 1330)

Combined programs

- Dual Master of Public Health and Doctor of Medicine (p. 1364)
- Dual Master of Public Health and Master of Arts in any Elliott School graduate program (p. 1036)
- Dual Master of Health Administration and graduate certificate in health care corporate compliance (p. 1365)
- Dual Master of Public Health in the field of health policy and graduate certificate in health care corporate compliance (p. 1366)
- Joint Master of Science in Health Sciences in the field of physician assistant and Master of Public Health (p. 1366)
- Joint Master of Public Health or SPH graduate certificate and Juris Doctor or Master of Laws (p. 1374)

DOCTORAL

Doctoral programs

- Doctor of Philosophy in the field biostatistics (p. 1375)
- Doctor of Philosophy in the field of environmental health (p. 1378)
- Doctor of Philosophy in the field of epidemiology (p. 1379)
- Doctor of Philosophy in the field of exercise physiology and applied nutrition (p. 1381)
- Doctor of Philosophy in the field of health policy (p. 1382)
- Doctor of Philosophy in the field of social and behavioral sciences in public health (p. 1383)
- Doctor of Public Health in the field of environmental and occupational health (p. 1384)

- Doctor of Public Health in the field of global health (p. 1386)
- Doctor of Public Health in the field of health behavior (p. 1387)
- Doctor of Public Health in the field of health policy (p. 1388)

CERTIFICATES

Certificate Programs

- Graduate certificate in health administration generalist (p. 1390)
- Graduate certificate in health policy (p. 1391)
- Graduate certificate in public health (p. 1392)

Combined Programs

- Dual Doctor of Medicine and graduate certificate in public health (p. 1393)
- Joint Master of Public Health or SPH graduate certificate and Juris Doctor or Master of Laws (p. 1374)

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

While Public Health (PUBH) courses make up the bulk of Milken Institute School of Public Health (GWSPH) program curricula, the GWSPH offers courses in all of the following designations:

- Exercise and Nutrition Sciences (EXNS) (<https://current.bulletin.gwu.edu/courses/exns/>)
- Health and Wellness (HLWL) (<https://current.bulletin.gwu.edu/courses/hlwl/>)
- Health Services Management and Leadership (HSML) (<https://current.bulletin.gwu.edu/courses/hsml/>)
- Lifestyle, Sports, and Physical Activity (LSPA) (<https://current.bulletin.gwu.edu/courses/lspa/>)
- Public Health (PUBH) (<https://current.bulletin.gwu.edu/courses/pubh/>)

Within PUBH, the number series below indicate the department in which a course is offered:

- PUBH 6000-6099: MPH Core and MPH@GW Program-Specific

- PUBH 6100-6199: Environmental and Occupational Health
- PUBH 6200-6299: Epidemiology
- PUBH 6300-6399: Health Policy
- PUBH 6400-6499: Global Health
- PUBH 6500-6599: Prevention and Community Health
- PUBH 6600-6699: Public Health Nutrition and Miscellaneous
- PUBH 6850-6899: Biostatistics and Bioinformatics
- PUBH 8000-8999: Doctoral-level

DEPARTMENTS

BIostatISTICS AND BIOinformatics

The Department of Biostatistics and Bioinformatics strives to improve public health through excellence in education and teaching in biostatistics and bioinformatics, transformative scientific research, and dedicated service to the university, profession and community. With Department faculty that have received more research funding than any other department at the university, the Department educates the next generation of leaders in biostatistics and bioinformatics by providing opportunities for close interactions with award winning faculty and practical real-world training opportunities in clinical trials, observational studies, diagnostic studies, and bioinformatics and computational biology studies.

UNDERGRADUATE

Undergraduate

- Minor in bioinformatics (p. 1327)

GRADUATE

Master's programs

- Master of Public Health in the field of biostatistics (p. 1334)
- Master of Science in the field biostatistics (p. 1358) (Jointly administered by the Department of Statistics in CCAS and the Department of Epidemiology and Biostatistics in SPH)
- Master of Science in the field of health and biomedical data (<http://bulletin.gwu.edu/public-health/biostatistics-bioinformatics/ms-health-and-biomedical-data-science/>)

Doctoral programs

- Doctor of Philosophy in the field biostatistics (p. 1375) (Jointly administered by the Department of Statistics in CCAS and the Department of Epidemiology and Biostatistics in SPH)

FACULTY

Professors K.A. Crandall, G. Diao, S.R. Evans (*Chair*), T. Hamasaki (*Research*), J.M. Lachin (*Research*), Y. Ma, S.J. Simmens (*Research*), E.A. Thom (*Research*)

Associate Professors I. Bebu (*Research*), K.L. Drews (*Research*), A. Elmi, H.J. Hoffman, M.G. Temporsa (*Research*), N. Younes (*Research*)

Assistant Professors N.M. Butera (*Research*), A. Ciarleglio, A. Ghosh (*Research*), Y. Jiang (*Research*), M. Perez-Losada, G. Rahnavard, D. Uschner (*Research*)

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PUBH 0920. Continuing Research - Master's. 1 Credit.

Continuing Research Credit- Master's Level.

PUBH 0940. Continuing Research - Doctoral. 1 Credit.

Continuing Research Credit- Doctoral.

PUBH 1010. First-Year Experience in Public Health. 1 Credit.

Designed to assist students in the transition to GW and the public health major by introducing skills and resources needed to succeed personally, academically, and professionally, particularly in a public health context.

PUBH 1099. Variable Topics. 1-36 Credits.

PUBH 1101. Introduction to Public Health and Health Services. 3 Credits.

Introduction to aspects of public health and health services, including health services administration and policy, maternal and child health, environmental health, and health promotion.

PUBH 1102. History of Public Health. 3 Credits.

Historical and philosophical development of public health and its contributions to understanding, preventing, and controlling disease and disabilities.

PUBH 1102W. History of Public Health. 3 Credits.

Social history of public health from the late nineteenth century to the present; historical context for contemporary public health problems. Includes a significant engagement in writing as a form critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: UW 1020.

PUBH 1299. Undergraduate Public Health Study Abroad. 1-6 Credits.

May be repeated for credit when multiple courses with distinct subject matter are taken as part of a study abroad program.

PUBH 2110. Public Health Biology. 3 Credits.

Basic scientific mechanisms, concepts, and principles in health and the pathogenesis of diseases; a foundation for applications to public health. Prerequisites: BISC 1005; or BISC 1111.

PUBH 2112. Principles of Health Education and Health Promotion. 3 Credits.

Social and behavioral theories underlying health promotion program development and evaluation. Practical applications in a variety of domestic and global public health settings. PUBH 1101 may be taken as a corequisite. Prerequisite: PUBH 1101.

PUBH 2113. Impact of Culture upon Health. 3 Credits.

Relationships between cultural values and the development of modern health systems based on Western models of health care practice. Reliance upon traditional forms of health care. Examples of successful incorporation of traditional practices into evolving health care systems.

PUBH 2114. Environment, Health, and Development. 3 Credits.

Survey of the relationship between health and development and environmental trends. Topics include deforestation, urban contamination, and desertification.

PUBH 2115. Health, Human Rights, and Displaced Persons. 3 Credits.

Concepts of health as a human right, ethics, and the participation of the international community in moving toward health for all. Civil and international conflict in the generation of displaced populations.

PUBH 2116. Global Delivery of Health Systems. 3 Credits.

Introduction to health systems and the basic concepts of health systems administration and financing and health care reform with examples from advanced, middle income, and poor countries.

PUBH 2117. Service Learning in Public Health. 3 Credits.

A service-learning course that combines classroom instruction with practical learning. Students are responsible for securing an approved service site before the beginning of the semester; the instructor is available to assist with this placement.

PUBH 3115. Global Health and Human Rights. 3 Credits.

Concepts of health as a human right and the impact of ethical violations on the mental and physical health of individuals; the efforts of the international community in addressing health consequences of vulnerable populations.

PUBH 3116. Global Health Systems Performance. 3 Credits.

Introduction to the U.S. and international health systems, both public and private, and the WHO Health Systems Framework; how environmental, ethical, cultural, and political actions shape health systems in different parts of the world. Restricted to juniors and seniors.

PUBH 3130. Health Services Management and Economics. 3 Credits.

Basics of management theory, finance, and economics as applied to managing in the public health and health services field. Prerequisite: ECON 1011.

PUBH 3131. Epidemiology: Measuring Health and Disease. 3 Credits.

Principles of epidemiology applied to disease surveillance, control of infectious and chronic diseases, and health services/health policy. Understanding the basic research designs and their relationship to establishing cause and effect and effectiveness of interventions to prevent and cure disease. Prerequisites: PUBH 1101 and STAT 1127.

PUBH 3132. Health and Environment. 3 Credits.

Introduction to environmental and occupational health and implications for individual and population health. Issues of clean water, environmental toxins, air pollution, and the environmental impact on infectious diseases.

PUBH 3133. Global Health and Development. 3 Credits.

Political, social, and economic determinants of health; how health status is measured with an emphasis on low-income countries, the health of the poor, and inequity and inequality; burden of diseases that impact development and their basic epidemiological characteristics, including who they affect, when they occur, and where risk is greatest.

PUBH 3135W. Health Policy. 3 Credits.

An introduction to the fundamentals of the health care system in the United States and strategies available to policymakers when addressing problems relating to access, financing, and delivery of health care. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: PUBH 1101.

PUBH 3136. Health Law. 3 Credits.

Legal concepts related to individual health care and public health systems in the United States. Health care law, public health law, and bioethics.

PUBH 3137. Global Public Health Nutrition. 3 Credits.

Consideration of hunger and other nutrition issues globally, including food insecurity, under/over nutrition, and micronutrient deficiencies. Application of UNICEF malnutrition framework to describe vulnerable groups, critique program strategies, and identify multisectorial strategies to reduce hunger and malnutrition. Prerequisite: PUBH 3133.

PUBH 3142. Introduction to Biostatistics for Public Health. 3 Credits.

Applying biostatistical principles to analyze studies in health services literature. Selecting statistical methods based on research questions, calculating basic statistics for estimation and inference, interpreting results of statistical analyses.

PUBH 3150. Sustainable Energy and Environmental Health. 3 Credits.

Sustainability issues from the perspective of environmental health. Technical, social, and health implications of specific energy sources. Energy conservation and efficiency in the context of population growth, food and water resources, and maintenance of a healthy environment for future generations.

PUBH 3151. Current Issues in Bioethics. 3 Credits.

General and specific ethical questions and ethical decision making from both personal and organizational perspectives; right to health care, research with human subjects, reproductive technology, genetics, professional and student roles and responsibilities, and end-of-life issues.

PUBH 3151W. Current Issues in Bioethics. 3 Credits.

General and specific ethical questions and ethical decision making from both personal and organizational perspectives; right to health care, research with human subjects, reproductive technology, genetics, professional and student roles and responsibilities, and end-of-life issues. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

PUBH 3152. Qualitative Research Methods in Public Health. 3 Credits.

Introduction to characteristics and methods relevant to the design and conduct of qualitative research in public health investigations; data collection methods, coding, data analysis, and reporting results.

PUBH 3199. Topics in Public Health. 1-5 Credits.

Topics vary by semester. See the Schedule of Classes for more details. May be repeated for credit provided the topic differs.

PUBH 3201. Introduction to Bioinformatics. 3 Credits.

Introduction to bioinformatics, including biological concepts of molecular biology, genome organization, and evolution; computational concepts of alignment, database searching, phylogeny, and structural bioinformatics; and programming concepts in Unix and Python including the Unix environment, the shell, scripting, databases, regular expressions, and pipeline development. Prerequisites: BISC 1112 or BISC 1116 and BISC 1126; and STAT 1127. Credit cannot be earned for this course and BISC 2584, CSCI 3571.

PUBH 3202. Introduction to Genomics. 3 Credits.

Principles of genomics; genome projects, including the human genome, molecular techniques, analytical approaches, computational tools for genome research, and genomic data generation and analysis. Prerequisites: BISC 1111; BISC 1112.

PUBH 3299. Undergraduate Public Health Study Abroad. 1-6 Credits.

May be repeated for credit when multiple courses with distinct subject matter are taken as part of a study abroad program.

PUBH 3995. Undergraduate Research. 1-3 Credits.

Students work under the mentorship of a faculty member to acquire knowledge and skills central to the design, conduct, and/or analysis of scientific research. Project proposal must be approved by the instructor and dean's office prior to enrollment. Credit cannot be earned for this course and EXNS 3995.

PUBH 4140W. Senior Seminar. 3 Credits.

Students develop a public health intervention incorporating various domains of the discipline of public health. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Restricted to public health majors in their senior year. Prerequisite: PUBH 3130.

PUBH 4141. Senior Seminar Community Needs Assessment. 3 Credits.

Culminating experience for students in undergraduate public health programs. Restricted to seniors in the BS in public health program and students in the minor in public health.

PUBH 4199. Independent Study. 3 Credits.

Outline of intended project must be approved prior to registration by instructor and dean's office. Restricted to public health majors.

PUBH 4201. Practical Computing. 3 Credits.

Basic concepts of computer programming in biomedical sciences and health informatics; foundations of R and Python languages; best programming practices in health applications. Prerequisites: BISC 1111 and BISC 1115; or BISC 1112 and BISC 1116.

PUBH 4202. Bioinformatics Algorithms and Data Structures. 3 Credits.

Algorithmic foundations of bioinformatics, ranging from generic algorithmic techniques to specific algorithms used in various areas of bioinformatics. Prerequisite: PUBH 4201.

PUBH 6002. Biostatistical Applications for Public Health. 3 Credits.

Application of biostatistical principles to critical analysis of retrospective studies, prospective studies, and controlled clinical trials, as well as studies in the health services literature. Selection, basic calculations, and interpretation of statistical methods for detection of significant associations and differences.

PUBH 6003. Principles and Practices of Epidemiology. 3 Credits.

General principles, methods, and applications of epidemiology. Outbreak investigations, measures of disease frequency, standardization of disease rates, study design, measures of association, hypothesis testing, bias, effect modification, causal inference, disease screening, and surveillance. Case studies apply these concepts to a variety of infectious, acute, and chronic health conditions affecting the population.

PUBH 6007. Social and Behavioral Approaches to Public Health. 2 Credits.

Social and behavioral science theories, models, and concepts that can be applied to public health problems and interventions. The role of social and community factors, including race, ethnicity, and culture, in both the onset and solution of public health problems; the interrelationship between the social and behavioral sciences.

PUBH 6009. Fundamentals of Public Health Program Evaluation. 2 Credits.

Topics include designing program evaluation studies to produce and interpret evidence to improve public health; options for evaluation study design and evidence generation; and qualitative data collection and analysis methods. Prerequisites: PUBH 6007. Recommended background: Prior completion of PUBH 6002.

PUBH 6010. Independent Study. 1-6 Credits.

Designed to provide the student with an opportunity to gain or enhance public health knowledge and to explore an area of interest related to public health research or the delivery and/or administration of health services. Permission of the instructor or advisor required prior to enrollment.

PUBH 6011. Environmental and Biological Foundations of Public Health. 3 Credits.

The connection between population health and exposures to chemical, physical, and biological agents in the environment; interconnection between dimensions of environmental systems and all living things; biological sciences as they relate to environmental impacts.

PUBH 6012. Fundamentals of Health Policy. 2 Credits.

Comparative study of the structure, financing, and delivery of public health and health care in the United States and abroad; core elements of policy analysis are used to develop skills in analyzing a public health problem and presenting possible solutions both orally and in writing.

PUBH 6013. Master's Thesis. 3 Credits.

See Advisor.

PUBH 6014. Practicum. 1-3 Credits.

This course provides the opportunity for MPH students to apply the knowledge and skills acquired through their programs of study. A planned, supervised and evaluated practice experience that is relevant to the student's program is an essential component of a public health professional degree program. These opportunities can take place in a variety of agencies or organizations. Each program customizes Practicum requirements to meet students' needs. (Credit/No Credit) [For 45-credit MPH students who started Summer 06 or after.].

PUBH 6015. Culminating Experience. 1-3 Credits.

Students synthesize and integrate knowledge acquired in coursework and other learning experiences and apply theory and principles to a situation that approximates some aspect of professional practice. Program faculty evaluate student's mastery of the body of knowledge and ability to demonstrate proficiency in the required competencies. Requirements evaluated are adapted to the degree program.

PUBH 6016. Field/Laboratory Experience. 2 Credits.

The overall purpose of the field/laboratory experience requirement is to introduce students in the MS-PHMEID degree program to a supervised practical experience in a Public Health Laboratory or other qualifying public health entity from the perspective of the actual wet laboratory operations. Students that already have this laboratory experience are introduced to epidemiologic research, particularly surveillance, and its tie-in with laboratories either in the United States or in an international setting.

PUBH 6021. Essentials of Public Health Practice and Leadership I. 1 Credit.

The skills necessary for being an effective practitioner and leader; optimizing self-management and contributions in teams as public health professionals.

PUBH 6022. Essentials of Public Health Practice and Leadership II. 1 Credit.

The development of organizations and systems in public health; organizational management tools and collaborative, outcome-oriented advocacy techniques. PUBH 6021 may be taken as a corequisite. Prerequisite: PUBH 6021.

PUBH 6023. Interprofessional Education Experience. 0 Credits.

Completion of an interprofessional education experience (IPE) is required for all MPH students. Maximizes the student's capacity for collaboration with others to better address public health and health care challenges. A variety of options are available for students to complete this requirement before graduation. Restricted to MPH students. Prerequisites: PUBH 6002, PUBH 6003, PUBH 6007, PUBH 6011, PUBH 6012, and PUBH 6021.

PUBH 6050. Introduction to Health Services Delivery. 2 Credits.

Introduction to the systems that define and shape delivery of health services in the United States. Case studies and presentations on major issues develop an appreciation of dilemmas confronting policymakers, providers, and patients: balancing cost, quality and access. Access and disparity, health care professions, facilities, managed care organizations and government health care programs. Policy changes that have had major impact on American health care in the past century. Fall.

PUBH 6052. Practical Data Management and Analysis for Public Health. 2 Credits.

Practical aspects of dataset creation, data management, rudimentary statistical analysis, and tabular and graphical presentation of results. Creating codebooks, entering and cleaning data, deriving new variables from existing ones, choosing and implementing appropriate analytical techniques, graphing and tabulating results, and documenting and protecting work. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6054. Community Engagement and Advocacy. 2 Credits.

Tools and strategies for public health practitioners to understand, respect, organize, and collaborate with community groups and organizations for promotion of healthy behaviors. Development of practical skills to harness available resources in a community to advocate for healthy living and positive health outcomes.

PUBH 6056. Public Health Leadership Seminar. 1 Credit.

Leadership lessons taken from the careers of a diverse group of executives and entrepreneurs from the corporate, government, nonprofit, and art sectors. Leadership theory and styles. Building networks; skills for effectively engaging with peers, potential employers, and business partners.

PUBH 6058. Researching Violence Against Women and Girls. 2 Credits.

The intersection of violence against women and girls (VAWG) and public health; the impact that violence has on the health of the survivor, her current and future children, and communities; methods and best practices for designing applied research on VAWG. Prerequisites: PUBH 6002, PUBH 6003, PUBH 6007, PUBH 6011 and PUBH 6012.

PUBH 6060. MPH@GW Culminating Experience I. 1 Credit.

Students integrate and apply the skills, knowledge, theories, principles, and methods of public health practice to a public health issue. Most students will have completed PUBH 6014 or PUBH 6022 and other MPH core coursework prior to enrollment. Restricted to students in the MPH@GW program. Prerequisites: PUBH 6002, PUBH 6003, and PUBH 6007; and PUBH 6004 or PUBH 6011; and PUBH 6006 or PUBH 6012; and PUBH 6009 or PUBH 6437.

PUBH 6061. MPH@GW Culminating Experience II. 1 Credit.

Students integrate and apply the skills, knowledge, theories, principles, and methods of public health practice to a public health issue. Students may already have completed PUBH 6060 or it may be taken as a corequisite. Restricted to students in the MPH@GW program. Prerequisites: PUBH 6060.

PUBH 6080. Pathways to Public Health. 0 Credits.

Introduces the 12 foundational public health learning objectives to GWSPH students in non-MPH graduate programs. Must be completed before the last day of classes in the student's first semester of matriculation.

PUBH 6090. Practicum/Culminating Experience. 4 Credits.

Individually tailored. Culminating Experience for the MPH program. Permission of the advisor required prior to enrollment.

PUBH 6091. Special Project. 1-4 Credits.

Under faculty supervision, the student undertakes an original project that applies the skills and knowledge gained in the chosen track and/or concentration within the MPH program. Prerequisite: Permission of the instructor. NOTE that credits vary by program; please consult your program plan to register for the appropriate number of credits. [For 36-credit MPH students only].

PUBH 6099. Topics in Public Health. 3 Credits.

In-depth examination of a particular facet of public health. Topics vary by semester. See the Schedule of Classes for more details. May be repeated for credit provided the topic differs.

PUBH 6121. Environmental and Occupational Epidemiology. 3 Credits.

Demonstration and application of epidemiologic methods for the study of environmental and occupational health problems; epidemiologic exposure assessment methods and methods relevant to cohort, case-control, cross-sectional, and case cross-over studies; survey design and sources and evaluation of biases and confounding; emphasis on written and oral communication skills. Prerequisites: PUBH 6002 and PUBH 6003; and PUBH 6004 or PUBH 6011.

PUBH 6122. Protecting Public Health and the Environment: Policies, Politics, and Programs. 3 Credits.

The legislative, regulatory, judicial, and political system in the United States developed to protect human health and the environment. National and global public and environmental health agencies, policy development, and current topics. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6123. Toxicology: Applications for Public Health Policy. 3 Credits.

Toxicology as both a scientific discipline and a source of information for public health policy with respect to the regulation of foods, pesticides, drugs (pharmaceuticals), environmental chemical pollutants, and other chemicals that may affect human and environmental health. How chemicals interact with biological systems to produce adverse effects. The ways in which toxicologic information is developed and applied to regulatory decision making and the use of toxicology in regulatory risk assessment. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6124. Risk Management and Communication. 3 Credits.

Culminating course using problem-based learning methods to examine a variety of real-world environmental and occupational health issues in-depth. Students integrate cumulative knowledge across all required courses and demonstrate professional competencies. Prerequisites: PUBH 6121, PUBH 6123 and PUBH 6126.

PUBH 6126. Assessment and Control of Environmental Hazards. 3 Credits.

Introduces the anticipation, recognition, assessment, and control of hazards in the workplace and the ambient environment. It emphasizes an understanding of the characteristic features of specific hazards, which may be chemical, biological, or physical/ergonomic.

PUBH 6127. Introduction to Environmental Health Microbiology. 2 Credits.

Basics of public health microbiology as it relates to the environment, food, water, and bioterrorism. Examines from an environmental health perspective how the principles of microbiology are applied to current and emerging public health issues, whether from intentional or unintentional contamination of the environment. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6128. Global Environmental and Occupational Health. 2 Credits.

Examination of the global environmental and occupational health factors that contribute significantly to the global burden of disease, focusing primarily on low- and middle-income countries; principles from behavioral sciences, development economics, risk assessment, and epidemiology are included; potential solutions to environmental health problems, metrics used to measure impacts, and areas for future research. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6130. Sustainable Energy and the Environment. 2 Credits.

The sustainability of various energy strategies, including energy conservation, green building principles, renewable energy, and mitigation and adaption policies for climate change. Emphasis on the life cycle framework. Topics include natural resource depletion, water and energy consumption, and air, water, and solid waste pollutant emissions. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6131. Quantitative Methods in Environmental and Occupational Health. 3 Credits.

Application of biostatistical and epidemiologic concepts and methods to analysis of EOH data. Development and practice of skills needed for analyzing complex exposures and communicating environmental and occupational research findings. Prerequisites: PUBH 6002 and PUBH 6003; and PUBH 6004 or PUBH 6011.

PUBH 6132. Water, Sanitation, and Hygiene (WASH) in Low-Income Countries. 2 Credits.

Introduction to working in both disaster and development settings in countries where contaminated water, inadequate sanitation, and poor hygiene (WASH) cause serious health problems. Students gain practical experience applying WASH methods in the field. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6133. Social Dimensions in Climate Change and Health. 3 Credits.

The drivers of climate change and outcomes with particular focus on health dimensions; obstacles, vulnerabilities, inequality, and adaptation as well as technical and social solutions.

PUBH 6135. Researching Climate Change and Human Health. 3 Credits.

Study of the effects of climate change on human health using evidence compiled by the National Climate Assessment (NCA); widespread impacts, ecological context, oceans of change, infrastructure, water resources, energy, land use, heat, and air quality. Recommended background: PUBH 6003 and PUBH 6004.

PUBH 6136. Introduction to Environmental and Occupational Epidemiology. 3 Credits.

Epidemiologic research designs; methods for the study of environmental and occupational health problems; exposure assessment methods; design aspects of cross-sectional, case-control, cohort, and case cross-over studies; sources and evaluation of biases and confounding; survey and questionnaire design. Prerequisites: PUBH 6002, PUBH 6003 and PUBH 6011.

PUBH 6137. Environmental and Occupational Health Culminating Experience I. 1 Credit.

The first in a two-course sequence. The final, integrative learning experience for the MPH in environmental health science and policy or global environmental health. Students apply the skills and knowledge, theories, and principles learned in the MPH program to practical public health problems. Restricted to MPH students in the Department of Environmental and Occupational Health who have completed all core courses and at least 9 credits in program-specific courses. Prerequisites: PUBH 6002 and PUBH 6003; PUBH 6004 or PUBH 6011; PUBH 6006 or PUBH 6012; and PUBH 6007.

PUBH 6138. Environmental and Occupational Health Culminating Experience II. 1 Credit.

The second in a two-course sequence. The final, integrative learning experience for the MPH in environmental health science and policy or global environmental health. Students apply the skills and knowledge, theories, and principles learned in the MPH program to practical public health problems. Restricted to MPH students in the Department of Environmental and Occupational Health. Prerequisite: PUBH 6137.

PUBH 6140. Global Climate Change and Air Pollution. 2 Credits.

The state of the air in the Anthropocene epoch. Key concepts of atmospheric science, public health, and other societal impacts. Local and global policy frameworks. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6144. Environmental Health Data Development and Modeling. 2 Credits.

Introduction to sources of environmental data, handling and cleaning of data, and using data in both statistical and environmental exposure models. Prerequisites: PUBH 6131 or PUBH 6853.

PUBH 6146. Microbiomes and Microbial Ecology in Public Health. 2 Credits.

Introduction to key concepts of environmental microbial ecology and the human microbiome. The roles of microbes in ecosystems' functions with a focus on climate change and the roles of microbes in human health and disease. Prerequisites: PUBH 6011.

PUBH 6199. Topics in Environmental and Occupational Health. 3 Credits.

Topics vary by semester. May be repeated for credit provided topics differ. Consult the Schedule of Classes for more details.

PUBH 6233. Epidemiologic Principles and Practice of Disease Eradication. 2 Credits.

The role of epidemiology, surveillance, research, and information technology in the eradication of vaccine preventable and parasitic human diseases. Prerequisites: PUBH 6003.

PUBH 6234. Epidemiologic Methods in Neglected Tropical Disease Control. 1 Credit.

Introduction to neglected tropical disease epidemiology providing a broad overview of select tropical medicine and public health issues; focus on applications of epidemiologic methods to the study of public health consequences of NTDs. Prerequisites: PUBH 6003. Corequisites: PUBH 6011.

PUBH 6235. Epidemiology of Obesity. 1 Credit.

Introduction to the epidemiology of obesity; descriptive epidemiology, measurement, consequences, and determinants of obesity; adiposity and body composition; obesity interventions and policy. Prerequisites: PUBH 6003.

PUBH 6236. Systematic Review of Public Health Literature. 1 Credit.

The process of conducting systematic reviews of literature in order to translate research into public health practice recommendations. Recommended for MPH candidates planning to conduct a systematic review of the literature for their culminating experience. Prerequisites: PUBH 6002 or EXNS 6204; and PUBH 6003 or EXNS 6208.

PUBH 6237. Chronic Disease Epidemiology. 2 Credits.

Overview of the epidemiology (descriptive, analytic, and etiologic) of chronic diseases. Emphasis on epidemiologic methods and study design in relation to chronic disease, as well as public health approaches to disease control including surveillance, screening, and interventions. Prerequisites: EXNS 6204 or PUBH 6002; and EXNS 6208 or PUBH 6003.

PUBH 6238. Molecular Epidemiology. 1 Credit.

Concepts, principles, and use of molecular methods in epidemiologic and clinical research. Common molecular measures and their interaction with environmental factors. Development of a framework for interpreting, assessing, and incorporating molecular measures in their area of research. Prerequisites: PUBH 6003.

PUBH 6239. Epidemiology of Foodborne and Waterborne Diseases. 1 Credit.

Foodborne and waterborne toxicants; diseases linked to eating and drinking and their prevention. Topics include transmission of disease and disease processes; microbial toxins, mycotoxins, chemical toxins, bacterial infections (e.g., salmonellosis, shigellosis, vibrio, listeria), virus and parasitic infections; issues in food and water safety. Prerequisites: PUBH 6003.

PUBH 6240. Pediatric HIV/AIDS. 1 Credit.

Comprehensive overview of HIV infection in children, with emphasis on the global pediatric HIV epidemic. Biological, epidemiological, clinical, and psychosocial issues; public health programmatic approaches to prevention, care, and treatment. The national and global experience with scaling up prevention services in the global effort to virtually eliminate HIV/AIDS in children. Prerequisites: PUBH 6003. Recommended background: PUBH 6250 and PUBH 6253.

PUBH 6241. Nutritional Epidemiology. 2 Credits.

Methodological issues related to dietary assessment, nutrition surveillance, and the epidemiology of obesity. Current trends, including the health impacts of vitamin D and sodium. Interpretation of the scientific literature in the field. Examples drawn from the National Health and Nutrition Examination Survey. Prerequisites: PUBH 6003.

PUBH 6242. Clinical Epidemiology and Public Health: Reading the Research. 2 Credits.

Methods for reading epidemiology and public health research including case-control, cohort studies, randomized controlled trials, meta-analysis, testing and screening, prediction rules, decision and cost-effectiveness analysis. Prerequisites: PUBH 6003 or equivalent.

PUBH 6243. Topics in Clinical Epidemiology and Public Health: Reading the Research. 1 Credit.

An evidence-based problem solving applications course utilizing methods taught in PubH 6242 Clinical Epidemiology and Public Health: Reading the Research Prerequisites: PUBH 6003. Credit cannot be earned for this course and PUBH 8242.

PUBH 6244. Cancer Epidemiology. 2 Credits.

Epidemiology of specific cancers, with an emphasis on molecular and genetic epidemiology. Current research in the field. Prerequisites: PUBH 6003.

PUBH 6245. Infectious Disease Epidemiology. 2 Credits.

The role and conduct of laboratory and field investigations in the epidemiology of infectious diseases. Prerequisite: PUBH 6003.

PUBH 6247. Design of Health Studies. 3 Credits.

Epidemiologic concepts and methods applied to specific research questions especially new types of public health problems. Recognition and development of the most appropriate study design for a specific health issue. Ecologic, cross-sectional, case-control, cohort studies and clinical trials. Sampling, measurement, questionnaire design, causality and causal criteria. Development of a research proposal. Prerequisites: PUBH 6003. Corequisites: PUBH 6002.

PUBH 6248. Epidemiology of Aging. 2 Credits.

The demographics, theories, and physiology of aging; descriptive and associative epidemiology of several common age-related diseases and disorders; implications for public health. Prerequisites: PUBH 6003.

PUBH 6250. Epidemiology of HIV/AIDS. 2 Credits.

Methodological issues central to HIV/AIDS research. Biases peculiar to HIV/AIDS epidemiologic studies (both observational and experimental designs). The natural history of HIV, diagnosis, surveillance, vulnerable subpopulations, behavioral facets, and evaluation of epidemiologic studies with an emphasis on methodological considerations. Prerequisites: PUBH 6003. Recommended background: PUBH 6002.

PUBH 6252. Advanced Epidemiology Methods. 3 Credits.

Advanced quantitative epidemiologic methods, with a focus on basic data analytic techniques, identifying and evaluating bias and adjusting for confounding. Dose-response, trend analysis, and multiple linear and logistic regression models. PUBH 6249 may be taken as a corequisite. Prerequisites: PUBH 6002, PUBH 6003, PUBH 6247 and PUBH 6249.

PUBH 6253. Issues in HIV Care and Treatment. 1 Credit.

This course provides an overview and in depth consideration of some of the major issues in treatment of HIV disease, including the assessment of efficacy and effectiveness, drug resistance, monitoring of drug toxicity, special populations, the interrelationship between treatment and prevention, and quality of care. The course has been designed with an interdisciplinary audience in mind. In discussions and assignments, students are able to emphasize their own area of interest and/or expertise (e.g. epidemiology, policy, etc).

PUBH 6255. Organizational Responses to the Local, National, and Global HIV/AIDS Epidemics. 2 Credits.

This seminar focuses on the rapidly evolving responses of local, national and global governmental and non-governmental organizations to the HIV/AIDS epidemic. Inspirational leaders of selected HIV/AIDS organizations are invited to describe how their organizations contribute to fighting the epidemic; the leadership and management skills that they use in their daily work; and their strategic decision-making processes. Basic principles of epidemiology, leadership and organizational strategy and structure are addressed through didactic presentations and interactive faculty-student dialogue. Lessons learned through the lens of HIV/AIDS organizations are broadly applicable to other public health problems. Students learn about the strengths and challenges of different types of public health organizations as they make career decisions about their own transition to the public health work force. Prerequisites: PUBH 6003, HIV/AIDS experience, or permission of the instructor.

PUBH 6258. Advanced Topics in Biostatistical Consulting. 1 Credit.

Principles and practice of biostatistical consulting in public health and medical research environments.

PUBH 6259. Epidemiology Surveillance in Public Health. 2 Credits.

Focus on foundations of public health surveillance systems for communicable as well as chronic diseases. Outbreak investigation methods are included, as well as surveillance data sources, data management, data analysis, ethical issues, surveillance system evaluation, and use of information for prevention. Surveillance systems for reportable diseases, nosocomial infections, bioterrorism events, cancer, environmental disease, vaccine-related adverse events, bovine spongiform encephalopathy, and military personnel are discussed. Prerequisites: PUBH 6003.

PUBH 6260. Advanced Data Analysis for Public Health. 3 Credits.

Advanced data analysis using the SAS System to expand on the analytic techniques gained in PUBH 6002 and PUBH 6249 and to provide students with the applied statistical skills required to analyze various types of public health datasets. Prerequisites: PUBH 6002 and PUBH 6249.

PUBH 6262. Introduction to Geographic Information Systems. 1 Credit.

Geographic information systems (GIS) for mapping and display of health data. The course makes use of ArcGIS 8.3. The use of spatial statistics for the detection of clusters and patterns in the spread of diseases. Working with geodatabases, shape files, layers, query information from attribute tables, geocode addresses and customizing GIS applications.

PUBH 6263. Advanced GIS. 1 Credit.

Provides mid to advanced level training in GIS for display and analysis of health data. Use software ArcGIS 9.3 and additional extensions such as Spatial Analyst and Geostatistical Analyst. Also uses GeoDa software. Emphasizes benefits of using GIS to do more than simply manage and map data. GIS supports a range of spatial analysis functions that enable researchers to extract additional meaning from manipulating geographic data. Learn to work with raster datasets and geodatabases to build spatial models for analyzing health data and evaluating spatial patterns of health events based on notion of distance. Prerequisites: PUBH 6262.

PUBH 6264. Quantitative Methods. 3 Credits.

Introduces basic concepts in mathematical statistics. Topics include probabilities (unconditional and conditional), density and distribution functions of continuous and discrete random variables, including expected values. Specific distribution functions discussed are Binomial, Poisson, Hypergeometric, and Gaussian distributions. Additional topics include bivariable distributions, variance-covariance matrix, limiting theory, asymptotic results, and maximum likelihood estimation. Prerequisites: MATH 1231 and MATH 1232; and PUBH 6002 and 6249.

PUBH 6265. Design of Medical Studies. 3 Credits.

Design of medical investigations, including the randomized clinical trial, observational cohort study, and the retrospective case-control study. Specific methods regarding sample size, power and precision and statistical procedures for randomization and so.

PUBH 6266. Biostatistical Methods. 3 Credits.

Biostatistical methods for asymptotically efficient tests and estimates of relative risks and odds ratios from prospective and retrospective matched and unmatched studies. Fixed and random effects models. Logistic regression, conditional logistic regression. Poisson regression. Maximum likelihood and efficient scores. Prerequisites: STAT 6201, STAT 6202 and PUBH 6264.

PUBH 6267. Time Series Applications in Public Health. 2 Credits.

Introduce basic concepts for the identification and modeling of time series in the time domain approach. Learn a new set of terminology standards and a different way to analyze these type of data and to forecast future values of a time series and its accuracy. Software used is SAS/ETS and 3 procedures: ARIMA, AUTOREG, FORECAST. New mathematical notation is used. Prerequisites: PUBH 6249.

PUBH 6268. Advanced SAS. 1 Credit.

Intensive in advanced programming using SAS. Expand technical skills to provide advanced SAS tools for data management and graphics. Topics to include Interactive Matrix Language (IML), SAS Macro facility language, and drill-down graphs using SAS/GRAPH. Prerequisites: PUBH 6002 and PUBH 6249; or permission of the instructor.

PUBH 6269. Reproductive Epidemiology. 1 Credit.

Current research, controversial issues, and methodological problems in epidemiology of reproductive and perinatal health. Present reproductive health issues such as conception and infertility; perinatal issues such as complications of pregnancy, infections in pregnancy, adverse pregnancy outcomes, and birth defects. Prerequisites: PUBH 6003.

PUBH 6270. HIV/AIDS Surveillance. 1 Credit.

Overview of surveillance methods used domestically and internationally to monitor HIV/AIDS epidemic. Surveillance systems including sentinel, population based, behavioral, and incidence surveillance are presented and discussed. Strengths and weaknesses of these various systems are discussed in addition to how data from these systems impact and inform HIV/AIDS related policies and programs. Prerequisites: PUBH 6003.

PUBH 6271. Disaster Epidemiology. 1 Credit.

Introduction to disaster epidemiology that elucidates the important role epidemiologists play in assessing the health and psychological effects of natural and man-made disasters and in identifying factors that contribute to these effects. Focus on applications of epidemiologic methods to the study of public health consequences of disasters, case studies from actual disasters used to illustrate various roles of epidemiologist in responding to these events and lessons learned. Highlight key skills that epidemiologists need to be part of a response and recovery. Identify methodological issues for future work. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6272. Epidemiology of Infectious Agents Associated with Human Cancer. 1 Credit.

Describes the role of infectious agents in the etiology of human cancer. Emphasis on differences between specific oncogenic viruses. Other oncogenic agents, bacterial and parasitic, are also discussed. Discuss laboratory approaches to the documentation of their pathogenicity, how behavior affects mode of transmission, and which types of data provide strongest support for documenting oncogenic potential for humans. Prerequisites: PUBH 6003.

PUBH 6273. Ethnographic Methods. 1 Credit.

Use ethnographic field methods in conjunction with epidemiological research. Introduction to specific methods used to examine health phenomena and determinants of disease. Learn specific applied skills that can be modified with socio-cultural modifications to evaluate urban sites and other settings. Basic skills in application of ethnographic methods, including recursive observations, participant observations, and variety of approaches to interviewing such as in-depth, structured and non-structured as well as conversational interviewing. Discuss use of multiple approaches in conjunction with ethnography, including focus groups, archival, document, statistical and secondary data analysis, and survey research methods. Course emphasizes use of ethnographic research methods in community-based health settings and evaluates issues in cultural competency and how to garner stakeholder support to conduct epidemiologic studies. Prerequisites: PUBH 6003.

PUBH 6274. Emerging Infectious Diseases for Public Health Professionals. 2 Credits.

Focus on epidemiology of emerging infectious diseases of public health importance, including factors leading to their development, management of emerging infectious diseases from a public health and laboratory standpoint, including biosafety, and strategies for emergency preparedness from a national and international perspective. Emphasis on the context of emerging infectious diseases and strategic approaches to their containment. Prerequisites: PUBH 6003 or MICR 6292; or permission of the instructor.

PUBH 6275. Essential Public Health Laboratory Skills. 2 Credits.

This course provides public health students with practical laboratory experience. Prerequisites: MICR 6239 or permission of the instructor.

PUBH 6276. Public Health Microbiology. 3 Credits.

Gain in-depth understanding of important non-viral pathogens pertinent to public health microbiology. Learn how to isolate and identify pathogens using critical thinking and problem solving skills.

PUBH 6278. Public Health Virology. 3 Credits.

In-depth understanding of viral pathogenesis by focusing on current research, controversial issues, and public health relevance. Survey of family of viruses most relevant to today's public health efforts, concentrating on virus-host interactions and therapeutic strategies.

PUBH 6280. Microbiology and Emerging Infectious Diseases Final Project. 2 Credits.

Focus on the synthesis and summary of data acquired through epidemiologic and/or public health laboratory research. Biosafety training, CITI training, HIPAA training and permission of the instructor are required prior to enrollment. Prerequisites: PUBH 6002, PUBH 6003, PUBH 6292, and PUBH 6245.

PUBH 6281. Analysis of Complex Surveys Using SAS and Stata. 2 Credits.

Appropriate methods to analyze survey data collected using complex sampling methods are discussed and applied to national survey data to address provocative public health research questions. An equivalent Stata course may be substituted for prerequisite 6249. Prerequisites: PUBH 6003 and PUBH 6249.

PUBH 6282. Introduction to R Programming. 1 Credit.

R is an open source software environment for statistical computing and graphics. Data transfer between SAS and R, data manipulation and visualization within R, programming and debugging, R libraries, and graphics theory. Prerequisites: PUBH 6249. Recommended background: Programming experience in a statistical package such as Stata or in high level language such as C, Python, Perl.

PUBH 6299. Topics in Epidemiology. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details.

PUBH 6305. Fundamentals for Health Policy: Public Health and Health Care. 2 Credits.

An overview of public health and health care in the United States as an introduction to the study and analysis of health policy. Presents the governmental framework, institutions, financing streams, workforce, constituencies, and interest groups engaged in the health sector to ensure that students begin their policy analytic training with grounding in the political, economic, and social realities of public health and health care.

PUBH 6310. Statistical Analysis in Health Policy. 3 Credits.

Quantitative and statistical methods of data analysis for health policy and health services research. Instruction in conducting data analyses using Stata statistical and data analysis software and application of acquired skills to health policy and health services research. Practical experience in programming and analysis of various health policy-related questions. Entering and importing data; creating, saving, and merging data sets; creating and modifying variables; labeling variables and values; and conducting analysis ranging from univariate to multivariate analyses, including multiple regression and logistic regression. The use of existing data sets to analyze health policy issues and interpret these analyses for policy purposes. Prerequisite: PUBH 6002.

PUBH 6315. Introduction to Health Policy Analysis. 2 Credits.

Core elements of health policy analysis: problem definition, background, the political, economic, and social landscape; development of policy options and recommendations. Written, graphic, and oral presentation skills associated with policy analysis. Summer, Fall, Spring Prerequisites: PUBH 6012 or PUBH 6305.

PUBH 6320. Advanced Health Policy Analysis. 3 Credits.

Practical applications of basic quantitative tools in health policy. Problem definition; political, social, and economic assessment of a problem; program evaluation and data analysis; development of policy options; and the written and oral presentation of findings and recommendations. Prerequisites: PUBH 6305 or PUBH 6012; and PUBH 6310 and PUBH 6315.

PUBH 6325. Federal Policymaking and Policy Advocacy. 2 Credits.

The federal health policymaking process, including an overview of the legislative, administrative, and judicial processes that affect policymaking; federal budget, authorization, and appropriation processes; common techniques and strategies used to advance legislative and regulatory policies, including coalition building and the use of policy studies and media relations. Prerequisites: PUBH 6012 or PUBH 6305.

PUBH 6330. Health Services and Law. 3 Credits.

Examination of the ways in which the law and legal system in the United States influence and are influenced by the health care system. How judicial, statutory, regulatory, and constitutional sources of law embody health policy and affect access to and quality and financing of health care, as well as the regulation of patient rights.

PUBH 6335. Public Health and Law. 3 Credits.

How the law can both promote public health and conflict with the rights of individuals protected under the U.S. Constitution; legal concepts that underlie the public health system and inform public health policymaking; major areas of public health activity; the future of public health.

PUBH 6340. Health Economics and Finance. 3 Credits.

Examination of economic principles as they apply to health policy in the public and private sectors. The basic framework of economics is used to analyze the behavior of consumers, hospitals, physicians, and insurers, as well as pharmaceutical companies and long-term care providers. Overview of Medicare and Medicaid. Economic analyses of current issues in the marketplace, including rising health spending in the context of the national economy and the federal budget, insurance market dynamics, key issues in the long-term care industry, shifting market forces and power within the health care arena, and new payment initiatives and delivery system models. Prerequisites: PUBH 6352 or an undergraduate economics course.

PUBH 6345. Health Policy Research Design. 2 Credits.**PUBH 6350. Health Policy Capstone. 2 Credits.**

Required for MPH graduate students in the health policy concentration in the final semester before graduation. Students synthesize and integrate knowledge across multiple public health disciplines; apply theories, principles, and skills in ways that approximate professional practice in the field of health policy; and demonstrate mastery of the required knowledge and competencies addressed in the curriculum. Prerequisites: PUBH 6012 or PUBH 6305; and PUBH 6320.

PUBH 6352. Basics of Economics for Health Policy. 1 Credit.

An introduction to modern microeconomics -- the study of how consumers, firms, industries, and the public sector make decisions and allocate their resources in the economy. The principles of supply and demand and elasticity in both the private and public sectors are analyzed.

PUBH 6353. Child Health Advocacy. 1 Credit.

Introduction to child health advocacy. Affordable Care Act (ACA), preventive care, school health, environmental issues, and emergency care. The use of data for advocacy.

PUBH 6354. Mental Health/Substance Abuse Policy. 2 Credits.

Provides an overview of the U.S. mental health and substance abuse delivery system, its components, and the policy challenges created by the organization of this system. Considers the behavioral health care system from the perspective of several main "actors" in the system: patients, providers (primarily doctors and hospitals), health plans, and payers (public and private). Prerequisite: PUBH 6305.

PUBH 6355. Comparative Health Policy. 2 Credits.

Archetypical health care systems, financing, and reform efforts, with emphasis on the trade-offs between efficiency and equity. Comparison of current policy challenges and solutions faced by policymakers in the U.S. and in other countries. Prerequisites: PUBH 6012 and PUBH 6305.

PUBH 6356. State Health Policy. 2 Credits.

Students develop a briefing on health and health care for a new governor and health secretary in order to gain a practical understanding of state health policy and programs. The course is designed to replicate the experience of a newly hired policy staff member learning the requirements for the position in a particular state. Prerequisites: PUBH 6012 or PUBH 6305.

PUBH 6357. Health Economics and Policy: Cost Containment Strategies. 2 Credits.

Health care cost containment in the context of the current implementation of national health reform. Cost containment strategies; economic underpinnings, anticipated impacts, perspectives of and implications for health care providers and systems, and political considerations. Prerequisite: PUBH 6340.

PUBH 6358. Vaccine Policy. 2 Credits.

The development of U.S. vaccine policy and the growth of various markets targeting routine vaccination of all populations; interactions among business, legal, political, public health, medical, federal/state/local government, and consumer communities that combine to influence vaccine delivery in a broad range of settings. Prerequisites: PUBH 6012 or PUBH 6305.

PUBH 6359. Reproductive Health Policy. 1 Credit.

Overview of reproductive health policy at the federal and state levels. Balancing the interests of competing stakeholders; the fundamental underlying role of significant disparities in financing for and access to reproductive health services; and how policymaking can alleviate or exacerbate preexisting issues.

PUBH 6360. Advanced Maternal and Child Health Policy. 1 Credit.

In-depth exploration of maternal and child health policy in the U.S., with a particular emphasis on the role of personal and public health services for women, children, youth and their families in the context of health and human services system change. Prerequisite: PUBH 6561.

PUBH 6361. Health Workforce Policy. 2 Credits.

Strategies for the prevention and control of infectious diseases, focusing on low and middle income countries. Goals, strategies, and challenges of major global health intervention programs. Surveillance systems, vaccination programs, chemotherapy as a prevention and treatment tool, nutritional supplementation, environmental approaches, and potential benefits of integrating multiple interventions. Prerequisites: PUBH 6012 or PUBH 6305.

PUBH 6363. The Health Care Legislative Process. 1 Credit.

How health care legislation is developed in and moves through the U.S. House of Representatives and Senate. The roles of the committees of jurisdiction in each house and how the rules of each house affect legislative outcomes.

PUBH 6364. Federal Budget Process for Health Policy. 1 Credit.

Focuses on how the Congressional budget process shapes the funding and design of federal health care programs, ranging from entitlement programs like Medicare to appropriated programs like community health centers. Discussions cover budget resolutions, appropriations bills, and budget reconciliation legislation, as well as Congressional procedures and committees through which they are considered. Prerequisite: PUBH 6305.

PUBH 6366. Health Care Corporate Compliance. 2 Credits.

The federal laws and regulations that affect U.S. health care industry participants, particularly those relating to the prevention of fraud and abuse, and the role of corporate compliance programs. Prerequisites: HSML 6215 or PUBH 6330.

PUBH 6367. Population Health, Public Health, and Health Reform. 2 Credits.

In-depth assessment of how a reforming health care system can be expected to change the policy landscape for population and public health in the United States; direct changes evolving at the state and local level and national payment and health system reforms. Prerequisites: One of the following: HSML 6202, PUBH 6006, PUBH 6012, or PUBH 6305.

PUBH 6368. Law, Medicine, and Ethics. 3 Credits.

Legal, ethical, and policy issues that arise in the biomedical arena; the definitions of life and death, the nature of personal identity, the requirements of justice, and the boundaries of liberty. Prerequisites: PUBH 6330 or PUBH 6335.

PUBH 6370. Medicare/Medicaid Law and Policy. 2 Credits.

Describes current legal and public policy issues in the Medicare and Medicaid programs, including the legal, operational, financial, and organizational rules for the two programs. Prerequisite: PUBH 6315.

PUBH 6372. Minority Health Policy. 2 Credits.

Introduces students to the concept of health disparities and the implications of disparities for health care practice and policy. Students will learn how disparities are defined and measured, as well as emerging approaches in practice and policy to reducing disparities. Fall. Prerequisite: PUBH 6315.

PUBH 6374. Pharmaceutical Policy. 2 Credits.

Legal and regulatory frameworks related to the demand for and supply / quality of pharmaceutical products. Policies specific to drug development, pricing, reimbursement, use, dissemination of information, and post-marketing surveillance. Prerequisite: PUBH 6315.

PUBH 6376. Primary Health Care Policy. 2 Credits.

Politics and policy behind the provision of primary health care in the United States. The rise of the field of primary care and how it is supported and financed; the role of insurers and government in regulation and oversight in the areas of access, cost, and quality. Prerequisite: PUBH 6315.

PUBH 6378. HIV Policy in the US. 2 Credits.

Examines the policy response to the HIV epidemic in the United States and how the epidemic itself has helped to shape U.S. policy. How and why HIV became a national policy issue; circumstances surrounding the discovery of and early response to HIV; and main policy and programmatic developments and key players over time. The role and implications of the Affordable Care Act for individuals with HIV, the future of the Ryan White HIV/AIDS Program, and the impact of new treatment and prevention strategies on the future course of the epidemic.

PUBH 6380. Bridging Health Policy and Health Information Technology. 2 Credits.

Basics of health care informatics policy and core technological components for health services managers, public health professionals, health policy analysts, and health information technology staff. Policy and legal frameworks, governance and financial issues, technological infrastructure, and business and technological operations. Concepts and roles of information and how information technology can support the health care industry in promoting quality improvement.

PUBH 6382. Community Health Center Policy. 2 Credits.

PUBH 6384. Health Care Quality and Health Policy. 2 Credits.

The role of quality in the U.S. health care delivery system from the perspective of multiple stakeholders, including public and private payers, providers, consumers, and employers. Defining and measuring quality; how quality information is used; and policy implications of quality improvement. Recent changes under health reform legislation. Prerequisites: PUBH 6012 or PUBH 6305.

PUBH 6386. Public Health Preparedness Policy. 2 Credits.

Issues in public health emergency preparedness and response at the nexus of homeland and national security. The relationship between public health and criminal investigation, forensic epidemiology, and surveillance; biodefense; and the role of the scientific community. Infrastructure, threat themes, and associated preparedness and response policy.

PUBH 6390. Prescription Drugs: Policy and Public Health. 3 Credits.

Key policies and public health programs related to each stage of a prescription drug's life cycle; Congressional funding focused on speeding the development and approval of needed drugs, public and private approaches to increase access to prescription drugs, and exceptions to international laws that allow some countries to violate prescription drug patents to improve the health of impoverished citizens.

PUBH 6399. Topics in Health Policy. 3 Credits.

In-depth examination of a particular facet of public health policy. Topics and prerequisites vary.

PUBH 6400. Global Health Frameworks. 2 Credits.

Overview of current issues in global public health with particular emphasis on low and middle-income countries. Serves as both an introductory course for students entering the field of global health, as well as an update on current technical and policy issues for advanced students who may have considerable experience.

PUBH 6410. Global Health Study Design. 1,2 Credit.

Tools necessary for designing and understanding the research that goes into developing good public health programs; basic elements for the planning and design phase of a research project. Prerequisite or corequisite: PUBH 6009 or PUBH 6501. Prerequisite: PUBH 6003.

PUBH 6411. Global Health Qualitative Research Methods. 2 Credits.

An introduction to qualitative data collection and analysis in global health settings. Methodologies include survey design, interviews, focus groups, and participant observation. Archival research and clinical trial research are also addressed. The set of methods most commonly used to collect qualitative data in global health settings. Students are enabled to prepare interview guides, conduct in-depth interviews, and analyze and document the results from a qualitative field project. Prerequisites: PUBH 6002 and PUBH 6410.

PUBH 6412. Global Health Quantitative Research Methods. 3 Credits.

Continuation of the series of global health methods courses. Examination of the fundamental concepts of empirical analysis and qualitative analysis, including open and axial coding, the basis of grounded theory, and regression analysis. Prerequisites: PUBH 6002 and PUBH 6410.

PUBH 6416. Ethical and Cultural Issues in Global Health Research and Programs. 1 Credit.

Examine procedures and concerns for protecting communities and human subjects involved in public health programs and research. Consider cultural considerations integral to ethical conduct of public health research and programming in the global context. Discuss history behind rules and regulations that govern ethical principles around conduct of research involving human subjects. Consider contribution that awareness of cultural contexts where we work makes to ethical nature of our work as global health professionals.

PUBH 6417. Cross-Cultural Approaches for Global Health Practice. 1 Credit.

How to communicate, negotiate, and be more effective across cultures; social aspects that affect communication within cultures and how to navigate communication in practical situations including in the work place and in risk and crisis situations. Corequisite: PUBH 6410. Prerequisite: PUBH 6416.

PUBH 6420. Understanding Commercial Determinants of Health. 1 Credit.

Conceptual understanding and frameworks for commercial determinants of health as key to improving public health.

PUBH 6421. Responsible Conduct of Research. 1 Credit.

Designed to raise awareness of the responsible conduct of research. Strategies for preventing irresponsible research practices, including unacceptable practices and research misconduct.

PUBH 6430. Theories for Global Health Communication Interventions. 2 Credits.

Use of communication theory and methods in health promotion. Integration of multidisciplinary approaches to public health communication. Prerequisites: PUBH 6007 and PUBH 6400.

PUBH 6431. Global Health Communication Strategies and Skills. 3 Credits.

Students conduct qualitative research to evaluate health communication programs, assess readability level and suitability of written health education materials, conduct content analyses, and review/critique current health communication literature. Prerequisites: PUBH 6430 or permission of the instructor; and PUBH 6007.

PUBH 6435. Global Health Program Development and Implementation. 2 Credits.

Basic concepts and principles of program development and implementation including data collection methods, decision making, and problem-solving techniques. Application of program development techniques to specific interventions. Prerequisite: PUBH 6400.

PUBH 6436. Global Health Program Management and Leadership. 2 Credits.

Essential tools for successful project, personnel, and program management. Leadership and management theory; key issues in managing global health programs and projects; leadership and management skills development; use of data in management decision making; and importance of quality, supply chain, and resource management. Restricted to students in the MPH in global health program design, monitoring, and evaluation program. Prerequisites: PUBH 6400 and PUBH 6435.

PUBH 6437. Global Health Program Evaluation. 3 Credits.

Fundamentals of program monitoring and evaluation; developing and using program theory in evaluation; impact evaluation and mixed-methods approaches; qualitative methods and statistical analysis for program evaluation. Prerequisites: PUBH 6002.

PUBH 6440. Global Health Economics and Finance. 2 Credits.

Examination of economics and finance principles as they apply to global health. Organization, delivery, and financing of health care in developing countries. Tools for analyzing issues related to global health economics and finance and application of those tools to a variety of a global health issues, including demand for health care, health care financing, social insurance, pharmaceuticals, and HIV/AIDS. Prerequisite: PUBH 6400.

PUBH 6441. Global Health Organizations and Regulations. 3 Credits.

The functions, capacities, and governance of international health organizations; the normative power of some international health organizations for regulatory processes; and evidence-based development of public health policies with attention to issues of global trade as it shapes worldwide and national health. Prerequisite: PUBH 6400.

PUBH 6442. Comparative Global Health Systems. 2 Credits.

Examination of national health systems, how they differ, and how they are performing. Health systems analyzed through four different lenses: health care organizations, health workforce development, health care financing, and health policy development. Comparison of health systems and health reforms in seven regions of the world and assessment of how health system performance might be improved. Course fee may apply. Prerequisite: PUBH 6400.

PUBH 6443. Global Health Agreements and Conventions. 2 Credits.

Explores the impact of regulations, trade and human rights on health by examining the relevant international declarations, agreements and conventions. This course examines a variety of topics including the impact of international trade agreements on health, the International Health Regulations and other regulations affecting global health, and the relationship between health and human rights. Prerequisite: PUBH 6400.

PUBH 6445. Quantitative Methods for Impact Evaluation. 2 Credits.

Learning to use and produce empirical research in the public health field; review of quantitative techniques and research designs used to uncover causal effects of policies and programs, with applications to public health topics. Prerequisites: PUBH 6002, PUBH 6003 and PUBH 6412.

PUBH 6450. Global Health Diplomacy. 2 Credits.

Introduction to the concept of global health diplomacy; how diplomacy has been used to advance health agendas and how health issues have been used to improve diplomatic relations between countries; formal health, multi-stakeholder health, and informal health diplomacy; comparative study of how different countries have devised health diplomacy strategies.

PUBH 6451. Monitoring/Evaluation of Sexual/Reproductive Health Programs in Low- and Middle- Income Countries. 2 Credits.

Overview of key sexual and reproductive health challenges in low- and middle-income countries; designing and measuring programs to address those challenges. Taught from the perspective of applied researchers working within an organization that implements sexual and reproductive health programs and services. Prerequisites: PUBH 6437, PUBH 6500 and PUBH 6503.

PUBH 6452. Social and Behavior Change Communication in Middle- to Low-Income Countries. 2 Credits.

The ways in which behavior change and sociocultural theories underpin the development of SBCC programs in politically, culturally, and socially diverse settings. Prerequisites: PUBH 6007 and PUBH 6503.

PUBH 6455. Global Vaccinology. 3 Credits.

Concepts, methods, and tools for making new and existing lifesaving vaccines more accessible to individuals in low- and middle- income country settings. Recommended for second-year MPH students. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6461. Ethics and Accountability in Humanitarian Settings. 1 Credit.

Principles and fundamentals of ethical approaches and accountability processes in the delivery of humanitarian services and possible solutions and interventions to address them. PUBH 6480 may be taken as a corequisite. Prerequisite: PUBH 6480.

PUBH 6462. Nutrition and Food in Large Humanitarian Emergencies. 1 Credit.

Fundamentals of food aid programs and nutritional issues in emergency humanitarian situations and appropriate local and international responses in lower-income countries. Field-based program responses in international, resource-scarce settings, as conducted by NGOs and UN agencies. PUBH 6480 may be taken as a corequisite. Prerequisite: PUBH 6480.

PUBH 6463. Communication Strategies and Planning in Humanitarian Settings. 2 Credits.

Principles of and major challenges in communication planning with wide range of stakeholders in humanitarian settings; solutions and interventions to identify related risks and appropriately respond to and effectively plan communication strategies. PUBH 6480 may be taken as a corequisite. Prerequisites: PUBH 6007 and PUBH 6480.

PUBH 6464. Mental Health in Humanitarian Settings. 1 Credit.

Principles of and fundamental challenges to mental health in humanitarian settings, including potential solutions and interventions; foundational knowledge and skills in mental health and psychosocial support services in such settings. PUBH 6480 may be taken as a corequisite. Restricted to PUBH 6480.

PUBH 6465. Reproductive Health and Gender-Based Violence in Humanitarian Settings. 1 Credit.

Key issues, challenges, policies, and interventions related to sexual and reproductive health and gender-based violence in humanitarian settings for persons affected by armed conflict and natural disasters. PUBH 6480 may be taken as a corequisite. Prerequisite: PUBH 6480.

PUBH 6469. Humanitarian Aid Seminar Series. 1 Credit.

Targeted talks and panel discussions with humanitarian aid workers from a variety of agencies addressing important or controversial contemporary topics in humanitarian settings. Corequisite or prerequisite: PUBH 6480.

PUBH 6480. Public Health in Humanitarian Settings. 2 Credits.

Technical aspects of high-priority public health interventions; consideration of how and why sound public health interventions should be implemented in both emergency and chronic humanitarian settings; the roles of diverse humanitarian actors.

PUBH 6481. Global Mental Health. 2 Credits.

Focus on global mental health knowledge and public health policy implementation skills regarding the integration of mental health, public health, and primary care in diverse health systems and challenging cultural contexts. Prerequisite: PUBH 6400.

PUBH 6482. International Food and Nutrition Policy. 2 Credits.

Major global food and nutrition issues, their determinants, and the strategies that in place to address them. Students identify major nutrition and food challenges in a country or region as well as the policies and programs that have proven successful in addressing those challenges. Prerequisite: PUBH 6400.

PUBH 6484. Prevention and Control of Vector Borne Diseases. 2 Credits.

Study of insects and other vectors responsible for transmission of diseases in developing countries, including plague, malaria, dengue fever, onchocerciasis (river blindness), and chikungunya virus. Special focus on developing countries, particularly in the Middle East, Africa, Asia, and Latin America. Diseases such as West Nile Virus and Lyme disease in the United States and elsewhere are also addressed. New methods for effective management and control.

PUBH 6486. Global Health Programs and Approaches to the Control of Infectious Diseases. 2 Credits.

Strategies for the control of infectious diseases with a focus on low and middle income countries; identifying and critiquing goals, strategies, and challenges of major global health intervention programs designed to prevent and control infectious diseases. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6487. Emerging Zoonotic Diseases and Global Food Production. 1 Credit.

Analysis of trends in emerging zoonotic diseases and their links to global food production. Case studies on the use of surveillance systems and outbreak detection techniques to monitor emerging zoonotic diseases. Development of skills to analyze surveillance systems, policy reports, and literature related to emerging zoonotic diseases and food-borne outbreaks within a global context. Prerequisites: PUBH 6003.

PUBH 6488. Cost-effectiveness Analysis in Public Health and Health Care. 2 Credits.

The application of cost-effectiveness analysis (CEA) to enhance the efficiency of programs and services both in the United States and developing countries. A variety of topics and related analytical tools such as cost benefit analysis, decision analysis, and sensitivity analysis are covered. Students learn to perform cost-benefit and cost-effectiveness analyses and understand the strengths and limitations of these methods and how to apply them to a broad range of health issues.

PUBH 6489. Evaluation of Food and Nutrition Programs and Policies. 1 Credit.

Introduction to major global food and nutrition issues, strategies used to address these problems, and commonly-used program impact theories and evaluation frameworks; application of evaluation methods and approaches to nutrition and food programs and policies. Prerequisite: PUBH 6437.

PUBH 6491. Public Health Leadership Seminar. 1 Credit.

Leadership lessons derived from the careers of a diverse group of successful executives and entrepreneurs from multiple sectors, including corporate, government, nonprofit, and the arts. Development of skills for effective engagement with peers, personal network, potential employers, and business partners. Permission of the faculty member required prior to enrollment.

PUBH 6492. Global Health Programs and Approaches to the Control of Chronic Diseases. 2 Credits.

Concepts, methods, and tools to address chronic non-communicable diseases (NCDs); global public health and development dimension of NCDs, their epidemiology and risks, and health systems approaches for their control with focus on low- and middle-income countries. Prerequisites: PUBH 6002, PUBH 6003 and PUBH 6400.

PUBH 6493. Fundamentals of Supply Chain Management in Developing Countries. 2 Credits.

Practical approaches used by government policymakers, essential drugs program managers, NGOs, donors, and others to ensure that high-quality essential drugs are available, affordable and used rationally; existing and potential challenges and workable solutions related to managing the drug supply in developing countries. Restricted to graduate students.

PUBH 6494. Population, Public Health Practice, and Sustainable Development. 2 Credits.

The reciprocal connections between the dynamics of population growth, distribution, and age structure to health, well-being, and socioeconomic development.

PUBH 6495. Field Trial Methods and Application. 2 Credits.

Concepts, methods, and tools necessary to conduct community-based randomized trials in low- and middle-income country settings; the process of running a randomized field trial from selecting a topic, through implementation, to analysis and reporting. Most appropriate for students in their second year of study. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6499. Topics in Global Health. 3 Credits.

Examination of a particular facet of public health. Topics vary by semester. May be repeated for credit provided topic differs. See the Schedule of Classes for more details.

PUBH 6500. Planning and Implementing Health Promotion Programs. 3 Credits.

Students develop skills to effectively plan, design, and implement programs that address public health problems for defined populations in a variety of settings. Prerequisite: PUBH 6007.

PUBH 6501. Program Evaluation. 3 Credits.

The knowledge, competencies, and skills needed to plan and implement evaluations of public health programs in a variety of settings; types of program evaluation, including needs assessment, process evaluation, quantitative and qualitative monitoring of outputs, outcomes, and impact. Prerequisites: PUBH 6002, PUBH 6003 and PUBH 6007; and PUBH 6435 or PUBH 6500.

PUBH 6502. Practical Data Analysis for Prevention and Community Health. 1 Credit.

Practical aspects of dataset creation, data management, rudimentary statistical analysis and tabular/graphical presentation of results in the user-friendly environments of PASW (formerly SPSS) and MS Excel. Students create codebooks, enter and clean data, derive new variables from existing ones, choose appropriate analytical techniques and implement them, graph and tabulate results, and document and protect work. Examples are drawn from commonly-encountered situations in prevention and community health, such as needs assessments and program evaluations. Prerequisites: PUBH 6002, PUBH 6003 and PUBH 6500.

PUBH 6503. Introduction to Public Health Communication and Marketing. 3 Credits.

The application of health communication theories, principles and techniques, as well as marketing constructs and concepts, to advancing public health through practitioner-oriented health communication and social marketing campaigns and programs.

PUBH 6504. Social and Behavioral Science Research Methods. 3 Credits.

The processes of study design, data collection, and analysis using SPSS for quantitative research in prevention and community health. All phases of the observational/survey research process considered sequentially, from formulation of research questions to preparation of the final report. Prerequisites: PUBH 6002 and PUBH 6007; or permission of the instructor.

PUBH 6508. Cost-Effectiveness Analysis of Health Promotion Interventions. 3 Credits.

Theoretical basis for and practical skills needed to estimate the effectiveness, population impact, and cost of health promotion interventions; application to policy and cost-effectiveness and cost-utility analyses. Familiarity with basic algebra and statistics is assumed. Prerequisites: PUBH 6002 and PUBH 6003; and PUBH 6006 or PUBH 6012.

PUBH 6510. Community-Oriented Primary Care Principles and Practice. 3 Credits.

Theory and practice of community-oriented primary care, including an extended small group exercise carrying out a COPC project with a simulated community using Web-based data sets.

PUBH 6512. Community-Oriented Primary Care Policy and Issues. 2 Credits.

Advanced work on COPC methods and policy, focusing on issues related to the provision of health care in underserved communities. Prerequisite: PUBH 6510.

PUBH 6513. Community Health Management. 2 Credits.

Management and development of community health services. Builds upon principles for management and community-oriented primary care. Prerequisites: PUBH 6003 and PUBH 6510.

PUBH 6514. Preventing Health Disparities. 2 Credits.

Provides students with an understanding of how social, political, and economic factors contribute to disparities (e.g. racial, ethnic, gender, and geographical) in health and health care and how to use evidence-based approaches to prevent or address health disparities.

PUBH 6515. High Risk and Special Populations. 2 Credits.

Provides students with an overview of the methods to plan, implement and evaluation health promotion and education programs targeted towards high risk and special populations. The course reviews the socioeconomic, political-economic, cultural and psychosocial factors of populations who are considered to be at high risk for specific health problems and efforts that have been addressed in current health promotion programs. Prerequisite: PUBH 6007.

PUBH 6516. Community Health Information Resources. 2 Credits.

COPC and community health promotion require diverse information skills in order to assess community needs and strengths, determine priority health issues, analyze data, plan interventions, and evaluate programs. This course introduces students to the information resources useful in planning and implementing COPC and community health projects that address racism. The selected resources support methods for defining a community, characterizing a community's social and health characteristics, investigating a prioritized problem, and developing programs and solutions. Students learn how to choose resources, search them, and consider bias in information sources.

PUBH 6530. Qualitative Methods in Health Promotion. 2 Credits.

Application of qualitative methods in the development of health promotion interventions, evaluations, and research. Collecting and analyzing qualitative data through participant observation, interviewing, group methods, and case studies. Prerequisite: PUBH 6007.

PUBH 6531. Health Promotion in Health Care Settings. 2 Credits.

Behavioral change counseling and training skills to improve health by changing individuals' behaviors and by developing training materials for use with providers, health professionals and high risk groups. This is an advanced course for second year students. Prerequisites: PUBH 6007 and PUBH 6500.

PUBH 6532. Community Organization, Development, and Advocacy. 3 Credits.

Educates health promotion practitioners in how to organize community groups to promote health. The focus is on learning how to use resources available in the community to advocate change. Prerequisite: PUBH 6007.

PUBH 6533. Design and Conduct of Community Health Surveys. 2 Credits.

This course teaches students how to frame questions in health promotion surveys using sound principles of questionnaire design with emphasis on reliability and validity. Students learn survey design principles and methods and how to analyze survey data.

PUBH 6534. Community-Based Participatory Research. 1 Credit.

Students learn how to conduct community research in collaboration with community leaders and residents. Emphasizes the principles of CBPR for addressing health promotion issues in communities including community needs and administrative and policy changes.

PUBH 6535. Promotion of Mental Health. 2 Credits.

Increases understanding about issues in mental health promotion. The emphasis is on mental health as a public health issue and linkages between individual mental health and the environment. Prerequisite: PUBH 6007.

PUBH 6536. Workplace Health Promotion. 2 Credits.

Planning, management and evaluation of programs designed to serve employees' needs, promotion of employee health and reduction of health care costs in the workplace. Prerequisite: PUBH 6007.

PUBH 6537. Health Promotion and Aging. 2 Credits.

Introduces students to the basic health aspects of the aging process and special health promotion needs for this group. Problems of aging and public health solutions for older Americans are examined. Students are able to define the public health concerns for aging Americans, how aging is affected by a multitude of factors, identify health promotion strategies to assist in reaching out to this population and develop methods of collaboration with agencies and organizations to improve the health of the aging population. Prerequisite: PUBH 6007.

PUBH 6550. Maternal and Child Health I. 3 Credits.

Public health issues affecting the health and well-being of women, children, and families. A multidisciplinary perspective that integrates the biological, demographic, epidemiological, economic, behavioral, social, cultural and environmental aspects.

PUBH 6551. Maternal and Child Health II. 3 Credits.

.

PUBH 6552. Women's Health. 2 Credits.

Issues of women's health through the life cycle. The process of critically evaluating women's health research and issues.

PUBH 6553. Adolescent Health. 2 Credits.

Issues of physical, mental, and social development and their bearing on the health of adolescents, with special emphasis on prevention.

PUBH 6554. Children and Youth with Special Needs. 2 Credits.

In order to place children and youth with special needs into a public health framework, this course presents an introduction to and an overview of children and youth with special needs due to a developmental disability. Many aspects of developmental disability are addressed including 'concept' and definitions of disability, causes, epidemiological considerations, and development of federal legislation. The scope and range of developmental disabilities are reviewed along with classification schemes. Both national and international distributions are considered from a sociopolitical viewpoint.

PUBH 6555. Reproductive Health: U.S. and Global Perspectives. 2 Credits.

Reproductive health from a variety of public health perspectives, from defining reproductive health, past perspectives, needed improvements, and the factors that influence reproductive health.

PUBH 6556. Maternal and Child Nutrition. 2 Credits.

Covers the nutritional needs of women during the child bearing years, infants, children and adolescents. The course emphasizes the life course approach to nutrition and has a special emphasis on the effects of diet during infancy on obesity and degenerative diseases in later life. Students examine the biological basis of nutrition, identify risk factors associated with poor nutrition in individuals and populations and evaluate domestic and international programs. Summer (1 credit) and Spring (2 credits).

PUBH 6557. Child Development and Public Health. 2 Credits.

Examination of the development of children from a public health perspective and provide a detailed examination of the indicators of children's health that are needed to assist public health professionals improve children's health.

PUBH 6558. Women, Gender, and Health. 2 Credits.

Focuses on gender as a social determinant of health. Emphasis placed on examining the frameworks that are used in public health research to understand gender-based issues and how these frameworks affect the types of programs and intervention efforts developed.

PUBH 6559. HIV Prevention: An Interdisciplinary Approach. 2 Credits.

Provides an interdisciplinary overview of HIV prevention research from the behavioral, biological and biomedical perspective. Students are encouraged to approach the assignments and discussions from their own particular expertise and career interests/goals.

PUBH 6560. School Health and Safety. 1,2 Credit.

Examines the history, organization, financing, and politics of school health programs. It provides an overview of the core components of school health as defined by the Center for Disease Control and Prevention: health services, health education, physical education, nutrition services, counseling or mental health, school environmental health, health promotion, and family/community involvement. Summer (1 credit); Spring (2 credits).

PUBH 6561. Maternal and Child Health Policy Analysis. 2 Credits.

Provides instruction in maternal and child health policy in the U.S. with a particular emphasis on policies related to the organization, financing, delivery, and quality oversight of personal health services for mothers and children.

PUBH 6562. Physical Activity and Obesity Interventions: From the Individual to the Environment. 2 Credits.

This course broadly examines the public health issues related to physical activity and obesity, particularly as they relate to solutions for addressing individual factors and the obesogenic environment. Students gain a further understanding of the social, physiological, behavioral, and environmental factors related to both obesity and physical activity. The course focuses on examining multiple levels of solutions, specifically: 1) individual and behavioral interventions; 2) school-based and community-level interventions; 3) environmental interventions; 4) policy-level interventions. Students are expected to critically evaluate the necessary components of interventions, and apply that knowledge to future programmatic efforts.

PUBH 6563. Global Child Health. 2 Credits.

Elements of science, policy, challenges, and successes of global child health; focus on low and middle income countries and children under five years of age. Learn the burden of disease and associated risk factors; cost-effective interventions and tools. Restricted to graduate students.

PUBH 6570. Advanced Public Health Communication: Theory and Practice. 3 Credits.

Focuses on the use of communication to positively influence people's - and population's - understanding of health information, decision-making, and health behavior. Students study, and in a group project apply, a range of theories and techniques germane to effective message design and delivery. Prerequisite: PUBH 6503.

PUBH 6571. Social Marketing: Theory and Practice. 3 Credits.

The use of marketing to change the behavior of people, populations, and policy makers in ways that are in their, and society's, best interests. Students in this skills-based course study and work in teams to apply a range of marketing strategies to a real-world situation. Prerequisite: PUBH 6503.

PUBH 6572. Marketing Research for Public Health. 3 Credits.

The use of marketing research techniques used to better understand customers of public health programs in order to improve program design, implementation, and effectiveness. A range of qualitative and quantitative techniques are studied for their relevance to program planning, development, and continuous improvement.

PUBH 6573. Media Advocacy for Public Health. 3 Credits.

Focuses on the use of communication to positively influence public policy and public opinion. In this skills-based course students study and apply a range of theories and techniques germane to the policy advocacy process. Prerequisite: PUBH 6503.

PUBH 6574. Public Health Branding: Theory and Practice. 2 Credits.

This course focuses on the use of branding in the public health and social sectors. Learning from the commercial sector, we examine how to brand behaviors as well as products and services. We review branding methods, examine research on branding and its effectiveness, and build skills in branding for public health objectives.

PUBH 6575. Communication Skills for Public Health Professionals. 1 Credit.

Helps students develop writing and oral presentation skills through intensive, interactive training, practice, and feedback. Provides participants with a solid foundation for all forms of public health and other scientific and technical written and oral communication.

PUBH 6590. Introduction to Social Entrepreneurship. 2 Credits.

Examine innovative organizations created to improve people's lives and contribute to improved social and economic conditions. Emphasis on how such organizations are started, how they are sustained, and the various business models that are adopted to achieve an organizational mission.

PUBH 6591. PA/MPH Clinical Leadership Seminar. 1 Credit.

For first-year physician assistant and master of public health program students, an orientation to their roles as health professionals. Special emphasis on preventive and community medicine.

PUBH 6599. Topics in Prevention and Community Health. 1-3 Credits.

In-depth examination of a particular facet of prevention and community health. Topics and prerequisites vary.

PUBH 6610. Public Health Nutrition Practice and Leadership. 1 Credit.

This course provides an overview of public health nutrition practice. Students develop communication, management and leadership skills necessary for successful careers. Students also explore potential practicum and culminating experience options, and how to use these experiences to achieve their career goals. This course is designed for first year students in the public health nutrition MPH program.

PUBH 6611. Nutrition Assessment. 2 Credits.

The anthropometric, biochemical, clinical, and dietary methods for assessing nutritional status in individuals. The process of conducting food and nutrition environment assessments. Prerequisites: EXNS 2119 or PUBH 6619; or other equivalent course with permission of the instructor.

PUBH 6612. Food Systems in Public Health. 2 Credits.

A systems approach to understanding food systems and associated public health issues. How the current food system evolved, and how issues such as climate change and population growth may affect food systems in the future. The role of public health practitioners in meeting the population's need for safe, sufficient, and nutritious food. Policies, programs, and proposals aimed at creating healthier, more sustainable food systems.

PUBH 6613. U.S. Food Policy and Politics. 2 Credits.

The programs, regulations, and legislation that pertain to food production, food safety, nutrition assistance, and dietary guidance in the United States at the federal, state, and local levels.

PUBH 6619. Fundamentals of Nutrition Science. 3 Credits.

The fundamental scientific principles of human nutrition; improving diet and nutritional status in the broader context of public health; nutrition assessment, study designs in nutrition science research, the role of nutrition in chronic disease, and current topics in nutrition science.

PUBH 6620. Designing Healthy Communities. 2 Credits.

Issues at the intersection of public health and planning; evaluating needs and creating change in communities facing food access, physical activity, and age related challenges; the built environment as a means of improving health and preventing chronic disease.

PUBH 6621. Applied Data Analysis in Exercise and Nutrition Sciences. 1 Credit.

Introduction to data management and data analysis using the SAS System; data analysis procedures for specific research questions and settings within the context of exercise and nutrition sciences. Restricted to students in the MPH in physical activity in public health program, program design and evaluation track, or with the permission of the advisor. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6682. Managing Natural Resources for Food Production. 3 Credits.

The relevance of natural resource conservation for ensuring healthy agricultural, food, and environmental systems; various approaches to achieving sustainable systems. Restricted to students in the graduate certificate in food policy leadership program.

PUBH 6683. Applied Food Policy Immersion Experience. 2 Credits.

Leadership theories and an opportunity to build leadership skills and engage with food policy and agriculture leaders from a variety of sectors. Includes site visits to public and private organizations significant in food policy. Restricted to students in the graduate certificate in food policy leadership program. Prerequisites: PUBH 6680 and PUBH 6682.

PUBH 6699. Topics in Nutrition Sciences. 3 Credits.

Examination of a particular facet of nutrition sciences. Topics vary by semester. May be repeated for credit provided topic differs. See the Schedule of Classes for more details.

PUBH 6704. Health Information Technology, Informatics, and Decision Making. 3 Credits.

Operationalizing fundamental technology, processes, policies and concepts of healthcare informatics and decision management to translate data into actionable information within the framework of improving quality, safety, productivity, and experience.

PUBH 6706. Population and Community Health Analytics. 3 Credits.

Overview of the concepts of population and community health, the informatics and analytics necessary to assess population health, and best approaches for decision makers and policy makers using and communicating population and community health data.

PUBH 6850. Introduction to SAS for Public Health Research. 1 Credit.

Conducting basic data management tasks with SAS software; creating libraries, data sets, and variables, and generating basic descriptive statistics and simple graphics of public health and biomedical data.

PUBH 6851. Introduction to R for Public Health Research. 1 Credit.

Read, clean, transform, tidy, and summarize public health data in R. Explore data and write R functions to make workflow more efficient.

PUBH 6852. Introduction to Python for Public Health Research. 1 Credit.

Introduction to the basic concepts of Python programming language, illustrated with applications in biomedical sciences and health informatics.

PUBH 6853. Use of Statistical Packages for Data Management and Data Analysis. 3 Credits.

Data management and data analysis using statistical software. Creating and manipulating variables, merging and concatenating data sets, and implementing common statistical methods such as Student's t-test, linear regression, and logistic regression. Prerequisites: PUBH 6002.

PUBH 6854. Applied Computing in Health Data Science. 3 Credits.

Concepts of computing in biomedical sciences and health informatics. Foundations of Unix shell, command line tools, R and Python programming languages, and their applications in public health. PUBH 6860 may be taken simultaneously. Prerequisites: PUBH 6860. Credit cannot be earned for this course and PUBH 4201.

PUBH 6856. Advanced SAS for Public Health Research. 1 Credit.

Advanced SAS programming. Interactive Matrix Language, SAS macro facility, Structured Query Language, and SAS/GRAPH options for creating drill-down graphs to analyze public health data sets. Prerequisites: PUBH 6002; and PUBH 6249 or PUBH 6853; or permission of the instructor. Credit cannot be earned for this course and PUBH 6268.

PUBH 6859. High Performance and Cloud Computing. 3 Credits.

Introduction to high performance computing and cloud computing, including issues such as data transfer, security, virtual machines, and containers. HPC at GW, Amazon Web Services, and Google Cloud for biohealth computing. Prerequisites: PUBH 6851 and PUBH 6852 or permission of the instructor.

PUBH 6860. Principles of Bioinformatics. 3 Credits.

Biological concepts of molecular biology, genome organization, and evolution; computational concepts of alignment, database searching, phylogeny, and structure; and basic programming concepts including the shell, scripting, and databases. Prerequisites: PUBH 6002 or equivalent.

PUBH 6861. Public Health Genomics. 3 Credits.

Molecular technology and its impact on public health practice and discourse in the post-genomic era. The use of genomics to solve or help alleviate public health challenges. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6862. Applied Linear Regression Analysis for Public Health Research. 3 Credits.

Review of basic statistical inference and an overview of the construction of linear regression models for application to public health and biomedical data sets. Prerequisites: Prior completion of a course in undergraduate statistics and one semester of calculus.

PUBH 6863. Applied Meta-Analysis. 1 Credit.

Examination of meta-analysis (MA) with case studies using R. Statistical methods, including fixed- and random-effects MA; MA for binary and continuous data; heterogeneity in MA; meta-regression; and publication bias. Recommended background: Prior completion of an introductory course in biostatistical methods, such as PUBH 6002 or PUBH 6003, or an equivalent, is strongly recommended.

PUBH 6864. Applied Survival Analysis for Public Health Research. 3 Credits.

Application of survival or time-to-event data in public health studies. Censoring, survival functions, Kaplan-Meier curves, log-rank tests, Cox proportional hazards regression, parametric survival models, recurrent events, and competing risks. Prerequisites: PUBH 6249 or PUBH 6853. Recommended background: undergraduate calculus.

PUBH 6865. Applied Categorical Data Analysis. 3 Credits.

Comprehensive overview of methods for analyzing binary and multicategory response data. Contingency table methods for assessing associations and logistic regression for binary, nominal, and ordinal outcomes, including models for matched data. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6866. Principles of Clinical Trials. 3 Credits.

Introduction to basic principles for design, conduct, analysis, and reporting of clinical trials. Developing a proposal for a clinical trial. Prerequisites: PUBH 6002 or equivalent.

PUBH 6868. Quantitative Methods. 3 Credits.

Basic mathematical statistics: probability, fundamental distributions including binomial, Poisson and normal, central limit theorem, consistency, basic point estimation, hypothesis testing, linear models, and maximum likelihood estimation. Prerequisites: PUBH 6002 and prior completion of at least two courses in single variable calculus. Corequisites: PUBH 6249 or PUBH 6853.

PUBH 6869. Principles of Biostatistical Consulting. 1 Credit.

Principles and practice of biostatistical consulting and related skills and knowledge for public health and medical research environments. Recommended background: Prior completion of at least two graduate-level courses in statistics and an introductory course that discusses common health research designs, such as PUBH 6003, or their equivalent is strongly recommended. Credit cannot be earned for this course and PUBH 6258.

PUBH 6879. Propensity Score Methods for Causal Inference in Observational Studies. 3 Credits.

Designing observational studies; drawing causal inferences using propensity score methods; and performing propensity score analysis using R with hands-on data. Prerequisites: PUBH 6851 and PUBH 6865 or permission of the instructor.

PUBH 6883. Biostatistics Consulting Practicum. 1 Credit.

Supervised experiences involving the synthesis of biostatistical skills with consultations in one or more areas of health research. Students in the MPH programs in biostatistics and in epidemiology may register with permission of the instructor. Restricted to students in the MS in biostatistics and MS in epidemiology programs. Recommended background: Prior completion of at least two graduate-level courses in statistics and an introductory course that discusses common health research designs, such as PUBH 6003, or their equivalent is strongly recommended.

PUBH 6884. Bioinformatics Algorithms and Data Structures. 3 Credits.

Algorithmic foundations of bioinformatics, ranging from generic algorithmic techniques to specific algorithms used in various areas of bioinformatics. Theoretical background is complemented with solving practical problems. Prerequisites: PUBH 6854 or equivalent. Credit cannot be earned for this course and PUBH 4202.

PUBH 6885. Computational Biology. 3 Credits.

Introduction to modern computational biology, including omics data science, high-throughput technologies, multi-omics data integration, and analytical methods with real-world applications. Permission of the instructor is required prior to enrollment.

PUBH 6886. Statistical and Machine Learning for Public Health Research. 3 Credits.

Application and evaluation of supervised and unsupervised statistical and machine learning algorithms in the context of biomedical and public health research. Permission of the instructor is required prior to enrollment.

PUBH 6887. Applied Longitudinal Data Analysis for Public Health Research. 3 Credits.

Introduction to commonly used methods for longitudinal data analysis including fixed effects models, linear and generalized linear mixed effects models, and generalized estimating equations. Missing data. Prerequisites: PUBH 6862 and PUBH 6965; and PUBH 6868, or PUBH 8364, or STAT 6201 and STAT 6202.

PUBH 6894. Research Analytics. 3 Credits.

Key concepts in research analytics; skills and experiences needed to leverage big data to improve public health through data integration.

PUBH 6897. Research in Biostatistics and Bioinformatics. 1-4 Credits.

Independent research. Must be approved in advance by advisor/instructor. Restricted to graduate students in the Department of Biostatistics and Bioinformatics.

PUBH 6898. Master of Science Thesis. 1-2 Credits.

Master's thesis.

PUBH 6899. Topics in Biostatistics and Bioinformatics. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details.

PUBH 6999. Master of Science in Epidemiology Thesis. 2 Credits.

Thesis research. Restricted to students in the MS in epidemiology program.

PUBH 8010. Doctoral Independent Study. 1-3 Credits.

Doctoral students complete an independent study plan to meet predetermined project and/or research work under the supervision of a faculty member. Restricted to GWSPH doctoral students.

PUBH 8110. Research Rotations. 2 Credits.

Students conduct formal rotations with a laboratory or research group to gain research and reporting experience with the mentorship of EOH faculty. Includes identification of an environmental health research problem, collection or analysis of data, and reporting on the results. May be repeated for credit. Restricted to students in the PhD in environmental program or with the permission of the instructor.

PUBH 8116. Communicating Research Results. 2 Credits.

The importance of strategic communication to public health progress. Students gain communication skills that help to transcend educational barriers and facilitate connections with peers, policymakers, and the broader public. Restricted to doctoral students who have satisfactorily completed the comprehensive examination or with the permission of the dissertation chair.

PUBH 8144. Advanced Environmental Health Data Development and Modeling. 1 Credit.

Advanced doctoral level material on environmental exposure assessment using methods covered in PUBH 6144. Restricted to doctoral candidates. Prerequisites: PUBH 6131 or PUBH 6853. Corequisites: PUBH 6144.

PUBH 8242. Advanced Topics in Clinical Epidemiology and Public Health: Reading the Research. 1 Credit.

Evidence-based problem-solving approach using methods covered in PUBH 6242. Restricted to doctoral students. Prerequisites: PUBH 6003 or equivalent. Corequisites: PUBH 6242. Credit cannot be earned for this course and PUBH 6243.

PUBH 8244. Doctoral Topics: Cancer Epidemiology. 1 Credit.

Course focuses on critical review and interpretation of cancer epidemiology literature as well as issues in research design in the field. Prerequisites: PUBH 6001 and PUBH 6003. Corequisites: PUBH 6244.

PUBH 8245. Doctoral Topics: Infectious Disease Epidemiology. 1 Credit.

Provides doctoral level material on the content of infectious disease epidemiology. The course focuses on critical review and interpretation of infectious disease literature as well as issues preparing an analytic research paper on an emerging infectious disease and the application of tools used to describe the epidemiology of those diseases. Spring Prerequisites: PUBH 6003. Corequisites: PUBH 6245.

PUBH 8250. Doctoral Topics: Epidemiology of HIV/AIDS. 1 Credit.

Students select specific topic within area of HIV/AIDS epidemiology. Options include responding to a data analysis problem; responding to a methodological problem found within HIV/AIDS research; or another topic approved by instructor. Prerequisites: PUBH 6001 and PUBH 6003. Corequisites: PUBH 6250.

PUBH 8259. Doctoral Topics: Epidemiologic Surveillance in Public Health. 1 Credit.

Course provides doctoral level material on the content of surveillance offered in PUBH 6259. Focus is on critical review and interpretation of surveillance literature as well as issues preparing an analytic research paper. Prerequisites: PUBH 6002 and PUBH 6003. Corequisites: PUBH 6259.

PUBH 8283. Doctoral Biostatistics Consulting Practicum. 2 Credits.

Working under supervision, students develop an experience-based understanding of how biostatistical skills are used in one or more areas of health research. Students must have completed at least 6 credits in any combination of general or specialized graduate-level statistics courses, such as PUBH 6202, PUBH 6260, STAT 6201, or STAT 6202, before enrolling in this course. Restricted to PhD students.

PUBH 8364. Quantitative Methods. 3 Credits.

Introduces basic concepts in mathematical statistics. Topics include probabilities (unconditional and conditional), density and distribution functions of continuous and discrete random variables, including expected values. Specific distribution functions discussed are Binomial, Poisson, Hypergeometric, and Gaussian distributions. Additional topics include bivariable distributions, variance-covariance matrix, limiting theory, asymptotic results, and maximum likelihood estimation. Prerequisites: MATH 1231 and MATH 1232; and PUBH 6002 and PUBH 6249.

PUBH 8365. Design of Medical Studies. 3 Credits.

Design of medical investigations, including the randomized clinical trial, observational cohort study, and the retrospective case-control study. Specific methods regarding sample size, power and precision and statistical procedures for randomization and sampling. Ethics of clinical trials and the intention-to-treat principle. Prerequisite: PUBH 6002.

PUBH 8366. Biostatistical Methods. 3 Credits.

Biostatistical methods for asymptotically efficient tests and estimates of relative risks and odds ratios from prospective and retrospective matched and unmatched studies. Fixed and random effects models. Logistic regression, conditional logistic regression. Poisson regression. Maximum likelihood and efficient scores. Prerequisites: STAT 6202 or permission of the instructor.

PUBH 8401. Foundations in Public Health Leadership. 3 Credits.

Course modules cover personal leadership; leadership models, theories, concepts, tools, and skills; and practical application of leadership to real world situations. Restricted to doctoral candidates.

PUBH 8402. Leadership and Decision Making: Skills Based Approach. 2 Credits.

Using leadership and decision making skills to solve complex health problems and implement successful solutions to improve population health in all communities; decision making, program management, quality and risk management, human resources and budget, governance, and change management.

PUBH 8403. Leadership in Public Health Policy and Practice. 2 Credits.

Students work in teams on projects for clients from public health-related agencies or organizations in the Washington, DC, area that address issues in environmental and occupational health, global health, health behavior, and health policy. Restricted to students in the DrPh program. Prerequisite: PUBH 8402.

PUBH 8404. Advanced Topics: Health Systems and Health Policy Research. 3 Credits.

Examination and assessment of issues related to the intersection of health care systems and health policy, and how health policy and health services research can inform the development and evaluation of health care systems and health policy. Restricted to doctoral candidates. Prerequisite: PUBH 6315.

PUBH 8405. Advanced Topics: Health Economics Research. 3 Credits.

Critical financing issues for U.S. public health and health care services and systems. The role of health services research in understanding the effects of these issues and informing the deliberations and decisions of policymakers.

PUBH 8406. Advanced Topics: Health Research in the Global Arena. 3 Credits.

Alternative field methods adopted from sociology, anthropology, economics, and political sciences for social sciences and policy research. Builds data collection, instruments, measurements, indicators, and data analysis and interpretation skills in specific socio-cultural contexts. Ethical issues in international research.

PUBH 8407. Advanced Topics: Health Leadership in International Settings. 3 Credits.

Doctoral students develop the tools and experiences needed to build capacity for leadership in global health. Prerequisite: PUBH 8406.

PUBH 8408. Advanced Topics: Health Behavior Research & Practice Applications. 3 Credits.

Advanced topics relating theory to practice in areas of health education and behavioral change. Application of qualitative and quantitative research to health related behavior at individual and community levels.

PUBH 8409. Advanced Topics: Health Communication Research. 3 Credits.

Methods of communications research designed to alter health behavior. Emphasis on critical analysis of communications research aimed at the mass public, groups, and interpersonal level.

PUBH 8411. Advanced Topics: Principles of Human Health Risk Science. 3 Credits.

This course provides the doctoral student with a comprehensive orientation to the frameworks, principles and issues involved in assessing, managing and communicating environmental health risks. This fundamental, interdisciplinary course is designed to foster dialogue and insights about contemporary risk science and management issues, including ethical concerns and technical issues that influence policy making. Restricted to students in the environmental and occupational health program, or with permission of the instructor.

PUBH 8412. Advanced Topics: Environmental and Occupational Health Research and Practice. 3 Credits.

This course exposes students to the theory and reality of both research and practice in environmental and occupational health. There is an emphasis on the use of public health science in policy and regulatory decisions. Prerequisites: PUBH 8411 or permission of the instructor.

PUBH 8413. Research Leadership. 1-10 Credits.

Students participate in a range of activities designed to develop and enhance their research methods and analytic skills. These activities include participating in the development and submission of sponsored research proposals; being formally affiliated with a research project, assuming responsibility for completing a real-world research project; engaging in empirical data collection and analysis efforts.

PUBH 8414. Policy and Management Leadership. 1-10 Credits.

Students develop and enhance their management, leadership, and policymaking skills for problem solving in real-world settings; public health departments, community health centers, legislative settings, and public or teaching hospitals.

PUBH 8415. Instructional Leadership. 1-10 Credits.

Students participate in a range of activities designed to develop and enhance their teaching skills. These activities include course development, teaching master's level courses, acting as TA for undergraduate courses, advising students about their class performance, evaluating student performance, and developing remedial programs for students.

PUBH 8416. Study Design & Evaluation Methods. 3 Credits.

Prepares doctoral students to design and conduct program and policy evaluation in public health. Intensive introduction to the principles of study program design and evaluation research emphasizing the ability to synthesize the population-based intervention literature, apply planning and management methods, describe and apply research methods from a range of disciplines, and prepare a program research proposal.

PUBH 8417. Qualitative Research Methods and Analysis. 3 Credits.

Techniques for designing and conducting qualitative research and for analyzing and reporting qualitative data relevant to program development and implementation, community assessment, and policy analysis. Prerequisites: PUBH 8416.

PUBH 8418. Applied Statistical Analysis. 3 Credits.

Intensive course in data management and data analysis using STATA®. Database management system techniques and data analytical strategies for the appropriate analysis of data sets obtained from a variety of studies will be presented. The student will manipulate national data sets from epidemiological studies as well as Demographic and Health Survey (DHS) data. Prereq: PubH 8416.

PUBH 8419. Measurement in Public Health and Health Services. 3 Credits.

Review principles of measurement and assessment as they apply to public health and health services research constructs, review existing state-of-the-art measures of individual and population health status (e.g., morbidity, mortality, functioning and health-related quality of life) and of individual and community health behavior. Explore current measurement issues in health research.

PUBH 8420. Advanced Analysis and Dissemination. 3 Credits.

Advanced multivariate data analyses of complex datasets and programs, including advanced cross-sectional techniques, time-series analysis, and the use of panel data. Evaluation of results, and dissemination of findings to relevant stakeholders. Fall. Prerequisites: PUBH 8417 and PUBH 8418.

PUBH 8422. Advanced Health Care and Public Health Research Design. 2 Credits.

Design of protocol suitable for implementation as part of DrPH dissertation requirement. Permission of the instructor, completion of required coursework, and successful completion of the comprehensive examination required prior to enrollment.

PUBH 8423. Dissertation Research. 1-12 Credits.

Dissertation research for DrPH. Prerequisite: PUBH 8422.

PUBH 8434. Behavioral Medicine and Public Health. 3 Credits.

Investigation into the field of behavioral medicine, which integrates behavioral, psychosocial, and biomedical sciences, with specific applications to public health. Restricted to PhD students in the social and behavioral sciences in public health program or with the permission of the instructor.

PUBH 8435. Dissertation Proposal Development for Social and Behavioral Sciences. 2 Credits.

Advise and assist doctoral students in developing and defending their dissertation proposal. Restricted to doctoral students who have successfully completed comprehensive examinations.

PUBH 8610. Statistical Methods for Health Policy. 3 Credits.

Application of statistical analysis in health policy and public health research using Stata® to analyze a variety of large public health data sets. Prior completion of at least one graduate-level statistics course is required. Restricted to doctoral students. Credit cannot be earned for this course and PUBH 6310.

PUBH 8620. Seminar: Foundations of U.S. Health Policy. 3 Credits.

Reintroduction to the basics of U.S. health policy, combining advanced legal, policy, and regulatory content acquisition with advanced health law and policy analysis skills. Restricted to doctoral students in health policy or with the permission of the instructor.

PUBH 8622. Health Care Payments, Systems, and Delivery Models. 3 Credits.

Survey of long-standing practices and recent developments in provider payment and the organization of health care delivery in the United States. Restricted to doctoral students in the health policy program or with the permission of the instructor.

PUBH 8875. Linear Models in Biostatistics. 3 Credits.

Introduction to the theory of linear models with applications to public health and biomedical data. Least squares, maximum likelihood, and distribution theory for linear regression. Prerequisites: PUBH 6862; and PUBH 6868 or PUBH 8364 or STAT 6201. Corequisites: STAT 6202. Recommended background: prior completion of coursework in linear algebra and multivariable calculus.

PUBH 8877. Generalized Linear Models in Biostatistics. 3 Credits.

Theoretical development of most commonly used methods for categorical and count data presented within the unified framework of the generalized linear model. Prerequisites: PUBH 6865; and PUBH 6868, or PUBH 8364, or STAT 6201 and STAT 6202. Recommended background: prior completion of coursework in linear algebra.

PUBH 8878. Statistical Genetics. 3 Credits.

Application of statistical concepts to family- and population-based genetic data. Human evolution, genome-wide association studies, gene-environment interactions, and genetic architecture with emphasis on applications to real data and analyses. Prerequisites: PUBH 6860.

PUBH 8999. Dissertation Research. 1-12 Credits.

Dissertation research.

ENVIRONMENTAL AND OCCUPATIONAL HEALTH

The Department of Environmental and Occupational Health (EOH) works to further the student's understanding of how natural and human-made environments impact human health. The department offers public health programs that challenge students to explore both the underlying science and policy remedies for topics including sustainable cities and food systems, climate change mitigation, workplace safety, and risk management.

Visit the Department of Environmental and Occupational Health website (<https://publichealth.gwu.edu/departments/environmental-and-occupational-health/>) for additional information.

GRADUATE

Master's programs

- Master of Public Health in environmental health science and policy (p. 1336)
- Master of Public Health in global environmental health (p. 1339)

Doctoral program

- Doctor of Philosophy in the field of environmental health (p. 1378)
- Doctor of Public Health in environmental and occupational health (p. 1384)

FACULTY

Professors L.R. Goldman, G.M. Gray, D. Michaels, M.J. Perry (Chair), L.B. Price

Associate Professors S.C. Anenberg, K.M. Applebaum, M.S. Attene Ramos, P.T. LaPuma, C. Liu, S. McCormick, A.R. Zota

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PUBH 0920. Continuing Research - Master's. 1 Credit.
Continuing Research Credit- Master's Level.

PUBH 0940. Continuing Research - Doctoral. 1 Credit.
Continuing Research Credit- Doctoral.

PUBH 1010. First-Year Experience in Public Health. 1 Credit.

Designed to assist students in the transition to GW and the public health major by introducing skills and resources needed to succeed personally, academically, and professionally, particularly in a public health context.

PUBH 1099. Variable Topics. 1-36 Credits.

PUBH 1101. Introduction to Public Health and Health Services. 3 Credits.

Introduction to aspects of public health and health services, including health services administration and policy, maternal and child health, environmental health, and health promotion.

PUBH 1102. History of Public Health. 3 Credits.

Historical and philosophical development of public health and its contributions to understanding, preventing, and controlling disease and disabilities.

PUBH 1102W. History of Public Health. 3 Credits.

Social history of public health from the late nineteenth century to the present; historical context for contemporary public health problems. Includes a significant engagement in writing as a form critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: UW 1020.

PUBH 1299. Undergraduate Public Health Study Abroad. 1-6 Credits.

May be repeated for credit when multiple courses with distinct subject matter are taken as part of a study abroad program.

PUBH 2110. Public Health Biology. 3 Credits.

Basic scientific mechanisms, concepts, and principles in health and the pathogenesis of diseases; a foundation for applications to public health. Prerequisites: BISC 1005; or BISC 1111.

PUBH 2112. Principles of Health Education and Health Promotion. 3 Credits.

Social and behavioral theories underlying health promotion program development and evaluation. Practical applications in a variety of domestic and global public health settings. PUBH 1101 may be taken as a corequisite. Prerequisite: PUBH 1101.

PUBH 2113. Impact of Culture upon Health. 3 Credits.

Relationships between cultural values and the development of modern health systems based on Western models of health care practice. Reliance upon traditional forms of health care. Examples of successful incorporation of traditional practices into evolving health care systems.

PUBH 2114. Environment, Health, and Development. 3 Credits.

Survey of the relationship between health and development and environmental trends. Topics include deforestation, urban contamination, and desertification.

PUBH 2115. Health, Human Rights, and Displaced Persons. 3 Credits.

Concepts of health as a human right, ethics, and the participation of the international community in moving toward health for all. Civil and international conflict in the generation of displaced populations.

PUBH 2116. Global Delivery of Health Systems. 3 Credits.

Introduction to health systems and the basic concepts of health systems administration and financing and health care reform with examples from advanced, middle income, and poor countries.

PUBH 2117. Service Learning in Public Health. 3 Credits.

A service-learning course that combines classroom instruction with practical learning. Students are responsible for securing an approved service site before the beginning of the semester; the instructor is available to assist with this placement.

PUBH 3115. Global Health and Human Rights. 3 Credits.

Concepts of health as a human right and the impact of ethical violations on the mental and physical health of individuals; the efforts of the international community in addressing health consequences of vulnerable populations.

PUBH 3116. Global Health Systems Performance. 3 Credits.

Introduction to the U.S. and international health systems, both public and private, and the WHO Health Systems Framework; how environmental, ethical, cultural, and political actions shape health systems in different parts of the world. Restricted to juniors and seniors.

PUBH 3130. Health Services Management and Economics. 3 Credits.

Basics of management theory, finance, and economics as applied to managing in the public health and health services field. Prerequisite: ECON 1011.

PUBH 3131. Epidemiology: Measuring Health and Disease. 3 Credits.

Principles of epidemiology applied to disease surveillance, control of infectious and chronic diseases, and health services/health policy. Understanding the basic research designs and their relationship to establishing cause and effect and effectiveness of interventions to prevent and cure disease. Prerequisites: PUBH 1101 and STAT 1127.

PUBH 3132. Health and Environment. 3 Credits.

Introduction to environmental and occupational health and implications for individual and population health. Issues of clean water, environmental toxins, air pollution, and the environmental impact on infectious diseases.

PUBH 3133. Global Health and Development. 3 Credits.

Political, social, and economic determinants of health; how health status is measured with an emphasis on low-income countries, the health of the poor, and inequity and inequality; burden of diseases that impact development and their basic epidemiological characteristics, including who they affect, when they occur, and where risk is greatest.

PUBH 3135W. Health Policy. 3 Credits.

An introduction to the fundamentals of the health care system in the United States and strategies available to policymakers when addressing problems relating to access, financing, and delivery of health care. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: PUBH 1101.

PUBH 3136. Health Law. 3 Credits.

Legal concepts related to individual health care and public health systems in the United States. Health care law, public health law, and bioethics.

PUBH 3137. Global Public Health Nutrition. 3 Credits.

Consideration of hunger and other nutrition issues globally, including food insecurity, under/over nutrition, and micronutrient deficiencies. Application of UNICEF malnutrition framework to describe vulnerable groups, critique program strategies, and identify multisectorial strategies to reduce hunger and malnutrition. Prerequisite: PUBH 3133.

PUBH 3142. Introduction to Biostatistics for Public Health. 3 Credits.

Applying biostatistical principles to analyze studies in health services literature. Selecting statistical methods based on research questions, calculating basic statistics for estimation and inference, interpreting results of statistical analyses.

PUBH 3150. Sustainable Energy and Environmental Health. 3 Credits.

Sustainability issues from the perspective of environmental health. Technical, social, and health implications of specific energy sources. Energy conservation and efficiency in the context of population growth, food and water resources, and maintenance of a healthy environment for future generations.

PUBH 3151. Current Issues in Bioethics. 3 Credits.

General and specific ethical questions and ethical decision making from both personal and organizational perspectives; right to health care, research with human subjects, reproductive technology, genetics, professional and student roles and responsibilities, and end-of-life issues.

PUBH 3151W. Current Issues in Bioethics. 3 Credits.

General and specific ethical questions and ethical decision making from both personal and organizational perspectives; right to health care, research with human subjects, reproductive technology, genetics, professional and student roles and responsibilities, and end-of-life issues. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

PUBH 3152. Qualitative Research Methods in Public Health. 3 Credits.

Introduction to characteristics and methods relevant to the design and conduct of qualitative research in public health investigations; data collection methods, coding, data analysis, and reporting results.

PUBH 3199. Topics in Public Health. 1-5 Credits.

Topics vary by semester. See the Schedule of Classes for more details. May be repeated for credit provided the topic differs.

PUBH 3201. Introduction to Bioinformatics. 3 Credits.

Introduction to bioinformatics, including biological concepts of molecular biology, genome organization, and evolution; computational concepts of alignment, database searching, phylogeny, and structural bioinformatics; and programming concepts in Unix and Python including the Unix environment, the shell, scripting, databases, regular expressions, and pipeline development. Prerequisites: BISC 1112 or BISC 1116 and BISC 1126; and STAT 1127. Credit cannot be earned for this course and BISC 2584, CSCI 3571.

PUBH 3202. Introduction to Genomics. 3 Credits.

Principles of genomics; genome projects, including the human genome, molecular techniques, analytical approaches, computational tools for genome research, and genomic data generation and analysis. Prerequisites: BISC 1111; BISC 1112.

PUBH 3299. Undergraduate Public Health Study Abroad. 1-6 Credits.

May be repeated for credit when multiple courses with distinct subject matter are taken as part of a study abroad program.

PUBH 3995. Undergraduate Research. 1-3 Credits.

Students work under the mentorship of a faculty member to acquire knowledge and skills central to the design, conduct, and/or analysis of scientific research. Project proposal must be approved by the instructor and dean's office prior to enrollment. Credit cannot be earned for this course and EXNS 3995.

PUBH 4140W. Senior Seminar. 3 Credits.

Students develop a public health intervention incorporating various domains of the discipline of public health. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Restricted to public health majors in their senior year. Prerequisite: PUBH 3130.

PUBH 4141. Senior Seminar Community Needs Assessment. 3 Credits.

Culminating experience for students in undergraduate public health programs. Restricted to seniors in the BS in public health program and students in the minor in public health.

PUBH 4199. Independent Study. 3 Credits.

Outline of intended project must be approved prior to registration by instructor and dean's office. Restricted to public health majors.

PUBH 4201. Practical Computing. 3 Credits.

Basic concepts of computer programming in biomedical sciences and health informatics; foundations of R and Python languages; best programming practices in health applications. Prerequisites: BISC 1111 and BISC 1115; or BISC 1112 and BISC 1116.

PUBH 4202. Bioinformatics Algorithms and Data Structures. 3 Credits.

Algorithmic foundations of bioinformatics, ranging from generic algorithmic techniques to specific algorithms used in various areas of bioinformatics. Prerequisite: PUBH 4201.

PUBH 6002. Biostatistical Applications for Public Health. 3 Credits.

Application of biostatistical principles to critical analysis of retrospective studies, prospective studies, and controlled clinical trials, as well as studies in the health services literature. Selection, basic calculations, and interpretation of statistical methods for detection of significant associations and differences.

PUBH 6003. Principles and Practices of Epidemiology. 3 Credits.

General principles, methods, and applications of epidemiology. Outbreak investigations, measures of disease frequency, standardization of disease rates, study design, measures of association, hypothesis testing, bias, effect modification, causal inference, disease screening, and surveillance. Case studies apply these concepts to a variety of infectious, acute, and chronic health conditions affecting the population.

PUBH 6007. Social and Behavioral Approaches to Public Health. 2 Credits.

Social and behavioral science theories, models, and concepts that can be applied to public health problems and interventions. The role of social and community factors, including race, ethnicity, and culture, in both the onset and solution of public health problems; the interrelationship between the social and behavioral sciences.

PUBH 6009. Fundamentals of Public Health Program Evaluation. 2 Credits.

Topics include designing program evaluation studies to produce and interpret evidence to improve public health; options for evaluation study design and evidence generation; and qualitative data collection and analysis methods. Prerequisites: PUBH 6007. Recommended background: Prior completion of PUBH 6002.

PUBH 6010. Independent Study. 1-6 Credits.

Designed to provide the student with an opportunity to gain or enhance public health knowledge and to explore an area of interest related to public health research or the delivery and/or administration of health services. Permission of the instructor or advisor required prior to enrollment.

PUBH 6011. Environmental and Biological Foundations of Public Health. 3 Credits.

The connection between population health and exposures to chemical, physical, and biological agents in the environment; interconnection between dimensions of environmental systems and all living things; biological sciences as they relate to environmental impacts.

PUBH 6012. Fundamentals of Health Policy. 2 Credits.

Comparative study of the structure, financing, and delivery of public health and health care in the United States and abroad; core elements of policy analysis are used to develop skills in analyzing a public health problem and presenting possible solutions both orally and in writing.

PUBH 6013. Master's Thesis. 3 Credits.

See Advisor.

PUBH 6014. Practicum. 1-3 Credits.

This course provides the opportunity for MPH students to apply the knowledge and skills acquired through their programs of study. A planned, supervised and evaluated practice experience that is relevant to the student's program is an essential component of a public health professional degree program. These opportunities can take place in a variety of agencies or organizations. Each program customizes Practicum requirements to meet students' needs. (Credit/No Credit) [For 45-credit MPH students who started Summer 06 or after.].

PUBH 6015. Culminating Experience. 1-3 Credits.

Students synthesize and integrate knowledge acquired in coursework and other learning experiences and apply theory and principles to a situation that approximates some aspect of professional practice. Program faculty evaluate student's mastery of the body of knowledge and ability to demonstrate proficiency in the required competencies. Requirements evaluated are adapted to the degree program.

PUBH 6016. Field/Laboratory Experience. 2 Credits.

The overall purpose of the field/laboratory experience requirement is to introduce students in the MS-PHMEID degree program to a supervised practical experience in a Public Health Laboratory or other qualifying public health entity from the perspective of the actual wet laboratory operations. Students that already have this laboratory experience are introduced to epidemiologic research, particularly surveillance, and its tie-in with laboratories either in the United States or in an international setting.

PUBH 6021. Essentials of Public Health Practice and Leadership I. 1 Credit.

The skills necessary for being an effective practitioner and leader; optimizing self-management and contributions in teams as public health professionals.

PUBH 6022. Essentials of Public Health Practice and Leadership II. 1 Credit.

The development of organizations and systems in public health; organizational management tools and collaborative, outcome-oriented advocacy techniques. PUBH 6021 may be taken as a corequisite. Prerequisite: PUBH 6021.

PUBH 6023. Interprofessional Education Experience. 0 Credits.

Completion of an interprofessional education experience (IPE) is required for all MPH students. Maximizes the student's capacity for collaboration with others to better address public health and health care challenges. A variety of options are available for students to complete this requirement before graduation. Restricted to MPH students. Prerequisites: PUBH 6002, PUBH 6003, PUBH 6007, PUBH 6011, PUBH 6012, and PUBH 6021.

PUBH 6050. Introduction to Health Services Delivery. 2 Credits.

Introduction to the systems that define and shape delivery of health services in the United States. Case studies and presentations on major issues develop an appreciation of dilemmas confronting policymakers, providers, and patients: balancing cost, quality and access. Access and disparity, health care professions, facilities, managed care organizations and government health care programs. Policy changes that have had major impact on American health care in the past century. Fall.

PUBH 6052. Practical Data Management and Analysis for Public Health. 2 Credits.

Practical aspects of dataset creation, data management, rudimentary statistical analysis, and tabular and graphical presentation of results. Creating codebooks, entering and cleaning data, deriving new variables from existing ones, choosing and implementing appropriate analytical techniques, graphing and tabulating results, and documenting and protecting work. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6054. Community Engagement and Advocacy. 2 Credits.

Tools and strategies for public health practitioners to understand, respect, organize, and collaborate with community groups and organizations for promotion of healthy behaviors. Development of practical skills to harness available resources in a community to advocate for healthy living and positive health outcomes.

PUBH 6056. Public Health Leadership Seminar. 1 Credit.

Leadership lessons taken from the careers of a diverse group of executives and entrepreneurs from the corporate, government, nonprofit, and art sectors. Leadership theory and styles. Building networks; skills for effectively engaging with peers, potential employers, and business partners.

PUBH 6058. Researching Violence Against Women and Girls. 2 Credits.

The intersection of violence against women and girls (VAWG) and public health; the impact that violence has on the health of the survivor, her current and future children, and communities; methods and best practices for designing applied research on VAWG. Prerequisites: PUBH 6002, PUBH 6003, PUBH 6007, PUBH 6011 and PUBH 6012.

PUBH 6060. MPH@GW Culminating Experience I. 1 Credit.

Students integrate and apply the skills, knowledge, theories, principles, and methods of public health practice to a public health issue. Most students will have completed PUBH 6014 or PUBH 6022 and other MPH core coursework prior to enrollment. Restricted to students in the MPH@GW program. Prerequisites: PUBH 6002, PUBH 6003, and PUBH 6007; and PUBH 6004 or PUBH 6011; and PUBH 6006 or PUBH 6012; and PUBH 6009 or PUBH 6437.

PUBH 6061. MPH@GW Culminating Experience II. 1 Credit.

Students integrate and apply the skills, knowledge, theories, principles, and methods of public health practice to a public health issue. Students may already have completed PUBH 6060 or it may be taken as a corequisite. Restricted to students in the MPH@GW program. Prerequisites: PUBH 6060.

PUBH 6080. Pathways to Public Health. 0 Credits.

Introduces the 12 foundational public health learning objectives to GWSPH students in non-MPH graduate programs. Must be completed before the last day of classes in the student's first semester of matriculation.

PUBH 6090. Practicum/Culminating Experience. 4 Credits.

Individually tailored. Culminating Experience for the MPH program. Permission of the advisor required prior to enrollment.

PUBH 6091. Special Project. 1-4 Credits.

Under faculty supervision, the student undertakes an original project that applies the skills and knowledge gained in the chosen track and/or concentration within the MPH program. Prerequisite: Permission of the instructor. NOTE that credits vary by program; please consult your program plan to register for the appropriate number of credits. [For 36-credit MPH students only].

PUBH 6099. Topics in Public Health. 3 Credits.

In-depth examination of a particular facet of public health. Topics vary by semester. See the Schedule of Classes for more details. May be repeated for credit provided the topic differs.

PUBH 6121. Environmental and Occupational Epidemiology. 3 Credits.

Demonstration and application of epidemiologic methods for the study of environmental and occupational health problems; epidemiologic exposure assessment methods and methods relevant to cohort, case-control, cross-sectional, and case cross-over studies; survey design and sources and evaluation of biases and confounding; emphasis on written and oral communication skills. Prerequisites: PUBH 6002 and PUBH 6003; and PUBH 6004 or PUBH 6011.

PUBH 6122. Protecting Public Health and the Environment: Policies, Politics, and Programs. 3 Credits.

The legislative, regulatory, judicial, and political system in the United States developed to protect human health and the environment. National and global public and environmental health agencies, policy development, and current topics. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6123. Toxicology: Applications for Public Health Policy. 3 Credits.

Toxicology as both a scientific discipline and a source of information for public health policy with respect to the regulation of foods, pesticides, drugs (pharmaceuticals), environmental chemical pollutants, and other chemicals that may affect human and environmental health. How chemicals interact with biological systems to produce adverse effects. The ways in which toxicologic information is developed and applied to regulatory decision making and the use of toxicology in regulatory risk assessment. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6124. Risk Management and Communication. 3 Credits.

Culminating course using problem-based learning methods to examine a variety of real-world environmental and occupational health issues in-depth. Students integrate cumulative knowledge across all required courses and demonstrate professional competencies. Prerequisites: PUBH 6121, PUBH 6123 and PUBH 6126.

PUBH 6126. Assessment and Control of Environmental Hazards. 3 Credits.

Introduces the anticipation, recognition, assessment, and control of hazards in the workplace and the ambient environment. It emphasizes an understanding of the characteristic features of specific hazards, which may be chemical, biological, or physical/ergonomic.

PUBH 6127. Introduction to Environmental Health Microbiology. 2 Credits.

Basics of public health microbiology as it relates to the environment, food, water, and bioterrorism. Examines from an environmental health perspective how the principles of microbiology are applied to current and emerging public health issues, whether from intentional or unintentional contamination of the environment. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6128. Global Environmental and Occupational Health. 2 Credits.

Examination of the global environmental and occupational health factors that contribute significantly to the global burden of disease, focusing primarily on low- and middle-income countries; principles from behavioral sciences, development economics, risk assessment, and epidemiology are included; potential solutions to environmental health problems, metrics used to measure impacts, and areas for future research. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6130. Sustainable Energy and the Environment. 2 Credits.

The sustainability of various energy strategies, including energy conservation, green building principles, renewable energy, and mitigation and adaption policies for climate change. Emphasis on the life cycle framework. Topics include natural resource depletion, water and energy consumption, and air, water, and solid waste pollutant emissions. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6131. Quantitative Methods in Environmental and Occupational Health. 3 Credits.

Application of biostatistical and epidemiologic concepts and methods to analysis of EOH data. Development and practice of skills needed for analyzing complex exposures and communicating environmental and occupational research findings. Prerequisites: PUBH 6002 and PUBH 6003; and PUBH 6004 or PUBH 6011.

PUBH 6132. Water, Sanitation, and Hygiene (WASH) in Low-Income Countries. 2 Credits.

Introduction to working in both disaster and development settings in countries where contaminated water, inadequate sanitation, and poor hygiene (WASH) cause serious health problems. Students gain practical experience applying WASH methods in the field. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6133. Social Dimensions in Climate Change and Health. 3 Credits.

The drivers of climate change and outcomes with particular focus on health dimensions; obstacles, vulnerabilities, inequality, and adaptation as well as technical and social solutions.

PUBH 6135. Researching Climate Change and Human Health. 3 Credits.

Study of the effects of climate change on human health using evidence compiled by the National Climate Assessment (NCA); widespread impacts, ecological context, oceans of change, infrastructure, water resources, energy, land use, heat, and air quality. Recommended background: PUBH 6003 and PUBH 6004.

PUBH 6136. Introduction to Environmental and Occupational Epidemiology. 3 Credits.

Epidemiologic research designs; methods for the study of environmental and occupational health problems; exposure assessment methods; design aspects of cross-sectional, case-control, cohort, and case cross-over studies; sources and evaluation of biases and confounding; survey and questionnaire design. Prerequisites: PUBH 6002, PUBH 6003 and PUBH 6011.

PUBH 6137. Environmental and Occupational Health Culminating Experience I. 1 Credit.

The first in a two-course sequence. The final, integrative learning experience for the MPH in environmental health science and policy or global environmental health. Students apply the skills and knowledge, theories, and principles learned in the MPH program to practical public health problems. Restricted to MPH students in the Department of Environmental and Occupational Health who have completed all core courses and at least 9 credits in program-specific courses. Prerequisites: PUBH 6002 and PUBH 6003; PUBH 6004 or PUBH 6011; PUBH 6006 or PUBH 6012; and PUBH 6007.

PUBH 6138. Environmental and Occupational Health Culminating Experience II. 1 Credit.

The second in a two-course sequence. The final, integrative learning experience for the MPH in environmental health science and policy or global environmental health. Students apply the skills and knowledge, theories, and principles learned in the MPH program to practical public health problems. Restricted to MPH students in the Department of Environmental and Occupational Health. Prerequisite: PUBH 6137.

PUBH 6140. Global Climate Change and Air Pollution. 2 Credits.

The state of the air in the Anthropocene epoch. Key concepts of atmospheric science, public health, and other societal impacts. Local and global policy frameworks. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6144. Environmental Health Data Development and Modeling. 2 Credits.

Introduction to sources of environmental data, handling and cleaning of data, and using data in both statistical and environmental exposure models. Prerequisites: PUBH 6131 or PUBH 6853.

PUBH 6146. Microbiomes and Microbial Ecology in Public Health. 2 Credits.

Introduction to key concepts of environmental microbial ecology and the human microbiome. The roles of microbes in ecosystems' functions with a focus on climate change and the roles of microbes in human health and disease. Prerequisites: PUBH 6011.

PUBH 6199. Topics in Environmental and Occupational Health. 3 Credits.

Topics vary by semester. May be repeated for credit provided topics differ. Consult the Schedule of Classes for more details.

PUBH 6233. Epidemiologic Principles and Practice of Disease Eradication. 2 Credits.

The role of epidemiology, surveillance, research, and information technology in the eradication of vaccine preventable and parasitic human diseases. Prerequisites: PUBH 6003.

PUBH 6234. Epidemiologic Methods in Neglected Tropical Disease Control. 1 Credit.

Introduction to neglected tropical disease epidemiology providing a broad overview of select tropical medicine and public health issues; focus on applications of epidemiologic methods to the study of public health consequences of NTDs. Prerequisites: PUBH 6003. Corequisites: PUBH 6011.

PUBH 6235. Epidemiology of Obesity. 1 Credit.

Introduction to the epidemiology of obesity; descriptive epidemiology, measurement, consequences, and determinants of obesity; adiposity and body composition; obesity interventions and policy. Prerequisites: PUBH 6003.

PUBH 6236. Systematic Review of Public Health Literature. 1 Credit.

The process of conducting systematic reviews of literature in order to translate research into public health practice recommendations. Recommended for MPH candidates planning to conduct a systematic review of the literature for their culminating experience. Prerequisites: PUBH 6002 or EXNS 6204; and PUBH 6003 or EXNS 6208.

PUBH 6237. Chronic Disease Epidemiology. 2 Credits.

Overview of the epidemiology (descriptive, analytic, and etiologic) of chronic diseases. Emphasis on epidemiologic methods and study design in relation to chronic disease, as well as public health approaches to disease control including surveillance, screening, and interventions. Prerequisites: EXNS 6204 or PUBH 6002; and EXNS 6208 or PUBH 6003.

PUBH 6238. Molecular Epidemiology. 1 Credit.

Concepts, principles, and use of molecular methods in epidemiologic and clinical research. Common molecular measures and their interaction with environmental factors. Development of a framework for interpreting, assessing, and incorporating molecular measures in their area of research. Prerequisites: PUBH 6003.

PUBH 6239. Epidemiology of Foodborne and Waterborne Diseases. 1 Credit.

Foodborne and waterborne toxicants; diseases linked to eating and drinking and their prevention. Topics include transmission of disease and disease processes; microbial toxins, mycotoxins, chemical toxins, bacterial infections (e.g., salmonellosis, shigellosis, vibrio, listeria), virus and parasitic infections; issues in food and water safety. Prerequisites: PUBH 6003.

PUBH 6240. Pediatric HIV/AIDS. 1 Credit.

Comprehensive overview of HIV infection in children, with emphasis on the global pediatric HIV epidemic. Biological, epidemiological, clinical, and psychosocial issues; public health programmatic approaches to prevention, care, and treatment. The national and global experience with scaling up prevention services in the global effort to virtually eliminate HIV/AIDS in children. Prerequisites: PUBH 6003. Recommended background: PUBH 6250 and PUBH 6253.

PUBH 6241. Nutritional Epidemiology. 2 Credits.

Methodological issues related to dietary assessment, nutrition surveillance, and the epidemiology of obesity. Current trends, including the health impacts of vitamin D and sodium. Interpretation of the scientific literature in the field. Examples drawn from the National Health and Nutrition Examination Survey. Prerequisites: PUBH 6003.

PUBH 6242. Clinical Epidemiology and Public Health: Reading the Research. 2 Credits.

Methods for reading epidemiology and public health research including case-control, cohort studies, randomized controlled trials, meta-analysis, testing and screening, prediction rules, decision and cost-effectiveness analysis. Prerequisites: PUBH 6003 or equivalent.

PUBH 6243. Topics in Clinical Epidemiology and Public Health: Reading the Research. 1 Credit.

An evidence-based problem solving applications course utilizing methods taught in PubH 6242 Clinical Epidemiology and Public Health: Reading the Research Prerequisites: PUBH 6003. Credit cannot be earned for this course and PUBH 8242.

PUBH 6244. Cancer Epidemiology. 2 Credits.

Epidemiology of specific cancers, with an emphasis on molecular and genetic epidemiology. Current research in the field. Prerequisites: PUBH 6003.

PUBH 6245. Infectious Disease Epidemiology. 2 Credits.

The role and conduct of laboratory and field investigations in the epidemiology of infectious diseases. Prerequisite: PUBH 6003.

PUBH 6247. Design of Health Studies. 3 Credits.

Epidemiologic concepts and methods applied to specific research questions especially new types of public health problems. Recognition and development of the most appropriate study design for a specific health issue. Ecologic, cross-sectional, case-control, cohort studies and clinical trials. Sampling, measurement, questionnaire design, causality and causal criteria. Development of a research proposal. Prerequisites: PUBH 6003. Corequisites: PUBH 6002.

PUBH 6248. Epidemiology of Aging. 2 Credits.

The demographics, theories, and physiology of aging; descriptive and associative epidemiology of several common age-related diseases and disorders; implications for public health. Prerequisites: PUBH 6003.

PUBH 6250. Epidemiology of HIV/AIDS. 2 Credits.

Methodological issues central to HIV/AIDS research. Biases peculiar to HIV/AIDS epidemiologic studies (both observational and experimental designs). The natural history of HIV, diagnosis, surveillance, vulnerable subpopulations, behavioral facets, and evaluation of epidemiologic studies with an emphasis on methodological considerations. Prerequisites: PUBH 6003. Recommended background: PUBH 6002.

PUBH 6252. Advanced Epidemiology Methods. 3 Credits.

Advanced quantitative epidemiologic methods, with a focus on basic data analytic techniques, identifying and evaluating bias and adjusting for confounding. Dose-response, trend analysis, and multiple linear and logistic regression models. PUBH 6249 may be taken as a corequisite. Prerequisites: PUBH 6002, PUBH 6003, PUBH 6247 and PUBH 6249.

PUBH 6253. Issues in HIV Care and Treatment. 1 Credit.

This course provides an overview and in depth consideration of some of the major issues in treatment of HIV disease, including the assessment of efficacy and effectiveness, drug resistance, monitoring of drug toxicity, special populations, the interrelationship between treatment and prevention, and quality of care. The course has been designed with an interdisciplinary audience in mind. In discussions and assignments, students are able to emphasize their own area of interest and/or expertise (e.g. epidemiology, policy, etc).

PUBH 6255. Organizational Responses to the Local, National, and Global HIV/AIDS Epidemics. 2 Credits.

This seminar focuses on the rapidly evolving responses of local, national and global governmental and non-governmental organizations to the HIV/AIDS epidemic. Inspirational leaders of selected HIV/AIDS organizations are invited to describe how their organizations contribute to fighting the epidemic; the leadership and management skills that they use in their daily work; and their strategic decision-making processes. Basic principles of epidemiology, leadership and organizational strategy and structure are addressed through didactic presentations and interactive faculty-student dialogue. Lessons learned through the lens of HIV/AIDS organizations are broadly applicable to other public health problems. Students learn about the strengths and challenges of different types of public health organizations as they make career decisions about their own transition to the public health work force. Prerequisites: PUBH 6003, HIV/AIDS experience, or permission of the instructor.

PUBH 6258. Advanced Topics in Biostatistical Consulting. 1 Credit.

Principles and practice of biostatistical consulting in public health and medical research environments.

PUBH 6259. Epidemiology Surveillance in Public Health. 2 Credits.

Focus on foundations of public health surveillance systems for communicable as well as chronic diseases. Outbreak investigation methods are included, as well as surveillance data sources, data management, data analysis, ethical issues, surveillance system evaluation, and use of information for prevention. Surveillance systems for reportable diseases, nosocomial infections, bioterrorism events, cancer, environmental disease, vaccine-related adverse events, bovine spongiform encephalopathy, and military personnel are discussed. Prerequisites: PUBH 6003.

PUBH 6260. Advanced Data Analysis for Public Health. 3 Credits.

Advanced data analysis using the SAS System to expand on the analytic techniques gained in PUBH 6002 and PUBH 6249 and to provide students with the applied statistical skills required to analyze various types of public health datasets. Prerequisites: PUBH 6002 and PUBH 6249.

PUBH 6262. Introduction to Geographic Information Systems. 1 Credit.

Geographic information systems (GIS) for mapping and display of health data. The course makes use of ArcGIS 8.3. The use of spatial statistics for the detection of clusters and patterns in the spread of diseases. Working with geodatabases, shape files, layers, query information from attribute tables, geocode addresses and customizing GIS applications.

PUBH 6263. Advanced GIS. 1 Credit.

Provides mid to advanced level training in GIS for display and analysis of health data. Use software ArcGIS 9.3 and additional extensions such as Spatial Analyst and Geostatistical Analyst. Also uses GeoDa software. Emphasizes benefits of using GIS to do more than simply manage and map data. GIS supports a range of spatial analysis functions that enable researchers to extract additional meaning from manipulating geographic data. Learn to work with raster datasets and geodatabases to build spatial models for analyzing health data and evaluating spatial patterns of health events based on notion of distance. Prerequisites: PUBH 6262.

PUBH 6264. Quantitative Methods. 3 Credits.

Introduces basic concepts in mathematical statistics. Topics include probabilities (unconditional and conditional), density and distribution functions of continuous and discrete random variables, including expected values. Specific distribution functions discussed are Binomial, Poisson, Hypergeometric, and Gaussian distributions. Additional topics include bivariable distributions, variance-covariance matrix, limiting theory, asymptotic results, and maximum likelihood estimation. Prerequisites: MATH 1231 and MATH 1232; and PUBH 6002 and 6249.

PUBH 6265. Design of Medical Studies. 3 Credits.

Design of medical investigations, including the randomized clinical trial, observational cohort study, and the retrospective case-control study. Specific methods regarding sample size, power and precision and statistical procedures for randomization and sa.

PUBH 6266. Biostatistical Methods. 3 Credits.

Biostatistical methods for asymptotically efficient tests and estimates of relative risks and odds ratios from prospective and retrospective matched and unmatched studies. Fixed and random effects models. Logistic regression, conditional logistic regression. Poisson regression. Maximum likelihood and efficient scores. Prerequisites: STAT 6201, STAT 6202 and PUBH 6264.

PUBH 6267. Time Series Applications in Public Health. 2 Credits.

Introduce basic concepts for the identification and modeling of time series in the time domain approach. Learn a new set of terminology standards and a different way to analyze these type of data and to forecast future values of a time series and its accuracy. Software used is SAS/ETS and 3 procedures: ARIMA, AUTOREG, FORECAST. New mathematical notation is used. Prerequisites: PUBH 6249.

PUBH 6268. Advanced SAS. 1 Credit.

Intensive in advanced programming using SAS. Expand technical skills to provide advanced SAS tools for data management and graphics. Topics to include Interactive Matrix Language (IML), SAS Macro facility language, and drill-down graphs using SAS/GRAPH. Prerequisites: PUBH 6002 and PUBH 6249; or permission of the instructor.

PUBH 6269. Reproductive Epidemiology. 1 Credit.

Current research, controversial issues, and methodological problems in epidemiology of reproductive and perinatal health. Present reproductive health issues such as conception and infertility; perinatal issues such as complications of pregnancy, infections in pregnancy, adverse pregnancy outcomes, and birth defects. Prerequisites: PUBH 6003.

PUBH 6270. HIV/AIDS Surveillance. 1 Credit.

Overview of surveillance methods used domestically and internationally to monitor HIV/AIDS epidemic. Surveillance systems including sentinel, population based, behavioral, and incidence surveillance are presented and discussed. Strengths and weaknesses of these various systems are discussed in addition to how data from these systems impact and inform HIV/AIDS related policies and programs. Prerequisites: PUBH 6003.

PUBH 6271. Disaster Epidemiology. 1 Credit.

Introduction to disaster epidemiology that elucidates the important role epidemiologists play in assessing the health and psychological effects of natural and man-made disasters and in identifying factors that contribute to these effects. Focus on applications of epidemiologic methods to the study of public health consequences of disasters, case studies from actual disasters used to illustrate various roles of epidemiologist in responding to these events and lessons learned. Highlight key skills that epidemiologists need to be part of a response and recovery. Identify methodological issues for future work. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6272. Epidemiology of Infectious Agents Associated with Human Cancer. 1 Credit.

Describes the role of infectious agents in the etiology of human cancer. Emphasis on differences between specific oncogenic viruses. Other oncogenic agents, bacterial and parasitic, are also discussed. Discuss laboratory approaches to the documentation of their pathogenicity, how behavior affects mode of transmission, and which types of data provide strongest support for documenting oncogenic potential for humans. Prerequisites: PUBH 6003.

PUBH 6273. Ethnographic Methods. 1 Credit.

Use ethnographic field methods in conjunction with epidemiological research. Introduction to specific methods used to examine health phenomena and determinants of disease. Learn specific applied skills that can be modified with socio-cultural modifications to evaluate urban sites and other settings. Basic skills in application of ethnographic methods, including recursive observations, participant observations, and variety of approaches to interviewing such as in-depth, structured and non-structured as well as conversational interviewing. Discuss use of multiple approaches in conjunction with ethnography, including focus groups, archival, document, statistical and secondary data analysis, and survey research methods. Course emphasizes use of ethnographic research methods in community-based health settings and evaluates issues in cultural competency and how to garner stakeholder support to conduct epidemiologic studies. Prerequisites: PUBH 6003.

PUBH 6274. Emerging Infectious Diseases for Public Health Professionals. 2 Credits.

Focus on epidemiology of emerging infectious diseases of public health importance, including factors leading to their development, management of emerging infectious diseases from a public health and laboratory standpoint, including biosafety, and strategies for emergency preparedness from a national and international perspective. Emphasis on the context of emerging infectious diseases and strategic approaches to their containment. Prerequisites: PUBH 6003 or MICR 6292; or permission of the instructor.

PUBH 6275. Essential Public Health Laboratory Skills. 2 Credits.

This course provides public health students with practical laboratory experience. Prerequisites: MICR 6239 or permission of the instructor.

PUBH 6276. Public Health Microbiology. 3 Credits.

Gain in-depth understanding of important non-viral pathogens pertinent to public health microbiology. Learn how to isolate and identify pathogens using critical thinking and problem solving skills.

PUBH 6278. Public Health Virology. 3 Credits.

In-depth understanding of viral pathogenesis by focusing on current research, controversial issues, and public health relevance. Survey of family of viruses most relevant to today's public health efforts, concentrating on virus-host interactions and therapeutic strategies.

PUBH 6280. Microbiology and Emerging Infectious Diseases Final Project. 2 Credits.

Focus on the synthesis and summary of data acquired through epidemiologic and/or public health laboratory research. Biosafety training, CITI training, HIPAA training and permission of the instructor are required prior to enrollment. Prerequisites: PUBH 6002, PUBH 6003, PUBH 6292, and PUBH 6245.

PUBH 6281. Analysis of Complex Surveys Using SAS and Stata. 2 Credits.

Appropriate methods to analyze survey data collected using complex sampling methods are discussed and applied to national survey data to address provocative public health research questions. An equivalent Stata course may be substituted for prerequisite 6249. Prerequisites: PUBH 6003 and PUBH 6249.

PUBH 6282. Introduction to R Programming. 1 Credit.

R is an open source software environment for statistical computing and graphics. Data transfer between SAS and R, data manipulation and visualization within R, programming and debugging, R libraries, and graphics theory. Prerequisites: PUBH 6249. Recommended background: Programming experience in a statistical package such as Stata or in high level language such as C, Python, Perl.

PUBH 6299. Topics in Epidemiology. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details.

PUBH 6305. Fundamentals for Health Policy: Public Health and Health Care. 2 Credits.

An overview of public health and health care in the United States as an introduction to the study and analysis of health policy. Presents the governmental framework, institutions, financing streams, workforce, constituencies, and interest groups engaged in the health sector to ensure that students begin their policy analytic training with grounding in the political, economic, and social realities of public health and health care.

PUBH 6310. Statistical Analysis in Health Policy. 3 Credits.

Quantitative and statistical methods of data analysis for health policy and health services research. Instruction in conducting data analyses using Stata statistical and data analysis software and application of acquired skills to health policy and health services research. Practical experience in programming and analysis of various health policy-related questions. Entering and importing data; creating, saving, and merging data sets; creating and modifying variables; labeling variables and values; and conducting analysis ranging from univariate to multivariate analyses, including multiple regression and logistic regression. The use of existing data sets to analyze health policy issues and interpret these analyses for policy purposes. Prerequisite: PUBH 6002.

PUBH 6315. Introduction to Health Policy Analysis. 2 Credits.

Core elements of health policy analysis: problem definition, background, the political, economic, and social landscape; development of policy options and recommendations. Written, graphic, and oral presentation skills associated with policy analysis. Summer, Fall, Spring. Prerequisites: PUBH 6012 or PUBH 6305.

PUBH 6320. Advanced Health Policy Analysis. 3 Credits.

Practical applications of basic quantitative tools in health policy. Problem definition; political, social, and economic assessment of a problem; program evaluation and data analysis; development of policy options; and the written and oral presentation of findings and recommendations. Prerequisites: PUBH 6305 or PUBH 6012; and PUBH 6310 and PUBH 6315.

PUBH 6325. Federal Policymaking and Policy Advocacy. 2 Credits.

The federal health policymaking process, including an overview of the legislative, administrative, and judicial processes that affect policymaking; federal budget, authorization, and appropriation processes; common techniques and strategies used to advance legislative and regulatory policies, including coalition building and the use of policy studies and media relations. Prerequisites: PUBH 6012 or PUBH 6305.

PUBH 6330. Health Services and Law. 3 Credits.

Examination of the ways in which the law and legal system in the United States influence and are influenced by the health care system. How judicial, statutory, regulatory, and constitutional sources of law embody health policy and affect access to and quality and financing of health care, as well as the regulation of patient rights.

PUBH 6335. Public Health and Law. 3 Credits.

How the law can both promote public health and conflict with the rights of individuals protected under the U.S. Constitution; legal concepts that underlie the public health system and inform public health policymaking; major areas of public health activity; the future of public health.

PUBH 6340. Health Economics and Finance. 3 Credits.

Examination of economic principles as they apply to health policy in the public and private sectors. The basic framework of economics is used to analyze the behavior of consumers, hospitals, physicians, and insurers, as well as pharmaceutical companies and long-term care providers. Overview of Medicare and Medicaid. Economic analyses of current issues in the marketplace, including rising health spending in the context of the national economy and the federal budget, insurance market dynamics, key issues in the long-term care industry, shifting market forces and power within the health care arena, and new payment initiatives and delivery system models. Prerequisites: PUBH 6352 or an undergraduate economics course.

PUBH 6345. Health Policy Research Design. 2 Credits.**PUBH 6350. Health Policy Capstone. 2 Credits.**

Required for MPH graduate students in the health policy concentration in the final semester before graduation. Students synthesize and integrate knowledge across multiple public health disciplines; apply theories, principles, and skills in ways that approximate professional practice in the field of health policy; and demonstrate mastery of the required knowledge and competencies addressed in the curriculum. Prerequisites: PUBH 6012 or PUBH 6305; and PUBH 6320.

PUBH 6352. Basics of Economics for Health Policy. 1 Credit.

An introduction to modern microeconomics -- the study of how consumers, firms, industries, and the public sector make decisions and allocate their resources in the economy. The principles of supply and demand and elasticity in both the private and public sectors are analyzed.

PUBH 6353. Child Health Advocacy. 1 Credit.

Introduction to child health advocacy. Affordable Care Act (ACA), preventive care, school health, environmental issues, and emergency care. The use of data for advocacy.

PUBH 6354. Mental Health/Substance Abuse Policy. 2 Credits.

Provides an overview of the U.S. mental health and substance abuse delivery system, its components, and the policy challenges created by the organization of this system. Considers the behavioral health care system from the perspective of several main "actors" in the system: patients, providers (primarily doctors and hospitals), health plans, and payers (public and private). Prerequisite: PUBH 6305.

PUBH 6355. Comparative Health Policy. 2 Credits.

Archetypical health care systems, financing, and reform efforts, with emphasis on the trade-offs between efficiency and equity. Comparison of current policy challenges and solutions faced by policymakers in the U.S. and in other countries. Prerequisites: PUBH 6012 and PUBH 6305.

PUBH 6356. State Health Policy. 2 Credits.

Students develop a briefing on health and health care for a new governor and health secretary in order to gain a practical understanding of state health policy and programs. The course is designed to replicate the experience of a newly hired policy staff member learning the requirements for the position in a particular state. Prerequisites: PUBH 6012 or PUBH 6305.

PUBH 6357. Health Economics and Policy: Cost Containment Strategies. 2 Credits.

Health care cost containment in the context of the current implementation of national health reform. Cost containment strategies; economic underpinnings, anticipated impacts, perspectives of and implications for health care providers and systems, and political considerations. Prerequisite: PUBH 6340.

PUBH 6358. Vaccine Policy. 2 Credits.

The development of U.S. vaccine policy and the growth of various markets targeting routine vaccination of all populations; interactions among business, legal, political, public health, medical, federal/state/local government, and consumer communities that combine to influence vaccine delivery in a broad range of settings. Prerequisites: PUBH 6012 or PUBH 6305.

PUBH 6359. Reproductive Health Policy. 1 Credit.

Overview of reproductive health policy at the federal and state levels. Balancing the interests of competing stakeholders; the fundamental underlying role of significant disparities in financing for and access to reproductive health services; and how policymaking can alleviate or exacerbate preexisting issues.

PUBH 6360. Advanced Maternal and Child Health Policy. 1 Credit.

In-depth exploration of maternal and child health policy in the U.S., with a particular emphasis on the role of personal and public health services for women, children, youth and their families in the context of health and human services system change. Prerequisite: PUBH 6561.

PUBH 6361. Health Workforce Policy. 2 Credits.

Strategies for the prevention and control of infectious diseases, focusing on low and middle income countries. Goals, strategies, and challenges of major global health intervention programs. Surveillance systems, vaccination programs, chemotherapy as a prevention and treatment tool, nutritional supplementation, environmental approaches, and potential benefits of integrating multiple interventions. Prerequisites: PUBH 6012 or PUBH 6305.

PUBH 6363. The Health Care Legislative Process. 1 Credit.

How health care legislation is developed in and moves through the U.S. House of Representatives and Senate. The roles of the committees of jurisdiction in each house and how the rules of each house affect legislative outcomes.

PUBH 6364. Federal Budget Process for Health Policy. 1 Credit.

Focuses on how the Congressional budget process shapes the funding and design of federal health care programs, ranging from entitlement programs like Medicare to appropriated programs like community health centers. Discussions cover budget resolutions, appropriations bills, and budget reconciliation legislation, as well as Congressional procedures and committees through which they are considered. Prerequisite: PUBH 6305.

PUBH 6366. Health Care Corporate Compliance. 2 Credits.

The federal laws and regulations that affect U.S. health care industry participants, particularly those relating to the prevention of fraud and abuse, and the role of corporate compliance programs. Prerequisites: HSML 6215 or PUBH 6330.

PUBH 6367. Population Health, Public Health, and Health Reform. 2 Credits.

In-depth assessment of how a reforming health care system can be expected to change the policy landscape for population and public health in the United States; direct changes evolving at the state and local level and national payment and health system reforms. Prerequisites: One of the following: HSML 6202, PUBH 6006, PUBH 6012, or PUBH 6305.

PUBH 6368. Law, Medicine, and Ethics. 3 Credits.

Legal, ethical, and policy issues that arise in the biomedical arena; the definitions of life and death, the nature of personal identity, the requirements of justice, and the boundaries of liberty. Prerequisites: PUBH 6330 or PUBH 6335.

PUBH 6370. Medicare/Medicaid Law and Policy. 2 Credits.

Describes current legal and public policy issues in the Medicare and Medicaid programs, including the legal, operational, financial, and organizational rules for the two programs. Prerequisite: PUBH 6315.

PUBH 6372. Minority Health Policy. 2 Credits.

Introduces students to the concept of health disparities and the implications of disparities for health care practice and policy. Students will learn how disparities are defined and measured, as well as emerging approaches in practice and policy to reducing disparities. Fall. Prerequisite: PUBH 6315.

PUBH 6374. Pharmaceutical Policy. 2 Credits.

Legal and regulatory frameworks related to the demand for and supply / quality of pharmaceutical products. Policies specific to drug development, pricing, reimbursement, use, dissemination of information, and post-marketing surveillance. Prerequisite: PUBH 6315.

PUBH 6376. Primary Health Care Policy. 2 Credits.

Politics and policy behind the provision of primary health care in the United States. The rise of the field of primary care and how it is supported and financed; the role of insurers and government in regulation and oversight in the areas of access, cost, and quality. Prerequisite: PUBH 6315.

PUBH 6378. HIV Policy in the US. 2 Credits.

Examines the policy response to the HIV epidemic in the United States and how the epidemic itself has helped to shape U.S. policy. How and why HIV became a national policy issue; circumstances surrounding the discovery of and early response to HIV; and main policy and programmatic developments and key players over time. The role and implications of the Affordable Care Act for individuals with HIV, the future of the Ryan White HIV/AIDS Program, and the impact of new treatment and prevention strategies on the future course of the epidemic.

PUBH 6380. Bridging Health Policy and Health Information Technology. 2 Credits.

Basics of health care informatics policy and core technological components for health services managers, public health professionals, health policy analysts, and health information technology staff. Policy and legal frameworks, governance and financial issues, technological infrastructure, and business and technological operations. Concepts and roles of information and how information technology can support the health care industry in promoting quality improvement.

PUBH 6382. Community Health Center Policy. 2 Credits.

PUBH 6384. Health Care Quality and Health Policy. 2 Credits.

The role of quality in the U.S. health care delivery system from the perspective of multiple stakeholders, including public and private payers, providers, consumers, and employers. Defining and measuring quality; how quality information is used; and policy implications of quality improvement. Recent changes under health reform legislation. Prerequisites: PUBH 6012 or PUBH 6305.

PUBH 6386. Public Health Preparedness Policy. 2 Credits.

Issues in public health emergency preparedness and response at the nexus of homeland and national security. The relationship between public health and criminal investigation, forensic epidemiology, and surveillance; biodefense; and the role of the scientific community. Infrastructure, threat themes, and associated preparedness and response policy.

PUBH 6390. Prescription Drugs: Policy and Public Health. 3 Credits.

Key policies and public health programs related to each stage of a prescription drug's life cycle; Congressional funding focused on speeding the development and approval of needed drugs, public and private approaches to increase access to prescription drugs, and exceptions to international laws that allow some countries to violate prescription drug patents to improve the health of impoverished citizens.

PUBH 6399. Topics in Health Policy. 3 Credits.

In-depth examination of a particular facet of public health policy. Topics and prerequisites vary.

PUBH 6400. Global Health Frameworks. 2 Credits.

Overview of current issues in global public health with particular emphasis on low and middle-income countries. Serves as both an introductory course for students entering the field of global health, as well as an update on current technical and policy issues for advanced students who may have considerable experience.

PUBH 6410. Global Health Study Design. 1,2 Credit.

Tools necessary for designing and understanding the research that goes into developing good public health programs; basic elements for the planning and design phase of a research project. Prerequisite or corequisite: PUBH 6009 or PUBH 6501. Prerequisite: PUBH 6003.

PUBH 6411. Global Health Qualitative Research Methods. 2 Credits.

An introduction to qualitative data collection and analysis in global health settings. Methodologies include survey design, interviews, focus groups, and participant observation. Archival research and clinical trial research are also addressed. The set of methods most commonly used to collect qualitative data in global health settings. Students are enabled to prepare interview guides, conduct in-depth interviews, and analyze and document the results from a qualitative field project. Prerequisites: PUBH 6002 and PUBH 6410.

PUBH 6412. Global Health Quantitative Research Methods. 3 Credits.

Continuation of the series of global health methods courses. Examination of the fundamental concepts of empirical analysis and qualitative analysis, including open and axial coding, the basis of grounded theory, and regression analysis. Prerequisites: PUBH 6002 and PUBH 6410.

PUBH 6416. Ethical and Cultural Issues in Global Health Research and Programs. 1 Credit.

Examine procedures and concerns for protecting communities and human subjects involved in public health programs and research. Consider cultural considerations integral to ethical conduct of public health research and programming in the global context. Discuss history behind rules and regulations that govern ethical principles around conduct of research involving human subjects. Consider contribution that awareness of cultural contexts where we work makes to ethical nature of our work as global health professionals.

PUBH 6417. Cross-Cultural Approaches for Global Health Practice. 1 Credit.

How to communicate, negotiate, and be more effective across cultures; social aspects that affect communication within cultures and how to navigate communication in practical situations including in the work place and in risk and crisis situations. Corequisite: PUBH 6410. Prerequisite: PUBH 6416.

PUBH 6420. Understanding Commercial Determinants of Health. 1 Credit.

Conceptual understanding and frameworks for commercial determinants of health as key to improving public health.

PUBH 6421. Responsible Conduct of Research. 1 Credit.

Designed to raise awareness of the responsible conduct of research. Strategies for preventing irresponsible research practices, including unacceptable practices and research misconduct.

PUBH 6430. Theories for Global Health Communication Interventions. 2 Credits.

Use of communication theory and methods in health promotion. Integration of multidisciplinary approaches to public health communication. Prerequisites: PUBH 6007 and PUBH 6400.

PUBH 6431. Global Health Communication Strategies and Skills. 3 Credits.

Students conduct qualitative research to evaluate health communication programs, assess readability level and suitability of written health education materials, conduct content analyses, and review/critique current health communication literature. Prerequisites: PUBH 6430 or permission of the instructor; and PUBH 6007.

PUBH 6435. Global Health Program Development and Implementation. 2 Credits.

Basic concepts and principles of program development and implementation including data collection methods, decision making, and problem-solving techniques. Application of program development techniques to specific interventions. Prerequisite: PUBH 6400.

PUBH 6436. Global Health Program Management and Leadership. 2 Credits.

Essential tools for successful project, personnel, and program management. Leadership and management theory; key issues in managing global health programs and projects; leadership and management skills development; use of data in management decision making; and importance of quality, supply chain, and resource management. Restricted to students in the MPH in global health program design, monitoring, and evaluation program. Prerequisites: PUBH 6400 and PUBH 6435.

PUBH 6437. Global Health Program Evaluation. 3 Credits.

Fundamentals of program monitoring and evaluation; developing and using program theory in evaluation; impact evaluation and mixed-methods approaches; qualitative methods and statistical analysis for program evaluation. Prerequisites: PUBH 6002.

PUBH 6440. Global Health Economics and Finance. 2 Credits.

Examination of economics and finance principles as they apply to global health. Organization, delivery, and financing of health care in developing countries. Tools for analyzing issues related to global health economics and finance and application of those tools to a variety of a global health issues, including demand for health care, health care financing, social insurance, pharmaceuticals, and HIV/AIDS. Prerequisite: PUBH 6400.

PUBH 6441. Global Health Organizations and Regulations. 3 Credits.

The functions, capacities, and governance of international health organizations; the normative power of some international health organizations for regulatory processes; and evidence-based development of public health policies with attention to issues of global trade as it shapes worldwide and national health. Prerequisite: PUBH 6400.

PUBH 6442. Comparative Global Health Systems. 2 Credits.

Examination of national health systems, how they differ, and how they are performing. Health systems analyzed through four different lenses: health care organizations, health workforce development, health care financing, and health policy development. Comparison of health systems and health reforms in seven regions of the world and assessment of how health system performance might be improved. Course fee may apply. Prerequisite: PUBH 6400.

PUBH 6443. Global Health Agreements and Conventions. 2 Credits.

Explores the impact of regulations, trade and human rights on health by examining the relevant international declarations, agreements and conventions. This course examines a variety of topics including the impact of international trade agreements on health, the International Health Regulations and other regulations affecting global health, and the relationship between health and human rights. Prerequisite: PUBH 6400.

PUBH 6445. Quantitative Methods for Impact Evaluation. 2 Credits.

Learning to use and produce empirical research in the public health field; review of quantitative techniques and research designs used to uncover causal effects of policies and programs, with applications to public health topics. Prerequisites: PUBH 6002, PUBH 6003 and PUBH 6412.

PUBH 6450. Global Health Diplomacy. 2 Credits.

Introduction to the concept of global health diplomacy; how diplomacy has been used to advance health agendas and how health issues have been used to improve diplomatic relations between countries; formal health, multi-stakeholder health, and informal health diplomacy; comparative study of how different countries have devised health diplomacy strategies.

PUBH 6451. Monitoring/Evaluation of Sexual/Reproductive Health Programs in Low- and Middle- Income Countries. 2 Credits.

Overview of key sexual and reproductive health challenges in low- and middle-income countries; designing and measuring programs to address those challenges. Taught from the perspective of applied researchers working within an organization that implements sexual and reproductive health programs and services. Prerequisites: PUBH 6437, PUBH 6500 and PUBH 6503.

PUBH 6452. Social and Behavior Change Communication in Middle- to Low-Income Countries. 2 Credits.

The ways in which behavior change and sociocultural theories underpin the development of SBCC programs in politically, culturally, and socially diverse settings. Prerequisites: PUBH 6007 and PUBH 6503.

PUBH 6455. Global Vaccinology. 3 Credits.

Concepts, methods, and tools for making new and existing lifesaving vaccines more accessible to individuals in low- and middle- income country settings. Recommended for second-year MPH students. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6461. Ethics and Accountability in Humanitarian Settings. 1 Credit.

Principles and fundamentals of ethical approaches and accountability processes in the delivery of humanitarian services and possible solutions and interventions to address them. PUBH 6480 may be taken as a corequisite. Prerequisite: PUBH 6480.

PUBH 6462. Nutrition and Food in Large Humanitarian Emergencies. 1 Credit.

Fundamentals of food aid programs and nutritional issues in emergency humanitarian situations and appropriate local and international responses in lower-income countries. Field-based program responses in international, resource-scarce settings, as conducted by NGOs and UN agencies. PUBH 6480 may be taken as a corequisite. Prerequisite: PUBH 6480.

PUBH 6463. Communication Strategies and Planning in Humanitarian Settings. 2 Credits.

Principles of and major challenges in communication planning with wide range of stakeholders in humanitarian settings; solutions and interventions to identify related risks and appropriately respond to and effectively plan communication strategies. PUBH 6480 may be taken as a corequisite. Prerequisites: PUBH 6007 and PUBH 6480.

PUBH 6464. Mental Health in Humanitarian Settings. 1 Credit.

Principles of and fundamental challenges to mental health in humanitarian settings, including potential solutions and interventions; foundational knowledge and skills in mental health and psychosocial support services in such settings. PUBH 6480 may be taken as a corequisite. Restricted to PUBH 6480.

PUBH 6465. Reproductive Health and Gender-Based Violence in Humanitarian Settings. 1 Credit.

Key issues, challenges, policies, and interventions related to sexual and reproductive health and gender-based violence in humanitarian settings for persons affected by armed conflict and natural disasters. PUBH 6480 may be taken as a corequisite. Prerequisite: PUBH 6480.

PUBH 6469. Humanitarian Aid Seminar Series. 1 Credit.

Targeted talks and panel discussions with humanitarian aid workers from a variety of agencies addressing important or controversial contemporary topics in humanitarian settings. Corequisite or prerequisite: PUBH 6480.

PUBH 6480. Public Health in Humanitarian Settings. 2 Credits.

Technical aspects of high-priority public health interventions; consideration of how and why sound public health interventions should be implemented in both emergency and chronic humanitarian settings; the roles of diverse humanitarian actors.

PUBH 6481. Global Mental Health. 2 Credits.

Focus on global mental health knowledge and public health policy implementation skills regarding the integration of mental health, public health, and primary care in diverse health systems and challenging cultural contexts. Prerequisite: PUBH 6400.

PUBH 6482. International Food and Nutrition Policy. 2 Credits.

Major global food and nutrition issues, their determinants, and the strategies that in place to address them. Students identify major nutrition and food challenges in a country or region as well as the policies and programs that have proven successful in addressing those challenges. Prerequisite: PUBH 6400.

PUBH 6484. Prevention and Control of Vector Borne Diseases. 2 Credits.

Study of insects and other vectors responsible for transmission of diseases in developing countries, including plague, malaria, dengue fever, onchocerciasis (river blindness), and chikungunya virus. Special focus on developing countries, particularly in the Middle East, Africa, Asia, and Latin America. Diseases such as West Nile Virus and Lyme disease in the United States and elsewhere are also addressed. New methods for effective management and control.

PUBH 6486. Global Health Programs and Approaches to the Control of Infectious Diseases. 2 Credits.

Strategies for the control of infectious diseases with a focus on low and middle income countries; identifying and critiquing goals, strategies, and challenges of major global health intervention programs designed to prevent and control infectious diseases. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6487. Emerging Zoonotic Diseases and Global Food Production. 1 Credit.

Analysis of trends in emerging zoonotic diseases and their links to global food production. Case studies on the use of surveillance systems and outbreak detection techniques to monitor emerging zoonotic diseases. Development of skills to analyze surveillance systems, policy reports, and literature related to emerging zoonotic diseases and food-borne outbreaks within a global context. Prerequisites: PUBH 6003.

PUBH 6488. Cost-effectiveness Analysis in Public Health and Health Care. 2 Credits.

The application of cost-effectiveness analysis (CEA) to enhance the efficiency of programs and services both in the United States and developing countries. A variety of topics and related analytical tools such as cost benefit analysis, decision analysis, and sensitivity analysis are covered. Students learn to perform cost-benefit and cost-effectiveness analyses and understand the strengths and limitations of these methods and how to apply them to a broad range of health issues.

PUBH 6489. Evaluation of Food and Nutrition Programs and Policies. 1 Credit.

Introduction to major global food and nutrition issues, strategies used to address these problems, and commonly-used program impact theories and evaluation frameworks; application of evaluation methods and approaches to nutrition and food programs and policies. Prerequisite: PUBH 6437.

PUBH 6491. Public Health Leadership Seminar. 1 Credit.

Leadership lessons derived from the careers of a diverse group of successful executives and entrepreneurs from multiple sectors, including corporate, government, nonprofit, and the arts. Development of skills for effective engagement with peers, personal network, potential employers, and business partners. Permission of the faculty member required prior to enrollment.

PUBH 6492. Global Health Programs and Approaches to the Control of Chronic Diseases. 2 Credits.

Concepts, methods, and tools to address chronic non-communicable diseases (NCDs); global public health and development dimension of NCDs, their epidemiology and risks, and health systems approaches for their control with focus on low- and middle-income countries. Prerequisites: PUBH 6002, PUBH 6003 and PUBH 6400.

PUBH 6493. Fundamentals of Supply Chain Management in Developing Countries. 2 Credits.

Practical approaches used by government policymakers, essential drugs program managers, NGOs, donors, and others to ensure that high-quality essential drugs are available, affordable and used rationally; existing and potential challenges and workable solutions related to managing the drug supply in developing countries. Restricted to graduate students.

PUBH 6494. Population, Public Health Practice, and Sustainable Development. 2 Credits.

The reciprocal connections between the dynamics of population growth, distribution, and age structure to health, well-being, and socioeconomic development.

PUBH 6495. Field Trial Methods and Application. 2 Credits.

Concepts, methods, and tools necessary to conduct community-based randomized trials in low- and middle-income country settings; the process of running a randomized field trial from selecting a topic, through implementation, to analysis and reporting. Most appropriate for students in their second year of study. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6499. Topics in Global Health. 3 Credits.

Examination of a particular facet of public health. Topics vary by semester. May be repeated for credit provided topic differs. See the Schedule of Classes for more details.

PUBH 6500. Planning and Implementing Health Promotion Programs. 3 Credits.

Students develop skills to effectively plan, design, and implement programs that address public health problems for defined populations in a variety of settings. Prerequisite: PUBH 6007.

PUBH 6501. Program Evaluation. 3 Credits.

The knowledge, competencies, and skills needed to plan and implement evaluations of public health programs in a variety of settings; types of program evaluation, including needs assessment, process evaluation, quantitative and qualitative monitoring of outputs, outcomes, and impact. Prerequisites: PUBH 6002, PUBH 6003 and PUBH 6007; and PUBH 6435 or PUBH 6500.

PUBH 6502. Practical Data Analysis for Prevention and Community Health. 1 Credit.

Practical aspects of dataset creation, data management, rudimentary statistical analysis and tabular/graphical presentation of results in the user-friendly environments of PASW (formerly SPSS) and MS Excel. Students create codebooks, enter and clean data, derive new variables from existing ones, choose appropriate analytical techniques and implement them, graph and tabulate results, and document and protect work. Examples are drawn from commonly-encountered situations in prevention and community health, such as needs assessments and program evaluations. Prerequisites: PUBH 6002, PUBH 6003 and PUBH 6500.

PUBH 6503. Introduction to Public Health Communication and Marketing. 3 Credits.

The application of health communication theories, principles and techniques, as well as marketing constructs and concepts, to advancing public health through practitioner-oriented health communication and social marketing campaigns and programs.

PUBH 6504. Social and Behavioral Science Research Methods. 3 Credits.

The processes of study design, data collection, and analysis using SPSS for quantitative research in prevention and community health. All phases of the observational/survey research process considered sequentially, from formulation of research questions to preparation of the final report. Prerequisites: PUBH 6002 and PUBH 6007; or permission of the instructor.

PUBH 6508. Cost-Effectiveness Analysis of Health Promotion Interventions. 3 Credits.

Theoretical basis for and practical skills needed to estimate the effectiveness, population impact, and cost of health promotion interventions; application to policy and cost-effectiveness and cost-utility analyses. Familiarity with basic algebra and statistics is assumed. Prerequisites: PUBH 6002 and PUBH 6003; and PUBH 6006 or PUBH 6012.

PUBH 6510. Community-Oriented Primary Care Principles and Practice. 3 Credits.

Theory and practice of community-oriented primary care, including an extended small group exercise carrying out a COPC project with a simulated community using Web-based data sets.

PUBH 6512. Community-Oriented Primary Care Policy and Issues. 2 Credits.

Advanced work on COPC methods and policy, focusing on issues related to the provision of health care in underserved communities. Prerequisite: PUBH 6510.

PUBH 6513. Community Health Management. 2 Credits.

Management and development of community health services. Builds upon principles for management and community-oriented primary care. Prerequisites: PUBH 6003 and PUBH 6510.

PUBH 6514. Preventing Health Disparities. 2 Credits.

Provides students with an understanding of how social, political, and economic factors contribute to disparities (e.g. racial, ethnic, gender, and geographical) in health and health care and how to use evidence-based approaches to prevent or address health disparities.

PUBH 6515. High Risk and Special Populations. 2 Credits.

Provides students with an overview of the methods to plan, implement and evaluation health promotion and education programs targeted towards high risk and special populations. The course reviews the socioeconomic, political-economic, cultural and psychosocial factors of populations who are considered to be at high risk for specific health problems and efforts that have been addressed in current health promotion programs. Prerequisite: PUBH 6007.

PUBH 6516. Community Health Information Resources. 2 Credits.

COPC and community health promotion require diverse information skills in order to assess community needs and strengths, determine priority health issues, analyze data, plan interventions, and evaluate programs. This course introduces students to the information resources useful in planning and implementing COPC and community health projects that address racism. The selected resources support methods for defining a community, characterizing a community's social and health characteristics, investigating a prioritized problem, and developing programs and solutions. Students learn how to choose resources, search them, and consider bias in information sources.

PUBH 6530. Qualitative Methods in Health Promotion. 2 Credits.

Application of qualitative methods in the development of health promotion interventions, evaluations, and research. Collecting and analyzing qualitative data through participant observation, interviewing, group methods, and case studies. Prerequisite: PUBH 6007.

PUBH 6531. Health Promotion in Health Care Settings. 2 Credits.

Behavioral change counseling and training skills to improve health by changing individuals' behaviors and by developing training materials for use with providers, health professionals and high risk groups. This is an advanced course for second year students. Prerequisites: PUBH 6007 and PUBH 6500.

PUBH 6532. Community Organization, Development, and Advocacy. 3 Credits.

Educates health promotion practitioners in how to organize community groups to promote health. The focus is on learning how to use resources available in the community to advocate change. Prerequisite: PUBH 6007.

PUBH 6533. Design and Conduct of Community Health Surveys. 2 Credits.

This course teaches students how to frame questions in health promotion surveys using sound principles of questionnaire design with emphasis on reliability and validity. Students learn survey design principles and methods and how to analyze survey data.

PUBH 6534. Community-Based Participatory Research. 1 Credit.

Students learn how to conduct community research in collaboration with community leaders and residents. Emphasizes the principles of CBPR for addressing health promotion issues in communities including community needs and administrative and policy changes.

PUBH 6535. Promotion of Mental Health. 2 Credits.

Increases understanding about issues in mental health promotion. The emphasis is on mental health as a public health issue and linkages between individual mental health and the environment. Prerequisite: PUBH 6007.

PUBH 6536. Workplace Health Promotion. 2 Credits.

Planning, management and evaluation of programs designed to serve employees' needs, promotion of employee health and reduction of health care costs in the workplace. Prerequisite: PUBH 6007.

PUBH 6537. Health Promotion and Aging. 2 Credits.

Introduces students to the basic health aspects of the aging process and special health promotion needs for this group. Problems of aging and public health solutions for older Americans are examined. Students are able to define the public health concerns for aging Americans, how aging is affected by a multitude of factors, identify health promotion strategies to assist in reaching out to this population and develop methods of collaboration with agencies and organizations to improve the health of the aging population. Prerequisite: PUBH 6007.

PUBH 6550. Maternal and Child Health I. 3 Credits.

Public health issues affecting the health and well-being of women, children, and families. A multidisciplinary perspective that integrates the biological, demographic, epidemiological, economic, behavioral, social, cultural and environmental aspects.

PUBH 6551. Maternal and Child Health II. 3 Credits.

.

PUBH 6552. Women's Health. 2 Credits.

Issues of women's health through the life cycle. The process of critically evaluating women's health research and issues.

PUBH 6553. Adolescent Health. 2 Credits.

Issues of physical, mental, and social development and their bearing on the health of adolescents, with special emphasis on prevention.

PUBH 6554. Children and Youth with Special Needs. 2 Credits.

In order to place children and youth with special needs into a public health framework, this course presents an introduction to and an overview of children and youth with special needs due to a developmental disability. Many aspects of developmental disability are addressed including 'concept' and definitions of disability, causes, epidemiological considerations, and development of federal legislation. The scope and range of developmental disabilities are reviewed along with classification schemes. Both national and international distributions are considered from a sociopolitical viewpoint.

PUBH 6555. Reproductive Health: U.S. and Global Perspectives. 2 Credits.

Reproductive health from a variety of public health perspectives, from defining reproductive health, past perspectives, needed improvements, and the factors that influence reproductive health.

PUBH 6556. Maternal and Child Nutrition. 2 Credits.

Covers the nutritional needs of women during the child bearing years, infants, children and adolescents. The course emphasizes the life course approach to nutrition and has a special emphasis on the effects of diet during infancy on obesity and degenerative diseases in later life. Students examine the biological basis of nutrition, identify risk factors associated with poor nutrition in individuals and populations and evaluate domestic and international programs. Summer (1 credit) and Spring (2 credits).

PUBH 6557. Child Development and Public Health. 2 Credits.

Examination of the development of children from a public health perspective and provide a detailed examination of the indicators of children's health that are needed to assist public health professionals improve children's health.

PUBH 6558. Women, Gender, and Health. 2 Credits.

Focuses on gender as a social determinant of health. Emphasis placed on examining the frameworks that are used in public health research to understand gender-based issues and how these frameworks affect the types of programs and intervention efforts developed.

PUBH 6559. HIV Prevention: An Interdisciplinary Approach. 2 Credits.

Provides an interdisciplinary overview of HIV prevention research from the behavioral, biological and biomedical perspective. Students are encouraged to approach the assignments and discussions from their own particular expertise and career interests/goals.

PUBH 6560. School Health and Safety. 1,2 Credit.

Examines the history, organization, financing, and politics of school health programs. It provides an overview of the core components of school health as defined by the Center for Disease Control and Prevention: health services, health education, physical education, nutrition services, counseling or mental health, school environmental health, health promotion, and family/community involvement. Summer (1 credit); Spring (2 credits).

PUBH 6561. Maternal and Child Health Policy Analysis. 2 Credits.

Provides instruction in maternal and child health policy in the U.S. with a particular emphasis on policies related to the organization, financing, delivery, and quality oversight of personal health services for mothers and children.

PUBH 6562. Physical Activity and Obesity Interventions: From the Individual to the Environment. 2 Credits.

This course broadly examines the public health issues related to physical activity and obesity, particularly as they relate to solutions for addressing individual factors and the obesogenic environment. Students gain a further understanding of the social, physiological, behavioral, and environmental factors related to both obesity and physical activity. The course focuses on examining multiple levels of solutions, specifically: 1) individual and behavioral interventions; 2) school-based and community-level interventions; 3) environmental interventions; 4) policy-level interventions. Students are expected to critically evaluate the necessary components of interventions, and apply that knowledge to future programmatic efforts.

PUBH 6563. Global Child Health. 2 Credits.

Elements of science, policy, challenges, and successes of global child health; focus on low and middle income countries and children under five years of age. Learn the burden of disease and associated risk factors; cost-effective interventions and tools. Restricted to graduate students.

PUBH 6570. Advanced Public Health Communication: Theory and Practice. 3 Credits.

Focuses on the use of communication to positively influence people's - and population's - understanding of health information, decision-making, and health behavior. Students study, and in a group project apply, a range of theories and techniques germane to effective message design and delivery. Prerequisite: PUBH 6503.

PUBH 6571. Social Marketing: Theory and Practice. 3 Credits.

The use of marketing to change the behavior of people, populations, and policy makers in ways that are in their, and society's, best interests. Students in this skills-based course study and work in teams to apply a range of marketing strategies to a real-world situation. Prerequisite: PUBH 6503.

PUBH 6572. Marketing Research for Public Health. 3 Credits.

The use of marketing research techniques used to better understand customers of public health programs in order to improve program design, implementation, and effectiveness. A range of qualitative and quantitative techniques are studied for their relevance to program planning, development, and continuous improvement.

PUBH 6573. Media Advocacy for Public Health. 3 Credits.

Focuses on the use of communication to positively influence public policy and public opinion. In this skills-based course students study and apply a range of theories and techniques germane to the policy advocacy process. Prerequisite: PUBH 6503.

PUBH 6574. Public Health Branding: Theory and Practice. 2 Credits.

This course focuses on the use of branding in the public health and social sectors. Learning from the commercial sector, we examine how to brand behaviors as well as products and services. We review branding methods, examine research on branding and its effectiveness, and build skills in branding for public health objectives.

PUBH 6575. Communication Skills for Public Health Professionals. 1 Credit.

Helps students develop writing and oral presentation skills through intensive, interactive training, practice, and feedback. Provides participants with a solid foundation for all forms of public health and other scientific and technical written and oral communication.

PUBH 6590. Introduction to Social Entrepreneurship. 2 Credits.

Examine innovative organizations created to improve people's lives and contribute to improved social and economic conditions. Emphasis on how such organizations are started, how they are sustained, and the various business models that are adopted to achieve an organizational mission.

PUBH 6591. PA/MPH Clinical Leadership Seminar. 1 Credit.

For first-year physician assistant and master of public health program students, an orientation to their roles as health professionals. Special emphasis on preventive and community medicine.

PUBH 6599. Topics in Prevention and Community Health. 1-3 Credits.

In-depth examination of a particular facet of prevention and community health. Topics and prerequisites vary.

PUBH 6610. Public Health Nutrition Practice and Leadership. 1 Credit.

This course provides an overview of public health nutrition practice. Students develop communication, management and leadership skills necessary for successful careers. Students also explore potential practicum and culminating experience options, and how to use these experiences to achieve their career goals. This course is designed for first year students in the public health nutrition MPH program.

PUBH 6611. Nutrition Assessment. 2 Credits.

The anthropometric, biochemical, clinical, and dietary methods for assessing nutritional status in individuals. The process of conducting food and nutrition environment assessments. Prerequisites: EXNS 2119 or PUBH 6619; or other equivalent course with permission of the instructor.

PUBH 6612. Food Systems in Public Health. 2 Credits.

A systems approach to understanding food systems and associated public health issues. How the current food system evolved, and how issues such as climate change and population growth may affect food systems in the future. The role of public health practitioners in meeting the population's need for safe, sufficient, and nutritious food. Policies, programs, and proposals aimed at creating healthier, more sustainable food systems.

PUBH 6613. U.S. Food Policy and Politics. 2 Credits.

The programs, regulations, and legislation that pertain to food production, food safety, nutrition assistance, and dietary guidance in the United States at the federal, state, and local levels.

PUBH 6619. Fundamentals of Nutrition Science. 3 Credits.

The fundamental scientific principles of human nutrition; improving diet and nutritional status in the broader context of public health; nutrition assessment, study designs in nutrition science research, the role of nutrition in chronic disease, and current topics in nutrition science.

PUBH 6620. Designing Healthy Communities. 2 Credits.

Issues at the intersection of public health and planning; evaluating needs and creating change in communities facing food access, physical activity, and age related challenges; the built environment as a means of improving health and preventing chronic disease.

PUBH 6621. Applied Data Analysis in Exercise and Nutrition Sciences. 1 Credit.

Introduction to data management and data analysis using the SAS System; data analysis procedures for specific research questions and settings within the context of exercise and nutrition sciences. Restricted to students in the MPH in physical activity in public health program, program design and evaluation track, or with the permission of the advisor. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6682. Managing Natural Resources for Food Production. 3 Credits.

The relevance of natural resource conservation for ensuring healthy agricultural, food, and environmental systems; various approaches to achieving sustainable systems. Restricted to students in the graduate certificate in food policy leadership program.

PUBH 6683. Applied Food Policy Immersion Experience. 2 Credits.

Leadership theories and an opportunity to build leadership skills and engage with food policy and agriculture leaders from a variety of sectors. Includes site visits to public and private organizations significant in food policy. Restricted to students in the graduate certificate in food policy leadership program. Prerequisites: PUBH 6680 and PUBH 6682.

PUBH 6699. Topics in Nutrition Sciences. 3 Credits.

Examination of a particular facet of nutrition sciences. Topics vary by semester. May be repeated for credit provided topic differs. See the Schedule of Classes for more details.

PUBH 6704. Health Information Technology, Informatics, and Decision Making. 3 Credits.

Operationalizing fundamental technology, processes, policies and concepts of healthcare informatics and decision management to translate data into actionable information within the framework of improving quality, safety, productivity, and experience.

PUBH 6706. Population and Community Health Analytics. 3 Credits.

Overview of the concepts of population and community health, the informatics and analytics necessary to assess population health, and best approaches for decision makers and policy makers using and communicating population and community health data.

PUBH 6850. Introduction to SAS for Public Health Research. 1 Credit.

Conducting basic data management tasks with SAS software; creating libraries, data sets, and variables, and generating basic descriptive statistics and simple graphics of public health and biomedical data.

PUBH 6851. Introduction to R for Public Health Research. 1 Credit.

Read, clean, transform, tidy, and summarize public health data in R. Explore data and write R functions to make workflow more efficient.

PUBH 6852. Introduction to Python for Public Health Research. 1 Credit.

Introduction to the basic concepts of Python programming language, illustrated with applications in biomedical sciences and health informatics.

PUBH 6853. Use of Statistical Packages for Data Management and Data Analysis. 3 Credits.

Data management and data analysis using statistical software. Creating and manipulating variables, merging and concatenating data sets, and implementing common statistical methods such as Student's t-test, linear regression, and logistic regression. Prerequisites: PUBH 6002.

PUBH 6854. Applied Computing in Health Data Science. 3 Credits.

Concepts of computing in biomedical sciences and health informatics. Foundations of Unix shell, command line tools, R and Python programming languages, and their applications in public health. PUBH 6860 may be taken simultaneously. Prerequisites: PUBH 6860. Credit cannot be earned for this course and PUBH 4201.

PUBH 6856. Advanced SAS for Public Health Research. 1 Credit.

Advanced SAS programming. Interactive Matrix Language, SAS macro facility, Structured Query Language, and SAS/GRAPH options for creating drill-down graphs to analyze public health data sets. Prerequisites: PUBH 6002; and PUBH 6249 or PUBH 6853; or permission of the instructor. Credit cannot be earned for this course and PUBH 6268.

PUBH 6859. High Performance and Cloud Computing. 3 Credits.

Introduction to high performance computing and cloud computing, including issues such as data transfer, security, virtual machines, and containers. HPC at GW, Amazon Web Services, and Google Cloud for biohealth computing. Prerequisites: PUBH 6851 and PUBH 6852 or permission of the instructor.

PUBH 6860. Principles of Bioinformatics. 3 Credits.

Biological concepts of molecular biology, genome organization, and evolution; computational concepts of alignment, database searching, phylogeny, and structure; and basic programming concepts including the shell, scripting, and databases. Prerequisites: PUBH 6002 or equivalent.

PUBH 6861. Public Health Genomics. 3 Credits.

Molecular technology and its impact on public health practice and discourse in the post-genomic era. The use of genomics to solve or help alleviate public health challenges. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6862. Applied Linear Regression Analysis for Public Health Research. 3 Credits.

Review of basic statistical inference and an overview of the construction of linear regression models for application to public health and biomedical data sets. Prerequisites: Prior completion of a course in undergraduate statistics and one semester of calculus.

PUBH 6863. Applied Meta-Analysis. 1 Credit.

Examination of meta-analysis (MA) with case studies using R. Statistical methods, including fixed- and random-effects MA; MA for binary and continuous data; heterogeneity in MA; meta-regression; and publication bias. Recommended background: Prior completion of an introductory course in biostatistical methods, such as PUBH 6002 or PUBH 6003, or an equivalent, is strongly recommended.

PUBH 6864. Applied Survival Analysis for Public Health Research. 3 Credits.

Application of survival or time-to-event data in public health studies. Censoring, survival functions, Kaplan-Meier curves, log-rank tests, Cox proportional hazards regression, parametric survival models, recurrent events, and competing risks. Prerequisites: PUBH 6249 or PUBH 6853. Recommended background: undergraduate calculus.

PUBH 6865. Applied Categorical Data Analysis. 3 Credits.

Comprehensive overview of methods for analyzing binary and multicategory response data. Contingency table methods for assessing associations and logistic regression for binary, nominal, and ordinal outcomes, including models for matched data. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6866. Principles of Clinical Trials. 3 Credits.

Introduction to basic principles for design, conduct, analysis, and reporting of clinical trials. Developing a proposal for a clinical trial. Prerequisites: PUBH 6002 or equivalent.

PUBH 6868. Quantitative Methods. 3 Credits.

Basic mathematical statistics: probability, fundamental distributions including binomial, Poisson and normal, central limit theorem, consistency, basic point estimation, hypothesis testing, linear models, and maximum likelihood estimation. Prerequisites: PUBH 6002 and prior completion of at least two courses in single variable calculus. Corequisites: PUBH 6249 or PUBH 6853.

PUBH 6869. Principles of Biostatistical Consulting. 1 Credit.

Principles and practice of biostatistical consulting and related skills and knowledge for public health and medical research environments. Recommended background: Prior completion of at least two graduate-level courses in statistics and an introductory course that discusses common health research designs, such as PUBH 6003, or their equivalent is strongly recommended. Credit cannot be earned for this course and PUBH 6258.

PUBH 6879. Propensity Score Methods for Causal Inference in Observational Studies. 3 Credits.

Designing observational studies; drawing causal inferences using propensity score methods; and performing propensity score analysis using R with hands-on data. Prerequisites: PUBH 6851 and PUBH 6865 or permission of the instructor.

PUBH 6883. Biostatistics Consulting Practicum. 1 Credit.

Supervised experiences involving the synthesis of biostatistical skills with consultations in one or more areas of health research. Students in the MPH programs in biostatistics and in epidemiology may register with permission of the instructor. Restricted to students in the MS in biostatistics and MS in epidemiology programs. Recommended background: Prior completion of at least two graduate-level courses in statistics and an introductory course that discusses common health research designs, such as PUBH 6003, or their equivalent is strongly recommended.

PUBH 6884. Bioinformatics Algorithms and Data Structures. 3 Credits.

Algorithmic foundations of bioinformatics, ranging from generic algorithmic techniques to specific algorithms used in various areas of bioinformatics. Theoretical background is complemented with solving practical problems. Prerequisites: PUBH 6854 or equivalent. Credit cannot be earned for this course and PUBH 4202.

PUBH 6885. Computational Biology. 3 Credits.

Introduction to modern computational biology, including omics data science, high-throughput technologies, multi-omics data integration, and analytical methods with real-world applications. Permission of the instructor is required prior to enrollment.

PUBH 6886. Statistical and Machine Learning for Public Health Research. 3 Credits.

Application and evaluation of supervised and unsupervised statistical and machine learning algorithms in the context of biomedical and public health research. Permission of the instructor is required prior to enrollment.

PUBH 6887. Applied Longitudinal Data Analysis for Public Health Research. 3 Credits.

Introduction to commonly used methods for longitudinal data analysis including fixed effects models, linear and generalized linear mixed effects models, and generalized estimating equations. Missing data. Prerequisites: PUBH 6862 and PUBH 6965; and PUBH 6868, or PUBH 8364, or STAT 6201 and STAT 6202.

PUBH 6894. Research Analytics. 3 Credits.

Key concepts in research analytics; skills and experiences needed to leverage big data to improve public health through data integration.

PUBH 6897. Research in Biostatistics and Bioinformatics. 1-4 Credits.

Independent research. Must be approved in advance by advisor/instructor. Restricted to graduate students in the Department of Biostatistics and Bioinformatics.

PUBH 6898. Master of Science Thesis. 1-2 Credits.

Master's thesis.

PUBH 6899. Topics in Biostatistics and Bioinformatics. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details.

PUBH 6999. Master of Science in Epidemiology Thesis. 2 Credits.

Thesis research. Restricted to students in the MS in epidemiology program.

PUBH 8010. Doctoral Independent Study. 1-3 Credits.

Doctoral students complete an independent study plan to meet predetermined project and/or research work under the supervision of a faculty member. Restricted to GWSPH doctoral students.

PUBH 8110. Research Rotations. 2 Credits.

Students conduct formal rotations with a laboratory or research group to gain research and reporting experience with the mentorship of EOH faculty. Includes identification of an environmental health research problem, collection or analysis of data, and reporting on the results. May be repeated for credit. Restricted to students in the PhD in environmental program or with the permission of the instructor.

PUBH 8116. Communicating Research Results. 2 Credits.

The importance of strategic communication to public health progress. Students gain communication skills that help to transcend educational barriers and facilitate connections with peers, policymakers, and the broader public. Restricted to doctoral students who have satisfactorily completed the comprehensive examination or with the permission of the dissertation chair.

PUBH 8144. Advanced Environmental Health Data Development and Modeling. 1 Credit.

Advanced doctoral level material on environmental exposure assessment using methods covered in PUBH 6144. Restricted to doctoral candidates. Prerequisites: PUBH 6131 or PUBH 6853. Corequisites: PUBH 6144.

PUBH 8242. Advanced Topics in Clinical Epidemiology and Public Health: Reading the Research. 1 Credit.

Evidence-based problem-solving approach using methods covered in PUBH 6242. Restricted to doctoral students. Prerequisites: PUBH 6003 or equivalent. Corequisites: PUBH 6242. Credit cannot be earned for this course and PUBH 6243.

PUBH 8244. Doctoral Topics: Cancer Epidemiology. 1 Credit.

Course focuses on critical review and interpretation of cancer epidemiology literature as well as issues in research design in the field. Prerequisites: PUBH 6001 and PUBH 6003. Corequisites: PUBH 6244.

PUBH 8245. Doctoral Topics: Infectious Disease Epidemiology. 1 Credit.

Provides doctoral level material on the content of infectious disease epidemiology. The course focuses on critical review and interpretation of infectious disease literature as well as issues preparing an analytic research paper on an emerging infectious disease and the application of tools used to describe the epidemiology of those diseases. Spring Prerequisites: PUBH 6003. Corequisites: PUBH 6245.

PUBH 8250. Doctoral Topics: Epidemiology of HIV/AIDS. 1 Credit.

Students select specific topic within area of HIV/AIDS epidemiology. Options include responding to a data analysis problem; responding to a methodological problem found within HIV/AIDS research; or another topic approved by instructor. Prerequisites: PUBH 6001 and PUBH 6003. Corequisites: PUBH 6250.

PUBH 8259. Doctoral Topics: Epidemiologic Surveillance in Public Health. 1 Credit.

Course provides doctoral level material on the content of surveillance offered in PUBH 6259. Focus is on critical review and interpretation of surveillance literature as well as issues preparing an analytic research paper. Prerequisites: PUBH 6002 and PUBH 6003. Corequisites: PUBH 6259.

PUBH 8283. Doctoral Biostatistics Consulting Practicum. 2 Credits.

Working under supervision, students develop an experience-based understanding of how biostatistical skills are used in one or more areas of health research. Students must have completed at least 6 credits in any combination of general or specialized graduate-level statistics courses, such as PUBH 6202, PUBH 6260, STAT 6201, or STAT 6202, before enrolling in this course. Restricted to PhD students.

PUBH 8364. Quantitative Methods. 3 Credits.

Introduces basic concepts in mathematical statistics. Topics include probabilities (unconditional and conditional), density and distribution functions of continuous and discrete random variables, including expected values. Specific distribution functions discussed are Binomial, Poisson, Hypergeometric, and Gaussian distributions. Additional topics include bivariable distributions, variance-covariance matrix, limiting theory, asymptotic results, and maximum likelihood estimation. Prerequisites: MATH 1231 and MATH 1232; and PUBH 6002 and PUBH 6249.

PUBH 8365. Design of Medical Studies. 3 Credits.

Design of medical investigations, including the randomized clinical trial, observational cohort study, and the retrospective case-control study. Specific methods regarding sample size, power and precision and statistical procedures for randomization and sampling. Ethics of clinical trials and the intention-to-treat principle. Prerequisite: PUBH 6002.

PUBH 8366. Biostatistical Methods. 3 Credits.

Biostatistical methods for asymptotically efficient tests and estimates of relative risks and odds ratios from prospective and retrospective matched and unmatched studies. Fixed and random effects models. Logistic regression, conditional logistic regression. Poisson regression. Maximum likelihood and efficient scores. Prerequisites: STAT 6202 or permission of the instructor.

PUBH 8401. Foundations in Public Health Leadership. 3 Credits.

Course modules cover personal leadership; leadership models, theories, concepts, tools, and skills; and practical application of leadership to real world situations. Restricted to doctoral candidates.

PUBH 8402. Leadership and Decision Making: Skills Based Approach. 2 Credits.

Using leadership and decision making skills to solve complex health problems and implement successful solutions to improve population health in all communities; decision making, program management, quality and risk management, human resources and budget, governance, and change management.

PUBH 8403. Leadership in Public Health Policy and Practice. 2 Credits.

Students work in teams on projects for clients from public health-related agencies or organizations in the Washington, DC, area that address issues in environmental and occupational health, global health, health behavior, and health policy. Restricted to students in the DrPh program. Prerequisite: PUBH 8402.

PUBH 8404. Advanced Topics: Health Systems and Health Policy Research. 3 Credits.

Examination and assessment of issues related to the intersection of health care systems and health policy, and how health policy and health services research can inform the development and evaluation of health care systems and health policy. Restricted to doctoral candidates. Prerequisite: PUBH 6315.

PUBH 8405. Advanced Topics: Health Economics Research. 3 Credits.

Critical financing issues for U.S. public health and health care services and systems. The role of health services research in understanding the effects of these issues and informing the deliberations and decisions of policymakers.

PUBH 8406. Advanced Topics: Health Research in the Global Arena. 3 Credits.

Alternative field methods adopted from sociology, anthropology, economics, and political sciences for social sciences and policy research. Builds data collection, instruments, measurements, indicators, and data analysis and interpretation skills in specific socio-cultural contexts. Ethical issues in international research.

PUBH 8407. Advanced Topics: Health Leadership in International Settings. 3 Credits.

Doctoral students develop the tools and experiences needed to build capacity for leadership in global health. Prerequisite: PUBH 8406.

PUBH 8408. Advanced Topics: Health Behavior Research & Practice Applications. 3 Credits.

Advanced topics relating theory to practice in areas of health education and behavioral change. Application of qualitative and quantitative research to health related behavior at individual and community levels.

PUBH 8409. Advanced Topics: Health Communication Research. 3 Credits.

Methods of communications research designed to alter health behavior. Emphasis on critical analysis of communications research aimed at the mass public, groups, and interpersonal level.

PUBH 8411. Advanced Topics: Principles of Human Health Risk Science. 3 Credits.

This course provides the doctoral student with a comprehensive orientation to the frameworks, principles and issues involved in assessing, managing and communicating environmental health risks. This fundamental, interdisciplinary course is designed to foster dialogue and insights about contemporary risk science and management issues, including ethical concerns and technical issues that influence policy making. Restricted to students in the environmental and occupational health program, or with permission of the instructor.

PUBH 8412. Advanced Topics: Environmental and Occupational Health Research and Practice. 3 Credits.

This course exposes students to the theory and reality of both research and practice in environmental and occupational health. There is an emphasis on the use of public health science in policy and regulatory decisions. Prerequisites: PUBH 8411 or permission of the instructor.

PUBH 8413. Research Leadership. 1-10 Credits.

Students participate in a range of activities designed to develop and enhance their research methods and analytic skills. These activities include participating in the development and submission of sponsored research proposals; being formally affiliated with a research project, assuming responsibility for completing a real-world research project; engaging in empirical data collection and analysis efforts.

PUBH 8414. Policy and Management Leadership. 1-10 Credits.

Students develop and enhance their management, leadership, and policymaking skills for problem solving in real-world settings; public health departments, community health centers, legislative settings, and public or teaching hospitals.

PUBH 8415. Instructional Leadership. 1-10 Credits.

Students participate in a range of activities designed to develop and enhance their teaching skills. These activities include course development, teaching master's level courses, acting as TA for undergraduate courses, advising students about their class performance, evaluating student performance, and developing remedial programs for students.

PUBH 8416. Study Design & Evaluation Methods. 3 Credits.

Prepares doctoral students to design and conduct program and policy evaluation in public health. Intensive introduction to the principles of study program design and evaluation research emphasizing the ability to synthesize the population-based intervention literature, apply planning and management methods, describe and apply research methods from a range of disciplines, and prepare a program research proposal.

PUBH 8417. Qualitative Research Methods and Analysis. 3 Credits.

Techniques for designing and conducting qualitative research and for analyzing and reporting qualitative data relevant to program development and implementation, community assessment, and policy analysis. Prerequisites: PUBH 8416.

PUBH 8418. Applied Statistical Analysis. 3 Credits.

Intensive course in data management and data analysis using STATA®. Database management system techniques and data analytical strategies for the appropriate analysis of data sets obtained from a variety of studies will be presented. The student will manipulate national data sets from epidemiological studies as well as Demographic and Health Survey (DHS) data. Prereq: PubH 8416.

PUBH 8419. Measurement in Public Health and Health Services. 3 Credits.

Review principles of measurement and assessment as they apply to public health and health services research constructs, review existing state-of-the-art measures of individual and population health status (e.g., morbidity, mortality, functioning and health-related quality of life) and of individual and community health behavior. Explore current measurement issues in health research.

PUBH 8420. Advanced Analysis and Dissemination. 3 Credits.

Advanced multivariate data analyses of complex datasets and programs, including advanced cross-sectional techniques, time-series analysis, and the use of panel data. Evaluation of results, and dissemination of findings to relevant stakeholders. Fall. Prerequisites: PUBH 8417 and PUBH 8418.

PUBH 8422. Advanced Health Care and Public Health Research Design. 2 Credits.

Design of protocol suitable for implementation as part of DrPH dissertation requirement. Permission of the instructor, completion of required coursework, and successful completion of the comprehensive examination required prior to enrollment.

PUBH 8423. Dissertation Research. 1-12 Credits.

Dissertation research for DrPH. Prerequisite: PUBH 8422.

PUBH 8434. Behavioral Medicine and Public Health. 3 Credits.

Investigation into the field of behavioral medicine, which integrates behavioral, psychosocial, and biomedical sciences, with specific applications to public health. Restricted to PhD students in the social and behavioral sciences in public health program or with the permission of the instructor.

PUBH 8435. Dissertation Proposal Development for Social and Behavioral Sciences. 2 Credits.

Advise and assist doctoral students in developing and defending their dissertation proposal. Restricted to doctoral students who have successfully completed comprehensive examinations.

PUBH 8610. Statistical Methods for Health Policy. 3 Credits.

Application of statistical analysis in health policy and public health research using Stata® to analyze a variety of large public health data sets. Prior completion of at least one graduate-level statistics course is required. Restricted to doctoral students. Credit cannot be earned for this course and PUBH 6310.

PUBH 8620. Seminar: Foundations of U.S. Health Policy. 3 Credits.

Reintroduction to the basics of U.S. health policy, combining advanced legal, policy, and regulatory content acquisition with advanced health law and policy analysis skills. Restricted to doctoral students in health policy or with the permission of the instructor.

PUBH 8622. Health Care Payments, Systems, and Delivery Models. 3 Credits.

Survey of long-standing practices and recent developments in provider payment and the organization of health care delivery in the United States. Restricted to doctoral students in the health policy program or with the permission of the instructor.

PUBH 8875. Linear Models in Biostatistics. 3 Credits.

Introduction to the theory of linear models with applications to public health and biomedical data. Least squares, maximum likelihood, and distribution theory for linear regression. Prerequisites: PUBH 6862; and PUBH 6868 or PUBH 8364 or STAT 6201. Corequisites: STAT 6202. Recommended background: prior completion of coursework in linear algebra and multivariable calculus.

PUBH 8877. Generalized Linear Models in Biostatistics. 3 Credits.

Theoretical development of most commonly used methods for categorical and count data presented within the unified framework of the generalized linear model. Prerequisites: PUBH 6865; and PUBH 6868, or PUBH 8364, or STAT 6201 and STAT 6202. Recommended background: prior completion of coursework in linear algebra.

PUBH 8878. Statistical Genetics. 3 Credits.

Application of statistical concepts to family- and population-based genetic data. Human evolution, genome-wide association studies, gene-environment interactions, and genetic architecture with emphasis on applications to real data and analyses. Prerequisites: PUBH 6860.

PUBH 8999. Dissertation Research. 1-12 Credits.

Dissertation research.

EPIDEMIOLOGY

The Department of Epidemiology integrates diverse educational programs with a rapidly growing research portfolio. Graduate students have the opportunity to study and participate in faculty research projects in a variety of academic disciplines, including infectious disease, cancer, nutritional and disaster epidemiology, and public health laboratory science. In their practicum, students work closely with scientists at local health departments, the NIH and other federal agencies, academic institutions, and international health organizations.

By exploring the core quantitative sciences of public health and taking advantage of opportunities to learn by doing, students are prepared to become the next generation of public health leaders and practitioners.

GRADUATE

Master's programs

- Master of Public Health in the field of epidemiology (p. 1338)
- Master of Science in the field of epidemiology (p. 1360)
- Master of Science in the field of public health microbiology and emerging infectious diseases (p. 1362)

Doctoral programs

- Doctor of Philosophy in the field epidemiology (p. 1379)

FACULTY

Professors A.D. Castel, A.E. Greenberg (*Chair*), L.A. Guay (*Research*), J.A. Jordan, M. Magnus, R.K. Riegelman, D.A. Verme, H.A. Young

Associate Professors D.H. Bernat, B.H. Braffett (*Research*), S.D. Cleary, R.G. Clifton (*Research*), M. Ghosh, K.A. Jablonski (*Research*), I. Kuo (*Research*), A.K. Monroe, M.M. Rice (*Research*)

Assistant Professors R.K. Doshi (*Research*), C.A.B. MacPherson (*Research*), H.A. Muse, J.A. Peterson (*Research*), M. Power, S.C. Quinlan (*Teaching*), M.I. Ulfers (*Teaching*)

Adjunct Professor C.L. Ogden

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PUBH 0920. Continuing Research - Master's. 1 Credit.
Continuing Research Credit- Master's Level.

PUBH 0940. Continuing Research - Doctoral. 1 Credit.
Continuing Research Credit- Doctoral.

PUBH 1010. First-Year Experience in Public Health. 1 Credit.

Designed to assist students in the transition to GW and the public health major by introducing skills and resources needed to succeed personally, academically, and professionally, particularly in a public health context.

PUBH 1099. Variable Topics. 1-36 Credits.

PUBH 1101. Introduction to Public Health and Health Services. 3 Credits.

Introduction to aspects of public health and health services, including health services administration and policy, maternal and child health, environmental health, and health promotion.

PUBH 1102. History of Public Health. 3 Credits.

Historical and philosophical development of public health and its contributions to understanding, preventing, and controlling disease and disabilities.

PUBH 1102W. History of Public Health. 3 Credits.

Social history of public health from the late nineteenth century to the present; historical context for contemporary public health problems. Includes a significant engagement in writing as a form critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: UW 1020.

PUBH 1299. Undergraduate Public Health Study Abroad. 1-6 Credits.

May be repeated for credit when multiple courses with distinct subject matter are taken as part of a study abroad program.

PUBH 2110. Public Health Biology. 3 Credits.

Basic scientific mechanisms, concepts, and principles in health and the pathogenesis of diseases; a foundation for applications to public health. Prerequisites: BISC 1005; or BISC 1111.

PUBH 2112. Principles of Health Education and Health Promotion. 3 Credits.

Social and behavioral theories underlying health promotion program development and evaluation. Practical applications in a variety of domestic and global public health settings. PUBH 1101 may be taken as a corequisite. Prerequisite: PUBH 1101.

PUBH 2113. Impact of Culture upon Health. 3 Credits.

Relationships between cultural values and the development of modern health systems based on Western models of health care practice. Reliance upon traditional forms of health care. Examples of successful incorporation of traditional practices into evolving health care systems.

PUBH 2114. Environment, Health, and Development. 3 Credits.

Survey of the relationship between health and development and environmental trends. Topics include deforestation, urban contamination, and desertification.

PUBH 2115. Health, Human Rights, and Displaced Persons. 3 Credits.

Concepts of health as a human right, ethics, and the participation of the international community in moving toward health for all. Civil and international conflict in the generation of displaced populations.

PUBH 2116. Global Delivery of Health Systems. 3 Credits.

Introduction to health systems and the basic concepts of health systems administration and financing and health care reform with examples from advanced, middle income, and poor countries.

PUBH 2117. Service Learning in Public Health. 3 Credits.

A service-learning course that combines classroom instruction with practical learning. Students are responsible for securing an approved service site before the beginning of the semester; the instructor is available to assist with this placement.

PUBH 3115. Global Health and Human Rights. 3 Credits.

Concepts of health as a human right and the impact of ethical violations on the mental and physical health of individuals; the efforts of the international community in addressing health consequences of vulnerable populations.

PUBH 3116. Global Health Systems Performance. 3 Credits.

Introduction to the U.S. and international health systems, both public and private, and the WHO Health Systems Framework; how environmental, ethical, cultural, and political actions shape health systems in different parts of the world. Restricted to juniors and seniors.

PUBH 3130. Health Services Management and Economics. 3 Credits.

Basics of management theory, finance, and economics as applied to managing in the public health and health services field. Prerequisite: ECON 1011.

PUBH 3131. Epidemiology: Measuring Health and Disease. 3 Credits.

Principles of epidemiology applied to disease surveillance, control of infectious and chronic diseases, and health services/health policy. Understanding the basic research designs and their relationship to establishing cause and effect and effectiveness of interventions to prevent and cure disease. Prerequisites: PUBH 1101 and STAT 1127.

PUBH 3132. Health and Environment. 3 Credits.

Introduction to environmental and occupational health and implications for individual and population health. Issues of clean water, environmental toxins, air pollution, and the environmental impact on infectious diseases.

PUBH 3133. Global Health and Development. 3 Credits.

Political, social, and economic determinants of health; how health status is measured with an emphasis on low-income countries, the health of the poor, and inequity and inequality; burden of diseases that impact development and their basic epidemiological characteristics, including who they affect, when they occur, and where risk is greatest.

PUBH 3135W. Health Policy. 3 Credits.

An introduction to the fundamentals of the health care system in the United States and strategies available to policymakers when addressing problems relating to access, financing, and delivery of health care. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: PUBH 1101.

PUBH 3136. Health Law. 3 Credits.

Legal concepts related to individual health care and public health systems in the United States. Health care law, public health law, and bioethics.

PUBH 3137. Global Public Health Nutrition. 3 Credits.

Consideration of hunger and other nutrition issues globally, including food insecurity, under/over nutrition, and micronutrient deficiencies. Application of UNICEF malnutrition framework to describe vulnerable groups, critique program strategies, and identify multisectorial strategies to reduce hunger and malnutrition. Prerequisite: PUBH 3133.

PUBH 3142. Introduction to Biostatistics for Public Health. 3 Credits.

Applying biostatistical principles to analyze studies in health services literature. Selecting statistical methods based on research questions, calculating basic statistics for estimation and inference, interpreting results of statistical analyses.

PUBH 3150. Sustainable Energy and Environmental Health. 3 Credits.

Sustainability issues from the perspective of environmental health. Technical, social, and health implications of specific energy sources. Energy conservation and efficiency in the context of population growth, food and water resources, and maintenance of a healthy environment for future generations.

PUBH 3151. Current Issues in Bioethics. 3 Credits.

General and specific ethical questions and ethical decision making from both personal and organizational perspectives; right to health care, research with human subjects, reproductive technology, genetics, professional and student roles and responsibilities, and end-of-life issues.

PUBH 3151W. Current Issues in Bioethics. 3 Credits.

General and specific ethical questions and ethical decision making from both personal and organizational perspectives; right to health care, research with human subjects, reproductive technology, genetics, professional and student roles and responsibilities, and end-of-life issues. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

PUBH 3152. Qualitative Research Methods in Public Health. 3 Credits.

Introduction to characteristics and methods relevant to the design and conduct of qualitative research in public health investigations; data collection methods, coding, data analysis, and reporting results.

PUBH 3199. Topics in Public Health. 1-5 Credits.

Topics vary by semester. See the Schedule of Classes for more details. May be repeated for credit provided the topic differs.

PUBH 3201. Introduction to Bioinformatics. 3 Credits.

Introduction to bioinformatics, including biological concepts of molecular biology, genome organization, and evolution; computational concepts of alignment, database searching, phylogeny, and structural bioinformatics; and programming concepts in Unix and Python including the Unix environment, the shell, scripting, databases, regular expressions, and pipeline development. Prerequisites: BISC 1112 or BISC 1116 and BISC 1126; and STAT 1127. Credit cannot be earned for this course and BISC 2584, CSCI 3571.

PUBH 3202. Introduction to Genomics. 3 Credits.

Principles of genomics; genome projects, including the human genome, molecular techniques, analytical approaches, computational tools for genome research, and genomic data generation and analysis. Prerequisites: BISC 1111; BISC 1112.

PUBH 3299. Undergraduate Public Health Study Abroad. 1-6 Credits.

May be repeated for credit when multiple courses with distinct subject matter are taken as part of a study abroad program.

PUBH 3995. Undergraduate Research. 1-3 Credits.

Students work under the mentorship of a faculty member to acquire knowledge and skills central to the design, conduct, and/or analysis of scientific research. Project proposal must be approved by the instructor and dean's office prior to enrollment. Credit cannot be earned for this course and EXNS 3995.

PUBH 4140W. Senior Seminar. 3 Credits.

Students develop a public health intervention incorporating various domains of the discipline of public health. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Restricted to public health majors in their senior year. Prerequisite: PUBH 3130.

PUBH 4141. Senior Seminar Community Needs Assessment. 3 Credits.

Culminating experience for students in undergraduate public health programs. Restricted to seniors in the BS in public health program and students in the minor in public health.

PUBH 4199. Independent Study. 3 Credits.

Outline of intended project must be approved prior to registration by instructor and dean's office. Restricted to public health majors.

PUBH 4201. Practical Computing. 3 Credits.

Basic concepts of computer programming in biomedical sciences and health informatics; foundations of R and Python languages; best programming practices in health applications. Prerequisites: BISC 1111 and BISC 1115; or BISC 1112 and BISC 1116.

PUBH 4202. Bioinformatics Algorithms and Data Structures. 3 Credits.

Algorithmic foundations of bioinformatics, ranging from generic algorithmic techniques to specific algorithms used in various areas of bioinformatics. Prerequisite: PUBH 4201.

PUBH 6002. Biostatistical Applications for Public Health. 3 Credits.

Application of biostatistical principles to critical analysis of retrospective studies, prospective studies, and controlled clinical trials, as well as studies in the health services literature. Selection, basic calculations, and interpretation of statistical methods for detection of significant associations and differences.

PUBH 6003. Principles and Practices of Epidemiology. 3 Credits.

General principles, methods, and applications of epidemiology. Outbreak investigations, measures of disease frequency, standardization of disease rates, study design, measures of association, hypothesis testing, bias, effect modification, causal inference, disease screening, and surveillance. Case studies apply these concepts to a variety of infectious, acute, and chronic health conditions affecting the population.

PUBH 6007. Social and Behavioral Approaches to Public Health. 2 Credits.

Social and behavioral science theories, models, and concepts that can be applied to public health problems and interventions. The role of social and community factors, including race, ethnicity, and culture, in both the onset and solution of public health problems; the interrelationship between the social and behavioral sciences.

PUBH 6009. Fundamentals of Public Health Program Evaluation. 2 Credits.

Topics include designing program evaluation studies to produce and interpret evidence to improve public health; options for evaluation study design and evidence generation; and qualitative data collection and analysis methods. Prerequisites: PUBH 6007. Recommended background: Prior completion of PUBH 6002.

PUBH 6010. Independent Study. 1-6 Credits.

Designed to provide the student with an opportunity to gain or enhance public health knowledge and to explore an area of interest related to public health research or the delivery and/or administration of health services. Permission of the instructor or advisor required prior to enrollment.

PUBH 6011. Environmental and Biological Foundations of Public Health. 3 Credits.

The connection between population health and exposures to chemical, physical, and biological agents in the environment; interconnection between dimensions of environmental systems and all living things; biological sciences as they relate to environmental impacts.

PUBH 6012. Fundamentals of Health Policy. 2 Credits.

Comparative study of the structure, financing, and delivery of public health and health care in the United States and abroad; core elements of policy analysis are used to develop skills in analyzing a public health problem and presenting possible solutions both orally and in writing.

PUBH 6013. Master's Thesis. 3 Credits.

See Advisor.

PUBH 6014. Practicum. 1-3 Credits.

This course provides the opportunity for MPH students to apply the knowledge and skills acquired through their programs of study. A planned, supervised and evaluated practice experience that is relevant to the student's program is an essential component of a public health professional degree program. These opportunities can take place in a variety of agencies or organizations. Each program customizes Practicum requirements to meet students' needs. (Credit/No Credit) [For 45-credit MPH students who started Summer 06 or after.].

PUBH 6015. Culminating Experience. 1-3 Credits.

Students synthesize and integrate knowledge acquired in coursework and other learning experiences and apply theory and principles to a situation that approximates some aspect of professional practice. Program faculty evaluate student's mastery of the body of knowledge and ability to demonstrate proficiency in the required competencies. Requirements evaluated are adapted to the degree program.

PUBH 6016. Field/Laboratory Experience. 2 Credits.

The overall purpose of the field/laboratory experience requirement is to introduce students in the MS-PHMEID degree program to a supervised practical experience in a Public Health Laboratory or other qualifying public health entity from the perspective of the actual wet laboratory operations. Students that already have this laboratory experience are introduced to epidemiologic research, particularly surveillance, and its tie-in with laboratories either in the United States or in an international setting.

PUBH 6021. Essentials of Public Health Practice and Leadership I. 1 Credit.

The skills necessary for being an effective practitioner and leader; optimizing self-management and contributions in teams as public health professionals.

PUBH 6022. Essentials of Public Health Practice and Leadership II. 1 Credit.

The development of organizations and systems in public health; organizational management tools and collaborative, outcome-oriented advocacy techniques. PUBH 6021 may be taken as a corequisite. Prerequisite: PUBH 6021.

PUBH 6023. Interprofessional Education Experience. 0 Credits.

Completion of an interprofessional education experience (IPE) is required for all MPH students. Maximizes the student's capacity for collaboration with others to better address public health and health care challenges. A variety of options are available for students to complete this requirement before graduation. Restricted to MPH students. Prerequisites: PUBH 6002, PUBH 6003, PUBH 6007, PUBH 6011, PUBH 6012, and PUBH 6021.

PUBH 6050. Introduction to Health Services Delivery. 2 Credits.

Introduction to the systems that define and shape delivery of health services in the United States. Case studies and presentations on major issues develop an appreciation of dilemmas confronting policymakers, providers, and patients: balancing cost, quality and access. Access and disparity, health care professions, facilities, managed care organizations and government health care programs. Policy changes that have had major impact on American health care in the past century. Fall.

PUBH 6052. Practical Data Management and Analysis for Public Health. 2 Credits.

Practical aspects of dataset creation, data management, rudimentary statistical analysis, and tabular and graphical presentation of results. Creating codebooks, entering and cleaning data, deriving new variables from existing ones, choosing and implementing appropriate analytical techniques, graphing and tabulating results, and documenting and protecting work. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6054. Community Engagement and Advocacy. 2 Credits.

Tools and strategies for public health practitioners to understand, respect, organize, and collaborate with community groups and organizations for promotion of healthy behaviors. Development of practical skills to harness available resources in a community to advocate for healthy living and positive health outcomes.

PUBH 6056. Public Health Leadership Seminar. 1 Credit.

Leadership lessons taken from the careers of a diverse group of executives and entrepreneurs from the corporate, government, nonprofit, and art sectors. Leadership theory and styles. Building networks; skills for effectively engaging with peers, potential employers, and business partners.

PUBH 6058. Researching Violence Against Women and Girls. 2 Credits.

The intersection of violence against women and girls (VAWG) and public health; the impact that violence has on the health of the survivor, her current and future children, and communities; methods and best practices for designing applied research on VAWG. Prerequisites: PUBH 6002, PUBH 6003, PUBH 6007, PUBH 6011 and PUBH 6012.

PUBH 6060. MPH@GW Culminating Experience I. 1 Credit.

Students integrate and apply the skills, knowledge, theories, principles, and methods of public health practice to a public health issue. Most students will have completed PUBH 6014 or PUBH 6022 and other MPH core coursework prior to enrollment. Restricted to students in the MPH@GW program. Prerequisites: PUBH 6002, PUBH 6003, and PUBH 6007; and PUBH 6004 or PUBH 6011; and PUBH 6006 or PUBH 6012; and PUBH 6009 or PUBH 6437.

PUBH 6061. MPH@GW Culminating Experience II. 1 Credit.

Students integrate and apply the skills, knowledge, theories, principles, and methods of public health practice to a public health issue. Students may already have completed PUBH 6060 or it may be taken as a corequisite. Restricted to students in the MPH@GW program. Prerequisites: PUBH 6060.

PUBH 6080. Pathways to Public Health. 0 Credits.

Introduces the 12 foundational public health learning objectives to GWSPH students in non-MPH graduate programs. Must be completed before the last day of classes in the student's first semester of matriculation.

PUBH 6090. Practicum/Culminating Experience. 4 Credits.

Individually tailored. Culminating Experience for the MPH program. Permission of the advisor required prior to enrollment.

PUBH 6091. Special Project. 1-4 Credits.

Under faculty supervision, the student undertakes an original project that applies the skills and knowledge gained in the chosen track and/or concentration within the MPH program. Prerequisite: Permission of the instructor. NOTE that credits vary by program; please consult your program plan to register for the appropriate number of credits. [For 36-credit MPH students only].

PUBH 6099. Topics in Public Health. 3 Credits.

In-depth examination of a particular facet of public health. Topics vary by semester. See the Schedule of Classes for more details. May be repeated for credit provided the topic differs.

PUBH 6121. Environmental and Occupational Epidemiology. 3 Credits.

Demonstration and application of epidemiologic methods for the study of environmental and occupational health problems; epidemiologic exposure assessment methods and methods relevant to cohort, case-control, cross-sectional, and case cross-over studies; survey design and sources and evaluation of biases and confounding; emphasis on written and oral communication skills. Prerequisites: PUBH 6002 and PUBH 6003; and PUBH 6004 or PUBH 6011.

PUBH 6122. Protecting Public Health and the Environment: Policies, Politics, and Programs. 3 Credits.

The legislative, regulatory, judicial, and political system in the United States developed to protect human health and the environment. National and global public and environmental health agencies, policy development, and current topics. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6123. Toxicology: Applications for Public Health Policy. 3 Credits.

Toxicology as both a scientific discipline and a source of information for public health policy with respect to the regulation of foods, pesticides, drugs (pharmaceuticals), environmental chemical pollutants, and other chemicals that may affect human and environmental health. How chemicals interact with biological systems to produce adverse effects. The ways in which toxicologic information is developed and applied to regulatory decision making and the use of toxicology in regulatory risk assessment. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6124. Risk Management and Communication. 3 Credits.

Culminating course using problem-based learning methods to examine a variety of real-world environmental and occupational health issues in-depth. Students integrate cumulative knowledge across all required courses and demonstrate professional competencies. Prerequisites: PUBH 6121, PUBH 6123 and PUBH 6126.

PUBH 6126. Assessment and Control of Environmental Hazards. 3 Credits.

Introduces the anticipation, recognition, assessment, and control of hazards in the workplace and the ambient environment. It emphasizes an understanding of the characteristic features of specific hazards, which may be chemical, biological, or physical/ergonomic.

PUBH 6127. Introduction to Environmental Health Microbiology. 2 Credits.

Basics of public health microbiology as it relates to the environment, food, water, and bioterrorism. Examines from an environmental health perspective how the principles of microbiology are applied to current and emerging public health issues, whether from intentional or unintentional contamination of the environment. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6128. Global Environmental and Occupational Health. 2 Credits.

Examination of the global environmental and occupational health factors that contribute significantly to the global burden of disease, focusing primarily on low- and middle-income countries; principles from behavioral sciences, development economics, risk assessment, and epidemiology are included; potential solutions to environmental health problems, metrics used to measure impacts, and areas for future research. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6130. Sustainable Energy and the Environment. 2 Credits.

The sustainability of various energy strategies, including energy conservation, green building principles, renewable energy, and mitigation and adaption policies for climate change. Emphasis on the life cycle framework. Topics include natural resource depletion, water and energy consumption, and air, water, and solid waste pollutant emissions. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6131. Quantitative Methods in Environmental and Occupational Health. 3 Credits.

Application of biostatistical and epidemiologic concepts and methods to analysis of EOH data. Development and practice of skills needed for analyzing complex exposures and communicating environmental and occupational research findings. Prerequisites: PUBH 6002 and PUBH 6003; and PUBH 6004 or PUBH 6011.

PUBH 6132. Water, Sanitation, and Hygiene (WASH) in Low-Income Countries. 2 Credits.

Introduction to working in both disaster and development settings in countries where contaminated water, inadequate sanitation, and poor hygiene (WASH) cause serious health problems. Students gain practical experience applying WASH methods in the field. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6133. Social Dimensions in Climate Change and Health. 3 Credits.

The drivers of climate change and outcomes with particular focus on health dimensions; obstacles, vulnerabilities, inequality, and adaptation as well as technical and social solutions.

PUBH 6135. Researching Climate Change and Human Health. 3 Credits.

Study of the effects of climate change on human health using evidence compiled by the National Climate Assessment (NCA); widespread impacts, ecological context, oceans of change, infrastructure, water resources, energy, land use, heat, and air quality. Recommended background: PUBH 6003 and PUBH 6004.

PUBH 6136. Introduction to Environmental and Occupational Epidemiology. 3 Credits.

Epidemiologic research designs; methods for the study of environmental and occupational health problems; exposure assessment methods; design aspects of cross-sectional, case-control, cohort, and case cross-over studies; sources and evaluation of biases and confounding; survey and questionnaire design. Prerequisites: PUBH 6002, PUBH 6003 and PUBH 6011.

PUBH 6137. Environmental and Occupational Health Culminating Experience I. 1 Credit.

The first in a two-course sequence. The final, integrative learning experience for the MPH in environmental health science and policy or global environmental health. Students apply the skills and knowledge, theories, and principles learned in the MPH program to practical public health problems. Restricted to MPH students in the Department of Environmental and Occupational Health who have completed all core courses and at least 9 credits in program-specific courses. Prerequisites: PUBH 6002 and PUBH 6003; PUBH 6004 or PUBH 6011; PUBH 6006 or PUBH 6012; and PUBH 6007.

PUBH 6138. Environmental and Occupational Health Culminating Experience II. 1 Credit.

The second in a two-course sequence. The final, integrative learning experience for the MPH in environmental health science and policy or global environmental health. Students apply the skills and knowledge, theories, and principles learned in the MPH program to practical public health problems. Restricted to MPH students in the Department of Environmental and Occupational Health. Prerequisite: PUBH 6137.

PUBH 6140. Global Climate Change and Air Pollution. 2 Credits.

The state of the air in the Anthropocene epoch. Key concepts of atmospheric science, public health, and other societal impacts. Local and global policy frameworks. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6144. Environmental Health Data Development and Modeling. 2 Credits.

Introduction to sources of environmental data, handling and cleaning of data, and using data in both statistical and environmental exposure models. Prerequisites: PUBH 6131 or PUBH 6853.

PUBH 6146. Microbiomes and Microbial Ecology in Public Health. 2 Credits.

Introduction to key concepts of environmental microbial ecology and the human microbiome. The roles of microbes in ecosystems' functions with a focus on climate change and the roles of microbes in human health and disease. Prerequisites: PUBH 6011.

PUBH 6199. Topics in Environmental and Occupational Health. 3 Credits.

Topics vary by semester. May be repeated for credit provided topics differ. Consult the Schedule of Classes for more details.

PUBH 6233. Epidemiologic Principles and Practice of Disease Eradication. 2 Credits.

The role of epidemiology, surveillance, research, and information technology in the eradication of vaccine preventable and parasitic human diseases. Prerequisites: PUBH 6003.

PUBH 6234. Epidemiologic Methods in Neglected Tropical Disease Control. 1 Credit.

Introduction to neglected tropical disease epidemiology providing a broad overview of select tropical medicine and public health issues; focus on applications of epidemiologic methods to the study of public health consequences of NTDs. Prerequisites: PUBH 6003. Corequisites: PUBH 6011.

PUBH 6235. Epidemiology of Obesity. 1 Credit.

Introduction to the epidemiology of obesity; descriptive epidemiology, measurement, consequences, and determinants of obesity; adiposity and body composition; obesity interventions and policy. Prerequisites: PUBH 6003.

PUBH 6236. Systematic Review of Public Health Literature. 1 Credit.

The process of conducting systematic reviews of literature in order to translate research into public health practice recommendations. Recommended for MPH candidates planning to conduct a systematic review of the literature for their culminating experience. Prerequisites: PUBH 6002 or EXNS 6204; and PUBH 6003 or EXNS 6208.

PUBH 6237. Chronic Disease Epidemiology. 2 Credits.

Overview of the epidemiology (descriptive, analytic, and etiologic) of chronic diseases. Emphasis on epidemiologic methods and study design in relation to chronic disease, as well as public health approaches to disease control including surveillance, screening, and interventions. Prerequisites: EXNS 6204 or PUBH 6002; and EXNS 6208 or PUBH 6003.

PUBH 6238. Molecular Epidemiology. 1 Credit.

Concepts, principles, and use of molecular methods in epidemiologic and clinical research. Common molecular measures and their interaction with environmental factors. Development of a framework for interpreting, assessing, and incorporating molecular measures in their area of research. Prerequisites: PUBH 6003.

PUBH 6239. Epidemiology of Foodborne and Waterborne Diseases. 1 Credit.

Foodborne and waterborne toxicants; diseases linked to eating and drinking and their prevention. Topics include transmission of disease and disease processes; microbial toxins, mycotoxins, chemical toxins, bacterial infections (e.g., salmonellosis, shigellosis, vibrio, listeria), virus and parasitic infections; issues in food and water safety. Prerequisites: PUBH 6003.

PUBH 6240. Pediatric HIV/AIDS. 1 Credit.

Comprehensive overview of HIV infection in children, with emphasis on the global pediatric HIV epidemic. Biological, epidemiological, clinical, and psychosocial issues; public health programmatic approaches to prevention, care, and treatment. The national and global experience with scaling up prevention services in the global effort to virtually eliminate HIV/AIDS in children. Prerequisites: PUBH 6003. Recommended background: PUBH 6250 and PUBH 6253.

PUBH 6241. Nutritional Epidemiology. 2 Credits.

Methodological issues related to dietary assessment, nutrition surveillance, and the epidemiology of obesity. Current trends, including the health impacts of vitamin D and sodium. Interpretation of the scientific literature in the field. Examples drawn from the National Health and Nutrition Examination Survey. Prerequisites: PUBH 6003.

PUBH 6242. Clinical Epidemiology and Public Health: Reading the Research. 2 Credits.

Methods for reading epidemiology and public health research including case-control, cohort studies, randomized controlled trials, meta-analysis, testing and screening, prediction rules, decision and cost-effectiveness analysis. Prerequisites: PUBH 6003 or equivalent.

PUBH 6243. Topics in Clinical Epidemiology and Public Health: Reading the Research. 1 Credit.

An evidence-based problem solving applications course utilizing methods taught in PubH 6242 Clinical Epidemiology and Public Health: Reading the Research Prerequisites: PUBH 6003. Credit cannot be earned for this course and PUBH 8242.

PUBH 6244. Cancer Epidemiology. 2 Credits.

Epidemiology of specific cancers, with an emphasis on molecular and genetic epidemiology. Current research in the field. Prerequisites: PUBH 6003.

PUBH 6245. Infectious Disease Epidemiology. 2 Credits.

The role and conduct of laboratory and field investigations in the epidemiology of infectious diseases. Prerequisite: PUBH 6003.

PUBH 6247. Design of Health Studies. 3 Credits.

Epidemiologic concepts and methods applied to specific research questions especially new types of public health problems. Recognition and development of the most appropriate study design for a specific health issue. Ecologic, cross-sectional, case-control, cohort studies and clinical trials. Sampling, measurement, questionnaire design, causality and causal criteria. Development of a research proposal. Prerequisites: PUBH 6003. Corequisites: PUBH 6002.

PUBH 6248. Epidemiology of Aging. 2 Credits.

The demographics, theories, and physiology of aging; descriptive and associative epidemiology of several common age-related diseases and disorders; implications for public health. Prerequisites: PUBH 6003.

PUBH 6250. Epidemiology of HIV/AIDS. 2 Credits.

Methodological issues central to HIV/AIDS research. Biases peculiar to HIV/AIDS epidemiologic studies (both observational and experimental designs). The natural history of HIV, diagnosis, surveillance, vulnerable subpopulations, behavioral facets, and evaluation of epidemiologic studies with an emphasis on methodological considerations. Prerequisites: PUBH 6003. Recommended background: PUBH 6002.

PUBH 6252. Advanced Epidemiology Methods. 3 Credits.

Advanced quantitative epidemiologic methods, with a focus on basic data analytic techniques, identifying and evaluating bias and adjusting for confounding. Dose-response, trend analysis, and multiple linear and logistic regression models. PUBH 6249 may be taken as a corequisite. Prerequisites: PUBH 6002, PUBH 6003, PUBH 6247 and PUBH 6249.

PUBH 6253. Issues in HIV Care and Treatment. 1 Credit.

This course provides an overview and in depth consideration of some of the major issues in treatment of HIV disease, including the assessment of efficacy and effectiveness, drug resistance, monitoring of drug toxicity, special populations, the interrelationship between treatment and prevention, and quality of care. The course has been designed with an interdisciplinary audience in mind. In discussions and assignments, students are able to emphasize their own area of interest and/or expertise (e.g. epidemiology, policy, etc).

PUBH 6255. Organizational Responses to the Local, National, and Global HIV/AIDS Epidemics. 2 Credits.

This seminar focuses on the rapidly evolving responses of local, national and global governmental and non-governmental organizations to the HIV/AIDS epidemic. Inspirational leaders of selected HIV/AIDS organizations are invited to describe how their organizations contribute to fighting the epidemic; the leadership and management skills that they use in their daily work; and their strategic decision-making processes. Basic principles of epidemiology, leadership and organizational strategy and structure are addressed through didactic presentations and interactive faculty-student dialogue. Lessons learned through the lens of HIV/AIDS organizations are broadly applicable to other public health problems. Students learn about the strengths and challenges of different types of public health organizations as they make career decisions about their own transition to the public health work force. Prerequisites: PUBH 6003, HIV/AIDS experience, or permission of the instructor.

PUBH 6258. Advanced Topics in Biostatistical Consulting. 1 Credit.

Principles and practice of biostatistical consulting in public health and medical research environments.

PUBH 6259. Epidemiology Surveillance in Public Health. 2 Credits.

Focus on foundations of public health surveillance systems for communicable as well as chronic diseases. Outbreak investigation methods are included, as well as surveillance data sources, data management, data analysis, ethical issues, surveillance system evaluation, and use of information for prevention. Surveillance systems for reportable diseases, nosocomial infections, bioterrorism events, cancer, environmental disease, vaccine-related adverse events, bovine spongiform encephalopathy, and military personnel are discussed. Prerequisites: PUBH 6003.

PUBH 6260. Advanced Data Analysis for Public Health. 3 Credits.

Advanced data analysis using the SAS System to expand on the analytic techniques gained in PUBH 6002 and PUBH 6249 and to provide students with the applied statistical skills required to analyze various types of public health datasets. Prerequisites: PUBH 6002 and PUBH 6249.

PUBH 6262. Introduction to Geographic Information Systems. 1 Credit.

Geographic information systems (GIS) for mapping and display of health data. The course makes use of ArcGIS 8.3. The use of spatial statistics for the detection of clusters and patterns in the spread of diseases. Working with geodatabases, shape files, layers, query information from attribute tables, geocode addresses and customizing GIS applications.

PUBH 6263. Advanced GIS. 1 Credit.

Provides mid to advanced level training in GIS for display and analysis of health data. Use software ArcGIS 9.3 and additional extensions such as Spatial Analyst and Geostatistical Analyst. Also uses GeoDa software. Emphasizes benefits of using GIS to do more than simply manage and map data. GIS supports a range of spatial analysis functions that enable researchers to extract additional meaning from manipulating geographic data. Learn to work with raster datasets and geodatabases to build spatial models for analyzing health data and evaluating spatial patterns of health events based on notion of distance. Prerequisites: PUBH 6262.

PUBH 6264. Quantitative Methods. 3 Credits.

Introduces basic concepts in mathematical statistics. Topics include probabilities (unconditional and conditional), density and distribution functions of continuous and discrete random variables, including expected values. Specific distribution functions discussed are Binomial, Poisson, Hypergeometric, and Gaussian distributions. Additional topics include bivariable distributions, variance-covariance matrix, limiting theory, asymptotic results, and maximum likelihood estimation. Prerequisites: MATH 1231 and MATH 1232; and PUBH 6002 and 6249.

PUBH 6265. Design of Medical Studies. 3 Credits.

Design of medical investigations, including the randomized clinical trial, observational cohort study, and the retrospective case-control study. Specific methods regarding sample size, power and precision and statistical procedures for randomization and sa.

PUBH 6266. Biostatistical Methods. 3 Credits.

Biostatistical methods for asymptotically efficient tests and estimates of relative risks and odds ratios from prospective and retrospective matched and unmatched studies. Fixed and random effects models. Logistic regression, conditional logistic regression. Poisson regression. Maximum likelihood and efficient scores. Prerequisites: STAT 6201, STAT 6202 and PUBH 6264.

PUBH 6267. Time Series Applications in Public Health. 2 Credits.

Introduce basic concepts for the identification and modeling of time series in the time domain approach. Learn a new set of terminology standards and a different way to analyze these type of data and to forecast future values of a time series and its accuracy. Software used is SAS/ETS and 3 procedures: ARIMA, AUTOREG, FORECAST. New mathematical notation is used. Prerequisites: PUBH 6249.

PUBH 6268. Advanced SAS. 1 Credit.

Intensive in advanced programming using SAS. Expand technical skills to provide advanced SAS tools for data management and graphics. Topics to include Interactive Matrix Language (IML), SAS Macro facility language, and drill-down graphs using SAS/GRAPH. Prerequisites: PUBH 6002 and PUBH 6249; or permission of the instructor.

PUBH 6269. Reproductive Epidemiology. 1 Credit.

Current research, controversial issues, and methodological problems in epidemiology of reproductive and perinatal health. Present reproductive health issues such as conception and infertility; perinatal issues such as complications of pregnancy, infections in pregnancy, adverse pregnancy outcomes, and birth defects. Prerequisites: PUBH 6003.

PUBH 6270. HIV/AIDS Surveillance. 1 Credit.

Overview of surveillance methods used domestically and internationally to monitor HIV/AIDS epidemic. Surveillance systems including sentinel, population based, behavioral, and incidence surveillance are presented and discussed. Strengths and weaknesses of these various systems are discussed in addition to how data from these systems impact and inform HIV/AIDS related policies and programs. Prerequisites: PUBH 6003.

PUBH 6271. Disaster Epidemiology. 1 Credit.

Introduction to disaster epidemiology that elucidates the important role epidemiologists play in assessing the health and psychological effects of natural and man-made disasters and in identifying factors that contribute to these effects. Focus on applications of epidemiologic methods to the study of public health consequences of disasters, case studies from actual disasters used to illustrate various roles of epidemiologist in responding to these events and lessons learned. Highlight key skills that epidemiologists need to be part of a response and recovery. Identify methodological issues for future work. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6272. Epidemiology of Infectious Agents Associated with Human Cancer. 1 Credit.

Describes the role of infectious agents in the etiology of human cancer. Emphasis on differences between specific oncogenic viruses. Other oncogenic agents, bacterial and parasitic, are also discussed. Discuss laboratory approaches to the documentation of their pathogenicity, how behavior affects mode of transmission, and which types of data provide strongest support for documenting oncogenic potential for humans. Prerequisites: PUBH 6003.

PUBH 6273. Ethnographic Methods. 1 Credit.

Use ethnographic field methods in conjunction with epidemiological research. Introduction to specific methods used to examine health phenomena and determinants of disease. Learn specific applied skills that can be modified with socio-cultural modifications to evaluate urban sites and other settings. Basic skills in application of ethnographic methods, including recursive observations, participant observations, and variety of approaches to interviewing such as in-depth, structured and non-structured as well as conversational interviewing. Discuss use of multiple approaches in conjunction with ethnography, including focus groups, archival, document, statistical and secondary data analysis, and survey research methods. Course emphasizes use of ethnographic research methods in community-based health settings and evaluates issues in cultural competency and how to garner stakeholder support to conduct epidemiologic studies. Prerequisites: PUBH 6003.

PUBH 6274. Emerging Infectious Diseases for Public Health Professionals. 2 Credits.

Focus on epidemiology of emerging infectious diseases of public health importance, including factors leading to their development, management of emerging infectious diseases from a public health and laboratory standpoint, including biosafety, and strategies for emergency preparedness from a national and international perspective. Emphasis on the context of emerging infectious diseases and strategic approaches to their containment. Prerequisites: PUBH 6003 or MICR 6292; or permission of the instructor.

PUBH 6275. Essential Public Health Laboratory Skills. 2 Credits.

This course provides public health students with practical laboratory experience. Prerequisites: MICR 6239 or permission of the instructor.

PUBH 6276. Public Health Microbiology. 3 Credits.

Gain in-depth understanding of important non-viral pathogens pertinent to public health microbiology. Learn how to isolate and identify pathogens using critical thinking and problem solving skills.

PUBH 6278. Public Health Virology. 3 Credits.

In-depth understanding of viral pathogenesis by focusing on current research, controversial issues, and public health relevance. Survey of family of viruses most relevant to today's public health efforts, concentrating on virus-host interactions and therapeutic strategies.

PUBH 6280. Microbiology and Emerging Infectious Diseases Final Project. 2 Credits.

Focus on the synthesis and summary of data acquired through epidemiologic and/or public health laboratory research. Biosafety training, CITI training, HIPAA training and permission of the instructor are required prior to enrollment. Prerequisites: PUBH 6002, PUBH 6003, PUBH 6292, and PUBH 6245.

PUBH 6281. Analysis of Complex Surveys Using SAS and Stata. 2 Credits.

Appropriate methods to analyze survey data collected using complex sampling methods are discussed and applied to national survey data to address provocative public health research questions. An equivalent Stata course may be substituted for prerequisite 6249. Prerequisites: PUBH 6003 and PUBH 6249.

PUBH 6282. Introduction to R Programming. 1 Credit.

R is an open source software environment for statistical computing and graphics. Data transfer between SAS and R, data manipulation and visualization within R, programming and debugging, R libraries, and graphics theory. Prerequisites: PUBH 6249. Recommended background: Programming experience in a statistical package such as Stata or in high level language such as C, Python, Perl.

PUBH 6299. Topics in Epidemiology. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details.

PUBH 6305. Fundamentals for Health Policy: Public Health and Health Care. 2 Credits.

An overview of public health and health care in the United States as an introduction to the study and analysis of health policy. Presents the governmental framework, institutions, financing streams, workforce, constituencies, and interest groups engaged in the health sector to ensure that students begin their policy analytic training with grounding in the political, economic, and social realities of public health and health care.

PUBH 6310. Statistical Analysis in Health Policy. 3 Credits.

Quantitative and statistical methods of data analysis for health policy and health services research. Instruction in conducting data analyses using Stata statistical and data analysis software and application of acquired skills to health policy and health services research. Practical experience in programming and analysis of various health policy-related questions. Entering and importing data; creating, saving, and merging data sets; creating and modifying variables; labeling variables and values; and conducting analysis ranging from univariate to multivariate analyses, including multiple regression and logistic regression. The use of existing data sets to analyze health policy issues and interpret these analyses for policy purposes. Prerequisite: PUBH 6002.

PUBH 6315. Introduction to Health Policy Analysis. 2 Credits.

Core elements of health policy analysis: problem definition, background, the political, economic, and social landscape; development of policy options and recommendations. Written, graphic, and oral presentation skills associated with policy analysis. Summer, Fall, Spring Prerequisites: PUBH 6012 or PUBH 6305.

PUBH 6320. Advanced Health Policy Analysis. 3 Credits.

Practical applications of basic quantitative tools in health policy. Problem definition; political, social, and economic assessment of a problem; program evaluation and data analysis; development of policy options; and the written and oral presentation of findings and recommendations. Prerequisites: PUBH 6305 or PUBH 6012; and PUBH 6310 and PUBH 6315.

PUBH 6325. Federal Policymaking and Policy Advocacy. 2 Credits.

The federal health policymaking process, including an overview of the legislative, administrative, and judicial processes that affect policymaking; federal budget, authorization, and appropriation processes; common techniques and strategies used to advance legislative and regulatory policies, including coalition building and the use of policy studies and media relations. Prerequisites: PUBH 6012 or PUBH 6305.

PUBH 6330. Health Services and Law. 3 Credits.

Examination of the ways in which the law and legal system in the United States influence and are influenced by the health care system. How judicial, statutory, regulatory, and constitutional sources of law embody health policy and affect access to and quality and financing of health care, as well as the regulation of patient rights.

PUBH 6335. Public Health and Law. 3 Credits.

How the law can both promote public health and conflict with the rights of individuals protected under the U.S. Constitution; legal concepts that underlie the public health system and inform public health policymaking; major areas of public health activity; the future of public health.

PUBH 6340. Health Economics and Finance. 3 Credits.

Examination of economic principles as they apply to health policy in the public and private sectors. The basic framework of economics is used to analyze the behavior of consumers, hospitals, physicians, and insurers, as well as pharmaceutical companies and long-term care providers. Overview of Medicare and Medicaid. Economic analyses of current issues in the marketplace, including rising health spending in the context of the national economy and the federal budget, insurance market dynamics, key issues in the long-term care industry, shifting market forces and power within the health care arena, and new payment initiatives and delivery system models. Prerequisites: PUBH 6352 or an undergraduate economics course.

PUBH 6345. Health Policy Research Design. 2 Credits.

PUBH 6350. Health Policy Capstone. 2 Credits.

Required for MPH graduate students in the health policy concentration in the final semester before graduation. Students synthesize and integrate knowledge across multiple public health disciplines; apply theories, principles, and skills in ways that approximate professional practice in the field of health policy; and demonstrate mastery of the required knowledge and competencies addressed in the curriculum. Prerequisites: PUBH 6012 or PUBH 6305; and PUBH 6320.

PUBH 6352. Basics of Economics for Health Policy. 1 Credit.

An introduction to modern microeconomics -- the study of how consumers, firms, industries, and the public sector make decisions and allocate their resources in the economy. The principles of supply and demand and elasticity in both the private and public sectors are analyzed.

PUBH 6353. Child Health Advocacy. 1 Credit.

Introduction to child health advocacy. Affordable Care Act (ACA), preventive care, school health, environmental issues, and emergency care. The use of data for advocacy.

PUBH 6354. Mental Health/Substance Abuse Policy. 2 Credits.

Provides an overview of the U.S. mental health and substance abuse delivery system, its components, and the policy challenges created by the organization of this system. Considers the behavioral health care system from the perspective of several main "actors" in the system: patients, providers (primarily doctors and hospitals), health plans, and payers (public and private). Prerequisite: PUBH 6305.

PUBH 6355. Comparative Health Policy. 2 Credits.

Archetypical health care systems, financing, and reform efforts, with emphasis on the trade-offs between efficiency and equity. Comparison of current policy challenges and solutions faced by policymakers in the U.S. and in other countries. Prerequisites: PUBH 6012 and PUBH 6305.

PUBH 6356. State Health Policy. 2 Credits.

Students develop a briefing on health and health care for a new governor and health secretary in order to gain a practical understanding of state health policy and programs. The course is designed to replicate the experience of a newly hired policy staff member learning the requirements for the position in a particular state. Prerequisites: PUBH 6012 or PUBH 6305.

PUBH 6357. Health Economics and Policy: Cost Containment Strategies. 2 Credits.

Health care cost containment in the context of the current implementation of national health reform. Cost containment strategies; economic underpinnings, anticipated impacts, perspectives of and implications for health care providers and systems, and political considerations. Prerequisite: PUBH 6340.

PUBH 6358. Vaccine Policy. 2 Credits.

The development of U.S. vaccine policy and the growth of various markets targeting routine vaccination of all populations; interactions among business, legal, political, public health, medical, federal/state/local government, and consumer communities that combine to influence vaccine delivery in a broad range of settings. Prerequisites: PUBH 6012 or PUBH 6305.

PUBH 6359. Reproductive Health Policy. 1 Credit.

Overview of reproductive health policy at the federal and state levels. Balancing the interests of competing stakeholders; the fundamental underlying role of significant disparities in financing for and access to reproductive health services; and how policymaking can alleviate or exacerbate preexisting issues.

PUBH 6360. Advanced Maternal and Child Health Policy. 1 Credit.

In-depth exploration of maternal and child health policy in the U.S., with a particular emphasis on the role of personal and public health services for women, children, youth and their families in the context of health and human services system change. Prerequisite: PUBH 6561.

PUBH 6361. Health Workforce Policy. 2 Credits.

Strategies for the prevention and control of infectious diseases, focusing on low and middle income countries. Goals, strategies, and challenges of major global health intervention programs. Surveillance systems, vaccination programs, chemotherapy as a prevention and treatment tool, nutritional supplementation, environmental approaches, and potential benefits of integrating multiple interventions. Prerequisites: PUBH 6012 or PUBH 6305.

PUBH 6363. The Health Care Legislative Process. 1 Credit.

How health care legislation is developed in and moves through the U.S. House of Representatives and Senate. The roles of the committees of jurisdiction in each house and how the rules of each house affect legislative outcomes.

PUBH 6364. Federal Budget Process for Health Policy. 1 Credit.

Focuses on how the Congressional budget process shapes the funding and design of federal health care programs, ranging from entitlement programs like Medicare to appropriated programs like community health centers. Discussions cover budget resolutions, appropriations bills, and budget reconciliation legislation, as well as Congressional procedures and committees through which they are considered. Prerequisite: PUBH 6305.

PUBH 6366. Health Care Corporate Compliance. 2 Credits.

The federal laws and regulations that affect U.S. health care industry participants, particularly those relating to the prevention of fraud and abuse, and the role of corporate compliance programs. Prerequisites: HSML 6215 or PUBH 6330.

PUBH 6367. Population Health, Public Health, and Health Reform. 2 Credits.

In-depth assessment of how a reforming health care system can be expected to change the policy landscape for population and public health in the United States; direct changes evolving at the state and local level and national payment and health system reforms. Prerequisites: One of the following: HSML 6202, PUBH 6006, PUBH 6012, or PUBH 6305.

PUBH 6368. Law, Medicine, and Ethics. 3 Credits.

Legal, ethical, and policy issues that arise in the biomedical arena; the definitions of life and death, the nature of personal identity, the requirements of justice, and the boundaries of liberty. Prerequisites: PUBH 6330 or PUBH 6335.

PUBH 6370. Medicare/Medicaid Law and Policy. 2 Credits.

Describes current legal and public policy issues in the Medicare and Medicaid programs, including the legal, operational, financial, and organizational rules for the two programs.

Prerequisite: PUBH 6315.

PUBH 6372. Minority Health Policy. 2 Credits.

Introduces students to the concept of health disparities and the implications of disparities for health care practice and policy.

Students will learn how disparities are defined and measured, as well as emerging approaches in practice and policy to reducing disparities. Fall. Prerequisite: PUBH 6315.

PUBH 6374. Pharmaceutical Policy. 2 Credits.

Legal and regulatory frameworks related to the demand for and supply / quality of pharmaceutical products. Policies specific to drug development, pricing, reimbursement, use, dissemination of information, and post-marketing surveillance.

Prerequisite: PUBH 6315.

PUBH 6376. Primary Health Care Policy. 2 Credits.

Politics and policy behind the provision of primary health care in the United States. The rise of the field of primary care and how it is supported and financed; the role of insurers and government in regulation and oversight in the areas of access, cost, and quality. Prerequisite: PUBH 6315.

PUBH 6378. HIV Policy in the US. 2 Credits.

Examines the policy response to the HIV epidemic in the United States and how the epidemic itself has helped to shape U.S. policy. How and why HIV became a national policy issue; circumstances surrounding the discovery of and early response to HIV; and main policy and programmatic developments and key players over time. The role and implications of the Affordable Care Act for individuals with HIV, the future of the Ryan White HIV/AIDS Program, and the impact of new treatment and prevention strategies on the future course of the epidemic.

PUBH 6380. Bridging Health Policy and Health Information Technology. 2 Credits.

Basics of health care informatics policy and core technological components for health services managers, public health professionals, health policy analysts, and health information technology staff. Policy and legal frameworks, governance and financial issues, technological infrastructure, and business and technological operations. Concepts and roles of information and how information technology can support the health care industry in promoting quality improvement.

PUBH 6382. Community Health Center Policy. 2 Credits.**PUBH 6384. Health Care Quality and Health Policy. 2 Credits.**

The role of quality in the U.S. health care delivery system from the perspective of multiple stakeholders, including public and private payers, providers, consumers, and employers. Defining and measuring quality; how quality information is used; and policy implications of quality improvement. Recent changes under health reform legislation. Prerequisites: PUBH 6012 or PUBH 6305.

PUBH 6386. Public Health Preparedness Policy. 2 Credits.

Issues in public health emergency preparedness and response at the nexus of homeland and national security. The relationship between public health and criminal investigation, forensic epidemiology, and surveillance; biodefense; and the role of the scientific community. Infrastructure, threat themes, and associated preparedness and response policy.

PUBH 6390. Prescription Drugs: Policy and Public Health. 3 Credits.

Key policies and public health programs related to each stage of a prescription drug's life cycle; Congressional funding focused on speeding the development and approval of needed drugs, public and private approaches to increase access to prescription drugs, and exceptions to international laws that allow some countries to violate prescription drug patents to improve the health of impoverished citizens.

PUBH 6399. Topics in Health Policy. 3 Credits.

In-depth examination of a particular facet of public health policy. Topics and prerequisites vary.

PUBH 6400. Global Health Frameworks. 2 Credits.

Overview of current issues in global public health with particular emphasis on low and middle-income countries. Serves as both an introductory course for students entering the field of global health, as well as an update on current technical and policy issues for advanced students who may have considerable experience.

PUBH 6410. Global Health Study Design. 1,2 Credit.

Tools necessary for designing and understanding the research that goes into developing good public health programs; basic elements for the planning and design phase of a research project. Prerequisite or corequisite: PUBH 6009 or PUBH 6501. Prerequisite: PUBH 6003.

PUBH 6411. Global Health Qualitative Research Methods. 2 Credits.

An introduction to qualitative data collection and analysis in global health settings. Methodologies include survey design, interviews, focus groups, and participant observation. Archival research and clinical trial research are also addressed. The set of methods most commonly used to collect qualitative data in global health settings. Students are enabled to prepare interview guides, conduct in-depth interviews, and analyze and document the results from a qualitative field project. Prerequisites: PUBH 6002 and PUBH 6410.

PUBH 6412. Global Health Quantitative Research Methods. 3 Credits.

Continuation of the series of global health methods courses. Examination of the fundamental concepts of empirical analysis and qualitative analysis, including open and axial coding, the basis of grounded theory, and regression analysis. Prerequisites: PUBH 6002 and PUBH 6410.

PUBH 6416. Ethical and Cultural Issues in Global Health Research and Programs. 1 Credit.

Examine procedures and concerns for protecting communities and human subjects involved in public health programs and research. Consider cultural considerations integral to ethical conduct of public health research and programming in the global context. Discuss history behind rules and regulations that govern ethical principles around conduct of research involving human subjects. Consider contribution that awareness of cultural contexts where we work makes to ethical nature of our work as global health professionals.

PUBH 6417. Cross-Cultural Approaches for Global Health Practice. 1 Credit.

How to communicate, negotiate, and be more effective across cultures; social aspects that affect communication within cultures and how to navigate communication in practical situations including in the work place and in risk and crisis situations. Corequisite: PUBH 6410. Prerequisite: PUBH 6416.

PUBH 6420. Understanding Commercial Determinants of Health. 1 Credit.

Conceptual understanding and frameworks for commercial determinants of health as key to improving public health.

PUBH 6421. Responsible Conduct of Research. 1 Credit.

Designed to raise awareness of the responsible conduct of research. Strategies for preventing irresponsible research practices, including unacceptable practices and research misconduct.

PUBH 6430. Theories for Global Health Communication Interventions. 2 Credits.

Use of communication theory and methods in health promotion. Integration of multidisciplinary approaches to public health communication. Prerequisites: PUBH 6007 and PUBH 6400.

PUBH 6431. Global Health Communication Strategies and Skills. 3 Credits.

Students conduct qualitative research to evaluate health communication programs, assess readability level and suitability of written health education materials, conduct content analyses, and review/critique current health communication literature. Prerequisites: PUBH 6430 or permission of the instructor; and PUBH 6007.

PUBH 6435. Global Health Program Development and Implementation. 2 Credits.

Basic concepts and principles of program development and implementation including data collection methods, decision making, and problem-solving techniques. Application of program development techniques to specific interventions. Prerequisite: PUBH 6400.

PUBH 6436. Global Health Program Management and Leadership. 2 Credits.

Essential tools for successful project, personnel, and program management. Leadership and management theory; key issues in managing global health programs and projects; leadership and management skills development; use of data in management decision making; and importance of quality, supply chain, and resource management. Restricted to students in the MPH in global health program design, monitoring, and evaluation program. Prerequisites: PUBH 6400 and PUBH 6435.

PUBH 6437. Global Health Program Evaluation. 3 Credits.

Fundamentals of program monitoring and evaluation; developing and using program theory in evaluation; impact evaluation and mixed-methods approaches; qualitative methods and statistical analysis for program evaluation. Prerequisites: PUBH 6002.

PUBH 6440. Global Health Economics and Finance. 2 Credits.

Examination of economics and finance principles as they apply to global health. Organization, delivery, and financing of health care in developing countries. Tools for analyzing issues related to global health economics and finance and application of those tools to a variety of a global health issues, including demand for health care, health care financing, social insurance, pharmaceuticals, and HIV/AIDS. Prerequisite: PUBH 6400.

PUBH 6441. Global Health Organizations and Regulations. 3 Credits.

The functions, capacities, and governance of international health organizations; the normative power of some international health organizations for regulatory processes; and evidence-based development of public health policies with attention to issues of global trade as it shapes worldwide and national health. Prerequisite: PUBH 6400.

PUBH 6442. Comparative Global Health Systems. 2 Credits.

Examination of national health systems, how they differ, and how they are performing. Health systems analyzed through four different lenses: health care organizations, health workforce development, health care financing, and health policy development. Comparison of health systems and health reforms in seven regions of the world and assessment of how health system performance might be improved. Course fee may apply. Prerequisite: PUBH 6400.

PUBH 6443. Global Health Agreements and Conventions. 2 Credits.

Explores the impact of regulations, trade and human rights on health by examining the relevant international declarations, agreements and conventions. This course examines a variety of topics including the impact of international trade agreements on health, the International Health Regulations and other regulations affecting global health, and the relationship between health and human rights. Prerequisite: PUBH 6400.

PUBH 6445. Quantitative Methods for Impact Evaluation. 2 Credits.

Learning to use and produce empirical research in the public health field; review of quantitative techniques and research designs used to uncover causal effects of policies and programs, with applications to public health topics. Prerequisites: PUBH 6002, PUBH 6003 and PUBH 6412.

PUBH 6450. Global Health Diplomacy. 2 Credits.

Introduction to the concept of global health diplomacy; how diplomacy has been used to advance health agendas and how health issues have been used to improve diplomatic relations between countries; formal health, multi-stakeholder health, and informal health diplomacy; comparative study of how different countries have devised health diplomacy strategies.

PUBH 6451. Monitoring/Evaluation of Sexual/Reproductive Health Programs in Low- and Middle- Income Countries. 2 Credits.

Overview of key sexual and reproductive health challenges in low- and middle-income countries; designing and measuring programs to address those challenges. Taught from the perspective of applied researchers working within an organization that implements sexual and reproductive health programs and services. Prerequisites: PUBH 6437, PUBH 6500 and PUBH 6503.

PUBH 6452. Social and Behavior Change Communication in Middle- to Low-Income Countries. 2 Credits.

The ways in which behavior change and sociocultural theories underpin the development of SBCC programs in politically, culturally, and socially diverse settings. Prerequisites: PUBH 6007 and PUBH 6503.

PUBH 6455. Global Vaccinology. 3 Credits.

Concepts, methods, and tools for making new and existing lifesaving vaccines more accessible to individuals in low- and middle- income country settings. Recommended for second-year MPH students. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6461. Ethics and Accountability in Humanitarian Settings. 1 Credit.

Principles and fundamentals of ethical approaches and accountability processes in the delivery of humanitarian services and possible solutions and interventions to address them. PUBH 6480 may be taken as a corequisite. Prerequisite: PUBH 6480.

PUBH 6462. Nutrition and Food in Large Humanitarian Emergencies. 1 Credit.

Fundamentals of food aid programs and nutritional issues in emergency humanitarian situations and appropriate local and international responses in lower-income countries. Field-based program responses in international, resource-scarce settings, as conducted by NGOs and UN agencies. PUBH 6480 may be taken as a corequisite. Prerequisite: PUBH 6480.

PUBH 6463. Communication Strategies and Planning in Humanitarian Settings. 2 Credits.

Principles of and major challenges in communication planning with wide range of stakeholders in humanitarian settings; solutions and interventions to identify related risks and appropriately respond to and effectively plan communication strategies. PUBH 6480 may be taken as a corequisite. Prerequisites: PUBH 6007 and PUBH 6480.

PUBH 6464. Mental Health in Humanitarian Settings. 1 Credit.

Principles of and fundamental challenges to mental health in humanitarian settings, including potential solutions and interventions; foundational knowledge and skills in mental health and psychosocial support services in such settings. PUBH 6480 may be taken as a corequisite. Restricted to PUBH 6480.

PUBH 6465. Reproductive Health and Gender-Based Violence in Humanitarian Settings. 1 Credit.

Key issues, challenges, policies, and interventions related to sexual and reproductive health and gender-based violence in humanitarian settings for persons affected by armed conflict and natural disasters. PUBH 6480 may be taken as a corequisite. Prerequisite: PUBH 6480.

PUBH 6469. Humanitarian Aid Seminar Series. 1 Credit.

Targeted talks and panel discussions with humanitarian aid workers from a variety of agencies addressing important or controversial contemporary topics in humanitarian settings. Corequisite or prerequisite: PUBH 6480.

PUBH 6480. Public Health in Humanitarian Settings. 2 Credits.

Technical aspects of high-priority public health interventions; consideration of how and why sound public health interventions should be implemented in both emergency and chronic humanitarian settings; the roles of diverse humanitarian actors.

PUBH 6481. Global Mental Health. 2 Credits.

Focus on global mental health knowledge and public health policy implementation skills regarding the integration of mental health, public health, and primary care in diverse health systems and challenging cultural contexts. Prerequisite: PUBH 6400.

PUBH 6482. International Food and Nutrition Policy. 2 Credits.

Major global food and nutrition issues, their determinants, and the strategies that in place to address them. Students identify major nutrition and food challenges in a country or region as well as the policies and programs that have proven successful in addressing those challenges. Prerequisite: PUBH 6400.

PUBH 6484. Prevention and Control of Vector Borne Diseases. 2 Credits.

Study of insects and other vectors responsible for transmission of diseases in developing countries, including plague, malaria, dengue fever, onchocerciasis (river blindness), and chikungunya virus. Special focus on developing countries, particularly in the Middle East, Africa, Asia, and Latin America. Diseases such as West Nile Virus and Lyme disease in the United States and elsewhere are also addressed. New methods for effective management and control.

PUBH 6486. Global Health Programs and Approaches to the Control of Infectious Diseases. 2 Credits.

Strategies for the control of infectious diseases with a focus on low and middle income countries; identifying and critiquing goals, strategies, and challenges of major global health intervention programs designed to prevent and control infectious diseases. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6487. Emerging Zoonotic Diseases and Global Food Production. 1 Credit.

Analysis of trends in emerging zoonotic diseases and their links to global food production. Case studies on the use of surveillance systems and outbreak detection techniques to monitor emerging zoonotic diseases. Development of skills to analyze surveillance systems, policy reports, and literature related to emerging zoonotic diseases and food-borne outbreaks within a global context. Prerequisites: PUBH 6003.

PUBH 6488. Cost-effectiveness Analysis in Public Health and Health Care. 2 Credits.

The application of cost-effectiveness analysis (CEA) to enhance the efficiency of programs and services both in the United States and developing countries. A variety of topics and related analytical tools such as cost benefit analysis, decision analysis, and sensitivity analysis are covered. Students learn to perform cost-benefit and cost-effectiveness analyses and understand the strengths and limitations of these methods and how to apply them to a broad range of health issues.

PUBH 6489. Evaluation of Food and Nutrition Programs and Policies. 1 Credit.

Introduction to major global food and nutrition issues, strategies used to address these problems, and commonly-used program impact theories and evaluation frameworks; application of evaluation methods and approaches to nutrition and food programs and policies. Prerequisite: PUBH 6437.

PUBH 6491. Public Health Leadership Seminar. 1 Credit.

Leadership lessons derived from the careers of a diverse group of successful executives and entrepreneurs from multiple sectors, including corporate, government, nonprofit, and the arts. Development of skills for effective engagement with peers, personal network, potential employers, and business partners. Permission of the faculty member required prior to enrollment.

PUBH 6492. Global Health Programs and Approaches to the Control of Chronic Diseases. 2 Credits.

Concepts, methods, and tools to address chronic non-communicable diseases (NCDs); global public health and development dimension of NCDs, their epidemiology and risks, and health systems approaches for their control with focus on low- and middle-income countries. Prerequisites: PUBH 6002, PUBH 6003 and PUBH 6400.

PUBH 6493. Fundamentals of Supply Chain Management in Developing Countries. 2 Credits.

Practical approaches used by government policymakers, essential drugs program managers, NGOs, donors, and others to ensure that high-quality essential drugs are available, affordable and used rationally; existing and potential challenges and workable solutions related to managing the drug supply in developing countries. Restricted to graduate students.

PUBH 6494. Population, Public Health Practice, and Sustainable Development. 2 Credits.

The reciprocal connections between the dynamics of population growth, distribution, and age structure to health, well-being, and socioeconomic development.

PUBH 6495. Field Trial Methods and Application. 2 Credits.

Concepts, methods, and tools necessary to conduct community-based randomized trials in low- and middle-income country settings; the process of running a randomized field trial from selecting a topic, through implementation, to analysis and reporting. Most appropriate for students in their second year of study. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6499. Topics in Global Health. 3 Credits.

Examination of a particular facet of public health. Topics vary by semester. May be repeated for credit provided topic differs. See the Schedule of Classes for more details.

PUBH 6500. Planning and Implementing Health Promotion Programs. 3 Credits.

Students develop skills to effectively plan, design, and implement programs that address public health problems for defined populations in a variety of settings. Prerequisite: PUBH 6007.

PUBH 6501. Program Evaluation. 3 Credits.

The knowledge, competencies, and skills needed to plan and implement evaluations of public health programs in a variety of settings; types of program evaluation, including needs assessment, process evaluation, quantitative and qualitative monitoring of outputs, outcomes, and impact. Prerequisites: PUBH 6002, PUBH 6003 and PUBH 6007; and PUBH 6435 or PUBH 6500.

PUBH 6502. Practical Data Analysis for Prevention and Community Health. 1 Credit.

Practical aspects of dataset creation, data management, rudimentary statistical analysis and tabular/graphical presentation of results in the user-friendly environments of PASW (formerly SPSS) and MS Excel. Students create codebooks, enter and clean data, derive new variables from existing ones, choose appropriate analytical techniques and implement them, graph and tabulate results, and document and protect work. Examples are drawn from commonly-encountered situations in prevention and community health, such as needs assessments and program evaluations. Prerequisites: PUBH 6002, PUBH 6003 and PUBH 6500.

PUBH 6503. Introduction to Public Health Communication and Marketing. 3 Credits.

The application of health communication theories, principles and techniques, as well as marketing constructs and concepts, to advancing public health through practitioner-oriented health communication and social marketing campaigns and programs.

PUBH 6504. Social and Behavioral Science Research Methods. 3 Credits.

The processes of study design, data collection, and analysis using SPSS for quantitative research in prevention and community health. All phases of the observational/survey research process considered sequentially, from formulation of research questions to preparation of the final report. Prerequisites: PUBH 6002 and PUBH 6007; or permission of the instructor.

PUBH 6508. Cost-Effectiveness Analysis of Health Promotion Interventions. 3 Credits.

Theoretical basis for and practical skills needed to estimate the effectiveness, population impact, and cost of health promotion interventions; application to policy and cost-effectiveness and cost-utility analyses. Familiarity with basic algebra and statistics is assumed. Prerequisites: PUBH 6002 and PUBH 6003; and PUBH 6006 or PUBH 6012.

PUBH 6510. Community-Oriented Primary Care Principles and Practice. 3 Credits.

Theory and practice of community-oriented primary care, including an extended small group exercise carrying out a COPC project with a simulated community using Web-based data sets.

PUBH 6512. Community-Oriented Primary Care Policy and Issues. 2 Credits.

Advanced work on COPC methods and policy, focusing on issues related to the provision of health care in underserved communities. Prerequisite: PUBH 6510.

PUBH 6513. Community Health Management. 2 Credits.

Management and development of community health services. Builds upon principles for management and community-oriented primary care. Prerequisites: PUBH 6003 and PUBH 6510.

PUBH 6514. Preventing Health Disparities. 2 Credits.

Provides students with an understanding of how social, political, and economic factors contribute to disparities (e.g. racial, ethnic, gender, and geographical) in health and health care and how to use evidence-based approaches to prevent or address health disparities.

PUBH 6515. High Risk and Special Populations. 2 Credits.

Provides students with an overview of the methods to plan, implement and evaluation health promotion and education programs targeted towards high risk and special populations. The course reviews the socioeconomic, political-economic, cultural and psychosocial factors of populations who are considered to be at high risk for specific health problems and efforts that have been addressed in current health promotion programs. Prerequisite: PUBH 6007.

PUBH 6516. Community Health Information Resources. 2 Credits.

COPC and community health promotion require diverse information skills in order to assess community needs and strengths, determine priority health issues, analyze data, plan interventions, and evaluate programs. This course introduces students to the information resources useful in planning and implementing COPC and community health projects that address racism. The selected resources support methods for defining a community, characterizing a community's social and health characteristics, investigating a prioritized problem, and developing programs and solutions. Students learn how to choose resources, search them, and consider bias in information sources.

PUBH 6530. Qualitative Methods in Health Promotion. 2 Credits.

Application of qualitative methods in the development of health promotion interventions, evaluations, and research. Collecting and analyzing qualitative data through participant observation, interviewing, group methods, and case studies. Prerequisite: PUBH 6007.

PUBH 6531. Health Promotion in Health Care Settings. 2 Credits.

Behavioral change counseling and training skills to improve health by changing individuals' behaviors and by developing training materials for use with providers, health professionals and high risk groups. This is an advanced course for second year students. Prerequisites: PUBH 6007 and PUBH 6500.

PUBH 6532. Community Organization, Development, and Advocacy. 3 Credits.

Educates health promotion practitioners in how to organize community groups to promote health. The focus is on learning how to use resources available in the community to advocate change. Prerequisite: PUBH 6007.

PUBH 6533. Design and Conduct of Community Health Surveys. 2 Credits.

This course teaches students how to frame questions in health promotion surveys using sound principles of questionnaire design with emphasis on reliability and validity. Students learn survey design principles and methods and how to analyze survey data.

PUBH 6534. Community-Based Participatory Research. 1 Credit.

Students learn how to conduct community research in collaboration with community leaders and residents. Emphasizes the principles of CBPR for addressing health promotion issues in communities including community needs and administrative and policy changes.

PUBH 6535. Promotion of Mental Health. 2 Credits.

Increases understanding about issues in mental health promotion. The emphasis is on mental health as a public health issue and linkages between individual mental health and the environment. Prerequisite: PUBH 6007.

PUBH 6536. Workplace Health Promotion. 2 Credits.

Planning, management and evaluation of programs designed to serve employees' needs, promotion of employee health and reduction of health care costs in the workplace. Prerequisite: PUBH 6007.

PUBH 6537. Health Promotion and Aging. 2 Credits.

Introduces students to the basic health aspects of the aging process and special health promotion needs for this group. Problems of aging and public health solutions for older Americans are examined. Students are able to define the public health concerns for aging Americans, how aging is affected by a multitude of factors, identify health promotion strategies to assist in reaching out to this population and develop methods of collaboration with agencies and organizations to improve the health of the aging population. Prerequisite: PUBH 6007.

PUBH 6550. Maternal and Child Health I. 3 Credits.

Public health issues affecting the health and well-being of women, children, and families. A multidisciplinary perspective that integrates the biological, demographic, epidemiological, economic, behavioral, social, cultural and environmental aspects.

PUBH 6551. Maternal and Child Health II. 3 Credits.

.

PUBH 6552. Women's Health. 2 Credits.

Issues of women's health through the life cycle. The process of critically evaluating women's health research and issues.

PUBH 6553. Adolescent Health. 2 Credits.

Issues of physical, mental, and social development and their bearing on the health of adolescents, with special emphasis on prevention.

PUBH 6554. Children and Youth with Special Needs. 2 Credits.

In order to place children and youth with special needs into a public health framework, this course presents an introduction to and an overview of children and youth with special needs due to a developmental disability. Many aspects of developmental disability are addressed including 'concept' and definitions of disability, causes, epidemiological considerations, and development of federal legislation. The scope and range of developmental disabilities are reviewed along with classification schemes. Both national and international distributions are considered from a sociopolitical viewpoint.

PUBH 6555. Reproductive Health: U.S. and Global Perspectives. 2 Credits.

Reproductive health from a variety of public health perspectives, from defining reproductive health, past perspectives, needed improvements, and the factors that influence reproductive health.

PUBH 6556. Maternal and Child Nutrition. 2 Credits.

Covers the nutritional needs of women during the child bearing years, infants, children and adolescents. The course emphasizes the life course approach to nutrition and has a special emphasis on the effects of diet during infancy on obesity and degenerative diseases in later life. Students examine the biological basis of nutrition, identify risk factors associated with poor nutrition in individuals and populations and evaluate domestic and international programs. Summer (1 credit) and Spring (2 credits).

PUBH 6557. Child Development and Public Health. 2 Credits.

Examination of the development of children from a public health perspective and provide a detailed examination of the indicators of children's health that are needed to assist public health professionals improve children's health.

PUBH 6558. Women, Gender, and Health. 2 Credits.

Focuses on gender as a social determinant of health. Emphasis placed on examining the frameworks that are used in public health research to understand gender-based issues and how these frameworks affect the types of programs and intervention efforts developed.

PUBH 6559. HIV Prevention: An Interdisciplinary Approach. 2 Credits.

Provides an interdisciplinary overview of HIV prevention research from the behavioral, biological and biomedical perspective. Students are encouraged to approach the assignments and discussions from their own particular expertise and career interests/goals.

PUBH 6560. School Health and Safety. 1,2 Credit.

Examines the history, organization, financing, and politics of school health programs. It provides an overview of the core components of school health as defined by the Center for Disease Control and Prevention: health services, health education, physical education, nutrition services, counseling or mental health, school environmental health, health promotion, and family/community involvement. Summer (1 credit); Spring (2 credits).

PUBH 6561. Maternal and Child Health Policy Analysis. 2 Credits.

Provides instruction in maternal and child health policy in the U.S. with a particular emphasis on policies related to the organization, financing, delivery, and quality oversight of personal health services for mothers and children.

PUBH 6562. Physical Activity and Obesity Interventions: From the Individual to the Environment. 2 Credits.

This course broadly examines the public health issues related to physical activity and obesity, particularly as they relate to solutions for addressing individual factors and the obesogenic environment. Students gain a further understanding of the social, physiological, behavioral, and environmental factors related to both obesity and physical activity. The course focuses on examining multiple levels of solutions, specifically: 1) individual and behavioral interventions; 2) school-based and community-level interventions; 3) environmental interventions; 4) policy-level interventions. Students are expected to critically evaluate the necessary components of interventions, and apply that knowledge to future programmatic efforts.

PUBH 6563. Global Child Health. 2 Credits.

Elements of science, policy, challenges, and successes of global child health; focus on low and middle income countries and children under five years of age. Learn the burden of disease and associated risk factors; cost-effective interventions and tools. Restricted to graduate students.

PUBH 6570. Advanced Public Health Communication: Theory and Practice. 3 Credits.

Focuses on the use of communication to positively influence people's – and population's – understanding of health information, decision-making, and health behavior. Students study, and in a group project apply, a range of theories and techniques germane to effective message design and delivery. Prerequisite: PUBH 6503.

PUBH 6571. Social Marketing: Theory and Practice. 3 Credits.

The use of marketing to change the behavior of people, populations, and policy makers in ways that are in their, and society's, best interests. Students in this skills-based course study and work in teams to apply a range of marketing strategies to a real-world situation. Prerequisite: PUBH 6503.

PUBH 6572. Marketing Research for Public Health. 3 Credits.

The use of marketing research techniques used to better understand customers of public health programs in order to improve program design, implementation, and effectiveness. A range of qualitative and quantitative techniques are studied for their relevance to program planning, development, and continuous improvement.

PUBH 6573. Media Advocacy for Public Health. 3 Credits.

Focuses on the use of communication to positively influence public policy and public opinion. In this skills-based course students study and apply a range of theories and techniques germane to the policy advocacy process. Prerequisite: PUBH 6503.

PUBH 6574. Public Health Branding: Theory and Practice. 2 Credits.

This course focuses on the use of branding in the public health and social sectors. Learning from the commercial sector, we examine how to brand behaviors as well as products and services. We review branding methods, examine research on branding and its effectiveness, and build skills in branding for public health objectives.

PUBH 6575. Communication Skills for Public Health Professionals. 1 Credit.

Helps students develop writing and oral presentation skills through intensive, interactive training, practice, and feedback. Provides participants with a solid foundation for all forms of public health and other scientific and technical written and oral communication.

PUBH 6590. Introduction to Social Entrepreneurship. 2 Credits.

Examine innovative organizations created to improve people's lives and contribute to improved social and economic conditions. Emphasis on how such organizations are started, how they are sustained, and the various business models that are adopted to achieve an organizational mission.

PUBH 6591. PA/MPH Clinical Leadership Seminar. 1 Credit.

For first-year physician assistant and master of public health program students, an orientation to their roles as health professionals. Special emphasis on preventive and community medicine.

PUBH 6599. Topics in Prevention and Community Health. 1-3 Credits.

In-depth examination of a particular facet of prevention and community health. Topics and prerequisites vary.

PUBH 6610. Public Health Nutrition Practice and Leadership. 1 Credit.

This course provides an overview of public health nutrition practice. Students develop communication, management and leadership skills necessary for successful careers. Students also explore potential practicum and culminating experience options, and how to use these experiences to achieve their career goals. This course is designed for first year students in the public health nutrition MPH program.

PUBH 6611. Nutrition Assessment. 2 Credits.

The anthropometric, biochemical, clinical, and dietary methods for assessing nutritional status in individuals. The process of conducting food and nutrition environment assessments. Prerequisites: EXNS 2119 or PUBH 6619; or other equivalent course with permission of the instructor.

PUBH 6612. Food Systems in Public Health. 2 Credits.

A systems approach to understanding food systems and associated public health issues. How the current food system evolved, and how issues such as climate change and population growth may affect food systems in the future. The role of public health practitioners in meeting the population's need for safe, sufficient, and nutritious food. Policies, programs, and proposals aimed at creating healthier, more sustainable food systems.

PUBH 6613. U.S. Food Policy and Politics. 2 Credits.

The programs, regulations, and legislation that pertain to food production, food safety, nutrition assistance, and dietary guidance in the United States at the federal, state, and local levels.

PUBH 6619. Fundamentals of Nutrition Science. 3 Credits.

The fundamental scientific principles of human nutrition; improving diet and nutritional status in the broader context of public health; nutrition assessment, study designs in nutrition science research, the role of nutrition in chronic disease, and current topics in nutrition science.

PUBH 6620. Designing Healthy Communities. 2 Credits.

Issues at the intersection of public health and planning; evaluating needs and creating change in communities facing food access, physical activity, and age related challenges; the built environment as a means of improving health and preventing chronic disease.

PUBH 6621. Applied Data Analysis in Exercise and Nutrition Sciences. 1 Credit.

Introduction to data management and data analysis using the SAS System; data analysis procedures for specific research questions and settings within the context of exercise and nutrition sciences. Restricted to students in the MPH in physical activity in public health program, program design and evaluation track, or with the permission of the advisor. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6682. Managing Natural Resources for Food Production. 3 Credits.

The relevance of natural resource conservation for ensuring healthy agricultural, food, and environmental systems; various approaches to achieving sustainable systems. Restricted to students in the graduate certificate in food policy leadership program.

PUBH 6683. Applied Food Policy Immersion Experience. 2 Credits.

Leadership theories and an opportunity to build leadership skills and engage with food policy and agriculture leaders from a variety of sectors. Includes site visits to public and private organizations significant in food policy. Restricted to students in the graduate certificate in food policy leadership program. Prerequisites: PUBH 6680 and PUBH 6682.

PUBH 6699. Topics in Nutrition Sciences. 3 Credits.

Examination of a particular facet of nutrition sciences. Topics vary by semester. May be repeated for credit provided topic differs. See the Schedule of Classes for more details.

PUBH 6704. Health Information Technology, Informatics, and Decision Making. 3 Credits.

Operationalizing fundamental technology, processes, policies and concepts of healthcare informatics and decision management to translate data into actionable information within the framework of improving quality, safety, productivity, and experience.

PUBH 6706. Population and Community Health Analytics. 3 Credits.

Overview of the concepts of population and community health, the informatics and analytics necessary to assess population health, and best approaches for decision makers and policy makers using and communicating population and community health data.

PUBH 6850. Introduction to SAS for Public Health Research. 1 Credit.

Conducting basic data management tasks with SAS software; creating libraries, data sets, and variables, and generating basic descriptive statistics and simple graphics of public health and biomedical data.

PUBH 6851. Introduction to R for Public Health Research. 1 Credit.

Read, clean, transform, tidy, and summarize public health data in R. Explore data and write R functions to make workflow more efficient.

PUBH 6852. Introduction to Python for Public Health Research. 1 Credit.

Introduction to the basic concepts of Python programming language, illustrated with applications in biomedical sciences and health informatics.

PUBH 6853. Use of Statistical Packages for Data Management and Data Analysis. 3 Credits.

Data management and data analysis using statistical software. Creating and manipulating variables, merging and concatenating data sets, and implementing common statistical methods such as Student's t-test, linear regression, and logistic regression. Prerequisites: PUBH 6002.

PUBH 6854. Applied Computing in Health Data Science. 3 Credits.

Concepts of computing in biomedical sciences and health informatics. Foundations of Unix shell, command line tools, R and Python programming languages, and their applications in public health. PUBH 6860 may be taken simultaneously. Prerequisites: PUBH 6860. Credit cannot be earned for this course and PUBH 4201.

PUBH 6856. Advanced SAS for Public Health Research. 1 Credit.

Advanced SAS programming. Interactive Matrix Language, SAS macro facility, Structured Query Language, and SAS/GRAPH options for creating drill-down graphs to analyze public health data sets. Prerequisites: PUBH 6002; and PUBH 6249 or PUBH 6853; or permission of the instructor. Credit cannot be earned for this course and PUBH 6268.

PUBH 6859. High Performance and Cloud Computing. 3 Credits.

Introduction to high performance computing and cloud computing, including issues such as data transfer, security, virtual machines, and containers. HPC at GW, Amazon Web Services, and Google Cloud for biohealth computing. Prerequisites: PUBH 6851 and PUBH 6852 or permission of the instructor.

PUBH 6860. Principles of Bioinformatics. 3 Credits.

Biological concepts of molecular biology, genome organization, and evolution; computational concepts of alignment, database searching, phylogeny, and structure; and basic programming concepts including the shell, scripting, and databases. Prerequisites: PUBH 6002 or equivalent.

PUBH 6861. Public Health Genomics. 3 Credits.

Molecular technology and its impact on public health practice and discourse in the post-genomic era. The use of genomics to solve or help alleviate public health challenges. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6862. Applied Linear Regression Analysis for Public Health Research. 3 Credits.

Review of basic statistical inference and an overview of the construction of linear regression models for application to public health and biomedical data sets. Prerequisites: Prior completion of a course in undergraduate statistics and one semester of calculus.

PUBH 6863. Applied Meta-Analysis. 1 Credit.

Examination of meta-analysis (MA) with case studies using R. Statistical methods, including fixed- and random-effects MA; MA for binary and continuous data; heterogeneity in MA; meta-regression; and publication bias. Recommended background: Prior completion of an introductory course in biostatistical methods, such as PUBH 6002 or PUBH 6003, or an equivalent, is strongly recommended.

PUBH 6864. Applied Survival Analysis for Public Health Research. 3 Credits.

Application of survival or time-to-event data in public health studies. Censoring, survival functions, Kaplan-Meier curves, log-rank tests, Cox proportional hazards regression, parametric survival models, recurrent events, and competing risks. Prerequisites: PUBH 6249 or PUBH 6853. Recommended background: undergraduate calculus.

PUBH 6865. Applied Categorical Data Analysis. 3 Credits.

Comprehensive overview of methods for analyzing binary and multcategory response data. Contingency table methods for assessing associations and logistic regression for binary, nominal, and ordinal outcomes, including models for matched data. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6866. Principles of Clinical Trials. 3 Credits.

Introduction to basic principles for design, conduct, analysis, and reporting of clinical trials. Developing a proposal for a clinical trial. Prerequisites: PUBH 6002 or equivalent.

PUBH 6868. Quantitative Methods. 3 Credits.

Basic mathematical statistics: probability, fundamental distributions including binomial, Poisson and normal, central limit theorem, consistency, basic point estimation, hypothesis testing, linear models, and maximum likelihood estimation. Prerequisites: PUBH 6002 and prior completion of at least two courses in single variable calculus. Corequisites: PUBH 6249 or PUBH 6853.

PUBH 6869. Principles of Biostatistical Consulting. 1 Credit.

Principles and practice of biostatistical consulting and related skills and knowledge for public health and medical research environments. Recommended background: Prior completion of at least two graduate-level courses in statistics and an introductory course that discusses common health research designs, such as PUBH 6003, or their equivalent is strongly recommended. Credit cannot be earned for this course and PUBH 6258.

PUBH 6879. Propensity Score Methods for Causal Inference in Observational Studies. 3 Credits.

Designing observational studies; drawing causal inferences using propensity score methods; and performing propensity score analysis using R with hands-on data. Prerequisites: PUBH 6851 and PUBH 6865 or permission of the instructor.

PUBH 6883. Biostatistics Consulting Practicum. 1 Credit.

Supervised experiences involving the synthesis of biostatistical skills with consultations in one or more areas of health research. Students in the MPH programs in biostatistics and in epidemiology may register with permission of the instructor. Restricted to students in the MS in biostatistics and MS in epidemiology programs. Recommended background: Prior completion of at least two graduate-level courses in statistics and an introductory course that discusses common health research designs, such as PUBH 6003, or their equivalent is strongly recommended.

PUBH 6884. Bioinformatics Algorithms and Data Structures. 3 Credits.

Algorithmic foundations of bioinformatics, ranging from generic algorithmic techniques to specific algorithms used in various areas of bioinformatics. Theoretical background is complemented with solving practical problems. Prerequisites: PUBH 6854 or equivalent. Credit cannot be earned for this course and PUBH 4202.

PUBH 6885. Computational Biology. 3 Credits.

Introduction to modern computational biology, including omics data science, high-throughput technologies, multi-omics data integration, and analytical methods with real-world applications. Permission of the instructor is required prior to enrollment.

PUBH 6886. Statistical and Machine Learning for Public Health Research. 3 Credits.

Application and evaluation of supervised and unsupervised statistical and machine learning algorithms in the context of biomedical and public health research. Permission of the instructor is required prior to enrollment.

PUBH 6887. Applied Longitudinal Data Analysis for Public Health Research. 3 Credits.

Introduction to commonly used methods for longitudinal data analysis including fixed effects models, linear and generalized linear mixed effects models, and generalized estimating equations. Missing data. Prerequisites: PUBH 6862 and PUBH 6965; and PUBH 6868, or PUBH 8364, or STAT 6201 and STAT 6202.

PUBH 6894. Research Analytics. 3 Credits.

Key concepts in research analytics; skills and experiences needed to leverage big data to improve public health through data integration.

PUBH 6897. Research in Biostatistics and Bioinformatics. 1-4 Credits.

Independent research. Must be approved in advance by advisor/instructor. Restricted to graduate students in the Department of Biostatistics and Bioinformatics.

PUBH 6898. Master of Science Thesis. 1-2 Credits.

Master's thesis.

PUBH 6899. Topics in Biostatistics and Bioinformatics. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details.

PUBH 6999. Master of Science in Epidemiology Thesis. 2 Credits.

Thesis research. Restricted to students in the MS in epidemiology program.

PUBH 8010. Doctoral Independent Study. 1-3 Credits.

Doctoral students complete an independent study plan to meet predetermined project and/or research work under the supervision of a faculty member. Restricted to GWSPH doctoral students.

PUBH 8110. Research Rotations. 2 Credits.

Students conduct formal rotations with a laboratory or research group to gain research and reporting experience with the mentorship of EOH faculty. Includes identification of an environmental health research problem, collection or analysis of data, and reporting on the results. May be repeated for credit. Restricted to students in the PhD in environmental program or with the permission of the instructor.

PUBH 8116. Communicating Research Results. 2 Credits.

The importance of strategic communication to public health progress. Students gain communication skills that help to transcend educational barriers and facilitate connections with peers, policymakers, and the broader public. Restricted to doctoral students who have satisfactorily completed the comprehensive examination or with the permission of the dissertation chair.

PUBH 8144. Advanced Environmental Health Data Development and Modeling. 1 Credit.

Advanced doctoral level material on environmental exposure assessment using methods covered in PUBH 6144. Restricted to doctoral candidates. Prerequisites: PUBH 6131 or PUBH 6853. Corequisites: PUBH 6144.

PUBH 8242. Advanced Topics in Clinical Epidemiology and Public Health: Reading the Research. 1 Credit.

Evidence-based problem-solving approach using methods covered in PUBH 6242. Restricted to doctoral students. Prerequisites: PUBH 6003 or equivalent. Corequisites: PUBH 6242. Credit cannot be earned for this course and PUBH 6243.

PUBH 8244. Doctoral Topics: Cancer Epidemiology. 1 Credit.

Course focuses on critical review and interpretation of cancer epidemiology literature as well as issues in research design in the field. Prerequisites: PUBH 6001 and PUBH 6003. Corequisites: PUBH 6244.

PUBH 8245. Doctoral Topics: Infectious Disease Epidemiology. 1 Credit.

Provides doctoral level material on the content of infectious disease epidemiology. The course focuses on critical review and interpretation of infectious disease literature as well as issues preparing an analytic research paper on an emerging infectious disease and the application of tools used to describe the epidemiology of those diseases. Spring Prerequisites: PUBH 6003. Corequisites: PUBH 6245.

PUBH 8250. Doctoral Topics: Epidemiology of HIV/AIDS. 1 Credit.

Students select specific topic within area of HIV/AIDS epidemiology. Options include responding to a data analysis problem; responding to a methodological problem found within HIV/AIDS research; or another topic approved by instructor. Prerequisites: PUBH 6001 and PUBH 6003. Corequisites: PUBH 6250.

PUBH 8259. Doctoral Topics: Epidemiologic Surveillance in Public Health. 1 Credit.

Course provides doctoral level material on the content of surveillance offered in PUBH 6259. Focus is on critical review and interpretation of surveillance literature as well as issues preparing an analytic research paper. Prerequisites: PUBH 6002 and PUBH 6003. Corequisites: PUBH 6259.

PUBH 8283. Doctoral Biostatistics Consulting Practicum. 2 Credits.

Working under supervision, students develop an experience-based understanding of how biostatistical skills are used in one or more areas of health research. Students must have completed at least 6 credits in any combination of general or specialized graduate-level statistics courses, such as PUBH 6202, PUBH 6260, STAT 6201, or STAT 6202, before enrolling in this course. Restricted to PhD students.

PUBH 8364. Quantitative Methods. 3 Credits.

Introduces basic concepts in mathematical statistics. Topics include probabilities (unconditional and conditional), density and distribution functions of continuous and discrete random variables, including expected values. Specific distribution functions discussed are Binomial, Poisson, Hypergeometric, and Gaussian distributions. Additional topics include bivariable distributions, variance-covariance matrix, limiting theory, asymptotic results, and maximum likelihood estimation. Prerequisites: MATH 1231 and MATH 1232; and PUBH 6002 and PUBH 6249.

PUBH 8365. Design of Medical Studies. 3 Credits.

Design of medical investigations, including the randomized clinical trial, observational cohort study, and the retrospective case-control study. Specific methods regarding sample size, power and precision and statistical procedures for randomization and sampling. Ethics of clinical trials and the intention-to-treat principle. Prerequisite: PUBH 6002.

PUBH 8366. Biostatistical Methods. 3 Credits.

Biostatistical methods for asymptotically efficient tests and estimates of relative risks and odds ratios from prospective and retrospective matched and unmatched studies. Fixed and random effects models. Logistic regression, conditional logistic regression. Poisson regression. Maximum likelihood and efficient scores. Prerequisites: STAT 6202 or permission of the instructor.

PUBH 8401. Foundations in Public Health Leadership. 3 Credits.

Course modules cover personal leadership; leadership models, theories, concepts, tools, and skills; and practical application of leadership to real world situations. Restricted to doctoral candidates.

PUBH 8402. Leadership and Decision Making: Skills Based Approach. 2 Credits.

Using leadership and decision making skills to solve complex health problems and implement successful solutions to improve population health in all communities; decision making, program management, quality and risk management, human resources and budget, governance, and change management.

PUBH 8403. Leadership in Public Health Policy and Practice. 2 Credits.

Students work in teams on projects for clients from public health-related agencies or organizations in the Washington, DC, area that address issues in environmental and occupational health, global health, health behavior, and health policy. Restricted to students in the DrPh program. Prerequisite: PUBH 8402.

PUBH 8404. Advanced Topics: Health Systems and Health Policy Research. 3 Credits.

Examination and assessment of issues related to the intersection of health care systems and health policy, and how health policy and health services research can inform the development and evaluation of health care systems and health policy. Restricted to doctoral candidates. Prerequisite: PUBH 6315.

PUBH 8405. Advanced Topics: Health Economics Research. 3 Credits.

Critical financing issues for U.S. public health and health care services and systems. The role of health services research in understanding the effects of these issues and informing the deliberations and decisions of policymakers.

PUBH 8406. Advanced Topics: Health Research in the Global Arena. 3 Credits.

Alternative field methods adopted from sociology, anthropology, economics, and political sciences for social sciences and policy research. Builds data collection, instruments, measurements, indicators, and data analysis and interpretation skills in specific socio-cultural contexts. Ethical issues in international research.

PUBH 8407. Advanced Topics: Health Leadership in International Settings. 3 Credits.

Doctoral students develop the tools and experiences needed to build capacity for leadership in global health. Prerequisite: PUBH 8406.

PUBH 8408. Advanced Topics: Health Behavior Research & Practice Applications. 3 Credits.

Advanced topics relating theory to practice in areas of health education and behavioral change. Application of qualitative and quantitative research to health related behavior at individual and community levels.

PUBH 8409. Advanced Topics: Health Communication Research. 3 Credits.

Methods of communications research designed to alter health behavior. Emphasis on critical analysis of communications research aimed at the mass public, groups, and interpersonal level.

PUBH 8411. Advanced Topics: Principles of Human Health Risk Science. 3 Credits.

This course provides the doctoral student with a comprehensive orientation to the frameworks, principles and issues involved in assessing, managing and communicating environmental health risks. This fundamental, interdisciplinary course is designed to foster dialogue and insights about contemporary risk science and management issues, including ethical concerns and technical issues that influence policy making. Restricted to students in the environmental and occupational health program, or with permission of the instructor.

PUBH 8412. Advanced Topics: Environmental and Occupational Health Research and Practice. 3 Credits.

This course exposes students to the theory and reality of both research and practice in environmental and occupational health. There is an emphasis on the use of public health science in policy and regulatory decisions. Prerequisites: PUBH 8411 or permission of the instructor.

PUBH 8413. Research Leadership. 1-10 Credits.

Students participate in a range of activities designed to develop and enhance their research methods and analytic skills. These activities include participating in the development and submission of sponsored research proposals; being formally affiliated with a research project, assuming responsibility for completing a real-world research project; engaging in empirical data collection and analysis efforts.

PUBH 8414. Policy and Management Leadership. 1-10 Credits.

Students develop and enhance their management, leadership, and policymaking skills for problem solving in real-world settings; public health departments, community health centers, legislative settings, and public or teaching hospitals.

PUBH 8415. Instructional Leadership. 1-10 Credits.

Students participate in a range of activities designed to develop and enhance their teaching skills. These activities include course development, teaching master's level courses, acting as TA for undergraduate courses, advising students about their class performance, evaluating student performance, and developing remedial programs for students.

PUBH 8416. Study Design & Evaluation Methods. 3 Credits.

Prepares doctoral students to design and conduct program and policy evaluation in public health. Intensive introduction to the principles of study program design and evaluation research emphasizing the ability to synthesize the population-based intervention literature, apply planning and management methods, describe and apply research methods from a range of disciplines, and prepare a program research proposal.

PUBH 8417. Qualitative Research Methods and Analysis. 3 Credits.

Techniques for designing and conducting qualitative research and for analyzing and reporting qualitative data relevant to program development and implementation, community assessment, and policy analysis. Prerequisites: PUBH 8416.

PUBH 8418. Applied Statistical Analysis. 3 Credits.

Intensive course in data management and data analysis using STATA®. Database management system techniques and data analytical strategies for the appropriate analysis of data sets obtained from a variety of studies will be presented. The student will manipulate national data sets from epidemiological studies as well as Demographic and Health Survey (DHS) data. Prereq: PubH 8416.

PUBH 8419. Measurement in Public Health and Health Services. 3 Credits.

Review principles of measurement and assessment as they apply to public health and health services research constructs, review existing state-of-the-art measures of individual and population health status (e.g., morbidity, mortality, functioning and health-related quality of life) and of individual and community health behavior. Explore current measurement issues in health research.

PUBH 8420. Advanced Analysis and Dissemination. 3 Credits.

Advanced multivariate data analyses of complex datasets and programs, including advanced cross-sectional techniques, time-series analysis, and the use of panel data. Evaluation of results, and dissemination of findings to relevant stakeholders. Fall. Prerequisites: PUBH 8417 and PUBH 8418.

PUBH 8422. Advanced Health Care and Public Health Research Design. 2 Credits.

Design of protocol suitable for implementation as part of DrPH dissertation requirement. Permission of the instructor, completion of required coursework, and successful completion of the comprehensive examination required prior to enrollment.

PUBH 8423. Dissertation Research. 1-12 Credits.

Dissertation research for DrPH. Prerequisite: PUBH 8422.

PUBH 8434. Behavioral Medicine and Public Health. 3 Credits.

Investigation into the field of behavioral medicine, which integrates behavioral, psychosocial, and biomedical sciences, with specific applications to public health. Restricted to PhD students in the social and behavioral sciences in public health program or with the permission of the instructor.

PUBH 8435. Dissertation Proposal Development for Social and Behavioral Sciences. 2 Credits.

Advise and assist doctoral students in developing and defending their dissertation proposal. Restricted to doctoral students who have successfully completed comprehensive examinations.

PUBH 8610. Statistical Methods for Health Policy. 3 Credits.

Application of statistical analysis in health policy and public health research using Stata® to analyze a variety of large public health data sets. Prior completion of at least one graduate-level statistics course is required. Restricted to doctoral students. Credit cannot be earned for this course and PUBH 6310.

PUBH 8620. Seminar: Foundations of U.S. Health Policy. 3 Credits.

Reintroduction to the basics of U.S. health policy, combining advanced legal, policy, and regulatory content acquisition with advanced health law and policy analysis skills. Restricted to doctoral students in health policy or with the permission of the instructor.

PUBH 8622. Health Care Payments, Systems, and Delivery Models. 3 Credits.

Survey of long-standing practices and recent developments in provider payment and the organization of health care delivery in the United States. Restricted to doctoral students in the health policy program or with the permission of the instructor.

PUBH 8875. Linear Models in Biostatistics. 3 Credits.

Introduction to the theory of linear models with applications to public health and biomedical data. Least squares, maximum likelihood, and distribution theory for linear regression.

Prerequisites: PUBH 6862; and PUBH 6868 or PUBH 8364 or STAT 6201. Corequisites: STAT 6202. Recommended background: prior completion of coursework in linear algebra and multivariable calculus.

PUBH 8877. Generalized Linear Models in Biostatistics. 3 Credits.

Theoretical development of most commonly used methods for categorical and count data presented within the unified framework of the generalized linear model. Prerequisites: PUBH 6865; and PUBH 6868, or PUBH 8364, or STAT 6201 and STAT 6202. Recommended background: prior completion of coursework in linear algebra.

PUBH 8878. Statistical Genetics. 3 Credits.

Application of statistical concepts to family- and population-based genetic data. Human evolution, genome-wide association studies, gene-environment interactions, and genetic architecture with emphasis on applications to real data and analyses. Prerequisites: PUBH 6860.

PUBH 8999. Dissertation Research. 1-12 Credits.

Dissertation research.

EXERCISE AND NUTRITION SCIENCES

The Department of Exercise and Nutrition Sciences is uniquely positioned within the only school of public health in the nation's capital while also offering programs that integrate the complimentary sciences of nutrition and exercise. The curriculum provides students with the opportunity to learn only how exercise, physical activity, and nutrition affect the individual, but also how these factors affect the

health and function of communities at large. Students within the Department engage in research and applied learning experiences in settings as diverse as the National Institutes of Health, professional sports teams, the U.S. Department of Agriculture, the Pentagon, and the DC public school system.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Science with a major in exercise science (p. 1304)
- Bachelor of Science with a major in exercise science, pre-athletic training/sports medicine concentration (p. 1307)
- Bachelor of Science with a major in exercise science, pre-medical professional concentration (p. 1310)
- Bachelor of Science with a major in exercise science, pre-physical therapy concentration (p. 1313)
- Bachelor of Science with a major in nutrition science (p. 1316)
- Bachelor of Science with a major in nutrition science, pre-medical professions concentration (p. 1319)

Combined program

- Dual Bachelor of Science in nutrition science and Master of Public Health in public health nutrition (p. 1327)

Minors

- Minor in exercise science (p. 1328)
- Minor in nutrition (p. 1328) science (p. 1328)

GRADUATE

Master's Programs

- Master of Public Health in the field of physical activity in public health (p. 1351)
- Master of Public Health in the field of public health nutrition (p. 1355)
- Master of Science in the field of exercise science with a concentration in strength and conditioning (p. 1361)

Doctoral Program

- Doctor of Philosophy in the field of exercise physiology and applied nutrition (p. 1381)

FACULTY

Professors L. DiPietro, J. Sacheck-Ward (*Chair*), B.J. Westerman

Associate Professors M.J. Barron, T.A. Miller, K.Z. Robien, S.A. Talegawker, M. Ver Ploeg, A.J. Visek

Assistant Professors M.D. Barberio, K.S. Levers, K.R. Lora (*Teaching*), A.C. Sylvetsky

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
 - Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
 - Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
 - The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office
- Exercise and Nutrition Sciences (EXNS) (p. 1589)
 - Health and Wellness (HLWL) (p. 1616)
 - Lifestyle, Sport, and Physical Activity (LSPA) (p. 1676)
 - Public Health (PUBH) (p. 1777)

GLOBAL HEALTH

The Department of Global Health offers diverse programs of study that prepare students to make a difference in the health of individuals and communities around the world. With three fields of study, several joint programs within the School of Public Health, several joint degree programs with other GW schools, a doctoral program, and more than 20 international practicum partnerships, students have a wealth of opportunities to examine global health concepts and conduct interdisciplinary research.

GRADUATE

Master's programs

- Master of Public Health (MPH@GW) (p. 1357)
- Master of Public Health in the field of global environmental health (p. 1339)
- Master of Public Health in the field of global health epidemiology and disease control (p. 1344)
- Master of Public Health in the field of global health policy (p. 1341)
- Master of Public Health in the field of global health program design, monitoring, and evaluation (p. 1343)
- Master of Public Health in the field of humanitarian health (p. 1349)

Doctoral program

- Doctor of Public Health in the field of global health (p. 1386)

FACULTY

Professors M.C. Ellsberg, A. Hyder, N. Kumar, E.A. Migliaccio, C. Mores, C. Santos-Burgoa, R. Southby (Emeritus), J.M. Tielsch (Chair)

Associate Professors R. Asgary, S. Baird, U. Colon-Ramos, S. Frehywot (Teaching), C. Huang, W. Munar, J.F. Sandberg

Assistant Professors S. Mookherji (Teaching), J. Muz, N. Paichadze (Research), E. Smith

Adjunct Professors J.K. Andrus, R.J. Waldman

Adjunct Instructors K.A. Gamble-Payne

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PUBH 0920. Continuing Research - Master's. 1 Credit.
Continuing Research Credit- Master's Level.

PUBH 0940. Continuing Research - Doctoral. 1 Credit.
Continuing Research Credit- Doctoral.

PUBH 1010. First-Year Experience in Public Health. 1 Credit.

Designed to assist students in the transition to GW and the public health major by introducing skills and resources needed to succeed personally, academically, and professionally, particularly in a public health context.

PUBH 1099. Variable Topics. 1-36 Credits.

PUBH 1101. Introduction to Public Health and Health Services. 3 Credits.

Introduction to aspects of public health and health services, including health services administration and policy, maternal and child health, environmental health, and health promotion.

PUBH 1102. History of Public Health. 3 Credits.

Historical and philosophical development of public health and its contributions to understanding, preventing, and controlling disease and disabilities.

PUBH 1102W. History of Public Health. 3 Credits.

Social history of public health from the late nineteenth century to the present; historical context for contemporary public health problems. Includes a significant engagement in writing as a form critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: UW 1020.

PUBH 1299. Undergraduate Public Health Study Abroad. 1-6 Credits.

May be repeated for credit when multiple courses with distinct subject matter are taken as part of a study abroad program.

PUBH 2110. Public Health Biology. 3 Credits.

Basic scientific mechanisms, concepts, and principles in health and the pathogenesis of diseases; a foundation for applications to public health. Prerequisites: BISC 1005; or BISC 1111.

PUBH 2112. Principles of Health Education and Health Promotion. 3 Credits.

Social and behavioral theories underlying health promotion program development and evaluation. Practical applications in a variety of domestic and global public health settings. PUBH 1101 may be taken as a corequisite. Prerequisite: PUBH 1101.

PUBH 2113. Impact of Culture upon Health. 3 Credits.

Relationships between cultural values and the development of modern health systems based on Western models of health care practice. Reliance upon traditional forms of health care. Examples of successful incorporation of traditional practices into evolving health care systems.

PUBH 2114. Environment, Health, and Development. 3 Credits.

Survey of the relationship between health and development and environmental trends. Topics include deforestation, urban contamination, and desertification.

PUBH 2115. Health, Human Rights, and Displaced Persons. 3 Credits.

Concepts of health as a human right, ethics, and the participation of the international community in moving toward health for all. Civil and international conflict in the generation of displaced populations.

PUBH 2116. Global Delivery of Health Systems. 3 Credits.

Introduction to health systems and the basic concepts of health systems administration and financing and health care reform with examples from advanced, middle income, and poor countries.

PUBH 2117. Service Learning in Public Health. 3 Credits.

A service-learning course that combines classroom instruction with practical learning. Students are responsible for securing an approved service site before the beginning of the semester; the instructor is available to assist with this placement.

PUBH 3115. Global Health and Human Rights. 3 Credits.

Concepts of health as a human right and the impact of ethical violations on the mental and physical health of individuals; the efforts of the international community in addressing health consequences of vulnerable populations.

PUBH 3116. Global Health Systems Performance. 3 Credits.

Introduction to the U.S. and international health systems, both public and private, and the WHO Health Systems Framework; how environmental, ethical, cultural, and political actions shape health systems in different parts of the world. Restricted to juniors and seniors.

PUBH 3130. Health Services Management and Economics. 3 Credits.

Basics of management theory, finance, and economics as applied to managing in the public health and health services field. Prerequisite: ECON 1011.

PUBH 3131. Epidemiology: Measuring Health and Disease. 3 Credits.

Principles of epidemiology applied to disease surveillance, control of infectious and chronic diseases, and health services/health policy. Understanding the basic research designs and their relationship to establishing cause and effect and effectiveness of interventions to prevent and cure disease. Prerequisites: PUBH 1101 and STAT 1127.

PUBH 3132. Health and Environment. 3 Credits.

Introduction to environmental and occupational health and implications for individual and population health. Issues of clean water, environmental toxins, air pollution, and the environmental impact on infectious diseases.

PUBH 3133. Global Health and Development. 3 Credits.

Political, social, and economic determinants of health; how health status is measured with an emphasis on low-income countries, the health of the poor, and inequity and inequality; burden of diseases that impact development and their basic epidemiological characteristics, including who they affect, when they occur, and where risk is greatest.

PUBH 3135W. Health Policy. 3 Credits.

An introduction to the fundamentals of the health care system in the United States and strategies available to policymakers when addressing problems relating to access, financing, and delivery of health care. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: PUBH 1101.

PUBH 3136. Health Law. 3 Credits.

Legal concepts related to individual health care and public health systems in the United States. Health care law, public health law, and bioethics.

PUBH 3137. Global Public Health Nutrition. 3 Credits.

Consideration of hunger and other nutrition issues globally, including food insecurity, under/over nutrition, and micronutrient deficiencies. Application of UNICEF malnutrition framework to describe vulnerable groups, critique program strategies, and identify multisectorial strategies to reduce hunger and malnutrition. Prerequisite: PUBH 3133.

PUBH 3142. Introduction to Biostatistics for Public Health. 3 Credits.

Applying biostatistical principles to analyze studies in health services literature. Selecting statistical methods based on research questions, calculating basic statistics for estimation and inference, interpreting results of statistical analyses.

PUBH 3150. Sustainable Energy and Environmental Health. 3 Credits.

Sustainability issues from the perspective of environmental health. Technical, social, and health implications of specific energy sources. Energy conservation and efficiency in the context of population growth, food and water resources, and maintenance of a healthy environment for future generations.

PUBH 3151. Current Issues in Bioethics. 3 Credits.

General and specific ethical questions and ethical decision making from both personal and organizational perspectives; right to health care, research with human subjects, reproductive technology, genetics, professional and student roles and responsibilities, and end-of-life issues.

PUBH 3151W. Current Issues in Bioethics. 3 Credits.

General and specific ethical questions and ethical decision making from both personal and organizational perspectives; right to health care, research with human subjects, reproductive technology, genetics, professional and student roles and responsibilities, and end-of-life issues. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

PUBH 3152. Qualitative Research Methods in Public Health. 3 Credits.

Introduction to characteristics and methods relevant to the design and conduct of qualitative research in public health investigations; data collection methods, coding, data analysis, and reporting results.

PUBH 3199. Topics in Public Health. 1-5 Credits.

Topics vary by semester. See the Schedule of Classes for more details. May be repeated for credit provided the topic differs.

PUBH 3201. Introduction to Bioinformatics. 3 Credits.

Introduction to bioinformatics, including biological concepts of molecular biology, genome organization, and evolution; computational concepts of alignment, database searching, phylogeny, and structural bioinformatics; and programming concepts in Unix and Python including the Unix environment, the shell, scripting, databases, regular expressions, and pipeline development. Prerequisites: BISC 1112 or BISC 1116 and BISC 1126; and STAT 1127. Credit cannot be earned for this course and BISC 2584, CSCI 3571.

PUBH 3202. Introduction to Genomics. 3 Credits.

Principles of genomics; genome projects, including the human genome, molecular techniques, analytical approaches, computational tools for genome research, and genomic data generation and analysis. Prerequisites: BISC 1111; BISC 1112.

PUBH 3299. Undergraduate Public Health Study Abroad. 1-6 Credits.

May be repeated for credit when multiple courses with distinct subject matter are taken as part of a study abroad program.

PUBH 3995. Undergraduate Research. 1-3 Credits.

Students work under the mentorship of a faculty member to acquire knowledge and skills central to the design, conduct, and/or analysis of scientific research. Project proposal must be approved by the instructor and dean's office prior to enrollment. Credit cannot be earned for this course and EXNS 3995.

PUBH 4140W. Senior Seminar. 3 Credits.

Students develop a public health intervention incorporating various domains of the discipline of public health. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Restricted to public health majors in their senior year. Prerequisite: PUBH 3130.

PUBH 4141. Senior Seminar Community Needs Assessment. 3 Credits.

Culminating experience for students in undergraduate public health programs. Restricted to seniors in the BS in public health program and students in the minor in public health.

PUBH 4199. Independent Study. 3 Credits.

Outline of intended project must be approved prior to registration by instructor and dean's office. Restricted to public health majors.

PUBH 4201. Practical Computing. 3 Credits.

Basic concepts of computer programming in biomedical sciences and health informatics; foundations of R and Python languages; best programming practices in health applications. Prerequisites: BISC 1111 and BISC 1115; or BISC 1112 and BISC 1116.

PUBH 4202. Bioinformatics Algorithms and Data Structures. 3 Credits.

Algorithmic foundations of bioinformatics, ranging from generic algorithmic techniques to specific algorithms used in various areas of bioinformatics. Prerequisite: PUBH 4201.

PUBH 6002. Biostatistical Applications for Public Health. 3 Credits.

Application of biostatistical principles to critical analysis of retrospective studies, prospective studies, and controlled clinical trials, as well as studies in the health services literature. Selection, basic calculations, and interpretation of statistical methods for detection of significant associations and differences.

PUBH 6003. Principles and Practices of Epidemiology. 3 Credits.

General principles, methods, and applications of epidemiology. Outbreak investigations, measures of disease frequency, standardization of disease rates, study design, measures of association, hypothesis testing, bias, effect modification, causal inference, disease screening, and surveillance. Case studies apply these concepts to a variety of infectious, acute, and chronic health conditions affecting the population.

PUBH 6007. Social and Behavioral Approaches to Public Health. 2 Credits.

Social and behavioral science theories, models, and concepts that can be applied to public health problems and interventions. The role of social and community factors, including race, ethnicity, and culture, in both the onset and solution of public health problems; the interrelationship between the social and behavioral sciences.

PUBH 6009. Fundamentals of Public Health Program Evaluation. 2 Credits.

Topics include designing program evaluation studies to produce and interpret evidence to improve public health; options for evaluation study design and evidence generation; and qualitative data collection and analysis methods.

Prerequisites: PUBH 6007. Recommended background: Prior completion of PUBH 6002.

PUBH 6010. Independent Study. 1-6 Credits.

Designed to provide the student with an opportunity to gain or enhance public health knowledge and to explore an area of interest related to public health research or the delivery and/or administration of health services. Permission of the instructor or advisor required prior to enrollment.

PUBH 6011. Environmental and Biological Foundations of Public Health. 3 Credits.

The connection between population health and exposures to chemical, physical, and biological agents in the environment; interconnection between dimensions of environmental systems and all living things; biological sciences as they relate to environmental impacts.

PUBH 6012. Fundamentals of Health Policy. 2 Credits.

Comparative study of the structure, financing, and delivery of public health and health care in the United States and abroad; core elements of policy analysis are used to develop skills in analyzing a public health problem and presenting possible solutions both orally and in writing.

PUBH 6013. Master's Thesis. 3 Credits.

See Advisor.

PUBH 6014. Practicum. 1-3 Credits.

This course provides the opportunity for MPH students to apply the knowledge and skills acquired through their programs of study. A planned, supervised and evaluated practice experience that is relevant to the student's program is an essential component of a public health professional degree program. These opportunities can take place in a variety of agencies or organizations. Each program customizes Practicum requirements to meet students' needs. (Credit/No Credit) [For 45-credit MPH students who started Summer 06 or after.].

PUBH 6015. Culminating Experience. 1-3 Credits.

Students synthesize and integrate knowledge acquired in coursework and other learning experiences and apply theory and principles to a situation that approximates some aspect of professional practice. Program faculty evaluate student's mastery of the body of knowledge and ability to demonstrate proficiency in the required competencies. Requirements evaluated are adapted to the degree program.

PUBH 6016. Field/Laboratory Experience. 2 Credits.

The overall purpose of the field/laboratory experience requirement is to introduce students in the MS-PHMEID degree program to a supervised practical experience in a Public Health Laboratory or other qualifying public health entity from the perspective of the actual wet laboratory operations. Students that already have this laboratory experience are introduced to epidemiologic research, particularly surveillance, and its tie-in with laboratories either in the United States or in an international setting.

PUBH 6021. Essentials of Public Health Practice and Leadership I. 1 Credit.

The skills necessary for being an effective practitioner and leader; optimizing self-management and contributions in teams as public health professionals.

PUBH 6022. Essentials of Public Health Practice and Leadership II. 1 Credit.

The development of organizations and systems in public health; organizational management tools and collaborative, outcome-oriented advocacy techniques. PUBH 6021 may be taken as a corequisite. Prerequisite: PUBH 6021.

PUBH 6023. Interprofessional Education Experience. 0 Credits.

Completion of an interprofessional education experience (IPE) is required for all MPH students. Maximizes the student's capacity for collaboration with others to better address public health and health care challenges. A variety of options are available for students to complete this requirement before graduation. Restricted to MPH students. Prerequisites: PUBH 6002, PUBH 6003, PUBH 6007, PUBH 6011, PUBH 6012, and PUBH 6021.

PUBH 6050. Introduction to Health Services Delivery. 2 Credits.

Introduction to the systems that define and shape delivery of health services in the United States. Case studies and presentations on major issues develop an appreciation of dilemmas confronting policymakers, providers, and patients: balancing cost, quality and access. Access and disparity, health care professions, facilities, managed care organizations and government health care programs. Policy changes that have had major impact on American health care in the past century. Fall.

PUBH 6052. Practical Data Management and Analysis for Public Health. 2 Credits.

Practical aspects of dataset creation, data management, rudimentary statistical analysis, and tabular and graphical presentation of results. Creating codebooks, entering and cleaning data, deriving new variables from existing ones, choosing and implementing appropriate analytical techniques, graphing and tabulating results, and documenting and protecting work. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6054. Community Engagement and Advocacy. 2 Credits.

Tools and strategies for public health practitioners to understand, respect, organize, and collaborate with community groups and organizations for promotion of healthy behaviors. Development of practical skills to harness available resources in a community to advocate for healthy living and positive health outcomes.

PUBH 6056. Public Health Leadership Seminar. 1 Credit.

Leadership lessons taken from the careers of a diverse group of executives and entrepreneurs from the corporate, government, nonprofit, and art sectors. Leadership theory and styles. Building networks; skills for effectively engaging with peers, potential employers, and business partners.

PUBH 6058. Researching Violence Against Women and Girls. 2 Credits.

The intersection of violence against women and girls (VAWG) and public health; the impact that violence has on the health of the survivor, her current and future children, and communities; methods and best practices for designing applied research on VAWG. Prerequisites: PUBH 6002, PUBH 6003, PUBH 6007, PUBH 6011 and PUBH 6012.

PUBH 6060. MPH@GW Culminating Experience I. 1 Credit.

Students integrate and apply the skills, knowledge, theories, principles, and methods of public health practice to a public health issue. Most students will have completed PUBH 6014 or PUBH 6022 and other MPH core coursework prior to enrollment. Restricted to students in the MPH@GW program. Prerequisites: PUBH 6002, PUBH 6003, and PUBH 6007; and PUBH 6004 or PUBH 6011; and PUBH 6006 or PUBH 6012; and PUBH 6009 or PUBH 6437.

PUBH 6061. MPH@GW Culminating Experience II. 1 Credit.

Students integrate and apply the skills, knowledge, theories, principles, and methods of public health practice to a public health issue. Students may already have completed PUBH 6060 or it may be taken as a corequisite. Restricted to students in the MPH@GW program. Prerequisites: PUBH 6060.

PUBH 6080. Pathways to Public Health. 0 Credits.

Introduces the 12 foundational public health learning objectives to GWSPH students in non-MPH graduate programs. Must be completed before the last day of classes in the student's first semester of matriculation.

PUBH 6090. Practicum/Culminating Experience. 4 Credits.

Individually tailored. Culminating Experience for the MPH program. Permission of the advisor required prior to enrollment.

PUBH 6091. Special Project. 1-4 Credits.

Under faculty supervision, the student undertakes an original project that applies the skills and knowledge gained in the chosen track and/or concentration within the MPH program. Prerequisite: Permission of the instructor. NOTE that credits vary by program; please consult your program plan to register for the appropriate number of credits. [For 36-credit MPH students only].

PUBH 6099. Topics in Public Health. 3 Credits.

In-depth examination of a particular facet of public health. Topics vary by semester. See the Schedule of Classes for more details. May be repeated for credit provided the topic differs.

PUBH 6121. Environmental and Occupational Epidemiology. 3 Credits.

Demonstration and application of epidemiologic methods for the study of environmental and occupational health problems; epidemiologic exposure assessment methods and methods relevant to cohort, case-control, cross-sectional, and case cross-over studies; survey design and sources and evaluation of biases and confounding; emphasis on written and oral communication skills. Prerequisites: PUBH 6002 and PUBH 6003; and PUBH 6004 or PUBH 6011.

PUBH 6122. Protecting Public Health and the Environment: Policies, Politics, and Programs. 3 Credits.

The legislative, regulatory, judicial, and political system in the United States developed to protect human health and the environment. National and global public and environmental health agencies, policy development, and current topics. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6123. Toxicology: Applications for Public Health Policy. 3 Credits.

Toxicology as both a scientific discipline and a source of information for public health policy with respect to the regulation of foods, pesticides, drugs (pharmaceuticals), environmental chemical pollutants, and other chemicals that may affect human and environmental health. How chemicals interact with biological systems to produce adverse effects. The ways in which toxicologic information is developed and applied to regulatory decision making and the use of toxicology in regulatory risk assessment. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6124. Risk Management and Communication. 3 Credits.

Culminating course using problem-based learning methods to examine a variety of real-world environmental and occupational health issues in-depth. Students integrate cumulative knowledge across all required courses and demonstrate professional competencies. Prerequisites: PUBH 6121, PUBH 6123 and PUBH 6126.

PUBH 6126. Assessment and Control of Environmental Hazards. 3 Credits.

Introduces the anticipation, recognition, assessment, and control of hazards in the workplace and the ambient environment. It emphasizes an understanding of the characteristic features of specific hazards, which may be chemical, biological, or physical/ergonomic.

PUBH 6127. Introduction to Environmental Health Microbiology. 2 Credits.

Basics of public health microbiology as it relates to the environment, food, water, and bioterrorism. Examines from an environmental health perspective how the principles of microbiology are applied to current and emerging public health issues, whether from intentional or unintentional contamination of the environment. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6128. Global Environmental and Occupational Health. 2 Credits.

Examination of the global environmental and occupational health factors that contribute significantly to the global burden of disease, focusing primarily on low- and middle-income countries; principles from behavioral sciences, development economics, risk assessment, and epidemiology are included; potential solutions to environmental health problems, metrics used to measure impacts, and areas for future research. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6130. Sustainable Energy and the Environment. 2 Credits.

The sustainability of various energy strategies, including energy conservation, green building principles, renewable energy, and mitigation and adaption policies for climate change. Emphasis on the life cycle framework. Topics include natural resource depletion, water and energy consumption, and air, water, and solid waste pollutant emissions. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6131. Quantitative Methods in Environmental and Occupational Health. 3 Credits.

Application of biostatistical and epidemiologic concepts and methods to analysis of EOH data. Development and practice of skills needed for analyzing complex exposures and communicating environmental and occupational research findings. Prerequisites: PUBH 6002 and PUBH 6003; and PUBH 6004 or PUBH 6011.

PUBH 6132. Water, Sanitation, and Hygiene (WASH) in Low-Income Countries. 2 Credits.

Introduction to working in both disaster and development settings in countries where contaminated water, inadequate sanitation, and poor hygiene (WASH) cause serious health problems. Students gain practical experience applying WASH methods in the field. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6133. Social Dimensions in Climate Change and Health. 3 Credits.

The drivers of climate change and outcomes with particular focus on health dimensions; obstacles, vulnerabilities, inequality, and adaptation as well as technical and social solutions.

PUBH 6135. Researching Climate Change and Human Health. 3 Credits.

Study of the effects of climate change on human health using evidence compiled by the National Climate Assessment (NCA); widespread impacts, ecological context, oceans of change, infrastructure, water resources, energy, land use, heat, and air quality. Recommended background: PUBH 6003 and PUBH 6004.

PUBH 6136. Introduction to Environmental and Occupational Epidemiology. 3 Credits.

Epidemiologic research designs; methods for the study of environmental and occupational health problems; exposure assessment methods; design aspects of cross-sectional, case-control, cohort, and case cross-over studies; sources and evaluation of biases and confounding; survey and questionnaire design. Prerequisites: PUBH 6002, PUBH 6003 and PUBH 6011.

PUBH 6137. Environmental and Occupational Health Culminating Experience I. 1 Credit.

The first in a two-course sequence. The final, integrative learning experience for the MPH in environmental health science and policy or global environmental health. Students apply the skills and knowledge, theories, and principles learned in the MPH program to practical public health problems. Restricted to MPH students in the Department of Environmental and Occupational Health who have completed all core courses and at least 9 credits in program-specific courses. Prerequisites: PUBH 6002 and PUBH 6003; PUBH 6004 or PUBH 6011; PUBH 6006 or PUBH 6012; and PUBH 6007.

PUBH 6138. Environmental and Occupational Health Culminating Experience II. 1 Credit.

The second in a two-course sequence. The final, integrative learning experience for the MPH in environmental health science and policy or global environmental health. Students apply the skills and knowledge, theories, and principles learned in the MPH program to practical public health problems. Restricted to MPH students in the Department of Environmental and Occupational Health. Prerequisite: PUBH 6137.

PUBH 6140. Global Climate Change and Air Pollution. 2 Credits.

The state of the air in the Anthropocene epoch. Key concepts of atmospheric science, public health, and other societal impacts. Local and global policy frameworks. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6144. Environmental Health Data Development and Modeling. 2 Credits.

Introduction to sources of environmental data, handling and cleaning of data, and using data in both statistical and environmental exposure models. Prerequisites: PUBH 6131 or PUBH 6853.

PUBH 6146. Microbiomes and Microbial Ecology in Public Health. 2 Credits.

Introduction to key concepts of environmental microbial ecology and the human microbiome. The roles of microbes in ecosystems' functions with a focus on climate change and the roles of microbes in human health and disease. Prerequisites: PUBH 6011.

PUBH 6199. Topics in Environmental and Occupational Health. 3 Credits.

Topics vary by semester. May be repeated for credit provided topics differ. Consult the Schedule of Classes for more details.

PUBH 6233. Epidemiologic Principles and Practice of Disease Eradication. 2 Credits.

The role of epidemiology, surveillance, research, and information technology in the eradication of vaccine preventable and parasitic human diseases. Prerequisites: PUBH 6003.

PUBH 6234. Epidemiologic Methods in Neglected Tropical Disease Control. 1 Credit.

Introduction to neglected tropical disease epidemiology providing a broad overview of select tropical medicine and public health issues; focus on applications of epidemiologic methods to the study of public health consequences of NTDs. Prerequisites: PUBH 6003. Corequisites: PUBH 6011.

PUBH 6235. Epidemiology of Obesity. 1 Credit.

Introduction to the epidemiology of obesity; descriptive epidemiology, measurement, consequences, and determinants of obesity; adiposity and body composition; obesity interventions and policy. Prerequisites: PUBH 6003.

PUBH 6236. Systematic Review of Public Health Literature. 1 Credit.

The process of conducting systematic reviews of literature in order to translate research into public health practice recommendations. Recommended for MPH candidates planning to conduct a systematic review of the literature for their culminating experience. Prerequisites: PUBH 6002 or EXNS 6204; and PUBH 6003 or EXNS 6208.

PUBH 6237. Chronic Disease Epidemiology. 2 Credits.

Overview of the epidemiology (descriptive, analytic, and etiologic) of chronic diseases. Emphasis on epidemiologic methods and study design in relation to chronic disease, as well as public health approaches to disease control including surveillance, screening, and interventions. Prerequisites: EXNS 6204 or PUBH 6002; and EXNS 6208 or PUBH 6003.

PUBH 6238. Molecular Epidemiology. 1 Credit.

Concepts, principles, and use of molecular methods in epidemiologic and clinical research. Common molecular measures and their interaction with environmental factors. Development of a framework for interpreting, assessing, and incorporating molecular measures in their area of research. Prerequisites: PUBH 6003.

PUBH 6239. Epidemiology of Foodborne and Waterborne Diseases. 1 Credit.

Foodborne and waterborne toxicants; diseases linked to eating and drinking and their prevention. Topics include transmission of disease and disease processes; microbial toxins, mycotoxins, chemical toxins, bacterial infections (e.g., salmonellosis, shigellosis, vibrio, listeria), virus and parasitic infections; issues in food and water safety. Prerequisites: PUBH 6003.

PUBH 6240. Pediatric HIV/AIDS. 1 Credit.

Comprehensive overview of HIV infection in children, with emphasis on the global pediatric HIV epidemic. Biological, epidemiological, clinical, and psychosocial issues; public health programmatic approaches to prevention, care, and treatment. The national and global experience with scaling up prevention services in the global effort to virtually eliminate HIV/AIDS in children. Prerequisites: PUBH 6003. Recommended background: PUBH 6250 and PUBH 6253.

PUBH 6241. Nutritional Epidemiology. 2 Credits.

Methodological issues related to dietary assessment, nutrition surveillance, and the epidemiology of obesity. Current trends, including the health impacts of vitamin D and sodium. Interpretation of the scientific literature in the field. Examples drawn from the National Health and Nutrition Examination Survey. Prerequisites: PUBH 6003.

PUBH 6242. Clinical Epidemiology and Public Health: Reading the Research. 2 Credits.

Methods for reading epidemiology and public health research including case-control, cohort studies, randomized controlled trials, meta-analysis, testing and screening, prediction rules, decision and cost-effectiveness analysis. Prerequisites: PUBH 6003 or equivalent.

PUBH 6243. Topics in Clinical Epidemiology and Public Health: Reading the Research. 1 Credit.

An evidence-based problem solving applications course utilizing methods taught in PubH 6242 Clinical Epidemiology and Public Health: Reading the Research Prerequisites: PUBH 6003. Credit cannot be earned for this course and PUBH 8242.

PUBH 6244. Cancer Epidemiology. 2 Credits.

Epidemiology of specific cancers, with an emphasis on molecular and genetic epidemiology. Current research in the field. Prerequisites: PUBH 6003.

PUBH 6245. Infectious Disease Epidemiology. 2 Credits.

The role and conduct of laboratory and field investigations in the epidemiology of infectious diseases. Prerequisite: PUBH 6003.

PUBH 6247. Design of Health Studies. 3 Credits.

Epidemiologic concepts and methods applied to specific research questions especially new types of public health problems. Recognition and development of the most appropriate study design for a specific health issue. Ecologic, cross-sectional, case-control, cohort studies and clinical trials. Sampling, measurement, questionnaire design, causality and causal criteria. Development of a research proposal. Prerequisites: PUBH 6003. Corequisites: PUBH 6002.

PUBH 6248. Epidemiology of Aging. 2 Credits.

The demographics, theories, and physiology of aging; descriptive and associative epidemiology of several common age-related diseases and disorders; implications for public health. Prerequisites: PUBH 6003.

PUBH 6250. Epidemiology of HIV/AIDS. 2 Credits.

Methodological issues central to HIV/AIDS research. Biases peculiar to HIV/AIDS epidemiologic studies (both observational and experimental designs). The natural history of HIV, diagnosis, surveillance, vulnerable subpopulations, behavioral facets, and evaluation of epidemiologic studies with an emphasis on methodological considerations. Prerequisites: PUBH 6003. Recommended background: PUBH 6002.

PUBH 6252. Advanced Epidemiology Methods. 3 Credits.

Advanced quantitative epidemiologic methods, with a focus on basic data analytic techniques, identifying and evaluating bias and adjusting for confounding. Dose-response, trend analysis, and multiple linear and logistic regression models. PUBH 6249 may be taken as a corequisite. Prerequisites: PUBH 6002, PUBH 6003, PUBH 6247 and PUBH 6249.

PUBH 6253. Issues in HIV Care and Treatment. 1 Credit.

This course provides an overview and in depth consideration of some of the major issues in treatment of HIV disease, including the assessment of efficacy and effectiveness, drug resistance, monitoring of drug toxicity, special populations, the interrelationship between treatment and prevention, and quality of care. The course has been designed with an interdisciplinary audience in mind. In discussions and assignments, students are able to emphasize their own area of interest and/or expertise (e.g. epidemiology, policy, etc).

PUBH 6255. Organizational Responses to the Local, National, and Global HIV/AIDS Epidemics. 2 Credits.

This seminar focuses on the rapidly evolving responses of local, national and global governmental and non-governmental organizations to the HIV/AIDS epidemic. Inspirational leaders of selected HIV/AIDS organizations are invited to describe how their organizations contribute to fighting the epidemic; the leadership and management skills that they use in their daily work; and their strategic decision-making processes. Basic principles of epidemiology, leadership and organizational strategy and structure are addressed through didactic presentations and interactive faculty-student dialogue. Lessons learned through the lens of HIV/AIDS organizations are broadly applicable to other public health problems. Students learn about the strengths and challenges of different types of public health organizations as they make career decisions about their own transition to the public health work force. Prerequisites: PUBH 6003, HIV/AIDS experience, or permission of the instructor.

PUBH 6258. Advanced Topics in Biostatistical Consulting. 1 Credit.

Principles and practice of biostatistical consulting in public health and medical research environments.

PUBH 6259. Epidemiology Surveillance in Public Health. 2 Credits.

Focus on foundations of public health surveillance systems for communicable as well as chronic diseases. Outbreak investigation methods are included, as well as surveillance data sources, data management, data analysis, ethical issues, surveillance system evaluation, and use of information for prevention. Surveillance systems for reportable diseases, nosocomial infections, bioterrorism events, cancer, environmental disease, vaccine-related adverse events, bovine spongiform encephalopathy, and military personnel are discussed. Prerequisites: PUBH 6003.

PUBH 6260. Advanced Data Analysis for Public Health. 3 Credits.

Advanced data analysis using the SAS System to expand on the analytic techniques gained in PUBH 6002 and PUBH 6249 and to provide students with the applied statistical skills required to analyze various types of public health datasets. Prerequisites: PUBH 6002 and PUBH 6249.

PUBH 6262. Introduction to Geographic Information Systems. 1 Credit.

Geographic information systems (GIS) for mapping and display of health data. The course makes use of ArcGIS 8.3. The use of spatial statistics for the detection of clusters and patterns in the spread of diseases. Working with geodatabases, shape files, layers, query information from attribute tables, geocode addresses and customizing GIS applications.

PUBH 6263. Advanced GIS. 1 Credit.

Provides mid to advanced level training in GIS for display and analysis of health data. Use software ArcGIS 9.3 and additional extensions such as Spatial Analyst and Geostatistical Analyst. Also uses GeoDa software. Emphasizes benefits of using GIS to do more than simply manage and map data. GIS supports a range of spatial analysis functions that enable researchers to extract additional meaning from manipulating geographic data. Learn to work with raster datasets and geodatabases to build spatial models for analyzing health data and evaluating spatial patterns of health events based on notion of distance. Prerequisites: PUBH 6262.

PUBH 6264. Quantitative Methods. 3 Credits.

Introduces basic concepts in mathematical statistics. Topics include probabilities (unconditional and conditional), density and distribution functions of continuous and discrete random variables, including expected values. Specific distribution functions discussed are Binomial, Poisson, Hypergeometric, and Gaussian distributions. Additional topics include bivariable distributions, variance-covariance matrix, limiting theory, asymptotic results, and maximum likelihood estimation. Prerequisites: MATH 1231 and MATH 1232; and PUBH 6002 and 6249.

PUBH 6265. Design of Medical Studies. 3 Credits.

Design of medical investigations, including the randomized clinical trial, observational cohort study, and the retrospective case-control study. Specific methods regarding sample size, power and precision and statistical procedures for randomization and so.

PUBH 6266. Biostatistical Methods. 3 Credits.

Biostatistical methods for asymptotically efficient tests and estimates of relative risks and odds ratios from prospective and retrospective matched and unmatched studies. Fixed and random effects models. Logistic regression, conditional logistic regression. Poisson regression. Maximum likelihood and efficient scores. Prerequisites: STAT 6201, STAT 6202 and PUBH 6264.

PUBH 6267. Time Series Applications in Public Health. 2 Credits.

Introduce basic concepts for the identification and modeling of time series in the time domain approach. Learn a new set of terminology standards and a different way to analyze these type of data and to forecast future values of a time series and its accuracy. Software used is SAS/ETS and 3 procedures: ARIMA, AUTOREG, FORECAST. New mathematical notation is used. Prerequisites: PUBH 6249.

PUBH 6268. Advanced SAS. 1 Credit.

Intensive in advanced programming using SAS. Expand technical skills to provide advanced SAS tools for data management and graphics. Topics to include Interactive Matrix Language (IML), SAS Macro facility language, and drill-down graphs using SAS/GRAPH. Prerequisites: PUBH 6002 and PUBH 6249; or permission of the instructor.

PUBH 6269. Reproductive Epidemiology. 1 Credit.

Current research, controversial issues, and methodological problems in epidemiology of reproductive and perinatal health. Present reproductive health issues such as conception and infertility; perinatal issues such as complications of pregnancy, infections in pregnancy, adverse pregnancy outcomes, and birth defects. Prerequisites: PUBH 6003.

PUBH 6270. HIV/AIDS Surveillance. 1 Credit.

Overview of surveillance methods used domestically and internationally to monitor HIV/AIDS epidemic. Surveillance systems including sentinel, population based, behavioral, and incidence surveillance are presented and discussed. Strengths and weaknesses of these various systems are discussed in addition to how data from these systems impact and inform HIV/AIDS related policies and programs. Prerequisites: PUBH 6003.

PUBH 6271. Disaster Epidemiology. 1 Credit.

Introduction to disaster epidemiology that elucidates the important role epidemiologists play in assessing the health and psychological effects of natural and man-made disasters and in identifying factors that contribute to these effects. Focus on applications of epidemiologic methods to the study of public health consequences of disasters, case studies from actual disasters used to illustrate various roles of epidemiologist in responding to these events and lessons learned. Highlight key skills that epidemiologists need to be part of a response and recovery. Identify methodological issues for future work. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6272. Epidemiology of Infectious Agents Associated with Human Cancer. 1 Credit.

Describes the role of infectious agents in the etiology of human cancer. Emphasis on differences between specific oncogenic viruses. Other oncogenic agents, bacterial and parasitic, are also discussed. Discuss laboratory approaches to the documentation of their pathogenicity, how behavior affects mode of transmission, and which types of data provide strongest support for documenting oncogenic potential for humans. Prerequisites: PUBH 6003.

PUBH 6273. Ethnographic Methods. 1 Credit.

Use ethnographic field methods in conjunction with epidemiological research. Introduction to specific methods used to examine health phenomena and determinants of disease. Learn specific applied skills that can be modified with socio-cultural modifications to evaluate urban sites and other settings. Basic skills in application of ethnographic methods, including recursive observations, participant observations, and variety of approaches to interviewing such as in-depth, structured and non-structured as well as conversational interviewing. Discuss use of multiple approaches in conjunction with ethnography, including focus groups, archival, document, statistical and secondary data analysis, and survey research methods. Course emphasizes use of ethnographic research methods in community-based health settings and evaluates issues in cultural competency and how to garner stakeholder support to conduct epidemiologic studies. Prerequisites: PUBH 6003.

PUBH 6274. Emerging Infectious Diseases for Public Health Professionals. 2 Credits.

Focus on epidemiology of emerging infectious diseases of public health importance, including factors leading to their development, management of emerging infectious diseases from a public health and laboratory standpoint, including biosafety, and strategies for emergency preparedness from a national and international perspective. Emphasis on the context of emerging infectious diseases and strategic approaches to their containment. Prerequisites: PUBH 6003 or MICR 6292; or permission of the instructor.

PUBH 6275. Essential Public Health Laboratory Skills. 2 Credits.

This course provides public health students with practical laboratory experience. Prerequisites: MICR 6239 or permission of the instructor.

PUBH 6276. Public Health Microbiology. 3 Credits.

Gain in-depth understanding of important non-viral pathogens pertinent to public health microbiology. Learn how to isolate and identify pathogens using critical thinking and problem solving skills.

PUBH 6278. Public Health Virology. 3 Credits.

In-depth understanding of viral pathogenesis by focusing on current research, controversial issues, and public health relevance. Survey of family of viruses most relevant to today's public health efforts, concentrating on virus-host interactions and therapeutic strategies.

PUBH 6280. Microbiology and Emerging Infectious Diseases Final Project. 2 Credits.

Focus on the synthesis and summary of data acquired through epidemiologic and/or public health laboratory research. Biosafety training, CITI training, HIPAA training and permission of the instructor are required prior to enrollment. Prerequisites: PUBH 6002, PUBH 6003, PUBH 6292, and PUBH 6245.

PUBH 6281. Analysis of Complex Surveys Using SAS and Stata. 2 Credits.

Appropriate methods to analyze survey data collected using complex sampling methods are discussed and applied to national survey data to address provocative public health research questions. An equivalent Stata course may be substituted for prerequisite 6249. Prerequisites: PUBH 6003 and PUBH 6249.

PUBH 6282. Introduction to R Programming. 1 Credit.

R is an open source software environment for statistical computing and graphics. Data transfer between SAS and R, data manipulation and visualization within R, programming and debugging, R libraries, and graphics theory. Prerequisites: PUBH 6249. Recommended background: Programming experience in a statistical package such as Stata or in high level language such as C, Python, Perl.

PUBH 6299. Topics in Epidemiology. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details.

PUBH 6305. Fundamentals for Health Policy: Public Health and Health Care. 2 Credits.

An overview of public health and health care in the United States as an introduction to the study and analysis of health policy. Presents the governmental framework, institutions, financing streams, workforce, constituencies, and interest groups engaged in the health sector to ensure that students begin their policy analytic training with grounding in the political, economic, and social realities of public health and health care.

PUBH 6310. Statistical Analysis in Health Policy. 3 Credits.

Quantitative and statistical methods of data analysis for health policy and health services research. Instruction in conducting data analyses using Stata statistical and data analysis software and application of acquired skills to health policy and health services research. Practical experience in programming and analysis of various health policy-related questions. Entering and importing data; creating, saving, and merging data sets; creating and modifying variables; labeling variables and values; and conducting analysis ranging from univariate to multivariate analyses, including multiple regression and logistic regression. The use of existing data sets to analyze health policy issues and interpret these analyses for policy purposes. Prerequisite: PUBH 6002.

PUBH 6315. Introduction to Health Policy Analysis. 2 Credits.

Core elements of health policy analysis: problem definition, background, the political, economic, and social landscape; development of policy options and recommendations. Written, graphic, and oral presentation skills associated with policy analysis. Summer, Fall, Spring Prerequisites: PUBH 6012 or PUBH 6305.

PUBH 6320. Advanced Health Policy Analysis. 3 Credits.

Practical applications of basic quantitative tools in health policy. Problem definition; political, social, and economic assessment of a problem; program evaluation and data analysis; development of policy options; and the written and oral presentation of findings and recommendations. Prerequisites: PUBH 6305 or PUBH 6012; and PUBH 6310 and PUBH 6315.

PUBH 6325. Federal Policymaking and Policy Advocacy. 2 Credits.

The federal health policymaking process, including an overview of the legislative, administrative, and judicial processes that affect policymaking; federal budget, authorization, and appropriation processes; common techniques and strategies used to advance legislative and regulatory policies, including coalition building and the use of policy studies and media relations. Prerequisites: PUBH 6012 or PUBH 6305.

PUBH 6330. Health Services and Law. 3 Credits.

Examination of the ways in which the law and legal system in the United States influence and are influenced by the health care system. How judicial, statutory, regulatory, and constitutional sources of law embody health policy and affect access to and quality and financing of health care, as well as the regulation of patient rights.

PUBH 6335. Public Health and Law. 3 Credits.

How the law can both promote public health and conflict with the rights of individuals protected under the U.S. Constitution; legal concepts that underlie the public health system and inform public health policymaking; major areas of public health activity; the future of public health.

PUBH 6340. Health Economics and Finance. 3 Credits.

Examination of economic principles as they apply to health policy in the public and private sectors. The basic framework of economics is used to analyze the behavior of consumers, hospitals, physicians, and insurers, as well as pharmaceutical companies and long-term care providers. Overview of Medicare and Medicaid. Economic analyses of current issues in the marketplace, including rising health spending in the context of the national economy and the federal budget, insurance market dynamics, key issues in the long-term care industry, shifting market forces and power within the health care arena, and new payment initiatives and delivery system models. Prerequisites: PUBH 6352 or an undergraduate economics course.

PUBH 6345. Health Policy Research Design. 2 Credits.**PUBH 6350. Health Policy Capstone. 2 Credits.**

Required for MPH graduate students in the health policy concentration in the final semester before graduation. Students synthesize and integrate knowledge across multiple public health disciplines; apply theories, principles, and skills in ways that approximate professional practice in the field of health policy; and demonstrate mastery of the required knowledge and competencies addressed in the curriculum. Prerequisites: PUBH 6012 or PUBH 6305; and PUBH 6320.

PUBH 6352. Basics of Economics for Health Policy. 1 Credit.

An introduction to modern microeconomics -- the study of how consumers, firms, industries, and the public sector make decisions and allocate their resources in the economy. The principles of supply and demand and elasticity in both the private and public sectors are analyzed.

PUBH 6353. Child Health Advocacy. 1 Credit.

Introduction to child health advocacy. Affordable Care Act (ACA), preventive care, school health, environmental issues, and emergency care. The use of data for advocacy.

PUBH 6354. Mental Health/Substance Abuse Policy. 2 Credits.

Provides an overview of the U.S. mental health and substance abuse delivery system, its components, and the policy challenges created by the organization of this system. Considers the behavioral health care system from the perspective of several main "actors" in the system: patients, providers (primarily doctors and hospitals), health plans, and payers (public and private). Prerequisite: PUBH 6305.

PUBH 6355. Comparative Health Policy. 2 Credits.

Archetypical health care systems, financing, and reform efforts, with emphasis on the trade-offs between efficiency and equity. Comparison of current policy challenges and solutions faced by policymakers in the U.S. and in other countries. Prerequisites: PUBH 6012 and PUBH 6305.

PUBH 6356. State Health Policy. 2 Credits.

Students develop a briefing on health and health care for a new governor and health secretary in order to gain a practical understanding of state health policy and programs. The course is designed to replicate the experience of a newly hired policy staff member learning the requirements for the position in a particular state. Prerequisites: PUBH 6012 or PUBH 6305.

PUBH 6357. Health Economics and Policy: Cost Containment Strategies. 2 Credits.

Health care cost containment in the context of the current implementation of national health reform. Cost containment strategies; economic underpinnings, anticipated impacts, perspectives of and implications for health care providers and systems, and political considerations. Prerequisite: PUBH 6340.

PUBH 6358. Vaccine Policy. 2 Credits.

The development of U.S. vaccine policy and the growth of various markets targeting routine vaccination of all populations; interactions among business, legal, political, public health, medical, federal/state/local government, and consumer communities that combine to influence vaccine delivery in a broad range of settings. Prerequisites: PUBH 6012 or PUBH 6305.

PUBH 6359. Reproductive Health Policy. 1 Credit.

Overview of reproductive health policy at the federal and state levels. Balancing the interests of competing stakeholders; the fundamental underlying role of significant disparities in financing for and access to reproductive health services; and how policymaking can alleviate or exacerbate preexisting issues.

PUBH 6360. Advanced Maternal and Child Health Policy. 1 Credit.

In-depth exploration of maternal and child health policy in the U.S., with a particular emphasis on the role of personal and public health services for women, children, youth and their families in the context of health and human services system change. Prerequisite: PUBH 6561.

PUBH 6361. Health Workforce Policy. 2 Credits.

Strategies for the prevention and control of infectious diseases, focusing on low and middle income countries. Goals, strategies, and challenges of major global health intervention programs. Surveillance systems, vaccination programs, chemotherapy as a prevention and treatment tool, nutritional supplementation, environmental approaches, and potential benefits of integrating multiple interventions. Prerequisites: PUBH 6012 or PUBH 6305.

PUBH 6363. The Health Care Legislative Process. 1 Credit.

How health care legislation is developed in and moves through the U.S. House of Representatives and Senate. The roles of the committees of jurisdiction in each house and how the rules of each house affect legislative outcomes.

PUBH 6364. Federal Budget Process for Health Policy. 1 Credit.

Focuses on how the Congressional budget process shapes the funding and design of federal health care programs, ranging from entitlement programs like Medicare to appropriated programs like community health centers. Discussions cover budget resolutions, appropriations bills, and budget reconciliation legislation, as well as Congressional procedures and committees through which they are considered. Prerequisite: PUBH 6305.

PUBH 6366. Health Care Corporate Compliance. 2 Credits.

The federal laws and regulations that affect U.S. health care industry participants, particularly those relating to the prevention of fraud and abuse, and the role of corporate compliance programs. Prerequisites: HSML 6215 or PUBH 6330.

PUBH 6367. Population Health, Public Health, and Health Reform. 2 Credits.

In-depth assessment of how a reforming health care system can be expected to change the policy landscape for population and public health in the United States; direct changes evolving at the state and local level and national payment and health system reforms. Prerequisites: One of the following: HSML 6202, PUBH 6006, PUBH 6012, or PUBH 6305.

PUBH 6368. Law, Medicine, and Ethics. 3 Credits.

Legal, ethical, and policy issues that arise in the biomedical arena; the definitions of life and death, the nature of personal identity, the requirements of justice, and the boundaries of liberty. Prerequisites: PUBH 6330 or PUBH 6335.

PUBH 6370. Medicare/Medicaid Law and Policy. 2 Credits.

Describes current legal and public policy issues in the Medicare and Medicaid programs, including the legal, operational, financial, and organizational rules for the two programs. Prerequisite: PUBH 6315.

PUBH 6372. Minority Health Policy. 2 Credits.

Introduces students to the concept of health disparities and the implications of disparities for health care practice and policy. Students will learn how disparities are defined and measured, as well as emerging approaches in practice and policy to reducing disparities. Fall. Prerequisite: PUBH 6315.

PUBH 6374. Pharmaceutical Policy. 2 Credits.

Legal and regulatory frameworks related to the demand for and supply / quality of pharmaceutical products. Policies specific to drug development, pricing, reimbursement, use, dissemination of information, and post-marketing surveillance. Prerequisite: PUBH 6315.

PUBH 6376. Primary Health Care Policy. 2 Credits.

Politics and policy behind the provision of primary health care in the United States. The rise of the field of primary care and how it is supported and financed; the role of insurers and government in regulation and oversight in the areas of access, cost, and quality. Prerequisite: PUBH 6315.

PUBH 6378. HIV Policy in the US. 2 Credits.

Examines the policy response to the HIV epidemic in the United States and how the epidemic itself has helped to shape U.S. policy. How and why HIV became a national policy issue; circumstances surrounding the discovery of and early response to HIV; and main policy and programmatic developments and key players over time. The role and implications of the Affordable Care Act for individuals with HIV, the future of the Ryan White HIV/AIDS Program, and the impact of new treatment and prevention strategies on the future course of the epidemic.

PUBH 6380. Bridging Health Policy and Health Information Technology. 2 Credits.

Basics of health care informatics policy and core technological components for health services managers, public health professionals, health policy analysts, and health information technology staff. Policy and legal frameworks, governance and financial issues, technological infrastructure, and business and technological operations. Concepts and roles of information and how information technology can support the health care industry in promoting quality improvement.

PUBH 6382. Community Health Center Policy. 2 Credits.

PUBH 6384. Health Care Quality and Health Policy. 2 Credits.

The role of quality in the U.S. health care delivery system from the perspective of multiple stakeholders, including public and private payers, providers, consumers, and employers. Defining and measuring quality; how quality information is used; and policy implications of quality improvement. Recent changes under health reform legislation. Prerequisites: PUBH 6012 or PUBH 6305.

PUBH 6386. Public Health Preparedness Policy. 2 Credits.

Issues in public health emergency preparedness and response at the nexus of homeland and national security. The relationship between public health and criminal investigation, forensic epidemiology, and surveillance; biodefense; and the role of the scientific community. Infrastructure, threat themes, and associated preparedness and response policy.

PUBH 6390. Prescription Drugs: Policy and Public Health. 3 Credits.

Key policies and public health programs related to each stage of a prescription drug's life cycle; Congressional funding focused on speeding the development and approval of needed drugs, public and private approaches to increase access to prescription drugs, and exceptions to international laws that allow some countries to violate prescription drug patents to improve the health of impoverished citizens.

PUBH 6399. Topics in Health Policy. 3 Credits.

In-depth examination of a particular facet of public health policy. Topics and prerequisites vary.

PUBH 6400. Global Health Frameworks. 2 Credits.

Overview of current issues in global public health with particular emphasis on low and middle-income countries. Serves as both an introductory course for students entering the field of global health, as well as an update on current technical and policy issues for advanced students who may have considerable experience.

PUBH 6410. Global Health Study Design. 1,2 Credit.

Tools necessary for designing and understanding the research that goes into developing good public health programs; basic elements for the planning and design phase of a research project. Prerequisite or corequisite: PUBH 6009 or PUBH 6501. Prerequisite: PUBH 6003.

PUBH 6411. Global Health Qualitative Research Methods. 2 Credits.

An introduction to qualitative data collection and analysis in global health settings. Methodologies include survey design, interviews, focus groups, and participant observation. Archival research and clinical trial research are also addressed. The set of methods most commonly used to collect qualitative data in global health settings. Students are enabled to prepare interview guides, conduct in-depth interviews, and analyze and document the results from a qualitative field project. Prerequisites: PUBH 6002 and PUBH 6410.

PUBH 6412. Global Health Quantitative Research Methods. 3 Credits.

Continuation of the series of global health methods courses. Examination of the fundamental concepts of empirical analysis and qualitative analysis, including open and axial coding, the basis of grounded theory, and regression analysis. Prerequisites: PUBH 6002 and PUBH 6410.

PUBH 6416. Ethical and Cultural Issues in Global Health Research and Programs. 1 Credit.

Examine procedures and concerns for protecting communities and human subjects involved in public health programs and research. Consider cultural considerations integral to ethical conduct of public health research and programming in the global context. Discuss history behind rules and regulations that govern ethical principles around conduct of research involving human subjects. Consider contribution that awareness of cultural contexts where we work makes to ethical nature of our work as global health professionals.

PUBH 6417. Cross-Cultural Approaches for Global Health Practice. 1 Credit.

How to communicate, negotiate, and be more effective across cultures; social aspects that affect communication within cultures and how to navigate communication in practical situations including in the work place and in risk and crisis situations. Corequisite: PUBH 6410. Prerequisite: PUBH 6416.

PUBH 6420. Understanding Commercial Determinants of Health. 1 Credit.

Conceptual understanding and frameworks for commercial determinants of health as key to improving public health.

PUBH 6421. Responsible Conduct of Research. 1 Credit.

Designed to raise awareness of the responsible conduct of research. Strategies for preventing irresponsible research practices, including unacceptable practices and research misconduct.

PUBH 6430. Theories for Global Health Communication Interventions. 2 Credits.

Use of communication theory and methods in health promotion. Integration of multidisciplinary approaches to public health communication. Prerequisites: PUBH 6007 and PUBH 6400.

PUBH 6431. Global Health Communication Strategies and Skills. 3 Credits.

Students conduct qualitative research to evaluate health communication programs, assess readability level and suitability of written health education materials, conduct content analyses, and review/critique current health communication literature. Prerequisites: PUBH 6430 or permission of the instructor; and PUBH 6007.

PUBH 6435. Global Health Program Development and Implementation. 2 Credits.

Basic concepts and principles of program development and implementation including data collection methods, decision making, and problem-solving techniques. Application of program development techniques to specific interventions. Prerequisite: PUBH 6400.

PUBH 6436. Global Health Program Management and Leadership. 2 Credits.

Essential tools for successful project, personnel, and program management. Leadership and management theory; key issues in managing global health programs and projects; leadership and management skills development; use of data in management decision making; and importance of quality, supply chain, and resource management. Restricted to students in the MPH in global health program design, monitoring, and evaluation program. Prerequisites: PUBH 6400 and PUBH 6435.

PUBH 6437. Global Health Program Evaluation. 3 Credits.

Fundamentals of program monitoring and evaluation; developing and using program theory in evaluation; impact evaluation and mixed-methods approaches; qualitative methods and statistical analysis for program evaluation. Prerequisites: PUBH 6002.

PUBH 6440. Global Health Economics and Finance. 2 Credits.

Examination of economics and finance principles as they apply to global health. Organization, delivery, and financing of health care in developing countries. Tools for analyzing issues related to global health economics and finance and application of those tools to a variety of a global health issues, including demand for health care, health care financing, social insurance, pharmaceuticals, and HIV/AIDS. Prerequisite: PUBH 6400.

PUBH 6441. Global Health Organizations and Regulations. 3 Credits.

The functions, capacities, and governance of international health organizations; the normative power of some international health organizations for regulatory processes; and evidence-based development of public health policies with attention to issues of global trade as it shapes worldwide and national health. Prerequisite: PUBH 6400.

PUBH 6442. Comparative Global Health Systems. 2 Credits.

Examination of national health systems, how they differ, and how they are performing. Health systems analyzed through four different lenses: health care organizations, health workforce development, health care financing, and health policy development. Comparison of health systems and health reforms in seven regions of the world and assessment of how health system performance might be improved. Course fee may apply. Prerequisite: PUBH 6400.

PUBH 6443. Global Health Agreements and Conventions. 2 Credits.

Explores the impact of regulations, trade and human rights on health by examining the relevant international declarations, agreements and conventions. This course examines a variety of topics including the impact of international trade agreements on health, the International Health Regulations and other regulations affecting global health, and the relationship between health and human rights. Prerequisite: PUBH 6400.

PUBH 6445. Quantitative Methods for Impact Evaluation. 2 Credits.

Learning to use and produce empirical research in the public health field; review of quantitative techniques and research designs used to uncover causal effects of policies and programs, with applications to public health topics. Prerequisites: PUBH 6002, PUBH 6003 and PUBH 6412.

PUBH 6450. Global Health Diplomacy. 2 Credits.

Introduction to the concept of global health diplomacy; how diplomacy has been used to advance health agendas and how health issues have been used to improve diplomatic relations between countries; formal health, multi-stakeholder health, and informal health diplomacy; comparative study of how different countries have devised health diplomacy strategies.

PUBH 6451. Monitoring/Evaluation of Sexual/Reproductive Health Programs in Low- and Middle- Income Countries. 2 Credits.

Overview of key sexual and reproductive health challenges in low- and middle-income countries; designing and measuring programs to address those challenges. Taught from the perspective of applied researchers working within an organization that implements sexual and reproductive health programs and services. Prerequisites: PUBH 6437, PUBH 6500 and PUBH 6503.

PUBH 6452. Social and Behavior Change Communication in Middle- to Low-Income Countries. 2 Credits.

The ways in which behavior change and sociocultural theories underpin the development of SBCC programs in politically, culturally, and socially diverse settings. Prerequisites: PUBH 6007 and PUBH 6503.

PUBH 6455. Global Vaccinology. 3 Credits.

Concepts, methods, and tools for making new and existing lifesaving vaccines more accessible to individuals in low- and middle- income country settings. Recommended for second-year MPH students. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6461. Ethics and Accountability in Humanitarian Settings. 1 Credit.

Principles and fundamentals of ethical approaches and accountability processes in the delivery of humanitarian services and possible solutions and interventions to address them. PUBH 6480 may be taken as a corequisite. Prerequisite: PUBH 6480.

PUBH 6462. Nutrition and Food in Large Humanitarian Emergencies. 1 Credit.

Fundamentals of food aid programs and nutritional issues in emergency humanitarian situations and appropriate local and international responses in lower-income countries. Field-based program responses in international, resource-scarce settings, as conducted by NGOs and UN agencies. PUBH 6480 may be taken as a corequisite. Prerequisite: PUBH 6480.

PUBH 6463. Communication Strategies and Planning in Humanitarian Settings. 2 Credits.

Principles of and major challenges in communication planning with wide range of stakeholders in humanitarian settings; solutions and interventions to identify related risks and appropriately respond to and effectively plan communication strategies. PUBH 6480 may be taken as a corequisite. Prerequisites: PUBH 6007 and PUBH 6480.

PUBH 6464. Mental Health in Humanitarian Settings. 1 Credit.

Principles of and fundamental challenges to mental health in humanitarian settings, including potential solutions and interventions; foundational knowledge and skills in mental health and psychosocial support services in such settings. PUBH 6480 may be taken as a corequisite. Restricted to PUBH 6480.

PUBH 6465. Reproductive Health and Gender-Based Violence in Humanitarian Settings. 1 Credit.

Key issues, challenges, policies, and interventions related to sexual and reproductive health and gender-based violence in humanitarian settings for persons affected by armed conflict and natural disasters. PUBH 6480 may be taken as a corequisite. Prerequisite: PUBH 6480.

PUBH 6469. Humanitarian Aid Seminar Series. 1 Credit.

Targeted talks and panel discussions with humanitarian aid workers from a variety of agencies addressing important or controversial contemporary topics in humanitarian settings. Corequisite or prerequisite: PUBH 6480.

PUBH 6480. Public Health in Humanitarian Settings. 2 Credits.

Technical aspects of high-priority public health interventions; consideration of how and why sound public health interventions should be implemented in both emergency and chronic humanitarian settings; the roles of diverse humanitarian actors.

PUBH 6481. Global Mental Health. 2 Credits.

Focus on global mental health knowledge and public health policy implementation skills regarding the integration of mental health, public health, and primary care in diverse health systems and challenging cultural contexts. Prerequisite: PUBH 6400.

PUBH 6482. International Food and Nutrition Policy. 2 Credits.

Major global food and nutrition issues, their determinants, and the strategies that in place to address them. Students identify major nutrition and food challenges in a country or region as well as the policies and programs that have proven successful in addressing those challenges. Prerequisite: PUBH 6400.

PUBH 6484. Prevention and Control of Vector Borne Diseases. 2 Credits.

Study of insects and other vectors responsible for transmission of diseases in developing countries, including plague, malaria, dengue fever, onchocerciasis (river blindness), and chikungunya virus. Special focus on developing countries, particularly in the Middle East, Africa, Asia, and Latin America. Diseases such as West Nile Virus and Lyme disease in the United States and elsewhere are also addressed. New methods for effective management and control.

PUBH 6486. Global Health Programs and Approaches to the Control of Infectious Diseases. 2 Credits.

Strategies for the control of infectious diseases with a focus on low and middle income countries; identifying and critiquing goals, strategies, and challenges of major global health intervention programs designed to prevent and control infectious diseases. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6487. Emerging Zoonotic Diseases and Global Food Production. 1 Credit.

Analysis of trends in emerging zoonotic diseases and their links to global food production. Case studies on the use of surveillance systems and outbreak detection techniques to monitor emerging zoonotic diseases. Development of skills to analyze surveillance systems, policy reports, and literature related to emerging zoonotic diseases and food-borne outbreaks within a global context. Prerequisites: PUBH 6003.

PUBH 6488. Cost-effectiveness Analysis in Public Health and Health Care. 2 Credits.

The application of cost-effectiveness analysis (CEA) to enhance the efficiency of programs and services both in the United States and developing countries. A variety of topics and related analytical tools such as cost benefit analysis, decision analysis, and sensitivity analysis are covered. Students learn to perform cost-benefit and cost-effectiveness analyses and understand the strengths and limitations of these methods and how to apply them to a broad range of health issues.

PUBH 6489. Evaluation of Food and Nutrition Programs and Policies. 1 Credit.

Introduction to major global food and nutrition issues, strategies used to address these problems, and commonly-used program impact theories and evaluation frameworks; application of evaluation methods and approaches to nutrition and food programs and policies. Prerequisite: PUBH 6437.

PUBH 6491. Public Health Leadership Seminar. 1 Credit.

Leadership lessons derived from the careers of a diverse group of successful executives and entrepreneurs from multiple sectors, including corporate, government, nonprofit, and the arts. Development of skills for effective engagement with peers, personal network, potential employers, and business partners. Permission of the faculty member required prior to enrollment.

PUBH 6492. Global Health Programs and Approaches to the Control of Chronic Diseases. 2 Credits.

Concepts, methods, and tools to address chronic non-communicable diseases (NCDs); global public health and development dimension of NCDs, their epidemiology and risks, and health systems approaches for their control with focus on low- and middle-income countries. Prerequisites: PUBH 6002, PUBH 6003 and PUBH 6400.

PUBH 6493. Fundamentals of Supply Chain Management in Developing Countries. 2 Credits.

Practical approaches used by government policymakers, essential drugs program managers, NGOs, donors, and others to ensure that high-quality essential drugs are available, affordable and used rationally; existing and potential challenges and workable solutions related to managing the drug supply in developing countries. Restricted to graduate students.

PUBH 6494. Population, Public Health Practice, and Sustainable Development. 2 Credits.

The reciprocal connections between the dynamics of population growth, distribution, and age structure to health, well-being, and socioeconomic development.

PUBH 6495. Field Trial Methods and Application. 2 Credits.

Concepts, methods, and tools necessary to conduct community-based randomized trials in low- and middle-income country settings; the process of running a randomized field trial from selecting a topic, through implementation, to analysis and reporting. Most appropriate for students in their second year of study. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6499. Topics in Global Health. 3 Credits.

Examination of a particular facet of public health. Topics vary by semester. May be repeated for credit provided topic differs. See the Schedule of Classes for more details.

PUBH 6500. Planning and Implementing Health Promotion Programs. 3 Credits.

Students develop skills to effectively plan, design, and implement programs that address public health problems for defined populations in a variety of settings. Prerequisite: PUBH 6007.

PUBH 6501. Program Evaluation. 3 Credits.

The knowledge, competencies, and skills needed to plan and implement evaluations of public health programs in a variety of settings; types of program evaluation, including needs assessment, process evaluation, quantitative and qualitative monitoring of outputs, outcomes, and impact. Prerequisites: PUBH 6002, PUBH 6003 and PUBH 6007; and PUBH 6435 or PUBH 6500.

PUBH 6502. Practical Data Analysis for Prevention and Community Health. 1 Credit.

Practical aspects of dataset creation, data management, rudimentary statistical analysis and tabular/graphical presentation of results in the user-friendly environments of PASW (formerly SPSS) and MS Excel. Students create codebooks, enter and clean data, derive new variables from existing ones, choose appropriate analytical techniques and implement them, graph and tabulate results, and document and protect work. Examples are drawn from commonly-encountered situations in prevention and community health, such as needs assessments and program evaluations. Prerequisites: PUBH 6002, PUBH 6003 and PUBH 6500.

PUBH 6503. Introduction to Public Health Communication and Marketing. 3 Credits.

The application of health communication theories, principles and techniques, as well as marketing constructs and concepts, to advancing public health through practitioner-oriented health communication and social marketing campaigns and programs.

PUBH 6504. Social and Behavioral Science Research Methods. 3 Credits.

The processes of study design, data collection, and analysis using SPSS for quantitative research in prevention and community health. All phases of the observational/survey research process considered sequentially, from formulation of research questions to preparation of the final report. Prerequisites: PUBH 6002 and PUBH 6007; or permission of the instructor.

PUBH 6508. Cost-Effectiveness Analysis of Health Promotion Interventions. 3 Credits.

Theoretical basis for and practical skills needed to estimate the effectiveness, population impact, and cost of health promotion interventions; application to policy and cost-effectiveness and cost-utility analyses. Familiarity with basic algebra and statistics is assumed. Prerequisites: PUBH 6002 and PUBH 6003; and PUBH 6006 or PUBH 6012.

PUBH 6510. Community-Oriented Primary Care Principles and Practice. 3 Credits.

Theory and practice of community-oriented primary care, including an extended small group exercise carrying out a COPC project with a simulated community using Web-based data sets.

PUBH 6512. Community-Oriented Primary Care Policy and Issues. 2 Credits.

Advanced work on COPC methods and policy, focusing on issues related to the provision of health care in underserved communities. Prerequisite: PUBH 6510.

PUBH 6513. Community Health Management. 2 Credits.

Management and development of community health services. Builds upon principles for management and community-oriented primary care. Prerequisites: PUBH 6003 and PUBH 6510.

PUBH 6514. Preventing Health Disparities. 2 Credits.

Provides students with an understanding of how social, political, and economic factors contribute to disparities (e.g. racial, ethnic, gender, and geographical) in health and health care and how to use evidence-based approaches to prevent or address health disparities.

PUBH 6515. High Risk and Special Populations. 2 Credits.

Provides students with an overview of the methods to plan, implement and evaluation health promotion and education programs targeted towards high risk and special populations. The course reviews the socioeconomic, political-economic, cultural and psychosocial factors of populations who are considered to be at high risk for specific health problems and efforts that have been addressed in current health promotion programs. Prerequisite: PUBH 6007.

PUBH 6516. Community Health Information Resources. 2 Credits.

COPC and community health promotion require diverse information skills in order to assess community needs and strengths, determine priority health issues, analyze data, plan interventions, and evaluate programs. This course introduces students to the information resources useful in planning and implementing COPC and community health projects that address racism. The selected resources support methods for defining a community, characterizing a community's social and health characteristics, investigating a prioritized problem, and developing programs and solutions. Students learn how to choose resources, search them, and consider bias in information sources.

PUBH 6530. Qualitative Methods in Health Promotion. 2 Credits.

Application of qualitative methods in the development of health promotion interventions, evaluations, and research. Collecting and analyzing qualitative data through participant observation, interviewing, group methods, and case studies. Prerequisite: PUBH 6007.

PUBH 6531. Health Promotion in Health Care Settings. 2 Credits.

Behavioral change counseling and training skills to improve health by changing individuals' behaviors and by developing training materials for use with providers, health professionals and high risk groups. This is an advanced course for second year students. Prerequisites: PUBH 6007 and PUBH 6500.

PUBH 6532. Community Organization, Development, and Advocacy. 3 Credits.

Educates health promotion practitioners in how to organize community groups to promote health. The focus is on learning how to use resources available in the community to advocate change. Prerequisite: PUBH 6007.

PUBH 6533. Design and Conduct of Community Health Surveys. 2 Credits.

This course teaches students how to frame questions in health promotion surveys using sound principles of questionnaire design with emphasis on reliability and validity. Students learn survey design principles and methods and how to analyze survey data.

PUBH 6534. Community-Based Participatory Research. 1 Credit.

Students learn how to conduct community research in collaboration with community leaders and residents. Emphasizes the principles of CBPR for addressing health promotion issues in communities including community needs and administrative and policy changes.

PUBH 6535. Promotion of Mental Health. 2 Credits.

Increases understanding about issues in mental health promotion. The emphasis is on mental health as a public health issue and linkages between individual mental health and the environment. Prerequisite: PUBH 6007.

PUBH 6536. Workplace Health Promotion. 2 Credits.

Planning, management and evaluation of programs designed to serve employees' needs, promotion of employee health and reduction of health care costs in the workplace. Prerequisite: PUBH 6007.

PUBH 6537. Health Promotion and Aging. 2 Credits.

Introduces students to the basic health aspects of the aging process and special health promotion needs for this group. Problems of aging and public health solutions for older Americans are examined. Students are able to define the public health concerns for aging Americans, how aging is affected by a multitude of factors, identify health promotion strategies to assist in reaching out to this population and develop methods of collaboration with agencies and organizations to improve the health of the aging population. Prerequisite: PUBH 6007.

PUBH 6550. Maternal and Child Health I. 3 Credits.

Public health issues affecting the health and well-being of women, children, and families. A multidisciplinary perspective that integrates the biological, demographic, epidemiological, economic, behavioral, social, cultural and environmental aspects.

PUBH 6551. Maternal and Child Health II. 3 Credits.

.

PUBH 6552. Women's Health. 2 Credits.

Issues of women's health through the life cycle. The process of critically evaluating women's health research and issues.

PUBH 6553. Adolescent Health. 2 Credits.

Issues of physical, mental, and social development and their bearing on the health of adolescents, with special emphasis on prevention.

PUBH 6554. Children and Youth with Special Needs. 2 Credits.

In order to place children and youth with special needs into a public health framework, this course presents an introduction to and an overview of children and youth with special needs due to a developmental disability. Many aspects of developmental disability are addressed including 'concept' and definitions of disability, causes, epidemiological considerations, and development of federal legislation. The scope and range of developmental disabilities are reviewed along with classification schemes. Both national and international distributions are considered from a sociopolitical viewpoint.

PUBH 6555. Reproductive Health: U.S. and Global Perspectives. 2 Credits.

Reproductive health from a variety of public health perspectives, from defining reproductive health, past perspectives, needed improvements, and the factors that influence reproductive health.

PUBH 6556. Maternal and Child Nutrition. 2 Credits.

Covers the nutritional needs of women during the child bearing years, infants, children and adolescents. The course emphasizes the life course approach to nutrition and has a special emphasis on the effects of diet during infancy on obesity and degenerative diseases in later life. Students examine the biological basis of nutrition, identify risk factors associated with poor nutrition in individuals and populations and evaluate domestic and international programs. Summer (1 credit) and Spring (2 credits).

PUBH 6557. Child Development and Public Health. 2 Credits.

Examination of the development of children from a public health perspective and provide a detailed examination of the indicators of children's health that are needed to assist public health professionals improve children's health.

PUBH 6558. Women, Gender, and Health. 2 Credits.

Focuses on gender as a social determinant of health. Emphasis placed on examining the frameworks that are used in public health research to understand gender-based issues and how these frameworks affect the types of programs and intervention efforts developed.

PUBH 6559. HIV Prevention: An Interdisciplinary Approach. 2 Credits.

Provides an interdisciplinary overview of HIV prevention research from the behavioral, biological and biomedical perspective. Students are encouraged to approach the assignments and discussions from their own particular expertise and career interests/goals.

PUBH 6560. School Health and Safety. 1,2 Credit.

Examines the history, organization, financing, and politics of school health programs. It provides an overview of the core components of school health as defined by the Center for Disease Control and Prevention: health services, health education, physical education, nutrition services, counseling or mental health, school environmental health, health promotion, and family/community involvement. Summer (1 credit); Spring (2 credits).

PUBH 6561. Maternal and Child Health Policy Analysis. 2 Credits.

Provides instruction in maternal and child health policy in the U.S. with a particular emphasis on policies related to the organization, financing, delivery, and quality oversight of personal health services for mothers and children.

PUBH 6562. Physical Activity and Obesity Interventions: From the Individual to the Environment. 2 Credits.

This course broadly examines the public health issues related to physical activity and obesity, particularly as they relate to solutions for addressing individual factors and the obesogenic environment. Students gain a further understanding of the social, physiological, behavioral, and environmental factors related to both obesity and physical activity. The course focuses on examining multiple levels of solutions, specifically: 1) individual and behavioral interventions; 2) school-based and community-level interventions; 3) environmental interventions; 4) policy-level interventions. Students are expected to critically evaluate the necessary components of interventions, and apply that knowledge to future programmatic efforts.

PUBH 6563. Global Child Health. 2 Credits.

Elements of science, policy, challenges, and successes of global child health; focus on low and middle income countries and children under five years of age. Learn the burden of disease and associated risk factors; cost-effective interventions and tools. Restricted to graduate students.

PUBH 6570. Advanced Public Health Communication: Theory and Practice. 3 Credits.

Focuses on the use of communication to positively influence people's - and population's - understanding of health information, decision-making, and health behavior. Students study, and in a group project apply, a range of theories and techniques germane to effective message design and delivery. Prerequisite: PUBH 6503.

PUBH 6571. Social Marketing: Theory and Practice. 3 Credits.

The use of marketing to change the behavior of people, populations, and policy makers in ways that are in their, and society's, best interests. Students in this skills-based course study and work in teams to apply a range of marketing strategies to a real-world situation. Prerequisite: PUBH 6503.

PUBH 6572. Marketing Research for Public Health. 3 Credits.

The use of marketing research techniques used to better understand customers of public health programs in order to improve program design, implementation, and effectiveness. A range of qualitative and quantitative techniques are studied for their relevance to program planning, development, and continuous improvement.

PUBH 6573. Media Advocacy for Public Health. 3 Credits.

Focuses on the use of communication to positively influence public policy and public opinion. In this skills-based course students study and apply a range of theories and techniques germane to the policy advocacy process. Prerequisite: PUBH 6503.

PUBH 6574. Public Health Branding: Theory and Practice. 2 Credits.

This course focuses on the use of branding in the public health and social sectors. Learning from the commercial sector, we examine how to brand behaviors as well as products and services. We review branding methods, examine research on branding and its effectiveness, and build skills in branding for public health objectives.

PUBH 6575. Communication Skills for Public Health Professionals. 1 Credit.

Helps students develop writing and oral presentation skills through intensive, interactive training, practice, and feedback. Provides participants with a solid foundation for all forms of public health and other scientific and technical written and oral communication.

PUBH 6590. Introduction to Social Entrepreneurship. 2 Credits.

Examine innovative organizations created to improve people's lives and contribute to improved social and economic conditions. Emphasis on how such organizations are started, how they are sustained, and the various business models that are adopted to achieve an organizational mission.

PUBH 6591. PA/MPH Clinical Leadership Seminar. 1 Credit.

For first-year physician assistant and master of public health program students, an orientation to their roles as health professionals. Special emphasis on preventive and community medicine.

PUBH 6599. Topics in Prevention and Community Health. 1-3 Credits.

In-depth examination of a particular facet of prevention and community health. Topics and prerequisites vary.

PUBH 6610. Public Health Nutrition Practice and Leadership. 1 Credit.

This course provides an overview of public health nutrition practice. Students develop communication, management and leadership skills necessary for successful careers. Students also explore potential practicum and culminating experience options, and how to use these experiences to achieve their career goals. This course is designed for first year students in the public health nutrition MPH program.

PUBH 6611. Nutrition Assessment. 2 Credits.

The anthropometric, biochemical, clinical, and dietary methods for assessing nutritional status in individuals. The process of conducting food and nutrition environment assessments. Prerequisites: EXNS 2119 or PUBH 6619; or other equivalent course with permission of the instructor.

PUBH 6612. Food Systems in Public Health. 2 Credits.

A systems approach to understanding food systems and associated public health issues. How the current food system evolved, and how issues such as climate change and population growth may affect food systems in the future. The role of public health practitioners in meeting the population's need for safe, sufficient, and nutritious food. Policies, programs, and proposals aimed at creating healthier, more sustainable food systems.

PUBH 6613. U.S. Food Policy and Politics. 2 Credits.

The programs, regulations, and legislation that pertain to food production, food safety, nutrition assistance, and dietary guidance in the United States at the federal, state, and local levels.

PUBH 6619. Fundamentals of Nutrition Science. 3 Credits.

The fundamental scientific principles of human nutrition; improving diet and nutritional status in the broader context of public health; nutrition assessment, study designs in nutrition science research, the role of nutrition in chronic disease, and current topics in nutrition science.

PUBH 6620. Designing Healthy Communities. 2 Credits.

Issues at the intersection of public health and planning; evaluating needs and creating change in communities facing food access, physical activity, and age related challenges; the built environment as a means of improving health and preventing chronic disease.

PUBH 6621. Applied Data Analysis in Exercise and Nutrition Sciences. 1 Credit.

Introduction to data management and data analysis using the SAS System; data analysis procedures for specific research questions and settings within the context of exercise and nutrition sciences. Restricted to students in the MPH in physical activity in public health program, program design and evaluation track, or with the permission of the advisor. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6682. Managing Natural Resources for Food Production. 3 Credits.

The relevance of natural resource conservation for ensuring healthy agricultural, food, and environmental systems; various approaches to achieving sustainable systems. Restricted to students in the graduate certificate in food policy leadership program.

PUBH 6683. Applied Food Policy Immersion Experience. 2 Credits.

Leadership theories and an opportunity to build leadership skills and engage with food policy and agriculture leaders from a variety of sectors. Includes site visits to public and private organizations significant in food policy. Restricted to students in the graduate certificate in food policy leadership program. Prerequisites: PUBH 6680 and PUBH 6682.

PUBH 6699. Topics in Nutrition Sciences. 3 Credits.

Examination of a particular facet of nutrition sciences. Topics vary by semester. May be repeated for credit provided topic differs. See the Schedule of Classes for more details.

PUBH 6704. Health Information Technology, Informatics, and Decision Making. 3 Credits.

Operationalizing fundamental technology, processes, policies and concepts of healthcare informatics and decision management to translate data into actionable information within the framework of improving quality, safety, productivity, and experience.

PUBH 6706. Population and Community Health Analytics. 3 Credits.

Overview of the concepts of population and community health, the informatics and analytics necessary to assess population health, and best approaches for decision makers and policy makers using and communicating population and community health data.

PUBH 6850. Introduction to SAS for Public Health Research. 1 Credit.

Conducting basic data management tasks with SAS software; creating libraries, data sets, and variables, and generating basic descriptive statistics and simple graphics of public health and biomedical data.

PUBH 6851. Introduction to R for Public Health Research. 1 Credit.

Read, clean, transform, tidy, and summarize public health data in R. Explore data and write R functions to make workflow more efficient.

PUBH 6852. Introduction to Python for Public Health Research. 1 Credit.

Introduction to the basic concepts of Python programming language, illustrated with applications in biomedical sciences and health informatics.

PUBH 6853. Use of Statistical Packages for Data Management and Data Analysis. 3 Credits.

Data management and data analysis using statistical software. Creating and manipulating variables, merging and concatenating data sets, and implementing common statistical methods such as Student's t-test, linear regression, and logistic regression. Prerequisites: PUBH 6002.

PUBH 6854. Applied Computing in Health Data Science. 3 Credits.

Concepts of computing in biomedical sciences and health informatics. Foundations of Unix shell, command line tools, R and Python programming languages, and their applications in public health. PUBH 6860 may be taken simultaneously. Prerequisites: PUBH 6860. Credit cannot be earned for this course and PUBH 4201.

PUBH 6856. Advanced SAS for Public Health Research. 1 Credit.

Advanced SAS programming. Interactive Matrix Language, SAS macro facility, Structured Query Language, and SAS/GRAPH options for creating drill-down graphs to analyze public health data sets. Prerequisites: PUBH 6002; and PUBH 6249 or PUBH 6853; or permission of the instructor. Credit cannot be earned for this course and PUBH 6268.

PUBH 6859. High Performance and Cloud Computing. 3 Credits.

Introduction to high performance computing and cloud computing, including issues such as data transfer, security, virtual machines, and containers. HPC at GW, Amazon Web Services, and Google Cloud for biohealth computing. Prerequisites: PUBH 6851 and PUBH 6852 or permission of the instructor.

PUBH 6860. Principles of Bioinformatics. 3 Credits.

Biological concepts of molecular biology, genome organization, and evolution; computational concepts of alignment, database searching, phylogeny, and structure; and basic programming concepts including the shell, scripting, and databases. Prerequisites: PUBH 6002 or equivalent.

PUBH 6861. Public Health Genomics. 3 Credits.

Molecular technology and its impact on public health practice and discourse in the post-genomic era. The use of genomics to solve or help alleviate public health challenges. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6862. Applied Linear Regression Analysis for Public Health Research. 3 Credits.

Review of basic statistical inference and an overview of the construction of linear regression models for application to public health and biomedical data sets. Prerequisites: Prior completion of a course in undergraduate statistics and one semester of calculus.

PUBH 6863. Applied Meta-Analysis. 1 Credit.

Examination of meta-analysis (MA) with case studies using R. Statistical methods, including fixed- and random-effects MA; MA for binary and continuous data; heterogeneity in MA; meta-regression; and publication bias. Recommended background: Prior completion of an introductory course in biostatistical methods, such as PUBH 6002 or PUBH 6003, or an equivalent, is strongly recommended.

PUBH 6864. Applied Survival Analysis for Public Health Research. 3 Credits.

Application of survival or time-to-event data in public health studies. Censoring, survival functions, Kaplan-Meier curves, log-rank tests, Cox proportional hazards regression, parametric survival models, recurrent events, and competing risks. Prerequisites: PUBH 6249 or PUBH 6853. Recommended background: undergraduate calculus.

PUBH 6865. Applied Categorical Data Analysis. 3 Credits.

Comprehensive overview of methods for analyzing binary and multicategory response data. Contingency table methods for assessing associations and logistic regression for binary, nominal, and ordinal outcomes, including models for matched data. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6866. Principles of Clinical Trials. 3 Credits.

Introduction to basic principles for design, conduct, analysis, and reporting of clinical trials. Developing a proposal for a clinical trial. Prerequisites: PUBH 6002 or equivalent.

PUBH 6868. Quantitative Methods. 3 Credits.

Basic mathematical statistics: probability, fundamental distributions including binomial, Poisson and normal, central limit theorem, consistency, basic point estimation, hypothesis testing, linear models, and maximum likelihood estimation. Prerequisites: PUBH 6002 and prior completion of at least two courses in single variable calculus. Corequisites: PUBH 6249 or PUBH 6853.

PUBH 6869. Principles of Biostatistical Consulting. 1 Credit.

Principles and practice of biostatistical consulting and related skills and knowledge for public health and medical research environments. Recommended background: Prior completion of at least two graduate-level courses in statistics and an introductory course that discusses common health research designs, such as PUBH 6003, or their equivalent is strongly recommended. Credit cannot be earned for this course and PUBH 6258.

PUBH 6879. Propensity Score Methods for Causal Inference in Observational Studies. 3 Credits.

Designing observational studies; drawing causal inferences using propensity score methods; and performing propensity score analysis using R with hands-on data. Prerequisites: PUBH 6851 and PUBH 6865 or permission of the instructor.

PUBH 6883. Biostatistics Consulting Practicum. 1 Credit.

Supervised experiences involving the synthesis of biostatistical skills with consultations in one or more areas of health research. Students in the MPH programs in biostatistics and in epidemiology may register with permission of the instructor. Restricted to students in the MS in biostatistics and MS in epidemiology programs. Recommended background: Prior completion of at least two graduate-level courses in statistics and an introductory course that discusses common health research designs, such as PUBH 6003, or their equivalent is strongly recommended.

PUBH 6884. Bioinformatics Algorithms and Data Structures. 3 Credits.

Algorithmic foundations of bioinformatics, ranging from generic algorithmic techniques to specific algorithms used in various areas of bioinformatics. Theoretical background is complemented with solving practical problems. Prerequisites: PUBH 6854 or equivalent. Credit cannot be earned for this course and PUBH 4202.

PUBH 6885. Computational Biology. 3 Credits.

Introduction to modern computational biology, including omics data science, high-throughput technologies, multi-omics data integration, and analytical methods with real-world applications. Permission of the instructor is required prior to enrollment.

PUBH 6886. Statistical and Machine Learning for Public Health Research. 3 Credits.

Application and evaluation of supervised and unsupervised statistical and machine learning algorithms in the context of biomedical and public health research. Permission of the instructor is required prior to enrollment.

PUBH 6887. Applied Longitudinal Data Analysis for Public Health Research. 3 Credits.

Introduction to commonly used methods for longitudinal data analysis including fixed effects models, linear and generalized linear mixed effects models, and generalized estimating equations. Missing data. Prerequisites: PUBH 6862 and PUBH 6965; and PUBH 6868, or PUBH 8364, or STAT 6201 and STAT 6202.

PUBH 6894. Research Analytics. 3 Credits.

Key concepts in research analytics; skills and experiences needed to leverage big data to improve public health through data integration.

PUBH 6897. Research in Biostatistics and Bioinformatics. 1-4 Credits.

Independent research. Must be approved in advance by advisor/instructor. Restricted to graduate students in the Department of Biostatistics and Bioinformatics.

PUBH 6898. Master of Science Thesis. 1-2 Credits.

Master's thesis.

PUBH 6899. Topics in Biostatistics and Bioinformatics. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details.

PUBH 6999. Master of Science in Epidemiology Thesis. 2 Credits.

Thesis research. Restricted to students in the MS in epidemiology program.

PUBH 8010. Doctoral Independent Study. 1-3 Credits.

Doctoral students complete an independent study plan to meet predetermined project and/or research work under the supervision of a faculty member. Restricted to GWSPH doctoral students.

PUBH 8110. Research Rotations. 2 Credits.

Students conduct formal rotations with a laboratory or research group to gain research and reporting experience with the mentorship of EOH faculty. Includes identification of an environmental health research problem, collection or analysis of data, and reporting on the results. May be repeated for credit. Restricted to students in the PhD in environmental program or with the permission of the instructor.

PUBH 8116. Communicating Research Results. 2 Credits.

The importance of strategic communication to public health progress. Students gain communication skills that help to transcend educational barriers and facilitate connections with peers, policymakers, and the broader public. Restricted to doctoral students who have satisfactorily completed the comprehensive examination or with the permission of the dissertation chair.

PUBH 8144. Advanced Environmental Health Data Development and Modeling. 1 Credit.

Advanced doctoral level material on environmental exposure assessment using methods covered in PUBH 6144. Restricted to doctoral candidates. Prerequisites: PUBH 6131 or PUBH 6853. Corequisites: PUBH 6144.

PUBH 8242. Advanced Topics in Clinical Epidemiology and Public Health: Reading the Research. 1 Credit.

Evidence-based problem-solving approach using methods covered in PUBH 6242. Restricted to doctoral students. Prerequisites: PUBH 6003 or equivalent. Corequisites: PUBH 6242. Credit cannot be earned for this course and PUBH 6243.

PUBH 8244. Doctoral Topics: Cancer Epidemiology. 1 Credit.

Course focuses on critical review and interpretation of cancer epidemiology literature as well as issues in research design in the field. Prerequisites: PUBH 6001 and PUBH 6003. Corequisites: PUBH 6244.

PUBH 8245. Doctoral Topics: Infectious Disease Epidemiology. 1 Credit.

Provides doctoral level material on the content of infectious disease epidemiology. The course focuses on critical review and interpretation of infectious disease literature as well as issues preparing an analytic research paper on an emerging infectious disease and the application of tools used to describe the epidemiology of those diseases. Spring Prerequisites: PUBH 6003. Corequisites: PUBH 6245.

PUBH 8250. Doctoral Topics: Epidemiology of HIV/AIDS. 1 Credit.

Students select specific topic within area of HIV/AIDS epidemiology. Options include responding to a data analysis problem; responding to a methodological problem found within HIV/AIDS research; or another topic approved by instructor. Prerequisites: PUBH 6001 and PUBH 6003. Corequisites: PUBH 6250.

PUBH 8259. Doctoral Topics: Epidemiologic Surveillance in Public Health. 1 Credit.

Course provides doctoral level material on the content of surveillance offered in PUBH 6259. Focus is on critical review and interpretation of surveillance literature as well as issues preparing an analytic research paper. Prerequisites: PUBH 6002 and PUBH 6003. Corequisites: PUBH 6259.

PUBH 8283. Doctoral Biostatistics Consulting Practicum. 2 Credits.

Working under supervision, students develop an experience-based understanding of how biostatistical skills are used in one or more areas of health research. Students must have completed at least 6 credits in any combination of general or specialized graduate-level statistics courses, such as PUBH 6202, PUBH 6260, STAT 6201, or STAT 6202, before enrolling in this course. Restricted to PhD students.

PUBH 8364. Quantitative Methods. 3 Credits.

Introduces basic concepts in mathematical statistics. Topics include probabilities (unconditional and conditional), density and distribution functions of continuous and discrete random variables, including expected values. Specific distribution functions discussed are Binomial, Poisson, Hypergeometric, and Gaussian distributions. Additional topics include bivariable distributions, variance-covariance matrix, limiting theory, asymptotic results, and maximum likelihood estimation. Prerequisites: MATH 1231 and MATH 1232; and PUBH 6002 and PUBH 6249.

PUBH 8365. Design of Medical Studies. 3 Credits.

Design of medical investigations, including the randomized clinical trial, observational cohort study, and the retrospective case-control study. Specific methods regarding sample size, power and precision and statistical procedures for randomization and sampling. Ethics of clinical trials and the intention-to-treat principle. Prerequisite: PUBH 6002.

PUBH 8366. Biostatistical Methods. 3 Credits.

Biostatistical methods for asymptotically efficient tests and estimates of relative risks and odds ratios from prospective and retrospective matched and unmatched studies. Fixed and random effects models. Logistic regression, conditional logistic regression. Poisson regression. Maximum likelihood and efficient scores. Prerequisites: STAT 6202 or permission of the instructor.

PUBH 8401. Foundations in Public Health Leadership. 3 Credits.

Course modules cover personal leadership; leadership models, theories, concepts, tools, and skills; and practical application of leadership to real world situations. Restricted to doctoral candidates.

PUBH 8402. Leadership and Decision Making: Skills Based Approach. 2 Credits.

Using leadership and decision making skills to solve complex health problems and implement successful solutions to improve population health in all communities; decision making, program management, quality and risk management, human resources and budget, governance, and change management.

PUBH 8403. Leadership in Public Health Policy and Practice. 2 Credits.

Students work in teams on projects for clients from public health-related agencies or organizations in the Washington, DC, area that address issues in environmental and occupational health, global health, health behavior, and health policy. Restricted to students in the DrPh program. Prerequisite: PUBH 8402.

PUBH 8404. Advanced Topics: Health Systems and Health Policy Research. 3 Credits.

Examination and assessment of issues related to the intersection of health care systems and health policy, and how health policy and health services research can inform the development and evaluation of health care systems and health policy. Restricted to doctoral candidates. Prerequisite: PUBH 6315.

PUBH 8405. Advanced Topics: Health Economics Research. 3 Credits.

Critical financing issues for U.S. public health and health care services and systems. The role of health services research in understanding the effects of these issues and informing the deliberations and decisions of policymakers.

PUBH 8406. Advanced Topics: Health Research in the Global Arena. 3 Credits.

Alternative field methods adopted from sociology, anthropology, economics, and political sciences for social sciences and policy research. Builds data collection, instruments, measurements, indicators, and data analysis and interpretation skills in specific socio-cultural contexts. Ethical issues in international research.

PUBH 8407. Advanced Topics: Health Leadership in International Settings. 3 Credits.

Doctoral students develop the tools and experiences needed to build capacity for leadership in global health. Prerequisite: PUBH 8406.

PUBH 8408. Advanced Topics: Health Behavior Research & Practice Applications. 3 Credits.

Advanced topics relating theory to practice in areas of health education and behavioral change. Application of qualitative and quantitative research to health related behavior at individual and community levels.

PUBH 8409. Advanced Topics: Health Communication Research. 3 Credits.

Methods of communications research designed to alter health behavior. Emphasis on critical analysis of communications research aimed at the mass public, groups, and interpersonal level.

PUBH 8411. Advanced Topics: Principles of Human Health Risk Science. 3 Credits.

This course provides the doctoral student with a comprehensive orientation to the frameworks, principles and issues involved in assessing, managing and communicating environmental health risks. This fundamental, interdisciplinary course is designed to foster dialogue and insights about contemporary risk science and management issues, including ethical concerns and technical issues that influence policy making. Restricted to students in the environmental and occupational health program, or with permission of the instructor.

PUBH 8412. Advanced Topics: Environmental and Occupational Health Research and Practice. 3 Credits.

This course exposes students to the theory and reality of both research and practice in environmental and occupational health. There is an emphasis on the use of public health science in policy and regulatory decisions. Prerequisites: PUBH 8411 or permission of the instructor.

PUBH 8413. Research Leadership. 1-10 Credits.

Students participate in a range of activities designed to develop and enhance their research methods and analytic skills. These activities include participating in the development and submission of sponsored research proposals; being formally affiliated with a research project, assuming responsibility for completing a real-world research project; engaging in empirical data collection and analysis efforts.

PUBH 8414. Policy and Management Leadership. 1-10 Credits.

Students develop and enhance their management, leadership, and policymaking skills for problem solving in real-world settings; public health departments, community health centers, legislative settings, and public or teaching hospitals.

PUBH 8415. Instructional Leadership. 1-10 Credits.

Students participate in a range of activities designed to develop and enhance their teaching skills. These activities include course development, teaching master's level courses, acting as TA for undergraduate courses, advising students about their class performance, evaluating student performance, and developing remedial programs for students.

PUBH 8416. Study Design & Evaluation Methods. 3 Credits.

Prepares doctoral students to design and conduct program and policy evaluation in public health. Intensive introduction to the principles of study program design and evaluation research emphasizing the ability to synthesize the population-based intervention literature, apply planning and management methods, describe and apply research methods from a range of disciplines, and prepare a program research proposal.

PUBH 8417. Qualitative Research Methods and Analysis. 3 Credits.

Techniques for designing and conducting qualitative research and for analyzing and reporting qualitative data relevant to program development and implementation, community assessment, and policy analysis. Prerequisites: PUBH 8416.

PUBH 8418. Applied Statistical Analysis. 3 Credits.

Intensive course in data management and data analysis using STATA®. Database management system techniques and data analytical strategies for the appropriate analysis of data sets obtained from a variety of studies will be presented. The student will manipulate national data sets from epidemiological studies as well as Demographic and Health Survey (DHS) data. Prereq: PubH 8416.

PUBH 8419. Measurement in Public Health and Health Services. 3 Credits.

Review principles of measurement and assessment as they apply to public health and health services research constructs, review existing state-of-the-art measures of individual and population health status (e.g., morbidity, mortality, functioning and health-related quality of life) and of individual and community health behavior. Explore current measurement issues in health research.

PUBH 8420. Advanced Analysis and Dissemination. 3 Credits.

Advanced multivariate data analyses of complex datasets and programs, including advanced cross-sectional techniques, time-series analysis, and the use of panel data. Evaluation of results, and dissemination of findings to relevant stakeholders. Fall. Prerequisites: PUBH 8417 and PUBH 8418.

PUBH 8422. Advanced Health Care and Public Health Research Design. 2 Credits.

Design of protocol suitable for implementation as part of DrPH dissertation requirement. Permission of the instructor, completion of required coursework, and successful completion of the comprehensive examination required prior to enrollment.

PUBH 8423. Dissertation Research. 1-12 Credits.

Dissertation research for DrPH. Prerequisite: PUBH 8422.

PUBH 8434. Behavioral Medicine and Public Health. 3 Credits.

Investigation into the field of behavioral medicine, which integrates behavioral, psychosocial, and biomedical sciences, with specific applications to public health. Restricted to PhD students in the social and behavioral sciences in public health program or with the permission of the instructor.

PUBH 8435. Dissertation Proposal Development for Social and Behavioral Sciences. 2 Credits.

Advise and assist doctoral students in developing and defending their dissertation proposal. Restricted to doctoral students who have successfully completed comprehensive examinations.

PUBH 8610. Statistical Methods for Health Policy. 3 Credits.

Application of statistical analysis in health policy and public health research using Stata® to analyze a variety of large public health data sets. Prior completion of at least one graduate-level statistics course is required. Restricted to doctoral students. Credit cannot be earned for this course and PUBH 6310.

PUBH 8620. Seminar: Foundations of U.S. Health Policy. 3 Credits.

Reintroduction to the basics of U.S. health policy, combining advanced legal, policy, and regulatory content acquisition with advanced health law and policy analysis skills. Restricted to doctoral students in health policy or with the permission of the instructor.

PUBH 8622. Health Care Payments, Systems, and Delivery Models. 3 Credits.

Survey of long-standing practices and recent developments in provider payment and the organization of health care delivery in the United States. Restricted to doctoral students in the health policy program or with the permission of the instructor.

PUBH 8875. Linear Models in Biostatistics. 3 Credits.

Introduction to the theory of linear models with applications to public health and biomedical data. Least squares, maximum likelihood, and distribution theory for linear regression. Prerequisites: PUBH 6862; and PUBH 6868 or PUBH 8364 or STAT 6201. Corequisites: STAT 6202. Recommended background: prior completion of coursework in linear algebra and multivariable calculus.

PUBH 8877. Generalized Linear Models in Biostatistics. 3 Credits.

Theoretical development of most commonly used methods for categorical and count data presented within the unified framework of the generalized linear model. Prerequisites: PUBH 6865; and PUBH 6868, or PUBH 8364, or STAT 6201 and STAT 6202. Recommended background: prior completion of coursework in linear algebra.

PUBH 8878. Statistical Genetics. 3 Credits.

Application of statistical concepts to family- and population-based genetic data. Human evolution, genome-wide association studies, gene-environment interactions, and genetic architecture with emphasis on applications to real data and analyses. Prerequisites: PUBH 6860.

PUBH 8999. Dissertation Research. 1-12 Credits.

Dissertation research.

HEALTH POLICY AND MANAGEMENT

In early 2015, the Department of Health Policy and the Department of Health Services Management and Leadership consolidated to create a larger, integrated department that is even better prepared to lead education, research, and practice efforts related to public health policy, health care policy, and health services management. This positive evolution creates new and dynamic synergies for faculty, staff, students, and alumni, and maximizes our education and research potential.

The mission of the Department of Health Policy and Management—a practice-oriented academic community in Washington, DC—is to improve health and health systems locally, nationally, and globally through: excellence in education; innovative scholarship; applied research that is translated into practice and policy; and the promotion of transformational leadership that advances health policy and health services management.

We are committed to:

- Preparing graduates to be innovative and effective leaders in public health and health policy, health services delivery, and health system transformation.
- Conducting rigorous multidisciplinary research that addresses significant health challenges, is objective, and is translated to inform and affect health policy, health care management, and public health practice.
- Being a trusted resource for shaping and advancing health policy and management practices because of our research integrity and rigor, the real-world leadership experiences of our faculty and staff, and our exceptional students.
- Leveraging our unique location in Washington, DC, which allows for strong collaborations with health policy and management leaders and practitioners.
- Improving the health and health care of under-served and vulnerable populations.
- Promoting and learning from the diversity among our faculty, staff, students, and alumni in terms of background, experience, and thought.

Visit the Department of Health Policy and Management website (<https://publichealth.gwu.edu/departments/health-policy-and-management/>) for additional information.

GRADUATE

Master's programs

- Master of Health Administration (p. 1331)
- Master of Health Administration (MHA@GW (p. 1333))

- Master of Public Health in the field of health policy (p. 1346)
- Master of Science in the field of management of health informatics analytics (p. 1364)

Specialist program

- Health Services Administration Specialist (p. 1330)

Doctoral programs

- Doctor of Philosophy in the field of health policy (p. 1382)
- Doctor of Public Health in the field of health policy (p. 1388)

CERTIFICATES

- Graduate certificate in health administration generalist (p. 1390)
- Graduate certificate in health policy (p. 1391)

FACULTY

University Professor V.N. Gamble

Professors R.I. Bonar, A. Dor, L.H. Friedman, J. Heinrich (*Research*), K.B. Horton (*Research*), D.L. Hughes (*Research*), L.C. Ku, J.W. Levi, A.R. Markus (*Chair*), M.L. McCarthy, P.M. Pittman, M.J. Regenstein, S. Rosenbaum, J.B. Teitelbaum, J.H. Thorpe, L.S. Wen (*Visiting*),

Associate Professors D.G. Anderson (*Teaching*), J.Z. Beckerman (*Teaching*), L. Cartwright-Smith, C.P. Chen, M.M. Goldstein (*Teaching*), L. Helmchen, N.K. Seiler, P.W. Shin,

Assistant Professors K. Edwards (*Teaching*), E. Gray (*Teaching*), Q. Luo (*Research*), L.E. Masselink, A. Moghtaderi, J. Phoenix (*Research*), W. Psek, A.M. Vichare

Teaching Instructors P. MacTaggart, J.A. Volarich

Special Services S.E. Wilensky

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

- Health Services Management and Leadership (HSML) (p. 1624)
- Public Health (PUBH) (p. 1777)

PREVENTION AND COMMUNITY HEALTH

The Department of Prevention and Community Health is concerned with social and behavioral change for the health and well-being of people around the world. Its degree programs focus on prevention and the promotion of health and well-being with the active participation of individuals and communities, and are appropriate for students who are interested in putting into practice the latest public health research, or making significant scholarly contributions to the evidence base of public health. Master of public health students study four interrelated fields—community-oriented primary care; health promotion; maternal and child health; and public health communication and marketing. Doctoral students develop innovations in the science of health behavior.

GRADUATE

Master's programs

- Master of Public Health in the field of community oriented primary care (p. 1335)
- Master of Public Health in the field of health promotion (p. 1347)
- Master of Public Health in the field of maternal and child health (p. 1350)
- Master of Public Health in the field of public health communication and marketing (p. 1353)

Doctoral program

- Doctor of Philosophy in the field of social and behavioral sciences in public health (p. 1383)
- Doctor of Public Health in the field of health behavior (p. 1387)

FACULTY

Professors L.C. Abrams, C.J. Berg, W.H. Dietz, M.C. Edberg, W.D. Evans, D.L. Kerrigan (*Chair*), M.A. Napolitano

Associate Professors J. Bingenheimer, T. Henry (*Teaching*), D.M. Huebner, K.A. McDonnell, O.A. Price, K.M. Roche, C.E. Rodriguez-Diaz, M.S. Ruiz, A.N. Vyas

Assistant Professors E.L. Andrade, C.L. Heminger (*Teaching*), M.W. Long, K. Ndiaye (*Teaching*), T.L. Taggart

Adjunct Professor Y.E. Hancock, A.L. Hinzey

Adjunct Instructor A.G. Franz

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PUBH 0920. Continuing Research - Master's. 1 Credit.
Continuing Research Credit- Master's Level.

PUBH 0940. Continuing Research - Doctoral. 1 Credit.
Continuing Research Credit- Doctoral.

PUBH 1010. First-Year Experience in Public Health. 1 Credit.
Designed to assist students in the transition to GW and the public health major by introducing skills and resources needed to succeed personally, academically, and professionally, particularly in a public health context.

PUBH 1099. Variable Topics. 1-36 Credits.

PUBH 1101. Introduction to Public Health and Health Services. 3 Credits.
Introduction to aspects of public health and health services, including health services administration and policy, maternal and child health, environmental health, and health promotion.

PUBH 1102. History of Public Health. 3 Credits.
Historical and philosophical development of public health and its contributions to understanding, preventing, and controlling disease and disabilities.

PUBH 1102W. History of Public Health. 3 Credits.
Social history of public health from the late nineteenth century to the present; historical context for contemporary public health problems. Includes a significant engagement in writing as a form critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: UW 1020.

PUBH 1299. Undergraduate Public Health Study Abroad. 1-6 Credits.
May be repeated for credit when multiple courses with distinct subject matter are taken as part of a study abroad program.

PUBH 2110. Public Health Biology. 3 Credits.
Basic scientific mechanisms, concepts, and principles in health and the pathogenesis of diseases; a foundation for applications to public health. Prerequisites: BISC 1005; or BISC 1111.

PUBH 2112. Principles of Health Education and Health Promotion. 3 Credits.
Social and behavioral theories underlying health promotion program development and evaluation. Practical applications in a variety of domestic and global public health settings. PUBH 1101 may be taken as a corequisite. Prerequisite: PUBH 1101.

PUBH 2113. Impact of Culture upon Health. 3 Credits.
Relationships between cultural values and the development of modern health systems based on Western models of health care practice. Reliance upon traditional forms of health care. Examples of successful incorporation of traditional practices into evolving health care systems.

PUBH 2114. Environment, Health, and Development. 3 Credits.
Survey of the relationship between health and development and environmental trends. Topics include deforestation, urban contamination, and desertification.

PUBH 2115. Health, Human Rights, and Displaced Persons. 3 Credits.
Concepts of health as a human right, ethics, and the participation of the international community in moving toward health for all. Civil and international conflict in the generation of displaced populations.

PUBH 2116. Global Delivery of Health Systems. 3 Credits.
Introduction to health systems and the basic concepts of health systems administration and financing and health care reform with examples from advanced, middle income, and poor countries.

PUBH 2117. Service Learning in Public Health. 3 Credits.
A service-learning course that combines classroom instruction with practical learning. Students are responsible for securing an approved service site before the beginning of the semester; the instructor is available to assist with this placement.

PUBH 3115. Global Health and Human Rights. 3 Credits.
Concepts of health as a human right and the impact of ethical violations on the mental and physical health of individuals; the efforts of the international community in addressing health consequences of vulnerable populations.

PUBH 3116. Global Health Systems Performance. 3 Credits.
Introduction to the U.S. and international health systems, both public and private, and the WHO Health Systems Framework; how environmental, ethical, cultural, and political actions shape health systems in different parts of the world. Restricted to juniors and seniors.

PUBH 3130. Health Services Management and Economics. 3 Credits.
Basics of management theory, finance, and economics as applied to managing in the public health and health services field. Prerequisite: ECON 1011.

PUBH 3131. Epidemiology: Measuring Health and Disease. 3 Credits.

Principles of epidemiology applied to disease surveillance, control of infectious and chronic diseases, and health services/health policy. Understanding the basic research designs and their relationship to establishing cause and effect and effectiveness of interventions to prevent and cure disease. Prerequisites: PUBH 1101 and STAT 1127.

PUBH 3132. Health and Environment. 3 Credits.

Introduction to environmental and occupational health and implications for individual and population health. Issues of clean water, environmental toxins, air pollution, and the environmental impact on infectious diseases.

PUBH 3133. Global Health and Development. 3 Credits.

Political, social, and economic determinants of health; how health status is measured with an emphasis on low-income countries, the health of the poor, and inequity and inequality; burden of diseases that impact development and their basic epidemiological characteristics, including who they affect, when they occur, and where risk is greatest.

PUBH 3135W. Health Policy. 3 Credits.

An introduction to the fundamentals of the health care system in the United States and strategies available to policymakers when addressing problems relating to access, financing, and delivery of health care. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: PUBH 1101.

PUBH 3136. Health Law. 3 Credits.

Legal concepts related to individual health care and public health systems in the United States. Health care law, public health law, and bioethics.

PUBH 3137. Global Public Health Nutrition. 3 Credits.

Consideration of hunger and other nutrition issues globally, including food insecurity, under/over nutrition, and micronutrient deficiencies. Application of UNICEF malnutrition framework to describe vulnerable groups, critique program strategies, and identify multisectorial strategies to reduce hunger and malnutrition. Prerequisite: PUBH 3133.

PUBH 3142. Introduction to Biostatistics for Public Health. 3 Credits.

Applying biostatistical principles to analyze studies in health services literature. Selecting statistical methods based on research questions, calculating basic statistics for estimation and inference, interpreting results of statistical analyses.

PUBH 3150. Sustainable Energy and Environmental Health. 3 Credits.

Sustainability issues from the perspective of environmental health. Technical, social, and health implications of specific energy sources. Energy conservation and efficiency in the context of population growth, food and water resources, and maintenance of a healthy environment for future generations.

PUBH 3151. Current Issues in Bioethics. 3 Credits.

General and specific ethical questions and ethical decision making from both personal and organizational perspectives; right to health care, research with human subjects, reproductive technology, genetics, professional and student roles and responsibilities, and end-of-life issues.

PUBH 3151W. Current Issues in Bioethics. 3 Credits.

General and specific ethical questions and ethical decision making from both personal and organizational perspectives; right to health care, research with human subjects, reproductive technology, genetics, professional and student roles and responsibilities, and end-of-life issues. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

PUBH 3152. Qualitative Research Methods in Public Health. 3 Credits.

Introduction to characteristics and methods relevant to the design and conduct of qualitative research in public health investigations; data collection methods, coding, data analysis, and reporting results.

PUBH 3199. Topics in Public Health. 1-5 Credits.

Topics vary by semester. See the Schedule of Classes for more details. May be repeated for credit provided the topic differs.

PUBH 3201. Introduction to Bioinformatics. 3 Credits.

Introduction to bioinformatics, including biological concepts of molecular biology, genome organization, and evolution; computational concepts of alignment, database searching, phylogeny, and structural bioinformatics; and programming concepts in Unix and Python including the Unix environment, the shell, scripting, databases, regular expressions, and pipeline development. Prerequisites: BISC 1112 or BISC 1116 and BISC 1126; and STAT 1127. Credit cannot be earned for this course and BISC 2584, CSCI 3571.

PUBH 3202. Introduction to Genomics. 3 Credits.

Principles of genomics; genome projects, including the human genome, molecular techniques, analytical approaches, computational tools for genome research, and genomic data generation and analysis. Prerequisites: BISC 1111; BISC 1112.

PUBH 3299. Undergraduate Public Health Study Abroad. 1-6 Credits.

May be repeated for credit when multiple courses with distinct subject matter are taken as part of a study abroad program.

PUBH 3995. Undergraduate Research. 1-3 Credits.

Students work under the mentorship of a faculty member to acquire knowledge and skills central to the design, conduct, and/or analysis of scientific research. Project proposal must be approved by the instructor and dean's office prior to enrollment. Credit cannot be earned for this course and EXNS 3995.

PUBH 4140W. Senior Seminar. 3 Credits.

Students develop a public health intervention incorporating various domains of the discipline of public health. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Restricted to public health majors in their senior year. Prerequisite: PUBH 3130.

PUBH 4141. Senior Seminar Community Needs Assessment. 3 Credits.

Culminating experience for students in undergraduate public health programs. Restricted to seniors in the BS in public health program and students in the minor in public health.

PUBH 4199. Independent Study. 3 Credits.

Outline of intended project must be approved prior to registration by instructor and dean's office. Restricted to public health majors.

PUBH 4201. Practical Computing. 3 Credits.

Basic concepts of computer programming in biomedical sciences and health informatics; foundations of R and Python languages; best programming practices in health applications. Prerequisites: BISC 1111 and BISC 1115; or BISC 1112 and BISC 1116.

PUBH 4202. Bioinformatics Algorithms and Data Structures. 3 Credits.

Algorithmic foundations of bioinformatics, ranging from generic algorithmic techniques to specific algorithms used in various areas of bioinformatics. Prerequisite: PUBH 4201.

PUBH 6002. Biostatistical Applications for Public Health. 3 Credits.

Application of biostatistical principles to critical analysis of retrospective studies, prospective studies, and controlled clinical trials, as well as studies in the health services literature. Selection, basic calculations, and interpretation of statistical methods for detection of significant associations and differences.

PUBH 6003. Principles and Practices of Epidemiology. 3 Credits.

General principles, methods, and applications of epidemiology. Outbreak investigations, measures of disease frequency, standardization of disease rates, study design, measures of association, hypothesis testing, bias, effect modification, causal inference, disease screening, and surveillance. Case studies apply these concepts to a variety of infectious, acute, and chronic health conditions affecting the population.

PUBH 6007. Social and Behavioral Approaches to Public Health. 2 Credits.

Social and behavioral science theories, models, and concepts that can be applied to public health problems and interventions. The role of social and community factors, including race, ethnicity, and culture, in both the onset and solution of public health problems; the interrelationship between the social and behavioral sciences.

PUBH 6009. Fundamentals of Public Health Program Evaluation. 2 Credits.

Topics include designing program evaluation studies to produce and interpret evidence to improve public health; options for evaluation study design and evidence generation; and qualitative data collection and analysis methods. Prerequisites: PUBH 6007. Recommended background: Prior completion of PUBH 6002.

PUBH 6010. Independent Study. 1-6 Credits.

Designed to provide the student with an opportunity to gain or enhance public health knowledge and to explore an area of interest related to public health research or the delivery and/or administration of health services. Permission of the instructor or advisor required prior to enrollment.

PUBH 6011. Environmental and Biological Foundations of Public Health. 3 Credits.

The connection between population health and exposures to chemical, physical, and biological agents in the environment; interconnection between dimensions of environmental systems and all living things; biological sciences as they relate to environmental impacts.

PUBH 6012. Fundamentals of Health Policy. 2 Credits.

Comparative study of the structure, financing, and delivery of public health and health care in the United States and abroad; core elements of policy analysis are used to develop skills in analyzing a public health problem and presenting possible solutions both orally and in writing.

PUBH 6013. Master's Thesis. 3 Credits.

See Advisor.

PUBH 6014. Practicum. 1-3 Credits.

This course provides the opportunity for MPH students to apply the knowledge and skills acquired through their programs of study. A planned, supervised and evaluated practice experience that is relevant to the student's program is an essential component of a public health professional degree program. These opportunities can take place in a variety of agencies or organizations. Each program customizes Practicum requirements to meet students' needs. (Credit/No Credit) [For 45-credit MPH students who started Summer 06 or after.].

PUBH 6015. Culminating Experience. 1-3 Credits.

Students synthesize and integrate knowledge acquired in coursework and other learning experiences and apply theory and principles to a situation that approximates some aspect of professional practice. Program faculty evaluate student's mastery of the body of knowledge and ability to demonstrate proficiency in the required competencies. Requirements evaluated are adapted to the degree program.

PUBH 6016. Field/Laboratory Experience. 2 Credits.

The overall purpose of the field/laboratory experience requirement is to introduce students in the MS-PHMEID degree program to a supervised practical experience in a Public Health Laboratory or other qualifying public health entity from the perspective of the actual wet laboratory operations. Students that already have this laboratory experience are introduced to epidemiologic research, particularly surveillance, and its tie-in with laboratories either in the United States or in an international setting.

PUBH 6021. Essentials of Public Health Practice and Leadership I. 1 Credit.

The skills necessary for being an effective practitioner and leader; optimizing self-management and contributions in teams as public health professionals.

PUBH 6022. Essentials of Public Health Practice and Leadership II. 1 Credit.

The development of organizations and systems in public health; organizational management tools and collaborative, outcome-oriented advocacy techniques. PUBH 6021 may be taken as a corequisite. Prerequisite: PUBH 6021.

PUBH 6023. Interprofessional Education Experience. 0 Credits.

Completion of an interprofessional education experience (IPE) is required for all MPH students. Maximizes the student's capacity for collaboration with others to better address public health and health care challenges. A variety of options are available for students to complete this requirement before graduation. Restricted to MPH students. Prerequisites: PUBH 6002, PUBH 6003, PUBH 6007, PUBH 6011, PUBH 6012, and PUBH 6021.

PUBH 6050. Introduction to Health Services Delivery. 2 Credits.

Introduction to the systems that define and shape delivery of health services in the United States. Case studies and presentations on major issues develop an appreciation of dilemmas confronting policymakers, providers, and patients: balancing cost, quality and access. Access and disparity, health care professions, facilities, managed care organizations and government health care programs. Policy changes that have had major impact on American health care in the past century. Fall.

PUBH 6052. Practical Data Management and Analysis for Public Health. 2 Credits.

Practical aspects of dataset creation, data management, rudimentary statistical analysis, and tabular and graphical presentation of results. Creating codebooks, entering and cleaning data, deriving new variables from existing ones, choosing and implementing appropriate analytical techniques, graphing and tabulating results, and documenting and protecting work. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6054. Community Engagement and Advocacy. 2 Credits.

Tools and strategies for public health practitioners to understand, respect, organize, and collaborate with community groups and organizations for promotion of healthy behaviors. Development of practical skills to harness available resources in a community to advocate for healthy living and positive health outcomes.

PUBH 6056. Public Health Leadership Seminar. 1 Credit.

Leadership lessons taken from the careers of a diverse group of executives and entrepreneurs from the corporate, government, nonprofit, and art sectors. Leadership theory and styles. Building networks; skills for effectively engaging with peers, potential employers, and business partners.

PUBH 6058. Researching Violence Against Women and Girls. 2 Credits.

The intersection of violence against women and girls (VAWG) and public health; the impact that violence has on the health of the survivor, her current and future children, and communities; methods and best practices for designing applied research on VAWG. Prerequisites: PUBH 6002, PUBH 6003, PUBH 6007, PUBH 6011 and PUBH 6012.

PUBH 6060. MPH@GW Culminating Experience I. 1 Credit.

Students integrate and apply the skills, knowledge, theories, principles, and methods of public health practice to a public health issue. Most students will have completed PUBH 6014 or PUBH 6022 and other MPH core coursework prior to enrollment. Restricted to students in the MPH@GW program. Prerequisites: PUBH 6002, PUBH 6003, and PUBH 6007; and PUBH 6004 or PUBH 6011; and PUBH 6006 or PUBH 6012; and PUBH 6009 or PUBH 6437.

PUBH 6061. MPH@GW Culminating Experience II. 1 Credit.

Students integrate and apply the skills, knowledge, theories, principles, and methods of public health practice to a public health issue. Students may already have completed PUBH 6060 or it may be taken as a corequisite. Restricted to students in the MPH@GW program. Prerequisites: PUBH 6060.

PUBH 6080. Pathways to Public Health. 0 Credits.

Introduces the 12 foundational public health learning objectives to GWSPH students in non-MPH graduate programs. Must be completed before the last day of classes in the student's first semester of matriculation.

PUBH 6090. Practicum/Culminating Experience. 4 Credits.

Individually tailored. Culminating Experience for the MPH program. Permission of the advisor required prior to enrollment.

PUBH 6091. Special Project. 1-4 Credits.

Under faculty supervision, the student undertakes an original project that applies the skills and knowledge gained in the chosen track and/or concentration within the MPH program. Prerequisite: Permission of the instructor. NOTE that credits vary by program; please consult your program plan to register for the appropriate number of credits. [For 36-credit MPH students only].

PUBH 6099. Topics in Public Health. 3 Credits.

In-depth examination of a particular facet of public health. Topics vary by semester. See the Schedule of Classes for more details. May be repeated for credit provided the topic differs.

PUBH 6121. Environmental and Occupational Epidemiology. 3 Credits.

Demonstration and application of epidemiologic methods for the study of environmental and occupational health problems; epidemiologic exposure assessment methods and methods relevant to cohort, case-control, cross-sectional, and case cross-over studies; survey design and sources and evaluation of biases and confounding; emphasis on written and oral communication skills. Prerequisites: PUBH 6002 and PUBH 6003; and PUBH 6004 or PUBH 6011.

PUBH 6122. Protecting Public Health and the Environment: Policies, Politics, and Programs. 3 Credits.

The legislative, regulatory, judicial, and political system in the United States developed to protect human health and the environment. National and global public and environmental health agencies, policy development, and current topics. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6123. Toxicology: Applications for Public Health Policy. 3 Credits.

Toxicology as both a scientific discipline and a source of information for public health policy with respect to the regulation of foods, pesticides, drugs (pharmaceuticals), environmental chemical pollutants, and other chemicals that may affect human and environmental health. How chemicals interact with biological systems to produce adverse effects. The ways in which toxicologic information is developed and applied to regulatory decision making and the use of toxicology in regulatory risk assessment. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6124. Risk Management and Communication. 3 Credits.

Culminating course using problem-based learning methods to examine a variety of real-world environmental and occupational health issues in-depth. Students integrate cumulative knowledge across all required courses and demonstrate professional competencies. Prerequisites: PUBH 6121, PUBH 6123 and PUBH 6126.

PUBH 6126. Assessment and Control of Environmental Hazards. 3 Credits.

Introduces the anticipation, recognition, assessment, and control of hazards in the workplace and the ambient environment. It emphasizes an understanding of the characteristic features of specific hazards, which may be chemical, biological, or physical/ergonomic.

PUBH 6127. Introduction to Environmental Health Microbiology. 2 Credits.

Basics of public health microbiology as it relates to the environment, food, water, and bioterrorism. Examines from an environmental health perspective how the principles of microbiology are applied to current and emerging public health issues, whether from intentional or unintentional contamination of the environment. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6128. Global Environmental and Occupational Health. 2 Credits.

Examination of the global environmental and occupational health factors that contribute significantly to the global burden of disease, focusing primarily on low- and middle-income countries; principles from behavioral sciences, development economics, risk assessment, and epidemiology are included; potential solutions to environmental health problems, metrics used to measure impacts, and areas for future research. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6130. Sustainable Energy and the Environment. 2 Credits.

The sustainability of various energy strategies, including energy conservation, green building principles, renewable energy, and mitigation and adaption policies for climate change. Emphasis on the life cycle framework. Topics include natural resource depletion, water and energy consumption, and air, water, and solid waste pollutant emissions. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6131. Quantitative Methods in Environmental and Occupational Health. 3 Credits.

Application of biostatistical and epidemiologic concepts and methods to analysis of EOH data. Development and practice of skills needed for analyzing complex exposures and communicating environmental and occupational research findings. Prerequisites: PUBH 6002 and PUBH 6003; and PUBH 6004 or PUBH 6011.

PUBH 6132. Water, Sanitation, and Hygiene (WASH) in Low-Income Countries. 2 Credits.

Introduction to working in both disaster and development settings in countries where contaminated water, inadequate sanitation, and poor hygiene (WASH) cause serious health problems. Students gain practical experience applying WASH methods in the field. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6133. Social Dimensions in Climate Change and Health. 3 Credits.

The drivers of climate change and outcomes with particular focus on health dimensions; obstacles, vulnerabilities, inequality, and adaptation as well as technical and social solutions.

PUBH 6135. Researching Climate Change and Human Health. 3 Credits.

Study of the effects of climate change on human health using evidence compiled by the National Climate Assessment (NCA); widespread impacts, ecological context, oceans of change, infrastructure, water resources, energy, land use, heat, and air quality. Recommended background: PUBH 6003 and PUBH 6004.

PUBH 6136. Introduction to Environmental and Occupational Epidemiology. 3 Credits.

Epidemiologic research designs; methods for the study of environmental and occupational health problems; exposure assessment methods; design aspects of cross-sectional, case-control, cohort, and case cross-over studies; sources and evaluation of biases and confounding; survey and questionnaire design. Prerequisites: PUBH 6002, PUBH 6003 and PUBH 6011.

PUBH 6137. Environmental and Occupational Health Culminating Experience I. 1 Credit.

The first in a two-course sequence. The final, integrative learning experience for the MPH in environmental health science and policy or global environmental health. Students apply the skills and knowledge, theories, and principles learned in the MPH program to practical public health problems. Restricted to MPH students in the Department of Environmental and Occupational Health who have completed all core courses and at least 9 credits in program-specific courses. Prerequisites: PUBH 6002 and PUBH 6003; PUBH 6004 or PUBH 6011; PUBH 6006 or PUBH 6012; and PUBH 6007.

PUBH 6138. Environmental and Occupational Health Culminating Experience II. 1 Credit.

The second in a two-course sequence. The final, integrative learning experience for the MPH in environmental health science and policy or global environmental health. Students apply the skills and knowledge, theories, and principles learned in the MPH program to practical public health problems. Restricted to MPH students in the Department of Environmental and Occupational Health. Prerequisite: PUBH 6137.

PUBH 6140. Global Climate Change and Air Pollution. 2 Credits.

The state of the air in the Anthropocene epoch. Key concepts of atmospheric science, public health, and other societal impacts. Local and global policy frameworks. Prerequisites: PUBH 6004 or PUBH 6011.

PUBH 6144. Environmental Health Data Development and Modeling. 2 Credits.

Introduction to sources of environmental data, handling and cleaning of data, and using data in both statistical and environmental exposure models. Prerequisites: PUBH 6131 or PUBH 6853.

PUBH 6146. Microbiomes and Microbial Ecology in Public Health. 2 Credits.

Introduction to key concepts of environmental microbial ecology and the human microbiome. The roles of microbes in ecosystems' functions with a focus on climate change and the roles of microbes in human health and disease. Prerequisites: PUBH 6011.

PUBH 6199. Topics in Environmental and Occupational Health. 3 Credits.

Topics vary by semester. May be repeated for credit provided topics differ. Consult the Schedule of Classes for more details.

PUBH 6233. Epidemiologic Principles and Practice of Disease Eradication. 2 Credits.

The role of epidemiology, surveillance, research, and information technology in the eradication of vaccine preventable and parasitic human diseases. Prerequisites: PUBH 6003.

PUBH 6234. Epidemiologic Methods in Neglected Tropical Disease Control. 1 Credit.

Introduction to neglected tropical disease epidemiology providing a broad overview of select tropical medicine and public health issues; focus on applications of epidemiologic methods to the study of public health consequences of NTDs. Prerequisites: PUBH 6003. Corequisites: PUBH 6011.

PUBH 6235. Epidemiology of Obesity. 1 Credit.

Introduction to the epidemiology of obesity; descriptive epidemiology, measurement, consequences, and determinants of obesity; adiposity and body composition; obesity interventions and policy. Prerequisites: PUBH 6003.

PUBH 6236. Systematic Review of Public Health Literature. 1 Credit.

The process of conducting systematic reviews of literature in order to translate research into public health practice recommendations. Recommended for MPH candidates planning to conduct a systematic review of the literature for their culminating experience. Prerequisites: PUBH 6002 or EXNS 6204; and PUBH 6003 or EXNS 6208.

PUBH 6237. Chronic Disease Epidemiology. 2 Credits.

Overview of the epidemiology (descriptive, analytic, and etiologic) of chronic diseases. Emphasis on epidemiologic methods and study design in relation to chronic disease, as well as public health approaches to disease control including surveillance, screening, and interventions. Prerequisites: EXNS 6204 or PUBH 6002; and EXNS 6208 or PUBH 6003.

PUBH 6238. Molecular Epidemiology. 1 Credit.

Concepts, principles, and use of molecular methods in epidemiologic and clinical research. Common molecular measures and their interaction with environmental factors. Development of a framework for interpreting, assessing, and incorporating molecular measures in their area of research. Prerequisites: PUBH 6003.

PUBH 6239. Epidemiology of Foodborne and Waterborne Diseases. 1 Credit.

Foodborne and waterborne toxicants; diseases linked to eating and drinking and their prevention. Topics include transmission of disease and disease processes; microbial toxins, mycotoxins, chemical toxins, bacterial infections (e.g., salmonellosis, shigellosis, vibrio, listeria), virus and parasitic infections; issues in food and water safety. Prerequisites: PUBH 6003.

PUBH 6240. Pediatric HIV/AIDS. 1 Credit.

Comprehensive overview of HIV infection in children, with emphasis on the global pediatric HIV epidemic. Biological, epidemiological, clinical, and psychosocial issues; public health programmatic approaches to prevention, care, and treatment. The national and global experience with scaling up prevention services in the global effort to virtually eliminate HIV/AIDS in children. Prerequisites: PUBH 6003. Recommended background: PUBH 6250 and PUBH 6253.

PUBH 6241. Nutritional Epidemiology. 2 Credits.

Methodological issues related to dietary assessment, nutrition surveillance, and the epidemiology of obesity. Current trends, including the health impacts of vitamin D and sodium. Interpretation of the scientific literature in the field. Examples drawn from the National Health and Nutrition Examination Survey. Prerequisites: PUBH 6003.

PUBH 6242. Clinical Epidemiology and Public Health: Reading the Research. 2 Credits.

Methods for reading epidemiology and public health research including case-control, cohort studies, randomized controlled trials, meta-analysis, testing and screening, prediction rules, decision and cost-effectiveness analysis. Prerequisites: PUBH 6003 or equivalent.

PUBH 6243. Topics in Clinical Epidemiology and Public Health: Reading the Research. 1 Credit.

An evidence-based problem solving applications course utilizing methods taught in PubH 6242 Clinical Epidemiology and Public Health: Reading the Research Prerequisites: PUBH 6003. Credit cannot be earned for this course and PUBH 8242.

PUBH 6244. Cancer Epidemiology. 2 Credits.

Epidemiology of specific cancers, with an emphasis on molecular and genetic epidemiology. Current research in the field. Prerequisites: PUBH 6003.

PUBH 6245. Infectious Disease Epidemiology. 2 Credits.

The role and conduct of laboratory and field investigations in the epidemiology of infectious diseases. Prerequisite: PUBH 6003.

PUBH 6247. Design of Health Studies. 3 Credits.

Epidemiologic concepts and methods applied to specific research questions especially new types of public health problems. Recognition and development of the most appropriate study design for a specific health issue. Ecologic, cross-sectional, case-control, cohort studies and clinical trials. Sampling, measurement, questionnaire design, causality and causal criteria. Development of a research proposal. Prerequisites: PUBH 6003. Corequisites: PUBH 6002.

PUBH 6248. Epidemiology of Aging. 2 Credits.

The demographics, theories, and physiology of aging; descriptive and associative epidemiology of several common age-related diseases and disorders; implications for public health. Prerequisites: PUBH 6003.

PUBH 6250. Epidemiology of HIV/AIDS. 2 Credits.

Methodological issues central to HIV/AIDS research. Biases peculiar to HIV/AIDS epidemiologic studies (both observational and experimental designs). The natural history of HIV, diagnosis, surveillance, vulnerable subpopulations, behavioral facets, and evaluation of epidemiologic studies with an emphasis on methodological considerations. Prerequisites: PUBH 6003. Recommended background: PUBH 6002.

PUBH 6252. Advanced Epidemiology Methods. 3 Credits.

Advanced quantitative epidemiologic methods, with a focus on basic data analytic techniques, identifying and evaluating bias and adjusting for confounding. Dose-response, trend analysis, and multiple linear and logistic regression models. PUBH 6249 may be taken as a corequisite. Prerequisites: PUBH 6002, PUBH 6003, PUBH 6247 and PUBH 6249.

PUBH 6253. Issues in HIV Care and Treatment. 1 Credit.

This course provides an overview and in depth consideration of some of the major issues in treatment of HIV disease, including the assessment of efficacy and effectiveness, drug resistance, monitoring of drug toxicity, special populations, the interrelationship between treatment and prevention, and quality of care. The course has been designed with an interdisciplinary audience in mind. In discussions and assignments, students are able to emphasize their own area of interest and/or expertise (e.g. epidemiology, policy, etc).

PUBH 6255. Organizational Responses to the Local, National, and Global HIV/AIDS Epidemics. 2 Credits.

This seminar focuses on the rapidly evolving responses of local, national and global governmental and non-governmental organizations to the HIV/AIDS epidemic. Inspirational leaders of selected HIV/AIDS organizations are invited to describe how their organizations contribute to fighting the epidemic; the leadership and management skills that they use in their daily work; and their strategic decision-making processes. Basic principles of epidemiology, leadership and organizational strategy and structure are addressed through didactic presentations and interactive faculty-student dialogue. Lessons learned through the lens of HIV/AIDS organizations are broadly applicable to other public health problems. Students learn about the strengths and challenges of different types of public health organizations as they make career decisions about their own transition to the public health work force. Prerequisites: PUBH 6003, HIV/AIDS experience, or permission of the instructor.

PUBH 6258. Advanced Topics in Biostatistical Consulting. 1 Credit.

Principles and practice of biostatistical consulting in public health and medical research environments.

PUBH 6259. Epidemiology Surveillance in Public Health. 2 Credits.

Focus on foundations of public health surveillance systems for communicable as well as chronic diseases. Outbreak investigation methods are included, as well as surveillance data sources, data management, data analysis, ethical issues, surveillance system evaluation, and use of information for prevention. Surveillance systems for reportable diseases, nosocomial infections, bioterrorism events, cancer, environmental disease, vaccine-related adverse events, bovine spongiform encephalopathy, and military personnel are discussed. Prerequisites: PUBH 6003.

PUBH 6260. Advanced Data Analysis for Public Health. 3 Credits.

Advanced data analysis using the SAS System to expand on the analytic techniques gained in PUBH 6002 and PUBH 6249 and to provide students with the applied statistical skills required to analyze various types of public health datasets. Prerequisites: PUBH 6002 and PUBH 6249.

PUBH 6262. Introduction to Geographic Information Systems. 1 Credit.

Geographic information systems (GIS) for mapping and display of health data. The course makes use of ArcGIS 8.3. The use of spatial statistics for the detection of clusters and patterns in the spread of diseases. Working with geodatabases, shape files, layers, query information from attribute tables, geocode addresses and customizing GIS applications.

PUBH 6263. Advanced GIS. 1 Credit.

Provides mid to advanced level training in GIS for display and analysis of health data. Use software ArcGIS 9.3 and additional extensions such as Spatial Analyst and Geostatistical Analyst. Also uses GeoDa software. Emphasizes benefits of using GIS to do more than simply manage and map data. GIS supports a range of spatial analysis functions that enable researchers to extract additional meaning from manipulating geographic data. Learn to work with raster datasets and geodatabases to build spatial models for analyzing health data and evaluating spatial patterns of health events based on notion of distance. Prerequisites: PUBH 6262.

PUBH 6264. Quantitative Methods. 3 Credits.

Introduces basic concepts in mathematical statistics. Topics include probabilities (unconditional and conditional), density and distribution functions of continuous and discrete random variables, including expected values. Specific distribution functions discussed are Binomial, Poisson, Hypergeometric, and Gaussian distributions. Additional topics include bivariable distributions, variance-covariance matrix, limiting theory, asymptotic results, and maximum likelihood estimation. Prerequisites: MATH 1231 and MATH 1232; and PUBH 6002 and 6249.

PUBH 6265. Design of Medical Studies. 3 Credits.

Design of medical investigations, including the randomized clinical trial, observational cohort study, and the retrospective case-control study. Specific methods regarding sample size, power and precision and statistical procedures for randomization and sa.

PUBH 6266. Biostatistical Methods. 3 Credits.

Biostatistical methods for asymptotically efficient tests and estimates of relative risks and odds ratios from prospective and retrospective matched and unmatched studies. Fixed and random effects models. Logistic regression, conditional logistic regression. Poisson regression. Maximum likelihood and efficient scores. Prerequisites: STAT 6201, STAT 6202 and PUBH 6264.

PUBH 6267. Time Series Applications in Public Health. 2 Credits.

Introduce basic concepts for the identification and modeling of time series in the time domain approach. Learn a new set of terminology standards and a different way to analyze these type of data and to forecast future values of a time series and its accuracy. Software used is SAS/ETS and 3 procedures: ARIMA, AUTOREG, FORECAST. New mathematical notation is used. Prerequisites: PUBH 6249.

PUBH 6268. Advanced SAS. 1 Credit.

Intensive in advanced programming using SAS. Expand technical skills to provide advanced SAS tools for data management and graphics. Topics to include Interactive Matrix Language (IML), SAS Macro facility language, and drill-down graphs using SAS/GRAPH. Prerequisites: PUBH 6002 and PUBH 6249; or permission of the instructor.

PUBH 6269. Reproductive Epidemiology. 1 Credit.

Current research, controversial issues, and methodological problems in epidemiology of reproductive and perinatal health. Present reproductive health issues such as conception and infertility; perinatal issues such as complications of pregnancy, infections in pregnancy, adverse pregnancy outcomes, and birth defects. Prerequisites: PUBH 6003.

PUBH 6270. HIV/AIDS Surveillance. 1 Credit.

Overview of surveillance methods used domestically and internationally to monitor HIV/AIDS epidemic. Surveillance systems including sentinel, population based, behavioral, and incidence surveillance are presented and discussed. Strengths and weaknesses of these various systems are discussed in addition to how data from these systems impact and inform HIV/AIDS related policies and programs. Prerequisites: PUBH 6003.

PUBH 6271. Disaster Epidemiology. 1 Credit.

Introduction to disaster epidemiology that elucidates the important role epidemiologists play in assessing the health and psychological effects of natural and man-made disasters and in identifying factors that contribute to these effects. Focus on applications of epidemiologic methods to the study of public health consequences of disasters, case studies from actual disasters used to illustrate various roles of epidemiologist in responding to these events and lessons learned. Highlight key skills that epidemiologists need to be part of a response and recovery. Identify methodological issues for future work. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6272. Epidemiology of Infectious Agents Associated with Human Cancer. 1 Credit.

Describes the role of infectious agents in the etiology of human cancer. Emphasis on differences between specific oncogenic viruses. Other oncogenic agents, bacterial and parasitic, are also discussed. Discuss laboratory approaches to the documentation of their pathogenicity, how behavior affects mode of transmission, and which types of data provide strongest support for documenting oncogenic potential for humans. Prerequisites: PUBH 6003.

PUBH 6273. Ethnographic Methods. 1 Credit.

Use ethnographic field methods in conjunction with epidemiological research. Introduction to specific methods used to examine health phenomena and determinants of disease. Learn specific applied skills that can be modified with socio-cultural modifications to evaluate urban sites and other settings. Basic skills in application of ethnographic methods, including recursive observations, participant observations, and variety of approaches to interviewing such as in-depth, structured and non-structured as well as conversational interviewing. Discuss use of multiple approaches in conjunction with ethnography, including focus groups, archival, document, statistical and secondary data analysis, and survey research methods. Course emphasizes use of ethnographic research methods in community-based health settings and evaluates issues in cultural competency and how to garner stakeholder support to conduct epidemiologic studies. Prerequisites: PUBH 6003.

PUBH 6274. Emerging Infectious Diseases for Public Health Professionals. 2 Credits.

Focus on epidemiology of emerging infectious diseases of public health importance, including factors leading to their development, management of emerging infectious diseases from a public health and laboratory standpoint, including biosafety, and strategies for emergency preparedness from a national and international perspective. Emphasis on the context of emerging infectious diseases and strategic approaches to their containment. Prerequisites: PUBH 6003 or MICR 6292; or permission of the instructor.

PUBH 6275. Essential Public Health Laboratory Skills. 2 Credits.

This course provides public health students with practical laboratory experience Prerequisites: MICR 6239 or permission of the instructor.

PUBH 6276. Public Health Microbiology. 3 Credits.

Gain in-depth understanding of important non-viral pathogens pertinent to public health microbiology. Learn how to isolate and identify pathogens using critical thinking and problem solving skills.

PUBH 6278. Public Health Virology. 3 Credits.

In-depth understanding of viral pathogenesis by focusing on current research, controversial issues, and public health relevance. Survey of family of viruses most relevant to today's public health efforts, concentrating on virus-host interactions and therapeutic strategies.

PUBH 6280. Microbiology and Emerging Infectious Diseases Final Project. 2 Credits.

Focus on the synthesis and summary of data acquired through epidemiologic and/or public health laboratory research. Biosafety training, CITI training, HIPAA training and permission of the instructor are required prior to enrollment. Prerequisites: PUBH 6002, PUBH 6003, PUBH 6292, and PUBH 6245.

PUBH 6281. Analysis of Complex Surveys Using SAS and Stata. 2 Credits.

Appropriate methods to analyze survey data collected using complex sampling methods are discussed and applied to national survey data to address provocative public health research questions. An equivalent Stata course may be substituted for prerequisite 6249. Prerequisites: PUBH 6003 and PUBH 6249.

PUBH 6282. Introduction to R Programming. 1 Credit.

R is an open source software environment for statistical computing and graphics. Data transfer between SAS and R, data manipulation and visualization within R, programming and debugging, R libraries, and graphics theory. Prerequisites: PUBH 6249. Recommended background: Programming experience in a statistical package such as Stata or in high level language such as C, Python, Perl.

PUBH 6299. Topics in Epidemiology. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details.

PUBH 6305. Fundamentals for Health Policy: Public Health and Health Care. 2 Credits.

An overview of public health and health care in the United States as an introduction to the study and analysis of health policy. Presents the governmental framework, institutions, financing streams, workforce, constituencies, and interest groups engaged in the health sector to ensure that students begin their policy analytic training with grounding in the political, economic, and social realities of public health and health care.

PUBH 6310. Statistical Analysis in Health Policy. 3 Credits.

Quantitative and statistical methods of data analysis for health policy and health services research. Instruction in conducting data analyses using Stata statistical and data analysis software and application of acquired skills to health policy and health services research. Practical experience in programming and analysis of various health policy-related questions. Entering and importing data; creating, saving, and merging data sets; creating and modifying variables; labeling variables and values; and conducting analysis ranging from univariate to multivariate analyses, including multiple regression and logistic regression. The use of existing data sets to analyze health policy issues and interpret these analyses for policy purposes. Prerequisite: PUBH 6002.

PUBH 6315. Introduction to Health Policy Analysis. 2 Credits.

Core elements of health policy analysis: problem definition, background, the political, economic, and social landscape; development of policy options and recommendations. Written, graphic, and oral presentation skills associated with policy analysis. Summer, Fall, Spring Prerequisites: PUBH 6012 or PUBH 6305.

PUBH 6320. Advanced Health Policy Analysis. 3 Credits.

Practical applications of basic quantitative tools in health policy. Problem definition; political, social, and economic assessment of a problem; program evaluation and data analysis; development of policy options; and the written and oral presentation of findings and recommendations. Prerequisites: PUBH 6305 or PUBH 6012; and PUBH 6310 and PUBH 6315.

PUBH 6325. Federal Policymaking and Policy Advocacy. 2 Credits.

The federal health policymaking process, including an overview of the legislative, administrative, and judicial processes that affect policymaking; federal budget, authorization, and appropriation processes; common techniques and strategies used to advance legislative and regulatory policies, including coalition building and the use of policy studies and media relations. Prerequisites: PUBH 6012 or PUBH 6305.

PUBH 6330. Health Services and Law. 3 Credits.

Examination of the ways in which the law and legal system in the United States influence and are influenced by the health care system. How judicial, statutory, regulatory, and constitutional sources of law embody health policy and affect access to and quality and financing of health care, as well as the regulation of patient rights.

PUBH 6335. Public Health and Law. 3 Credits.

How the law can both promote public health and conflict with the rights of individuals protected under the U.S. Constitution; legal concepts that underlie the public health system and inform public health policymaking; major areas of public health activity; the future of public health.

PUBH 6340. Health Economics and Finance. 3 Credits.

Examination of economic principles as they apply to health policy in the public and private sectors. The basic framework of economics is used to analyze the behavior of consumers, hospitals, physicians, and insurers, as well as pharmaceutical companies and long-term care providers. Overview of Medicare and Medicaid. Economic analyses of current issues in the marketplace, including rising health spending in the context of the national economy and the federal budget, insurance market dynamics, key issues in the long-term care industry, shifting market forces and power within the health care arena, and new payment initiatives and delivery system models. Prerequisites: PUBH 6352 or an undergraduate economics course.

PUBH 6345. Health Policy Research Design. 2 Credits.**PUBH 6350. Health Policy Capstone. 2 Credits.**

Required for MPH graduate students in the health policy concentration in the final semester before graduation. Students synthesize and integrate knowledge across multiple public health disciplines; apply theories, principles, and skills in ways that approximate professional practice in the field of health policy; and demonstrate mastery of the required knowledge and competencies addressed in the curriculum. Prerequisites: PUBH 6012 or PUBH 6305; and PUBH 6320.

PUBH 6352. Basics of Economics for Health Policy. 1 Credit.

An introduction to modern microeconomics -- the study of how consumers, firms, industries, and the public sector make decisions and allocate their resources in the economy. The principles of supply and demand and elasticity in both the private and public sectors are analyzed.

PUBH 6353. Child Health Advocacy. 1 Credit.

Introduction to child health advocacy. Affordable Care Act (ACA), preventive care, school health, environmental issues, and emergency care. The use of data for advocacy.

PUBH 6354. Mental Health/Substance Abuse Policy. 2 Credits.

Provides an overview of the U.S. mental health and substance abuse delivery system, its components, and the policy challenges created by the organization of this system. Considers the behavioral health care system from the perspective of several main "actors" in the system: patients, providers (primarily doctors and hospitals), health plans, and payers (public and private). Prerequisite: PUBH 6305.

PUBH 6355. Comparative Health Policy. 2 Credits.

Archetypical health care systems, financing, and reform efforts, with emphasis on the trade-offs between efficiency and equity. Comparison of current policy challenges and solutions faced by policymakers in the U.S. and in other countries. Prerequisites: PUBH 6012 and PUBH 6305.

PUBH 6356. State Health Policy. 2 Credits.

Students develop a briefing on health and health care for a new governor and health secretary in order to gain a practical understanding of state health policy and programs. The course is designed to replicate the experience of a newly hired policy staff member learning the requirements for the position in a particular state. Prerequisites: PUBH 6012 or PUBH 6305.

PUBH 6357. Health Economics and Policy: Cost Containment Strategies. 2 Credits.

Health care cost containment in the context of the current implementation of national health reform. Cost containment strategies; economic underpinnings, anticipated impacts, perspectives of and implications for health care providers and systems, and political considerations. Prerequisite: PUBH 6340.

PUBH 6358. Vaccine Policy. 2 Credits.

The development of U.S. vaccine policy and the growth of various markets targeting routine vaccination of all populations; interactions among business, legal, political, public health, medical, federal/state/local government, and consumer communities that combine to influence vaccine delivery in a broad range of settings. Prerequisites: PUBH 6012 or PUBH 6305.

PUBH 6359. Reproductive Health Policy. 1 Credit.

Overview of reproductive health policy at the federal and state levels. Balancing the interests of competing stakeholders; the fundamental underlying role of significant disparities in financing for and access to reproductive health services; and how policymaking can alleviate or exacerbate preexisting issues.

PUBH 6360. Advanced Maternal and Child Health Policy. 1 Credit.

In-depth exploration of maternal and child health policy in the U.S., with a particular emphasis on the role of personal and public health services for women, children, youth and their families in the context of health and human services system change. Prerequisite: PUBH 6561.

PUBH 6361. Health Workforce Policy. 2 Credits.

Strategies for the prevention and control of infectious diseases, focusing on low and middle income countries. Goals, strategies, and challenges of major global health intervention programs. Surveillance systems, vaccination programs, chemotherapy as a prevention and treatment tool, nutritional supplementation, environmental approaches, and potential benefits of integrating multiple interventions. Prerequisites: PUBH 6012 or PUBH 6305.

PUBH 6363. The Health Care Legislative Process. 1 Credit.

How health care legislation is developed in and moves through the U.S. House of Representatives and Senate. The roles of the committees of jurisdiction in each house and how the rules of each house affect legislative outcomes.

PUBH 6364. Federal Budget Process for Health Policy. 1 Credit.

Focuses on how the Congressional budget process shapes the funding and design of federal health care programs, ranging from entitlement programs like Medicare to appropriated programs like community health centers. Discussions cover budget resolutions, appropriations bills, and budget reconciliation legislation, as well as Congressional procedures and committees through which they are considered. Prerequisite: PUBH 6305.

PUBH 6366. Health Care Corporate Compliance. 2 Credits.

The federal laws and regulations that affect U.S. health care industry participants, particularly those relating to the prevention of fraud and abuse, and the role of corporate compliance programs. Prerequisites: HSML 6215 or PUBH 6330.

PUBH 6367. Population Health, Public Health, and Health Reform. 2 Credits.

In-depth assessment of how a reforming health care system can be expected to change the policy landscape for population and public health in the United States; direct changes evolving at the state and local level and national payment and health system reforms. Prerequisites: One of the following: HSML 6202, PUBH 6006, PUBH 6012, or PUBH 6305.

PUBH 6368. Law, Medicine, and Ethics. 3 Credits.

Legal, ethical, and policy issues that arise in the biomedical arena; the definitions of life and death, the nature of personal identity, the requirements of justice, and the boundaries of liberty. Prerequisites: PUBH 6330 or PUBH 6335.

PUBH 6370. Medicare/Medicaid Law and Policy. 2 Credits.

Describes current legal and public policy issues in the Medicare and Medicaid programs, including the legal, operational, financial, and organizational rules for the two programs. Prerequisite: PUBH 6315.

PUBH 6372. Minority Health Policy. 2 Credits.

Introduces students to the concept of health disparities and the implications of disparities for health care practice and policy. Students will learn how disparities are defined and measured, as well as emerging approaches in practice and policy to reducing disparities. Fall. Prerequisite: PUBH 6315.

PUBH 6374. Pharmaceutical Policy. 2 Credits.

Legal and regulatory frameworks related to the demand for and supply / quality of pharmaceutical products. Policies specific to drug development, pricing, reimbursement, use, dissemination of information, and post-marketing surveillance. Prerequisite: PUBH 6315.

PUBH 6376. Primary Health Care Policy. 2 Credits.

Politics and policy behind the provision of primary health care in the United States. The rise of the field of primary care and how it is supported and financed; the role of insurers and government in regulation and oversight in the areas of access, cost, and quality. Prerequisite: PUBH 6315.

PUBH 6378. HIV Policy in the US. 2 Credits.

Examines the policy response to the HIV epidemic in the United States and how the epidemic itself has helped to shape U.S. policy. How and why HIV became a national policy issue; circumstances surrounding the discovery of and early response to HIV; and main policy and programmatic developments and key players over time. The role and implications of the Affordable Care Act for individuals with HIV, the future of the Ryan White HIV/AIDS Program, and the impact of new treatment and prevention strategies on the future course of the epidemic.

PUBH 6380. Bridging Health Policy and Health Information Technology. 2 Credits.

Basics of health care informatics policy and core technological components for health services managers, public health professionals, health policy analysts, and health information technology staff. Policy and legal frameworks, governance and financial issues, technological infrastructure, and business and technological operations. Concepts and roles of information and how information technology can support the health care industry in promoting quality improvement.

PUBH 6382. Community Health Center Policy. 2 Credits.**PUBH 6384. Health Care Quality and Health Policy. 2 Credits.**

The role of quality in the U.S. health care delivery system from the perspective of multiple stakeholders, including public and private payers, providers, consumers, and employers. Defining and measuring quality; how quality information is used; and policy implications of quality improvement. Recent changes under health reform legislation. Prerequisites: PUBH 6012 or PUBH 6305.

PUBH 6386. Public Health Preparedness Policy. 2 Credits.

Issues in public health emergency preparedness and response at the nexus of homeland and national security. The relationship between public health and criminal investigation, forensic epidemiology, and surveillance; biodefense; and the role of the scientific community. Infrastructure, threat themes, and associated preparedness and response policy.

PUBH 6390. Prescription Drugs: Policy and Public Health. 3 Credits.

Key policies and public health programs related to each stage of a prescription drug's life cycle; Congressional funding focused on speeding the development and approval of needed drugs, public and private approaches to increase access to prescription drugs, and exceptions to international laws that allow some countries to violate prescription drug patents to improve the health of impoverished citizens.

PUBH 6399. Topics in Health Policy. 3 Credits.

In-depth examination of a particular facet of public health policy. Topics and prerequisites vary.

PUBH 6400. Global Health Frameworks. 2 Credits.

Overview of current issues in global public health with particular emphasis on low and middle-income countries. Serves as both an introductory course for students entering the field of global health, as well as an update on current technical and policy issues for advanced students who may have considerable experience.

PUBH 6410. Global Health Study Design. 1,2 Credit.

Tools necessary for designing and understanding the research that goes into developing good public health programs; basic elements for the planning and design phase of a research project. Prerequisite or corequisite: PUBH 6009 or PUBH 6501. Prerequisite: PUBH 6003.

PUBH 6411. Global Health Qualitative Research Methods. 2 Credits.

An introduction to qualitative data collection and analysis in global health settings. Methodologies include survey design, interviews, focus groups, and participant observation. Archival research and clinical trial research are also addressed. The set of methods most commonly used to collect qualitative data in global health settings. Students are enabled to prepare interview guides, conduct in-depth interviews, and analyze and document the results from a qualitative field project. Prerequisites: PUBH 6002 and PUBH 6410.

PUBH 6412. Global Health Quantitative Research Methods. 3 Credits.

Continuation of the series of global health methods courses. Examination of the fundamental concepts of empirical analysis and qualitative analysis, including open and axial coding, the basis of grounded theory, and regression analysis. Prerequisites: PUBH 6002 and PUBH 6410.

PUBH 6416. Ethical and Cultural Issues in Global Health Research and Programs. 1 Credit.

Examine procedures and concerns for protecting communities and human subjects involved in public health programs and research. Consider cultural considerations integral to ethical conduct of public health research and programming in the global context. Discuss history behind rules and regulations that govern ethical principles around conduct of research involving human subjects. Consider contribution that awareness of cultural contexts where we work makes to ethical nature of our work as global health professionals.

PUBH 6417. Cross-Cultural Approaches for Global Health Practice. 1 Credit.

How to communicate, negotiate, and be more effective across cultures; social aspects that affect communication within cultures and how to navigate communication in practical situations including in the work place and in risk and crisis situations. Corequisite: PUBH 6410. Prerequisite: PUBH 6416.

PUBH 6420. Understanding Commercial Determinants of Health. 1 Credit.

Conceptual understanding and frameworks for commercial determinants of health as key to improving public health.

PUBH 6421. Responsible Conduct of Research. 1 Credit.

Designed to raise awareness of the responsible conduct of research. Strategies for preventing irresponsible research practices, including unacceptable practices and research misconduct.

PUBH 6430. Theories for Global Health Communication Interventions. 2 Credits.

Use of communication theory and methods in health promotion. Integration of multidisciplinary approaches to public health communication. Prerequisites: PUBH 6007 and PUBH 6400.

PUBH 6431. Global Health Communication Strategies and Skills. 3 Credits.

Students conduct qualitative research to evaluate health communication programs, assess readability level and suitability of written health education materials, conduct content analyses, and review/critique current health communication literature. Prerequisites: PUBH 6430 or permission of the instructor; and PUBH 6007.

PUBH 6435. Global Health Program Development and Implementation. 2 Credits.

Basic concepts and principles of program development and implementation including data collection methods, decision making, and problem-solving techniques. Application of program development techniques to specific interventions. Prerequisite: PUBH 6400.

PUBH 6436. Global Health Program Management and Leadership. 2 Credits.

Essential tools for successful project, personnel, and program management. Leadership and management theory; key issues in managing global health programs and projects; leadership and management skills development; use of data in management decision making; and importance of quality, supply chain, and resource management. Restricted to students in the MPH in global health program design, monitoring, and evaluation program. Prerequisites: PUBH 6400 and PUBH 6435.

PUBH 6437. Global Health Program Evaluation. 3 Credits.

Fundamentals of program monitoring and evaluation; developing and using program theory in evaluation; impact evaluation and mixed-methods approaches; qualitative methods and statistical analysis for program evaluation. Prerequisites: PUBH 6002.

PUBH 6440. Global Health Economics and Finance. 2 Credits.

Examination of economics and finance principles as they apply to global health. Organization, delivery, and financing of health care in developing countries. Tools for analyzing issues related to global health economics and finance and application of those tools to a variety of a global health issues, including demand for health care, health care financing, social insurance, pharmaceuticals, and HIV/AIDS. Prerequisite: PUBH 6400.

PUBH 6441. Global Health Organizations and Regulations. 3 Credits.

The functions, capacities, and governance of international health organizations; the normative power of some international health organizations for regulatory processes; and evidence-based development of public health policies with attention to issues of global trade as it shapes worldwide and national health. Prerequisite: PUBH 6400.

PUBH 6442. Comparative Global Health Systems. 2 Credits.

Examination of national health systems, how they differ, and how they are performing. Health systems analyzed through four different lenses: health care organizations, health workforce development, health care financing, and health policy development. Comparison of health systems and health reforms in seven regions of the world and assessment of how health system performance might be improved. Course fee may apply. Prerequisite: PUBH 6400.

PUBH 6443. Global Health Agreements and Conventions. 2 Credits.

Explores the impact of regulations, trade and human rights on health by examining the relevant international declarations, agreements and conventions. This course examines a variety of topics including the impact of international trade agreements on health, the International Health Regulations and other regulations affecting global health, and the relationship between health and human rights. Prerequisite: PUBH 6400.

PUBH 6445. Quantitative Methods for Impact Evaluation. 2 Credits.

Learning to use and produce empirical research in the public health field; review of quantitative techniques and research designs used to uncover causal effects of policies and programs, with applications to public health topics. Prerequisites: PUBH 6002, PUBH 6003 and PUBH 6412.

PUBH 6450. Global Health Diplomacy. 2 Credits.

Introduction to the concept of global health diplomacy; how diplomacy has been used to advance health agendas and how health issues have been used to improve diplomatic relations between countries; formal health, multi-stakeholder health, and informal health diplomacy; comparative study of how different countries have devised health diplomacy strategies.

PUBH 6451. Monitoring/Evaluation of Sexual/Reproductive Health Programs in Low- and Middle- Income Countries. 2 Credits.

Overview of key sexual and reproductive health challenges in low- and middle-income countries; designing and measuring programs to address those challenges. Taught from the perspective of applied researchers working within an organization that implements sexual and reproductive health programs and services. Prerequisites: PUBH 6437, PUBH 6500 and PUBH 6503.

PUBH 6452. Social and Behavior Change Communication in Middle- to Low-Income Countries. 2 Credits.

The ways in which behavior change and sociocultural theories underpin the development of SBCC programs in politically, culturally, and socially diverse settings. Prerequisites: PUBH 6007 and PUBH 6503.

PUBH 6455. Global Vaccinology. 3 Credits.

Concepts, methods, and tools for making new and existing lifesaving vaccines more accessible to individuals in low- and middle-income country settings. Recommended for second-year MPH students. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6461. Ethics and Accountability in Humanitarian Settings. 1 Credit.

Principles and fundamentals of ethical approaches and accountability processes in the delivery of humanitarian services and possible solutions and interventions to address them. PUBH 6480 may be taken as a corequisite. Prerequisite: PUBH 6480.

PUBH 6462. Nutrition and Food in Large Humanitarian Emergencies. 1 Credit.

Fundamentals of food aid programs and nutritional issues in emergency humanitarian situations and appropriate local and international responses in lower-income countries. Field-based program responses in international, resource-scarce settings, as conducted by NGOs and UN agencies. PUBH 6480 may be taken as a corequisite. Prerequisite: PUBH 6480.

PUBH 6463. Communication Strategies and Planning in Humanitarian Settings. 2 Credits.

Principles of and major challenges in communication planning with wide range of stakeholders in humanitarian settings; solutions and interventions to identify related risks and appropriately respond to and effectively plan communication strategies. PUBH 6480 may be taken as a corequisite. Prerequisites: PUBH 6007 and PUBH 6480.

PUBH 6464. Mental Health in Humanitarian Settings. 1 Credit.

Principles of and fundamental challenges to mental health in humanitarian settings, including potential solutions and interventions; foundational knowledge and skills in mental health and psychosocial support services in such settings. PUBH 6480 may be taken as a corequisite. Restricted to PUBH 6480.

PUBH 6465. Reproductive Health and Gender-Based Violence in Humanitarian Settings. 1 Credit.

Key issues, challenges, policies, and interventions related to sexual and reproductive health and gender-based violence in humanitarian settings for persons affected by armed conflict and natural disasters. PUBH 6480 may be taken as a corequisite. Prerequisite: PUBH 6480.

PUBH 6469. Humanitarian Aid Seminar Series. 1 Credit.

Targeted talks and panel discussions with humanitarian aid workers from a variety of agencies addressing important or controversial contemporary topics in humanitarian settings. Corequisite or prerequisite: PUBH 6480.

PUBH 6480. Public Health in Humanitarian Settings. 2 Credits.

Technical aspects of high-priority public health interventions; consideration of how and why sound public health interventions should be implemented in both emergency and chronic humanitarian settings; the roles of diverse humanitarian actors.

PUBH 6481. Global Mental Health. 2 Credits.

Focus on global mental health knowledge and public health policy implementation skills regarding the integration of mental health, public health, and primary care in diverse health systems and challenging cultural contexts. Prerequisite: PUBH 6400.

PUBH 6482. International Food and Nutrition Policy. 2 Credits.

Major global food and nutrition issues, their determinants, and the strategies that in place to address them. Students identify major nutrition and food challenges in a country or region as well as the policies and programs that have proven successful in addressing those challenges. Prerequisite: PUBH 6400.

PUBH 6484. Prevention and Control of Vector Borne Diseases. 2 Credits.

Study of insects and other vectors responsible for transmission of diseases in developing countries, including plague, malaria, dengue fever, onchocerciasis (river blindness), and chikungunya virus. Special focus on developing countries, particularly in the Middle East, Africa, Asia, and Latin America. Diseases such as West Nile Virus and Lyme disease in the United States and elsewhere are also addressed. New methods for effective management and control.

PUBH 6486. Global Health Programs and Approaches to the Control of Infectious Diseases. 2 Credits.

Strategies for the control of infectious diseases with a focus on low and middle income countries; identifying and critiquing goals, strategies, and challenges of major global health intervention programs designed to prevent and control infectious diseases. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6487. Emerging Zoonotic Diseases and Global Food Production. 1 Credit.

Analysis of trends in emerging zoonotic diseases and their links to global food production. Case studies on the use of surveillance systems and outbreak detection techniques to monitor emerging zoonotic diseases. Development of skills to analyze surveillance systems, policy reports, and literature related to emerging zoonotic diseases and food-borne outbreaks within a global context. Prerequisites: PUBH 6003.

PUBH 6488. Cost-effectiveness Analysis in Public Health and Health Care. 2 Credits.

The application of cost-effectiveness analysis (CEA) to enhance the efficiency of programs and services both in the United States and developing countries. A variety of topics and related analytical tools such as cost benefit analysis, decision analysis, and sensitivity analysis are covered. Students learn to perform cost-benefit and cost-effectiveness analyses and understand the strengths and limitations of these methods and how to apply them to a broad range of health issues.

PUBH 6489. Evaluation of Food and Nutrition Programs and Policies. 1 Credit.

Introduction to major global food and nutrition issues, strategies used to address these problems, and commonly-used program impact theories and evaluation frameworks; application of evaluation methods and approaches to nutrition and food programs and policies. Prerequisite: PUBH 6437.

PUBH 6491. Public Health Leadership Seminar. 1 Credit.

Leadership lessons derived from the careers of a diverse group of successful executives and entrepreneurs from multiple sectors, including corporate, government, nonprofit, and the arts. Development of skills for effective engagement with peers, personal network, potential employers, and business partners. Permission of the faculty member required prior to enrollment.

PUBH 6492. Global Health Programs and Approaches to the Control of Chronic Diseases. 2 Credits.

Concepts, methods, and tools to address chronic non-communicable diseases (NCDs); global public health and development dimension of NCDs, their epidemiology and risks, and health systems approaches for their control with focus on low- and middle-income countries. Prerequisites: PUBH 6002, PUBH 6003 and PUBH 6400.

PUBH 6493. Fundamentals of Supply Chain Management in Developing Countries. 2 Credits.

Practical approaches used by government policymakers, essential drugs program managers, NGOs, donors, and others to ensure that high-quality essential drugs are available, affordable and used rationally; existing and potential challenges and workable solutions related to managing the drug supply in developing countries. Restricted to graduate students.

PUBH 6494. Population, Public Health Practice, and Sustainable Development. 2 Credits.

The reciprocal connections between the dynamics of population growth, distribution, and age structure to health, well-being, and socioeconomic development.

PUBH 6495. Field Trial Methods and Application. 2 Credits.

Concepts, methods, and tools necessary to conduct community-based randomized trials in low- and middle-income country settings; the process of running a randomized field trial from selecting a topic, through implementation, to analysis and reporting. Most appropriate for students in their second year of study. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6499. Topics in Global Health. 3 Credits.

Examination of a particular facet of public health. Topics vary by semester. May be repeated for credit provided topic differs. See the Schedule of Classes for more details.

PUBH 6500. Planning and Implementing Health Promotion Programs. 3 Credits.

Students develop skills to effectively plan, design, and implement programs that address public health problems for defined populations in a variety of settings. Prerequisite: PUBH 6007.

PUBH 6501. Program Evaluation. 3 Credits.

The knowledge, competencies, and skills needed to plan and implement evaluations of public health programs in a variety of settings; types of program evaluation, including needs assessment, process evaluation, quantitative and qualitative monitoring of outputs, outcomes, and impact. Prerequisites: PUBH 6002, PUBH 6003 and PUBH 6007; and PUBH 6435 or PUBH 6500.

PUBH 6502. Practical Data Analysis for Prevention and Community Health. 1 Credit.

Practical aspects of dataset creation, data management, rudimentary statistical analysis and tabular/graphical presentation of results in the user-friendly environments of PASW (formerly SPSS) and MS Excel. Students create codebooks, enter and clean data, derive new variables from existing ones, choose appropriate analytical techniques and implement them, graph and tabulate results, and document and protect work. Examples are drawn from commonly-encountered situations in prevention and community health, such as needs assessments and program evaluations. Prerequisites: PUBH 6002, PUBH 6003 and PUBH 6500.

PUBH 6503. Introduction to Public Health Communication and Marketing. 3 Credits.

The application of health communication theories, principles and techniques, as well as marketing constructs and concepts, to advancing public health through practitioner-oriented health communication and social marketing campaigns and programs.

PUBH 6504. Social and Behavioral Science Research Methods. 3 Credits.

The processes of study design, data collection, and analysis using SPSS for quantitative research in prevention and community health. All phases of the observational/survey research process considered sequentially, from formulation of research questions to preparation of the final report. Prerequisites: PUBH 6002 and PUBH 6007; or permission of the instructor.

PUBH 6508. Cost-Effectiveness Analysis of Health Promotion Interventions. 3 Credits.

Theoretical basis for and practical skills needed to estimate the effectiveness, population impact, and cost of health promotion interventions; application to policy and cost-effectiveness and cost-utility analyses. Familiarity with basic algebra and statistics is assumed. Prerequisites: PUBH 6002 and PUBH 6003; and PUBH 6006 or PUBH 6012.

PUBH 6510. Community-Oriented Primary Care Principles and Practice. 3 Credits.

Theory and practice of community-oriented primary care, including an extended small group exercise carrying out a COPC project with a simulated community using Web-based data sets.

PUBH 6512. Community-Oriented Primary Care Policy and Issues. 2 Credits.

Advanced work on COPC methods and policy, focusing on issues related to the provision of health care in underserved communities. Prerequisite: PUBH 6510.

PUBH 6513. Community Health Management. 2 Credits.

Management and development of community health services. Builds upon principles for management and community-oriented primary care. Prerequisites: PUBH 6003 and PUBH 6510.

PUBH 6514. Preventing Health Disparities. 2 Credits.

Provides students with an understanding of how social, political, and economic factors contribute to disparities (e.g. racial, ethnic, gender, and geographical) in health and health care and how to use evidence-based approaches to prevent or address health disparities.

PUBH 6515. High Risk and Special Populations. 2 Credits.

Provides students with an overview of the methods to plan, implement and evaluation health promotion and education programs targeted towards high risk and special populations. The course reviews the socioeconomic, political-economic, cultural and psychosocial factors of populations who are considered to be at high risk for specific health problems and efforts that have been addressed in current health promotion programs. Prerequisite: PUBH 6007.

PUBH 6516. Community Health Information Resources. 2 Credits.

COPC and community health promotion require diverse information skills in order to assess community needs and strengths, determine priority health issues, analyze data, plan interventions, and evaluate programs. This course introduces students to the information resources useful in planning and implementing COPC and community health projects that address racism. The selected resources support methods for defining a community, characterizing a community's social and health characteristics, investigating a prioritized problem, and developing programs and solutions. Students learn how to choose resources, search them, and consider bias in information sources.

PUBH 6530. Qualitative Methods in Health Promotion. 2 Credits.

Application of qualitative methods in the development of health promotion interventions, evaluations, and research. Collecting and analyzing qualitative data through participant observation, interviewing, group methods, and case studies. Prerequisite: PUBH 6007.

PUBH 6531. Health Promotion in Health Care Settings. 2 Credits.

Behavioral change counseling and training skills to improve health by changing individuals' behaviors and by developing training materials for use with providers, health professionals and high risk groups. This is an advanced course for second year students. Prerequisites: PUBH 6007 and PUBH 6500.

PUBH 6532. Community Organization, Development, and Advocacy. 3 Credits.

Educates health promotion practitioners in how to organize community groups to promote health. The focus is on learning how to use resources available in the community to advocate change. Prerequisite: PUBH 6007.

PUBH 6533. Design and Conduct of Community Health Surveys. 2 Credits.

This course teaches students how to frame questions in health promotion surveys using sound principles of questionnaire design with emphasis on reliability and validity. Students learn survey design principles and methods and how to analyze survey data.

PUBH 6534. Community-Based Participatory Research. 1 Credit.

Students learn how to conduct community research in collaboration with community leaders and residents. Emphasizes the principles of CBPR for addressing health promotion issues in communities including community needs and administrative and policy changes.

PUBH 6535. Promotion of Mental Health. 2 Credits.

Increases understanding about issues in mental health promotion. The emphasis is on mental health as a public health issue and linkages between individual mental health and the environment. Prerequisite: PUBH 6007.

PUBH 6536. Workplace Health Promotion. 2 Credits.

Planning, management and evaluation of programs designed to serve employees' needs, promotion of employee health and reduction of health care costs in the workplace. Prerequisite: PUBH 6007.

PUBH 6537. Health Promotion and Aging. 2 Credits.

Introduces students to the basic health aspects of the aging process and special health promotion needs for this group. Problems of aging and public health solutions for older Americans are examined. Students are able to define the public health concerns for aging Americans, how aging is affected by a multitude of factors, identify health promotion strategies to assist in reaching out to this population and develop methods of collaboration with agencies and organizations to improve the health of the aging population. Prerequisite: PUBH 6007.

PUBH 6550. Maternal and Child Health I. 3 Credits.

Public health issues affecting the health and well-being of women, children, and families. A multidisciplinary perspective that integrates the biological, demographic, epidemiological, economic, behavioral, social, cultural and environmental aspects.

PUBH 6551. Maternal and Child Health II. 3 Credits.**PUBH 6552. Women's Health. 2 Credits.**

Issues of women's health through the life cycle. The process of critically evaluating women's health research and issues.

PUBH 6553. Adolescent Health. 2 Credits.

Issues of physical, mental, and social development and their bearing on the health of adolescents, with special emphasis on prevention.

PUBH 6554. Children and Youth with Special Needs. 2 Credits.

In order to place children and youth with special needs into a public health framework, this course presents an introduction to and an overview of children and youth with special needs due to a developmental disability. Many aspects of developmental disability are addressed including 'concept' and definitions of disability, causes, epidemiological considerations, and development of federal legislation. The scope and range of developmental disabilities are reviewed along with classification schemes. Both national and international distributions are considered from a sociopolitical viewpoint.

PUBH 6555. Reproductive Health: U.S. and Global Perspectives. 2 Credits.

Reproductive health from a variety of public health perspectives, from defining reproductive health, past perspectives, needed improvements, and the factors that influence reproductive health.

PUBH 6556. Maternal and Child Nutrition. 2 Credits.

Covers the nutritional needs of women during the child bearing years, infants, children and adolescents. The course emphasizes the life course approach to nutrition and has a special emphasis on the effects of diet during infancy on obesity and degenerative diseases in later life. Students examine the biological basis of nutrition, identify risk factors associated with poor nutrition in individuals and populations and evaluate domestic and international programs. Summer (1 credit) and Spring (2 credits).

PUBH 6557. Child Development and Public Health. 2 Credits.

Examination of the development of children from a public health perspective and provide a detailed examination of the indicators of children's health that are needed to assist public health professionals improve children's health.

PUBH 6558. Women, Gender, and Health. 2 Credits.

Focuses on gender as a social determinant of health. Emphasis placed on examining the frameworks that are used in public health research to understand gender-based issues and how these frameworks affect the types of programs and intervention efforts developed.

PUBH 6559. HIV Prevention: An Interdisciplinary Approach. 2 Credits.

Provides an interdisciplinary overview of HIV prevention research from the behavioral, biological and biomedical perspective. Students are encouraged to approach the assignments and discussions from their own particular expertise and career interests/goals.

PUBH 6560. School Health and Safety. 1,2 Credit.

Examines the history, organization, financing, and politics of school health programs. It provides an overview of the core components of school health as defined by the Center for Disease Control and Prevention: health services, health education, physical education, nutrition services, counseling or mental health, school environmental health, health promotion, and family/community involvement. Summer (1 credit); Spring (2 credits).

PUBH 6561. Maternal and Child Health Policy Analysis. 2 Credits.

Provides instruction in maternal and child health policy in the U.S. with a particular emphasis on policies related to the organization, financing, delivery, and quality oversight of personal health services for mothers and children.

PUBH 6562. Physical Activity and Obesity Interventions: From the Individual to the Environment. 2 Credits.

This course broadly examines the public health issues related to physical activity and obesity, particularly as they relate to solutions for addressing individual factors and the obesogenic environment. Students gain a further understanding of the social, physiological, behavioral, and environmental factors related to both obesity and physical activity. The course focuses on examining multiple levels of solutions, specifically: 1) individual and behavioral interventions; 2) school-based and community-level interventions; 3) environmental interventions; 4) policy-level interventions. Students are expected to critically evaluate the necessary components of interventions, and apply that knowledge to future programmatic efforts.

PUBH 6563. Global Child Health. 2 Credits.

Elements of science, policy, challenges, and successes of global child health; focus on low and middle income countries and children under five years of age. Learn the burden of disease and associated risk factors; cost-effective interventions and tools. Restricted to graduate students.

PUBH 6570. Advanced Public Health Communication: Theory and Practice. 3 Credits.

Focuses on the use of communication to positively influence people's – and population's – understanding of health information, decision-making, and health behavior. Students study, and in a group project apply, a range of theories and techniques germane to effective message design and delivery. Prerequisite: PUBH 6503.

PUBH 6571. Social Marketing: Theory and Practice. 3 Credits.

The use of marketing to change the behavior of people, populations, and policy makers in ways that are in their, and society's, best interests. Students in this skills-based course study and work in teams to apply a range of marketing strategies to a real-world situation. Prerequisite: PUBH 6503.

PUBH 6572. Marketing Research for Public Health. 3 Credits.

The use of marketing research techniques used to better understand customers of public health programs in order to improve program design, implementation, and effectiveness. A range of qualitative and quantitative techniques are studied for their relevance to program planning, development, and continuous improvement.

PUBH 6573. Media Advocacy for Public Health. 3 Credits.

Focuses on the use of communication to positively influence public policy and public opinion. In this skills-based course students study and apply a range of theories and techniques germane to the policy advocacy process. Prerequisite: PUBH 6503.

PUBH 6574. Public Health Branding: Theory and Practice. 2 Credits.

This course focuses on the use of branding in the public health and social sectors. Learning from the commercial sector, we examine how to brand behaviors as well as products and services. We review branding methods, examine research on branding and its effectiveness, and build skills in branding for public health objectives.

PUBH 6575. Communication Skills for Public Health Professionals. 1 Credit.

Helps students develop writing and oral presentation skills through intensive, interactive training, practice, and feedback. Provides participants with a solid foundation for all forms of public health and other scientific and technical written and oral communication.

PUBH 6590. Introduction to Social Entrepreneurship. 2 Credits.

Examine innovative organizations created to improve people's lives and contribute to improved social and economic conditions. Emphasis on how such organizations are started, how they are sustained, and the various business models that are adopted to achieve an organizational mission.

PUBH 6591. PA/MPH Clinical Leadership Seminar. 1 Credit.

For first-year physician assistant and master of public health program students, an orientation to their roles as health professionals. Special emphasis on preventive and community medicine.

PUBH 6599. Topics in Prevention and Community Health. 1-3 Credits.

In-depth examination of a particular facet of prevention and community health. Topics and prerequisites vary.

PUBH 6610. Public Health Nutrition Practice and Leadership. 1 Credit.

This course provides an overview of public health nutrition practice. Students develop communication, management and leadership skills necessary for successful careers. Students also explore potential practicum and culminating experience options, and how to use these experiences to achieve their career goals. This course is designed for first year students in the public health nutrition MPH program.

PUBH 6611. Nutrition Assessment. 2 Credits.

The anthropometric, biochemical, clinical, and dietary methods for assessing nutritional status in individuals. The process of conducting food and nutrition environment assessments. Prerequisites: EXNS 2119 or PUBH 6619; or other equivalent course with permission of the instructor.

PUBH 6612. Food Systems in Public Health. 2 Credits.

A systems approach to understanding food systems and associated public health issues. How the current food system evolved, and how issues such as climate change and population growth may affect food systems in the future. The role of public health practitioners in meeting the population's need for safe, sufficient, and nutritious food. Policies, programs, and proposals aimed at creating healthier, more sustainable food systems.

PUBH 6613. U.S. Food Policy and Politics. 2 Credits.

The programs, regulations, and legislation that pertain to food production, food safety, nutrition assistance, and dietary guidance in the United States at the federal, state, and local levels.

PUBH 6619. Fundamentals of Nutrition Science. 3 Credits.

The fundamental scientific principles of human nutrition; improving diet and nutritional status in the broader context of public health; nutrition assessment, study designs in nutrition science research, the role of nutrition in chronic disease, and current topics in nutrition science.

PUBH 6620. Designing Healthy Communities. 2 Credits.

Issues at the intersection of public health and planning; evaluating needs and creating change in communities facing food access, physical activity, and age related challenges; the built environment as a means of improving health and preventing chronic disease.

PUBH 6621. Applied Data Analysis in Exercise and Nutrition Sciences. 1 Credit.

Introduction to data management and data analysis using the SAS System; data analysis procedures for specific research questions and settings within the context of exercise and nutrition sciences. Restricted to students in the MPH in physical activity in public health program, program design and evaluation track, or with the permission of the advisor. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6682. Managing Natural Resources for Food Production. 3 Credits.

The relevance of natural resource conservation for ensuring healthy agricultural, food, and environmental systems; various approaches to achieving sustainable systems. Restricted to students in the graduate certificate in food policy leadership program.

PUBH 6683. Applied Food Policy Immersion Experience. 2 Credits.

Leadership theories and an opportunity to build leadership skills and engage with food policy and agriculture leaders from a variety of sectors. Includes site visits to public and private organizations significant in food policy. Restricted to students in the graduate certificate in food policy leadership program. Prerequisites: PUBH 6680 and PUBH 6682.

PUBH 6699. Topics in Nutrition Sciences. 3 Credits.

Examination of a particular facet of nutrition sciences. Topics vary by semester. May be repeated for credit provided topic differs. See the Schedule of Classes for more details.

PUBH 6704. Health Information Technology, Informatics, and Decision Making. 3 Credits.

Operationalizing fundamental technology, processes, policies and concepts of healthcare informatics and decision management to translate data into actionable information within the framework of improving quality, safety, productivity, and experience.

PUBH 6706. Population and Community Health Analytics. 3 Credits.

Overview of the concepts of population and community health, the informatics and analytics necessary to assess population health, and best approaches for decision makers and policy makers using and communicating population and community health data.

PUBH 6850. Introduction to SAS for Public Health Research. 1 Credit.

Conducting basic data management tasks with SAS software; creating libraries, data sets, and variables, and generating basic descriptive statistics and simple graphics of public health and biomedical data.

PUBH 6851. Introduction to R for Public Health Research. 1 Credit.

Read, clean, transform, tidy, and summarize public health data in R. Explore data and write R functions to make workflow more efficient.

PUBH 6852. Introduction to Python for Public Health Research. 1 Credit.

Introduction to the basic concepts of Python programming language, illustrated with applications in biomedical sciences and health informatics.

PUBH 6853. Use of Statistical Packages for Data Management and Data Analysis. 3 Credits.

Data management and data analysis using statistical software. Creating and manipulating variables, merging and concatenating data sets, and implementing common statistical methods such as Student's t-test, linear regression, and logistic regression. Prerequisites: PUBH 6002.

PUBH 6854. Applied Computing in Health Data Science. 3 Credits.

Concepts of computing in biomedical sciences and health informatics. Foundations of Unix shell, command line tools, R and Python programming languages, and their applications in public health. PUBH 6860 may be taken simultaneously. Prerequisites: PUBH 6860. Credit cannot be earned for this course and PUBH 4201.

PUBH 6856. Advanced SAS for Public Health Research. 1 Credit.

Advanced SAS programming. Interactive Matrix Language, SAS macro facility, Structured Query Language, and SAS/GRAPH options for creating drill-down graphs to analyze public health data sets. Prerequisites: PUBH 6002; and PUBH 6249 or PUBH 6853; or permission of the instructor. Credit cannot be earned for this course and PUBH 6268.

PUBH 6859. High Performance and Cloud Computing. 3 Credits.

Introduction to high performance computing and cloud computing, including issues such as data transfer, security, virtual machines, and containers. HPC at GW, Amazon Web Services, and Google Cloud for biohealth computing. Prerequisites: PUBH 6851 and PUBH 6852 or permission of the instructor.

PUBH 6860. Principles of Bioinformatics. 3 Credits.

Biological concepts of molecular biology, genome organization, and evolution; computational concepts of alignment, database searching, phylogeny, and structure; and basic programming concepts including the shell, scripting, and databases. Prerequisites: PUBH 6002 or equivalent.

PUBH 6861. Public Health Genomics. 3 Credits.

Molecular technology and its impact on public health practice and discourse in the post-genomic era. The use of genomics to solve or help alleviate public health challenges. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6862. Applied Linear Regression Analysis for Public Health Research. 3 Credits.

Review of basic statistical inference and an overview of the construction of linear regression models for application to public health and biomedical data sets. Prerequisites: Prior completion of a course in undergraduate statistics and one semester of calculus.

PUBH 6863. Applied Meta-Analysis. 1 Credit.

Examination of meta-analysis (MA) with case studies using R. Statistical methods, including fixed- and random-effects MA; MA for binary and continuous data; heterogeneity in MA; meta-regression; and publication bias. Recommended background: Prior completion of an introductory course in biostatistical methods, such as PUBH 6002 or PUBH 6003, or an equivalent, is strongly recommended.

PUBH 6864. Applied Survival Analysis for Public Health Research. 3 Credits.

Application of survival or time-to-event data in public health studies. Censoring, survival functions, Kaplan-Meier curves, log-rank tests, Cox proportional hazards regression, parametric survival models, recurrent events, and competing risks. Prerequisites: PUBH 6249 or PUBH 6853. Recommended background: undergraduate calculus.

PUBH 6865. Applied Categorical Data Analysis. 3 Credits.

Comprehensive overview of methods for analyzing binary and multicategory response data. Contingency table methods for assessing associations and logistic regression for binary, nominal, and ordinal outcomes, including models for matched data. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6866. Principles of Clinical Trials. 3 Credits.

Introduction to basic principles for design, conduct, analysis, and reporting of clinical trials. Developing a proposal for a clinical trial. Prerequisites: PUBH 6002 or equivalent.

PUBH 6868. Quantitative Methods. 3 Credits.

Basic mathematical statistics: probability, fundamental distributions including binomial, Poisson and normal, central limit theorem, consistency, basic point estimation, hypothesis testing, linear models, and maximum likelihood estimation. Prerequisites: PUBH 6002 and prior completion of at least two courses in single variable calculus. Corequisites: PUBH 6249 or PUBH 6853.

PUBH 6869. Principles of Biostatistical Consulting. 1 Credit.

Principles and practice of biostatistical consulting and related skills and knowledge for public health and medical research environments. Recommended background: Prior completion of at least two graduate-level courses in statistics and an introductory course that discusses common health research designs, such as PUBH 6003, or their equivalent is strongly recommended. Credit cannot be earned for this course and PUBH 6258.

PUBH 6879. Propensity Score Methods for Causal Inference in Observational Studies. 3 Credits.

Designing observational studies; drawing causal inferences using propensity score methods; and performing propensity score analysis using R with hands-on data. Prerequisites: PUBH 6851 and PUBH 6865 or permission of the instructor.

PUBH 6883. Biostatistics Consulting Practicum. 1 Credit.

Supervised experiences involving the synthesis of biostatistical skills with consultations in one or more areas of health research. Students in the MPH programs in biostatistics and in epidemiology may register with permission of the instructor. Restricted to students in the MS in biostatistics and MS in epidemiology programs. Recommended background: Prior completion of at least two graduate-level courses in statistics and an introductory course that discusses common health research designs, such as PUBH 6003, or their equivalent is strongly recommended.

PUBH 6884. Bioinformatics Algorithms and Data Structures. 3 Credits.

Algorithmic foundations of bioinformatics, ranging from generic algorithmic techniques to specific algorithms used in various areas of bioinformatics. Theoretical background is complemented with solving practical problems. Prerequisites: PUBH 6854 or equivalent. Credit cannot be earned for this course and PUBH 4202.

PUBH 6885. Computational Biology. 3 Credits.

Introduction to modern computational biology, including omics data science, high-throughput technologies, multi-omics data integration, and analytical methods with real-world applications. Permission of the instructor is required prior to enrollment.

PUBH 6886. Statistical and Machine Learning for Public Health Research. 3 Credits.

Application and evaluation of supervised and unsupervised statistical and machine learning algorithms in the context of biomedical and public health research. Permission of the instructor is required prior to enrollment.

PUBH 6887. Applied Longitudinal Data Analysis for Public Health Research. 3 Credits.

Introduction to commonly used methods for longitudinal data analysis including fixed effects models, linear and generalized linear mixed effects models, and generalized estimating equations. Missing data. Prerequisites: PUBH 6862 and PUBH 6965; and PUBH 6868, or PUBH 8364, or STAT 6201 and STAT 6202.

PUBH 6894. Research Analytics. 3 Credits.

Key concepts in research analytics; skills and experiences needed to leverage big data to improve public health through data integration.

PUBH 6897. Research in Biostatistics and Bioinformatics. 1-4 Credits.

Independent research. Must be approved in advance by advisor/instructor. Restricted to graduate students in the Department of Biostatistics and Bioinformatics.

PUBH 6898. Master of Science Thesis. 1-2 Credits.

Master's thesis.

PUBH 6899. Topics in Biostatistics and Bioinformatics. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details.

PUBH 6999. Master of Science in Epidemiology Thesis. 2 Credits.

Thesis research. Restricted to students in the MS in epidemiology program.

PUBH 8010. Doctoral Independent Study. 1-3 Credits.

Doctoral students complete an independent study plan to meet predetermined project and/or research work under the supervision of a faculty member. Restricted to GWSPH doctoral students.

PUBH 8110. Research Rotations. 2 Credits.

Students conduct formal rotations with a laboratory or research group to gain research and reporting experience with the mentorship of EOH faculty. Includes identification of an environmental health research problem, collection or analysis of data, and reporting on the results. May be repeated for credit. Restricted to students in the PhD in environmental program or with the permission of the instructor.

PUBH 8116. Communicating Research Results. 2 Credits.

The importance of strategic communication to public health progress. Students gain communication skills that help to transcend educational barriers and facilitate connections with peers, policymakers, and the broader public. Restricted to doctoral students who have satisfactorily completed the comprehensive examination or with the permission of the dissertation chair.

PUBH 8144. Advanced Environmental Health Data Development and Modeling. 1 Credit.

Advanced doctoral level material on environmental exposure assessment using methods covered in PUBH 6144. Restricted to doctoral candidates. Prerequisites: PUBH 6131 or PUBH 6853. Corequisites: PUBH 6144.

PUBH 8242. Advanced Topics in Clinical Epidemiology and Public Health: Reading the Research. 1 Credit.

Evidence-based problem-solving approach using methods covered in PUBH 6242. Restricted to doctoral students. Prerequisites: PUBH 6003 or equivalent. Corequisites: PUBH 6242. Credit cannot be earned for this course and PUBH 6243.

PUBH 8244. Doctoral Topics: Cancer Epidemiology. 1 Credit.

Course focuses on critical review and interpretation of cancer epidemiology literature as well as issues in research design in the field. Prerequisites: PUBH 6001 and PUBH 6003. Corequisites: PUBH 6244.

PUBH 8245. Doctoral Topics: Infectious Disease Epidemiology. 1 Credit.

Provides doctoral level material on the content of infectious disease epidemiology. The course focuses on critical review and interpretation of infectious disease literature as well as issues preparing an analytic research paper on an emerging infectious disease and the application of tools used to describe the epidemiology of those diseases. Spring Prerequisites: PUBH 6003. Corequisites: PUBH 6245.

PUBH 8250. Doctoral Topics: Epidemiology of HIV/AIDS. 1 Credit.

Students select specific topic within area of HIV/AIDS epidemiology. Options include responding to a data analysis problem; responding to a methodological problem found within HIV/AIDS research; or another topic approved by instructor. Prerequisites: PUBH 6001 and PUBH 6003. Corequisites: PUBH 6250.

PUBH 8259. Doctoral Topics: Epidemiologic Surveillance in Public Health. 1 Credit.

Course provides doctoral level material on the content of surveillance offered in PUBH 6259. Focus is on critical review and interpretation of surveillance literature as well as issues preparing an analytic research paper. Prerequisites: PUBH 6002 and PUBH 6003. Corequisites: PUBH 6259.

PUBH 8283. Doctoral Biostatistics Consulting Practicum. 2 Credits.

Working under supervision, students develop an experience-based understanding of how biostatistical skills are used in one or more areas of health research. Students must have completed at least 6 credits in any combination of general or specialized graduate-level statistics courses, such as PUBH 6202, PUBH 6260, STAT 6201, or STAT 6202, before enrolling in this course. Restricted to PhD students.

PUBH 8364. Quantitative Methods. 3 Credits.

Introduces basic concepts in mathematical statistics. Topics include probabilities (unconditional and conditional), density and distribution functions of continuous and discrete random variables, including expected values. Specific distribution functions discussed are Binomial, Poisson, Hypergeometric, and Gaussian distributions. Additional topics include bivariable distributions, variance-covariance matrix, limiting theory, asymptotic results, and maximum likelihood estimation. Prerequisites: MATH 1231 and MATH 1232; and PUBH 6002 and PUBH 6249.

PUBH 8365. Design of Medical Studies. 3 Credits.

Design of medical investigations, including the randomized clinical trial, observational cohort study, and the retrospective case-control study. Specific methods regarding sample size, power and precision and statistical procedures for randomization and sampling. Ethics of clinical trials and the intention-to-treat principle. Prerequisite: PUBH 6002.

PUBH 8366. Biostatistical Methods. 3 Credits.

Biostatistical methods for asymptotically efficient tests and estimates of relative risks and odds ratios from prospective and retrospective matched and unmatched studies. Fixed and random effects models. Logistic regression, conditional logistic regression. Poisson regression. Maximum likelihood and efficient scores. Prerequisites: STAT 6202 or permission of the instructor.

PUBH 8401. Foundations in Public Health Leadership. 3 Credits.

Course modules cover personal leadership; leadership models, theories, concepts, tools, and skills; and practical application of leadership to real world situations. Restricted to doctoral candidates.

PUBH 8402. Leadership and Decision Making: Skills Based Approach. 2 Credits.

Using leadership and decision making skills to solve complex health problems and implement successful solutions to improve population health in all communities; decision making, program management, quality and risk management, human resources and budget, governance, and change management.

PUBH 8403. Leadership in Public Health Policy and Practice. 2 Credits.

Students work in teams on projects for clients from public health-related agencies or organizations in the Washington, DC, area that address issues in environmental and occupational health, global health, health behavior, and health policy. Restricted to students in the DrPh program. Prerequisite: PUBH 8402.

PUBH 8404. Advanced Topics: Health Systems and Health Policy Research. 3 Credits.

Examination and assessment of issues related to the intersection of health care systems and health policy, and how health policy and health services research can inform the development and evaluation of health care systems and health policy. Restricted to doctoral candidates. Prerequisite: PUBH 6315.

PUBH 8405. Advanced Topics: Health Economics Research. 3 Credits.

Critical financing issues for U.S. public health and health care services and systems. The role of health services research in understanding the effects of these issues and informing the deliberations and decisions of policymakers.

PUBH 8406. Advanced Topics: Health Research in the Global Arena. 3 Credits.

Alternative field methods adopted from sociology, anthropology, economics, and political sciences for social sciences and policy research. Builds data collection, instruments, measurements, indicators, and data analysis and interpretation skills in specific socio-cultural contexts. Ethical issues in international research.

PUBH 8407. Advanced Topics: Health Leadership in International Settings. 3 Credits.

Doctoral students develop the tools and experiences needed to build capacity for leadership in global health. Prerequisite: PUBH 8406.

PUBH 8408. Advanced Topics: Health Behavior Research & Practice Applications. 3 Credits.

Advanced topics relating theory to practice in areas of health education and behavioral change. Application of qualitative and quantitative research to health related behavior at individual and community levels.

PUBH 8409. Advanced Topics: Health Communication Research. 3 Credits.

Methods of communications research designed to alter health behavior. Emphasis on critical analysis of communications research aimed at the mass public, groups, and interpersonal level.

PUBH 8411. Advanced Topics: Principles of Human Health Risk Science. 3 Credits.

This course provides the doctoral student with a comprehensive orientation to the frameworks, principles and issues involved in assessing, managing and communicating environmental health risks. This fundamental, interdisciplinary course is designed to foster dialogue and insights about contemporary risk science and management issues, including ethical concerns and technical issues that influence policy making. Restricted to students in the environmental and occupational health program, or with permission of the instructor.

PUBH 8412. Advanced Topics: Environmental and Occupational Health Research and Practice. 3 Credits.

This course exposes students to the theory and reality of both research and practice in environmental and occupational health. There is an emphasis on the use of public health science in policy and regulatory decisions. Prerequisites: PUBH 8411 or permission of the instructor.

PUBH 8413. Research Leadership. 1-10 Credits.

Students participate in a range of activities designed to develop and enhance their research methods and analytic skills. These activities include participating in the development and submission of sponsored research proposals; being formally affiliated with a research project, assuming responsibility for completing a real-world research project; engaging in empirical data collection and analysis efforts.

PUBH 8414. Policy and Management Leadership. 1-10 Credits.

Students develop and enhance their management, leadership, and policymaking skills for problem solving in real-world settings; public health departments, community health centers, legislative settings, and public or teaching hospitals.

PUBH 8415. Instructional Leadership. 1-10 Credits.

Students participate in a range of activities designed to develop and enhance their teaching skills. These activities include course development, teaching master's level courses, acting as TA for undergraduate courses, advising students about their class performance, evaluating student performance, and developing remedial programs for students.

PUBH 8416. Study Design & Evaluation Methods. 3 Credits.

Prepares doctoral students to design and conduct program and policy evaluation in public health. Intensive introduction to the principles of study program design and evaluation research emphasizing the ability to synthesize the population-based intervention literature, apply planning and management methods, describe and apply research methods from a range of disciplines, and prepare a program research proposal.

PUBH 8417. Qualitative Research Methods and Analysis. 3 Credits.

Techniques for designing and conducting qualitative research and for analyzing and reporting qualitative data relevant to program development and implementation, community assessment, and policy analysis. Prerequisites: PUBH 8416.

PUBH 8418. Applied Statistical Analysis. 3 Credits.

Intensive course in data management and data analysis using STATA®. Database management system techniques and data analytical strategies for the appropriate analysis of data sets obtained from a variety of studies will be presented. The student will manipulate national data sets from epidemiological studies as well as Demographic and Health Survey (DHS) data. Prereq: PUBH 8416.

PUBH 8419. Measurement in Public Health and Health Services. 3 Credits.

Review principles of measurement and assessment as they apply to public health and health services research constructs, review existing state-of-the-art measures of individual and population health status (e.g., morbidity, mortality, functioning and health-related quality of life) and of individual and community health behavior. Explore current measurement issues in health research.

PUBH 8420. Advanced Analysis and Dissemination. 3 Credits.

Advanced multivariate data analyses of complex datasets and programs, including advanced cross-sectional techniques, time-series analysis, and the use of panel data. Evaluation of results, and dissemination of findings to relevant stakeholders. Fall. Prerequisites: PUBH 8417 and PUBH 8418.

PUBH 8422. Advanced Health Care and Public Health Research Design. 2 Credits.

Design of protocol suitable for implementation as part of DrPH dissertation requirement. Permission of the instructor, completion of required coursework, and successful completion of the comprehensive examination required prior to enrollment.

PUBH 8423. Dissertation Research. 1-12 Credits.

Dissertation research for DrPH. Prerequisite: PUBH 8422.

PUBH 8434. Behavioral Medicine and Public Health. 3 Credits.

Investigation into the field of behavioral medicine, which integrates behavioral, psychosocial, and biomedical sciences, with specific applications to public health. Restricted to PhD students in the social and behavioral sciences in public health program or with the permission of the instructor.

PUBH 8435. Dissertation Proposal Development for Social and Behavioral Sciences. 2 Credits.

Advise and assist doctoral students in developing and defending their dissertation proposal. Restricted to doctoral students who have successfully completed comprehensive examinations.

PUBH 8610. Statistical Methods for Health Policy. 3 Credits.

Application of statistical analysis in health policy and public health research using Stata® to analyze a variety of large public health data sets. Prior completion of at least one graduate-level statistics course is required. Restricted to doctoral students. Credit cannot be earned for this course and PUBH 6310.

PUBH 8620. Seminar: Foundations of U.S. Health Policy. 3 Credits.

Reintroduction to the basics of U.S. health policy, combining advanced legal, policy, and regulatory content acquisition with advanced health law and policy analysis skills. Restricted to doctoral students in health policy or with the permission of the instructor.

PUBH 8622. Health Care Payments, Systems, and Delivery Models. 3 Credits.

Survey of long-standing practices and recent developments in provider payment and the organization of health care delivery in the United States. Restricted to doctoral students in the health policy program or with the permission of the instructor.

PUBH 8875. Linear Models in Biostatistics. 3 Credits.

Introduction to the theory of linear models with applications to public health and biomedical data. Least squares, maximum likelihood, and distribution theory for linear regression. Prerequisites: PUBH 6862; and PUBH 6868 or PUBH 8364 or STAT 6201. Corequisites: STAT 6202. Recommended background: prior completion of coursework in linear algebra and multivariable calculus.

PUBH 8877. Generalized Linear Models in Biostatistics. 3 Credits.

Theoretical development of most commonly used methods for categorical and count data presented within the unified framework of the generalized linear model. Prerequisites: PUBH 6865; and PUBH 6868, or PUBH 8364, or STAT 6201 and STAT 6202. Recommended background: prior completion of coursework in linear algebra.

PUBH 8878. Statistical Genetics. 3 Credits.

Application of statistical concepts to family- and population-based genetic data. Human evolution, genome-wide association studies, gene-environment interactions, and genetic architecture with emphasis on applications to real data and analyses. Prerequisites: PUBH 6860.

UNDERGRADUATE PROGRAMS

Bachelor's programs

- Bachelor of Science with a major in exercise science (p. 1304)
- Bachelor of Science with a major in exercise science, pre-athletic training/sports medicine concentration (p. 1307)
- Bachelor of Science with a major in exercise science, pre-medical professions concentration (p. 1310)
- Bachelor of Science with a major in exercise science, pre-physical therapy concentration (p. 1313)
- Bachelor of Science with a major in nutrition science (p. 1316)
- Bachelor of Science with a major in nutrition science, pre-medical professions concentration (p. 1319)
- Bachelor of Science with a major in public health (p. 1322)
- Bachelor of Science with a major in public health, pre-medical professions concentration (p. 1324)

Combined program

- Dual Bachelor of Science in nutrition science and Master of Public Health in public health nutrition (p. 1327)
- Dual Bachelor of Science in public health and Master of Public Health

Minors

- Minor in bioinformatics (p. 1327)
- Minor in exercise science (p. 1328)
- Minor in nutrition science
- Minor in public health

BACHELOR OF SCIENCE WITH A MAJOR IN EXERCISE SCIENCE

Program Director B. Westerman

The bachelor of science with a major in exercise science degree program prepares individuals for careers in medicine and other health related professions including athletic training/sports medicine, physical therapy, physician's assistant or nursing, exercise physiology and rehabilitation, sport psychology as well as fitness and health promotion.

Students in the exercise science major may select the pre-medical professional concentration (for those planning to enter a medical, physician assistant, or nursing program upon graduation), the pre-physical therapy concentration, or the pre-athletic training/sports medicine concentration. The exercise science major also may be taken without a concentration.

REQUIREMENTS

The following requirements must be fulfilled:

124 credits and maintenance of a minimum grade point average of 2.5 in the exercise science core requirements.

University General Education Requirement*

Code	Title	Credits
UW 1020	University Writing	
or HONR 1015	Honors Seminar: UW 1020: Origins and Evolution of Modern Thought	

Two writing in the disciplines (WID) courses (may also be counted in another category).

One critical or creative analysis in the humanities course.

One quantitative reasoning course. For exercise science and nutrition science majors, must be satisfied with STAT 1051 or STAT 1053 or STAT 1127 .

One scientific reasoning course with laboratory experience. For exercise science and nutrition science majors, must be satisfied with BISC 1111.

Two critical, creative, or quantitative analysis in the social sciences courses. For exercise science and nutrition science majors, must be satisfied with ANTH 1002, or ANTH 1003, or ANTH 1004; and COMM 1040 or COMM 1041.

A list of approved courses can be found on the University General Education Requirements (p. 42) page.

Exercise Science Core Requirements

Code	Title	Credits
Required (38 credits)		
EXNS 1103	Professional Foundations in Exercise Science	
EXNS 1110	Applied Anatomy and Physiology I	
EXNS 1111	Applied Anatomy and Physiology II	
EXNS 2111	Exercise Physiology I	
EXNS 2112	Exercise Physiology II	
EXNS 2113	Kinesiology

Note: LSPA courses do not count toward the academic requirements for the bachelor of science with a major in exercise science, pre-athletic training/sports medicine concentration.

BACHELOR OF SCIENCE WITH A MAJOR IN EXERCISE SCIENCE, PRE-MEDICAL PROFESSIONS CONCENTRATION

Program Director B. Westerman

The bachelor of science with a major in exercise science degree program prepares individuals for careers in medicine and other health related professions including athletic training/sports medicine, physical therapy, physician's assistant or nursing, exercise physiology and rehabilitation, sport psychology as well as fitness and health promotion.

Students in the exercise science major may select the pre-medical professions concentration (for those planning to enter a medical, physician assistant, or nursing program upon graduation), the pre-physical therapy concentration, or the pre-athletic training/sports medicine concentration. The exercise science major may also be taken without a concentration.

REQUIREMENTS

The following requirements must be fulfilled: 120 credits, including 19 credits in University General Education requirements, 30 credits in core public health courses, 3 credits in public health research methods courses, 12 credits in approved public health elective courses, and 56 credits in additional general electives. The pre-medical professional requirements may be fulfilled by either cross counting courses that also meet the University General Education requirements or through credits allotted to general electives.

University General Education Requirement

Code	Title	Credits
UW 1020	University Writing	
or HONR 1015	Honors Seminar: UW 1020: Origins and Evolution of Modern Thought	

Two writing in the disciplines (WID) courses (may also be counted in another category).

One critical or creative analysis in the humanities course.

One quantitative reasoning course. For exercise science and nutrition science majors, must be satisfied with STAT 1051 or STAT 1053 or STAT 1127 .

One scientific reasoning course with laboratory experience. For exercise science and nutrition science majors, must be satisfied with BISC 1111.

Two critical, creative, or quantitative analysis in the social sciences courses. For exercise science and nutrition science majors, must be satisfied with ANTH 1002, or ANTH 1003, or ANTH 1004; and COMM 1040 or COMM 1041.

A list of approved courses can be found on the University General Education Requirements (p. 42) page.

Exercise science core requirements

Code	Title	Credits
Required (38 credits)		
EXNS 1103	Professional Foundations in Exercise Science	
EXNS 1110	Applied Anatomy and Physiology I

BACHELOR OF SCIENCE WITH A MAJOR IN NUTRITION SCIENCE

Program Director A. Sylvestsky

Nutrition science is the study of how nutrients and food components influence growth, metabolism, health, and disease and also includes human behavior as it relates to food choices. It is a multi-faceted and cross-disciplinary field, encompassing chemistry, biology, physiology, and public health. Nutrition scientists work to develop, extend, and apply all aspects of nutrition through research to improve clinical practice and public health.

The mission of the bachelor of science with a major in nutrition science program is to provide undergraduate students with an in-depth understanding of the scientific aspects of food and nutrition. The program also aims to lay the groundwork for integrating nutrition science across disciplines and provides students with the foundation required to apply nutrition to the health sciences.

REQUIREMENTS

The following requirements must be fulfilled: 124 credits and maintenance of a minimum grade point average of 2.5 in the nutrition science core requirements.

BACHELOR OF SCIENCE WITH A MAJOR IN NUTRITION SCIENCE, PRE-MEDICAL PROFESSIONS CONCENTRATION

REQUIREMENTS

The following requirements must be fulfilled: 120 credits, including 19 credits in University General Education requirements, 31 credits in core public health courses including 3 credits in public health research methods courses, 12 credits in approved public health elective courses, and 58 credits in additional general electives. The pre-medical professional requirements may be fulfilled by either cross counting courses that also meet the University General Education requirements or through credits allotted to general electives

University General Education Requirement

Code	Title	Credits
UW 1020	University Writing	
or HONR 1015	Honors Seminar: UW 1020: Origins and Evolution of Modern Thought	

Two writing in the disciplines (WID) courses (may also be counted in another category).

One critical or creative analysis in the humanities course.

One quantitative reasoning course. For exercise science and nutrition science majors, must be satisfied with STAT 1051 or STAT 1053 or STAT 1127 .

One scientific reasoning course with laboratory experience. For exercise science and nutrition science majors, must be satisfied with BISC 1111.

Two critical, creative, or quantitative analysis in the social sciences courses. For exercise science and nutrition science majors, must be satisfied with ANTH 1002, or ANTH 1003, or ANTH 1004; and COMM 1040 or COMM 1041.

A list of approved courses can be found on the University General Education Requirements (p. 42) page.

Nutrition science core requirements

Code	Title	Credits
Basic math and science (34 credits)		
BISC 1111	Introductory Biology: Cells and Molecules	
BISC 1112	Introductory Biology: The Biology of Organisms

¹Students who have taken EXNS 1103 should not take EXNS 1109

²EXNS 3199 and EXNS 4199 count toward this requirement only when taken in the topics indicated. Credit for these courses may be applied toward the core course requirement or the guided electives requirement, but not both.

³The courses listed above under guided electives have been identified as highly relevant to the BS in Nutrition Science curriculum. 20 elective credits must be selected from this list. General electives (18 additional elective credits) may also be selected from this list, or they may be any other undergraduate course at the University except for LSPA courses.

⁴Only 3 credits taken in EXNS 3101, EXNS 3110, or EXNS 3995 count toward the guided electives requirement. Additional credits in these courses count as general electives.

Note: Courses offered online may be taken in the summer session only.

BACHELOR OF SCIENCE WITH A MAJOR IN PUBLIC HEALTH

Program Director E. Gray

The bachelor of science with a major in public health degree program is intended to convey to students technical detail and analytic skills with a liberal arts philosophical base. It has the educational objectives of nurturing critical thinking, analysis, and synthesis of information, and recognizing the historical and societal associations of current trends in public health and health care delivery. While nurturing students' capacity to think analytically and creatively, the program strives to deepen students' commitment to improving the public's health.

Students who began their academic career at GW become eligible to apply to the public health major in the fall semester of their sophomore year. Applicants must have a minimum grade-point average of 3.0.

Visit the program website (<http://publichealth.gwu.edu/programs/public-health-bs/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 120 credits, including 19 credits in University General Education Requirement courses, 31 credits in core public health courses including 3 credits in public health research methods, 12 credits in approved public health elective courses, and 58 credits in additional electives.

Code	Title	Credits
Prerequisites		
As a prerequisite to PUBH 2110, one of the following courses:		
BISC 1005	The Biology of Nutrition and Health	
BISC 1006	The Ecology and Evolution of Organisms	
BISC 1007	Food, Nutrition, and Service	
BISC 1008	Understanding Organisms through Service Learning	
BISC 1111	Introductory Biology: Cells and Molecules	
BISC 1112	Introductory Biology: The Biology of Organisms	
HONR 1033	Honors Seminar: Scientific Reasoning and Discovery (Biology Only)	
As a prerequisite to PUBH 2112 and PUBH 3135W:		
PUBH 1101	Introduction to Public Health and Health Services	
As a prerequisite to PUBH 3130:		
ECON 1011	Principles of Economics I	
As a prerequisite to PUBH 3131, one of the following statistics courses; STAT 1127 is preferred:		
STAT 1051	Introduction to Business and Economic Statistics	
STAT 1053	Introduction to Statistics in Social Science	
STAT 1111	Business and Economic Statistics I	
STAT 1127	Statistics for the Biological Sciences	
As prerequisites to PUBH 4140W and PUBH 4141, the research methods selective and the following courses:		

PUBH 3130	Health Services Management and Economics	
PUBH 3135W	Health Policy	
Code	Title	Credits
Required for the major		
Public health core: 31 credits, including the research methods selective.		
PUBH 1010	First-Year Experience in Public Health *	
PUBH 1101	Introduction to Public Health and Health Services	
PUBH 2110	Public Health Biology	
PUBH 2112	Principles of Health Education and Health Promotion	
PUBH 3130	Health Services Management and Economics	
PUBH 3131	Epidemiology: Measuring Health and Disease	
PUBH 3132	Health and Environment	
PUBH 3133	Global Health and Development	
PUBH 3135W	Health Policy	
PUBH 4140W	Senior Seminar	
or PUBH 4141	Senior Seminar Community Needs Assessment	
Research methods selective		
3 credits from the following:		
EHS 2107	Theory and Practice of Research in a Clinical Setting	
EXNS 3111	Exercise and Nutrition Science Research Methods	
PUBH 3152	Qualitative Research Methods in Public Health	
PUBH 3199	Topics in Public Health (in topic Public Health Research Methods only)	
Electives		
12 credits in approved elective courses. No more than 9 credits may be taken through study abroad programs and/or domestic non-GW courses.		
ANTH 3503	Psychological Anthropology	

ANTH 3504	Illness, Healing, and Culture
ANTH 3513	Anthropology of Human Rights
or ANTH 3513W	Anthropology of Human Rights
AMST 3950	Special Topics (Narrative Medicine in American History only)
BADM 4101	Business Ethics and the Legal Environment
BIOC 3560	Diet, Health, and Longevity
BISC 3450	Evolutionary Medicine
or BISC 3450W	Evolutionary Medicine
EHS 2107	Theory and Practice of Research in a Clinical Setting
EHS 2109	Infectious Diseases and Bioterrorism
EHS 2175	Community Risk Management and Safety in EHS
EXNS 1114	Community Nutrition
EXNS 1199	Topics in Exercise and Nutrition Sciences (ONLY: Nutrition & Disease and International Nutrition)
EXNS 2116	Exercise and Health Psychology
EXNS 2119	Introduction to Nutrition Science
EXNS 2122	Food Systems in Public Health
EXNS 2123	Nutrition and Chronic Disease
EXNS 3995	Undergraduate Research **
GEOG 1003	Society and Environment
GEOG 2104	Introduction to Cartography and GIS
GEOG 2127	Population Geography
GEOG 2137	Environmental Hazards
GEOG 3106	Intermediate Geographic Information Systems
HIST 3363	Race, Medicine, and Public Health
HLWL 1106	Drug Awareness
HLWL 1109	Human Sexuality
HSCI 2101	Psychosocial Aspects of Health and Illness (Residential delivery only)

HSCI 2105	Current Issues in Bioethics (Residential delivery only)
PHIL 2124	Philosophies of Disability
PHIL 2125W	Philosophy of Race and Gender
PHIL 2281	Philosophy of the Environment
PSYC 3128	Health Psychology
PSYC 3199	Current Topics in Psychology (Substance Abuse and Addictions only)
PUBH 1102	History of Public Health
PUBH 2113	Impact of Culture upon Health
PUBH 2114	Environment, Health, and Development
PUBH 2117	Service Learning in Public Health
PUBH 3115	Global Health and Human Rights
PUBH 3116	Global Health Systems Performance
PUBH 3136	Health Law
PUBH 3137	Global Public Health Nutrition
PUBH 3150	Sustainable Energy and Environmental Health
PUBH 3151W	Current Issues in Bioethics
PUBH 3199	Topics in Public Health
PUBH 3201	Introduction to Bioinformatics
PUBH 3202	Introduction to Genomics
PUBH 3995	Undergraduate Research **
PUBH 4201	Practical Computing
PUBH 4202	Bioinformatics Algorithms and Data Structures
STAT 2118	Regression Analysis
STAT 2183 or STAT 2183W	Intermediate Statistics Lab/Packages Intermediate Statistical Laboratory: Statistical Computing Packages

*Internal transfer students may be eligible to satisfy this requirement with course alternatives to PUBH 1010. See program guide available from the GWSPH.

**A total of 6 credits may be taken in PUBH 3995. Students may apply up to 3 of those credits toward their major elective requirement.

Students must take all required courses at GW unless an exception is granted by the GWSPH Dean of Undergraduate Programs. Permission is granted only if there are strong extenuating circumstances that call for such an exception.

Students must comply with policies and procedures as outlined in University Regulations (p. 27), GWSPH Regulations (p. 1178), and the program guide. Students should pay particular attention to SPH requirements for completing human research training, completing 8 hours of professional enhancement activities, and passing the academic integrity quiz.

GENERAL EDUCATION

Coursework for the university general education requirement in the bachelor of science in public health is distributed as follows:

- Communication—one approved course in university writing and two approved writing-in-the-disciplines (WID) courses;
- Critical Analysis in the Humanities—one approved course in humanities that involves critical thinking skills;
- Quantitative Reasoning—one approved course in either mathematics or statistics;
- Scientific Reasoning—one approved laboratory course that employs the process of scientific inquiry; and,
- Critical Analysis in the Social Sciences—two approved courses in the social sciences

A list of qualifying courses can found under University General Education Requirement (p.) in this Bulletin.

BACHELOR OF SCIENCE WITH A MAJOR IN PUBLIC HEALTH, PRE-MEDICAL PROFESSIONS CONCENTRATION

REQUIREMENTS

The following requirements must be fulfilled:

Code	Title	Credits
Prerequisites		
As a prerequisite to PUBH 2110, one of the following courses:		
BISC 1005	The Biology of Nutrition and Health	
BISC 1006	The Ecology and Evolution of Organisms

Pre-medical professional concentration requirements

The following courses (41 credits) are required for students in the pre-medical professional concentration. These credits are accounted for either by also fulfilling General Education requirements, thus counting toward both requirements; and/or counting as general electives. Students should consult a GWSPH undergraduate advisors for assistance in course selection.

BISC 1111 Introductory Biology: Cells and Molecules

BISC 1112 Introductory Biology: The Biology of Organisms

CHEM 1111 General Chemistry I

CHEM 1112 General Chemistry II

CHEM 2151 Organic Chemistry I

CHEM 2152 Organic Chemistry II

CHEM 2153 Organic Chemistry Laboratory I

CHEM 2154 Organic Chemistry Laboratory II

BISC 3261 Introductory Medical Biochemistry

or CHEM 3165 Biochemistry I

MATH 1220 Calculus with Precalculus I

or MATH 1221 Calculus with Precalculus II

PHYS 1011	General Physics I
or PHYS 1012	General Physics II
PSYC 1001	General Psychology
or SOC 1001	Introduction to Sociology

*Internal transfer students may be eligible to satisfy this requirement with course alternatives to PUBH 1010. See program guide available from the GWSPH.

**A total of 6 credits may be taken in PUBH 3995. Students may apply up to 3 of those credits toward the major elective requirement.

Students must take all required courses at GW unless an exception is granted by the GWSPH Dean of Undergraduate Programs. Permission is granted only if there are strong extenuating circumstances that call for such an exception.

Students must comply with policies and procedures as outlined in University Regulations (p. 27), GWSPH Regulations (p. 1178), and the program guide. Students should pay special attention to SPH requirements for completing human research training, completing 8 hours of professional enhancement activities, and passing the academic integrity quiz.

DUAL BS IN NUTRITION SCIENCE AND MPH IN PUBLIC HEALTH NUTRITION

Program Director A. Sylvestsky

The Milken Institute School of Public Health offers a dual bachelor of science with a major in nutrition science (p. 1316) and master of public health in the field of public health nutrition (p. 1355) degree program. The program allows students to take up to 9 graduate credits as part of their undergraduate degree, thereby decreasing the number of credits normally required for the master's degree.

Visit the program website (<https://publichealth.gwu.edu/content/nutrition-science-bs/>) for additional information.

DUAL BS WITH A MAJOR IN PUBLIC HEALTH AND MASTER OF PUBLIC HEALTH

Program Director E. Gray

The Milken Institute School of Public Health accepts a small number of outstanding students who demonstrate academic excellence and a strong commitment to public health into its dual bachelor of science with a major in public health (p. 1322) and master of public health (p. 1183) (BS/MPH) degree program each year. The program allows students to take up to 9 graduate credits as part of their undergraduate

degree, thereby decreasing the number of credits normally required for the master's degree. All requirements for both degrees must be fulfilled.

The BS/MPH program is designed to help pre-professional students who are interested in public health issues to become leaders dedicated to improving the health and well-being of local, national, and international communities. Current public health undergraduate students may apply to the program after their sophomore or junior academic year. Interested students may apply to any of the MPH programs.

Visit the program website (<https://publichealth.gwu.edu/programs/public-health-bs/>) for additional information.

GENERAL EDUCATION

Coursework for the university general education requirement in the bachelor of science in public health is distributed as follows:

- Communication—one approved course in university writing and two approved writing-in-the-disciplines (WID) courses;
- Critical Analysis in the Humanities—one approved course in humanities that involves critical thinking skills;
- Quantitative Reasoning—one approved course in either mathematics or statistics;
- Scientific Reasoning—one approved laboratory course that employs the process of scientific inquiry; and,
- Critical Analysis in the Social Sciences—two approved courses in the social sciences

Please visit the university general education requirement (p. 42) page for a list of qualifying courses.

MINOR IN BIOINFORMATICS REQUIREMENTS

The following requirements must be fulfilled: 18 credits, including 12 credits in required courses and 6 credits in elective courses.

Code	Title	Credits
Required		
PUBH 3201	Introduction to Bioinformatics	
PUBH 3202	Introduction to Genomics	
PUBH 4201	Practical Computing	
PUBH 4202	Bioinformatics Algorithms and Data Structures	
Electives		

6 credits from the following courses:

ANTH 2406	Human Evolutionary Genetics
BISC 2207	Genetics
BISC 3209	Molecular Biology
BME 2820	Biomedical Engineering Programming I
BME 2825	Biomedical Engineering Programming II

MINOR IN EXERCISE SCIENCE REQUIREMENTS

The following requirements must be fulfilled: 13 credits in required courses plus two elective courses to total 18 to 21 credits.

Code	Title	Credits
------	-------	---------

Required (13 credits)

EXNS 1103	Professional Foundations in Exercise Science
EXNS 1110	Applied Anatomy and Physiology I
EXNS 1111	Applied Anatomy and Physiology II
EXNS 2111	Exercise Physiology I

Electives

Two courses from the following (minimum 5 credits):

EXNS 1118	Sport and Nutrition
EXNS 2110	Injury Prevention and Control
EXNS 2112	Exercise Physiology II
EXNS 2113	Kinesiology
EXNS 2116	Exercise and Health Psychology
EXNS 2119	Introduction to Nutrition Science
EXNS 3110	Field Experience - Exercise and Nutrition Sciences

Note: Students in the BS in exercise science program (all tracks) are not eligible to declare a minor in exercise science.

MINOR IN NUTRITION SCIENCE REQUIREMENTS

The following requirements must be fulfilled: 18 credits, including 9 credits in required courses and 9 credits in elective courses.

Code	Title	Credits
------	-------	---------

Required (9 credits)

EXNS 2119	Introduction to Nutrition Science
EXNS 2122	Food Systems in Public Health *

or

EXNS 3199	Advanced Topics in Exercise and Nutrition Sciences (International Nutrition topic only) *
-----------	---

or

EXNS 4199	Advanced Topics in Exercise and Nutrition Sciences (Metabolism in Exercise and Nutrition Science topic only) *
EXNS 2124	Lifecycle Nutrition
Electives (9 credits)	
Three courses selected from the following, at least two of which must be at the 2000 level or above:	
EXNS 1114	Community Nutrition
EXNS 1118	Sport and Nutrition
EXNS 2120	Assessment of Nutritional Status
EXNS 2122	Food Systems in Public Health *
EXNS 2123	Nutrition and Chronic Disease
EXNS 3199	Advanced Topics in Exercise and Nutrition Sciences (topic International Nutrition only) *
EXNS 4199	Advanced Topics in Exercise and Nutrition Sciences (topic Metabolism in Exercise and Nutrition Science only) *
GEOG 2133	People, Land, and Food
EXNS 3111W	Exercise and Nutrition Sciences Research Methods
PUBH 3137	Global Public Health Nutrition

*EXNS 2122, EXNS 3199, and EXNS 4199 cannot be double counted as both a required and an elective course. EXNS 3199 and EXNS 4199 count as a required or elective course only when taken in the topics indicated.

Students enrolled in the BS in nutrition science degree program are not eligible to declare this minor.

MINOR IN PUBLIC HEALTH

Program Director E. Gray

The following requirements must be fulfilled: 18 credits, including 9 credits in required courses and 9 credits in elective courses.

Code	Title	Credits
Required (9 credits)		
PUBH 1101	Introduction to Public Health and Health Services	

PUBH 3131	Epidemiology: Measuring Health and Disease (one semester of STAT prerequisite- STAT 1127 preferred)
-----------	---

PUBH 3133	Global Health and Development *
-----------	---------------------------------

Electives (9 credits)

Any PUBH course (excluding PUBH 4140W and PUBH 4141) or any course from the School of Public Health's approved PUBH elective course list from the bachelor of science in public health program. In addition, students may take up to 3 elective credits from the SPH approved study abroad or non-GW course lists.*

*See bachelor of science in public health (p. 1322) for elective options. Advising documents are maintained by and available from the SPH Undergraduate Advisors.

Public health minors may double count only one course between the minor and their majors(s) or other minor.

In order to graduate with the minor in public health, students must earn a minimum grade of C- in all required and elective courses in the minor curriculum.

MASTER'S PROGRAMS

Master of Public Health

- Master of Public Health in the field of biostatistics (p. 1334) (p. 1334)
- Master of Public Health in the field of community oriented primary care (p. 1335)
- Master of Public Health in the field of environmental health science and policy (p. 1336)
- Master of Public Health in the field of epidemiology (p. 1338)
- Master of Public Health in the field of global environmental health (p. 1339)
- Master of Public Health in the field of global health policy (p. 1341)
- Master of Public Health in the field of global health program design, monitoring, and evaluation (p. 1343)
- Master of Public Health in the field of global health epidemiology and disease control (p. 1344)
- Master of Public Health in the field of health policy (p. 1346)
- Master of Public Health in the field of health promotion (p. 1347)
- Master of Public Health in the field of humanitarian health (p. 1349)
- Master of Public Health in the field of maternal and child health (p. 1350)
- Master of Public Health in the field of physical activity in public health (p. 1351)

- Master of Public Health in the field of public health communication and marketing (p. 1353)
- Master of Public Health in the field of public health nutrition (p. 1355)
- Master of Public Health (MPH@GW) (p. 1357)

Master of Science

- Master of Science in the field of biostatistics (p. 1358)
- Master of Science in the field of epidemiology (p. 1360)
- Master of Science in the field of exercise science with a concentration in strength and conditioning (p. 1361)
- Master of Science in the field of health and biomedical data (<http://bulletin.gwu.edu/public-health/biostatistics-bioinformatics/ms-health-and-biomedical-data-science/>)
- Master of Science in the field of public health microbiology and emerging infectious diseases (p. 1362)
- Master of Science in the field of management of health informatics and analytics (p. 1364)

Master of Health Administration

- Master of Health Administration (p. 1331)
- Master of Health Administration (MHA@GW) (p. 1333)

Specialist program

- Health Services Administration Specialist (p. 1330)

Combined programs

- Dual Master of Public Health and Doctor of Medicine (p. 1364)
- Dual Master of Public Health and Master of Arts in any Elliott School graduate program (p. 1036)
- Dual Master of Health Administration and graduate certificate in health care corporate compliance (p. 1365)
- Dual Master of Public Health in the field of health policy and graduate certificate in health care corporate compliance (p. 1366)
- Joint Master of Science in Health Sciences in the field of physician assistant and Master of Public Health (p. 1366)
- Joint Master of Public Health or SPH graduate certificate and Juris Doctor or Master of Laws (p. 1374)

HEALTH SERVICES ADMINISTRATION SPECIALIST

Program Director R. Bonar

The health services administration specialist degree helps develop leaders who possess the values, knowledge, and skills to achieve optimal delivery of healthcare. The program is designed for individuals who have earned a post-baccalaureate degree and wish to either change careers by

gaining knowledge and skills in health services administration or to upgrade their formal knowledge and skills in healthcare administration to include the latest advancements in the field.

Applicants must hold a post-baccalaureate degree from an accredited college or university.

Visit the program website (<https://publichealth.gwu.edu/programs/health-services-administration-specialist/>) for additional program information.

REQUIREMENTS

Course Requirements

All Health Services Administration Specialist degree candidates complete 30 graduate credits of approved coursework.

1. 30 graduate credits are required. The Specialist has one required course: HSML 6270 Research in Health Services Administration (Independent Study). All other courses are chosen in consultation with the program director.
2. The program director must pre-approve all course selections and sequencing by developing a "program of study" with the student prior to initial registration. Specialist candidates must meet with the program director each semester before registration; all changes to the program of study must be approved.
3. The program director may approve up to 8 graduate credits that have not been applied to a previous graduate degree as transfer credit into the Specialist degree program. Course(s) must be relevant to the Specialist degree; credit must have been earned from an accredited institution within the past three years with a grade of *B* or above.
4. Grade Point Requirement: A 3.0 (*B* average) overall grade-point average, or above is required.
5. Time Limit Requirement: The degree must be completed within four years.

Program Requirements

Code	Title	Credits
Required course:		
HSML 6270	Research in Health Services Administration	
HSML courses that may be taken for the specialist:		
HSML 6202	Introduction to Health Services Delivery	
HSML 6203	Introduction to Health Management	
HSML 6204	Quality and Performance Improvement	
HSML 6206	Quantitative Methods & Epidemiology/Health Services	
HSML 6207	Health Services Information Applications	

HSML 6208	Medical Informatics
HSML 6209	Health Services Finance
HSML 6210	Health Services Financial Applications
HSML 6211	Health Economics
HSML 6212	Community Health Management and Advocacy
HSML 6213	Health Services, Marketing, and Planning
HSML 6215	Health Law for Managers
HSML 6216	Human Resources Management and Organizational Behavior
HSML 6218	Seminar: Health Services Management and Leadership
HSML 6231	Management of Acute Care Hospitals
HSML 6236	Post-Acute Care Management and Leadership
HSML 6237	Managing the Skilled Nursing Facility
HSML 6238	Ambulatory Care Management
HSML 6244	Supply Chain Management in Health Services
HSML 6245	Disaster Management for Health Care Organizations
HSML 6246	Service Line and Project Management
HSML 6247	Consulting in Health Care
HSML 6285	Readings in Health Services Management
HSML 6286	Readings in Health Services Management
HSML 6299	Topics in HSML

MASTER OF HEALTH ADMINISTRATION

Program Director R. Bonar

The mission of the GW master of health administration (MHA) program is to train the next generation of leaders in the healthcare industry to improve health and health systems on a local, national, and global scale. Graduates will contribute to the improved efficacy of healthcare. They will use research and evidence to inform decisions about policies that affect diverse populations. In addition, the MHA coursework prepares

students to become skilled executives in healthcare delivery systems. Attending a school situated in Washington D.C., the nation's health policy and management epicenter ensures that graduates will become transformational leaders in healthcare.

An MHA degree incorporates coursework in business and medical informatics training, knowledge of health care systems, management theory, finance, quality, law, policy, critical values in decision making and much more. At the George Washington University, we are proud to educate students who are committed to improving healthcare and health policy and engaging in and promoting improvements in programs and services. We emphasize these qualities in the MHA program because they are essential for future leaders in healthcare delivery. Students who graduate with a Master of Health Administration degree will be able to:

- Effectively manage organizational change and promote organizational and clinical excellence.
- Manage health services organizations under alternative financing mechanisms.
- Lead and manage human resources in diverse organizational environments.
- Manage information resources to assist in effective administrative decision making and clinical management.
- Use statistical, quantitative, and economic analyses.
- Utilize leadership skills to improve both business and clinical outcomes of health services organizations.

The only two prerequisites for matriculation into the MHA program are an undergraduate course in introductory accounting and an introductory course in statistics. Students must have earned a grade of B or better in both subjects to be considered for admittance into the Master of Health Administration degree program.

Visit the program website (<https://publichealth.gwu.edu/programs/health-administration-mha/>) for additional program information.

REQUIREMENTS

Prerequisites for admission into the MHA program include an undergraduate course in financial accounting and an introductory course in statistics earned with a minimum grade of B.

The following requirements must be fulfilled: 50 credits, including 31 credits in core courses, a 2-credit health policy selective course, 11 to 14 credits in elective courses, and 3 to 6 credits in field experience.

Students select one of five focus areas. The following two focus areas require 6 credits in a residency to fulfill the field experience requirements: acute and ambulatory care management and post-acute care management (including long-term care). The following three focus areas require 3 credits in an internship to fulfill the field experience

requirement: information systems and financial management; operations management; and strategic management and policy.

Code	Title	Credits
Required		
Core		
HSML 6202	Introduction to Health Services Delivery	
HSML 6203	Introduction to Health Management	
HSML 6204	Quality and Performance Improvement	
HSML 6206	Quantitative Methods and Epidemiology/Health Services	
HSML 6207	Health Services Information Applications	
HSML 6208	Medical Informatics	
HSML 6209	Health Services Finance	
HSML 6210	Health Services Financial Applications	
HSML 6211	Health Economics	
HSML 6212	Community Health Management and Advocacy	
HSML 6213	Health Services, Marketing, and Planning	
HSML 6215	Health Law for Managers	
HSML 6216	Human Resources Management and Organizational Behavior	
HSML 6218	Seminar: Health Services Management and Leadership	
HSML 6254	Seminar: Ethics in Health Services Management	
PUBH 6080	Pathways to Public Health	
Health policy selectives		
One health policy course from the following:		
PUBH 6315	Introduction to Health Policy Analysis	
PUBH 6325	Federal Policymaking and Policy Advocacy	
PUBH 6356	State Health Policy	
PUBH 6370	Medicare/Medicaid Law and Policy	
PUBH 6374	Pharmaceutical Policy	

PUBH 6378	HIV Policy in the US
PUBH 6380	Bridging Health Policy and Health Information Technology
Electives	
Students whose focus area requires a residency select 11 credits in courses from the following list; students whose focus area requires an internship select 14 credits in courses:	
HSML 6231	Management of Acute Care Hospitals
HSML 6236	Post-Acute Care Management and Leadership
HSML 6237	Managing the Skilled Nursing Facility
HSML 6238	Ambulatory Care Management
HSML 6244	Supply Chain Management in Health Services
HSML 6245	Disaster Management for Health Care Organizations
HSML 6246	Service Line and Project Management
HSML 6247	Consulting in Health Care
HSML 6263	Advanced Health Financial Applications
HSML 6270	Research in Health Services Administration (Independent Study)
HSML 6285 & HSML 6286	Readings in Health Services Management and Readings in Health Services Management
HSML 6299	Topics in HSML
Field experience	
Students select either the residency or internship focus area.	
Residency:	
Students pursuing the residency focus area in acute and ambulatory care management or post-acute care management (including long-term care) take the following two courses for a total of 6 credits:	
HSML 6274	Fellowship
HSML 6275	Fellowship
Internship:	

Students pursuing an internship in information systems and financial management, operations management, or strategic management and policy take the following 3-credit course:

HSML 6271

Residency

Graduation Requirements

1. Graduate Credit Requirement: 50 graduate credits are required.
2. Grade Point Requirement: A 3.0 (B average) overall grade-point average is required.
3. Time Limit Requirement: The degree must be completed within five years.
4. Transfer Credit Policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the MHA, upon approval. Credits must have been earned from a CAHME accredited institution in the last three years with a grade-point average of 3.0 or above.
5. Transfer to Degree Program Policy: Up to 18 credits may be transferred to the MHA from the Health Administration Generalist Certificate. Students wishing to transfer to a degree program may apply to do so via the online change of concentration petition after completion of three or more courses and a cumulative GPA of 3.0 or above. A grade of B or above is required for a course to be eligible for transfer. Students interested in applying to an MHA degree program should meet with the program director regarding program-specific admission requirements. Transfer credits must have been completed within the past three years.
6. Residency or Internship Requirement: Successful completion of a 6 credit residency or 3-credit internship.

MASTER OF HEALTH ADMINISTRATION (MHA@GWU)

Program Director L. Friedman

The online Master of Health Administration (MHA) program is designed to educate health care professionals seeking to improve health care structures across the globe. The MHA coursework and curriculum aim to build your expertise across multiple skill sets, leverage research to positively affect diverse populations and prepare you for an executive role in health care administration.

The program features a multidisciplinary curriculum that concentrates on core principles of health care management, health economics, financial leadership and policy.

MHA@GW focuses on enhancing the skill sets necessary for successful health organization leadership, including:

- Leadership and ethics
- Management and strategy
- Information technology and decision science
- Community health and quantitative methods

- Finance and economics
- Quality improvement
- Law and regulation

REQUIREMENTS

The following requirements must be fulfilled: 50 credits in required courses, including 9 credits in immersion experiences.

Code	Title	Credits
Core online course requirements		
HSML 6264	Health Care Management and Strategy	
HSML 6265	Medical Informatics and Decision Management	
HSML 6266	Health Care Financial Management	
HSML 6267	Community and Population Health	
HSML 6268	Health Economics and Quantitative Methods	
HSML 6269	Quality and Performance Improvement	
HSML 6280	Health Law and Policy	
HSML 6281	Systems Thinking and Learning	
HSML 6282	Organizational Research Project I	
HSML 6283	Organization Research Project II	
PUBH 6080	Pathways to Public Health *	
On-site immersion requirements		
HSML 6255	Leadership and Ethics I	
HSML 6256	Leadership and Ethics II	
HSML 6258	Health System Analysis	
HSML 6259	Organization Research Project and Portfolio Presentation	

*PUBH 6080 is required only for students who do not have an MPH degree.

Graduation Requirements

1. Graduate Credit Requirement: 50 graduate credits are required.
2. Grade Point Requirement: A 3.0 (B average) overall grade-point average is required.
3. Time Limit Requirement: The degree must be completed within five years.
4. ePortfolio: All MHA@GW students must complete a comprehensive leadership portfolio

MASTER OF PUBLIC HEALTH IN THE FIELD OF BIOSTATISTICS

Program Director H. Hoffman

Mission

The mission of the master of public health in the field of biostatistics degree program is to educate students in the methodological and quantitative skills needed to apply statistical methods to the biological, biomedical, and health services sciences. In addition to enhancing students' capacity to think critically and creatively, the program deepens their commitment to improving the public's health and to engaging in and promoting public service—qualities essential to biostatisticians and public health practitioners.

Goals

The goals of the biostatistics program are to ensure that graduates:

- Understand and adhere to high scientific standards for research.
- Understand how to apply statistical methods to biological/biomedical sciences and health services.
- Understand and follow guidelines for ethical treatment of research participants.
- Communicate research findings to a lay audience.
- Respect cultural diversity throughout all of the above.

Visit the program website (<https://publichealth.gwu.edu/programs/biostatistics-mph/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 45 credits, including 14 credits in core courses, 22 credits in program-specific courses, 7 credits in elective courses, and a 2-credit culminating experience.

Code	Title	Credits
Required		
Core courses (14 credits)		
PUBH 6003	Principles and Practices of Epidemiology	
PUBH 6007	Social and Behavioral Approaches to Public Health	
PUBH 6009	Fundamentals of Public Health Program Evaluation	
PUBH 6011	Environmental and Biological Foundations of Public Health	

PUBH 6012	Fundamentals of Health Policy
PUBH 6021	Essentials of Public Health Practice and Leadership I
PUBH 6022	Essentials of Public Health Practice and Leadership II (Includes Practicum)
PUBH 6023	Interprofessional Education Experience
Departmental/program-specific courses (22 credits)	
PUBH 6850	Introduction to SAS for Public Health Research
PUBH 6851	Introduction to R for Public Health Research
PUBH 6852	Introduction to Python for Public Health Research
PUBH 6853	Use of Statistical Packages for Data Management and Data Analysis
PUBH 6862	Applied Linear Regression Analysis for Public Health Research
PUBH 6864	Applied Survival Analysis for Public Health Research
PUBH 6865	Applied Categorical Data Analysis
PUBH 6866	Principles of Clinical Trials
PUBH 6868	Quantitative Methods
PUBH 6869	Principles of Biostatistical Consulting
Culminating experience (2 credits)	
PUBH 6015	Culminating Experience

Electives

7 credits in any graduate-level SPH courses.

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits.
2. Course requirements: Successful completion of core and program-specific courses.
3. Practicum Requirement: Students are required to fulfill all requirements of the Applied Practice Experience (Practicum) to receive credit for PUBH 6022.
4. Interprofessional Education Experience (IPE): Students are required to enroll and participate in an authorized IPE activity (PUBH 6023).
5. Minimum grade-point requirement: minimum 3.0 (B average) cumulative grade-point average.
6. Time limit requirement: The degree must be completed within five years.

7. Transfer credit policy: With approval, up to 12 graduate credits that have not been applied to any previous graduate degree may be transferred to the master of public health program. External credits must have been earned from an accredited institution in the last three years with a minimum grade of 3.0 (B) in each course. Students in SPH graduate certificate programs can transfer as many credits earned toward the certificate to the MPH degree as meet MPH degree requirements, to a maximum of 18 credits.
8. Graduate certificate students wishing to transfer to a degree program may apply to do so after completion of three or more courses with a cumulative GPA of 3.0 via the online change of concentration petition (<https://publichealth.gwu.edu/academics/forms/>). A grade of B or above is required for a specific course to be eligible for transfer.
9. CITI Training requirement: All students are required to complete training regarding human subject protection regulation and the Health Insurance Portability and Accountability Act of 1996 (HIPAA).
10. Integrity Quiz and Plagiarism requirement: All students are required to review the George Washington University Code of Academic Integrity (<https://studentconduct.gwu.edu/code-academic-integrity/>) and take the SPH Academic Integrity Quiz at GWSPH Source (<https://source.publichealth.gwu.edu/user/login/?destination=node/193>). within their first semester of study.
11. Professional Enhancement requirement: Students must participate in eight hours of public health-related lectures, seminars, and symposia, related to their field of study.

Visit the program website (<https://publichealth.gwu.edu/programs/community-oriented-primary-care-mph/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 45 credits, including 15 credits in core courses, 6 credits in departmental core courses, 14 credits in program-specific courses, 8 credits in elective courses, and a 2-credit culminating experience.

Code	Title	Credits
Required		
Core courses		
PUBH 6002	Biostatistical Applications for Public Health	
PUBH 6003	Principles and Practices of Epidemiology	
PUBH 6007	Social and Behavioral Approaches to Public Health	
PUBH 6011	Environmental and Biological Foundations of Public Health	
PUBH 6012	Fundamentals of Health Policy

PUBH 6512	Community-Oriented Primary Care Policy and Issues	
PUBH 6513	Community Health Management	
PUBH 6514	Preventing Health Disparities	

MASTER OF PUBLIC HEALTH IN THE FIELD OF COMMUNITY ORIENTED PRIMARY CARE

Program Director C. Rodriguez-Diaz

The MPH in community-oriented primary care trains health professionals and public health practitioners to implement and evaluate evidence-based interventions to improve community health, clinical care, outcomes, and patient experience, while lowering health care costs and decreasing health disparities.

Join other students whose "real life" culminating experiences have included early childhood literacy programs, hospice care, childhood obesity, medication coverage for the elderly, use of geographic information systems to improve access to care, and community health promoter training in Mexico.

Most courses are scheduled in the late afternoons and early evening allow our students to work while pursuing their degree. If you have a job, you may need to arrange with your employer to take a class in the afternoon.

PUBH 6516 Community Health Information Resources

Electives

8 credits- Any PUBH graduate courses

Culminating experience

PUBH 6015 Culminating Experience (taken for two credits)

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits.
2. Course requirements: Successful completion of core and program-specific courses.
3. Practicum Requirement: Students are required to fulfill all requirements of the Applied Practice Experience (Practicum) to receive credit for PUBH 6022.
4. Interprofessional Education Experience (IPE): Students are required to enroll and participate in an authorized IPE activity (PUBH 6023).
5. Minimum grade-point requirement: minimum 3.0 (B average) cumulative grade-point average.
6. Time limit requirement: The degree must be completed within five years.
7. Transfer credit policy: With approval, up to 12 graduate credits that have not been applied to any previous graduate degree may be transferred to the master of public health program. External credits must have been earned from an accredited institution in the last three years with a minimum grade of 3.0 (B) in each course. Students in SPH graduate certificate programs can transfer as many credits earned toward the certificate to the MPH degree as meet MPH degree requirements, to a maximum of 18 credits.
8. Graduate certificate students wishing to transfer to a degree program may apply to do so after completion of three or more courses with a cumulative GPA of 3.0 via the online change of concentration petition (<https://publichealth.gwu.edu/academics/forms/>). A grade of B or above is required for a specific course to be eligible for transfer.
9. CITI Training requirement: All students are required to complete training regarding human subject protection regulation and the Health Insurance Portability and Accountability Act of 1996 (HIPAA).
10. Integrity Quiz and Plagiarism requirement: All students are required to review the George Washington University Code of Academic Integrity (<https://studentconduct.gwu.edu/code-academic-integrity/>) and take the SPH Academic Integrity Quiz at GWSPH Source (<https://source.publichealth.gwu.edu/user/login/?destination=node/193>), within their first semester of study.

11. Professional Enhancement requirement: Students must participate in eight hours of public health-related lectures, seminars, and symposia, related to their field of study.

MASTER OF PUBLIC HEALTH IN THE FIELD OF ENVIRONMENTAL HEALTH SCIENCE AND POLICY

Program Director K. Applebaum

The Department of Environmental and Occupational Health is at the center of national and global conversations about the role of science in protecting workers, the public, and the environment from toxic substances and dangerous conditions. Faculty and staff in the department have earned a national reputation as researchers and leaders in articulating how public health science is best used in regulatory decision making. Congressional committees, federal agencies, national scientific organizations, international public health entities and the media contact them frequently to discuss environmental hazards and the policies addressing them.

The MPH in environmental health science and policy program educates individuals who are committed to improving public health through reducing risks posed by environmental and occupational hazards. Students learn to apply critical and analytic skills to better understand how environmental and occupational exposures impact human health. With courses scheduled in the late afternoons and early evenings, students can obtain valuable career experience while they earn the degree.

REQUIREMENTS

The following requirements must be fulfilled: 45 credits, including 17 credits in core courses, 22 credits in program-specific courses, 4 credits in elective courses, a 2-credit culminating experience.

Code	Title	Credits
Required		
Core courses		
PUBH 6002	Biostatistical Applications for Public Health	
PUBH 6003	Principles and Practices of Epidemiology	
PUBH 6007	Social and Behavioral Approaches to Public Health	
PUBH 6009	Fundamentals of Public Health Program Evaluation	
PUBH 6011	Environmental and Biological Foundations of Public Health	

PUBH 6012	Fundamentals of Health Policy
PUBH 6021	Essentials of Public Health Practice and Leadership I
PUBH 6022	Essentials of Public Health Practice and Leadership II
PUBH 6023	Interprofessional Education Experience
Program-specific courses	
PUBH 6121	Environmental and Occupational Epidemiology
PUBH 6122	Protecting Public Health and the Environment: Policies, Politics, and Programs
PUBH 6123	Toxicology: Applications for Public Health Policy
PUBH 6124	Risk Management and Communication
PUBH 6126	Assessment and Control of Environmental Hazards
PUBH 6131	Quantitative Methods in Environmental and Occupational Health

Program-specific electives

A minimum of 4 credits from the following program-specific elective courses:

PUBH 6127	Introduction to Environmental Health Microbiology
PUBH 6128	Global Environmental and Occupational Health
PUBH 6130	Sustainable Energy and the Environment
PUBH 6133	Social Dimensions in Climate Change and Health
PUBH 6135	Researching Climate Change and Human Health
PUBH 6140	Global Climate Change and Air Pollution
PUBH 6199	Topics in Environmental and Occupational Health

Additional electives

4 credits in any graduate-level SPH courses. If more than 4 credits in program-specific elective courses are taken, the number of credits required in this category is reduced accordingly.

Culminating experience

PUBH 6137	Environmental and Occupational Health Culminating Experience I
PUBH 6138	Environmental and Occupational Health Culminating Experience II

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits.
2. Course requirements: Successful completion of core and program-specific courses.
3. Practicum Requirement: Students are required to fulfill all requirements of the Applied Practice Experience (Practicum) to receive credit for PUBH 6022.
4. Interprofessional Education Experience (IPE): Students are required to enroll and participate in an authorized IPE activity (PUBH 6023).
5. Minimum grade-point requirement: minimum 3.0 (B average) cumulative grade-point average.
6. Time limit requirement: The degree must be completed within five years.
7. Transfer credit policy: With approval, up to 12 graduate credits that have not been applied to any previous graduate degree may be transferred to the master of public health program. External credits must have been earned from an accredited institution in the last three years with a minimum grade of 3.0 (B) in each course. Students in SPH graduate certificate programs can transfer as many credits earned toward the certificate to the MPH degree as meet MPH degree requirements, to a maximum of 18 credits.
8. Graduate certificate students wishing to transfer to a degree program may apply to do so after completion of three or more courses with a cumulative GPA of 3.0 via the online change of concentration petition (<https://publichealth.gwu.edu/academics/forms/>). A grade of B or above is required for a specific course to be eligible for transfer.
9. CITI Training requirement: All students are required to complete training regarding human subject protection regulation and the Health Insurance Portability and Accountability Act of 1996 (HIPAA).
10. Integrity Quiz and Plagiarism requirement: All students are required to review the George Washington University Code of Academic Integrity (<https://studentconduct.gwu.edu/code-academic-integrity/>) and take the SPH Academic Integrity Quiz at GWSPH Source (<https://source.publichealth.gwu.edu/user/login/?destination=node/193>). within their first semester of study.
11. Professional Enhancement requirement: Students must participate in eight hours of public health-related lectures, seminars, and symposia, related to their field of study.

MASTER OF PUBLIC HEALTH IN THE FIELD OF EPIDEMIOLOGY

Program Co-Directors M. Magnus, H. Young

Mission

The mission of the master of public health in the field of epidemiology degree program is to help students develop the necessary methodological and quantitative skills to work successfully in the field. While nurturing students' capacity to think critically and creatively, students are encouraged to deepen their commitment to improving the public's health and to engaging in and promoting public service qualities essential for future epidemiologists and public health practitioners.

Goals

The goals of the program are to ensure that graduates:

- Understand and adhere to high scientific standards for research;
- Understand and follow guidelines for ethical treatment of research participants;
- Can communicate research findings to a lay audience; and
- Respect cultural diversity throughout all of the above.

Visit the program website (<https://publichealth.gwu.edu/programs/epidemiology-mph/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 45 credits, including 17 credits in core courses, 20 credits in program-specific courses, 6 credits in elective courses, and a 2-credit culminating experience.

Code	Title	Credits
Required		
Core courses		
PUBH 6002	Biostatistical Applications for Public Health	
PUBH 6003	Principles and Practices of Epidemiology	
PUBH 6007	Social and Behavioral Approaches to Public Health	
PUBH 6009	Fundamentals of Public Health Program Evaluation	
PUBH 6011	Environmental and Biological Foundations of Public Health	

PUBH 6012	Fundamentals of Health Policy
PUBH 6021	Essentials of Public Health Practice and Leadership I
PUBH 6022	Essentials of Public Health Practice and Leadership II (Includes Practicum)
PUBH 6023	Interprofessional Education Experience
Departmental courses	
PUBH 6247	Design of Health Studies
PUBH 6252	Advanced Epidemiology Methods
PUBH 6853	Use of Statistical Packages for Data Management and Data Analysis
PUBH 6260	Advanced Data Analysis for Public Health
Program-specific epidemiology foundational courses	
At least two courses (4 credits) from the following:	
PUBH 6237	Chronic Disease Epidemiology
PUBH 6241	Nutritional Epidemiology
PUBH 6242	Clinical Epidemiology and Public Health: Reading the Research
PUBH 6244	Cancer Epidemiology
PUBH 6245	Infectious Disease Epidemiology
PUBH 6248	Epidemiology of Aging
PUBH 6250	Epidemiology of HIV/AIDS
PUBH 6259	Epidemiology Surveillance in Public Health
Program-specific electives	
4 credits in Epidemiology/Biostatistics department courses or from following list:	
PUBH 6299	Topics in Epidemiology (Behavioral Epidemiology)
PUBH 6899	Topics in Biostatistics and Bioinformatics
PUBH 6121	Environmental and Occupational Epidemiology
PUBH 6127	Introduction to Environmental Health Microbiology
PUBH 6455	Global Vaccinology

PUBH 6484	Prevention and Control of Vector Borne Diseases
PUBH 6486	Global Health Programs and Approaches to the Control of Infectious Diseases
PUBH 6492	Global Health Programs and Approaches to the Control of Chronic Diseases
EXNS 6208	Physical Activity: Physiology and Epidemiology
Additional electives	
6 credits in any graduate-level SPH courses.	
Culminating experience	
PUBH 6015	Culminating Experience (taken for 2 credits)

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits.
2. Course requirements: Successful completion of core and program-specific courses.
3. Practicum Requirement: Students are required to fulfill all requirements of the Applied Practice Experience (Practicum) to receive credit for PUBH 6022.
4. Interprofessional Education Experience (IPE): Students are required to enroll and participate in an authorized IPE activity (PUBH 6023).
5. Minimum grade-point requirement: minimum 3.0 (B average) cumulative grade-point average.
6. Time limit requirement: The degree must be completed within five years.
7. Transfer credit policy: With approval, up to 12 graduate credits that have not been applied to any previous graduate degree may be transferred to the master of public health program. Students in SPH graduate certificate programs can transfer as many credits earned toward the certificate to the MPH degree as meet MPH degree requirements, to a maximum of 18 credits.
8. Graduate certificate students wishing to transfer to a degree program may apply to do so after completion of three or more courses with a cumulative GPA of 3.0 via the online change of concentration petition (<https://publichealth.gwu.edu/academics/forms/>). A grade of B or above is required for a specific course to be eligible for transfer.
9. CITI Training requirement: All students are required to complete training regarding human subject protection

regulation and the Health Insurance Portability and Accountability Act of 1996 (HIPAA).

10. Integrity Quiz and Plagiarism requirement: All students are required to review the George Washington University Code of Academic Integrity (<https://studentconduct.gwu.edu/code-academic-integrity/>) and take the SPH Academic Integrity Quiz at GWSPH Source (<https://source.publichealth.gwu.edu/user/login/?destination=node/193>). within their first semester of study.
11. Professional Enhancement requirement: Students must participate in eight hours of public health-related lectures, seminars, and symposia, related to their field of study.

MASTER OF PUBLIC HEALTH IN THE FIELD OF GLOBAL ENVIRONMENTAL HEALTH

Program Director S. Anenberg

The mission of GW's master of public health (MPH) in global environmental health program, offered jointly by the Departments of Environmental and Occupational Health and Global Health, is to prepare students to work in resource-poor settings and apply analytic skills to prevent or lessen problems associated with environmental hazards for human health. The program focuses on traditional environmental health hazards, such as lack of access to clean water, inadequate sanitation, poor hygiene, household air pollution, solid waste disposal, and vector-borne diseases such as malaria.

In addition, the program curriculum is designed to enhance students' capacity to think critically and creatively. The global environmental health program enrolls students who are committed to improving public health around the globe and engaging in and promoting public service. The emphasis on these qualities is essential for future environmental and occupational health professionals and public health practitioners. Graduates of the program can expect to be prepared to:

- Assess environmental exposures and understand the effects of these exposures on human health.
- Interpret epidemiologic and other research findings related to global environmental health risks.
- Assume leadership roles in designing, implementing, and evaluating programs that focus on modification of environmental health-related behaviors at local, regional, national, and/or global levels.

REQUIREMENTS

The following requirements must be fulfilled: 45 credits, including 17 credits in core courses, 17 credits in program-specific courses, 9 credits in elective courses, and a 2-credit culminating experience.

Code	Title	Credits
Required

 11. Professional Enhancement requirement: Students must participate in eight hours of public health-related lectures, seminars, and symposia, related to their field of study.

MASTER OF PUBLIC HEALTH IN THE FIELD OF GLOBAL HEALTH POLICY

Program Director C. Santos-Burgoa

The mission of GW's master of public health (MPH) in global health policy program is to prepare professionals to assist in public health decision making related to national, regional, and global interventions and institutions. Students learn to support policy analysis and use diverse analytic tools, including epidemiology and international comparative policy methods, with attention to culture and equity. Program graduates integrate scientific knowledge and global evidence to advise decision making and action by diverse global health systems and other sectors, and to provide insight into policies and processes that impact population health, all with an emphasis on underserved populations and development.

Students enrolled in the global health policy program are committed to improving public health on a global scale and engaging in and promoting public service. These qualities are essential for future health professionals and public health practitioners.

Graduates of the global health policy program can expect to be able to:

- Assess the burden and determinants of health problems, their social distribution and inequities, and the interdependence of countries.

- Apply common economic, epidemiological, and comparative policy analysis methods and tools for evidence to assess burden of disease, determining efficacy and effectiveness of interventions for global infectious and chronic disease control.
- Use global evidence for local action using systematic reviews and local facts to drive well informed health policy decisions. Translate evidence to support program and health systems policy recommendations.
- Work with other disciplines and with sectors beyond health to develop innovative policy options.
- Develop strong cultural sensitivity and intercultural competency within diverse health and political systems
- Act in global health diplomacy in policy-shaping and negotiations to improve health while strengthening relations among nations.
- Assume leadership roles in the global health policy development process.
- Work with methodological rigor of international policy design, program priority setting, and negotiation.
- Communicate the results of research to a culturally broad set of constituents.

Visit the program website (<https://publichealth.gwu.edu/programs/global-health-policy-mph/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 45 credits, including 17 credits in core courses, 14 credits in program-specific courses, 4 credits in selective courses, 8 credits of electives and a 2-credit culminating experience.

IAFF 6138	Special Topics in International Development Studies (Gender, Disaster and Policy) ²	PUBH 6015	Culminating Experience (taken for 2 credits)
IAFF 6158	Special Topics in International Science and Technology Policy (Policy of Science, Technology and Development) ²	¹ For PUBH 6399, only the topic Cost-Benefit Analysis in Healthcare counts toward program requirements.	
IAFF 6198	Special Topics in International Economic Policy (International Trade and Investment Policy) ²		

²For IAFF 6138, IAFF 6158, IAFF 6198, and PUBH 6499, only the specific topics listed here count toward program requirements.

³See program guide for the topics in IAFF 6502 and IAFF 6503 that qualify as preapproved electives.

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits.
2. Course requirements: Successful completion of core and program-specific courses.
3. Practicum Requirement: Students are required to fulfill all requirements of the Applied Practice Experience (Practicum) to receive credit for PUBH 6022.
4. Interprofessional Education Experience (IPE): Students are required to enroll and participate in an authorized IPE activity (PUBH 6023).
5. Minimum grade-point requirement: minimum 3.0 (B average) cumulative grade-point average.
6. Time limit requirement: The degree must be completed within five years.
7. Transfer credit policy: With approval, up to 12 graduate credits that have not been applied to any previous graduate degree may be transferred to the master of public health program. External credits must have been earned from an accredited institution in the last three years with a minimum grade of 3.0 (B) in each course. Students in SPH graduate certificate programs can transfer as many credits earned toward the certificate to the MPH degree as meet MPH degree requirements, to a maximum of 18 credits.
8. Graduate certificate students wishing to transfer to a degree program may apply to do so after completion of three or more courses with a cumulative GPA of 3.0 via the online change of concentration petition (<https://publichealth.gwu.edu/academics/forms/>). A grade of B or above is required for a specific course to be eligible for transfer.
9. CITI Training requirement: All students are required to complete training regarding human subject protection regulation and the Health Insurance Portability and Accountability Act of 1996 (HIPAA).
10. Integrity Quiz and Plagiarism requirement: All students are required to review the George Washington University Code of Academic Integrity (<https://studentconduct.gwu.edu/code-academic-integrity/>) and take the SPH Academic Integrity Quiz at GWSPH Source (<https://source.publichealth.gwu.edu/user/login/?destination=node/193>). within their first semester of study.
11. Professional Enhancement requirement: Students must participate in eight hours of public health-related lectures, seminars, and symposia, related to their field of study.

MASTER OF PUBLIC HEALTH
IN THE FIELD OF GLOBAL
HEALTH PROGRAM DESIGN,
MONITORING, AND EVALUATION

Program Director S. Baird

The MPH in global health design, monitoring and evaluation prepares the next generation of global health professionals to implement, monitor, and evaluate global health programs and initiatives. These skills will ensure that students are able to contribute to improved global health program performance, and make evidence-based decisions for investment of scarce resources to improve global health outcomes.

Visit the program website (<https://publichealth.gwu.edu/programs/global-health-program-design-monitoring-and-evaluation-mph/>)for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 45 credits, including 15 credits in core courses, 18 credits in department and program-specific courses, 10 credits in elective courses, and a 2-credit culminating experience.

Code	Title	Credits
Required		
Core		
PUBH 6002	Biostatistical Applications for Public Health	
PUBH 6003	Principles and Practices of Epidemiology

11. Professional Enhancement requirement: Students must participate in eight hours of public health-related lectures, seminars, and symposia, related to their field of study.

MASTER OF PUBLIC HEALTH IN THE FIELD OF GLOBAL HEALTH EPIDEMIOLOGY AND DISEASE CONTROL

Program Director C. Mores

The mission of the MPH global health epidemiology and disease control program is to prepare the next generation of global health professionals to develop and rigorously appraise infectious and chronic disease control-related programs using analytical and creative assessment skills. The ability to do so will provide students with requisite skills to effectively contribute to improving the performance of global health programs. In turn, global health epidemiology and disease control degree graduates impact underserved communities around the world.

The program curriculum is designed to enhance students' capacity to think critically and innovatively. Students are committed to improving public health on a global scale and engaging in and promoting public service. These qualities are essential for future health professionals and public health practitioners.

Program graduates can expect to be able to:

- Use common epidemiological tools to help generate evidence on interventions targeted to infectious and chronic disease control.
- Work in real-world settings to strengthen methodological rigor.
- Generate and use data for assessing burden of disease and determining efficacy and effectiveness of interventions for infectious and chronic diseases.
- Translate evidence to support program and health systems improvements and to make policy recommendations.
- Communicate the results of research to a broad set of stakeholders.

Visit the program website (<https://publichealth.gwu.edu/programs/global-health-epidemiologyand-disease-control-mph/>) for additional program information.

MASTER OF PUBLIC HEALTH IN THE FIELD OF HEALTH POLICY

Program Director L. Cartwright-Smith

Dedicated to health policy education and research, our faculty members include some of the nation's best-known health policy experts, as well as leaders from the public and private health policy sectors. Our program joins stimulating classes with hands-on experience with critical health policy issues. Our graduates can be found in congressional offices, federal health agencies, the most prominent professional health societies in Washington, D.C., trade associations and health policy consultancies. With courses scheduled in the late afternoons and early evenings, our programs allow students to attain valuable career experience while they earn their degrees.

The MPH in health policy provides students with in-depth analysis skills for employment in government, private sector health policy consulting and not-for-profit advocacy. Additionally, this program is available to attorneys, GW law students and GW medical students who wish to enhance training with a thorough understanding of health policy.

Visit the program website (<https://publichealth.gwu.edu/programs/health-policy-mp/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 45 credits, including 17 credits in core courses, 18 credits in program-specific courses, 8 credits in elective courses, and a 2-credit capstone.

PUBH 6370	Medicare/Medicaid Law and Policy	
PUBH 6384	Health Care Quality and Health Policy	

Capstone

PUBH 6350 Health Policy Capstone

Electives

8 credits in any graduate-level PUBH or HSML courses.

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits.
2. Course requirements: Successful completion of core and program-specific courses.
3. Practicum Requirement: Students are required to fulfill all requirements of the Applied Practice Experience (Practicum) to receive credit for PUBH 6022.
4. Interprofessional Education Experience (IPE): Students are required to enroll and participate in an authorized IPE activity (PUBH 6023).
5. Minimum grade-point requirement: minimum 3.0 (B average) cumulative grade-point average.
6. Time limit requirement: The degree must be completed within five years.
7. Transfer credit policy: With approval, up to 12 graduate credits that have not been applied to any previous graduate degree may be transferred to the master of public health program. External credits must have been earned from an accredited institution in the last three years with a minimum grade of 3.0 (B) in each course. Students in SPH graduate certificate programs can transfer as many credits earned toward the certificate to the MPH degree as meet MPH degree requirements, to a maximum of 18 credits.
8. Graduate certificate students wishing to transfer to a degree program may apply to do so after completion of three or more courses with a cumulative GPA of 3.0 via the online change of concentration petition (<https://publichealth.gwu.edu/academics/forms/>). A grade of B or above is required for a specific course to be eligible for transfer.
9. CITI Training requirement: All students are required to complete training regarding human subject protection regulation and the Health Insurance Portability and Accountability Act of 1996 (HIPAA).
10. Integrity Quiz and Plagiarism requirement: All students are required to review the George Washington University Code of Academic Integrity (<https://studentconduct.gwu.edu/code-academic-integrity/>) and take the SPH Academic Integrity Quiz at GWSPH Source (<https://source.publichealth.gwu.edu/user/login/?destination=node/193>). within their first semester of study.

11. Professional Enhancement requirement: Students must participate in eight hours of public health-related lectures, seminars, and symposia, related to their field of study.

MASTER OF PUBLIC HEALTH IN THE FIELD OF HEALTH PROMOTION

Program Director B. Bingenheimer

Students in the master of public health (MPH) in health promotion program learn to use proven social and behavioral theory and behavior change models and strategies to improve health behaviors and practices for a variety of populations. They acquire the skills to plan, design, implement, evaluate, and communicate programs and research targeted toward health promotion and disease prevention for the public.

The program is designed to prepare individuals to become responsible and productive public health professionals, capable of assessing, implementing, managing and evaluating health promotion and health education programs for the public and for at-risk populations. Through required courses and electives, students are trained in social and behavioral approaches and applications for improving public health via interventions at the individual, group, organizational, and societal levels.

The health promotion program explores how best to advocate for social practices, policy, and law that provide supportive environments for the improvement of public health. Students put their knowledge into practice, both in the classroom and in the field. With courses scheduled in the late afternoons and early evenings, the programs allow students to obtain valuable career experience while they earn their degree.

Visit the program website (<http://publichealth.gwu.edu/programs/health-promotion-mp/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 45 credits, including 15 credits in core courses, 6 credits in departmental core courses, 8 credits in program-specific courses, 14 credits in elective courses, and a 2-credit culminating experience.

11. Professional Enhancement requirement: Students must participate in eight hours of public health-related lectures, seminars, and symposia, related to their field of study.

MASTER OF PUBLIC HEALTH IN THE FIELD OF MATERNAL AND CHILD HEALTH

Program Director A. Vyas

Mission Statement

The maternal and child health program (MCH) at the Milken Institute School of Public Health (SPH) is a master of public health (MPH) degree program designed to train individuals to become responsible and productive public health professionals with an emphasis on MCH populations. This program investigates maternal and child health from a multi-disciplinary perspective that integrates the life course, biological, demographic, epidemiological, developmental, environmental, behavioral, and social characteristics that are unique to the health and well-being of women, children, and families.

Goals

The goals of this educational program are to provide and improve:

- Knowledge and skills to assess the health care needs of women, children, and families; and
- Ability to plan, design, implement, evaluate, and communicate programs and research targeted toward

health promotion and disease prevention among women, children, and families

Visit the program website (<https://publichealth.gwu.edu/programs/maternal-and-child-health-mph/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 45 credits, including 15 credits in core courses, 6 credits in departmental core courses, 16 credits in program-specific courses, 6 credits in elective courses, and a 2-credit culminating experience.

Begin planning practicum during year 1; complete culminating experience in year 2.

11. Professional Enhancement requirement: Students must participate in eight hours of public health-related lectures, seminars, and symposia, related to their field of study.

MASTER OF PUBLIC HEALTH IN THE FIELD OF PHYSICAL ACTIVITY IN PUBLIC HEALTH

Program Director and Advisor L. DiPietro

Mission Statement

The sedentary lifestyle and its consequent metabolic and cardiovascular complications now assumes a considerable public health burden in the United States. Indeed, the promotion of physical activity for people of all ages has become a top priority on public health agendas around the world. The mission of the master of public health (MPH) degree program in the Department of Exercise and Nutrition Sciences

is to develop and train graduate students to integrate physical activity into the core of public health practice. The program encompasses an ecological perspective to the role of physical activity in the etiology, prevention, and treatment of chronic diseases at the community, national, and global levels. The program is designed to train students as public health scientists and practitioners in order to assist public and private agencies with program development and evaluation with regard to physical activity, health promotion, and disease prevention.

Goals

The goals of the MPH in the field of physical activity in public health are to ensure that graduates:

- Understand the pathophysiology of selected chronic disease processes.
- Understand exercise physiology and the role of physical activity and exercise in health promotion and disease prevention.
- Develop skills in physical activity assessment using state-of-the-art technology.
- Utilize epidemiological methods to develop and test hypotheses pertaining to physical activity and health and disease outcomes at the population level.
- Develop skills in designing, implementing, and evaluating interventions for improving physical activity at the community level.
- Appreciate the role of public health policy in altering physical activity patterns at the community level.

Visit the program website (<https://publichealth.gwu.edu/programs/physical-activity-public-health-mp/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 45 credits, (varying by track – Option A or B) including 15 to 17 credits in core courses, 19 to 22 credits in program-specific courses, 6 to 7 credits in elective courses, and a 2-credit culminating experience.

Code	Title	Credits

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits.
2. Course requirements: Successful completion of core and program-specific courses.
3. Practicum Requirement: Students are required to fulfill all requirements of the Applied Practice Experience (Practicum) to receive credit for PUBH 6022.
4. Interprofessional Education Experience (IPE): Students are required to enroll and participate in an authorized IPE activity (PUBH 6023).
5. Minimum grade-point requirement: minimum 3.0 (B average) cumulative grade-point average.
6. Time limit requirement: The degree must be completed within five years.
7. Transfer credit policy: With approval, up to 12 graduate credits that have not been applied to any previous graduate degree may be transferred to the master of public health program. External credits must have been earned from an accredited institution in the last three years with a minimum grade of 3.0 (B) in each course. Students in SPH graduate certificate programs can transfer as many credits earned toward the certificate to the MPH degree as meet MPH degree requirements, to a maximum of 18 credits.
8. Graduate certificate students wishing to transfer to a degree program may apply to do so after completion of three or more courses with a cumulative GPA of 3.0 via the online change of concentration petition (<https://publichealth.gwu.edu/academics/forms/>). A grade of B or above is required for a specific course to be eligible for transfer.
9. CITI Training requirement: All students are required to complete training regarding human subject protection regulation and the Health Insurance Portability and Accountability Act of 1996 (HIPAA).
10. Integrity Quiz and Plagiarism requirement: All students are required to review the George Washington University Code of Academic Integrity (<https://studentconduct.gwu.edu/code-academic-integrity/>)

and take the SPH Academic Integrity Quiz at GWSPH Source (<https://source.publichealth.gwu.edu/user/login/?destination=node/193>). within their first semester of study.

11. Professional Enhancement requirement: Students must participate in eight hours of public health-related lectures, seminars, and symposia, related to their field of study.

MASTER OF PUBLIC HEALTH IN THE FIELD OF PUBLIC HEALTH COMMUNICATION AND MARKETING

Program Director W.D. Evans

Mission

Based on an ecological model of health, the mission of the master of public health in the field of public health communication and marketing program is to educate public health professionals to use communication and marketing as strategic tools to influence people, places, and environmental conditions in ways that advance public health objectives.

Goals

Graduates will possess the skills necessary to become highly effective public health practitioners and leaders. Their specific expertise in the strategic use of communication and marketing tools will enable them to work collaboratively with a broad range of other public health experts to plan high-impact health enhancement initiatives, and to implement or supervise the implementation of the communication and marketing components of public health initiatives.

Specifically, students will become proficient at developing, implementing, and evaluating:

- Communication programs that help people make sound health decisions and effectively manage their health behaviors.
- Marketing programs that improve the health capacity of communities by enhancing the competitiveness of the healthful (versus unhealthful) products and services offered to community members.
- Communication programs that promote the adoption of policies--in the public and private sector--which enhance health.

Visit the program website (<https://publichealth.gwu.edu/programs/public-health-communication-and-marketing-mp/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 45 credits, including 15 credits in core courses, 6 credits in departmental core courses, 22 credits in program-specific courses and electives, and a 2-credit culminating experience.

Culminating experience

PUBH 6015 Culminating Experience

*For PUBH 6599 and PUBH 6099, only the specified topics count toward program requirements.

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits.
2. Course requirements: Successful completion of core and program-specific courses.
3. Practicum Requirement: Students are required to fulfill all requirements of the Applied Practice Experience (Practicum) to receive credit for PUBH 6022.
4. Interprofessional Education Experience (IPE): Students are required to enroll and participate in an authorized IPE activity (PUBH 6023).
5. Minimum grade-point requirement: minimum 3.0 (B average) cumulative grade-point average.
6. Time limit requirement: The degree must be completed within five years.
7. Transfer credit policy: With approval, up to 12 graduate credits that have not been applied to any previous graduate degree may be transferred to the master of public health program. External credits must have been earned from an accredited institution in the last three years with a minimum grade of 3.0 (B) in each course. Students in SPH graduate certificate programs can transfer as many credits earned toward the certificate to the MPH degree as meet MPH degree requirements, to a maximum of 18 credits.
8. Graduate certificate students wishing to transfer to a degree program may apply to do so after completion of three or more courses with a cumulative GPA of 3.0 via the online change of concentration petition (<https://publichealth.gwu.edu/academics/forms/>). A grade of B or above is required for a specific course to be eligible for transfer.
9. CITI Training requirement: All students are required to complete training regarding human subject protection regulation and the Health Insurance Portability and Accountability Act of 1996 (HIPAA).
10. Integrity Quiz and Plagiarism requirement: All students are required to review the George Washington University Code of Academic Integrity (<https://studentconduct.gwu.edu/code-academic-integrity/>) and take the SPH Academic Integrity Quiz at GWSPH Source (<https://source.publichealth.gwu.edu/user/login/?destination=node/193>). within their first semester of study.

11. Professional Enhancement requirement: Students must participate in eight hours of public health-related lectures, seminars, and symposia, related to their field of study.

MASTER OF PUBLIC HEALTH IN THE FIELD OF PUBLIC HEALTH NUTRITION

Program Director K. Lora

Mission

The mission of the master of public health (MPH) degree program in the field of public health nutrition is to develop and train graduate students to integrate nutrition into the core of public health practice. The program encompasses a social ecological perspective on the role of nutrition in the etiology, prevention, and treatment of both acute and chronic disease at the individual, community, national, and global levels. This program is designed to train students as public health scientists and practitioners in order to assist public and private agencies with program development, implementation, and evaluation with regard to nutrition in health promotion and disease prevention.

Goals

The goals of this MPH program in the field of public health nutrition are to ensure that graduates:

- Understand the pathophysiology of common acute and chronic disease processes and the role that nutrition may play in the development of these diseases.
- Understand the factors impacting the accessibility, availability, adequacy, and safety of the food and water systems serving a community, and the relationship between community food and water systems and health outcomes.
- Develop skills in nutrition assessment of both individuals and communities.
- Utilize appropriate epidemiologic methods for developing and testing hypotheses relating to nutrition and health outcomes at the population level.
- Develop skills in designing, implementing, and evaluating nutrition interventions to improve the health of communities.
- Appreciate the role of public health policy in altering the food environment at the community level.

Visit the program website (<https://publichealth.gwu.edu/programs/public-health-nutrition-mph/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 45 credits, including 17 credits in core courses, 13 credits in program-specific courses, 7 credits in research methods courses,

6 credits in elective courses, and a 2-credit culminating experience.

Code	Title	Credits
Prerequisites		
Introductory coursework in nutrition and either advanced nutrition or nutritional biochemistry.		
Required		
Core courses		
PUBH 6002	Biostatistical Applications for Public Health	
PUBH 6003	Principles and Practices of Epidemiology	
PUBH 6007	Social and Behavioral Approaches to Public Health	
PUBH 6009	Fundamentals of Public Health Program Evaluation	
PUBH 6011	Environmental and Biological Foundations of Public Health	
PUBH 6012	Fundamentals of Health Policy	
PUBH 6015	Culminating Experience	
PUBH 6021	Essentials of Public Health Practice and Leadership I	
PUBH 6022	Essentials of Public Health Practice and Leadership II	
PUBH 6023	Interprofessional Education Experience	
Public health nutrition core		
EXNS 6242	Nutrition Throughout the Life Cycle	
PUBH 6500	Planning and Implementing Health Promotion Programs	
PUBH 6611	Nutrition Assessment	
PUBH 6612	Food Systems in Public Health	
PUBH 6613	U.S. Food Policy and Politics	
or PUBH 6482	International Food and Nutrition Policy	
PUBH 6620	Designing Healthy Communities	
Research methods		
PUBH 6241	Nutritional Epidemiology	

EXNS 6204	Biostatistical Methods and Research Design
2 credits in additional research methods courses selected from the following:	
PUBH 6236	Systematic Review of Public Health Literature
PUBH 6247	Design of Health Studies
PUBH 6260	Advanced Data Analysis for Public Health
PUBH 6262	Introduction to Geographic Information Systems
PUBH 6263	Advanced GIS
PUBH 6273	Ethnographic Methods
PUBH 6281	Analysis of Complex Surveys Using SAS and Stata
PUBH 6299	Topics in Epidemiology (in topic Dissemination and Implementation Research in Health only)
PUBH 6310	Statistical Analysis in Health Policy
PUBH 6410	Global Health Study Design
PUBH 6411	Global Health Qualitative Research Methods
PUBH 6412	Global Health Quantitative Research Methods
PUBH 6488	Cost-effectiveness Analysis in Public Health and Health Care
PUBH 6489	Evaluation of Food and Nutrition Programs and Policies
PUBH 6504	Social and Behavioral Science Research Methods
PUBH 6530	Qualitative Methods in Health Promotion
PUBH 6533	Design and Conduct of Community Health Surveys
PUBH 6534	Community-Based Participatory Research
PUBH 6572	Marketing Research for Public Health
PUBH 6599	Topics in Prevention and Community Health (in topic Economic Evaluation for Health Promotion only)

PUBH 6853	Use of Statistical Packages for Data Management and Data Analysis
PUBH 6856	Advanced SAS for Public Health Research

Electives

6 credits in graduate-level elective courses selected in consultation with the advisor.

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits.
2. Course requirements: Successful completion of core and program-specific courses.
3. Practicum Requirement: Students are required to fulfill all requirements of the Applied Practice Experience (Practicum) to receive credit for PUBH 6022.
4. Interprofessional Education Experience (IPE): Students are required to enroll and participate in an authorized IPE activity (PUBH 6023).
5. Minimum grade-point requirement: minimum 3.0 (B average) cumulative grade-point average.
6. Time limit requirement: The degree must be completed within five years.
7. Transfer credit policy: With approval, up to 12 graduate credits that have not been applied to any previous graduate degree may be transferred to the master of public health program. External credits must have been earned from an accredited institution in the last three years with a minimum grade of 3.0 (B) in each course. Students in SPH graduate certificate programs can transfer as many credits earned toward the certificate to the MPH degree as meet MPH degree requirements, to a maximum of 18 credits.
8. Graduate certificate students wishing to transfer to a degree program may apply to do so after completion of three or more courses with a cumulative GPA of 3.0 via the online change of concentration petition (<https://publichealth.gwu.edu/academics/forms/>). A grade of B or above is required for a specific course to be eligible for transfer.
9. CITI Training requirement: All students are required to complete training regarding human subject protection regulation and the Health Insurance Portability and Accountability Act of 1996 (HIPAA).
10. Integrity Quiz and Plagiarism requirement: All students are required to review the George Washington University Code of Academic Integrity (<https://studentconduct.gwu.edu/code-academic-integrity/>) and take the SPH Academic Integrity Quiz at GWSPH Source (<https://source.publichealth.gwu.edu/user/login/?destination=node/193>), within their first semester of study.

11. Professional Enhancement requirement: Students must participate in eight hours of public health-related lectures, seminars, and symposia, related to their field of study.

MASTER OF PUBLIC HEALTH: MPH@GW

Program Description

This distance education track for the master of public health (MPH) degree emphasizes local, national, and global health practice. The program emphasizes interdisciplinary teaching, and focuses on core competencies/skills and uses cases/other materials from both the U.S. and abroad. The pedagogy allows students to tailor their education to community level, national, or global interests in the U.S. and countries around the world, emphasizing interdisciplinary public health competencies, including biostatistics and epidemiology; cultural competency; health communication; leadership; professionalism; planning, implementation and evaluation methods; public health biology; and systems thinking.

The MPH@GW track is taught in 10-week quarters across the calendar year (4 quarters per year).

Mission

Provide a practice-oriented MPH curriculum that enables graduates to be leaders in the design of population and community health programs in the US and globally.

Visit the program website (<http://publichealthonline.gwu.edu>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 45 credits, including 17 credits in core courses, 10 credits in program-specific courses, 16 credits in elective courses, and a 2-credit culminating experience.

Code	Title	Credits
Required		
Core		
PUBH 6002	Biostatistical Applications for Public Health	
PUBH 6003	Principles and Practices of Epidemiology	
PUBH 6007	Social and Behavioral Approaches to Public Health	
PUBH 6009	Fundamentals of Public Health Program Evaluation	
PUBH 6011	Environmental and Biological Foundations of Public Health	

PUBH 6012	Fundamentals of Health Policy
PUBH 6021	Essentials of Public Health Practice and Leadership I
PUBH 6022	Essentials of Public Health Practice and Leadership II
PUBH 6023	Interprofessional Education Experience
Program-specific	
PUBH 6052	Practical Data Management and Analysis for Public Health
PUBH 6442	Comparative Global Health Systems
PUBH 6500	Planning and Implementing Health Promotion Programs
PUBH 6503	Introduction to Public Health Communication and Marketing
Culminating experience	
PUBH 6060	MPH@GW Culminating Experience I
PUBH 6061	MPH@GW Culminating Experience II
Electives	

16 credits in any graduate-level SPH courses.

Visit the MPH@GW website (<https://publichealthonline.gwu.edu/academics/one-year-mph-program/>) for an updated list of elective options.

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits.
2. Course requirements: Successful completion of core and program-specific courses.
3. Practicum Requirement: Students are required to fulfill all requirements of the Applied Practice Experience (Practicum) to receive credit for PUBH 6022.
4. Interprofessional Education Experience (IPE): Students are required to enroll and participate in an authorized IPE activity (PUBH 6023).
5. Minimum grade-point requirement: minimum 3.0 (B average) cumulative grade-point average.
6. Time limit requirement: The degree must be completed within five years.
7. Transfer credit policy: With approval, up to 12 graduate credits that have not been applied to any previous graduate degree may be transferred to the master of public health program. External credits must have been earned from an accredited institution in the last three years with a minimum grade of 3.0 (B) in each course. Students in SPH graduate certificate programs can transfer as many credits earned

toward the certificate to the MPH degree as meet MPH degree requirements, to a maximum of 18 credits.

8. Graduate certificate students wishing to transfer to a degree program may apply to do so after completion of three or more courses with a cumulative GPA of 3.0 via the online change of concentration petition (<https://publichealth.gwu.edu/academics/forms/>). A grade of B or above is required for a specific course to be eligible for transfer.
9. CITI Training requirement: All students are required to complete training regarding human subject protection regulation and the Health Insurance Portability and Accountability Act of 1996 (HIPAA).
10. Integrity Quiz and Plagiarism requirement: All students are required to review the George Washington University Code of Academic Integrity (<https://studentconduct.gwu.edu/code-academic-integrity/>) and take the SPH Academic Integrity Quiz at GWSPH Source (<https://source.publichealth.gwu.edu/user/login/?destination=node/193>). within their first semester of study.
11. Professional Enhancement requirement: Students must participate in eight hours of public health-related lectures, seminars, and symposia, related to their field of study.

MASTER OF SCIENCE IN THE FIELD OF BIOSTATISTICS

Program Director and Academic Advisor A. F. Elmi

The master of science (MS) degree program in biostatistics is jointly administered by the Department of Statistics in the Columbian College of Arts and Sciences (CCAS) and the Department of Epidemiology and Biostatistics in the Milken Institute School of Public Health (SPH) and its associated research facility, The Biostatistics Center. This degree program is accredited by the Middle States Commission on Higher Education through the CCAS and by the Council on Education for Public Health through the SPH Regulations, and requirements for this graduate degree have been designed to be compatible with policies and scholarship requirements of both CCAS and SPH. The degree is conferred by Columbian College.

Visit the program website (<http://publichealth.gwu.edu/programs/biostatistics-ms/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 33 credits, including 18 credits in core statistics courses, 7 credits in core public health courses, 6 credits in elective courses, and 2 credits in consulting.

Admission Considerations

The courses listed below (or equivalents) are prerequisites for admission consideration and must appear on the student's

transcript. Students may apply to the program only after they have fulfilled this requirement:

Code	Title	Credits
MATH 1231	Single-Variable Calculus I	
MATH 1232	Single-Variable Calculus II	
STAT 2118	Regression Analysis	

Applicants lacking the courses listed below (or equivalents) are considered for admission; however, if admitted, the student is required to complete these courses within two semesters of matriculation in the program. Credit earned in these courses does not count toward the 33 credits required for the degree and grades earned are not reflected in the overall grade-point average.

Code	Title	Credits
MATH 2184	Linear Algebra I	
MATH 2233	Multivariable Calculus	
One of the following:		
PUBH 6853	Use of Statistical Packages for Data Management and Data Analysis *	
STAT 2183	Intermediate Statistics Lab/Packages	

*Previously PUBH 6249.

Degree Requirements

Code	Title	Credits
Required statistics courses		
PUBH 6266	Biostatistical Methods	
or PUBH 8877	Generalized Linear Models in Biostatistics	
STAT 6201	Mathematical Statistics I	
STAT 6202	Mathematical Statistics II	
STAT 6210	Data Analysis	
STAT 6227	Survival Analysis	
STAT 6255	Clinical Trials	
or PUBH 6866	Principles of Clinical Trials	
Public health courses		
PUBH 6003	Principles and Practices of Epidemiology	
2 credits (two courses) selected from the following:		

PUBH 6262	Introduction to Geographic Information Systems
PUBH 6263	Advanced GIS
PUBH 6850	Introduction to SAS for Public Health Research
PUBH 6851	Introduction to R for Public Health Research
PUBH 6852	Introduction to Python for Public Health Research
PUBH 6856	Advanced SAS for Public Health Research
2 additional credits in any PUBH course(s) in the 6800 range.	
Approved Electives	
6 credits in elective courses selected from the following:	
PUBH 6854	Applied Computing in Health Data Science
PUBH 6859	High Performance and Cloud Computing
PUBH 6860	Principles of Bioinformatics
PUBH 6861	Public Health Genomics
PUBH 6862	Applied Linear Regression Analysis for Public Health Research
PUBH 6863	Applied Meta-Analysis
PUBH 6865	Applied Categorical Data Analysis
PUBH 6879	Propensity Score Methods for Causal Inference in Observational Studies
PUBH 6884	Bioinformatics Algorithms and Data Structures
PUBH 6886	Statistical and Machine Learning for Public Health Research
PUBH 6887	Applied Longitudinal Data Analysis for Public Health Research
STAT 3187	Introduction to Sampling
STAT 4181	Applied Time Series Analysis
STAT 4188	Nonparametric Statistics Inference
STAT 6197	Fundamentals of SAS Programming for Data Management
STAT 6214	Applied Linear Models

STAT 6215	Applied Multivariate Analysis I
STAT 6216	Applied Multivariate Analysis II
STAT 6217	Design of Experiments
STAT 6223	Bayesian Statistics: Theory and Applications
STAT 6225	Longitudinal Data Analysis
STAT 6231	Categorical Data Analysis
STAT 6240	Statistical Data Mining
STAT 6242	Modern Regression Analysis
STAT 6252	Statistical Methods in Bioinformatics and Computational Biology
STAT 6254	Statistical Genetics
STAT 6287	Sample Surveys
STAT 6289	Topics in Statistics
STAT 8226	Advanced Biostatistical Methods
STAT 8265	Multivariate Analysis
STAT 8273	Stochastic Processes I
STAT 8281	Advanced Time Series Analysis
STAT 8288	Topics in Sample Surveys

Consulting

PUBH 6883	Biostatistics Consulting Practicum
PUBH 6869	Principles of Biostatistical Consulting

Master's Comprehensive Examination

Students must successfully complete a master's comprehensive examination, a written examination in the field of biostatistics and is based on the material covered in PUBH 6266 or PUBH 8877. The examination is administered by the faculty of the Department of Biostatistics and Bioinformatics in the Milken Institute School of Public Health.

MASTER OF SCIENCE IN THE FIELD OF EPIDEMIOLOGY

Program Director S.D. Cleary

The Department of Epidemiology and Biostatistics offers the master of science (MS) in the field of epidemiology degree program. The goals of the program are to prepare students for careers in industry or academia and for continued study in a doctoral program. The program includes coursework

that focuses on theoretical and applied epidemiological and statistical methods.

Applicants must have completed 6 credits in calculus I and II and 8 credits in human biology prior to beginning the program. Prior completion of 3 credits of linear algebra and 3 credits of SAS are strongly recommended.

Visit the program website (<http://publichealth.gwu.edu/programs/epidemiology-ms/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 33 credits, including 13 credits in public health core courses, 6 credits in statistics core courses, 2 credits in program-specific courses, 9 credits in elective courses, and 3 credits consulting and thesis.

Preparatory requirements

The courses listed below (or equivalents) are prerequisites for admission consideration, and must appear on the student's transcript.

Code	Title	Credits
BISC 1115	Introductory Biology: Cells and Molecules	
BISC 1116	Introductory Biology: The Biology of Organisms	
MATH 1231	Single-Variable Calculus I	
MATH 1232	Single-Variable Calculus II	

Additional course requirements

Applicants who have not already completed one of the courses listed below (or equivalents to these GW courses) are considered for admission, but are eligible for conditional admission only. In such cases, students are expected to satisfactorily complete one of the courses within two semesters from matriculation in the program.

Code	Title	Credits
PUBH 6853	Use of Statistical Packages for Data Management and Data Analysis	
or STAT 2183	Intermediate Statistics Lab/Packages	

Program requirements

Code	Title	Credits
Public health core		
PUBH 6003	Principles and Practices of Epidemiology ¹	
PUBH 6247	Design of Health Studies ¹	
PUBH 6252	Advanced Epidemiology Methods ¹	
PUBH 6080	Pathways to Public Health (required of students without an MPH degree only)	
4 additional credits in any graduate-level EXNS or PUBH courses.		
Statistics core		
One of the following two-course, 6-credit sets:		
PUBH 6264 & PUBH 6260	Quantitative Methods and Advanced Data Analysis for Public Health	
or PUBH 6865	Applied Categorical Data Analysis	
STAT 4157 & STAT 4158	Introduction to Mathematical Statistics I and Introduction to Mathematical Statistics II ²	
STAT 6201 & STAT 6202	Mathematical Statistics I and Mathematical Statistics II	
Program-specific		
At least one course (2 credits) selected from the following:		
PUBH 6242	Clinical Epidemiology and Public Health: Reading the Research	
PUBH 6244	Cancer Epidemiology	
PUBH 6245	Infectious Disease Epidemiology	
PUBH 6250	Epidemiology of HIV/AIDS	
PUBH 6259	Epidemiology Surveillance in Public Health	
Electives		
9 credits in any graduate-level PUBH courses. Other courses may be substituted with prior approval of the advisor's approval. ³		
Consulting and thesis		
PUBH 6869	Principles of Biostatistical Consulting	
PUBH 6999	Master of Science in Epidemiology Thesis	

¹ Basis for master's general comprehensive examination.

² In lieu of STAT 4157 and STAT 4158, students interested in applying to the PhD program in epidemiology may take STAT 6201 Mathematical Statistics I and STAT 6202 Mathematical Statistics II with the advisor's approval.

³ Undergraduate-level courses may be approved for graduate credit provided additional work assigned.

MASTER OF SCIENCE IN THE FIELD OF EXERCISE SCIENCE WITH A CONCENTRATION IN STRENGTH AND CONDITIONING

Program Director T.A. Miller

The mission of the program is to provide formal graduate level academic instruction in the science and theory of resistance training, as well as to promote student production of research that directly relates to the neuromuscular adaptations involved with resistance training.

This program is primarily delivered online. Contact the Program Director for additional information.

Visit the program website (<https://publichealth.gwu.edu/programs/strength-and-conditioning-ms/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits, including 17 credits in core courses, 10 credits in program-specific courses, 3 credits in elective courses, and a 6-credit internship.

Code	Title	Credits
Prerequisites		
An undergraduate course in exercise physiology must be completed, with a minimum grade of B, prior to beginning the program.		
Core		
EXNS 6202	Advanced Exercise Physiology I	
EXNS 6203	Advanced Exercise Physiology II	
EXNS 6207	Psychological Aspects of Sport and Exercise	
EXNS 6208	Physical Activity: Physiology and Epidemiology	
PUBH 6002	Biostatistical Applications for Public Health	

PUBH 6619 Fundamentals of Nutrition Science

PUBH 6080 Pathways to Public Health

Program-specific

EXNS 6220 Power Training for Sports Performance

EXNS 6221 Science and Theory of Training

EXNS 6222 Current Topics in Strength and Conditioning

EXNS 6223 Biomechanical Analysis

Electives

3 credits in course(s) approved by the program director.

Culminating experience

EXNS 6233 Graduate Internship

Comprehensive examination

Successful completion of a comprehensive examination is required.

Graduation requirements

1. Graduate credit requirement: 36 graduate credits
2. Course requirements: successful completion of core and program specific courses
3. Examination requirement: pass the American College of Sports Medicine Clinical Exercise Specialist® certification examination (clinical exercise physiology only)
4. Grade point requirement: 3.0 (*B* average) overall grade-point average
5. Time limit requirement: the degree must be completed within five years
6. Transfer credit policy: up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the MSES Courses need to have been taken within the past three years from an accredited institution with a grade of *B* or above

MASTER OF SCIENCE IN THE FIELD OF PUBLIC HEALTH MICROBIOLOGY AND EMERGING INFECTIOUS DISEASES

Program Co-Directors M. Ghosh and I. Kuo

Mission

The mission of the master of science (MS) in the field of public health microbiology and emerging infectious diseases degree program is to provide training to a new generation of public

health professionals to expand knowledge and expertise in the areas of disease mechanisms, with an emphasis on microbial pathogens, the use and application of modern biotechnologies, and in epidemiologic skills relevant to the prevention and control of problems in the community arising from infectious diseases.

Graduates of the MS program have an in-depth understanding of the major laboratory, clinical, and public health aspects of humankind's microbial pathogens, and acquire epidemiologic skills relevant to the prevention and control of problems arising from infectious diseases and modern biotechnologies. Areas of emphasis include the design and analysis of epidemiologic data; emerging infections; tropical diseases; and applications of genomics, proteomics, and bioinformatics. MS graduates are employed in academic and industrial research laboratories, international health agencies, NGOs, and private consulting groups. In addition, they may work in federal, state, and local public health agencies or state and local public health laboratories where their technical expertise and population-based perspective are extremely useful. Students earning this degree help meet a national demand that has reached critical proportions for a trained workforce in biodefense and emerging infections, and an international demand for training in diseases that affect the developing countries.

Goals

The goals of the MS program in the field of public health microbiology and emerging infectious diseases are to ensure that graduates:

- Identify the biological complexities of microbial pathogens and the diseases they cause
- Recognize the major epidemiologic and clinical features of microbial disease
- Identify how new biotechnologies (including genomics, proteomics, and bioinformatics) can be applied to the study and control of microbial pathogens
- Develop an in-depth understanding of epidemiologic principles and practice
- Apply the principles of epidemiology, microbiology, and public health practice toward the detection, surveillance, investigation, and control of microbial diseases

Visit the program website (<https://publichealth.gwu.edu/programs/public-health-microbiology-and-emerging-infectious-diseases-ms/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 45 credits, including 10 credits in foundational core courses, 23 credits in program-specific courses, 8 credits in elective courses, and 4 credits in field/laboratory experience and final project.

Code	Title	Credits		
Required				
Foundation courses			PUBH 6238	Molecular Epidemiology
PUBH 6002	Biostatistical Applications for Public Health		PUBH 6239	Epidemiology of Foodborne and Waterborne Diseases
PUBH 6003	Principles and Practices of Epidemiology		PUBH 6240	Pediatric HIV/AIDS
PUBH 6007	Social and Behavioral Approaches to Public Health		PUBH 6242	Clinical Epidemiology and Public Health: Reading the Research
PUBH 6275	Essential Public Health Laboratory Skills		PUBH 6243	Topics in Clinical Epidemiology and Public Health: Reading the Research
PUBH 6080	Pathways to Public Health		PUBH 6250	Epidemiology of HIV/AIDS
Program-specific courses			PUBH 6252	Advanced Epidemiology Methods
PUBH 6245	Infectious Disease Epidemiology		PUBH 6253	Issues in HIV Care and Treatment
PUBH 6247	Design of Health Studies		PUBH 6255	Organizational Responses to the Local, National, and Global HIV/AIDS Epidemics
PUBH 6259	Epidemiology Surveillance in Public Health		PUBH 6263	Advanced GIS
PUBH 6262	Introduction to Geographic Information Systems		PUBH 6271	Disaster Epidemiology
PUBH 6276	Public Health Microbiology		PUBH 6272	Epidemiology of Infectious Agents Associated with Human Cancer
PUBH 6278	Public Health Virology		PUBH 6282	Introduction to R Programming
PUBH 6853	Use of Statistical Packages for Data Management and Data Analysis		PUBH 6299	Topics in Epidemiology (Epidemiology of Sexually Transmitted Infections) *
PUBH 6861	Public Health Genomics		PUBH 6299	Topics in Epidemiology (HIV Prevention Epi and Methods) *
MICR 8210	Infection and Immunity		PUBH 6299	Topics in Epidemiology (Cancer Immunotherapy) *
Electives			PUBH 6299	Topics in Epidemiology (Public Health Lab Response to EID) *
8 credit in courses selected from the following and/or other courses approved in advance by the advisor.			PUBH 6299	Topics in Epidemiology (Next Gen Sequencing Laboratory Skills) *
PUBH 6011	Environmental and Biological Foundations of Public Health		PUBH 6455	Global Vaccinology
PUBH 6127	Introduction to Environmental Health Microbiology		PUBH 6484	Prevention and Control of Vector Borne Diseases
PUBH 6199	Topics in Environmental and Occupational Health (Microbiomes and Microbial Ecology in Public Health) *		PUBH 6486	Global Health Programs and Approaches to the Control of Infectious Diseases
PUBH 6233	Epidemiologic Principles and Practice of Disease Eradication		MICR 6292	Tropical Infectious Diseases
PUBH 6234	Epidemiologic Methods in Neglected Tropical Disease Control		MICR 8230	Molecular and Cellular Immunology
			Field/laboratory experience and final project	
			PUBH 6016	Field/Laboratory Experience

PUBH 6280	Microbiology and Emerging Infectious Diseases Final Project
-----------	---

*For PUBH 6199 and PUBH 6299, only the specified topics count toward program requirements.

MASTER OF SCIENCE IN THE FIELD OF MANAGEMENT OF HEALTH INFORMATICS AND ANALYTICS

Program Director P. MacTaggart

Rising demand in the field of health informatics can be attributed to the dramatic increase in biological and clinical data, as well as pressure to have better patient outcomes. Due to massive systematic changes and government mandates, it is critical, and often mandatory, that healthcare providers integrate new technologies to increase patient satisfaction and continuously search for new ways to leverage data that will improve public health.

The master of science in health informatics and analytics program (HealthInformatics@GW), tailored for current managers and executives in healthcare, teaches students to look at healthcare through a new lens and develop improvements that impact organizational, operational and medical needs for providers and patients alike. Graduates acquire the ability to effectively translate data that will improve health care decisions and develop an expertise in areas such as health policy, community health analytics, and health innovation and disruption. They also gain skills in project management, business intelligence, health innovation, predictive analysis and the Internet of Things.

Visit the program website (<https://publichealthonline.gwu.edu/form-mhi/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 45 credits in required courses, including 3 credits in immersion experiences.

Code	Title	Credits
Required		
HSML 6264	Health Care Management and Strategy	5
HSML 6265	Medical Informatics and Decision Management	5
HSML 6280	Health Law and Policy	5
HSML 6290	Health IT Project Management	5
HSML 6291	Population and Community Health Analytics	5

HSML 6293	The Internet of Medical Things	3
HSML 6294	Research Analytics	0,3
HSML 6295	Predictive Analytics	3
HSML 6296	Health Innovations and Entrepreneurship	5
PUBH 6080	Pathways to Public Health	0
Immersion experiences		
HSML 6255	Leadership and Ethics I	1.5
HSML 6297	Health Informatics Simulation	1.5

Other requirements

Students take a 3-credit course in business intelligence offered through the Consortium of Universities of the Washington Metropolitan Area.

DUAL MASTER OF PUBLIC HEALTH AND DOCTOR OF MEDICINE

Program Director K. Bartholomew

The goal of the School of Medicine and Health Sciences (SMHS) is to graduate clinician-citizens who are prepared to deliver excellent patient care while pursuing scholarly inquiry, serving as leaders and advocates to address population-level issues that have an impact on individual health, and engaging with communities to improve health at the local, national, and global levels. To further these goals, SMHS and the Milken Institute School of Public Health (GWSPH) provide a dual medicine-public health program (MD/MPH) degree for medical students.

The MD degree is the primary degree in the dual program. Students receive the MD degree upon successful completion of all MD program requirements. In order to receive the MPH degree as part of the dual program, all requirements for both the MD and MPH must be successfully completed. For the MPH, students in the dual degree program follow [MPH@GW curriculum requirements](#).

Students may begin MPH coursework during the summer following either Year 1, Year 3, or Year 4 of the MD program. All MD/MPH students are granted a one-year leave of absence from the MD program to complete MPH curriculum requirements.

MD/MPH students may pursue any of the following residential MPH programs:

- Community oriented primary care
- Environmental health science and policy
- Epidemiology

- Global environmental health
- Global health policy
- Global health program design, monitoring, and evaluation
- Global health epidemiology and disease control
- Health policy
- Health promotion
- Maternal and child health
- Public health communication and marketing

REQUIREMENTS

Adjusted requirements for the MPH when taken as part of the dual program

Code	Title	Credits
Adjusted MPH core curriculum requirements		
Core (11 credits)		
PUBH 6002	Biostatistical Applications for Public Health	
PUBH 6003	Principles and Practices of Epidemiology	
PUBH 6007	Social and Behavioral Approaches to Public Health	
PUBH 6009	Fundamentals of Public Health Program Evaluation	
PUBH 6022	Essentials of Public Health Practice and Leadership II	
Program-Specific (10 credits)		
PUBH 6052	Practical Data Management and Analysis for Public Health	
PUBH 6442	Comparative Global Health Systems	
PUBH 6500	Planning and Implementing Health Promotion Programs	
PUBH 6503	Introduction to Public Health Communication and Marketing	
Electives (9 credits)		
9 credits taken in any graduate-level PUBH courses.		

Cross crediting

Completion of 45 credits is required for the standalone MPH program. For the dual MD/MPH, students in both programs must complete a minimum of 30 credits in MPH coursework. Up to 15 credits from the MD curriculum may be cross credited between programs.

- **MPH core courses: 11 credits in MPH core courses are required instead of the 17 credits required for the standalone MPH**

MD/MPH students take 11 credits of the regular MPH@GW core coursework. In addition, they receive a total of 6 credits from cross crediting MD program coursework. These credits fulfill the requirement for the following MPH core courses: PUBH 6011 Environmental and Biological Foundations of Public Health (3 credits), PUBH 6012 Fundamentals of Health Policy (2 credits), and PUBH 6021 Essentials of Public Health Practice and Leadership I (1 credit).

- **MPH culminating experience: 2 credits are cross credited from MD coursework**

MD/MPH students satisfy the 2-credit MPH requirements in PUBH 6015 Culminating Experience by cross crediting of coursework MD coursework.

- **MPH program-specific requirements: 10 credits of PUBH-specific coursework**

MD/MPH students complete required program-specific MPH courses PUBH 6052, PUBH 6442, PUBH 6500, and PUBH 6503 (10 credits).

- **MPH elective requirement: 9 credits in PUBH course**

Students must take a minimum of 9 elective credits in any PUBH courses. The MPH program will accept up to 7 credits from the MD program to count toward additional MPH elective requirements.

- **Cross-counting MPH credits for MD Year 4 electives**

4 credits in MPH coursework taken in PUBH 6007 (2 credits) and PUBH 6009 (2 credits) are cross-counted as four weeks of MD Year 4 electives.

DUAL MASTER OF HEALTH ADMINISTRATION AND GRADUATE CERTIFICATE IN HEALTH CARE CORPORATE COMPLIANCE

Program Director J.H. Thorpe

The Milken Institute School of Public Health and the College of Professional Studies (CPS) offer a dual master of health administration (p. 1331) and graduate certificate program in corporate compliance (<https://cps.gwu.edu/healthcare-compliance/>) program. The 12 credits earned in CPS's graduate certificate program may be applied toward the MHA program elective requirements. All requirements for both programs must be fulfilled.

Visit the MHA program (p. 1331) and CPS graduate certificate program (<http://cps.gwu.edu/healthcare-compliance/>) websites for additional information.

DUAL MASTER OF PUBLIC HEALTH IN THE FIELD OF HEALTH POLICY AND GRADUATE CERTIFICATE IN HEALTH CARE CORPORATE COMPLIANCE

Program Director J. H. Thorpe

Given the dramatic changes in health care policy and regulation over the past decade, the role of compliance professionals has become increasingly important in the health care industry. No other position can have so profound an impact on your health care organization's success—or failure. Legislation such as the Health Insurance Portability and Accountability Act (HIPAA) and the federal Anti-Kickback and Stark Laws have created the need for university-based credentials for this increasingly specialized—and increasingly complicated—field.

The College of Professional Studies (CPS) offers a unique 12-credit graduate certificate program providing a comprehensive health care corporate compliance education. Drawing faculty and expertise from both the Department of Health Policy and Management in the Milken Institute School of Public Health and a leading health care law firm in Washington, DC, the program offers education in health care laws and regulations as well as tools and strategies for creating effective corporate compliance programs.

Visit the program website (<https://publichealth.gwu.edu/programs/joint-degree-healthcare-corporate-compliance-certificate/>) for additional information.

REQUIREMENTS

Program Requirements

Designed for working professionals, the 12-credit graduate certificate in health care corporate compliance (GW HCC Program or Program) provides students with a uniquely comprehensive education in health care corporate compliance. The Program is designed for current or aspiring corporate compliance officers and other working in compliance-related fields. The course of study, offered in just over seven months, is divided into three segments: five-day, in-classroom residency at the Graduate Education Center in Alexandria, VA (3 credits); six-month, online distance learning segment (6 credits); and three-day, in-classroom capstone back in Alexandria, VA (3 credits).

The graduate certificate in health care corporate compliance can be awarded in conjunction with a Master of Public Health in the field of health policy. The 12 credits earned through the

graduate certificate in health care corporate compliance may be applied toward this MPH.

All other degree requirements for the MPH program must be fulfilled as noted on the MPH in the field of health policy program page (p. 1346).

College of Professional Studies

The graduate certificate in health care corporate compliance is awarded through the College of Professional Studies.

Visit the CPS website (<http://cps.gwu.edu/healthcare-compliance/>) for more information.

JOINT MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF PHYSICIAN ASSISTANT AND MASTER OF PUBLIC HEALTH

Program Director H. Straker

Mission Statement

As the U.S. health care system continues to evolve, market forces and changing personnel requirements create new and expanding roles for health care professionals. The joint physician assistant-master of science in health sciences/master of public health PA-MSHS/MPH program strives to fill the need for a new type of health care professional: one who has both the depth of medical knowledge and the range of leadership and policy skills to meet the challenges of future practice. Based in both the Milken Institute School of Public Health (SPH) Department of Prevention and Community Health, and the School of Medicine and Health Sciences (SMHS), the PA-MSHS/MPH program presents a graduate curriculum that blends two important traditional paradigms of health care—the biomedical and the preventive. Health care professionals in the future U.S. health system must be prepared as competent and caring clinicians, as well as bring a broad view of population health and prevention to their work. Graduates of the GW PA/MPH program are leaders in clinical practice in primary care and preventive medicine and have the preparation to assume high level positions in education, research, and policy.

Goals

The PA-MSHS/MPH provides the opportunity for students to obtain the competencies necessary to succeed in the rapidly evolving American and global health systems.

The major goals of GW's PA-MSHS/MPH program are to:

- Recruit diverse and intellectually curious students and develop in them a strong clinical medical and prevention knowledge base necessary to deliver the highest quality patient-centered health care in a variety of clinical settings worldwide;

- Educate future health care professionals who are competent clinicians who can bring a population health orientation to their practice setting;
- Develop practitioners for the future who integrate concepts of prevention, community-oriented primary care, and population health;
- Graduate collaborative clinicians who serve the health care needs of a worldwide community with intelligence, compassion, and integrity;
- Foster analytic thinking skills such that graduates are able to perform a wide range of clinical tasks working with physicians, as well as assessing community health problems and addressing population health needs;
- Nurture a sensitivity and respect for the cultural and personal beliefs of all patients and an understanding of how social, economic, and other system forces can impact health and health care and how these impact patient morbidity and mortality;
- Encourage graduates to be responsive to the needs of patients and society and advocate for quality patient care regardless of patient population;
- Graduate practitioners who will have the information technology and research skills necessary to access and interpret the medical literature and support their ongoing professional development; and
- Expect graduates to practice collaboratively, professionally, legally, ethically, and with integrity.

The PA-MSHS/MPH program draws from a faculty in both the School of Medicine and Health Sciences and the Milken Institute SPH to provide instruction in a wide range of subjects in medicine, public health, and professional leadership.

The purpose of the PA-MSHS/MPH program is to provide future clinicians with a wide range of skills in leadership, policy development, and community and preventive medicine. Students in the program prepare as clinicians fulfilling all of the requirements for national certification as a physician assistant (PA) in the GW Physician Assistant program. In addition, public health coursework provides an orientation to population and community health. For example, in the Community Oriented Primary Care (COPC) track, students acquire skills in community health assessment, community based interventions, and the application of COPC principles in community based practice settings. GW's SPH coursework in health care administration, management, and health care economics prepares students to be leaders in a wide variety of clinical settings, office practices, outpatient clinics, community-based health centers, and health care institutions. Students are also exposed to the formulation of health policy.

Set in the center of the health policy in the nation, the PA-MSHS/MPH program affords students the chance to interact with individuals in both the public and private sector who are involved in policy research, practice, and legislation.

Visit the MPH program website (<http://publichealth.gwu.edu/academics/graduate/masters-programs/>) for additional information.

Visit the PA program website (<https://smhs.gwu.edu/physician-assistant/pa-program/>) for additional information.

Admissions Requirements

Prospective students interested in the joint PA/MPH program receive correspondence from both the School of Medicine and Health Sciences (for the PA-MSHS) and the Milken Institute SPH and School of Medicine and Health Services (for the MPH) regarding the completion of their application and admissions decisions. Should the applicant be accepted to one degree program and not the other, they may accept the admissions offer from the program to which they were accepted, as the decisions are made separately.

1. Submit the PA application (CASPA and PA secondary application) according to instructions. (<http://smhs.gwu.edu/pas/program/prospective-students/admissions/>)
2. Submit the PA secondary application within two weeks of submitting the CASPA.
3. October 1 is the deadline for complete applications to include GRE score receipt.

To save the applicant time and application fees, the School of Medicine and Health Services provides a copy of application materials to the Milken Institute SPH admissions office. Applicants should not complete SOPHAS application or the SPH secondary application, as this delays the processing of the application and results in increased application fees.

COMMUNITY-ORIENTED PRIMARY CARE

Community-Oriented Primary Care Track

The following requirements must be fulfilled: 138 credits, including 100 credits in physician assistant courses, 17 credits in public health core courses, and 21 credits in department and program specific coursework as outlined.

JOINT PUBLIC HEALTH AND LAW PROGRAMS

Program Contact J. Teitelbaum

The Milken Institute of School of Public Health (SPH), through its Hirsh Health Law and Policy Program, cooperates with the Law School to offer public health and law students multiple programs that foster an interdisciplinary approach to the study of health policy, health law, public health, and health care. Available joint programs include the master of public health (p. 1183) (MPH) and juris doctor (<https://www.law.gwu.edu/juris-doctor/>) (JD); MPH and master of laws (<https://www.law.gwu.edu/master-of-laws/>) (LLM); and JD or LLM and SPH certificate in various subject areas. LLM students may be enrolled in either the general or environmental law program at the Law School.

Application of credits between programs

For the JD/MPH, 8 JD credits are applied toward the MPH and up to 12 MPH credits may be applied toward the JD. For the LLM/MPH, 8 LLM credits are applied toward the MPH and up to 6 MPH credits may be applied toward the LLM. For the JD or LLM/SPH certificate programs, each school allows 6 credits to be applied toward the other's program.

Admission

Applicants to joint programs may apply for admission to SPH at the same time they apply to the Law School or after admission to the Law School. JD candidates who do not apply to both schools simultaneously are encouraged to apply for the MPH degree or certificate program by the end of March of their first year of law school. LLM candidates are encouraged to apply

to SPH when they apply to the Law School or during their first semester of study.

Applicants to a joint program must complete the application processes for both the Law School (JD or LLM degree) and for the School of Public Health (MPH degree or certificate).

Admission to the joint degree program requires admission to both schools. However, because admission to each school is separate and distinct, applicants who are accepted by one school but not the other are free to enroll in the school to which they have been accepted.

SPH (<http://publichealth.gwu.edu/admissions/graduate-admissions/>) and Law School (<http://www.law.gwu.edu/Admissions/Pages/Default.aspx>) applicants may apply online. Applicants must complete the SOPHAS application as indicated at the SPH admissions site, whether applying simultaneously to both schools or as a current GW Law student.

Program Costs

SPH coursework taken while enrolled as a full- or part-time law student is charged at the Law School tuition rate. The SPH tuition rate and fees are charged for semesters when no Law School courses are taken, including summer sessions.

Visit the Hirsh Program website (<http://publichealth.gwu.edu/programs/joint-jdllm-mphcertificate/>) for additional information.

REQUIREMENTS

MPH requirements in the joint degree programs

The course of study for the standalone MPH degree, in one of several focus areas, (<http://publichealth.gwu.edu/node/766/>) consists of 45 credits, including a supervised practicum. In the dual degree programs with the Law School, the Milken Institute School of Public Health (GWSPH) accepts 8 Law School credits toward completion of the MPH degree. Therefore, Juris doctor (JD) and master of laws (LLM) students in the dual program complete only 37 credits of coursework through GWSPH to obtain an MPH degree.

Depending upon the focus area in which a JD student chooses to study, as a rule, the joint degree can be earned in three-and-a-half or four years of full-time study, including summer enrollment. JD candidates selecting joint degree studies in one of the more science-oriented areas, such as epidemiology or biostatistics, should anticipate a four-year course of study. Candidates selecting a less scientific area, such as health policy or health management, can expect to complete their joint degrees in three-and-a-half years. Full-time LLM/MPH candidates should anticipate completing the joint degree in approximately two years. Part-time JD and LLM candidates pursuing joint degrees will have longer courses of study.

Graduate certificate requirements in the joint program

The course of study for the standalone graduate certificate in health policy requires a total of 18 credits. In the dual program, 6 credits taken in the JD or LLM curriculum may be counted

toward graduate certificate requirements. This allows law students to complete the certificate program by taking only 12 credits in GWSPH coursework.

The graduate certificate in public health—a generalist certificate—requires 15 credits as a standalone program. In the dual program, 2 credits taken in the JD or LLM curriculum may be used to replace in the certificate curriculum. This allows law students to complete the certificate program by taking only 13 credits in GWSPH coursework.

As degrees in joint programs are awarded simultaneously, requirements for both programs must be met before either degree is awarded.

DOCTORAL PROGRAMS

Doctoral programs

- Doctor of Philosophy in the field biostatistics (p. 1375)
- Doctor of Philosophy in the field of environmental health (p. 1378)
- Doctor of Philosophy in the field of epidemiology (p. 1379)
- Doctor of Philosophy in the field of exercise physiology and applied nutrition (p. 1381)
- Doctor of Philosophy in the field of health policy (p. 1382)
- Doctor of Philosophy in the field of social and behavioral sciences in public health (p. 1383)
- Doctor of Public Health in the field of environmental and occupational health (p. 1384)
- Doctor of Public Health in the field of global health (p. 1386)
- Doctor of Public Health in the field of health behavior (p. 1387)
- Doctor of Public Health in the field of health policy (p. 1388)

DOCTOR OF PHILOSOPHY IN THE FIELD OF BIOSTATISTICS

Program Director and Academic Advisor H. Liang (CCAS)

The PhD degree program in biostatistics provides doctoral training in the theory of probability, statistics focusing on biostatistical methodology. The 72-credit degree program is jointly administered by the Department of Statistics (<https://statistics.columbian.gwu.edu/>) in the Columbian College of Arts and Sciences (CCAS) and the Department of Epidemiology and Biostatistics in the Milken Institute School of Public Health (<http://publichealth.gwu.edu/>) (SPH) and its associated research facility, The Biostatistics Center. The program is accredited by the Middle States Commission on Higher Education through CCAS and by the Council on Education for Public Health through the Milken Institute SPH. Regulations and requirements for the graduate degree are compatible with

policies and scholarship requirements of both CCAS and SPH. The degree is conferred by CCAS.

Visit the program website (<https://publichealth.gwu.edu/programs/biostatistics-phd/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Columbian College of Arts and Sciences, Graduate Programs (p. 77).

The requirements for the Doctor of Philosophy Program (p. 87).

Required preparatory courses

Code	Title	Credits
Undergraduate course requirements (or equivalents to these GW courses) for admission consideration:		
MATH 1231	Single-Variable Calculus I	
MATH 1232	Single-Variable Calculus II	
STAT 2118	Regression Analysis	
MATH 2233	Multivariable Calculus	

Code	Title	Credits
Additional course requirements* (or equivalents to these GW courses):		
MATH 2184	Linear Algebra I	
One of the following courses:		
PUBH 6853	Use of Statistical Packages for Data Management and Data Analysis	
STAT 2183	Intermediate Statistics Lab/Packages	

*Applicants lacking these courses (or equivalents to these GW courses) will be considered for admission, but, if admissible, will be admitted conditionally with the expectation that these courses will be satisfactorily completed within two semesters following matriculation in the program. These credits do not count as credit toward the 72-credit graduation requirement nor are grades earned in additional courses reflected in the overall grade-point average.

Doctoral program requirements

The following requirements must be fulfilled: 72 credits, including a minimum of 51 credits in required and elective courses and a minimum of 12 credits in dissertation research; successful completion of the general and final examinations; and completion of the professional enhancement requirement. See below for additional information.

Code	Title	Credits
Required		
Statistics core		
STAT 6201	Mathematical Statistics I	
STAT 6202	Mathematical Statistics II (* Comprehensive Exam)	
STAT 6210	Data Analysis	
STAT 6213	Intermediate Probability and Stochastic Processes (* Comprehensive Exam)	
PUBH 8365	Design of Medical Studies	
PUBH 8366	Biostatistical Methods (* Comprehensive Exam)	
STAT 8226	Advanced Biostatistical Methods	
STAT 6227	Survival Analysis	
STAT 8263	Advanced Statistical Theory I	
STAT 6218	Linear Models	
Public health core		
PUBH 6003	Principles and Practices of Epidemiology	
One of the following:		
PUBH 6247	Design of Health Studies	
PUBH 6299	Topics in Epidemiology	
PUBH 6007	Social and Behavioral Approaches to Public Health	
or PUBH 6006		
Electives		
9 credits in electives from the following approved lists of STAT and PUBH courses.		
Approved statistics electives (at least 3 credits must be selected from among the first three courses below):		
STAT 6231	Categorical Data Analysis	
STAT 8262	Nonparametric Inference	
STAT 6214	Applied Linear Models	
STAT 6207	Methods of Statistical Computing I	
STAT 6208	Methods of Statistical Computing II	

STAT 6215	Applied Multivariate Analysis I
STAT 6216	Applied Multivariate Analysis II
STAT 6217	Design of Experiments
STAT 6223	Bayesian Statistics: Theory and Applications
STAT 6242	Modern Regression Analysis
STAT 6287	Sample Surveys
STAT 6289	Topics in Statistics
STAT 8257	Probability
STAT 8258	Distribution Theory
STAT 8263	Advanced Statistical Theory I
STAT 8264	Advanced Statistical Theory II
STAT 8265	Multivariate Analysis
STAT 8273	Stochastic Processes I
STAT 8274	Stochastic Processes II
STAT 8281	Advanced Time Series Analysis
STAT 8288	Topics in Sample Surveys
BIOS 8998	Advanced Reading and Research (see advisor)

Approved public health electives:

PUBH 6242	Clinical Epidemiology and Public Health: Reading the Research (recommended)
PUBH 6244	Cancer Epidemiology
PUBH 6245	Infectious Disease Epidemiology
PUBH 8419	Measurement in Public Health and Health Services

Consulting

Consulting courses may be waived by the Biostatistics Program Director, based on written documentation of prior equivalent coursework or relevant work experience. Waiver of the consulting course increases the total number of elective to be taken by the number of consulting credits waived.

PUBH 8283	Doctoral Biostatistics Consulting Practicum
PUBH 6258	Principles of Biostatistical Consulting

Dissertation research

BIOS 8999	Dissertation Research (taken for 6 to 24 credits)
-----------	--

General and final examinations

The general examination is given in two parts:

- Part I is the qualifying exam, a written comprehensive examination based on the course content of STAT 6201, STAT 6202 (administered by faculty of the Department of Statistics), and PUBH 8366 (administered by the faculty of the Department of Epidemiology and Biostatistics).
- The qualifying examination is given over a two-day period in the beginning of the fall semester of every academic year and consists of one four-hour theory exam and one two-hour biostatistical methods/applications exam. Students are expected to take the comprehensive examination within 24 months from the date of enrollment in the program. A student who fails to pass the comprehensive examination may, with the approval of the faculty, repeat the examination the following year. Failure on the second attempt results in termination from the PhD program.
- All examination questions focus on material that a person seeking a PhD in biostatistics is expected to know, regardless of subsequent specialization. The examination encompasses material in core mathematical statistics –STAT 6201 and STAT 6202–and biostatistical methods courses–PUBH 8366–in the PhD program in biostatistics. Specifically,
 1. The theory portion of the exam–STAT 6201 and STAT 6202–is based on the first 10 chapters of Casella G and Berger RL (1990). *Statistical Inference*. Second Edition, Duxbury Press.
 2. The biostatistical methods portion of the exam –PUBH 8366–is based on chapters 1 to 8 of Lachin J.M. (2010) *Biostatistical Methods: The Assessment of Relative Risks*, 2nd Edition, Wiley.
- Part II, the research proposal, consists of an oral examination based on a written dissertation research proposal. As soon as feasible after successful completion of the comprehensive exam, students are encouraged to identify a dissertation advisor and a topic of research. The written dissertation proposal is then submitted to the student's Dissertation Research Committee, and the student makes an oral presentation of their proposal to the Committee. The Committee determines the student's readiness to pursue and successfully complete the proposed research, in addition to the appropriateness of the specific problem for dissertation-level research.

Upon successful completion of the required coursework and both parts of the general examination, the candidate is generally recommended to the Associate Dean for Graduate Affairs of the Columbian College of Arts and Sciences (CCAS)

for promotion to PhD candidacy—the dissertation research. A candidate must file an approved dissertation research plan with CCAS before being admitted to PhD candidacy. Prior to completion of the general examination, a student may register for at most 6 credits of BIOS 8999.

Consult with the Biostatistics Program Director or academic advisor for dissertation guidelines.

Professional enhancement requirement: 8 hours

Professional enhancement activities supplement the academic curriculum and help prepare students to participate actively in the professional community. They enhance practical knowledge and awareness of public health issues – either in general or in a student’s specific area of study.

Students can fulfill this requirement by attending workshops, seminars, or other relevant professional meetings, which are often held at the Milken Institute School of Public Health (SPH) and in the metropolitan Washington, DC, area. Examples of conference sponsors include the National Academy for State Health Policy, the Pan American Health Organization, the American Public Health Association, the American College of Healthcare Executives, the Area Health Education Center, the American College of Sports Medicine, and the National Athletic Trainer’s Association. Opportunities for professional enhancement are regularly publicized via the SPH Listserv and through the department or the biostatistics academic advisor.

Students must submit documentation of professional enhancement activities to the biostatistics academic advisor, which includes a **prior** approval, a description of the program agenda, and proof of attendance before applying for graduation.

DOCTOR OF PHILOSOPHY IN THE FIELD OF ENVIRONMENTAL HEALTH

Program Directors K. Applebaum, L. Price

The mission of the doctor of philosophy (PhD) in the field of environmental health program is to educate individuals focused on developing new knowledge in the methods or applications of environmental health sciences that translates to environmental public health policy and practice. Program scholars will advance knowledge in analysis and laboratory sciences.

Graduates can expect to be able to:

- Demonstrate skills across a wide range of epidemiologic and biostatistical theories and methods.
- Use knowledge in environmental public health risk sciences.
- Understand general and specialized concepts and methodologies for scientific research in environmental health.

- Understand and identify data that scientifically addresses environmental health disparity issues related to environmental justice, occupational exposures and global inequities in exposures and susceptibilities.
- Demonstrate ability to work in interprofessional settings, e.g., in collaboration with quantitative, environmental, physical, and social scientists.
- Understand and abide by guidelines for ethical research practice and responsible conduct of research.
- Understand how to identify and appropriately work with communities from which research subjects are drawn and/or those who are most impacted by the conduct and results of the research.
- Conduct independent research, analyze data, and communicate results.
- Disseminate research findings to scientific and lay audiences.

Visit the program website (<https://publichealth.gwu.edu/programs/environmental-health-phd/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 72 credits, including 43 credits in required courses, 15 credits in elective courses, and 14 credits in dissertation courses.

Code	Title	Credits
Required		
Foundational (25 credits)		
PUBH 6002	Biostatistical Applications for Public Health	
PUBH 6003	Principles and Practices of Epidemiology	
PUBH 6011	Environmental and Biological Foundations of Public Health	
PUBH 6131 or PUBH 6853	Quantitative Methods in Environmental and Occupational Health Use of Statistical Packages for Data Management and Data Analysis	
PUBH 6247	Design of Health Studies	
PUBH 8110	Research Rotations	
PUBH 6080	Pathways to Public Health	
PUBH 8415	Instructional Leadership	
Environmental health core (21 credits)		

PUBH 6121	Environmental and Occupational Epidemiology
PUBH 6123	Toxicology: Applications for Public Health Policy
PUBH 6126	Assessment and Control of Environmental Hazards
PUBH 6144 & PUBH 8144	Environmental Health Data Development and Modeling and Advanced Environmental Health Data Development and Modeling
PUBH 8116	Communicating Research Results
PUBH 8411	Advanced Topics: Principles of Human Health Risk Science
PUBH 8412	Advanced Topics: Environmental and Occupational Health Research and Practice

Electives

A minimum of 12 credits in elective courses.

Dissertation

14 credits in dissertation research and preparation.

PUBH 8422	Advanced Health Care and Public Health Research Design
or PUBH 8435	Dissertation Proposal Development for Social and Behavioral Sciences
PUBH 8999	Dissertation Research

DOCTOR OF PHILOSOPHY IN THE FIELD OF EPIDEMIOLOGY

Program Director S. Cleary

Our graduate and PhD programs prepare students to conduct epidemiological research, undertake evaluation studies and monitor population health status in academic, governmental, private sector and community health settings. Opportunities exist for our students to collaborate with experts from the National Institutes of Health, National Cancer Institute, National Center for Health Statistics, Food and Drug Administration and many other federal research agencies. With courses scheduled in the late afternoons and early evenings, our programs allow students to attain valuable career experience while they earn their degrees. All applications are submitted through SOPHAS.org (<http://sophas.org/>).

Visit the program website (<https://publichealth.gwu.edu/programs/epidemiology-phd/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled:

72 credits, including 16 credits in public health core courses, and all requirements for the Doctor of Philosophy Program (p. 87); 15-18 credits in statistics core courses (depending on which option the student follows); 3 credits in program-specific epidemiology selective courses; a minimum of 14 to 17 credits in elective courses, depending on which option the student follows; 3 credits in consulting courses; and 12 to 21 credits in dissertation research; successful completion of a comprehensive exam.

Two program options are available: Option A is more quantitative and includes advanced statistical coursework in the Department of Statistics. Option B, while also quantitative, allows for courses and electives with a primary focus on public health.

Preparatory Requirements

Code	Title	Credits
Minimum prerequisite courses for admission consideration		
BISC 1111	Introductory Biology: Cells and Molecules	
BISC 1112	Introductory Biology: The Biology of Organisms	
MATH 1231	Single-Variable Calculus I	
MATH 1232	Single-Variable Calculus II	
MATH 2233	Multivariable Calculus (option A only)	

Additional course requirements for admissions consideration

The courses listed below are additional course preparatory requirements. Applicants lacking these courses (or equivalents to these GW courses) will be considered for conditional admission with the expectation that these courses will be completed within two semesters following matriculation in the program. Credit for these courses does not count toward the 72 credits required for the degree and grades earned are not reflected in the overall grade-point average.

MATH 2184	Linear Algebra I
STAT 2183	Intermediate Statistics Lab/Packages
or PUBH 6853	Use of Statistical Packages for Data Management and Data Analysis

Degree Requirements

Code	Title	Credits	
Required courses			and Doctoral Topics: Epidemiology of HIV/AIDS
Epidemiology and public health core			PUBH 6259 & PUBH 8259 Epidemiology Surveillance in Public Health and Doctoral Topics: Epidemiologic Surveillance in Public Health
PUBH 6003	Principles and Practices of Epidemiology		
PUBH 6080	Pathways to Public Health		
PUBH 6247	Design of Health Studies		
PUBH 6252	Advanced Epidemiology Methods		
PUBH 8419	Measurement in Public Health and Health Services		
4 additional credits in PUBH courses selected in consultation with the advisor.			
Statistics core			
PUBH 6865	Applied Categorical Data Analysis		
PUBH 6866	Principles of Clinical Trials		
PUBH 8877	Generalized Linear Models in Biostatistics		
STAT 6210	Data Analysis (OR)		
And completion of either Option A or Option B:			
Option A			
STAT 6201	Mathematical Statistics I		
STAT 6202	Mathematical Statistics II		
Option B			
PUBH 8364	Quantitative Methods		
Program-specific			
One of the following two-course sets for a total of 3 credits:			
PUBH 6242 & PUBH 8242	Clinical Epidemiology and Public Health: Reading the Research and Advanced Topics in Clinical Epidemiology and Public Health: Reading the Research		
PUBH 6244 & PUBH 8244	Cancer Epidemiology and Doctoral Topics: Cancer Epidemiology		
PUBH 6245 & PUBH 8245	Infectious Disease Epidemiology and Doctoral Topics: Infectious Disease Epidemiology		
PUBH 6250 & PUBH 8250	Epidemiology of HIV/AIDS		
Electives			
15 to 18 credits* in PUBH, HSML, EXNS, or STAT courses taken at the graduate-level. Possible electives include:			
PUBH 6260	Advanced Data Analysis for Public Health		
PUBH 6262	Introduction to Geographic Information Systems		
PUBH 6263	Advanced GIS		
PUBH 6267	Time Series Applications in Public Health		
PUBH 6299	Topics in Epidemiology		
PUBH 6856	Advanced SAS for Public Health Research		
Statistics electives—for Option A only			
STAT 6213	Intermediate Probability and Stochastic Processes		
STAT 6215	Applied Multivariate Analysis I		
STAT 6216	Applied Multivariate Analysis II		
STAT 6217	Design of Experiments		
STAT 6223	Bayesian Statistics: Theory and Applications		
STAT 6227	Survival Analysis		
STAT 8226	Advanced Biostatistical Methods		
Biostatistics electives—for Option A or B			
PUBH 6862	Applied Linear Regression Analysis for Public Health Research		
PUBH 6864	Applied Survival Analysis for Public Health Research		
PUBH 6887	Applied Longitudinal Data Analysis for Public Health Research		
PUBH 6899	Topics in Biostatistics and Bioinformatics		
Consulting			

PUBH 6869 Principles of Biostatistical Consulting

PUBH 8283 Doctoral Biostatistics Consulting Practicum

The epidemiology program director may waive the consulting requirement based on written documentation of prior equivalent coursework or relevant work experience. Waiver of the consulting requirement increases the total required number of elective credits proportionally.*

Dissertation research

PUBH 8999 Dissertation Research (taken in units of 3 credits for a total of 12 to 21 credits)

*Total required elective credits vary depending on whether the student is following Option A or Option B and/or if the consulting requirement is waived.

The following requirements must be fulfilled:

72 credits, including 16 credits in public health core courses, and all requirements for the Doctor of Philosophy Program (p. 87); 12 to 15 credits in statistics core courses (depending on which option the student follows); 3 credits in program-specific epidemiology selective courses; a minimum of 14 to 17 credits in elective courses, depending on which option the student follows; 3 credits in consulting courses; and 12 to 21 credits in dissertation research; successful completion of a comprehensive exam.

Two program options are available: Option A is more quantitative and includes advanced statistical coursework in the Department of Statistics. Option B, while also quantitative, allows for courses and electives with a primary focus on public health.

DOCTOR OF PHILOSOPHY IN THE FIELD OF EXERCISE PHYSIOLOGY AND APPLIED NUTRITION

OVERVIEW

Program Director J. Sacke

The PhD in exercise physiology and applied nutrition (EPAN) incorporates a fundamental and deep core appreciation that both exercise and nutrition together are more powerful in fighting many of the most significant public health problems of our time uniquely integrating both disciplines and which often have synergistic impacts on health. This multidisciplinary program provides a rigorous educational opportunity with a curriculum grounded in science and includes the use of sound methodological approaches and innovative thinking that leads to the advancement of knowledge that can be translated into real-world health applications of physiology and nutrition.

Visit the program website (<https://publichealth.gwu.edu/programs/phd-exercise-physiology-and-applied-nutrition/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled:

Code	Title	Credits
------	-------	---------

Required foundational courses

7 credits in required foundational courses:

EXNS 6204	Biostatistical Methods and Research Design
-----------	--

EXNS 8102	Writing a Research Grant Application
-----------	--------------------------------------

PUBH 6003	Principles and Practices of Epidemiology
-----------	--

PUBH 6080	Pathways to Public Health
-----------	---------------------------

Advanced research methods

At least one course (3 credits) selected from the following:

EDUC 8122	Qualitative Research Methods
-----------	------------------------------

EDUC 8131	Case Study Research Methods
-----------	-----------------------------

EDUC 8140	Ethnographic Research Methods
-----------	-------------------------------

EDUC 8171	Predictive Designs and Analyses
-----------	---------------------------------

EDUC 8172	Multivariate Analysis
-----------	-----------------------

EDUC 8173	Structural Equation Modeling
-----------	------------------------------

PUBH 8364	Quantitative Methods

Required core courses

16 credits in required core courses:

EXNS 6209	Advanced Concepts in Nutrition Science
-----------	--

EXNS 6810	Advanced Metabolism
-----------	---------------------

EXNS 8106	Advanced Concepts in Applied Human Physiology
-----------	---

EXNS 8108	Laboratory Techniques in Human Physiology and Nutrition
EXNS 8110	Seminar in Exercise Physiology and Applied Nutrition
PUBH 8116	Communicating Research Results
Electives	
At least 8 credits in elective courses.	
Dissertation research	
11 to 14 credits in dissertation research courses:	
PUBH 8435	Dissertation Proposal Development for Social and Behavioral Sciences (2 credits)
EXNS 8999	Dissertation Research (9 to 12 credits)

Successful completion of the comprehensive examination is required to continue to candidacy after required coursework has been completed.

DOCTOR OF PHILOSOPHY IN THE FIELD OF HEALTH POLICY

Program Directors A. Dor, L. Ku

Dedicated to health policy education and research, our faculty members include some of the nation's best-known health policy experts, as well as leaders from the public and private health policy sectors. Our program joins stimulating classes with hands-on experience with critical health policy issues. Our graduates can be found in congressional offices, federal health agencies, the most prominent professional health societies in Washington, D.C., trade associations and health policy consultancies. With courses scheduled in the late afternoons and early evenings, our programs allow students to attain valuable career experience while they earn their degrees.

The PhD in Health Policy program develops scholars who are skilled at critically assessing the political, economic, legal and social aspects of health policy and management and learning to apply innovative research tools to analyze processes and outcomes in the health care delivery and public health setting to inform policy decision-making.

REQUIREMENTS

The following requirements must be fulfilled: 48 credits, including 15 credits in public health fundamentals and advanced health policy courses; 12 credits in methods and advanced statistics; 9 credits minimum in elective courses, 12 credits in dissertation preparation and dissertation research; and successful completion of a comprehensive examination.

Code	Title	Credits
Required		
Core fundamental courses		
PUBH 6340	Health Economics and Finance	
PUBH 8401	Foundations in Public Health Leadership	
PUBH 8620	Seminar: Foundations of U.S. Health Policy	
PUBH 8610	Statistical Methods for Health Policy	
or PUBH 8418	Applied Statistical Analysis	
PUBH 8622	Health Care Payments, Systems, and Delivery Models	
PUBH 6080	Pathways to Public Health	
Core methods courses		
PUBH 8404	Advanced Topics: Health Systems and Health Policy Research	
PUBH 8405	Advanced Topics: Health Economics Research	
PUBH 8417	Qualitative Research Methods and Analysis	
PPPA 8022	Econometrics for Policy Research II	
Electives		
9 credits in elective courses. A recommended list of electives is available in the program guide. Other doctoral-level electives may be approved by the advisor.		
Dissertation		
PUBH 8422	Advanced Health Care and Public Health Research Design	
or PUBH 8435	Dissertation Proposal Development for Social and Behavioral Sciences	
PUBH 8999	Dissertation Research	

Graduation requirements as follow:

1. Credits: Successful completion of 48 credits.
2. Comprehensive examination: Once the course of study is completed, students are required to pass the comprehensive exam to be officially admitted to the candidacy phase.
3. Dissertation: PUBH 8422 or PUBH 8435 dissertation preparation course plus 10 credits in dissertation research are required. Once the proposal has been successfully

defended and the dissertation research credit requirements has been met, the oral defense may be scheduled.

4. Grade-point average: A minimum overall grade-point average of *B* (3.0).
5. Time limit: The degree must be completed within seven years.

DOCTOR OF PHILOSOPHY IN THE FIELD OF SOCIAL AND BEHAVIORAL SCIENCES IN PUBLIC HEALTH

Program Director M. Napolitano

Mission

The PhD in social and behavioral sciences in public health degree program is designed to develop public health scholars who are at the forefront of social and behavior change. The program trains students to conduct independent research that is theoretically sound and applicable across a variety of contexts in order to prevent diseases and promote health and well-being.

Goals

The goal of the PhD degree program is to train students to conduct rigorous and state-of-the-art independent research to advance understanding of social and behavioral sciences in public health. The program is designed to be four years in duration, with comprehensive exams at the end of the second year, and full dissertation work during the remaining two years.

Visit the program website (<https://publichealth.gwu.edu/programs/social-and-behavioral-sciences-phd/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 48 credits, including 12 credits in foundation courses, 9 credits in statistics courses, 9 credits in methods courses, 9 credits minimum in elective courses, and 9 credits in dissertation preparation and dissertation research; successful completion of a comprehensive exam.

Code	Title	Credits
Foundational and research courses		
PUBH 8408	Advanced Topics: Health Behavior Research & Practice Applications	
PUBH 8409	Advanced Topics: Health Communication Research	
PUBH 8416	Study Design & Evaluation Methods	
PUBH 8434	Behavioral Medicine and Public Health	

PUBH 6080	Pathways to Public Health
Statistics	
PUBH 8418	Applied Statistical Analysis
PUBH 8419	Measurement in Public Health and Health Services
And at least 3 additional credits from the following:	
DNSC 6211	Programming for Analytics
DNSC 6215	Social Network Analytics
DNSC 6274	Statistical Modeling and Analysis
DNSC 6275	Advanced Statistical Modeling and Analysis
DNSC 6276	Exploratory and Multivariate Data Analysis
ECON 8375	Econometrics I
EDUC 8144	Discourse Analysis
EDUC 8171	Predictive Designs and Analyses
EDUC 8173	Structural Equation Modeling
FINA 6271	Financial Modeling and Econometrics
MBAD 6221	Judgment, Uncertainty, and Decisions
MBAD 6222	Data Analysis and Decisions
PPPA 8022	Econometrics for Policy Research II
PSYC 8257	Current Topics in Social Psychology (ONLY Structural Equation Modeling)
PUBH 6299	Topics in Epidemiology (ONLY Applied Meta-Analysis with R)
Methods	
PUBH 8417	Qualitative Research Methods and Analysis
PUBH 6242	Clinical Epidemiology and Public Health: Reading the Research
PUBH 8242	Advanced Topics in Clinical Epidemiology and Public Health: Reading the Research
And at least 3 additional credits from the following:	
EDUC 8122	Qualitative Research Methods
EDUC 8130	Survey Research Methods

EDUC 8131	Case Study Research Methods
EDUC 8140	Ethnographic Research Methods
EDUC 8142	Phenomenological Research Methods
PSYC 8231	Development of Psychometric Instruments
PSYC 8256	Introduction to Survey Research
PSYC 8258	Qualitative Research and Analysis
PUBH 8364	Quantitative Methods
PUBH 8365	Design of Medical Studies

Content area electives

A minimum of 9 credits, including at least one course in each of the following two categories:

Social and Behavioral Sciences

ANTH 6501	Gender and Sexuality
ANTH 6505	Medical Anthropology
EXNS 6242	Nutrition Throughout the Life Cycle
PHIL 6253	Cognitive Science and Public Policy
PSYC 8211	Community Psychology I
PSYC 8212	Community Psychology II
PSYC 8253	Social Cognition
PSYC 8254	Social Influence
PSYC 8255	Attitudes and Attitude Change
PSYC 8275	Women and Health
PSYC 8287	Current Topics in Clinical Psychology (ONLY Structural Equation Modeling)
PUBH 6262	Introduction to Geographic Information Systems
PUBH 6555	Reproductive Health: U.S. and Global Perspectives
PUBH 6561	Maternal and Child Health Policy Analysis
PUBH 6562	Physical Activity and Obesity Interventions: From the Individual to the Environment
PUBH 6571	Social Marketing: Theory and Practice
PUBH 6573	Media Advocacy for Public Health

PUBH 6574	Public Health Branding: Theory and Practice
PUBH 6599	Topics in Prevention and Community Health (ONLY Culture and Health)
PUBH 8405	Advanced Topics: Health Economics Research
Current Issues in Public Health	
HCS 8369	Issues in Health Care
HDEV 8100	Issues and Special Topics in Human Development
PUBH 8401	Foundations in Public Health Leadership
PSYC 8220	Ethics and Professional Issues
PSYC 8236	Ethnic and Racial Diversity in Psychology

Other elective course options

Elective courses at the 8000-level not listed above do not require approval prior to enrollment. Advance approval of the advisor is required for all other courses.

Dissertation preparation and dissertation

PUBH 8435	Dissertation Proposal Development for Social and Behavioral Sciences
PUBH 8999	Dissertation Research (taken for 7 credits)

DOCTOR OF PUBLIC HEALTH IN THE FIELD OF ENVIRONMENTAL AND OCCUPATIONAL HEALTH

Program Director G. Gray

The Environmental and Occupational Health Department is at the center of national and global conversations about the role of science in protecting workers, the public and the environment from toxic substances and dangerous conditions. Faculty and staff in the department have earned a national reputation as researchers and leaders in articulating how public health science is best used in regulatory decision making. Congressional committees, federal agencies, national scientific organizations, international public health entities and the media contact them frequently to discuss environmental hazards and the policies addressing them.

The Doctor of Public Health (DrPH) Program prepares professionals to assume national and international leadership positions in environmental and occupational health, global health, health behavior, and health policy. The field of

public health provides unique insights into the complex interrelationships between health, politics, and human development. It enables professionals to address public health issues by marshalling research and analytic skills to develop innovative approaches to understand health and to promote and advocate for improved health outcomes as well as lead a team of diverse professionals reflecting shared values and vision to achieve specific objectives. (The DrPH Program accepts student every other year on even years only.)

Visit the program website (<https://publichealth.gwu.edu/programs/environmental-occupational-health-drph/>)for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 48 credits, including 22 credits in required courses, 6 credits in field-specific courses, 7 to 10 credits in elective courses, 2 credits in professional leadership courses, 8 to 11 credits in dissertation preparation and dissertation, and successful completion of a comprehensive examination.

Code	Title	Credits
Required		
Foundational and research methods courses		
PUBH 6080	Pathways to Public Health	
PUBH 8401	Foundations in Public Health Leadership (doctoral seminar)	
PUBH 8402	Leadership and Decision Making: Skills Based Approach	
PUBH 8403	Leadership in Public Health Policy and Practice	
PUBH 8416	Study Design & Evaluation Methods	
PUBH 8417	Qualitative Research Methods and Analysis	
PUBH 8418	Applied Statistical Analysis	
PUBH 8419	Measurement in Public Health and Health Services	
PUBH 8420	Advanced Analysis and Dissemination	
Specialty field courses		
PUBH 8411	Advanced Topics: Principles of Human Health Risk Science (doctoral seminar)	
PUBH 8412	Advanced Topics: Environmental and Occupational Health Research and Practice	

Electives

7 to 10 credits in specialty field elective courses. Sample courses include:

PUBH 6121	Environmental and Occupational Epidemiology
PUBH 6122	Protecting Public Health and the Environment: Policies, Politics, and Programs
PUBH 6123	Toxicology: Applications for Public Health Policy
PUBH 6124	Risk Management and Communication
PUBH 6126	Assessment and Control of Environmental Hazards
PUBH 6127	Introduction to Environmental Health Microbiology
PUBH 6128	Global Environmental and Occupational Health
PUBH 6130	Sustainable Energy and the Environment
PUBH 6199	Topics in Environmental and Occupational Health (Microbial Risk Assessment)
PUBH 6199	Topics in Environmental and Occupational Health (Pesticide Exposures and Cancer)
PUBH 6199	Topics in Environmental and Occupational Health (Food and the Global Environment)

Professional leadership

2 credits in professional leadership courses. (Most students will take these credits in PUBH 8415.)

PUBH 8413	Research Leadership
PUBH 8415	Instructional Leadership

Dissertation

8 to 11 credits in dissertation coursework.

PUBH 8422	Advanced Health Care and Public Health Research Design
PUBH 8423	Dissertation Research

Comprehensive examination

Successful completion of a comprehensive examination.

Graduation Requirements

1. Credits: Successful completion of 48 credits.
2. Curriculum: Successful completion of the foundational, research methods, program-specific specialty field, and professional leadership courses.
3. Comprehensive examination: Once the course of study is completed, students are required to pass the comprehensive exam to be officially admitted to the candidacy phase.
4. Dissertation: PUBH 8422 Advanced Health Care and Public Health Research Design plus 6 to 9 credits in dissertation research credits are required. Once the proposal has been successfully defended and the dissertation research credit requirements has been met, the oral defense may be scheduled.
5. Grade-point average: A minimum overall grade-point average of B (3.0).
6. Time limit: The degree must be completed within seven years.

Note: no transfer credits are accepted.

DOCTOR OF PUBLIC HEALTH IN THE FIELD OF GLOBAL HEALTH

Program Director *W. Munar*

The DrPH in Global Health program trains mid-career global health professional to apply critical thinking and rigorous research methods to the complex practical problems facing practitioners and policymakers in public health practice.

Visit the program website (<https://publichealth.gwu.edu/programs/global-health-drph/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 48 credits, including 22 credits in required courses, 6 credits in field-specific courses, 7 to 10 credits in elective courses, 2 credits in professional leadership courses, 8 to 11 credits in dissertation preparation and dissertation, and successful completion of a comprehensive examination.

PUBH 8413	Research Leadership
PUBH 8415	Instructional Leadership

Dissertation coursework

8 to 11 credits taken in the following courses:

PUBH 8422	Advanced Health Care and Public Health Research Design
PUBH 8423	Dissertation Research

Comprehensive examination

Successful completion of a comprehensive examination.

Graduation Requirements

1. Credits: Successful completion of 48 credits.
2. Curriculum: Successful completion of the foundational, research methods, program-specific specialty field, and professional leadership courses.
3. Comprehensive examination: Once the course of study is completed, students are required to pass the comprehensive exam to be officially admitted to the candidacy phase.
4. Dissertation: PUBH 8422 Advanced Health Care and Public Health Research Design plus 6 to 9 credits in dissertation research credits are required. Once the proposal has been successfully defended and the dissertation research credit requirements has been met, the oral defense may be scheduled.
5. Grade-point average: A minimum overall grade-point average of B (3.0).

6. Time limit: The degree must be completed within seven years.

Note: no transfer credits are accepted.

DOCTOR OF PUBLIC HEALTH IN THE FIELD OF HEALTH BEHAVIOR

Program Director M. Napolitano

The doctor of public health (DrPh) in health behavior prepares future public health leaders to apply critical thinking and rigorous research methods to the complex practical problems facing practitioners and policymakers in public health practice, especially as regarding health promotion and disease prevention. The GW School of Public Health doctoral programs provide health professionals with the research and analytical skills necessary to develop innovative approaches to understand health and to promote and to advocate for improved health outcomes.

Students apply research and analytic skills to a range of implementation, evaluation and advocacy needs of various cultural and socioeconomic groups and communities. The program helps students explore the complexities among health, politics, and human development. They are equipped to assume national and international leadership positions in health behavior.

Program graduates possess the knowledge and skills to positively affect the health of a variety of populations and cultures, with special emphasis on underserved populations.

Visit program website (<https://publichealth.gwu.edu/programs/health-behavior-drph/>) for the Doctor of Public Health Handbook and other resources.

REQUIREMENTS

The following requirements must be fulfilled: 48 credits, including 22 credits in required courses, 6 credits in field-specific courses, 7 to 10 credits in elective courses, 2 credits in professional leadership courses, 8 to 11 credits in dissertation preparation and dissertation, and successful completion of a comprehensive examination.

DOCTOR OF PUBLIC HEALTH IN THE FIELD OF HEALTH POLICY

Program Director J. Heinrich; **Co Program Director** A. Markus

Dedicated to health policy education and research, our faculty members include some of the nation's best-known health policy experts, as well as leaders from the public and private health policy sectors. Our program joins stimulating classes with hands-on experience with critical health policy issues. Our graduates can be found in congressional offices, federal health

agencies, the most prominent professional health societies in Washington, D.C., trade associations and health policy consultancies. With courses scheduled in the late afternoons and early evenings, our programs allow students to attain valuable career experience while they earn their degrees.

The DrPH develops skilled public health professionals uniquely equipped to provide real-world leadership at the national and state levels in all phases of public health, health care and health policy development, implementation and evaluation.

Visit the program website (<https://publichealth.gwu.edu/programs/health-policy-drph/>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 48 credits, including 22 credits in foundational courses, 6 credits in required field-specific courses, 7 to 10 credits in elective field-specific courses, 2 credits in professional leadership courses, 8 to 11 credits in dissertation preparation and dissertation, and successful completion of a comprehensive examination.

5. Grade-point average: A minimum overall grade-point average of B (3.0).
6. Time limit: The degree must be completed within seven years.

Note: no transfer credits are accepted.

CERTIFICATE PROGRAMS

Certificate Programs

- Graduate certificate in health administration generalist (p. 1390)
- Graduate certificate in health policy (p. 1391)
- Graduate certificate in public health (p. 1392)

Combined Programs

- Dual Doctor of Medicine and graduate certificate in public health (p. 1393)
- Joint Master of Public Health or SPH graduate certificate and Juris Doctor or Master of Laws (p. 1374)

GRADUATE CERTIFICATE IN HEALTH ADMINISTRATION GENERALIST

Program Director R. Bonar

The objective of the health administration generalist certificate is to meet the needs of the professional public health provider. Graduates with this certificate become health sector leaders, innovators, and managers who are dedicated to advancing the health of our local, national, and global communities. All current Milken Institute School of Public Health (SPH) graduate students and SPH alumni have a unique opportunity to add the health administration generalist graduate certificate to their degree.

Visit the program website (<https://publichealth.gwu.edu/programs/health-administration-generalist-certificate/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses; substitutions may be allowed with the advisor's approval.

Code	Title	Credits
Required		
18 credits from the following (with advisor approval)		
HSML 6202	Introduction to Health Services Delivery	
HSML 6203	Introduction to Health Management	
HSML 6204	Quality and Performance Improvement	
HSML 6206	Quant Methods & Epid/Health Services	
HSML 6207	Health Services Information Applications	
HSML 6208	Medical Informatics	

HSML 6209	Health Services Finance
HSML 6210	Health Services Financial Applications
HSML 6211	Health Economics
HSML 6212	Community Health Management and Advocacy
HSML 6213	Health Services, Marketing, and Planning
HSML 6215	Health Law for Managers
HSML 6216	Human Resources Management and Organizational Behavior
HSML 6218	Seminar: Health Services Management and Leadership

Other courses may be used to fulfill the requirement with advisor approval.

Graduation Requirements

1. The program director/advisor must pre-approve all course selections and course sequencing by developing a "program of study" prior to the student's initial registration. Graduate certificate students meet with their advisor each semester before registration. All changes in this program of study must be pre-approved by the program director/advisor.
2. Course Requirements: Since most graduate certificate students are currently enrolled in an MPH program or have previously earned a graduate degree, most course credits are selected from the program-specific course list. Under no circumstances may a certificate student enroll in fewer than 9 credits of program-specific courses.
3. Grade Point Requirement: A 3.0 (B average) overall grade-point average or above is required for the award of the certificate.
4. Time Limit Requirement: The certificate must be completed within two years.
5. Transfer Credit Policy: The program director/advisor may approve up to 4 graduate credits that have not been applied to a previous graduate degree to be transferred to the graduate certificate. The course(s) must be relevant to the graduate certificate. Credits must have been earned in the last three years with a grade of 3.0 or above.
6. Transfer to Degree Program Policy: Students can transfer as many credits as meet program requirements to a Master of Health Administration (MHA) degree program from the Health Administration Generalist Graduate Certificate. Students wishing to transfer to the MHA may apply to do so via the online change of concentration petition after completion of three or more courses and a cumulative GPA of 3.0 or above. A grade of B or above is required for a course to be eligible for transfer. Students interested in

applying to the MHA degree program should meet with the program director regarding program-specific admission requirements. Transfer credits must have been completed within the past three years.

GRADUATE CERTIFICATE IN HEALTH POLICY

Program Director L. Cartwright-Smith

The mission of the health policy certificate is to train public health, health services, law, medical, public policy and other students and professionals seeking careers in health policy. Graduates with this certificate understand the substance of health policy. Our students develop in-depth policy analysis skills to us in various practice settings, including both federal and state levels of government, private-sector health policy consulting, and not-for-profit advocacy.

The health policy certificate is a chance for those students seeking a solid foundation in the substance of health policy and the skills of health policy analysis but who do not wish to undertake the full MPH. The health policy graduate certificate also includes elective course offerings to fit the student's personal and professional goals. When deciding to undertake the certificate, the student will meet often with an advisor to craft a personalized course of study.

It is not just students who are already enrolled in the Milken School of Public Health (SPH) who choose to pursue a certificate in health policy. The certificate program is also available to GW law students (the JD/MPH and LLM/MPH programs), lawyers seeking to develop expertise in all facets of health policy and practice, and to GW medical students (the MD/MPH and PA/MPH programs) who wish to enhance their clinical training with a thorough understanding of health policy.

Graduates of this Health Policy certificate program will gain:

- a core understanding of the wide-ranging issues that dominate the modern health policy debate at all levels of government.
- basic skills in health policy analysis, and the ability to conduct original policy analysis and research.
- familiarity with the policy-making processes that control the development and implementation of health policy.
- strong data management skills including creating Stata datasets, reading various types of raw data, creating variables, and processing data.
- the ability to synthesize complex information for policymakers.
- the ability to apply the skills of health policy analysis in a workplace setting.

Visit the program webpage (<http://publichealth.gwu.edu/programs/health-policy-certificate/>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits, including 13 credits in required courses and 5 credits in elective courses.

Code	Title	Credits
Required		
PUBH 6002	Biostatistical Applications for Public Health	
PUBH 6012	Fundamentals of Health Policy	
PUBH 6310	Statistical Analysis in Health Policy	
PUBH 6315	Introduction to Health Policy Analysis	
PUBH 6320	Advanced Health Policy Analysis	
Electives		
5 credits in health policy elective courses.		

Graduation Requirements

- Graduate credit requirement: 18 graduate credits are required.
- The program director/advisor must pre-approve all course selections and course sequencing by developing a "program of study" prior to the student's initial registration. Graduate certificate students meet with their advisor each semester before registration. All changes in this program of study must be pre-approved by the program director/advisor.
- Successful completion of the required online CITI human subject research training modules.
- Successful completion of 8 Professional Enhancement hours.
- Grade point requirement: A 3.0 (B average) overall grade-point average or above is required.
- Time limit requirement: The certificate must be completed within two years.
- Transfer credit policy: The program director/advisor may approve up to 4 graduate credits that have not been applied to a previous graduate degree to be transferred to the graduate certificate. The course(s) must be relevant to the graduate certificate. Credits must have been earned in the last three years with a grade of 3.0 or above.
- Transfer to Degree Program Policy: Students can transfer as many credits as meet program requirements to a Master of Public Health (MPH) degree program from the Public Health Graduate Certificate. Students wishing to transfer to a degree program may apply to do so via the online change of concentration petition after completion of three or more courses and a cumulative GPA of 3.0 or above. A grade of B or above is required for a course to be eligible for

transfer. Students interested in applying to an MPH degree program should meet with departmental advisors regarding program-specific admission requirements. Transfer credits must have been completed within the past three years.

GRADUATE CERTIFICATE IN LONG-TERM CARE

Program Director R. Burke

The graduate certificate in long-term care program is designed to prepare students to best meet the needs of a rapidly aging population in the United States by providing the academic course requirements necessary for licensure of post-acute and senior services programs and facilities. The objectives of the certificate are to master the requirements and strengthen understanding of facility management, provider services and programs, and federal policies to achieve the highest levels of quality of care in senior and long-term care services.

Visit the program website (<https://publichealth.gwu.edu/sites/default/files/Cert%20Long%20Term%20Care%202016.pdf>) for additional information.

REQUIREMENTS

Course Requirements

1. Graduate credit requirement. 18 graduate credits are required.
2. The program director/advisor must pre-approve all course selections and course sequencing by developing a "program of study" prior to the student's initial registration. Graduate certificate students meet with their advisor each semester before registration. All changes in this program of study must be pre-approved by the program director/advisor.
3. Course requirements. Since most graduate certificate students are currently enrolled in an MPH program or have previously earned a graduate degree, most course credits are selected from the program-specific course list. Under no circumstances may a certificate student enroll in fewer than 9 credits of program-specific courses.
4. Grade point requirement. A 3.0 (B average) overall grade-point average or above is required.
5. Time limit requirement. The certificate must be completed within two years.
6. Transfer credit policy. The program director/advisor may approve up to 4 graduate credits that have not been applied to a previous graduate degree to be transferred to the graduate certificate. The course(s) must be relevant to the graduate certificate. Credits must have been earned in the last three years from an accredited institution with a grade point of 3.0 or above.

GRADUATE CERTIFICATE IN PUBLIC HEALTH

OVERVIEW

Program Director G. Gray

The mission of the graduate certificate in public health is to give students a basic, yet robust, understanding of all of the aspects of public health. The program consists of the core curriculum for the master of public health degree and is intended for individuals who are interested in learning more about the field of public health without committing to a full degree; are current professionals in the field and wish to be eligible to take the certifying examination in public health; or, who are interested in a degree in public health but are not sure what specific area of expertise they wish to pursue.

The 15 credits completed for the certificate can be applied toward an MPH degree should a student decide to further their studies. The certificate can be completed on-campus or online to allow students maximum flexibility while maintaining personal and professional commitments. Online courses are

taught in 10-week modules across the calendar year (four modules per year); face-to-face courses are taught on campus in 14-week modules. The certificate must be completed within two years of matriculation.

REQUIREMENTS

The following requirements must be fulfilled: 15 credits in required courses.

Code	Title	Credits
Required		
PUBH 6002	Biostatistical Applications for Public Health	
PUBH 6003	Principles and Practices of Epidemiology	
PUBH 6007	Social and Behavioral Approaches to Public Health	
PUBH 6009	Fundamentals of Public Health Program Evaluation	
PUBH 6011	Environmental and Biological Foundations of Public Health	
PUBH 6012	Fundamentals of Health Policy	

Course work may be completed through residential or distance modalities. Additional certificate information is available on the SPH website (<http://sphhs.gwu.edu/programs/public-health-generalist-certificate/>).

Requirements for the graduate certificate

1. Graduate credit requirement: 15 graduate credits
2. The Program Director/Advisor must pre-approve all course selections and course sequencing by developing a program of study prior to the student’s initial registration. Graduate certificate students meet with their advisor each semester before registration. All changes in this program of study must be pre-approved by the Program Director/Advisor.
3. Grade point requirement: A 3.0 (B) overall grade point average or better.
4. Time limit requirement: The certificate must be completed within 2 years.
5. Transfer to Degree Program Policy: Students can transfer as many credits as meet program requirements to a Master of Public Health (MPH) degree program from the Public Health Graduate Certificate. Students wishing to transfer to a degree program may apply to do so via the online change of concentration petition after completion of 3 or more courses and a cumulative GPA of 3.0 or better. A grade of B or better is required for a course to be eligible

for transfer. Students interested in applying to an MPH degree program should meet with Departmental Advisors regarding program-specific admission requirements. Transfer credits must have been completed within the past 3 years.

Visit the program website (<https://publichealth.gwu.edu/programs/public-health-certificate/>) for additional program information.

DUAL DOCTOR OF MEDICINE AND GRADUATE CERTIFICATE IN PUBLIC HEALTH

Program Director K. Bartholomew

The School of Medicine and Health Sciences (SMHS) and Milken Institute School of Public Health (GWSPH) offer a dual doctor of medicine (<https://smhs.gwu.edu/academics/md-program/>) (MD) and graduate certificate in public health (p. 1392) program. Medical students can complete the 15-credit graduate certificate within the four-year MD program structure. Students take 10 credits from the required public health certificate curriculum at GWSPH; the remaining 5 credits are satisfied through coursework cross counted from the MD program curriculum to replace PUBH 6011 Environmental and Biological Foundations of Public Health and PUBH 6012 Fundamentals of Health Policy .

In addition, 4 credits taken at GWSPH, PUBH 6007 Social and Behavioral Approaches to Public Health and PUBH 6009 Fundamentals of Public Health Program Evaluation as part of the certificate program are cross counted as four weeks of MD Year 4 electives.

Students receive the certificate only upon completion of all certificate and MD program requirements.

If a student wishes to pursue the MD/MPH program (p. 1364), all credits successfully completed for the MD/graduate certificate may be applied toward the MD/MPH degree.

ACADEMY FOR CLASSICAL ACTING (ACA)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ACA 5099. Variable Topics. 1-99 Credits.

ACA 6201. Acting I. 3 Credits.

The focus of the acting sequence shifts with each session, providing a studio structure to explore and meet the demands of the classical canon. Portions of the sequence focus on the history plays and tragedies, classic comedy, high comedy, the Jacobean, and master classes.

ACA 6202. Acting II. 2,3 Credits.

The focus of the acting sequence shifts with each session, providing a studio structure to explore and meet the demands of the classical canon. Portions of the sequence focus on the history plays and tragedies, classic comedy, high comedy, the Jacobean, and master classes.

ACA 6203. Acting: Classical Comedy. 2,3 Credits.

The focus of the acting sequence shifts with each session, providing a studio structure to explore and meet the demands of the classical canon. Portions of the sequence focus on the history plays and tragedies, classic comedy, high comedy, the Jacobean, and master classes.

ACA 6204. Acting: Master Class. 2,3 Credits.

The focus of the acting sequence shifts with each session, providing a studio structure to explore and meet the demands of the classical canon. Portions of the sequence focus on the history plays and tragedies, classic comedy, high comedy, the Jacobean, and master classes.

ACA 6205. Topics in Classical Drama and Culture. 2 Credits.

Plays and other writings from the Elizabethan, Jacobean, and Restoration eras and the eighteenth century. The historical world in which the plays were written as well as the imaginary worlds created in the plays themselves.

ACA 6206. Topics in Classical Drama and Culture. 2 Credits.

Plays and other writings from the Elizabethan, Jacobean, and Restoration eras and the eighteenth century. The historical world in which the plays were written as well as the imaginary worlds created in the plays themselves.

ACA 6207. Topics in Classical Drama and Culture. 2 Credits.

Plays and other writings from the Elizabethan, Jacobean, and Restoration eras and the eighteenth century. The historical world in which the plays were written as well as the imaginary worlds created in the plays themselves.

ACA 6208. Topics in Classical Drama and Culture. 1 Credit.

Plays and other writings from the Elizabethan, Jacobean, and Restoration eras and the eighteenth century. The historical world in which the plays were written as well as the imaginary worlds created in the plays themselves.

ACA 6209. Text I. 2 Credits.

Textual analysis emphasizing development of aesthetic expression. The forms and rules of verse: its meter, scansion, and overall structure in the early, middle, and late Shakespeare plays, as well as the intricacies of the prose.

ACA 6210. Text II. 2 Credits.

Textual analysis emphasizing development of aesthetic expression. The forms and rules of verse: its meter, scansion, and overall structure in the early, middle, and late Shakespeare plays, as well as the intricacies of the prose.

ACA 6211. Voice and Speech I. 3 Credits.

The development of clear, supported speech and sound that can meet the demands and challenges of classical texts. Resonators, articulators, breathing, and placement; phonetics and ear training; defining the character through the voice.

ACA 6212. Voice and Speech II. 2,3 Credits.

The development of clear, supported speech and sound that can meet the demands and challenges of classical texts. Resonators, articulators, breathing, and placement; phonetics and ear training; defining the character through the voice.

ACA 6213. Voice and Speech III. 3 Credits.

The development of clear, supported speech and sound that can meet the demands and challenges of classical texts. Resonators, articulators, breathing, and placement; phonetics and ear training; defining the character through the voice.

ACA 6214. Voice and Speech IV. 2 Credits.

The development of clear, supported speech and sound that can meet the demands and challenges of classical texts. Resonators, articulators, breathing, and placement; phonetics and ear training; defining the character through the voice.

ACA 6215. Movement I. 1,2 Credit.

The development of an awareness of the body and its expressive abilities through an integrated approach that includes ballet, modern dance, Hatha Yoga, and Feldenkrais for coordination, focus, and expression.

ACA 6216. Movement II. 1,2 Credit.

The development of an awareness of the body and its expressive abilities through an integrated approach that includes ballet, modern dance, Hatha Yoga, and Feldenkrais for coordination, focus, and expression.

ACA 6217. Movement III. 1,2 Credit.

The development of an awareness of the body and its expressive abilities through an integrated approach that includes ballet, modern dance, Hatha Yoga, and Feldenkrais for coordination, focus, and expression.

ACA 6218. Movement IV. 1,2 Credit.

The development of an awareness of the body and its expressive abilities through an integrated approach that includes ballet, modern dance, Hatha Yoga, and Feldenkrais for coordination, focus, and expression.

ACA 6219. Alexander Technique I. 1,2 Credit.

Through group work and individual sessions, students develop a further awareness of the body toward expression of imagination and the creative process, enabling powerful characterization without stress or personal physical distortion.

ACA 6220. Alexander Technique II. 1,2 Credit.

Through group work and individual sessions, students develop a further awareness of the body toward expression of imagination and the creative process, enabling powerful characterization without stress or personal physical distortion.

ACA 6221. Alexander Technique III. 1,2 Credit.

Through group work and individual sessions, students develop a further awareness of the body toward expression of imagination and the creative process, enabling powerful characterization without stress or personal physical distortion.

ACA 6222. Alexander Technique IV. 1,2 Credit.

Through group work and individual sessions, students develop a further awareness of the body toward expression of imagination and the creative process, enabling powerful characterization without stress or personal physical distortion.

ACA 6223. Stage Combat I. 2 Credits.

Skills in stage combat techniques, including unarmed combat and broadsword, buckler, rapier, dagger, and other lighter weapons, toward development of greater physical strength and an awareness of safety issues. The course is designed to lead to certification as an actor/combatant through the Society of American Fight Directors.

ACA 6224. Stage Combat II. 2 Credits.

Skills in stage combat techniques, including unarmed combat and broadsword, buckler, rapier, dagger, and other lighter weapons, toward development of greater physical strength and an awareness of safety issues. The course is designed to lead to certification as an actor/combatant through the Society of American Fight Directors.

ACA 6225. Practicum I. 2 Credits.

This sequence of courses includes scene preparation, rehearsal/production, clown class, and other performance skills.

ACA 6226. Practicum II. 1-6 Credits.

This sequence of courses includes scene preparation, rehearsal/production, clown class, and other performance skills.

ACA 6227. Practicum III. 1-6 Credits.

This sequence of courses includes scene preparation, rehearsal/production, clown class, and other performance skills.

ACA 6228. Practicum IV. 1-6 Credits.

This sequence of courses includes scene preparation, rehearsal/production, clown class, and other performance skills.

ACA 6229. Audition Techniques. 3 Credits.

A set of workshops to help students develop strong audition skills. Business aspects of acting, such as selection of agents, Equity status, and taxation issues. The workshop concludes with a showcase performance for casting directors, agents, and theatre directors.

ACA 6595. Selected Topics. 1 Credit.

ACCOUNTANCY (ACCY)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ACCY 1099. Variable Topics. 1-36 Credits.

ACCY 2001. Introduction to Financial Accounting. 3 Credits.

Fundamental concepts underlying financial statements and the informed use of accounting information; analysis and recording of business transactions; preparation and understanding of financial statements; measurement of the profitability and financial position of a business.

ACCY 2002. Introductory Managerial Accounting. 3 Credits.

The use of accounting information to plan and control the activities of a business. Several widely used methods of determining the cost of business activities for use in making business decisions. Prerequisite: ACCY 2001.

ACCY 3101. Intermediate Accounting I. 3 Credits.

Financial accounting concepts underlying the preparation and interpretation of financial statements. Topics include revenue and expense recognition; accounting for receivables, inventories, fixed assets, intangible assets, and liabilities. No alternative to this course will be accepted to fulfill the GWSB Signature course requirement. Prerequisite: ACCY 2001.

ACCY 3102. Intermediate Accounting II. 3 Credits.

Financial accounting concepts underlying the preparation and interpretation of financial statements; accounting for stockholders' equity, earnings per share, debt and equity investments, income taxes, pensions and other postretirement benefits, accounting changes, statements of cash flows, financial statement analysis, and disclosure. No alternative to this course will be accepted to fulfill the GWSB Signature course requirement. Prerequisites: ACCY 3101 or permission of instructor.

ACCY 3106. Financial Statement Analysis. 3 Credits.

Introduction to the analysis and interpretation of corporate financial statements within the context of a company's industry and economic environment. Cash flow analysis, profitability and risk analysis, accounting policy analysis, forecasting and performance analysis, elements of equity valuation, and decision perspectives of creditors. Students cannot earn credit for both this course and ACCY 4801. Prerequisite: ACCY 2002. Credit cannot be earned for this course and ACCY 4801.

ACCY 3401. Federal Income Tax: Individuals. 3 Credits.

Taxation of individuals, including tax planning strategies as well as compliance requirements. Introduction to tax principals and to tax planning for compensation, investment and business income of individuals, and major life events. Credit cannot be earned for this course and ACCY 6401.

ACCY 3403. Advanced Tax. 3 Credits.

Taxation of all major types of businesses with an emphasis on strategic planning opportunities to improve business profits as well as compliance requirements; principals of business taxation and basic tax rules for businesses from sole proprietorships to multinational corporations. Prerequisites: ACCY 2001 and ACCY 3401.

ACCY 3601. Business Law: Contracts, Torts, and Property. 3 Credits.

Essential legal principles of contracts, torts, and property, including trusts and estates, leases, professional liability, and the Uniform Commercial Code.

ACCY 4107. Advanced Accounting. 3 Credits.

Accounting for corporate combinations, foreign currency financial statements, and derivative financial instruments. Governmental and not-for-profit accounting. Prerequisites: ACCY 3101 and ACCY 3102.

ACCY 4301. Auditing. 3 Credits.

A study of generally accepted auditing standards and accepted professional auditing practices and procedures, including reviewing and evaluating financial controls, auditing financial statements, and testing financial data of manual and automated accounting systems. Prerequisite: ACCY 3102.

ACCY 4501. Accounting Systems. 3 Credits.

Introduction to the design and operation of accounting systems and data management controls. Principles and applications of internal control applicable to manual and automated accounting systems. Prerequisite: ACCY 3102.

ACCY 4601. Business Law: Enterprise Organization. 3 Credits.

Legal aspects of organizing, financing, and operating an enterprise, including agency, partnerships, corporations, securities regulation, insurance, and secured credit financing. Credit cannot be earned for this course and ACCY 6602.

ACCY 4801. Financial Accounting Capstone. 3 Credits.

Synthesis and application of knowledge of financial accounting to specific contexts, using the perspectives of the preparer and user of financial statements. Students cannot earn credit for both this course and ACCY 3106. Restricted to seniors. Credit cannot be earned for this course and ACCY 3106.

ACCY 4900. Special Topics. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more information.

ACCY 4995. Independent Study. 3 Credits.

Assigned topics. Admission by permission of the department chair.

ACCY 5099. Variable Topics. 1-99 Credits.**ACCY 6101. Financial Accounting. 3 Credits.**

Basic concepts and methods used in financial reporting to understand content, context, and related processes. Income statement, balance sheet, and statement of cash flows. Detailed accounting procedures, calculations, and choices. Same As: IAFF 6191, MBAD 6211.

ACCY 6104. Intermediate Accounting I. 3 Credits.

Accounting principles and concepts for financial accounting and reporting. Emphasis on the preparation of general-purpose financial statements. Restricted to GWSB graduate degree students. Prerequisites: ACCY 6101 or MBAD 6211.

ACCY 6105. Intermediate Accounting II. 3 Credits.

Revenue recognition, employee compensation and pension plans, income tax expense, and earnings per share. Prerequisites: ACCY 6101 and ACCY 6104. Same As: ACCY 3102.

ACCY 6106. Financial Statement Analysis. 3 Credits.

Analysis and interpretation of financial statements for managers, stockholders, creditors, and financial analysts. Prerequisites: ACCY 6101 or MBAD 6211. Credit cannot be earned for this course and ACCY 3106.

ACCY 6110. International Reporting and Control. 1.5 Credit.

International comparisons of forces that shape financial management, such as corporate governance mechanisms, tax policies, economic development, and privatization. Same as IBUS 6308.

ACCY 6112. International Financial Reporting Standards. 1.5 Credit.

Financial reporting standards that are used throughout most of the world other than the United States. Comparisons of these standards with those of the United States. Prerequisites: ACCY 6101 and MBAD 6211. (Same as IBUS 6310).

ACCY 6113. Financial Decision Making by Consumers and Professionals. 3 Credits.

Tools and applications necessary to evaluate the wide range of financial decisions individuals, both consumers and professionals, make throughout their lifetime. Also intended for those interested in becoming financial advisors and/or CPAs.

ACCY 6201. Accounting for Internal Decision Making. 1.5 Credit.

Effective use of internal generation, communication and interpretation of information for both operational and strategic decision-making purposes. Restricted to students in the MBA program. Prerequisites: MBAD 6211. Same As: MBAD 6213.

ACCY 6202. Advanced Strategic Cost Management. 1.5 Credit.

Advanced topics in the application of concepts of control and decision analysis to optimize the financial management of organizations. Prerequisites: ACCY 6201 or MBAD 6213.

ACCY 6203. Controls, Alignment, and the Organization. 3 Credits.

The role accounting plays in planning and control issues within organizations. High-level view of planning and control, with a focus on the need for controls to deal with the agency problems. Prerequisites: ACCY 2002 or equivalent.

ACCY 6204. Managerial Accounting for Government and Nonprofits. 1.5 Credit.

Builds on basic understanding of managerial accounting concepts and examines issues in the government and nonprofit realm; leveraging core concepts to analyze and report on real world scenarios. Prerequisite: None.

ACCY 6301. Contemporary Auditing Theory. 3 Credits.

Survey of contemporary auditing as practiced by internal and external auditors; generally accepted auditing standards and government auditing standards; planning, directing, and reporting on various audits. Corequisite: ACCY 6104. Prerequisites: ACCY 6101 or MBAD 6211. Credit cannot be earned for this course and ACCY 4301.

ACCY 6302. Fraud Examination and Forensic Accounting. 3 Credits.

Financial statement fraud, misappropriation of assets, and methods of deterrence, prevention, detection, and investigation. Prerequisites: ACCY 6101 and MBAD 6211. Recommended background: One auditing course.

ACCY 6401. Federal Income Taxation. 3 Credits.

Taxation of individuals, including tax planning strategies as well as compliance requirements; tax principals and to tax planning for compensation, investment and business income of individuals, and major life events. Credit cannot be earned for this course and ACCY 3401.

ACCY 6402. Federal Income Taxation of Partnerships. 3 Credits.

Tax planning for business income from partnerships, including formation and operation, distribution to partners, liquidation, transfer of partnership interests, and financial accounting for partnership transactions. S corporations also considered. Prerequisite: ACCY 6401.

ACCY 6403. Federal Income Taxation of Corporations. 3 Credits.

Federal income taxation of C corporations, covering formation, capital structure, nonliquidating distributions, complete liquidations, corporate accumulations, and the alternative minimum tax. Credit cannot be earned for this course and ACCY 3403.

ACCY 6404. Taxation of Financial Instruments. 3 Credits.

Overview of the economics and taxation of financial instruments; transactions in stock, debt instruments, commodities, options, short sales, wash sales, straddles, futures, foreign currency transactions, swaps, hedging, mark to market tax accounting, and time value of money. An equivalent course may be substituted for prerequisite ACCY 6101. Prerequisites: ACCY 6101 and ACCY 6401.

ACCY 6500. Technology and Analytics Applications. 1 Credit.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Restricted to business administration students.

ACCY 6501. Accounting Information Systems and Electronic Data Processing. 3 Credits.

Development and application of accounting system theory, including analysis, design, control concepts, and implementation; integration of electronic data processing, accounting systems, and management information systems. Prerequisites: ACCY 6101 or MBAD 6211. Credit cannot be earned for this course and ACCY 4501.

ACCY 6601. Business Law: Contracts, Torts, and Property. 3 Credits.

Essential legal principles of contracts, torts, and property, including trusts and estates, leases, professional liability, and the Uniform Commercial Code. Credit cannot be earned for this course and ACCY 3601.

ACCY 6602. Business Law: Enterprise Organization. 3 Credits.

Legal aspects of organizing, financing, and operating an enterprise, including agency, partnerships, corporations, securities regulation, insurance, and secured credit financing. Credit cannot be earned for this course and ACCY 4601.

ACCY 6701. Government Accounting. 3 Credits.

Budgeting, accounting, financial reporting, and auditing required of local, state, and federal governments; financial practices and requirements applicable to organizations receiving government financial assistance and those subject to government audits. Prerequisites: ACCY 6101 or MBAD 6211.

ACCY 6705. Nonprofit Accounting. 1.5 Credit.

Development and use of financial information as it relates to not-for-profit entities. Identifying and applying appropriate accounting and reporting standards, preparing financial statements, use of non-financial performance measures, auditing. Prerequisites: ACCY 3101.

ACCY 6801. Corporate Governance and Ethics. 3 Credits.

The theory, practice, and public policy environment of corporate governance. Purpose, functioning, and responsibilities of boards of directors. Power, control, and compensation of corporate management. Shareholders and stakeholders. Corporate governance in comparative national settings. Same as SMPP 6215.

ACCY 6900. Special Topics. 3 Credits.

Experimental offering; new course topics and teaching methods. May be repeated once for credit. Same As: SMPP 6290.

ACCY 6998. Directed Readings and Research. 1-3 Credits.

ACCY 8001. Doctoral Seminar. 1-12 Credits.

Reasoning and research in technical areas of accounting; theoretical issues and their application to practice; conceptual themes in professional literature; comparative accounting research analyses.

ACCY 8009. Dissertation Research. 1-12 Credits.

May be repeated for credit. Restricted to doctoral candidates.

ACCY 8999. Advanced Reading and Research. 1-12 Credits.

May be repeated for credit. Restricted to doctoral candidates preparing for the general examination.

AFRICANA STUDIES (AFST)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

AFST 1001. Introduction to Africana Studies. 3 Credits.

An interdisciplinary introduction to the study of people of Africa and the African diaspora in historical context. Links in the cultural, political, and intellectual experiences of people of African descent in the Americas, Caribbean, Europe, and Africa.

AFST 1099. Variable Topics. 36 Credits.

AFST 3001. Documenting Black Lives. 3 Credits.

Students complete and present an original research project pertaining to black history and culture; research strategies, including the use of digital material, historical archives, and public history sites. Recommended background: completion of a prior course in any Africana-related topic and an interest in research.

AFST 3099. Variable Topics. 1-12 Credits.

AFST 5099. Variable Topics. 1-99 Credits.

AMERICAN STUDIES (AMST)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students

- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

AMST 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester; see department for more details.

AMST 1050. Explorations in American Culture. 3 Credits.

Exploration of different aspects of American culture depending on the topic. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AMST 1070. The American Cinema. 3 Credits.

History and criticism of American films. The course enables the student to recognize and evaluate cinema techniques, to express the evaluation clearly in writing, and to understand the role of films in the context of American culture. Laboratory fee. (Same as AH 1070).

AMST 1099. Variable Topics. 1-36 Credits.

AMST 1100. Politics and Film. 3 Credits.

How American films interpret and challenge political power in America.

AMST 1160. Race, Gender, and Law. 3 Credits.

Significant civil rights cases, critical race theory, feminist theory, and current public policy debates on domestic violence, mass imprisonment, sexual assault, and racial profiling.

AMST 1200. The Sixties in America. 3 Credits.

A survey of American society, culture, and politics during the decade of the 1960s. Topics include the civil rights movement, the student movement, the Vietnam War, and the counterculture.

AMST 2000. Sophomore Colloquium. 3 Credits.

The Sophomore Colloquia are small seminar-style courses limited to second-year students in Columbian College. These courses engage students deeply in a discipline, focus on a narrow issue of high interest and impact, and require independent research projects of the students. Topics vary by semester; see department for more details. Permission of the instructor required prior to enrollment.

AMST 2010. Early American Cultural History. 3 Credits.

How culture was important in the creation of the United States—in its origins as a colonial outpost and its expansion across the continent; in its hierarchies and expressions of power, especially as organized by race, class, ethnicity, or gender; in the creation of democracy and the valuing of free expression; and in the development of cities and the varied uses of the countryside. Same as HIST 2010.

AMST 2011. Modern American Cultural History. 3 Credits.

The effects of culture in the shaping of the United States since 1876. The role of the mass media; effects of cultural conceptions on the physical landscape; changing ideas of race, ethnicity, gender, and sexuality; and the political meanings of cultural conflict. Transnational influences on U.S. culture and effects of U.S. culture abroad. Same as HIST 2011.

AMST 2020. Washington, DC: History, Culture, and Politics. 3 Credits.

Introduction to interdisciplinary methods of studying the contemporary city. Major problems of metropolitan life, past and present, analyzed by faculty and community leaders. Emphasis on experiential team projects. Same As: AMST 2020W, HIST 2020, HIST 2020W.

AMST 2020W. Washington, DC: History, Culture, and Politics. 3 Credits.

Introduction to interdisciplinary methods of studying the contemporary city. Major problems of metropolitan life, past and present, analyzed by faculty and community leaders. Emphasis on experiential team projects. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Same As: AMST 2020, HIST 2020, HIST 2020W.

AMST 2071. Introduction to the Arts in America. 3 Credits.

A survey of American art from the period of colonial exploration and settlement to the postmodern present. Political and social meanings of painting, sculpture, architecture, prints, and photographs. The relationship of art to religion and nationalism; issues of class, race, and gender. Same as AH 2071.

AMST 2120W. Freedom in American Thought and Popular Culture. 3 Credits.

America was founded on the premise of providing freedom to its people. But what, exactly, is freedom? The question has been debated in America since its founding and continues today; this course examines varied answers provided by American political thought and popular culture. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Credit cannot be earned for this course and PSC 2120W.

AMST 2125. Varieties of Feminist Theory. 3 Credits.

Classical and contemporary texts on feminist explanations of women's status. Relationships within the sex/gender system and arrangements based on class and race. Evaluation, through the lens of feminist theory, of several academic disciplines in the sciences, social sciences, and humanities. Same as WGSS 2125. Prerequisites: WGSS 1020 or WGSS 2120.

AMST 2144. Explorations in Historical Geography. 3 Credits.

Examination of selected themes in the cultural geography of the United States over the course of its history, in relation to an overview of the historical geography of the country. Same as GEOG 2144.

AMST 2210. The African American Experience. 3 Credits.

This course provides a survey of the historical, political, and cultural dimensions of the African American experience in the U.S. The course is organized chronologically and thematically and covers topics such as American slavery, medical experimentation, Hurricane Katrina, aesthetics, hip-hop, and Afro-futurism.

AMST 2320. U.S. Media and Cultural History. 3 Credits.

History and analysis of twentieth-century U.S. media and culture, including the rise of consumer culture, film, and television. Racial, gendered, and national identities in the context of modernism, mass culture, and globalization. (Same as HIST 2320).

AMST 2350. U.S. Religion and Politics. 3 Credits.

How religion and politics have influenced each other in the United States and how Americans have understood those influences. Religious violence; conflicts between faith and science; religious factors in racial and gender politics; and the separation of church and state. Same as HIST 2350.

AMST 2380. Sexuality in U.S. History. 3 Credits.

Examination of the changing social organization and meaning of sexual practices and desires in American culture, with particular attention to the relationship between sexuality and gendered racial and class identities and politics. Same as HIST 2380 and WGSS 2380.

AMST 2385. Sex and Citizenship. 3 Credits.

How gender and sexuality have shaped Americans' understanding of citizenship; the state regulation of marriage, reproduction, military service, immigration, and access to other government resources and benefits; the cultural representation of women, LGBTQ individuals, and other sexual and gender minorities as second-class citizens; and the efforts of women, LGBTQ groups, and others to claim full equality in American culture and politics.

AMST 2385W. Sex and Citizenship. 3 Credits.

How gender and sexuality have shaped Americans' understanding of citizenship; the state regulation of marriage, reproduction, military service, immigration, and access to other government resources and benefits; the cultural representation of women, LGBTQ individuals, and other sexual and gender minorities as second-class citizens; and the efforts of women, LGBTQ groups, and others to claim full equality in American culture and politics. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

AMST 2410. Twentieth Century U.S. Immigration. 3 Credits.

Survey of immigration policy and immigrants' lives. How immigrants have changed the United States and how the United States has changed immigrants. Same As: AMST 2410W, HIST 2410, HIST 2410W.

AMST 2410W. Twentieth Century U.S. Immigration. 3 Credits.

Survey of immigration policy and immigrants' lives. How immigrants have changed the United States and how the United States has changed immigrants. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Same As: AMST 2410, HIST 2410, HIST 2410W.

AMST 2430. Capitalism and Culture. 3 Credits.

Cultural and political history of American capitalism from Wall Street to Whole Foods, including advertising, automation, baseball, Fordism, graffiti, housework, punk, real estate, strike-breaking, sex work, and slavery.

AMST 2440. The American City. 3 Credits.

An interdisciplinary introduction to the ethnic, cultural, political, and architectural landscape of the American city. Urban theory, race and ethnicity, urban history, planning and architecture, city politics, and cultural representations of the city. Same as HIST 2440.

AMST 2440W. The American City. 3 Credits.

An interdisciplinary introduction to the ethnic, cultural, political, and architectural landscape of the American city. Urban theory, race and ethnicity, urban history, planning and architecture, city politics, and cultural representations of the city. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Same As: AMST 2440, HIST 2440, HIST 2440W.

AMST 2490. Themes in U.S. Cultural History. 3 Credits.

Topical examination of the ideas, values, and modes of expression that have made American life distinctive, as revealed through a cross-cultural or global perspective. Topic vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. (Same as HIST 2490).

AMST 2490W. Themes in U.S. Cultural History. 3 Credits.

Topical examination of the ideas, values, and modes of expression that have made American life distinctive, as revealed through a cross-cultural or global perspective. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. (Same as HIST 2490W).

AMST 2495. Special Topics in African American History. 3 Credits.

Concentration on specific issues central to the African American experience. Consult the Schedule of Classes for issues to be addressed.

AMST 2520. American Architecture I. 3 Credits.

Stylistic properties, form and type characteristics, technological developments, and urbanistic patterns are introduced as a means of interpretation of historic meaning. Buildings are analyzed both as artifacts and as signifiers of social, cultural, and economic tendencies. 1600–1860. (Same as AH 2154, CAH 2154).

AMST 2521. American Architecture II. 3 Credits.

Continuation of AMST 2520. Stylistic properties, form and type characteristics, technological developments, and urbanistic patterns are introduced as a means of interpretation of historic meaning; analysis of buildings both as artifacts and as signifiers of social, cultural, and economic tendencies. 1860 to present. (Same as AH 2155, CAH 2155).

AMST 2533. Material Culture in America. 3 Credits.

Review and analysis of the cultural messages embedded in our material surroundings. Consideration of a range of humanly created artifacts, ranging from specific objects to vast landscapes. Same as ANTH 2533.

AMST 2600. U.S. Popular Music and Culture. 3 Credits.

Interdisciplinary approach to U.S. popular music as a means for thinking critically about identity, culture, and history from the nineteenth century to the present; popular music as a cultural reflection of society and a key means through which Americans enact and negotiate social opportunities, challenges, and struggles.

AMST 2610. Science, Technology, and Politics in Modern America. 3 Credits.

The history of science and technology and their role in political and social life from the late 19th century to the present.

AMST 2610W. Science, Technology, and Politics in Modern America. 3 Credits.

The history of science and technology and their role in political and social life from the late nineteenth century to the present. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Same As: AMST 2610, HIST 2610, HIST 2610W.

AMST 2620. Human Mind and Artificial Intelligence. 3 Credits.

The history of computers, robots, and artificial intelligence; visions of the future presented in science fiction; how human perceptions of machines affect their perceptions of the human mind.

AMST 2630. Discovering the Mind. 3 Credits.

Introduction to the ways in which the mind sciences have shaped how we understand ourselves, human nature, sex and race, morals, politics, and power.

AMST 2680W. Hashtag America. 3 Credits.

Influential technoskeptic and techno-utopian writing about social media and new media; the relationship between the Internet and society from various scholarly perspectives. Includes a significant engagement with writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

AMST 2710. The United States in the World. 3 Credits.

U.S. cultural and political engagement with the rest of the world in the twentieth and twenty-first centuries. Global culture, transnational ideas and social movements, travel and tourism, and the impact of media. Same As: HIST 2710.

AMST 2730. World War II in History and Memory. 3 Credits.

Examination of Americans' histories and memories of World War II. Same as HIST 2730.

AMST 2730W. World War II in History and Memory. 3 Credits.

Examination of Americans' histories and memories of World War II. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. (Same as HIST 2730).

AMST 2750. Latinos in the United States. 3 Credits.

Exploration of the term Latino and its impact on discussions of race, identity, and citizenship expectations throughout U.S. history. How geographic, linguistic, aesthetic, political, and economic factors construct Latino identity and influence policymaking and international relations. Same As: AMST 2750W, ANTH 2750, ANTH 2750W.

AMST 2750W. Latinos in the United States. 3 Credits.

Exploration of the term Latino and its impact on discussions of race, identity, and citizenship expectations throughout U.S. history. How geographic, linguistic, aesthetic, political, and economic factors construct Latino identity and influence policymaking and international relations. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Same As: AMST 2750, ANTH 2750, ANTH 2750W.

AMST 3099. Variable Topics. 1-12 Credits.**AMST 3151. American Art in the Age of Revolution. 3 Credits.**

Same as AH 3151.

AMST 3152. American Art in the Era of National Expansion. 3 Credits.

American art from the opening of the Erie Canal in 1825 to the Spanish-American War in 1898. Emphasis on the role of art in the expansion of the United States, exploring issues of race, class, and gender; art, and religion. (Same as AH 3152).

AMST 3324. U.S. Urban History. 3 Credits.

History of American urban life and culture from the colonial era to the present, focusing on transitions from pre-industrial to industrial and post-industrial forms. The social and spatial configuration of U.S. cities, and the urban politics of race, class, and gender. Same as HIST 3324.

AMST 3351. U.S. Social History. 3 Credits.

Survey of American society and social change from the Civil War to the present. Gender, sexuality, race, ethnicity, and class perspectives. (Same as HIST 3351).

AMST 3352. U.S. Women's History to 1865. 3 Credits.

History of women in the Americas and in the United States from trans-Atlantic encounters through the Civil War. (Same as HIST 3352, WGSS 3352).

AMST 3352W. U.S. Women's History to 1865. 3 Credits.

History of women in the Americas and in the United States from trans-Atlantic encounters through the Civil War. (Same as HIST 3352, WGSS 3352) Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

AMST 3353. U.S. Women's History II. 3 Credits.

Continuation of AMST 3352. History of women in the Americas and in the United States from trans-Atlantic encounters from 1877 to present. Same as HIST 3353/ WGSS 3353. (Same as HIST 3353, WGSS 3353).

AMST 3360. African American History to 1865. 3 Credits.

Major themes and concepts emerging from the early history of the African presence in the Americas and black experiences in the new nation of the United States. Focus on the emergence and evolution of the concept of race, the ways race evolved in concert with Atlantic slavery, and how race intersected with gender, economics, religion, and nationality. (Same as HIST 3360).

AMST 3361. African American History Since 1865. 3 Credits.

African American efforts to realize full freedom after emancipation from slavery. Gender politics, cultural expression, labor organizing, and radicalisms; dynamics of racism within major eras of African American activity from Reconstruction through the Great Migration; and the history of civil rights, Black Power, and black feminism. (Same as HIST 3361).

AMST 3362. African American Women's History. 3 Credits.

Addresses the history of African American women's labor, cultural expression, institution-building, activism and strategies to combat oppression from the antebellum period through the late twentieth century. Investigates the intersection of race, gender, and class as it has shaped U.S. society, racism, the black freedom movement and African American women's experiences. (Same as AMST 3362W, HIST 3362, HIST 3362W, WGSS 3362, WGSS 3362W).

AMST 3362W. African American Women's History. 3 Credits.

The history of African American women's labor, cultural expression, institution-building, activism, and strategies to combat oppression from the antebellum period through the late 20th century; the intersection of race, gender, and class as it has shaped U.S. society, racism, the black freedom movement, and African American women's experiences. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. (Same as AMST 3362, HIST 3362, HIST 3362W, WGSS 3362, WGSS 3362W).

AMST 3367. The American Jewish Experience. 3 Credits.

The study of the Jewish minority in America from colonial times to the present. Emphasis on the interaction between a powerful majority culture and that of protean minority people. (Same as HIST 3367).

AMST 3600. Popular Music and Politics. 3 Credits.

The interactions and intersections of music and politics, focusing on the twentieth-century United States; music as political expression, music in social protest movements, and music as a tool of political organizing.

AMST 3625. Ethnographic and Historical Perspectives on Data Ethics. 3 Credits.

An introduction to ethics of data sciences from two disparate perspectives: historical and ethnographic. For students in all fields interested in understanding and evaluating the ethical implications of data and algorithms. Same As: ANTH 3625.

AMST 3810. Planning Cities. 3 Credits.

An examination of historical and contemporary trends and dynamics in urban planning in the United States and abroad. Same as GEOG 3810. Prerequisite: GEOG 1001.

AMST 3811. Historical Archaeology. 3 Credits.

Survey of the basic data and methods of research in the material culture of recent history. Same as ANTH 3811.

AMST 3835. Historical Archaeology Field Program. 3 Credits.

Practical experience with a variety of excavation and laboratory techniques in historical archaeology; specific site and topics announced in the Schedule of Classes. Same as ANTH 3835.

AMST 3900. Critiquing Culture. 3 Credits.

Modes of analysis, including ethnography and other cultural studies methods, applied to examination of the interaction of cultural texts and practices with structures of power. Theories and themes central to American studies; scholarly debate about mass culture, ideology, visuality, discourse, and affect. Restricted to American studies majors or American studies minors with permission of the instructor.

AMST 3901. Examining America. 3 Credits.

Modes of power and forms of identification within and across U.S. national borders. Social constructions of the nation; forms of diversity and identity, such as race, gender, and sexuality; and the transnational flow of people, ideas, culture, and religion. Restricted to students in the American studies program.

AMST 3950. Special Topics. 3 Credits.

May be repeated for credit provided the topic differs. Topics announced in the Schedule of Classes.

AMST 3950W. Special Topics. 3 Credits.

May be repeated for credit provided the topic differs. Topic announced in the Schedule of Classes. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Credit cannot be earned for this course and HIST 3301W.

AMST 4400. Independent Study. 1-3 Credits.

Open to a limited number of American studies majors as directed research or as an internship with a Washington museum or historical society. Approval of advisor required.

AMST 4450. Internship. 1-3 Credits.

Open to a limited number of American studies majors pursuing an internship directly related to the study of American culture. Students must make the case for a scholarly project that emerges from the internship and must write a significant final paper. Approval of a supervising faculty member required for registration. P/NP grading only.

AMST 4500. Proseminar in American Studies. 3 Credits.

Directed research and writing on special topics. May be repeated for credit provided the topic differs. Restricted to students in the American studies program. Prerequisites: AMST 2010, AMST 2011, AMST 3900 and AMST 3901.

AMST 4500W. Proseminar in American Studies. 3 Credits.

Directed research and writing on special topics. May be repeated for credit provided the topic differs. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Students select two of the prerequisite courses. Restricted to students in the American studies program. Prerequisites: AMST 2010, AMST 2011, AMST 3900 and AMST 3901.

AMST 4701W. Epidemics in American History. 3 Credits.

The history of epidemics in the United States from the late nineteenth to the early twentieth century. The development of medical and public health responses to epidemics, and their social, political, cultural, and economic impacts. Sources include primary documents, historical accounts, memoirs, fiction, and films. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

AMST 4702W. Race, Medicine, and Public Health. 3 Credits.

The experiences of African Americans as patients and health care providers; the history of the relationship between race, American medicine, and public health. Emphasis on the importance of understanding the historical roots of contemporary policy dilemmas such as racial and ethnic disparities in health and health care. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

AMST 5099. Variable Topics. 1-99 Credits.**AMST 6100. Scope and Methods in American Studies. 3 Credits.**

Consideration of American studies as an area for research and teaching; introduction to bibliography. Required of candidates for the degree of Master of Arts in the field of American studies.

AMST 6110. Cultural Theory and American Studies. 3 Credits.

Major issues in critical and cultural theory as they relate to American culture. Various interpretive approaches including discourse analysis, cultural studies, new historicism, anthropological theory, etc. Prerequisites: AMST 6100 or permission of the instructor.

AMST 6120. Theories and Practices in the Study of Media. 3 Credits.

Examination of theories and methods in the study of media and popular culture; case studies explore specific issues related to cultural products such as film, television, music, and the Internet.

AMST 6190. Topics in American Studies. 1-4 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Credit cannot be earned for this course and ANTH 6591, ENGL 6451, HIST 6001.

AMST 6195. Research Seminar in American Studies. 3 Credits.

May be repeated for credit provided the topic differs.

AMST 6210. The United States in a Global Context. 3 Credits.

Analysis of the cultural constructions of the nation and international power, comparing the context of the eighteenth and nineteenth century, European colonialism, and U.S. expansion in the twentieth century. The role of literature and mass media in furthering the logic of globalization. Readings are both theoretical and historical.

AMST 6220. Theory and Emotions. 3 Credits.

Interdisciplinary exploration of politics of emotion, with an emphasis on the emotions that attach to race, gender, and sexuality.

AMST 6230. The Politics of Freedom. 3 Credits.

This seminar examines critical interventions into the theories, rhetorics, and practices of freedom. The seminar focuses on the politics of freedom in relation to an array of themes that may include liberalism, slavery, imperialism, political economy, individualism, and neoliberalism.

AMST 6240. Borders and Boundaries. 3 Credits.

Exploration of borders (the literal edge or limit of a territory) and boundaries (intra-societal differences). Readings from cultural anthropology, political science, and social history examine classic tensions between state formation and nation building. The U.S.-Mexico border and other border zones across the globe are used to assess and challenge what is local and particular about border space.

AMST 6410. Readings in American Cultural History. 3 Credits.

Studies in the cultural history of the United States.

AMST 6420. Religion and American Culture. 3 Credits.

Interdisciplinary analysis of religious beliefs, practices, and representations in the United States, as well as intersections of the religious and the secular. Relationships of religion to race, gender, capitalism, science, mass media, and material culture. Same as HIST 6420.

AMST 6430. Gender, Sexuality, and American Culture I. 3 Credits.

The changing social organization, cultural representation, and meaning of gender and sexuality in the United States, with emphasis on their relationship to race, class, region, nationality, empire, and globalization. Pre-colonial to 1877. (Same as HIST 6430, WGSS 6430).

AMST 6431. Gender, Sexuality, and American Culture II. 3 Credits.

Continuation of AMST 6430. The changing social organization, cultural representation, and meaning of gender and sexuality in the United States, with emphasis on their relationship to race, class, region, nationality, empire, and globalization. 1877 to present. Same as HIST 6431/ WGSS 6431.

AMST 6435. Readings on Women in American History. 3 Credits.

Important works in American women's history; evolution of the field in historiographical context. Same as HIST 6435/ WGSS 6435.

AMST 6450. Race in America. 3 Credits.

Interdisciplinary analysis of the history of race and its changing political, social, and cultural meanings in the United States. Transnational racial formations, struggles for and against civil rights, multiracialism, and interracialism. Same as HIST 6450.

AMST 6455. American Social Movements. 3 Credits.

The history of social movements in the United States, with emphasis on civil rights, feminism, conservatism, and labor in local, national, and transnational contexts; the historical rise and fall of these movements and their larger impact on American life. Same as HIST 6455.

AMST 6460. Popular Music Studies. 3 Credits.

Readings in popular music studies; varying methodologies for American studies work on sound and popular music; cultural histories of popular music; American music transnationally. Restricted to graduate students.

AMST 6470. Cityscapes. 3 Credits.

Interdisciplinary examination of the American city, including urban theory, history, planning, architecture, urban politics, and cultural representations of the city. Same as HIST 6470.

AMST 6475. U.S. Urban History. 3 Credits.

History of American urban life and culture from the Colonial era to the present, focusing on the transitions from pre-industrial to industrial and post-industrial forms, the social and spatial configuration of U.S. cities, and the urban politics of race, class, and gender. Same as HIST 6475.

AMST 6480. Theory and Practice of Public History. 3 Credits.

Theoretical and practical dimensions of public history, as illustrated by recent controversies surrounding public exhibitions and debates on revisionist history as well as more traditional means of presenting the past in public forums. Same as HIST 6480.

AMST 6495. Historic Preservation: Principles and Methods. 3 Credits.

The scope and purpose of the preservation movement in the United States, with focus on developments since the 1960s. Preservation theories, attitudes toward the past and toward design, the intent and impact of legislation, approaches to documentation, the concept of significance, and preservation as an instrument of change. Same as HIST 6495.

AMST 6496. Historic Preservation: Principles and Methods. 3 Credits.

Continuation of AMST 6495. The scope and purpose of the preservation movement in the United States, with focus on developments since the 1960s. Preservation theories, attitudes toward the past and toward design, the intent and impact of legislation, approaches to documentation, the concept of significance, and preservation as an instrument of change. Same as HIST 6496.

AMST 6520. Economics of Preservation. 3 Credits.

Analysis of economic techniques and benefits used to encourage the retention and reuse of historic buildings and districts in the United States. Emphasis on revitalization of older commercial centers and the Mainstreet program. Permission of the instructor required prior to enrollment.

AMST 6525. The Politics of Historic Preservation. 3 Credits.

Overview of the political issues, forces, events, and players that have shaped contemporary preservation practice, with an emphasis on public policy issues that have not been resolved and continue to confront preservation objectives. Permission of the instructor required prior to enrollment.

AMST 6530. Field Methods in Architectural Documentation. 3 Credits.

In-depth thematic examination of cultural landscape, focusing on field techniques for recording, analysis, and interpretation of historic properties. Work at field sites is supplemented by lectures, discussion, and readings. Restricted to graduate students.

AMST 6550. Seminar in American Architecture. 3 Credits.

Advanced research problems addressing artistic, cultural, social, technical, and urbanistic aspects of American architecture in the 19th and 20th centuries. Topics vary. Prerequisites: AMST 2520 or AMST 2521, or permission of the instructor.

AMST 6560. Vernacular Architecture. 3 Credits.

AMST 6650. Advanced Workshop in American Studies. 1-4 Credits.

Required for first- and second-year PhD students; open to other graduate students. Provides instruction and guidance in the process of writing, revising, and submitting journal articles, conference papers, and dissertations. Faculty and peer review of written work. Students are expected to enroll for the full academic year. Restricted to American studies graduate students.

AMST 6709. Interpretation in the Historic House Museum. 3 Credits.

Seminar integrating advanced practices of museum education with current scholarship in architectural history, material culture, and social history. Extensive use of Washington museum resources. Admission by permission of instructor. Same as EDUC 6709.

AMST 6710. American Material Culture. 3 Credits.

Opportunities for research and publication based on historical objects in the collections of the Smithsonian Institution.

AMST 6720. American Decorative Arts I. 3 Credits.

Recognition and evaluation of domestic artifacts from the 17th, 18th, and 19th centuries.

AMST 6721. American Decorative Arts II. 3 Credits.

Continuation of AMST 6720. Recognition and evaluation of domestic artifacts from the 17th, 18th, and 19th centuries.

AMST 6730. Studies in American Art and History. 3 Credits.

Selected problems and themes in American cultural history involving the use of artistic materials in different media; emphasis on methodology and analytic techniques. May be repeated for credit. Same as AH 6255.

AMST 6835. Historical Archaeology Field Program. 3 Credits.

Practical experience with a variety of excavation and laboratory techniques in historical archaeology; specific site and topics announced in the Schedule of Classes. Same as ANTH 6835.

AMST 6930. Independent Study. 3 Credits.

Permission of the instructor required prior to enrollment. Restricted to master's and doctoral candidates.

AMST 6998. Thesis Research. 3 Credits.

AMST 6999. Thesis Research. 3 Credits.

AMST 8998. Advanced Reading and Research. 1-9 Credits.

May be repeated for credit. Restricted to doctoral candidates preparing for the general examination.

AMST 8999. Dissertation Research. 3-12 Credits.

May be repeated for credit. Restricted to doctoral candidates.

ANATOMY AND CELL BIOLOGY (ANAT)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ANAT 1099. Variable Topics. 1-36 Credits.

ANAT 2130. Human Embryology. 3 Credits.

Development of the basic organ systems; molecular control of development, congenital birth defects, and assisted reproductive technologies.

ANAT 2150. Human Microscopic Anatomy. 3 Credits.

Normal histological structure of cells, tissues, and organs. Structural-functional correlates; the relationship between histological structure-function and the etiology of disease states.

ANAT 2160. Human Functional Neuroanatomy. 3 Credits.

Intensive introductory course on human central (CNS) and peripheral nervous systems, focusing on CNS pathways, connections, effects of lesions, and recent research findings. Restricted to juniors and seniors. Prerequisites: BISC 2202, BISC 2214, and BISC 2322 (may be waived with course director's permission).

ANAT 2181. Human Gross Anatomy. 3 Credits.

The structural organization of the human body and how it relates to regional and systems-based functions. Emphasis on the macroscopic structure of the body. Prerequisites: BISC 1111 and BISC 1112; except by permission of the instructor. Same As: BISC 2581.

ANAT 3099. Variable Topics. 1-12 Credits.

ANAT 5099. Variable Topics. 1-99 Credits.

ANAT 6130. Clinically Oriented Human Embryology. 3 Credits.

The mechanisms of human embryology with clinical correlations of embryological development. Developmental control mechanisms and development of basic organ systems. Molecular control of development. Assisted reproductive technologies. Congenital birth defects. Demonstration labs and online animations for clinical correlates. Restricted to students in the graduate certificate in anatomical and translational sciences program. Recommended background: Introductory course in biology. Credit cannot be earned for this course and ANAT 2130.

ANAT 6150. Clinically Oriented Human Microscopic Anatomy. 4 Credits.

The normal histological structure of cells, tissues, and organs of the human body with emphasis on clinical relevance; structural/functional correlates at both the light and electron microscopic levels; alterations in normal histology through disease or injury and the etiology of various disease states; integration of histological concepts with clinical correlates. Restricted to students in the graduate certificate in anatomical and translational sciences (GCATS) or master's in anatomical and translational sciences (M-ATS) programs. Prerequisites: BISC 1111 and BISC 2202.

ANAT 6160. Human Clinical Neuroanatomy. 3 Credits.

Anatomy and function of the human central and peripheral nervous systems. Emphasis on clinical relevance. Gross and microscopic structure, embryology, and neurophysiology of the brain, spinal cord, and nerves with descriptions of alterations in normal anatomy through disease or injury. Completion of an introductory biology course for science or non-science majors is required prior to enrollment. Restricted to students in the anatomical and translational sciences graduate certificate and Institute for Biomedical Sciences PhD programs or with the permission of the course director.

ANAT 6181. Clinically Oriented Human Gross Anatomy. 4 Credits.

Structural organization of the human body and the relationship of the organization to regional and systems-related functions; application of normal anatomical structure/function relationships to understand clinical implications of disease or injury. The laboratory is used for cadaveric dissection to learn anatomical relationships and basic knowledge of radiographic imaging. Restricted to students in the graduate certificate and master's programs in anatomical and translational sciences and other graduate students with the permission of the course director. Recommended background: Completion of higher-level science courses during the student's undergraduate degree program. Credit cannot be earned for this course and ANAT 2181.

ANAT 6182. Fundamentals of Translational Science. 4 Credits.

Fundamentals of organ development and study; how molecular defects during development can lead to disease. Restricted to students in the graduate certificate in anatomical and translational sciences program.

ANAT 6203. Human Developmental Anatomy. 1 Credit.

ANAT 6204. Neuroanatomy. 2 Credits.

ANAT 6215. Anatomy for Physician Assistant Students. 3 Credits.

Lecture and student examination of prosected cadavers. Provides foundational anatomical knowledge for future courses in the physician assistant curriculum. Restricted to students enrolled in the physician assistant program.

ANAT 6216. Cellular Anatomy and Histology. 2 Credits.

.

ANAT 6219. Biomedical Ethics for Translational Sciences. 2 Credits.

Ethical issues relevant to the practice of medicine and biomedical research involving human subjects. Permission of the instructor required prior to enrollment. Restricted to graduate students. Recommended background: ANAT 6130, ANAT 6150, ANAT 6160, ANAT 6181 and ANAT 6292.

ANAT 6221. Special Topics in Stem Cell Biology. 1-3 Credits.

.

ANAT 6222. Special Topics in Stem Cell Biology. 1-3 Credits.

.

ANAT 6223. Special Topics in Regenerative Medicine. 2 Credits.

Students attend seminars given by invited lecturers to present their research findings and breakthroughs on topics of regenerative medicine. Seminars can be sponsored by the Department of Anatomy and Regenerative Biology, the Stem Cell Interest Group Journal and Data Club, the Molecular Medicine Graduate Program (MMED 8214), and the GW Institute for Neuroscience. Restricted to Graduate Certificate in Anatomical and Translational Sciences only. Prerequisites: Introductory Biology for Science or non-Science Majors.

ANAT 6249. Introduction to Anatomical Research. 1 Credit.

.

ANAT 6252. Human Variation. 1 Credit.

ANAT 6253. Developmental Neurobiology. 3 Credits.

ANAT 6260. Developmental Genetics. 2 Credits.

ANAT 6262. Gross Anatomy of Upper and Lower Extremities. 2 Credits.

.

ANAT 6264. Gross Anatomy of Head and Neck. 2 Credits.

.

ANAT 6266. Gross Anatomy of Thorax and Abdomen. 2 Credits.

.

ANAT 6268. Gross Anatomy of Pelvis, Perineum, and Lower Extremities. 2 Credits.

.

ANAT 6275. Advanced Studies in Translational Sciences. 3 Credits.

Semester-long rotation in a research laboratory conducting translational researching, applying fundamental concepts learned in didactic courses, and developing versatility with new technologies. Permission of the program director is required. Restricted to students in the graduate certificate and master of science in anatomical and translational sciences programs. Prerequisites: Prior completion of an introductory-level course in biology for science or non-science majors.

ANAT 6276. Advanced Studies in Anatomy. 1 Credit.

Detailed study of an anatomic topic tailored to the needs of the individual student. Restricted to graduate students who are in the Graduate Certificate in Anatomical and Translational Sciences program or who have permission of the program director and medical students.

ANAT 6279. Applied Regional Anatomy. 1-5 Credits.

Regional dissection, guided readings.

ANAT 6284. Applied Surface Anatomy and Radiology. 5 Credits.

.

ANAT 6291. Special Projects in Anatomy. 1-12 Credits.

Independent study on any aspect of gross anatomy.

ANAT 6292. Projects in Anatomical Sciences: Introduction to Neuroradiology. 1 Credit.

Various imaging techniques and approaches to visualize normal neuroanatomy toward development and application of skills in teamwork, presentation, discussion, and literature searches. Restricted to students in the graduate certificate in anatomical and translational sciences program.

ANAT 8120. Graduate Human Gross Anatomy. 5 Credits.

An in-depth introduction to human gross anatomy with cadaveric dissection. The structural organization of the human body, including its regional and systems-related functions. The relationship between normal human anatomical variation in structure and function and how disease and/or injury affect these relationships. Permission of the instructor is required prior to enrollment. Offered spring semester in even years. Restricted to doctoral students with permission of the instructor. Recommended background: Prior coursework in the biological sciences or anthropology.

ANAT 8501. Didactic Anatomy. 3 Credits.

Development of a didactic program to include human developmental anatomy, microscopic anatomy, gross anatomy, and/or neuroanatomy. May also include interdepartmental study.

ANAT 8802. Summer Remedial: Human Developmental Anatomy. 1 Credit.

.

ANTHROPOLOGY (ANTH)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ANTH 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester. Consult the schedule of classes for more details.

ANTH 1001. Biological Anthropology. 4 Credits.

Survey of human evolution, genetics and physical variation, and primatology. Regular laboratory exercises. Laboratory fee.

ANTH 1002. Sociocultural Anthropology. 3 Credits.

Survey of the world's cultures, illustrating the principles of cultural behavior. Credit cannot be earned for this course and HONR 2047W.

ANTH 1002W. Sociocultural Anthropology. 3 Credits.

Survey of the world's cultures, illustrating the principles of cultural behavior. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

ANTH 1003. Archaeology. 3 Credits.

Introduction to archaeological survey and excavation techniques and laboratory methods of dating and analysis. Brief history of archaeology and survey of world prehistory. Films and laboratory exercises.

ANTH 1004. Language in Culture and Society. 3 Credits.

Comparison and analysis of how cultures use language to communicate. The relationship of language to issues of human nature, gender, race, class, artistic expression, and power.

ANTH 1005. The Biological Bases of Human Behavior. 4 Credits.

Human behavior from an evolutionary perspective, including issues such as communication, intelligence, reproductive behavior, parental behavior, aggression, and cooperation, and drawing on an understanding of the behavior and biology of the nonhuman primates. Laboratory fee.

ANTH 1099. Variable Topics. 1-36 Credits.**ANTH 2000. Sophomore Colloquium. 3 Credits.**

Sophomore colloquia are small, seminar-type classes that deeply engage CCAS second-year students in a discipline, focus on a narrow issue of high interest and impact, and require independent research projects. May be repeated provided topic differs. Consult the Schedule of Classes for more details. Restricted to CCAS sophomores.

ANTH 2008. Foundations of Anthropological Thought. 3 Credits.

The development of anthropological thought in historical context. Exploration of selected basic concepts and theories of contemporary anthropology. To be taken in the junior or senior year. Prerequisite: ANTH 1002.

ANTH 2008W. Foundations of Anthropology. 3 Credits.

The development of anthropological thought in historical context. Exploration of selected basic concepts and theories of contemporary anthropology. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Restricted to juniors and seniors. Prerequisites: ANTH 1002 or ANTH 1002W.

ANTH 2406. Human Evolutionary Genetics. 3 Credits.

Introduction to the patterns and processes of human genetic variation. Topics include human origins and migration; molecular adaptations to environment, lifestyle, and disease; ancient and forensic DNA analyses; and genealogical reconstructions.

ANTH 2501. The Anthropology of Gender: Cross-Cultural Perspectives. 3 Credits.

Anthropological representations of gender relations in "other" cultures have provided important case material for feminist theorizing of sex differences and gender roles and statuses. How a cross-cultural approach can inform our understanding of gender. Same as WGSS 2121.

ANTH 2502. Anthropology of Science and Technology: Twenty-First Century Brave New Worlds. 3 Credits.

The relationship between science and society, with consideration of how scientific knowledge and emergent technologies affect our lives, identities, social relations, and material conditions. The sociopolitical context in which scientific knowledge is produced and the ethnographic study of biotechnology, especially genetics and its various applications.

ANTH 2505. Introduction to Ethnomusicology. 3 Credits.

Models of understanding music as a cultural endeavor. Application and critique of models in the design and execution of student independent field research. Prerequisites: MUS 1101 or ANTH 1002 or ANTH 1004 or permission of the instructor. (Same as MUS 2105).

ANTH 2506. Religion, Myth, and Magic. 3 Credits.

Anthropological approaches to religion from a cross-cultural perspective; ethnographic examples of religious beliefs and activity, with emphasis on non-Western societies; religious process and change.

ANTH 2533. Material Culture in America. 3 Credits.

Review and analysis of the cultural messages embedded in our material surroundings. Consideration of a range of humanly created artifacts, ranging from specific objects to vast landscapes. Same as AMST 2533.

ANTH 2750. Latinos in the United States. 3 Credits.

Exploration of the term Latino and its impact on discussions of race, identity, and citizenship expectations throughout U.S. history. How geographic, linguistic, aesthetic, political, and economic factors construct Latino identity and influence policymaking and international relations. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Same As: AMST 2750, AMST 2750W, ANTH 2750W.

ANTH 2750W. Latinos in the United States. 3 Credits.

Exploration of the term Latino and its impact on discussions of race, identity, and citizenship expectations throughout U.S. history. How geographic, linguistic, aesthetic, political, and economic factors construct Latino identity and influence policymaking and international relations. Same As: AMST 2750, AMST 2750W, ANTH 2750.

ANTH 2821. Myths and Mysteries in Archaeology. 3 Credits.

How archaeological methods and techniques can falsify, or support, exotic beliefs about the past. Topics range from King Arthur to Atlantis.

ANTH 2822. Archaeology in Film and Television. 3 Credits.

The relationships between archaeology, the media, and popular culture; nationalism, descendant communities, gender, race, and colonialism.

ANTH 3099. Variable Topics. 1-12 Credits.**ANTH 3401. Human Functional Anatomy. 3 Credits.**

The anatomy of the human body, how it works, and how it differs from other animals, especially other primates. Principles and approaches of functional morphology and biomechanics and how function can be reconstructed from fossils, with special focus on the musculoskeletal system. No prior knowledge of anatomy is required. Laboratory fee. Prerequisite: ANTH 1001.

ANTH 3402. Human Evolutionary Anatomy. 3 Credits.

The structure and function of human anatomy, as compared to our closest relatives, the great apes. Using this comparative approach, the course investigates the fossil record of human evolution, with an emphasis on reconstructing relationships, function, behavior, and adaptation in fossil hominins. Prerequisite: ANTH 1001.

ANTH 3403. Forensic Anthropology Laboratory. 2 Credits.

Identification of human skeletal remains by body part, age, sex, race, and individual disease or trauma history; study of skeletal variation in modern and recent populations. Taught at the Smithsonian. Corequisite: ANTH 3404.

ANTH 3404. Human Variation. 1 Credit.

An overview of human variation, with special emphasis on the skeleton. Includes history of physical anthropology, individual and population variations, archaeological recovery of human remains, paleodemography, growth, paleopathology, and forensic anthropology. Corequisite: ANTH 3403 Prerequisite: ANTH 1001. Same As: ANAT 6252.

ANTH 3406. Advanced Human Osteology. 3 Credits.

Advanced techniques in determination of age, sex, ancestry, and pathological conditions using the skeleton. Taught at the Smithsonian. Prerequisites: ANTH 3403 and ANTH 3404.

ANTH 3407. Conservation in a Changing World: Human and Animal Behavior. 3 Credits.

How humans and animals interact in a wide variety of settings, how human and animal welfare can be ensured, and how we can create a scientifically sound, yet socially and economically acceptable, conservation of the planet's biodiversity. Prerequisites: ANTH 1001.

ANTH 3408. The Evolution of Human Families. 3 Credits.

Human parental behavior considered from an evolutionary perspective, including parental care among mammals, concepts of parental investment, and parent-offspring conflict. Focus on parenting in the human lineage from early hominins to hunter-gatherers to the modern context. Prerequisites: ANTH 1001.

ANTH 3409. Evolution of Primate Life Histories. 3 Credits.

Human and non-human primate life histories and their evolution; factors such as body size, brain size, fertility, and life span. Features of modern human life histories, proposed explanations for them, and pertinent fossil evidence. Prerequisite: ANTH 1001.

ANTH 3411. Primatology. 3 Credits.

Physical and behavioral characteristics of the various primate groups and their relationship to human physical and cultural evolution. Prerequisite: ANTH 1001.

ANTH 3412. Hominin Evolution. 3 Credits.

The fossil record of human evolution, including its context. Review of the fossil evidence that concentrates on the distinctive features of each taxon. Pleistocene remains. Laboratory fee. Prerequisite: ANTH 1001.

ANTH 3412W. Hominin Evolution. 3 Credits.

The fossil record of human evolution, including its context. Review of the fossil evidence that concentrates on the distinctive features of each taxon. Pleistocene remains. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Laboratory fee. Prerequisite: ANTH 1001.

ANTH 3413. Evolution of the Human Brain. 3 Credits.

Examination of how the human brain is unique in comparison to other animals, with an emphasis on understanding our species' distinctive neurobiology in terms of the evolution of cognitive abilities such as language, social comprehension, tool making, and abstract thinking.

ANTH 3491. Topics in Biological Anthropology. 3 Credits.

Topic announced in the Schedule of Classes. Instructors are drawn from GW faculty and Smithsonian Institution staff. May be repeated for credit if topic varies. Prerequisite: ANTH 1001.

ANTH 3501. Anthropology of Development. 3 Credits.

The impact of the world economy on nonindustrial societies. Analysis of the role of anthropology in international development programs aimed at alleviating problems in the Third World. Prerequisites: ANTH 1002 or ANTH 1002W.

ANTH 3502. Cultural Ecology. 3 Credits.

Basic principles of cultural ecology. Human interaction with the ecosystem both past and present; emphasis on the application of anthropological precepts to current environmental problems. Prerequisites: ANTH 1002 or ANTH 1002W or ANTH 1004 or ANTH 1004W or permission of the instructor.

ANTH 3503. Psychological Anthropology. 3 Credits.

The cross-cultural study of the relationship between culture and personality. Topics include emotion, conceptions of the self, mental health and illness, sexuality, marriage and parenting, and cognition. Psychobiological, cultural, ecological, and psychoanalytical theories are examined. Prerequisites: ANTH 1002 or permission of the instructor.

ANTH 3504. Illness, Healing, and Culture. 3 Credits.

Introduction to medical anthropology. What the record of human evolution and prehistory tells about human health; the epidemiology of health and illness; how different cultures define disease; understanding illness and healing systems cross-culturally; and the role of medical anthropology in health care and international development. Prerequisites: ANTH 1002 or permission of the instructor.

ANTH 3506. Politics, Ethnicity, and Nationalism. 3 Credits.

Comparative analysis of political systems; political processes, such as factionalism, styles of leadership, and political ritual. Prerequisites: ANTH 1002 or ANTH 1002W; or ANTH 1004 or ANTH 1004W; or permission of the instructor.

ANTH 3507. Kinship, Family, and Community. 3 Credits.

Cross-cultural analysis of how people form, maintain, and transform social groups and boundaries. Focus on how communities such as family, ethnic group, and nation are defined in moral terms. Prerequisites: ANTH 1002 or permission of the instructor.

ANTH 3508. Art and Culture. 3 Credits.

The role of art in culture, with emphasis on small-scale societies. Influences upon the artist, and beliefs and practices associated with art production. Prerequisites: ANTH 1002 or ANTH 1002W; or ANTH 1004 or ANTH 1004W; or permission of the instructor.

ANTH 3513. Anthropology of Human Rights. 3 Credits.

Issues of basic human rights and their violation by different cultures, states, and organizations. Genocide, ecocide, abuses on the basis of ethnicity, religion, or similar factors, and treatment of those seeking asylum. Rights of informants and groups studied in anthropological research. Prerequisites: ANTH 1002 or ANTH 1002W; or ANTH 1004 or ANTH 1004W; or permission of the instructor.

ANTH 3513W. Anthropology of Human Rights. 3 Credits.

Issues of basic human rights and their violation by different cultures, states, and organizations. Genocide, ecocide, abuses on the basis of ethnicity, religion, or similar factors, and the treatment of those seeking asylum. Rights of informants and groups studied in anthropological research. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: ANTH 1002 or ANTH 1002W.

ANTH 3521. Visual Anthropology and the Social Lives of Images. 3 Credits.

Exploration of what still and moving images do in different cultural contexts, their social lives as they circulate, and how they are transformed as objects and a technology in diverse settings. Prerequisites: ANTH 1002 or ANTH 1002W.

ANTH 3531. Methods in Sociocultural Anthropology. 3 Credits.

Approaches to field research. Conceptual bases and biases in the delineation of problems and in the selection, analysis, and organization of data. Students design and carry out their own field projects in the Washington area. Prerequisite: ANTH 1002.

ANTH 3601. Language, Culture, and Cognition. 3 Credits.

The role of language and culture in the organization of human experience. Beginning with debates about linguistic relativity, the course explores the way language use shapes cognition and practice in a variety of cultures and social contexts. Same as LING 3601. Prerequisite: ANTH 1004. Laboratory fee.

ANTH 3602. Ethnographic Analysis of Speech. 3 Credits.

Linguistic variation and change in discourse practices; social and political correlates of linguistic interaction; recording, transcription, and analysis of verbal interaction. Prerequisites: ANTH 1004. (Same as LING 3602).

ANTH 3602W. Ethnographic Analysis of Speech. 3 Credits.

Linguistic variation and change in discourse practices; social and political correlates of linguistic interaction; recording, transcription, and analysis of verbal interaction. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: ANTH 1004.

ANTH 3603. Psycholinguistics. 3 Credits.

Language as species-specific property of the human mind. Psychological processes involved in the encoding and decoding of language; first and second language acquisition and bilingualism. Same as LING 3603.

ANTH 3625. Ethnographic and Historical Perspectives on Data Ethics. 3 Credits.

An introduction to ethics of data sciences from two disparate perspectives: historical and ethnographic. For students in all fields interested in understanding and evaluating the ethical implications of data and algorithms. Same As: AMST 3625.

ANTH 3691. Special Topics in Linguistic Anthropology. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs. Prerequisites: ANTH 1004 or permission of the instructor. (Same as LING 3691).

ANTH 3701. Native Peoples - North America. 3 Credits.

Comparative study of Indian groups representative of the different culture areas of the United States and Canada. Contemporary issues involving indigenous groups, the wider society, and the state. Prerequisite: ANTH 1002 or permission of instructor.

ANTH 3702. Anthropology of Latin America. 3 Credits.

Culture history and ways of life in a selected region of Central or South America. Regional focus to be announced in the Schedule of Classes. Prerequisites: ANTH 1002 or ANTH 1002W or ANTH 1004.

ANTH 3703. Cultures of the Pacific. 3 Credits.

Culture history and ways of life among native peoples of Melanesia, Micronesia, and Polynesia. Prerequisites: ANTH 1002 or ANTH 1004.

ANTH 3704. Cultures of Southeast Asia. 3 Credits.

Anthropological introduction to the cultures of Southeast Asia; the role of biocultural evolution, political economy, gender, colonialism, nationalism, and globalization, particularly in Vietnam, Myanmar, Thailand, Malaysia, Indonesia, and the Philippines.

ANTH 3705. Anthropology of East Asia. 3 Credits.

Intensive study of the culture and history of selected peoples of East or Central Asia. Specific area to be announced in the Schedule of Classes. May be repeated for credit. Prerequisites: ANTH 1002 or ANTH 1002W or ANTH 1004.

ANTH 3707. Anthropology of the Middle East. 3 Credits.

Geographic environment, language, religion, and social structure of settled and nomadic peoples of the Middle East; emphasis on the Arab world. Prerequisites: ANTH 1002 or ANTH 1004.

ANTH 3708. Anthropology of Africa. 3 Credits.

Comparative examination of the history, cultural development, and contemporary problems of sub-Saharan African cultures. New World African cultures are also considered. Prerequisites: ANTH 1002 or ANTH 1004.

ANTH 3709. Japanese Culture Through Film. 3 Credits.

Survey of the Japanese cultural heritage presented through films. Topics include literature, philosophy, art, religion, and social history from premodern times to the modern era. Lectures and discussion in English. Same as JAPN 3162.

ANTH 3710. Latin America Cinema, Indigenous Media, and Social Movements. 3 Credits.

Major topics in Latin American film and media studies. Political, economic, social, and cultural forces that have shaped Latin American cinema. The role indigenous artists, activists, and social organizations play in shaping Latin American cinema. Same As: ANTH 6710.

ANTH 3791. Topics in Regional Anthropology. 3-4 Credits.

Culture, history, and ways of life in a selected region of the world. Topics vary. Consult the Schedule of Classes for more details. Prerequisites: ANTH 1002 or ANTH 1002W or ANTH 1004.

ANTH 3801. African Roots from Australopithecus to Zimbabwe. 3 Credits.

The development and contributions of Africa from human beginnings through medieval states. Topics include human evolution, origins of art, technology, trade, and animal/plant domestication, rise of African states, early relations with Europe and Asia, antecedents of contemporary African diversity. Prerequisites: ANTH 1003 or permission of the instructor.

ANTH 3801W. African Roots from Australopithecus to Zimbabwe. 3 Credits.

The development and contributions of Africa from human beginnings through medieval states. Topics include human evolution, origins of art, technology, trade, animal/plant domestication, rise of African states, early relations with Europe and Asia, antecedents of contemporary African diversity. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: ANTH 1003.

ANTH 3802. Human Cultural Beginnings. 3 Credits.

Survey of prehistory in Europe, Africa, and Asia from the earliest hominid cultures to the beginnings of agriculture. Prerequisite: ANTH 1003.

ANTH 3802W. Human Cultural Beginnings. 3 Credits.

Survey of prehistory in Europe, Africa, and Asia from the earliest hominid cultures to the beginnings of agriculture. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: ANTH 1003.

ANTH 3803. Old World Prehistory: First Farmers to First Cities. 3 Credits.

Archaeology of the Near East, Egypt, Europe, and other areas, from the beginnings of agriculture to the rise of Babylon. Prerequisites: ANTH 1003.

ANTH 3803W. Old World Prehistory: First Farmers to First Cities. 3 Credits.

Archaeology of the Near East, Egypt, Europe, and other areas, from the beginnings of agriculture to the rise of Babylon. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: ANTH 1003.

ANTH 3804. Origins of the State and Urban Society. 3 Credits.

Emergence of urbanism and the state in the prehistory of various world regions. Regions covered might include India, China, Mexico, and the Pacific, among others. Prerequisites: ANTH 1003.

ANTH 3805. Archaeology of Israel and Neighboring Lands. 3 Credits.

The archaeology of Israel and adjacent areas (Syria, Jordan, Lebanon). Examination of many major sites and monuments. Significant problems and current debates. Same as AH 3106.

ANTH 3806. Art and Archaeology of the Aegean Bronze Age. 3 Credits.

Excavational and multidisciplinary aspects of classical archaeology. Minoan and Mycenaean civilizations (1700-1200 B.C.) Same as AH 3104.

ANTH 3808. Archaeology and the Celts. 3 Credits.

The archaeology and history of the Celtic peoples, particularly how ethnicities and identities are defined and how these can be recovered from material culture; how archaeological ideas of the Celts have informed modern group identities. Prerequisites: ANTH 1003.

ANTH 3811. Historical Archaeology. 3 Credits.

Survey of the basic data and methods of research in the material culture of recent history. Same as AmSt 3811.

ANTH 3812. The Aztec Empire. 3 Credits.

Using archaeology, art, and ethnohistoric documents, this course focuses on the importance of power in Aztec society and how the normalization of violence created a form of social cohesion central to the state. Prerequisite: ANTH 1003. (Same as AH 3116, CAH 3116).

ANTH 3813. Archaeology of North America. 3 Credits.

History of American archaeology; survey of North American culture history from human entry into the Americas during the Pleistocene period until the time of the first European contacts. Focus on peoples north of Mexico. Prerequisite: ANTH 1003.

ANTH 3814. Ancient Mexican Civilizations. 3 Credits.

Cultural history of pre-Columbian societies in Middle America; the emergence of Mesoamerican civilization from the earliest hunter-gatherers and first farmers to the Aztec Empire. Prerequisite: ANTH 1003. (Same as AH 3107, CAH 3107).

ANTH 3823. Archaeology of Ritual and Religion. 3 Credits.

Archaeological and ethnographic examples from around the world are used to critically evaluate how archaeologists make inferences about ritual practices and the religious lives of past peoples. Issues include the origins of symbolic behavior, sacred landscapes, shamanism, ancestor veneration, and sorcery/witchcraft.

ANTH 3831. Paleoanthropological Field Program. 0 Credits.

Field research in paleoanthropology, including excavation methods, identification and analysis of materials, paleoecology, archaeology, and human anatomy. Conducted at selected sites in Eurasia, Africa, or Australia. Departmental approval required. Restricted to fellowship students. Credit cannot be earned for this course and ANTH 3832.

ANTH 3832. Paleoanthropological Field Program. 4 Credits.

Field research in paleoanthropology, including excavation methods, identification and analysis of materials, paleoecology, archaeology, and human anatomy. Conducted at selected sites in Eurasia, Africa, or Australia. Visits to comparative sites and collections in the region.

ANTH 3833. Field Research: New World. 1-6 Credits.

Survey, excavation, and/or laboratory analysis at localities in North or South America. See Schedule of Classes for details.

ANTH 3834. Field Research: Old World. 1-6 Credits.

Survey, excavation, and/or laboratory analysis at Neolithic or later localities in Eurasia, Africa, or Oceania. See Schedule of Classes for details.

ANTH 3835. Historical Archaeology Field Program. 3 Credits.

Practical experience with a variety of excavation and laboratory techniques in historical archaeology; specific site and topics announced in the Schedule of Classes. Same as AMST 3835.

ANTH 3836. Koobi Fora Field School (Fellowship). 0 Credits.

Field research in paleoanthropology, including excavation methods, identification and analysis of materials, paleoecology, archaeology, and human anatomy. Visits to comparative sites and collections in the region. Instructor approval required. Restricted to fellowship students.

ANTH 3838. Theory and Practice in Archaeology. 3 Credits.

The primary literature in archaeology theory since the 1960s. Ethics, topical issues, and archaeological practice. Prerequisite: ANTH 1003.

ANTH 3838W. Theory and Practice in Archaeology. 3 Credits.

The primary literature in archaeology theory since the 1960s. Ethics, topical issues, and archaeological practice. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: ANTH 1003.

ANTH 3839. Lab Research Methods in Archaeology. 3 Credits.

Research methods and techniques used by archaeologists. Emphasis on hands-on experience in one or more techniques. Prerequisite: ANTH 1003.

ANTH 3891. Special Topics in Archaeology. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs. Prerequisites: ANTH 1003 or permission of the instructor.

ANTH 3991. Special Topics. 3 Credits.

Topics announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

ANTH 3991W. Special Topics. 3 Credits.

Topics announced in the Schedule of Classes. May be repeated for credit provided the topic differs. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Credit cannot be earned for this course and AMST 2490W.

ANTH 3995. Undergraduate Research. 1-12 Credits.

Individual research problems to be arranged with a member of the faculty. May be repeated for credit. Permission of the instructor required prior to enrollment.

ANTH 4008. Seminar: Contemporary Anthropological Theory. 3 Credits.

The development of major trends in anthropological theory. How anthropologists from the four fields—sociocultural, linguistic, biological, and archaeology—have deployed and developed the ideas of theorists in their own empirical research and theorizing about specific processes. Prerequisite: ANTH 2008.

ANTH 4008W. Seminar: Contemporary Anthropological Theory. 3 Credits.

The development of major trends in anthropological theory. How anthropologists from the four fields -- sociocultural, linguistic, biological, and archaeology -- have deployed and developed the ideas of theorists in their own empirical research and theorizing about specific processes. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: ANTH 2008 or ANTH 2008W.

ANTH 5099. Variable Topics. 1-99 Credits.

ANTH 6101. Proseminar in Biological Anthropology. 3 Credits.

Comprehensive overview of theory and practice in biological anthropology.

ANTH 6102. Proseminar in Sociocultural Anthropology. 3 Credits.

Comprehensive overview of theory and practice in sociocultural anthropology.

ANTH 6103. Proseminar in Archaeology. 3 Credits.

Survey of the most recent archaeological techniques and theoretical approaches to reconstructing and interpreting the cultures of the past.

ANTH 6104. Proseminar in Linguistic Anthropology. 3 Credits.

Contemporary anthropological studies of language in biological, social, and historical perspectives.

ANTH 6200. Museum Anthropology. 3 Credits.

How anthropological collections take shape in the past and carry meaning in the present. Critical examination of artifacts and forms of documentation. Application of material culture theory to museum records, collected objects, the changing meaning given to objects, and the context of collecting.

ANTH 6201. Methods in Museum Anthropology. 3 Credits.

How anthropological collections take shape in the past and carry meaning in the present. Research and analysis of existing collections; issues in museum anthropology.

ANTH 6203. Preventive Conservation Concepts. 3 Credits.

Historical development of preventive conservation in museums, conservation ethics, team approaches to conservation, interactions of various materials with agents of deterioration. Basics of materials testing, preparation of condition reports, choosing museum storage and exhibition materials, and risk assessment. Same as MSTD 6203/ AH 6286.

ANTH 6204. Preventive Conservation Techniques. 3 Credits.

Practical applications of preventive conservation of materials, monitoring environmental conditions, conducting risk assessments, evaluation of exhibit and storage areas; developing plans, policies, and procedures for collections care; grant proposal preparation for collections care initiatives. Same as MSTD 6204/ AH 6287.

ANTH 6205. Problems in Conservation. 3 Credits.

Individual conservation projects to determine composition, construction, decomposition of materials, and possible stabilization techniques. Conservation laboratory experience. AH 6286 or ANTH 6203 may be taken as a corequisite. Prerequisites: AH 6286 or ANTH 6203.

ANTH 6230. Internship in Museum Anthropology. 1-6 Credits.

Supervised individual research and/or field work at the Smithsonian Institution or other area museums, arranged in consultation with the museum and the Anthropology Department. Admission by arrangement with the department chair or museum training advisor. May be repeated for credit up to a maximum of 6 credits.

ANTH 6291. Special Topics in Museum Anthropology. 3 Credits.

The social context and changing meaning of selected cultural processes or aspects of material culture that are represented in museums or public monuments. Topics vary by semester. See department for more details.

ANTH 6301. The Anthropology of Development. 3 Credits.

Theoretical perspectives that distinguish the contribution of anthropology to understanding processes of change in the Third World. Focus on health, population, environment, gender, and tourism issues. The role of anthropology in planning and implementing projects and policy.

ANTH 6302. Issues in Development. 3 Credits.

Topic to be announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

ANTH 6330. Internship in Development Anthropology. 3 Credits.

Supervised participation in a selected development agency or other relevant organization. Opportunity to observe agency procedures and gain practical experience. Admission by permission of instructor or department chair.

ANTH 6331. Research Methods in Development Anthropology. 3 Credits.

Anthropologists' roles in research-related activities, such as feasibility studies, social soundness analysis, and evaluations. Innovative research techniques, such as interactive data gathering, team survey methods, and rapid rural appraisal. Admission by permission of instructor.

ANTH 6391. Anthropology and Contemporary Problems. 3 Credits.

Exploration of anthropological perspectives on a current issue, such as refugees, ethnic violence, national mythologies, and women's health in developing countries. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

ANTH 6401. Human Functional Anatomy. 3 Credits.

Growth and function of the musculoskeletal system, including the development, anatomy, and histology of bone, biomechanics of muscle and skeletal tissue, craniofacial and dental growth and morphology, and locomotion. No prior knowledge of anatomy required. Laboratory fee.

ANTH 6403. Primate Behavior. 3 Credits.

Behavioral diversity and trends found in primates, both within and between primate species. How ecology relates to behavior, biology, and individual fitness. Presents pertinent theoretical models and draws from non-primate examples as appropriate. Restricted to Students in the MS and PhD in human paleobiology and MA and PhD in anthropology programs (other graduate students and undergraduates with the permission of the instructor).

ANTH 6404. The Evolution of Primate Life Histories. 3 Credits.

Recent developments in the study of human and non-human life histories. Life history theory. Life history traits compared among primate groups in order to determine how selective pressures have shaped extant primate life history patterns. Laboratory fee.

ANTH 6406. Human Genetic Variation. 3 Credits.

The genetic variation in human populations as a framework for measurement and analysis of genetic diversity and evolutionary process. Consideration of the possible roles of cultural change leading to adaptive/selective events. Same as FORS 6246.

ANTH 6407. Anthropological Genetics. 3 Credits.

Molecular approaches to understanding human evolution and diversity; current research findings and new methodologies; social and ethical issues, including commercial DNA testing and ownership of biological samples.

ANTH 6412. Paleoanthropology. 1-3 Credits.

Survey of current research in hominid and hominoid evolution, focusing on the integrated nature of the field. Contributions from the geological and biological sciences are stressed, together with innovative geochemical techniques for establishing chronological sequences. Prerequisites: ANTH 3412 or BISC 2450.

ANTH 6413. Analytical Methods in Human Evolutionary Studies. 3 Credits.

A survey of methods and approaches for data collection and analysis in human evolutionary biology research. Topics include comparative methods and basic and multivariate statistics.

ANTH 6491. Topics in Biological Anthropology. 3 Credits.

Topic announced in the Schedule of Classes. Instructors are drawn from GW faculty and Smithsonian Institution staff. May be repeated for credit if topic varies. Credit cannot be earned for this course and FORS 6290.

ANTH 6501. Gender and Sexuality. 3 Credits.

Study of new theoretical and methodological approaches developed in the anthropology of gender; postcolonialism, sexuality, and literary representations of gender. Same as WGSS 6257.

ANTH 6504. Social Study of Science and Technology. 3 Credits.

Concepts, theories, and cases in contemporary science and technology studies with an emphasis on the public and policy relevance of theory. Ethnographic material includes studies of laboratories, technomedicine, and environmental controversies.

ANTH 6505. Medical Anthropology. 3 Credits.

Concepts and theories in contemporary medical anthropology, including "critical" versus "conventional" medical anthropology, changes in approaches since the mid-twentieth century; structural and cultural construction of illness and suffering; ethnographic and epidemiological perspectives.

ANTH 6506. Topics in Medical Anthropology. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit if the topic varies.

ANTH 6507. Nationalism and Ethnicity. 3 Credits.

Major theoretical and ethnographic issues in the study of nationalism worldwide. Explores how ethnic groups emerge in colonial and contemporary plural societies and how states attempt to integrate ethnic groups into nations.

ANTH 6508. Ethics and Cultural Property. 3 Credits.

Survey of ethical issues in anthropology, focusing on cultural property and repatriation; the epistemological, ethical, and political dilemmas of excavating, collecting, and owning cultural artifacts.

ANTH 6510. War and Memory. 3 Credits.

The lived experiences of violent conflict through an anthropological lens. Focus on war's toll and theories of memory; witnessing and reckoning with genocide; diasporic memory; memorials, monuments, and the missing. Restricted to graduate students.

ANTH 6531. Methods in Sociocultural Anthropology. 3 Credits.

Epistemology; the definition of research problems; selection of research subjects and sites; techniques of data collection (e.g., surveys, interviews); data management and organization; ethical protocols; issues of safety; grant writing and funding.

ANTH 6561. American Folklife. 3 Credits.

The materials of American folk culture, concentrating on folk architecture, crafts, and art. Major organizing themes are regionalism and the use of objects as indicators of cultural intention. Same as AMST 6561.

ANTH 6562. Folklore Theory. 3 Credits.

An intellectual history of American folklore research; analysis of particular theories and methods. Same as AMST 6562.

ANTH 6591. Topics in Sociocultural Anthropology. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit if the topic varies. Credit cannot be earned for this course and AMST 6190.

ANTH 6691. Topics in Linguistic Anthropology. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit if the topic varies.

ANTH 6702. Issues in Latin American Anthropology. 3 Credits.

Intensive study of a selected topic in the anthropology of Central and/or South America. Topic to be announced.

ANTH 6707. Issues in Middle East Anthropology. 3 Credits.

Selected topics in the anthropology of the Middle East. Topic to be announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

ANTH 6710. Latin America Cinema, Indigenous Media, and Social Movements. 3 Credits.

Major topics in Latin American film and media studies. Political, economic, social, and cultural forces that have shaped Latin American cinema. The role indigenous artists, activists, and social organizations play in shaping Latin American cinema. Same As: ANTH 3710.

ANTH 6801. Paleolithic Archaeology. 3 Credits.

Current problems relating to materials from the Old World.

ANTH 6802. Problems in Eurasian and African Archaeology. 3 Credits.

Topic announced in the Schedule of Classes. Topics may include Bronze Age conflict, the Celts, etc. May be repeated for credit.

ANTH 6803. Problems in New World Archaeology. 3 Credits.

Current archaeological problems relating to the origin and development of aboriginal cultures. Specific topic to be announced in the Schedule of Classes. May be repeated for credit.

ANTH 6804. Problems in Mesoamerican Archaeology. 3 Credits.

Topics range from specific civilizations, such as the Olmec, to pan-Mesoamerican topics, such as religion and exchange. May be repeated for credit.

ANTH 6806. Technology. 3 Credits.

Cross-cultural examination of the form, function, meaning, and use of material culture (such as ceramics or stone tools) and the behavior patterns involved in its production. Topic vary by semester. Consult the Schedule of Classes for more details.

ANTH 6807. Public Archaeology. 3 Credits.

The use and creation of the past and the relationship between archaeologists and different publics.

ANTH 6832. Paleoanthropological Field Program. 4 Credits.

Intensive course on field research in paleoanthropology, including excavation methods, identification and analysis of materials, paleoecology, archaeology, and human anatomy. Conducted at selected sites in Eurasia, Africa, or Australia. Visits to comparative sites and collections in the region.

ANTH 6833. Field Research: New World. 1-6 Credits.

Survey, excavation, and/or laboratory analysis at localities in North or South America. Consult the Schedule of Classes for more details.

ANTH 6835. Historical Archaeology Field Program. 3-6 Credits.

Practical experience with a variety of excavation and laboratory techniques in historical archaeology; specific site and topics announced in the Schedule of Classes. Same as AMST 6835.

ANTH 6836. Koobi Fora Field School (Fellowship). 0 Credits.

Field research in paleoanthropology, including excavation methods, identification and analysis of materials, paleoecology, archaeology, and human anatomy. Visits to comparative sites and collections in the region. Instructor approval required. Restricted to fellowship students.

ANTH 6838. Archaeological Theory. 3 Credits.

Overview of major theories and positions in American archaeology; examination of new issues and directions in which the field appears to be moving.

ANTH 6839. Lab Research Methods in Archaeology. 3,4 Credits.

Research methods and techniques used by archaeologists. Emphasis on hands-on experience in one or more techniques. Laboratory fee.

ANTH 6891. Topics in Archaeology. 3 Credits.

Major issues related to the theory and practice of archaeology. Topic announced in the Schedule of Classes.

ANTH 6995. Research. 1-12 Credits.

May be repeated for credit.

ANTH 6998. Thesis Research. 3 Credits.**ANTH 6999. Thesis Research. 3-9 Credits.**

Development of a thesis project and accompanying research.

ANTH 8695. Linguistic Field Methods. 3 Credits.

The relationship between language and thought in dialogue with the study of a particular foreign language. Ethnographic study of language and cognition and the application of linguistic theory and method to anthropological research. Methods of elicitation and textual analysis, and technologies used for storing and analyzing linguistic data. Restricted to graduate students.

ANTH 8998. Advanced Reading and Research. 1-12 Credits.

May be repeated for credit. Restricted to doctoral candidates preparing for the general examination.

ANTH 8999. Dissertation Research. 3-12 Credits.

May be repeated for credit. Restricted to doctoral candidates.

APPLIED SCIENCE (APSC)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

SEAS and its departments manage APSC courses as follows:

- SEAS Dean's Office—1001, 3098, 6215, 6216
- Civil and Environmental Engineering—2057, 2113, 6211, 6214
- Mechanical and Aerospace Engineering—2058, 6212, 6213
- Electrical and Computer Engineering—2114

APSC 1001. Introduction to Engineering for Undeclared Majors. 1 Credit.

As an introduction to disciplines within SEAS, potential solutions to problems are presented by practitioners of civil and environmental engineering; computer science; electrical, computer, and biomedical engineering; mechanical and aerospace engineering; and systems engineering.

APSC 1099. Continuous Research. 1 Credit.**APSC 2057. Analytical Mechanics I. 3 Credits.**

First half of a one-year sequence. Concepts of statics: force systems, conditions of force and moment equilibrium, simple structures, distributed forces, centroids, internal forces, friction, moments of inertia. Prerequisites: PHYS 1021. (Fall and spring).

APSC 2058. Analytical Mechanics II. 3 Credits.

Second half of a one-year sequence. Concepts of dynamics: kinematics of particles, velocity and acceleration, translating and rotating reference frames, particle dynamics, motion under central and electromagnetic force, effect of Earth's rotation, vibrations, work, kinetic and potential energy, dynamics of systems of particles. Prerequisite: APSC 2057. (Fall and spring, Every Year).

APSC 2113. Engineering Analysis I. 3 Credits.

Analytical methods for the solution of problems in engineering, the physical sciences, and applied mathematics: applications of ordinary differential equations, matrices and determinants, eigenvalues and eigenvectors, systems of ordinary linear differential equations, Bessel and Legendre functions. Prerequisite or concurrent registration: MATH 2233.

APSC 2114. Engineering Analysis II. 3 Credits.

Analytical methods for the solution of problems in engineering, the physical sciences, and applied mathematics: complex variables, Fourier series and integral, frequency filters, Laplace transforms, inversion and Duhamel integrals; partial differential equations. Prerequisite: MATH 2233.

APSC 3098. Variable Topics. 1-36 Credits.**APSC 3115. Engineering Analysis III. 3 Credits.**

Analytical methods for the solution of problems in engineering using concepts from probability and statistics: probability modeling, random variables and their distributions, mathematical expectation, sampling, point and confidence interval estimation, hypothesis testing, correlation, regression, and engineering applications. (Fall, spring, and summer).

APSC 3116. Engineering Analysis IV. 3 Credits.

Analytical methods using advanced concepts from probability and statistics: multivariate distributions, expectation, generating functions, parametric families of distributions, sampling and sufficient statistics, estimation, hypothesis testing, and engineering applications. May be taken for graduate credit. Prerequisites: APSC 3115 and MATH 2233. (Fall, Every Year).

APSC 5099. Variable Topics. 1-99 Credits.**APSC 6211. Analytical Methods in Engineering I. 3 Credits.**

Engineering applications of the theory of complex variables: contour integration, conformal mapping, inversion integral, and boundary-value problems. Prerequisite: approval of department.

APSC 6212. Analytical Methods in Engineering II. 3 Credits.

Algebraic methods appropriate to the solution of engineering computational problems: linear vector spaces, matrices, systems of linear equations, eigenvalues and eigenvectors, quadratic forms. Permission of the department required prior to enrollment. (Spring, Every Year).

APSC 6213. Analytical Methods in Engineering III. 3 Credits.

Analytical techniques for solution of boundary-initial-value problems in engineering: wave propagation, diffusion processes, and potential distributions. Permission of the department required prior to enrollment. (Spring, Every Year).

APSC 6214. Analytical Methods in Engineering IV. 3 Credits.

Introduction to variational methods in engineering: Ritz and Galerkin approximation methods of boundary-value problems, aspects of linear integral equations arising from engineering analysis. Permission of the department required prior to enrollment. (Spring, Every Year).

APSC 6215. Analytical Methods in Engineering V. 3 Credits.

Advanced methods of solution of boundary-initial-value problems in engineering: characteristics, wave propagation, and Green's functions. Prerequisite: APSC 6213.

APSC 6216. Special Topics in Engineering Analysis. 3 Credits.

Selected topics, such as perturbation techniques applied to approximate solution of nonlinear boundary and initial-value problems in engineering; application of singular integral equations in problems of mechanics. Permission of the department required prior to enrollment. (Fall and spring, Every Year).

ARABIC (ARAB)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ARAB 1001. Beginning Arabic I. 4 Credits.

Fundamentals of grammar and pronunciation and development of speaking, listening, reading, and writing skills in culturally appropriate contexts.

ARAB 1002. Beginning Arabic II. 4 Credits.

Continuation of ARAB 1001. Fundamentals of speaking, listening, reading, and writing in culturally appropriate and proficiency-oriented contexts. Prerequisite: ARAB 1001.

ARAB 1099. Variable Topics. 16 Credits.**ARAB 1201. Intensive Elementary Arabic I. 6 Credits.**

Accelerated learning of fundamentals of speaking, listening, reading, and writing Arabic in culturally appropriate contexts for proficiency.

ARAB 1202. Intensive Elementary Arabic II. 6 Credits.

Continuation of ARAB 1201. Fundamentals of speaking, listening, reading, and writing of Arabic in culturally and linguistically appropriate contexts. Prerequisites: ARAB 1201.

ARAB 2001. Intermediate Arabic I. 4 Credits.

Continuation of ARAB 1002. Further development of speaking, listening, reading, and writing skills of Arabic in culturally appropriate, proficiency-oriented contexts. Prerequisites: ARAB 1002.

ARAB 2002. Intermediate Arabic II. 4 Credits.

Continuation of ARAB 2001. Further development of speaking, listening, reading, and writing skills of Arabic in culturally appropriate and proficiency-oriented contexts. Prerequisites: ARAB 2001 or ARAB 1202.

ARAB 2105. Topics in Arabic Studies. 1-3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. See department for more details.

ARAB 2201. Intensive Intermediate Arabic I. 6 Credits.

Continuation of ARAB 1202. Prerequisite: ARAB 1202. Laboratory fee.

ARAB 3001. Advanced Arabic. 4 Credits.

Emphasis on development of speaking, listening, reading, and writing skills at the advanced level of proficiency in culturally appropriate contexts. Discussion of cultural and social issues based on a selection of contemporary written and audiovisual materials from Arab literary and media sources. Prerequisites: ARAB 2002.

ARAB 3099. Variable Topics. 1-12 Credits.**ARAB 3105. Special Topics. 3 Credits.**

Topic announced in the Schedule of Classes may be repeated for credit provided the topic differs.

ARAB 3201. Intensive Advanced Arabic: Mass Media. 6 Credits.

Continuation of ARAB 2201. Accelerated learning of Arabic skills in speaking, listening, reading, and writing at the intermediate/advanced level of proficiency in culturally appropriate contexts. Prerequisites: ARAB 2201.

ARAB 3301. Modern Arabic Literature. 3 Credits.

Short stories, short plays, poems, literary essays in Modern Standard Arabic, with attention to linguistic and literary stylistic aspects. Prerequisites: ARAB 3001 or ARAB 3201.

ARAB 3302. Media Arabic. 3 Credits.

Authentic scripted and audiovisual materials from various contemporary Arab media outlets including television and radio newscast and cultural programs, newspaper and magazine articles, and the Internet. Prerequisites: ARAB 3001 or ARAB 3301; or permission of the instructor.

ARAB 3311. Business Arabic. 3 Credits.

General and specific business language skills used in a variety of business operations and settings, such as making presentations, researching opportunities, conducting interviews, and negotiating. Prerequisite: ARAB 3001.

ARAB 3501. Arabic and Arab Identity. 3 Credits.

History of the Arabic language from pre-Islamic times and its subsequent spread into contiguous regions. The role of the Arabic language in formulating the ideology of Arab nationalism and identity. Course is conducted in English.

ARAB 3502. Arab Film and Culture in English. 3 Credits.

Historical and thematic survey of Arab cinema and its expression of Arab culture. Course is conducted in English.

ARAB 3503. Fundamentals of Arabic Linguistics. 3 Credits.

Introduction to the structures, functions, and varieties of Arabic from a descriptive linguistics perspective. The history of the language, including contributions of major medieval Arabic grammarians. Analysis of standard and dialectal varieties of Arabic. Course is conducted in English.

ARAB 3901. Directed Projects. 1-3 Credits.

Individual advanced reading or research, to be arranged with a member of the faculty. Permission of the instructor and department required prior to enrollment. May be repeated for credit.

ARAB 4001. Genres in Modern Arabic Literature. 3 Credits.

Historical development of modern short Arabic stories or short Arabic plays throughout the twentieth and twenty-first centuries. Prerequisites: ARAB 3301 or permission of the instructor.

ARAB 4002. Arabic Narratives Through the Ages. 3 Credits.

Reading and discussion of diachronic narratives in texts, such as those found in stories of The Thousand and One Nights, or travel adventures, such as those of Ibn Battuta and his successors. Prerequisites: ARAB 3301 or permission of the instructor.

ARAB 4501. Arabic-English Translation. 3 Credits.

Theoretical background and practical applications of translation strategies from Arabic to English that are necessary for professional translation tasks. Prerequisite: ARAB 3301 or ARAB 3302.

ARAB 4502. Arabic-English Advanced Translation and Editing. 1-3 Credits.

The professional translation and editing of various types of material. Prerequisite: ARAB 4501.

ARAB 5099. Variable Topics. 1-99 Credits.

ART HISTORY (AH)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students

- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

AH 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester; see department for more details.

AH 1031. Survey of Art and Architecture I. 3 Credits.

Selective survey of painting, sculpture, architecture, and material culture in Europe, Asia and the Mediterranean before 1300 CE; theoretical, analytical and critical approach to works of art in relation to their greater historical, cultural, political, economic, and religious contexts. Includes visits to area museums. Credit cannot be earned for this course and CAH 1031.

AH 1032. Survey of Art and Architecture II. 3 Credits.

Continuation of AH 1031. An introduction to the history of art through the study of major monuments, movements, and concepts. From the early Renaissance through the Baroque and modern eras.

AH 1070. The American Cinema. 3 Credits.

History and criticism of American films. The course enables the student to recognize and evaluate cinema techniques, to express the evaluation clearly in writing, and to understand the role of films in the context of American culture. Laboratory fee. (Same as AMST 1070).

AH 1099. Variable Topics. 1-36 Credits.

AH 1135. Spanish Art: Prado/Thyssen Museums. 3 Credits.

AH 1136. Spanish Art: From Goya to Picasso. 3 Credits.

.

AH 2001. Special Topics. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. See the department for more details.

AH 2001W. Special Topics. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. See department for more details. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

AH 2071. Introduction to the Arts in America. 3 Credits.

A survey of American art from the period of colonial exploration and settlement to the postmodern present. Political and social meanings of painting, sculpture, architecture, prints, and photographs. The relationship of art to religion and nationalism; issues of class, race, and gender. (Same as AMST 2071).

AH 2113. Survey of Early Islamic Art and Architecture from the Seventh to Fourteenth Centuries. 3 Credits.

Introductory survey of the visual arts and architecture in the Muslim lands from the seventh to the fourteenth centuries. Analysis of arts ranging from Spain in the west to Central Asia, Iran, and India in the east within their historical, religious, and cultural contexts.

AH 2114. Survey of Islamic Art and Architecture from the Fourteenth Century to the Present. 3 Credits.

Introductory survey of the visual arts and architecture in the Muslim lands from the fourteenth century to the present. Analysis of arts ranging from Spain in the west to Central Asia, Iran, and India in the east within their historical, religious, and cultural contexts.

AH 2145. History of Decorative Arts: European Heritage. 3 Credits.

Changing styles of European furniture, textiles, ceramics, and glass in the context of general trends in art history and changing patterns in economic, technological, social, and cultural history. From antiquity to the modern age.

AH 2154. American Architecture I. 3 Credits.

Stylistic properties, form and type characteristics, technological developments, and urbanistic patterns as a means of interpreting historic meaning; analysis of buildings both as artifacts and as signifiers of social, cultural, and economic tendencies. 1600 to 1860. (Same as AMST 2520, CAH 2154).

AH 2155. American Architecture II. 3 Credits.

Continuation of AH 2154. Stylistic properties, form, and type characteristics, technological developments, and urbanistic patterns as a means of interpreting historic meaning; analysis of buildings both as artifacts and as signifiers of social, cultural, and economic tendencies. 1860 to present. (Same as AMST 2521, CAH 2155).

AH 2161. History of Decorative Arts: American Heritage. 3 Credits.

The decorative arts in America from the seventeenth century to the modern period. Consideration of changing visual characteristics in relation to the changing American experience.

AH 2162. History of Photography. 3 Credits.

The historical, social, aesthetic and technological developments of the photographic medium, including its relationship to modern art and modes of visual representation and the properties that inform our understanding of photographic meaning.

AH 2162W. History of Photography. 3 Credits.

The historical, social, aesthetic and technological developments of the photographic medium, including its relationship to modern art and modes of visual representation and the properties that inform our understanding of photographic meaning. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

AH 2190. East Asian Art. 3 Credits.

Introduction to the visual and material cultures of East Asia from the prehistoric to modern periods, covering the areas of contemporary China, Japan, and Korea. (Same as CAH 2190).

AH 2191. South Asian Art. 3 Credits.

Visual and material cultures of South Asia from the prehistoric to contemporary periods, covering modern Afghanistan, Bangladesh, India, Nepal, Pakistan, and Sri Lanka. No previous knowledge of South Asian history or art history is required. (Same as CAH 2191).

AH 2192. Art of Southeast Asia. 3 Credits.

The arts of Southeast Asia, covering areas of Vietnam, Laos, Cambodia, Myanmar, Thailand, and Indonesia, especially Java and Bali. The fusion of Indian and Chinese concepts with indigenous cultural traits. (Same as CAH 2192).

AH 3099. Variable Topics. 12 Credits.**AH 3101. Ancient Art of the Bronze Age and Greece. 3 Credits.**

A survey of Greek art from the Minoans and Mycenaeans (c. 2000 B.C.) to the age of Alexander (c. 300 B.C.). Relationships among the arts of the different groups in the Aegean area and their impact on Western culture. The Thera volcanic eruption, the "Dorian Invasion," the portrayal of women, "heroic nudity," and the assumption of a stylistic chronology.

AH 3102. Ancient Art of the Roman Empire. 3 Credits.

A survey of Roman art from the successors of Alexander the Great (c. 300 B.C.) to the fall of the Roman Empire in the West (c. 300 A.D.). The impact of the Greek world on Roman art and culture; innovations and achievements of the Romans in architecture, portraiture, and historical narrative. Focus on the city of Rome and other areas of the Roman world such as North Africa and Asia.

AH 3103. Art and Archaeology of Egypt and the Near East. 3 Credits.

The great artistic tradition of the Nile Valley and the contemporary civilizations (c. 3000 B.C. to after 1000 B.C.) between the rivers Tigris and Euphrates (present day Iraq). The Pyramid Age, the temples at Karnak and Luxor, the tombs of the Valley of the Kings, and the artistic traditions of the Sumerians, Akkadians, Babylonians, Assyrians, and Persians.

AH 3104. Art and Archaeology of the Aegean Bronze Age. 3 Credits.

Excavational and multidisciplinary aspects of classical archaeology. Minoan and Mycenaean civilizations (1700-1200 B.C.). Same as ANTH 3806.

AH 3105. Topics in Ancient Art and Archaeology. 3 Credits.

May be repeated for credit provided the topic differs. Same as CLAS 3115.

AH 3106. Art and Archaeology of Israel and Neighboring Lands. 3 Credits.

The archaeology of Israel and adjacent areas (Syria, Jordan, Lebanon). Examination of many major sites and monuments. Significant problems and current debates. Same as ANTH 3805.

AH 3107. Ancient Mexican Civilizations. 3 Credits.

Cultural history of pre-Columbian societies in Middle America; the emergence of Mesoamerican civilization from the earliest hunter-gatherers and first farmers to the Aztec Empire. Prerequisite: ANTH 1003. (Same as ANTH 3814, CAH 3107).

AH 3111. Early Christian and Byzantine Art and Architecture. 3 Credits.

Art of the Mediterranean world following the collapse of Roman administration. Growth of the basilica and its decoration; the significance of small objects in medieval study. The rise and fall of the East Roman (Byzantine) Empire from Justinian to 1453.

AH 3112. Proseminar in Romanesque and Gothic Art and Architecture. 3 Credits.

The origin of Western art in the Hiberno-Saxon and Carolingian worlds, their relationship to the Ancient heritage and to the contemporary Byzantine art. Romanesque and Gothic architecture and its sculptural decoration as art historical and social phenomena. Same As: CAH 3112, CAH 6212. Credit cannot be earned for this course and AH 6212.

AH 3113. Islamic Art and Architecture. 3 Credits.

Introduction to the visual culture of the Muslim world, from Spain to India, from the seventh century to the present. Examination of artworks in their historical, religious, and cultural contexts; key points in the field's historiography. (Same as CAH 3113).

AH 3114. Art of the Book in the Medieval Muslim World. 3 Credits.

Painting and book illumination in the Islamic world, beginning with the rise of Islam in the seventh century and ending with the seventeenth century. Uses written sources and works of art and material culture to better understand the unity and diversity of the Islamic world and its complex attitude toward images. (Same as CAH 3114).

AH 3114W. Art of the Book in the Medieval Muslim World. 3 Credits.

Introduction to the history of illustrated manuscripts, painting, and book illumination in the Muslim world, from the rise of Islam in the seventh century through the seventeenth century. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

AH 3116. The Aztec Empire. 3 Credits.

Using archaeology, art, and ethnohistoric documents, this course focuses on the importance of power in Aztec society and how the normalization of violence created a form of social cohesion central to the state. Prerequisite: ANTH 1003. (Same as ANTH 3812, CAH 3116).

AH 3117. Special Topics in Precolumbian Art and Archaeology. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 3120. Italian Art and Architecture of the 13th through 15th Centuries. 3 Credits.

Origins, development, and theoretical foundations of Renaissance painting, sculpture, and architecture (Giotto, Duccio, Masaccio, Donatello, Ghiberti, Brunelleschi, Mantegna, Bellini, Botticelli).

AH 3121. Italian Art and Architecture of the Sixteenth Century. 3 Credits.

The development of the universal genius within the circle of Florence and Rome (Leonardo, Raphael, Michelangelo) and their counterparts in Venice (Giorgione, Titian, Tintoretto, Sansovino, Palladio).

AH 3122. Topics in Early Northern Renaissance Art and Architecture. 3 Credits.

Topics vary by semester. May be repeated for credit provided topic differs. Consult the Schedule of Classes for more details.

AH 3122W. Topics in Early Northern Renaissance Art and Architecture. 3 Credits.

AH 3123. Topics in Northern Renaissance Art and Architecture. 3 Credits.

Francis I and Fontainebleau Palace, Henry VIII and Hampton Court, Johann Friedrich of Saxony, and the Holy Roman Emperors Maximilian I and Charles V. François Clouet, Hans Holbein, Lucas Cranach, Albrecht Dürer, Pieter Brueghel, Bernard van Orley, and others. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 3123W. Topics in Northern Renaissance Art and Architecture. 3 Credits.

AH 3131. Italian Art and Architecture of the Seventeenth Century. 3 Credits.

The Counter-Reformation and creation of the Baroque in painting, sculpture, and architecture in Rome (Carracci, Caravaggio, Bernini, Borromini, Pietro da Cortona), Turin (Guarini, Juvarra), and Venice (Longhena).

AH 3132. Topics in Northern European Art and Architecture of the Seventeenth Century. 3 Credits.

Topics vary by semester. May be repeated for credit provided topic differs. Consult the Schedule of Classes for more details. (Same as CAH 3132).

AH 3134. Topics in Spanish and Portuguese Art through the Sixteenth Century. 3 Credits.

The Kingdoms of the Iberian Peninsula from the Reconquest of Granada to the Renaissance Age of Exploration. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 3134W. Topics in Spanish and Portuguese Art through the Sixteenth Century. 3 Credits.

The Kingdoms of the Iberian Peninsula from the Reconquest of Granada to the Renaissance Age of Exploration. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. (Same as AH 3134).

AH 3135. Topics in Seventeenth/Eighteenth Century Spanish and Portuguese Art. 3 Credits.

Secular and sacred art of the Baroque Golden Century or the Rococo Enlightenment. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 3140. European Art of the Eighteenth Century. 3 Credits.

Painting, sculpture, and architecture in France, Great Britain, and Italy. Emphasis on Watteau, Chardin, David, Hogarth, Gainsborough, Reynolds, Canaletto, and Tiepolo. Painting, sculpture, and architecture in France, Great Britain, and Italy.

AH 3141. European Art of the Early Nineteenth Century. 3 Credits.

Neoclassicism and Romanticism in the context of Western European political, social, and cultural developments. Emphasis on France, England, and Germany and the representative styles of David, Ingres, Delacroix, Turner, Constable, and Friedrich. Credit cannot be earned for this course and CAH 3141.

AH 3141W. European Art of the Early Nineteenth Century. 3 Credits.

Neoclassicism and Romanticism in the context of Western European political, social, and cultural developments. Emphasis on France, England, and Germany and the representative styles of David, Ingres, Delacroix, Turner, Constable, and Friedrich. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

AH 3142. European Art of the Late Nineteenth Century. 3 Credits.

The revolution in style of Realism, Impressionism, and Post-Impressionism in the context of Western European political, social, and cultural developments; representative styles of Courbet, Manet, Monet, Morisot, Repin, Seurat, Cezanne, Van Gogh, and Gauguin. Same As: AH 3142W, CAH 3142, CAH 3142W.

AH 3142W. European Art of the Late Nineteenth Century. 3 Credits.

The revolution in style of Realism, Impressionism, and Post-Impressionism in the context of Western European political, social, and cultural developments; representative styles of Courbet, Manet, Monet, Morisot, Repin, Seurat, Cezanne, Van Gogh, and Gauguin. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Same As: AH 3142, CAH 3142, CAH 3142W.

AH 3143. Early Twentieth-Century Art. 3 Credits.

History and theory of early twentieth-century modernism in the visual arts, from origins in the late nineteenth century through Surrealism. The work of artists such as Matisse, Picasso, Kandinsky, Duchamp, and Mondrian. Same As: AH 3143W. Credit cannot be earned for this course and CAH 3143, CAH 3143W.

AH 3143W. Early Twentieth-Century Art. 3 Credits.

History and theory of early twentieth-century modernism in the visual arts, from origins in the late nineteenth century through Surrealism. The work of artists such as Matisse, Picasso, Kandinsky, Duchamp, and Mondrian. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Same As: AH 3143. Credit cannot be earned for this course and CAH 3143, CAH 3143W.

AH 3146. Modern Architecture in Europe and America. 3 Credits.

Major developments in architecture and urbanism from the Industrial Revolution to the end of the twentieth century.

AH 3146W. Modern Architecture in Europe and America. 3 Credits.**AH 3151. American Art in the Age of Revolution. 3 Credits.**

American art during the eighteenth century "consumer revolution," the American War for Independence, and the early republic. Emphasis on the socioeconomic and political purposes of art, with focus on Enlightenment symbolism and the visualization of national identity. (Same as AMST 3151).

AH 3152. American Art in the Era of National Expansion. 3 Credits.

American art from the opening of the Erie Canal in 1825 to the Spanish-American War in 1898. Emphasis on the role of art in the expansion of the United States, exploring issues of race, class, and gender; art, and religion.

AH 3153. American Art of the Twentieth Century. 3 Credits.

Twentieth-century American painting and sculpture from the turn of the century to the beginnings of postmodernism, with focus on the avant garde. Artists of the Stieglitz circle and later modernist movements such as Abstract Expressionism, Pop, Op, Minimal, and Conceptual art. Theory and criticism.

AH 3160. Latin American Art and Architecture. 3 Credits.**AH 3165. Later Twentieth-Century Art. 3 Credits.**

Artists, art, and critical concepts from the later twentieth century, focusing on key movements and issues, including abstract expressionism, minimalism, conceptual art, feminism, identity politics, and the rise of globalization. (Same as AH 3165W).

AH 3165W. Later Twentieth-Century Art. 3 Credits.

Artists, art, and critical concepts from the later twentieth century, focusing on key movements and issues, including abstract expressionism, minimalism, conceptual art, feminism, identity politics, and the rise of globalization. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. (Same as AH 3165).

AH 3170. Materials, Methods, and Techniques in Art History. 3 Credits.

Working hands-on in a workshop studio, students create panels, canvases, vehicles, mediums, pigments, drawings, and paintings from raw materials and are introduced to the materials, methods, and techniques of the fine arts through traditional practices and processes of manufacture in western cultures.

AH 3181. Special Topics in Asian Art. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details.

AH 3182. Special Topics in South Asian Art. 3 Credits.

Introduction to the art, architecture, and visual culture of the Indian subcontinent from ancient to contemporary periods. Topics vary by semester. May be repeated for credit provided the topic differs. See department for more details.

AH 3182W. Special Topics in South Asian Art. 3 Credits.

Introduction to the art, architecture, and visual culture of the Indian subcontinent from ancient to contemporary periods. Topics vary by semester. May be repeated for credit provided the topic differs. See department for more details. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Same As: AH 3182.

AH 4109. Topics in Ancient Art and Archaeology. 3 Credits.

May be repeated for credit provided the topic differs. (Same as CLAS 3115).

AH 4119. Seminar in Medieval Art and Architecture. 3 Credits.

For majors in art history; non-majors must have permission of instructor. May be repeated for credit provided the topic differs.

AH 4129. Seminar in Renaissance Art and Architecture. 3 Credits.

For majors in art history; non-majors must have permission of instructor. May be repeated for credit provided the topic differs.

AH 4139. Seminar in Baroque Art and Architecture. 3 Credits.

For majors in art history; non-majors must have permission of instructor. May be repeated for credit provided the topic differs.

AH 4149. Seminar in Modern European Art and Architecture. 3 Credits.

For majors in art history; non-majors must have permission of instructor. May be repeated for credit provided the topic differs.

AH 4150. Seminar in Modern Art. 3 Credits.

Topics vary by semester. May be repeated for credit provided topic differs. See department for more details. Restricted to juniors and seniors.

AH 4150W. Seminar in Modern Art. 3 Credits.

Topics vary by semester. May be repeated for credit provided topic differs. See department for more details. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Restricted to juniors and seniors.

AH 4157. Seminar in Photography. 3 Credits.

Advanced undergraduate study of photography and lens-based media. Topics vary by semester. May be repeated for credit provided topic differs. Consult department for more details. Restricted to juniors and seniors.

AH 4159. Seminar in American Art and Architecture. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult department for more details. Restricted to art history majors or with permission of the instructor. Credit cannot be earned for this course and AH 4159W.

AH 4159W. Seminar in American Art and Architecture. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. See department for details. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Restricted to students in the art history program or with the permission of the instructor. Credit cannot be earned for this course and AH 4159.

AH 4165. Topics in Islamic Art and Architecture. 3 Credits.

Topics vary by semester. May be repeated for credit provided topic differs. Consult the Schedule of Classes for more details.

AH 4169. Seminar in Contemporary Art. 3 Credits.

Topics vary by semester. See the Schedule of Classes for more details. May be repeated for credit if topic differs. Restricted to juniors and seniors.

AH 4181. Topics in Asian Art. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. See department for more details. Restricted to art history majors or with the permission of the instructor. Same As: CAH 4181.

AH 4182. Topics in South Asian Art. 3 Credits.

Topics vary by semester. May be repeated for credit provided topic differs. See department for more details. Restricted to art history majors or with permission of the instructor. Credit cannot be earned for this course and CAH 4182.

AH 4189. Seminar: Topics in Art History. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. See department for more details. Restricted to art history majors or with permission of the instructor.

AH 4197. Senior Thesis. 1-4 Credits.

Students should consult the Director of Undergraduate Studies by the end of their junior year regarding eligibility, selection of an area of research, and the appropriate faculty members to supervise the project. May be repeated for credit. Same As: CAH 4197.

AH 4198. Independent Study. 1-3 Credits.

Directed research and study in a specific area of art history to be approved by a faculty member. May be repeated for credit.

AH 4199. Internship in Art History. 1-3 Credits.

Students gain practical experience working in an arts institution such as a museum or gallery. Advisor approval required prior to registration. May not be repeated for credit toward the degree. Restricted to art history majors.

AH 5099. Variable Topics. 1-99 Credits.

AH 6201. Proseminar in Ancient Art of the Bronze Age and Greece. 3 Credits.

Greek art from the Minoans and Mycenaeans (c. 2000 B.C.) to the age of Alexander (c. 300 B.C.). Relationships among the arts of the different groups in the Aegean area and their impact on Western culture. The Thera volcanic eruption, the "Dorian Invasion," the portrayal of women, "heroic nudity," and the assumption of a stylistic chronology.

AH 6202. Proseminar in Ancient Art of the Roman Empire. 3 Credits.

Roman art from the successors of Alexander the Great (c. 300 B.C.) to the fall of the Roman Empire in the West (c. 300 A.D.). The impact of the Greek world on Roman art and culture; innovations and achievements of the Romans in architecture, portraiture, and historical narrative. Focus on the city of Rome and other areas of the Roman world such as North Africa and Asia.

AH 6205. Topics in Ancient Art. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details.

AH 6211. Proseminar in Early Christian and Byzantine Art and Architecture. 3 Credits.

Art of the Mediterranean world following the collapse of Roman administration. Growth of the basilica and its decoration; the significance of small objects in medieval study. The rise and fall of the East Roman (Byzantine) Empire from Justinian to 1453. Credit cannot be earned for this course and CAH 6211.

AH 6212. Proseminar in Romanesque and Gothic Art and Architecture. 3 Credits.

The origin of Western art from the Hiberno-Saxon and Carolingian worlds and their relationship to the Ancient heritage. Romanesque and Gothic architecture and its sculptural decoration as social phenomena.

AH 6213. Islamic Art and Architecture. 3 Credits.

Introduction to the visual culture of the Muslim world, from Spain to India, from the seventh century to the present. Examination of artworks in their historical, religious, and cultural contexts; key points in the field's historiography. (Same as AH 3113).

AH 6214. The Art of the Book in the Medieval Muslim World. 3 Credits.

An advanced-level introduction to the visual culture of the Muslim world, from Spain to India, from the seventh century to the seventeenth century. Examination of artworks in their historical, religious, and cultural contexts; key points in the field's historiography. (Same as AH 3114).

AH 6215. Seminar in Medieval Art and Architecture. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 6220. Proseminar in Italian Art and Architecture of the 13th through 15th Centuries. 3 Credits.

Origins, development, and theoretical foundations of Renaissance painting, sculpture, and architecture (Giotto, Duccio, Masaccio, Donatello, Ghiberti, Brunelleschi, Mantegna, Bellini, Botticelli).

AH 6221. Proseminar: Italian Art and Architecture of the 16th Century. 3 Credits.

The development of the universal genius within the circle of Florence and Rome (Leonardo, Raphael, Michelangelo) and their counterparts in Venice (Giorgione, Titian, Tintoretto, Sansovino, Palladio).

AH 6222. Proseminar in Early Northern Renaissance Art and Architecture. 3 Credits.

Royal and ducal patronage and the Flemish and French masters of the fifteenth century, including van Eyck, Campin, van der Weyden, Fouquet, van der Goes, Memling, and Gerard David. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 6223. Proseminar in Northern Renaissance Art and Architecture. 3 Credits.

Francis I and Fontainebleau Palace, Henry VIII and Hampton Court, Johann Friedrich of Saxony, and the Holy Roman Emperors Maximilian I and Charles V. François Clouet, Hans Holbein, Lucas Cranach, Albrecht Dürer, Pieter Brueghel, Bernard van Orley, and others.

AH 6225. Seminar in Renaissance Art. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 6231. Proseminar in Italian Art and Architecture of the Seventeenth Century. 3 Credits.

The Counter-Reformation and creation of the Baroque in painting, sculpture, and architecture in Rome (Carracci, Caravaggio, Bernini, Borromini, Pietro da Cortona), Turin (Guarini, Juvarra), and Venice (Longhena).

AH 6232. Proseminar in Northern European Art and Architecture of the Seventeenth Century. 3 Credits.

Hapsburg Flanders and Brussels under the Spanish archdukes and their patronage of Rubens and his circle. The role of Dutch merchants commissioning diverse secular themes in Utrecht, Haarlem, Delft, Leyden, and Amsterdam from "Golden Age" artists such as Rembrandt, Vermeer, and Hals. Specific topic announced in the Schedule of Classes.

AH 6234. Proseminar in Spanish and Portuguese Art through the Sixteenth Century. 3 Credits.

The Kingdoms of the Iberian Peninsula from the Reconquest of Granada to the Renaissance Age of Exploration. Specific topic announced in the Schedule of Classes.

AH 6235. Seminar in Baroque Art. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 6240. Proseminar in European Art of the Eighteenth Century. 3 Credits.

Painting, sculpture, and architecture in France, Great Britain, and Italy. Emphasis on Watteau, Chardin, David, Hogarth, Gainsborough, Reynolds, Canaletto, and Tiepolo.

AH 6245. Seminar in European Art of the Nineteenth Century. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 6246. Proseminar in Modern Architecture in Europe and America. 3 Credits.

Major developments in architecture and urbanism from the Industrial Revolution to the end of the twentieth century.

AH 6250. Seminar: Modern Art. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 6251. Proseminar in American Art in the Age of Revolution. 3 Credits.

American art during the eighteenth-century "consumer revolution," the American War for Independence, and the early republic. Emphasis on the socioeconomic and political purposes of art, with focus on Enlightenment symbolism and the visualization of national identity.

AH 6252. Proseminar in American Art in the Era of National Expansion. 3 Credits.

American art from the opening of the Erie Canal in 1825 to the Spanish-American War in 1898. Emphasis on the role of art in the expansion of the United States, exploring issues of race, class, and gender; art and religion.

AH 6254. Seminar in American Art before 1900. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 6255. Seminar: Studies in American Art and History. 3 Credits.

Selected problems and themes in American cultural history involving the use of artistic materials in different media; emphasis on methodology and analytic techniques. May be repeated for credit. Same as AMST 6730.

AH 6256. Seminar in American Art of the Twentieth Century. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 6257. Seminar in Photography. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 6258. Art Historiography. 3 Credits.

The development of art history as a discipline from the eighteenth century to the present. An investigation of different art historical methodologies, including formal analysis, iconological, feminist, Marxist, semiotic and deconstructivist approaches.

AH 6260. Seminar in African Art. 3 Credits.

Topics vary by semester. See the Schedule of Classes for more details. May be repeated for credit provided the topic differs.

AH 6261. Seminar in Asian Art. 3 Credits.

Topics vary by semester. See the Schedule of Classes for more details. May be repeated for credit provided the topic differs.

AH 6262. Seminar in South Asian Art. 3 Credits.

Topics in the visual cultures of South Asia from a range of time periods; artworks in their historical, religious, and cultural contexts; key points in the field's historiography. May be repeated for credit provided the topic differs. See department for more details.

AH 6265. Seminar in Islamic Art and Architecture. 3 Credits.

Topic announced in Schedule of Classes. May be repeated for credit provided the topic differs.

AH 6269. Seminar in Contemporary Art. 3 Credits.

Topics vary by semester. See the Schedule of Classes for more details. May be repeated for credit provided the topic differs.

AH 6270. Special Topics in Art History. 3 Credits.

Topics vary by semester. May be repeated provided the topic differs. Consult the Schedule of Classes for more information.

AH 6286. Preventive Conservation Concepts. 3 Credits.

Historical development of preventive conservation in museums, conservation ethics, team approaches to conservation, interactions of various materials with agents of deterioration. Basics of materials testing, preparation of condition reports, choosing museum storage and exhibition materials, and risk assessment. Same as ANTH 6203/ MSTD 6203.

AH 6287. Preventive Conservation Techniques. 3 Credits.

Practical applications of preventive conservation of materials, monitoring environmental conditions, conducting risk assessments, evaluation of exhibit and storage areas; developing plans, policies, and procedures for collections care; grant proposal preparation for collections care initiatives. Same as ANTH 6204/ MSTD 6204.

AH 6298. Independent Research in Art History. 3 Credits.

AH 6299. Museum Internship. 3-12 Credits.

ART THERAPY (ARTH)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ARTH 5099. Variable Topics. 1-99 Credits.

ARTH 6201. Survey of Art Therapy. 3 Credits.

The use of the visual arts to enhance personal development and growth; illustrated lectures, readings, discussion, and studio work presented by experts in the field. Instruction is delivered online via Blackboard. No previous art experience is necessary.

ARTH 6205. History and Theory of Art Therapy. 2 Credits.

Art therapy history and theory, milestones and practitioners. The development of art therapy as a distinct therapeutic practice. Overview of psychotherapy theories relevant to art therapy. Open only to art therapy students.

ARTH 6206. Human Development and Art Therapy. 3 Credits.

Psychological and artistic development across the life span; theories of personality development; cultural and environmental influences; and human behavior, including developmental crises, disability, exceptional behavior, and addictive behavior. Restricted to students in the art therapy program.

ARTH 6207. Human Development and Art Therapy I: Child and Adolescent. 2 Credits.

Practical and developmental considerations when working with adults and senior adults in art therapy; psychological, cultural, environmental, and artistic influences and expectations; life span impacts of human behavior, developmental crises, disability, and exceptional behavior. Restricted to students in the art therapy program.

ARTH 6208. Human Development and Art Therapy II: Adults and Senior Adults. 2 Credits.

Practical and developmental considerations when working with adults and senior adults in art therapy; psychological, cultural, environmental, and artistic influences and expectations; life span impacts of human behavior, developmental crises, disability, and exceptional behavior. Restricted to students in the art therapy program. Prerequisite: ARTH 6207.

ARTH 6210. Counseling/Art Therapy Process. 3 Credits.

Theoretical and clinical dimensions of counseling and art therapy explored through study of current research concerning the diverse elements affecting the therapeutic process. The goals of each phase of treatment; development of the therapeutic alliance; assessment of client readiness; therapeutic techniques and interventions as practiced in short- and long-term treatment.

ARTH 6211. Process of Counseling and Art Therapy: Theory. 3 Credits.

Major theories in counseling and art psychotherapy through the lens of the creative process and other aspects of clinical practice; the influence of multicultural issues, contemporary and evidence-based practices, and various settings on art-making and the therapeutic encounter. Restricted to students in the art therapy program. Prerequisite: ARTH 6210.

ARTH 6212. Creativity, Symbolism, and Metaphor. 2 Credits.

Theories of creative development, aesthetics, and art interpretive strategies for engaging metaphor, symbolism, and personal association to client artwork; integrating personal, familial, cultural, and social meanings for insight and revelation. Restricted to students in the art therapy program.

ARTH 6221. Studio/Technique of Art Therapy. 3 Credits.

Direct experience of the therapeutic utility and psychological influence of art processes and materials. Identifying the effect of art-making leading to assessment and intervention strategies. Open only to art therapy students.

ARTH 6231. Child Art Therapy. 2 Credits.

Practical, theoretical, and ethical considerations involved in treating children in clinical, community, and educational settings; application of art therapy and counseling principles and practices for diverse child populations; development of interventions for varied DSM diagnoses. Restricted to graduate students in the art therapy program.

ARTH 6232. Art Therapy with Adolescents. 2 Credits.

Practical, theoretical, and ethical considerations in treating adolescents in clinical, community and educational settings. Assessment and treatment issues in art therapy. Application of art therapy and counseling principles and practices for diverse adolescent populations. Development of interventions for varied DSM diagnoses. Restricted to art therapy students. Restricted to students in the art therapy program.

ARTH 6233. Marital and Family Art Therapy/Counseling. 3 Credits.

Principles of working with families and couples, including an overview of systems theories and stages of family life cycle development; art techniques for evaluating of family dynamics; intervention strategies and cultural and ethical considerations. Restricted to art therapy students. Restricted to students in the art therapy program.

ARTH 6234. Group Process. 3 Credits.

Theoretical and experiential understanding of group art therapy and counseling methods and skills. Principles of group dynamics, therapeutic factors, member roles and behaviors, leadership styles and approaches, selection criteria, and short- and long-term group process.

ARTH 6235. Social and Cultural Diversity. 3 Credits.

Exploration of the therapist's heritage, expectations, worldview and values; racial/cultural identity development; skills for multicultural counseling. Stereotypes and biases that interfere with effective treatment of culturally different clients. The role of the art therapist or counselor in conflict resolution, advocacy, and social justice. May be repeated for credit if taken through the study abroad course option. Restricted to art therapy students.

ARTH 6241. Assessment Procedures. 3 Credits.

Instruments and procedures used in assessment of psychological health and psychopathology; diagnostic and developmental criteria as manifested in artwork and art-making; statistical concepts, including reliability and validity; selection and administration of assessment tools; treatment planning; report writing. Restricted to students in the art therapy program.

ARTH 6242. Psychopathology: Art and Diagnosis. 3 Credits.

Criteria of psychiatric diagnoses, such as the Diagnostic and Statistical Manual multiaxial system, theories of psychopathology, and relevant literature evaluation of potential indicators of functional and organic disorders in behavior and artwork of clients; ethical issues; cultural and environmental influences on diagnostic categorization; basic introduction to psychopharmacology. Restricted to students in the art therapy program or with permission of the instructor.

ARTH 6243. Substance Abuse and Addictions. 3 Credits.

Overview of substance abuse and addictions for art therapy and counseling, including theory and treatment applications; screening and assessment tools; treatment models specific to the field of addictions; art therapy techniques in the treatment of substance abuse for adolescents and adults in a variety of treatment settings. Restricted to students in the art therapy program.

ARTH 6251. Research Methods. 3 Credits.

Planning, conducting, and evaluating relevant methodologies, including qualitative and quantitative approaches and basic statistics; the importance of research in the psychotherapy professions; ethical and legal considerations; and the use of research to assess effectiveness of mental health and art therapy services. Restricted to graduate students in the art therapy program.

ARTH 6261. Ethics and Professionalism. 3 Credits.

Professional identity and the role of the therapist; the ethical practice of counseling and art therapy, including familiarity with ethical standards of various professional organizations; credentialing and licensure; public policy and advocacy for patients and for the profession. Restricted to graduate students in the art therapy program.

ARTH 6262. Career Counseling and Art Therapy. 3 Credits.

Theoretical foundation and practical experience necessary to understand and support career development needs for diverse individual clients and groups; career development over the lifespan; assessments, tools, and resources; occupational and labor market trends and resources; specific art therapy techniques applicable to career counseling in educational and work settings. Restricted to students in the art therapy program.

ARTH 6263. Ethics and Professionalism I: Principles. 1 Credit.

The ethical standards of art therapy, counseling and related mental health professions. Restricted to students in the art therapy program.

ARTH 6264. Ethics and Professionalism II: Applications. 2 Credits.

Applying ethical principles and values for professional identity and the role of the therapist; credentialing and licensure; public policy and advocacy for patients and for the profession. Restricted to students in the art therapy program. Prerequisite: ARTH 6263.

ARTH 6265. Advanced Issues in Psychotherapy and Art Therapy. 1-3 Credits.

Overview and application of one or more treatment models or theories to various mental and emotional disorders. Connections between the practice of art therapy and the techniques of other disciplines.

ARTH 6271. Art Psychotherapy and Trauma I: Theory and Approaches to Treatment. 3 Credits.

Introduction and overview of theory, practice, and treatment related to complex, trauma-related problems; psychobiology of traumatic stress, impact of traumatic stress on individuals, and specific treatment modalities in clinical setting; somatic (body-based) and nonverbal (art and image-based) treatment modalities. Supervised treatment or observation of treatment of clients with trauma histories. Restricted to art therapy students. Restricted to students in the art therapy program.

ARTH 6272. Art Psychotherapy and Trauma II: Loss, Countertransference, and Resiliency. 3 Credits.

Multi-modal treatment of acute, serial, or complex trauma; theoretical, practical, moral, cross cultural, and personal aspects as seen through an art therapy and counseling lens. Supervised treatment or observation of treatment of clients with trauma histories. Restricted to students in the art therapy program. Prerequisite: ARTH 6271.

ARTH 6281. Practicum in Art Therapy. 1-2 Credits.

Supervised clinical experience with clients or patients in psychiatric, rehabilitation, and education settings with children, adolescents, and adults. On-site individual supervision by clinical instructors; on-campus group supervision by faculty. A total of six semesters of practicum are required while completing 900 internship hours, 400 of which must be direct client contact. Restricted to graduate students in the art therapy program.

ARTH 6292. Special Projects in Art Therapy. 1-12 Credits.

Individual work based on research. Empirical, clinical, and library research may be undertaken, as well as the development of new procedures. Details to be worked out with each student. May be repeated for credit with advisor's approval. Open only to art therapy students.

ARTH 6998. Thesis Research. 3 Credits.**ARTH 6999. Thesis Research. 3 Credits.**

ASTRONOMY (ASTR)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ASTR 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester; see department for more details.

ASTR 1001. Stars, Planets, and Life in the Universe. 4 Credits.

Primarily for non-science majors. An introduction to how our Universe is structured, including the basic principles underlying astronomical systems and observations. Topics include the known laws of nature, stars, and planetary systems and the conditions for extraterrestrial life and exploration. Prerequisite: high school algebra. Laboratory fee.

ASTR 1002. Origins of the Cosmos. 4 Credits.

Primarily for non-science majors. A description of the Universe, its origins and its evolution, based on known physical principles. Topics include galactic and stellar structure, black holes, origin of the elements, and big bang cosmology. Prerequisite: high school algebra. Laboratory fee.

ASTR 1099. Variable Topics. 1-36 Credits.**ASTR 2121. Introduction to Modern Astrophysics. 3 Credits.**

Introduction to the concepts and methods of modern astrophysics. Physical processes behind the origin, structure and evolution of stars and galaxies, based on physical principles and modern astronomical observations. Topics include the energy source of the Sun, the stellar life cycle, galaxies, and the structure and fate of the Universe. Prerequisites: PHYS 1012 or PHYS 1022.

ASTR 2131. Astrophysics Seminar. 3 Credits.

Course led each week by a different expert in the research on various astrophysical sources and phenomena. Topics may include the life and death of stars; most violent explosions in the universe; evolution of galaxies; and evolution of the universe on the largest scales. Prerequisite: PHYS 1012 or PHYS 1022.

ASTR 3141. Data Analysis in Astrophysics. 3 Credits.

Principles of data analysis in astrophysics and basic analysis of astronomical data from NASA satellites and ground-based telescopes. Prerequisites: PHYS 1012 or PHYS 1022. Recommended background: Prior study in physics or astrophysics.

ASTR 3161. Space Astrophysics. 3 Credits.

Physical processes of celestial phenomena as determined from space-based instrumentation. While the entire electromagnetic spectrum is covered, the high-energy (X-ray and gamma ray) region is emphasized. Results from ground-based instrumentation (e.g., radio and optical) may be introduced. Prerequisites: PHYS 2023.

ASTR 3183. General Relativity. 3 Credits.

Einstein's general theory of relativity; special theory of relativity, the nature of space and time, the equivalence principle, Riemannian geometry, Einstein's proposal, tests of the theory, Schwarzschild and Kerr solutions, Hawking radiation, and cosmological models. Prerequisites: MATH 3342 and PHYS 2023.

ASTR 4195. Undergraduate Research in Astrophysics. 3 Credits.

Research on problems in astrophysics approved by the faculty. May be repeated once for credit.

BIOCHEMISTRY (BIOC)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses

- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

BIOC 1099. Variable Topics. 1-36 Credits.**BIOC 3099. Variable Topics. 1-12 Credits.****BIOC 3261. Introductory Medical Biochemistry. 4 Credits.**

Introduction to structures of biological macromolecules, enzyme catalysis, cellular bioenergetics, and metabolism. (Same as BISC 3261, CHEM 3165).

BIOC 3262. Biochemistry Laboratory. 2 Credits.

Study of common experimental techniques used in life science laboratories to separate and characterize biological macromolecules. Same as BISC 3262 and CHEM 3262. Laboratory fee. Prerequisites: BIOC 3261 or BISC 3261.

BIOC 3263. Special Topics in Biochemistry. 2 Credits.

In-depth discussion of current biochemically relevant topics, including cancer and HIV chemotherapy, immune response, photosynthesis, signal transduction, hormone regulation and nutrition. Prerequisites: BIOC 3261 or BISC 3261. (Same as BISC 3263).

BIOC 3263W. Special Topics in Biochemistry. 2 Credits.

Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

BIOC 3560. Diet, Health, and Longevity. 3 Credits.

Biochemical and molecular explanations of how calorie intake affects health; scientific principles of dieting. Prerequisites: BISC 1005 or BIOC 3261.

BIOC 3564. Lipid Biotechnology. 2 Credits.

Same as BISC 3564 and CHEM 3564. Laboratory fee. Prerequisites: BIOC 3261 or BISC 3261.

BIOC 3820. Bioinformatics and Computational Biochemistry. 2 Credits.

How biomedical researchers integrate information from molecular biology resources for analysis and testing of hypotheses. Prerequisites: BISC 1111 and STAT 1127.

BIOC 3821. Projects in Biomedical Informatics. 1-2 Credits.

.

BIOC 4195. Undergraduate Research. 1 Credit.

Research conducted under a mentor who is a member of the department. May be repeated for credit (only 1 credit may count toward the minor). Permission of the instructor required prior to enrollment.

BIOC 4701. Science and Medicine. 4 Credits.

A broad overview of several biomedical discoveries made in the twentieth century and the often profound influence they have had on medical technology and on new directions in science and medicine, science administration, politics, ethics, and philosophy.

BIOC 5099. Variable Topics. 1-99 Credits.**BIOC 6201. Medical Biochemistry. 7 Credits.**

Required for medical students. Lecture and laboratory; emphasis on basic principles and their relation to medicine.

BIOC 6209. Research Elective in Medical Biochemistry. 1-12 Credits.**BIOC 6211. Biochemistry-Health Science Students. 3,4 Credits.**

Basic concepts of biochemistry and their relation to health sciences.

BIOC 6221. Proteins, Pathways, and Human Health. 4 Credits.

A comprehensive course in general biochemistry for graduate students in biomedical sciences. Prerequisites: CHEM 2152 and CHEM 2154.

BIOC 6222. Biochemical Genetics and Medicine. 3 Credits.

Continuation of BIOC 6221. A comprehensive course in general biochemistry for graduate students in biomedical sciences. Prerequisites: CHEM 2152 and CHEM 2154.

BIOC 6223. Bioinformatics. 2 Credits.

The application of bioinformatics concepts and methods through the use of molecular biology databases and tools, covering molecular evolution, and protein sequence, structural, functional analysis. Recommended background: Prior completion of an undergraduate course in biochemistry.

BIOC 6224. Molecular Biology and Protein Methods. 3 Credits.

Common laboratory techniques used in life science laboratories to separate and characterize proteins, including chromatography, gel electrophoresis, immunoassays, spectroscopy, and centrifugation. Corequisite: BIOC 6221. Laboratory fee.

BIOC 6227. Biochemistry Seminar. 1 Credit.

Current literature in biochemistry. May be repeated for credit. Restricted to graduate students in the biochemistry and molecular medicine program.

BIOC 6230. New Technologies in Scientific Research. 2 Credits.

New technologies for conducting meaningful scientific inquiry and research. How such technologies have evolved and become essential to investigative research. Prerequisites: BIOC 6221. Corequisites: BIOC 6222.

BIOC 6234. Biochemical and Bioinformatic Approaches to Protein Structure and Function. 3 Credits.

Molecular biological, biophysical, chemical, and bioinformatic approaches to understanding protein structure and function. Protein folding, interactions, and ligand binding.

BIOC 6235. Seminar in Genomics, Proteomics, and Bioinformatics. 1 Credit.**BIOC 6236. Medical Genomics. 2 Credits.**

The structure and function of genes and genomes; genomic theories, methods, and data analysis including bioinformatics and database mining. BIOC 6221 and BIOC 6222 may be taken as corequisites. Prerequisites: BIOC 6221 and BIOC 6222.

BIOC 6237. Proteomics and Biomarkers. 2 Credits.

Experimental proteomics, protein/proteome analysis, bioinformatics of proteomics, systems biology and structural genomics. Prerequisite: BIOC 6236.

BIOC 6238. Experimental Genomics Lab. 3 Credits.

Research applications of knowledge in genomics and proteomics. Prerequisite: BIOC 6236. Laboratory fee.

BIOC 6240. Next Generation Sequencing. 2 Credits.**BIOC 6242. Bioscience Big Data Statistics. 2 Credits.**

Modern bioscience big data from generation to analysis and interpretation; data structures and data types and objects; and challenges in big data storage, access, and computation.

BIOC 6250. Molecular Biology. 3 Credits.

Content includes the organization and replication of genetic material, transcriptional and translational machinery, regulation of eukaryotic gene expression, and other special topics. BIOC 6221 and BIOC 6222 may be taken as corequisites. Prerequisites: BIOC 6221 and BIOC 6222.

BIOC 6252. Current Laboratory Methods in Molecular Biology. 3 Credits.

Corequisite: BIOC 6221. Laboratory fee.

BIOC 6254. Fundamentals of Molecular Biology. 3 Credits.

An intermediate-level molecular biology survey course. Prerequisite: BIOC 6221.

BIOC 6260. Analytic Methods for Lipids and Carbohydrates. 3 Credits.

Basic techniques in the biotechnology of lipids and carbohydrates. Prerequisite: BIOC 6221.

BIOC 6262. Genes, Diets, and Aging. 3 Credits.**BIOC 6264. Membrane-Associated Complex Lipids. 1 Credit.****BIOC 6281. Topics. 1,2 Credit.**

Directed readings in biochemistry, molecular biology, and genetics. May be repeated for credit. Restricted to graduate students in the biochemistry and molecular medicine program.

BIOC 6290. Extramural Biochemistry Elective. 1-12 Credits.**BIOC 6291. Extramural Biochemistry Elective. 1-12 Credits.****BIOC 6295. Research. 1-12 Credits.**

Participation in a project under investigation or in a field suggested by the student and approved by the staff. May be repeated for credit. Laboratory fee.

BIOC 6298. Advanced Reading. 1-6 Credits.

Advanced reading in biochemistry. Restricted to students in the MS in molecular biochemistry and bioinformatics program.

BIOC 6998. Thesis Research. 3 Credits.**BIOC 6999. Thesis Research. 3 Credits.****BIOC 8225. Metabolism. 4 Credits.**

Metabolic pathways and integration of metabolic processes. Limited to PhD students in the Institute for Biomedical Sciences.

BIOC 8231. Biochemical Basis of Human Diseases. 3 Credits.

Biochemical perspectives on disorders involving metabolic alterations, immunological dysregulation, problems of environmental/toxicological etiology, genetic/epigenetic dysfunction, neglected tropical diseases. Prerequisites: BMSC 8210 and BMSC 8212.

BIOC 8232. Molecular and Cellular Signaling. 3 Credits.**BIOC 8501. Issues in Clinical Nutrition. 3 Credits.****BIOC 8502. Molecular Biology of Oncogenes. 1-12 Credits.****BIOC 8503. Readings in Immunology. 3 Credits.****BIOC 8800. Summer Remedial Biochemistry. 8 Credits.**

BIOLOGICAL SCIENCES (BISC)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

BISC 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester; see department for more details.

BISC 1001. Departmental Seminar. 0 Credits.**BISC 1005. The Biology of Nutrition and Health. 3 Credits.**

A study of the human body and food-related health issues through the examination of the nutritional needs of the human body, digestion, genetics, and life experiences/exposures. Laboratory fee. Credit cannot be earned for both BISC 1005 and BISC 1007. Credit cannot be earned for this course and BISC 1007.

BISC 1006. The Ecology and Evolution of Organisms. 3 Credits.

Introduction to ecology and evolution, including human being's impact on other plants and animals, and an overview of Earth's biodiversity. For non-majors. Credit may not be earned for both BISC 1006 and BISC 1008. Credit cannot be earned for this course and BISC 1008.

BISC 1007. Food, Nutrition, and Service. 3 Credits.

A study of biology and nutrition that uses service learning to reinforce course concepts. Topics include the need for humans to consume other organisms, processing of consumed nutrients, unexpected effects of nutritional consumption, and measures to improve nutrition. Credit cannot be earned for both BISC 1007 and BISC 1005. Credit cannot be earned for this course and BISC 1005.

BISC 1008. Understanding Organisms through Service Learning. 3 Credits.

The evolution of life on earth; the value of other organisms, their role in our world, and how humans can cause harm to this infrastructure. Students work with a community partner to perform activities that assist the partner while reinforcing course concepts. Credit may not be earned for both BISC 1008 and BISC 1006. Credit cannot be earned for this course and BISC 1006.

BISC 1099. Variable Topics. 1-36 Credits.**BISC 1111. Introductory Biology: Cells and Molecules. 4 Credits.**

Nutrition and metabolism, cellular and developmental biology, genetics, and molecular biology of plants and animals. BISC 1111 is equivalent to the combination of BISC 1115 and its lab component BISC 1125. Same As: BISC 1115. Credit cannot be earned for this course and BISC 1125.

BISC 1112. Introductory Biology: The Biology of Organisms. 4 Credits.

Concepts and methods in the study of whole organisms. Evolutionary theory; population biology; diversity of plants, animals, fungi, and microorganisms; ecology and behavior; and animal structure and function. Restricted to students in the Women's Leadership Program if registering for BISC 1112W. Same As: BISC 1112W.

BISC 1112W. Introductory Biology: The Biology of Organisms. 4 Credits.

Concepts and methods in the study of whole organisms. Evolutionary theory; population biology; diversity of plants, animals, fungi, and microorganisms; ecology and behavior; and animal structure and function. BISC 1112 is equivalent to the combination of BISC 1116 and its lab component BISC 1126. Restricted to students in the Women's Leadership Program if registering for BISC 1112W. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Same As: BISC 1112.

BISC 1115. Introductory Biology: Cells and Molecules. 3 Credits.

Structures and functional interactions of biomolecules and cells in microorganisms, animals, and plants. BISC 1115 and its lab component, BISC 1125, together are equivalent to BISC 1111.

BISC 1116. Introductory Biology: The Biology of Organisms. 3 Credits.

Concepts and methods in the study of whole organisms; evolutionary theory; population biology; diversity of plants, animals, fungi, and microorganisms; ecology and behavior; and animal structure and function. BISC 1116 and its lab component, BISC 1126, together are equivalent to BISC 1112.

BISC 1120. Laboratory Introduction to Biomolecular Research. 2 Credits.

Research methods in the study of proteins and DNA; focus on preparation for working with faculty members on their research. Permission of the instructor required prior to enrollment. Prerequisites: BISC 1111. Credit cannot be earned for this course and BISC 1115, BISC 1125, HONR 1120.

BISC 1125. Introduction to Cells and Molecules Laboratory. 1 Credit.

Laboratory associated with BISC 1115. Experimental methods in the study of cells and molecules, proteins, enzymes, DNA, and molecular genetics. BISC 1115 and BISC 1125 together are equivalent to BISC 1111. Prerequisite: BISC 1115.

BISC 1126. Introduction to Organisms Laboratory. 1 Credit.

Laboratory associated with BISC 1116. Experimental methods in the study of whole organisms; population biology; diversity of plants, animals, fungi, and microorganisms; ecology and behavior; and animal structure and function. BISC 1116 and BISC 1126 together are equivalent to BISC 1112. Prerequisite: BISC 1116.

BISC 2000. The Wonder of Life: Biodiversity studies in a changing planet. 3 Credits.

Topics in biological diversity from the perspective of species and within the conceptual framework of evolutionary biology; the explanatory power, simplicity, and grandeur of evolution and its products; how questions and hypotheses are empirically addressed. Topic subject to change. Prerequisites: BISC 1111 and BISC 1112.

BISC 2010. Global Change Biology. 3 Credits.

The impacts and implications of global climate change on biological systems; affected biological processes and their basic underlying physical and chemical principles. Focus on organismal physiological adaptations in aquatic and terrestrial ecosystems and ecological consequences. Prerequisites: BISC 1111 and BISC 1112.

BISC 2194. The Hidden Life of the Chesapeake Bay. 3 Credits.

The rise and fall of populations in the bay. Physiological adaptations of organisms; ecological interactions and trophic relationships; physiogeography and anthropogeography of the bay; and environmental concerns and human impacts. Credit cannot be earned for this course and GEOG 3194.

BISC 2202. Cell Biology. 3 Credits.

Structure and function of biological molecules and cellular organelles; cellular interactions. Prerequisites: BISC 1111, BISC 1112, and CHEM 2151.

BISC 2207. Genetics. 3 Credits.

Introduction to genetics, with emphasis on the integration of transmission of genetic traits and the molecular basis of gene action. Also includes cytogenetics, gene regulation, and examples of current applications of genetic technology. Prerequisites: BISC 1111 and BISC 1112.

BISC 2208. Genetics Laboratory. 1 Credit.

Study of genetic principles and genetic and molecular techniques in *Drosophila* and *E. coli*. Benchwork and comparative genomics using bioinformatics. Prerequisites: BISC 1111, BISC 1112, and BISC 2207. Corequisites: BISC 2207 may be taken concurrently.

BISC 2213. Biology of Cancer. 3 Credits.

Cancer is a complex category of diseases caused in large part by genetic or genomic, transcriptomic, and epigenomics alterations leading to abnormal cell proliferation. This course will provide a basic overview of cancer biology including cellular and molecular basis of cancer, cancer development and progression as well as a brief overview of cancer diagnostics and therapy. Prerequisites: BISC 2202 or BISC 2207.

BISC 2214. Developmental Biology. 3 Credits.

The molecular processes and cellular phenomena that result in the formation of organized tissues and functional organisms; formation of early body plan, cell type determination, organogenesis, morphogenesis, stem cells, cloning, and issues in human development. Prerequisites: BISC; BISC 1112; and BISC 2202 or BISC 2207 or BISC 2213.

BISC 2215. Genome Editing Laboratory. 1 Credit.

Practical training in genome editing in, from sequence design to molecular biology, generation of edited animals, and phenotypic analysis. Students undertake individual research projects involving CRISPR. In addition to the stated prerequisites, prior or concurrent enrollment in BISC 2214 required. Laboratory fee. Prerequisites: BISC 1111; BISC 1112.

BISC 2216. Scanning Electron Microscopy Laboratory. 1 Credit.

Practical training in scanning electron microscopy (SEM), from specimen preparation and mounting to SEM imaging and interpretation and presentation of data. Each student is assigned an independent research project and after receiving SEM training. Prerequisites: BISC 1111 and BISC 1112.

BISC 2220. Developmental Neurobiology. 3 Credits.

The molecular mechanisms that guide neural development: events surrounding the birth of neurons, how specific neurons are determined, how neurons find the correct targets, how cell death guides proper neural development, and how synapses are formed and maintained. Prerequisites: BISC 1115 and 1125; and BISC 1116 and BISC 1126.

BISC 2305. Plant Biology. 3 Credits.

Plant metabolism and molecular biology: photosynthesis, nitrogen metabolism, membrane transport, mechanisms of hormone action, protein targeting, biotechnology, and current research topics. Prerequisites: BISC 1111; and BISC 1112; CHEM 1111 and CHEM 1112; or permission of the instructor.

BISC 2320. Neural Circuits and Behavior. 3 Credits.

The cellular and molecular properties of neural circuits that form the basis of behavior. Circuit properties and behaviors across a variety of invertebrate and vertebrate taxa. Individual neuronal units, the organizational principles and emergent properties of neural circuits, and how these neuronal ensembles influence behavior. Instructor's permission may be substituted for prerequisites. Prerequisites: BISC 1111; and BISC 1112.

BISC 2322. Human Physiology. 3 Credits.

Introduction to the function of organ systems of the human body. Prerequisites: CHEM 1111 and CHEM 1112; and BISC 1111 or BISC 1115 and BISC 1125; and BISC 1112 or BISC 1116 and BISC 1126.

BISC 2331. Insect Biology. 3 Credits.

Overview of the class Insecta, focusing on insect external and internal morphology, classification, ecology/behavior, collection, and specimen preparation. Prerequisites: BISC 1111 and BISC 1112.

BISC 2332. Comparative Vertebrate Anatomy. 4 Credits.

BISC 2332 provides a thorough introduction into the study of functional vertebrate anatomy. Lectures combined with intensive laboratory assignments will introduce students to the structure and function of most vertebrate organ systems. Prerequisites: BISC 1111; and BISC 1112; or permission of the instructor.

BISC 2333. Evolution and Extinction of Dinosaurs. 3 Credits.

The 165-million-year history of dinosaurs; different groups and their evolution, end-Cretaceous extinction event, the origin of birds, and the biology of the group. Prerequisites: BISC 1111 or BISC 1115 and BISC 1125, and BISC 1112 or BISC 1116 and BISC 1126; or GEOL 1001 and GEOL 1002; or GEOL 1002 and GEOL 1005. Credit cannot be earned for this course and GEOL 2333.

BISC 2334W. Integrative Biology of Fishes. 3 Credits.

Concepts in anatomy, biomechanics, physiology, developmental biology, biomechanics and hydrodynamics, adaptive radiation, evolutionary biology, and ecology using fish as model organisms. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: BISC 1111 or BISC 1115 and 1125; and BISC 1112 or BISC 1116 and BISC 1126.

BISC 2335. Insect Biology Lab. 1 Credit.

An overview of insects, with an emphasis on ecology, behavior, economic importance, and the key adaptations that characterize the evolution of this diverse group. This lab teaches basic internal and external anatomy, field collection methods, insect identification, and discussion of the primary literature. BISC 2331 Insect Biology must be taken either prior or concurrently with BISC 2335 Insect Biology Lab. Laboratory fee. Prerequisite: BISC 2331.

BISC 2336. Introductory Microbiology. 3 Credits.

Lecture. Survey of the major groups of microorganisms with emphasis on structure, physiology, ecology, evolution, pathogenesis, and biotechnology. Prerequisites: BISC 1111 or BISC 1115 and BISC 1125; BISC 1112 or BISC 1116 and BISC 1126; and CHEM 1111 and CHEM 1112. Same As: BISC 2337W.

BISC 2337. Introductory Microbiology Laboratory. 1 Credit.

Laboratory associated with BISC 2336. Survey of the major groups of microorganisms with emphasis on structure, physiology, ecology, evolution, pathogenesis, and biotechnology. Prerequisites: BISC 1111; BISC 1112; CHEM 1111 and CHEM 1112; and BISC 2336. Credit cannot be earned for this course and BISC 2337W.

BISC 2337W. Introductory Microbiology. 4 Credits.

Lecture (2 hours), laboratory (4 hours). Survey of the major groups of microorganisms with emphasis on structure, physiology, ecology, pathogenesis, and biotechnology. Antibiotic resistance and emerging diseases. Laboratory fee. Prerequisites: BISC 1111; and BISC 1112; and CHEM 1111 and CHEM 1112. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Credit cannot be earned for this course and BISC 2337.

BISC 2339. Parasitology. 4 Credits.

Introduction to animal parasitology; survey of parasitic types from protozoa through arthropods. Prerequisites: BISC 1111; and BISC 1112.

BISC 2401. Biodiversity in A Changing World. 3 Credits.

Topics on biological diversity from the perspective of species and within the conceptual framework of evolutionary biology. The explanatory power, simplicity, and grandeur of evolution and its products. Consideration of how questions and hypotheses are empirically addressed. Prerequisites: BISC 1111 and BISC 1112. Credit cannot be earned for this course and BISC 2000.

BISC 2450. Organic Evolution. 3 Credits.

Synthetic theory of organic evolution, including population biology, speciation, adaptation, macroevolution, systematics, biogeography, and the geologic record. Prerequisites: BISC 1111; and BISC 1112.

BISC 2451. History of Life. 3 Credits.

Overview of life through time; the origin of life, evolution of major groups of organisms, and important methodologies used in paleontology. Prerequisites: BISC 1115 and BISC 1125; and BISC 1116 and BISC 1126; or permission of the instructor. (Same as GEOL 2151).

BISC 2452. Animal Behavior. 3 Credits.

An evolutionary approach to the study of animal behavior, emphasizing behavioral ecology and sociobiology. Prerequisites: BISC 1111 and BISC 1112; or permission of the instructor.

BISC 2453. Animal Behavior Lab. 1 Credit.

Methods used in the study of animal behavior; observation, basic statistical analysis, and experimental design; review and evaluation research materials. Prerequisites: BISC 1111 and BISC 1112. Recommended background: Prior or concurrent enrollment in BISC 2452.

BISC 2454. General Ecology. 3 Credits.

The core concepts of the field of ecology across different hierarchical scales of ecological systems. Prerequisites: BISC 1111 and BISC 1112; or permission of the instructor.

BISC 2456. General Ecology Laboratory. 1 Credit.

Practical exercises and field-trips are used to explore the core concepts of the field of ecology across different hierarchical scales of ecological systems. Laboratory fee. Prerequisites: BISC 1111 and BISC 1112; and BISC 2454 taken previously or concurrently.

BISC 2581. Human Gross Anatomy. 3 Credits.

The structural organization of the human body and how it relates to regional and systems-based functions. Emphasis on the macroscopic structure of the body. Prerequisites: BISC 1111 and BISC 1112; except by permission of the instructor. Same As: ANAT 2181.

BISC 2583. Biology of Proteins. 3 Credits.

About half of the proteins in the human genome have unknown functions. Are some related to cancers, muscle degeneration, infectious disease? How can evolutionary relationships among proteins from other organisms help us discover functions of unknown proteins? Laboratory fee. Prerequisite: AP or IB Biology or Chemistry.

BISC 2584. Introduction to Bioinformatics. 3 Credits.

The use of computational techniques in molecular biology, genetics, and evolution; techniques and software for database searching, sequence alignment, gene finding, phylogenetics, genomics, and proteomics. Prerequisites: BISC 1115 and BISC 1125; and BISC 1116 and BISC 1126. (Same as CSCI 3571).

BISC 2585. Biometry. 3 Credits.

The application of statistics to problems in biology, including experimental and field work and environmental science and biometry. Designed for program majors. Prerequisites: MATH 1220. Recommended background: Familiarity with basic command-line applications and introductory calculus.

BISC 3099. Variable Topics. 1-12 Credits.**BISC 3122. Human Physiology. 3 Credits.**

Introduction to the function of organ systems of the body. Prerequisites: CHEM 1111 and CHEM 1112; and BISC 2202 or BISC 2207.

BISC 3123. Human Physiology Lab. 1 Credit.

Basic physiology laboratory techniques; emphasis on the experimental study of homeostatic mechanisms in humans. Laboratory fee. Prerequisites: BISC 1111 and BISC 1112.

BISC 3165. Biochemistry I. 3 Credits.

Introduction to the chemistry of living cells; structure and function of proteins, lipids, carbohydrates, and nucleic acids; enzyme structure, mechanism, and regulation. Prerequisites: BISC 1115 and BISC 1125; and BISC 1116 and BISC 1126, CHEM 2151 and CHEM 2152; course equivalents may be substituted for BISC 1115 and 1125; and BISC 1116 and BISC 1126 at the discretion of the instructor. (Same as CHEM 3165).

BISC 3166. Biochemistry II. 3 Credits.**BISC 3208. Molecular Biology Laboratory. 1 Credit.**

Techniques in molecular biology; traditional and modern methods in recombinant DNA technology, gene and protein characterization methods. Prerequisites: BISC 1111; BISC 1112; and CHEM 1111 and CHEM 1112.

BISC 3209. Molecular Biology. 3 Credits.

Theories and concepts in molecular biology; biosynthesis and structure of DNA, RNA, and proteins, relationships among gene function and expression; transcription and translation; regulation of gene expression in prokaryotes and eukaryotes; theory of traditional and modern methods in recombinant DNA technology, gene and protein characterization methods. Prerequisites: BISC 1111; BISC 1112; and CHEM 1111 and CHEM 1112.

BISC 3210. Nanobiotechnology. 3 Credits.

Theory and application of nanotechnologies in biology and medicine. Strategies for studying the organization, function, and complexity of biological systems at nanometer scale. Several areas of research are covered, including high-resolution cellular and molecular imaging, spectroscopy, and optical tweezers. Prerequisites: BISC 2202 or BISC 3261.

BISC 3211. Nanobiotechnology Laboratory. 1 Credit.

Modern instrumental techniques for analyzing biological structures and processes at the nanometer level; combining nano- and conventional techniques to answer scientific questions. Students formulate, design, and implement a research project. Prerequisites: BISC 1111 or BISC 1115 and BISC 1125; and BISC 1112 or BISC 1116 and BISC 1126.

BISC 3212. Immunology. 3 Credits.

Introduction to mammalian immunology covering the progression of immune responses from initial pathogen contact to immune memory. Prerequisites: BISC 1111; BISC 1112; BISC 2202 or BISC 2207; and CHEM 1111 and CHEM 1112. Recommended background: prior completion of CHEM 2151 and CHEM 2153.

BISC 3214. Developmental Biology. 3 Credits.

The molecular processes and cellular phenomena that result in the formation of organized tissues and functional organisms; formation of early body plan, cell type determination, organogenesis, morphogenesis, stem cells, cloning, and issues in human development. Prerequisites: BISC 1111 or BISC 1115 and BISC 1125; BISC 1112 or BISC 1116 and BISC 1126; and BISC 2202 or BISC 2207 or BISC 2213. Same As: BISC 2214.

BISC 3215. Genome Editing Laboratory. 1 Credit.

Practical training in genome editing in, from sequence design to molecular biology, generation of edited animals, and phenotypic analysis. Students undertake individual research projects involving CRISPR. Prerequisites: BISC 1111 and BISC 1112; and BISC 2202 or BISC 2207. Same As: BISC 3215W. Credit cannot be earned for this course and BISC 2215.

BISC 3215W. Genome Editing Laboratory. 1 Credit.

Practical training in genome editing in, from sequence design to molecular biology, generation of edited animals, and phenotypic analysis. Students undertake individual research projects involving CRISPR. Prerequisites: BISC 1111 and BISC 1112; and BISC 2202 or BISC 2207. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Same As: BISC 3215. Credit cannot be earned for this course and BISC 2215.

BISC 3261. Introductory Medical Biochemistry. 4 Credits.

Introduction to structures of biological macromolecules, enzyme catalysis, cellular bioenergetics, and metabolism. Prerequisites: CHEM 2151 and CHEM 2152. (Same as BIOC 3261, CHEM 3165).

BISC 3262. Biochemistry Laboratory. 2 Credits.

Study of common experimental techniques used in life science laboratories to separate and characterize biological macromolecules. Laboratory fee. Prerequisites: BISC 1115 and BISC 1125; BISC 1116 and BISC 1126; and BISC 3261. Same As: BIOC 3262, CHEM 3262.

BISC 3263. Special Topics in Biochemistry. 2 Credits.

In-depth discussion of current biochemically relevant topics, including cancer and HIV chemotherapy, immune response, photosynthesis, signal transduction, hormone regulation, and nutrition. Topics vary by semester. May be repeated for credits provided topic differs. Consult the Schedule of Classes for more details. Prerequisites: BISC 1111; BISC 1112; and BISC 3261. Credit cannot be earned for this course and BIOC 3263.

BISC 3270. Developmental Neurobiology. 3 Credits.

Fundamental principles of neural development organized by ontogeny, from early neural development to patterning, axonal targeting, and synapse formation. Prerequisites: BISC 1111 or BISC 1115 and BISC 1125; and BISC 1112 or BISC 1116 and BISC 1126. Same As: BISC 2220.

BISC 3320. Human Neurobiology. 3 Credits.

Introduction to the function of the human nervous system, gross and microscopic structure, and neurophysiology of the brain, spinal cord, and nerves; alterations caused by disease or injury. Prerequisites: BISC 2202 or BISC 3261.

BISC 3450. Evolutionary Medicine. 3 Credits.

The application of evolutionary principles, including natural selection, adaptation, phylogenetics, and evolutionary constraints, to understanding health, disease, and the biology of disease-causing organisms (viruses, bacteria, and parasites). How natural selection and phylogeny influence pathogen-host interactions, human genetics, immunology, development, cancer, and diseases of senescence. Prerequisites: BISC 1111 and BISC 1112. Recommended background: BISC 2207 and BISC 2450. Same As: BISC 3450W.

BISC 3450W. Evolutionary Medicine. 3 Credits.

The application of evolutionary principles, including natural selection, adaptation, phylogenetics, and evolutionary constraints, to understanding health, disease, and the biology of disease-causing organisms (viruses, bacteria, and parasites). How natural selection and phylogeny influence pathogen-host interactions, human genetics, immunology, development, cancer, and diseases of senescence. Prerequisites: BISC 1111 and BISC 1112. Recommended background: BISC 2207 and BISC 2450. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Same As: BISC 3450.

BISC 3453. Plant Comparative Structure and Function Lab. 2 Credits.

Core concepts and techniques in comparative plant structure and function. Prerequisites: BISC 2454. Recommended background: Concurrent enrollment in BISC 3458.

BISC 3454. Marine Ecology. 3 Credits.

Abiotic and biotic factors in marine environments in general and ecological theory behind how they shape communities, biomes, and patterns in marine biodiversity; major marine habitats and the important organisms, physical environment, and major interactions in each; threats to marine environments and effective conservation strategies.

BISC 3455. Marine Ecology Laboratory. 1 Credit.

Study of marine ecology through experiential learning and an introduction to ecological research in the marine environment and using large datasets collected by marine scientists. By visiting marine ecosystems, students learn about marine resource use and conservation strategies in the coastal zone.

BISC 3458. Plant Comparative Structure and Function. 3 Credits.

Fundamental principles of how organisms are built, investigating trade-offs and coordination in design, how variation in structure influences physiological function in different ecological settings, and how relations among plants shape structure and function and responses to ecological gradients. Prerequisites: BISC 1111; BISC 1112; or permission of instructor. Recommended background: BISC 2454 General Ecology.

BISC 3459. Field Biology. 4 Credits.

Overview of the approaches and techniques used by contemporary field biologists for cataloging, quantifying, and comparing patterns of biodiversity across plants, animals, and fungi at multiple spatial and temporal scales. Prerequisites: BISC 1111 and BISC 1112. Recommended background: Prior completion of BISC 2454.

BISC 3460. Conservation Biology. 3 Credits.

Theory and practice of conserving biological diversity. Ecological patterns of biodiversity, biology of small populations, and conservation case studies. Use of ecological modeling software to explore various topics. Prerequisites: BISC 1111; BISC 1112.

BISC 3460W. Conservation Biology. 3 Credits.

Theory and practice of conserving biological diversity. Ecological patterns of biodiversity, biology of small populations, and conservation case studies. Use of ecological modeling software to explore various topics. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: BISC 1111 or BISC 1115 and BISC 1125; and BISC 1112 or BISC 1116 and BISC 1126. Same As: BISC 3460.

BISC 3461. Plant-Animal Interactions. 3 Credits.

Review of the major ecological and evolutionary interactions that occur between plants and animals in natural and managed ecosystems. Prerequisites: BISC 1111; BISC 1112; or permission of the instructor. Recommended background: BISC 2450 or BISC 2454.

BISC 3462. Plant-Animal Interactions Laboratory. 1 Credit.

Field and laboratory study of temperate interactions between plants and animals. Group projects focus on original data collection, analysis, and interpretation. The stated prerequisites may be taken as corequisites; consult the instructor. Laboratory fee. Prerequisites: BISC 1111; BISC 1112; and BISC 3461.

BISC 3463. Ecological and Evolutionary Genetics. 3 Credits.

An analysis of the ecological and genetic basis of evolutionary change. Topics include the organization and maintenance of genetic variation within and among natural populations, the genetic basis of complex traits, molecular ecology analyses, and genotype by environment interactions. Prerequisites: BISC 2450 or permission of instructor; BISC 1111; BISC 1112; except by permission of the instructor.

BISC 3464. Ecology and Evolution of Societies. 3 Credits.

Study of broadly important ecological and evolutionary patterns and processes exemplified by organisms that have undergone the major evolutionary transition to living in societies. Prerequisites: BISC 1111; BISC 1112. Recommended background: Prior completion of BISC 2454.

BISC 3565. Plant Ecology and Evolution. 3 Credits.

How plants are built; how this construction shapes their physiological function in different ecological settings; how plants are related revolutionarily, and how these relations shape their structure, function, and responses to their environment. Prior completion of BISC 2454 is recommended. Prerequisites: BISC 1111; BISC 1112; or permission of the instructor.

BISC 3584. Introduction to Bioinformatics. 3 Credits.

The use of computational techniques in molecular biology, genetics, and evolution; techniques and software for database searching, sequence alignment, gene finding, phylogenetics, genomics, and proteomics. Prerequisites: BISC 1115 and 1125; and BISC 1116 and BISC 1126. Same As: CSCI 3571.

BISC 4132. Advanced Cellular-Molecular Biology. 3 Credits.

Advanced cell biology with emphasis on biochemistry and molecular biology; illustrations are drawn from different organisms and human biology. For upper-level undergraduates and beginning graduate students. Permission of the instructor required prior to enrollment. Prerequisite: BISC 3209. Recommended background: Six credits in the Cellular and Molecular category.

BISC 4171. Undergraduate Research. 1-12 Credits.

Admission by permission of the staff member concerned. May be repeated for credit. Laboratory fee. Prerequisites: BISC 1111 and BISC 1112 except by permission of the instructor; 16 credits in biological science courses.

BISC 4171W. Undergraduate Research. 1-12 Credits.

Admission by permission of the staff member concerned. May be repeated for credit. Laboratory fee. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: BISC 1115 and BISC 1125; and BISC 1116 and BISC 1126; and CHEM 2152 except by permission of the instructor; 16 credits in biological science courses.

BISC 4172. Independent Study. 1-3 Credits.

Prescribed reading list and consultations with staff advisor culminating in a written report and/or examination. Prerequisites: BISC 1111; and BISC 1112; and permission of the instructor.

BISC 4180. Undergraduate Research Seminar. 1 Credit.

Preparation for writing in diverse areas of modern biology; development of the skills needed to effectively communicate findings, publish research, and successfully obtain research funding. Same As: BISC 4180W.

BISC 4180W. Undergraduate Research Seminar. 1 Credit.

Preparation for writing in diverse areas of modern biology; development of the skills needed to effectively communicate findings, publish research, and successfully obtain research funding. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Same As: BISC 4180.

BISC 4212. Virology and Antiviral Immunity. 3 Credits.

Comprehensive overview of the infection, replication, and immune evasion strategies of distinct classes of viruses; hands-on survey into the molecular techniques in virology. Prerequisites: BISC 2202 or BISC 2207 or BISC 3209 or BISC 3212. Credit cannot be earned for this course and BISC 6212.

BISC 4213. Virology and Antiviral Immunity Lab. 1 Credit.

Lab component designed to familiarize students with the current experimental approaches in molecular biology used to study host immune interactions with viral pathogens. Course equivalents to stated prerequisite may be permitted by the instructor. Prerequisites: BISC 2202 or BISC 2207; and BISC 3209 and BISC 3212.

BISC 4219. Host-Microbe Interactions. 3 Credits.

Overview of the molecular, genetic, cellular and physiological basis of symbiotic and pathogenic interactions between plants, invertebrate and vertebrate animals with various microbial organisms including bacteria, fungi, viruses as well prokaryotic and eukaryotic parasites. Prerequisites: BISC 2202 and BISC 2337. Credit cannot be earned for this course and BISC 6219.

BISC 4234. Microbial Genomics Laboratory. 3 Credits.

Development of computational skills needed to analyze microbial genomes and metagenomes. In addition to the prerequisite course, either basic understanding of Unix/Linux commands or permission of the instructor is prior to enrollment. Prerequisites: BISC 2336. Same As: BISC 6234.

BISC 5099. Variable Topics. 1-99 Credits.**BISC 6101. Responsible Research. 1 Credit.**

This course provides an introduction to the ethical, social, and legal foundations of scientific practice. It is intended to provide a forum for graduate students and postdocs to discuss almost every aspect of the academic life of a scientist, except specific disciplinary topics that are treated in regular courses. Ensuring ethical conduct is an essential part of basic, applied, and clinical research, especially in the context of competitive, collaborative, and international settings so common nowadays. Students are exposed to case studies typifying complex social, ethical, and legal dilemmas that may arise in the conduct of research.

BISC 6102. Scientific Presentation. 1 Credit.

This course allows students to perfect their Scientific Presentation skills. In this course, students present, in front of peers and faculty, their current research projects and plans for future work leading towards a complete thesis or dissertation. Student presentations are designed to address a general audience of biologists, containing sufficient background information to provide perspective insights into the fundamental questions being asked, and at the same time providing enough detail on technical issues and analytical procedures to allow evaluation of potential outcomes. The class provides a friendly forum for students to collect feedback and comments, to discuss project design, content, and general significance of their research.

BISC 6132. Advanced Cellular-Molecular Biology. 3 Credits.

Advanced cellular biology for upper-level undergraduates and beginning graduate students; emphasis on biochemistry and molecular biology; organisms and human biology with emphasis on oral and written analysis of research literature. Permission of the instructor required prior to enrollment. Restricted to students who have completed 16 credits of 2000-4000 level biology courses, including 6 credits in the cell and molecular category. Prerequisites: Graduate standing or undergraduates with 16 credits of 2000-4000 level biology courses, including 6 credits in the Cell and Molecular category and permission of instructor. Recommended background: 4 to 6 upper level biology courses, including 2 cell and molecular courses. Credit cannot be earned for this course and BISC 4132.

BISC 6205. Current Topics in Cell Smith, Donaldson, Eleftherianos, Jeremic. 1-2 Credits.

May be repeated for credit. Prerequisite: BISC 2202 or BISC 3209.

BISC 6206. Current Topics in Evolutionary Ecology. 1-2 Credits.

May be repeated for credit.

BISC 6207. Seminar: Current Topics in Systematic Biology. 1-2 Credits.

Topics vary by semester. See the Schedule of Classes for more details. May be repeated for credit provided the topic differs. Prerequisite: BISC 6210.

BISC 6210. Methods of Study of Evolution. 4 Credits.

A rigorous and up-to-date treatment of the theory and methods of systematics, including phylogenetic inference and its applications in evolutionary biology. Laboratory fee. Prerequisite: BISC 2450 .

BISC 6211. Biogeography and Speciation. 3 Credits.

Survey of methods, techniques, and theory in biogeography. Geological and paleontological aspects of biogeography; large-scale biogeographic patterns; speciation and phylogeography. Prerequisites: BISC 2451 or BISC 2452.

BISC 6212. Virology and Antiviral Immunity. 3 Credits.

Overview of the infection, replication, and immune evasion strategies of distinct classes of viruses, as well the host antiviral immune responses to these pathogens. Credit cannot be earned for this course and BISC 4212.

BISC 6213. Descriptive Systematics: Documenting Biodiversity. 3 Credits.

Study of those aspects of systematic biology concerned with description and inventory of biodiversity. Prerequisite: BISC 6210.

BISC 6214. The Phylogenetic Basis of Comparative Biology. 3 Credits.

The use of phylogenetic hypotheses to study questions in evolutionary biology and ecology. Prerequisites: BISC 6210 and STAT 1127.

BISC 6215. Vertebrate Phylogeny. 4 Credits.

A survey of vertebrate diversity, emphasizing evolutionary relationships and adaptations of the major groups. Prerequisite: BISC 2450. Recommended background: BISC 2332.

BISC 6216. Morphological Systematics. 3 Credits.

Methods of studying organismal morphology as a means of inferring phylogeny, emphasizing the concept of homology. Prerequisite: BISC 6210.

BISC 6218. Innate Immunity. 3 Credits.

Discussion of innate immune systems in a wide variety of organisms; from sponges to vertebrates plus higher plants. Prerequisite: BISC 3212. Recommended background: BISC 2202, BISC 2207, BISC 3209 and BISC 2330.

BISC 6219. Host-Microbe Interactions. 3 Credits.

Overview of the molecular, genetic, cellular, and physiological basis of symbiotic and pathogenic interactions between plants, invertebrate, and vertebrate animals with various microbial organisms including bacteria, fungi, viruses as well prokaryotic and eukaryotic parasites. Prerequisites: BISC 2202 and BISC 2337.

BISC 6224. Molecular Evolution. 3 Credits.**BISC 6225. Molecular Phylogenetics. 4 Credits.**

Review of molecular phylogenetic methods including data recovery, alignment, weighting, character optimization, and phylogenetic inference methods. Prerequisites: BISC 2207, BISC 2450 and BISC 6210.

BISC 6227. Seminar: Genetics. 3 Credits.

Review of selected topics in genetics, with emphasis on current literature; topics of special interest to participants encouraged. May be repeated for credit. Prerequisite: BISC 2207.

BISC 6228. Population Genetics. 3 Credits.

Origin, maintenance, and possible significance of genetic variation in populations. Selection, genetic drift, and population structure are emphasized. Both theoretical and applied aspects of population genetics are discussed. Same as FORS 6247. Prerequisite: BISC 2207.

BISC 6230. Human Genetics. 3 Credits.

Genetic mechanisms of transmission and expression of human traits, with emphasis on biochemical and cytogenetic aspects. Prerequisite: BISC 2207. Recommended background: Previous coursework in cell biology or cell biochemistry.

BISC 6234. Microbial Genomics Laboratory. 3 Credits.

Development of computational skills needed to analyze microbial genomes and metagenomes. In addition to the prerequisite course, either basic understanding of Unix/Linux commands or permission of the instructor is prior to enrollment. Prerequisites: BISC 2336. Same As: BISC 4234.

BISC 6243. Seminar: Ecology. 3 Credits.

In-depth study of selected topics, including reports on original publications. May be repeated for credit. Prerequisite: BISC 2454.

BISC 6249. Seminar: Developmental Biology. 3 Credits.

Discussion and reports on recent research on the endocrinological, genetic, and biochemical aspects of animal development. Prerequisite: a course in developmental biology or cell biology.

BISC 6251. Evolutionary Developmental Biology. 3 Credits.

Developmental mechanisms involved in the morphological changes that occur during the course of evolution.

BISC 6252. Seminar: Neurobiology. 3 Credits.

Study of current publications in functional neurobiology. May be repeated for credit with instructor's permission.

BISC 6274. Gene Regulation and Genetic Engineering. 3 Credits.

The control of gene expression as illustrated by several prokaryotic and eukaryotic model systems: discussions of recombinant DNA techniques. Prerequisite: BISC 2207.

BISC 6275. Introduction to Recombinant DNA Techniques. 3 Credits.

Lecture, 1 hour; laboratory, 4 hours. Basic techniques of genetic manipulation: cloning of genes, transformation of bacteria, PCR procedures, DNA sequencing, and other techniques. Prerequisite: BISC 2202 or BISC 2207 or BISC 2337 and permission of instructor. Laboratory fee.

BISC 6276. Foundations in Evolution. 3 Credits.

Rigorous introduction to the major conceptual area within micro- and macroevolution. Prerequisites: BISC 2450 for undergraduate students only.

BISC 6295. Research. 1-12 Credits.

Investigation of special problems. May be repeated for credit.

BISC 6998. Thesis Research. 3 Credits.**BISC 6999. Thesis Research. 3 Credits.****BISC 8998. Advanced Reading and Research. 1-12 Credits.**

Limited to students preparing for the Doctor of Philosophy general examination. May be repeated for credit.

BISC 8999. Dissertation Research. 3-12 Credits.

May be repeated for credit. Restricted to doctoral candidates.

BIOMEDICAL ENGINEERING (BME)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

BME 1010. Introduction to Biomedical Engineering. 1 Credit.

Basic and emerging concepts in electrical, computer, and biomedical engineering. Hands-on experiments and projects. Introduction to the professional literature and available resources and to technical writing, speaking, and presentation skills. (Fall, Every Year).

BME 1020. Introduction to Biomedical Engineering. 2 Credits.

Continuation of BME 1010. Basic and emerging concepts in electrical, computer, and biomedical engineering; practical experiments and projects; introduction to the professional literature and available resources and to technical writing, speaking, and presentation skills. Prerequisite: BME 1010. (Spring, Every Year).

BME 2810. Biomedical Engineering Seminar I. 1 Credit.

BME 2810 and BME 2815 are taken in sequence by students in the biomedical engineering major. Overview of the field of biomedical engineering, including biomechanics, bioinformatics, telemedicine, instrumentation, and medical imaging. Prerequisite: BME 1020. (Fall).

BME 2815. Biomedical Engineering Seminar II. 1 Credit.

BME 2810 and BME 2815 are taken in sequence by students in the biomedical engineering major. Overview of the field of biomedical engineering, including biomechanics, bioinformatics, telemedicine, instrumentation, and medical imaging. (Fall and spring).

BME 2820. Biomedical Engineering Programming I. 3 Credits.

Introduction to Matlab Programming and fundamentals of programming in general with a focus on biomedical engineering problems. Functions, input/output, selection statements, loop statements, string manipulation, and debugging techniques are covered; manipulation of vectors and matrices and the use of vectorized code. (Fall, Every Year).

BME 2825. Biomedical Engineering Programming II. 3 Credits.

Introduction to C Programming and fundamentals of data structures with a focus on biomedical engineering problems; the use of data structures, pointers, and linked lists and discuss concepts such as binary trees and sorting algorithms. Students are expected to understand the basics of programming concepts such as the use of functions, input/output, selection statements, loop statements, string manipulation, and debugging techniques are understood, but no prior knowledge of C is required. Prerequisites: BME 2820 or permission of the instructor. (Fall, Every Year).

BME 3820. Principles and Practice of Biomedical Engineering. 4 Credits.

Introduction to engineering principles applicable to medicine; medical measurements for clinical use and research; anatomy and physiology of the human body from system and cellular approaches. Principles of biomedical engineering are reinforced by determining and analyzing physiological measurements in laboratory exercises. Prerequisites: ECE 2110 and APSC 2113. (Fall).

BME 3907. Special Topics in Biomedical Engineering. 3 Credits.

Topics vary by semester. May be repeated for credit provided topic differs. See department for more details. (Fall, spring, and summer, Every Year).

BME 3910. Capstone Design Preparation. 1 Credit.

Elements of project design; formulation of project ideas. Prerequisites: BME 2810 and BME 2815. (Fall, Every Year).

BME 3915W. Biomedical Engineering Capstone Project Lab I. 1 Credit.

BME 3915, BME 4920, and BME 4925 are taken in sequence by departmental majors beginning in the second semester of the junior year. After an introduction to the formal design process, the student plans, refines, designs, and constructs a one-year project. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: BME 3910. (Same as ECE 3915W) (Spring, Every Year).

BME 4480. Bioelectricity. 3 Credits.

Origin and applications of bioelectric phenomena; engineering tools for excitable cells, tissues and organs; biophysical and equivalent electrical engineering analysis; heart and brain abnormalities from a quantitative perspective. (Spring, Every Year) Same As: BME 6480.

BME 4488. Cell and Molecular Imaging. 3 Credits.

Basics of optics, microscopy, spectroscopy, and fluorescence in the context of imaging at the cellular and molecular level; advanced techniques for probing protein interactions and live cell functions; image processing algorithms and principles of scientific visualization. Restricted to juniors and seniors. Prerequisites: BME 2825 and ECE 3220. (Same as BME 6488) (Fall, Every Year).

BME 4489. Socially Assistive Robotics and Interactive Learning. 3 Credits.

Application of advanced robotic solutions to promoting human lives through social, emotional, and interactive therapies in areas such as social and behavioral therapies for children with autism spectrum disorder (ASD) and emotional and rehabilitation assistance in elder care. Prerequisite: BME 2825. Recommended background: Experience with computer programming. (Fall, Every Year) Same As: BME 6489.

BME 4820. Anatomy and Physiology for Engineers. 3 Credits.

Human anatomy and physiology from an engineering viewpoint. Analysis of functions of major physiological systems. Biopotentials, mechanics, gas exchange, chemical balance, electrical and chemical signaling, nervous control, voluntary and reflex factors. (Same as BME 6820) (Fall).

BME 4825. Biomedical Properties Laboratory. 1 Credit.

Introduction to biophysical concepts in a laboratory setting; emphasis on biomedical engineering. (Spring).

BME 4830. Introduction to Medical Imaging Methods. 3 Credits.

Application of linear systems analysis methods to medical imaging techniques; basic properties of imaging systems; physics and instrumentation behind modalities; advantages, disadvantages, and primary applications of modalities. Prerequisites: BME 3820 and ECE 3220. (Spring, Every Year).

BME 4835. Introduction to Assistive Robotics. 3 Credits.

Application of advanced robotic solutions to promoting human lives through social, emotional, and interactive therapies in areas such as social and behavioral therapies for children with autism spectrum disorder (ASD) and emotional and rehabilitation assistance in elder care. Prerequisites: BME 2825 and ECE 3220. (Spring, Every Year).

BME 4920W. Biomedical Engineering Capstone Project Lab II. 3 Credits.

BME 3915, BME 4920, and BME 4925 are taken in sequence by departmental majors beginning in the second semester of the junior year. After an introduction to the formal design process, the student plans, refines, designs, and constructs a one-year project. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: BME 3915W. (Same as ECE 4920W) (Fall, Every Year).

BME 4925W. Biomedical Engineering Capstone Project Lab III. 3 Credits.

BME 3915, BME 4920, and BME 4925 are taken in sequence by departmental majors beginning in the second semester of the junior year. After an introduction to the formal design process, the student plans, refines, designs, and constructs a one-year project. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. (Spring, Every Year).

BME 4990. Research. 1-3 Credits.

Applied research and experimentation projects, as arranged. Restricted to juniors and seniors. (Fall and spring, Every Year).

BME 6045. Special Topics. 1-3 Credits.

Topics to be announced in the Schedule of Classes. (Fall and spring).

BME 6050. Research. 1-12 Credits.

Applied research and experimentation projects, as arranged. May be repeated for credit. (Spring, Every Year).

BME 6065. Colloquium. 3 Credits.

Seminars and meetings featuring visiting scholars in biomedical engineering. Topics vary. See department for details. Restricted to graduate students in biomedical engineering. (Fall and spring, Every Year).

BME 6480. Bioelectricity. 3 Credits.

Origin and applications of bioelectric phenomena; engineering tools for excitable cells, tissues and organs; biophysical and equivalent electrical engineering analysis; heart and brain abnormalities from a quantitative perspective. Restricted to graduate students. (Spring, Every Year) Same As: BME 4480.

BME 6481. Regulatory Law for Medical Devices. 3 Credits.

An introduction to legal issues pertinent to medical device regulation; device classification, general and special controls, quality system regulation, 510(k) submissions, premarket approval applications (PMAs), clinical trials, investigational device exemptions (IDEs) and medical device reporting (MDR), recalls, labeling and advertising, enforcement, and emerging legal issues. Pharmaceutical regulation. (Fall).

BME 6482. Medical Measurements. 3 Credits.

Theory of measurements in biological areas and techniques for electronic measurements on biological specimens. Experiments in acquisition, processing, and measurement of physiological signals, ECG, EEG, and EMG. (Fall).

BME 6483. Medical Instrumentation Design. 3 Credits.

The medical device design process and many of its key aspects, including needs assessment, regulatory processes and concerns, intellectual property, patient safety, and market analysis. Prerequisites: BME 6482. (Spring).

BME 6484. Biomedical Signal Analysis. 3 Credits.

Origin, acquisition, and analysis of physiological signals. Deterministic and probabilistic modeling; fitting models; sequences and time series. Feature extraction from EEG and ECG; Fourier analysis and filtering; modeling. Noise and artifact removal and signal compensation. Prerequisites: BME 6482. (Spring).

BME 6485. Medical Imaging I. 3 Credits.

Principles of projection radiography, fluoroscopy, tomography, ultrasound and nuclear sources; biomagnetic imaging. Source and object; recorder resolution and noise; scatter and attenuation. Ultrasound techniques and instrumentation, including physics of ultrasound, transducers, ultrasound imaging, hemodynamics, Doppler techniques. Prerequisite: BME 4830. (Fall).

BME 6486. Clinical Medicine for Engineers. 3 Credits.

Overview of clinical medicine with emphasis on those areas most affected by engineering and technology. (Spring, Every Year).

BME 6487. Rehabilitation Medicine Engineering. 3 Credits.

Cross-sectional view of those areas of medicine most involved with the treatment of handicapped individuals; application of engineering theory and techniques to the rehabilitation of handicapped individuals; solutions to major problem areas and specific problems. Prerequisite: BME 6482. (Spring, Every Year).

BME 6488. Cell and Molecular Imaging. 3 Credits.

Basics of optics, microscopy, spectroscopy, and fluorescence in the context of imaging at the cellular and molecular level; advanced techniques for probing protein interactions and live cell functions; image processing algorithms and principles of scientific visualization. Students taking this course for graduate credit complete additional work. Restricted to graduate students. Recommended background: Computer Programming. (Fall, Every Year) Same As: BME 4488.

BME 6489. Socially Assistive Robotics and Interactive Learning. 3 Credits.

Application of advanced robotic solutions to promoting human lives through social, emotional, and interactive therapies in areas such as social and behavioral therapies for children with autism spectrum disorder (ASD) and emotional and rehabilitation assistance in elder care. Restricted to graduate students. Recommended background: Experience with computer programming. (Fall, Every Year) Same As: BME 4489.

BME 6820. Anatomy and Physiology for Engineers. 3 Credits.

Human anatomy and physiology from an engineering perspective. Analysis of functions of major physiological systems. Biopotentials, mechanics, gas exchange, chemical balance, electrical and chemical signaling, nervous control, voluntary and reflex factors. (Same as BME 4820) (Fall).

BME 6830. Introduction to Medical Imaging Methods. 3 Credits.

Application of linear systems analysis methods to medical imaging techniques; basic properties of imaging systems; physics and instrumentation behind modalities; advantages, disadvantages, and primary applications of modalities. Recommended background: Knowledge of signal processing. (Same as BME 4830) (Spring, Every Year).

BME 6840. Digital Image Processing. 3 Credits.

Properties of images and visual systems. Image acquisition, sampling, quantization. One- and two-dimensional image transform techniques; enhancement and restoration. Image coding and data compression. Segmentation, representation, boundary and shape, texture, matching. Image understanding. Prerequisites: ECE 6800. (Same as ECE 6840) (Spring, odd years).

BME 6842. Image Engineering. 3 Credits.

Sensor/camera design and analysis as a system. Detection and noise processes underlying the sensing of optical radiation; the engineering and physics of image formation. Topics covered include radiometry/photometry, optics and image formation, device and camera characterization, and image quality metrics and system design trades. Prerequisites: ECE 6010 and ECE 6015. (Same as ECE 6842) (Fall, Every Year).

BME 6850. Pattern Recognition. 3 Credits.

Random vectors, transformations. Hypothesis testing, error probability: bias, variance, and sample size, resampling; sequential methods. Bayes, other linear classifiers. Discriminant functions, support vector machines, maximum-likelihood and parameter estimation, dimensionality reduction. Nonparametric methods; unsupervised learning and clustering; feature selection and ordering. Applications in industry and medicine. Student projects. Learning is reinforced by homework problems and in-class and at-home computer examples. Prerequisite: ECE 6015. (Same as ECE 6850) (Fall, Spring, and Summer, Every Year).

BME 6885. Computer Vision. 3 Credits.

Image processing; edge detection, segmentation, local features, shape and region description in 2D and 3D. Insights from human vision studies. Representation for vision: object models, synthetic images, matching, gaps, algorithms. Interference, production system, syntactic networks. Planning spatial reasoning for robot vision. Prerequisites: BME 6840 or ECE 6840 or equivalent. (Same as ECE 6885) (Fall, Spring, and Summer, Every Year).

BME 6994. Biomedical Engineering Regulatory Practicum I. 3 Credits.

First part of the BME 6994 and BME 6995 practicum sequence. Students work with a practicum mentor to develop either an application for federal funding using the Small Business Innovation Research (SBIR) or Small Business Technology Transfer (STTR) mechanism or a 510(k) submission for U.S. Food and Drug Administration (FDA) medical device review. Independent research combined with the synthesis of technical and regulatory topics covered in the program. Restricted to students who have completed a minimum of 9 credits in the Master of Engineering in Regulatory Biomedical Engineering program. (Fall, spring, and summer, Every Year).

BME 6995. Biomedical Engineering Regulatory Practicum II. 3 Credits.

Second part of the BME 6994 and BME 6995 practicum sequence. Prerequisite: BME 6994. (Fall, spring, and summer, Every Year).

BME 6998. Thesis Research. 3 Credits.

Thesis research. (Fall and spring).

BME 6999. Thesis Research. 3 Credits.

Thesis research. (Fall and spring).

BME 8484. Medical Imaging II: Image Analysis. 3 Credits.

Review of medical imaging modalities; review of image formation and characteristics, both static and dynamic; methods for and evaluation of: medical image reconstruction, enhancement, segmentation, registration, and description; feature extraction and classification; error analysis and the receiver operating characteristic; imaging applications in diagnosis and treatment, including surgery; metrics of truth and quality, with implications for image compression. Prerequisites: BME 6484. (Fall).

BME 8999. Dissertation Research. 1-12 Credits.

May be repeated for credit. Restricted to doctoral candidates. (Fall, spring, and summer, Every Year).

BIOMEDICAL SCIENCES (BMSC)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

BMSC 5099. Variable Topics. 1-99 Credits.**BMSC 6218. Ethics for Translational Sciences. 2 Credits.**

Ethical issues relevant to the practice of medicine and biomedical research involving human subjects. Permission of the instructor required prior to enrollment. Recommended background: ANAT 6130, ANAT 6150, ANAT 6160, ANAT 6181 and ANAT 6292.

BMSC 8210. Genes to Cells. 3 Credits.

Molecular aspects of cellular composition, gene expression, and processes; replication and regulation of gene expression, protein and cell structure, and functions.

BMSC 8212. Systems Physiology. 3 Credits.

The physiological bases of organ systems and origins of disease; key concepts and hypotheses in mammalian organ systems essential for pursuing contemporary experimental studies. Prerequisite: BMSC 8210.

BMSC 8215. Lab Rotations. 2 Credits.

For PhD students enrolled in the Institute for Biomedical Sciences. Laboratory training in advanced techniques in biomedical sciences research practices. May be repeated for credit.

BMSC 8216. Scientific Writing, Presentation Skills, and Seminar Planning. 1 Credit.

Instruction in the basic skills of scientific writing, integration with laboratory rotation (BMSC 8215) report writing, and genes to cells (BMSC 8210) blog writing.

BMSC 8217. Ethics and Grant Writing. 1 Credit.

Ethical issues related to the conduct of research, animal use, and human subject participation. The design of a successful grant proposal.

BMSC 8218. Career Options in the Biomedical Sciences. 1 Credit.

Professionals with PhD degrees in the biomedical sciences discuss their positions and provide doctoral students with networking opportunities and advice regarding career paths such as research in various settings, policy and program planning, grants administration, and biotechnology issues within intellectual property law.

BMSC 8219. Writing the Grant-Style Qualifier. 2 Credits.

Process of proposal development for PhD students. Research proposals in the format of an NIH F31 predoctoral fellowship, including specific aims, research plan, candidate background, biosketch, and training plan sections. Recommended for second-year students preparing for the grant-style qualifying examination. Restricted to students in the PhD programs in biomedical sciences. Prerequisites: BMSC 8210 and BMSC 8212.

BMSC 8230. Molecular Basis of Human Disease. 3 Credits.

Genetic causes of human disease, diagnostic methods of genomic medicine human molecular genetics, established and developing molecular methods, and current research topics and therapies; principles of precision medicine in the context of disease examples including intersex conditions, cancer, neuropsychiatric disorders, and inborn errors of metabolism.

BMSC 8231. Introduction to Genomics, Proteomics, and Bioinformatics. 3 Credits.

Implementation of genomics, proteomics and bioinformatics approaches to biological systems. Students are expected to have completed a prior course in biochemistry and molecular biology. Permission of the instructor is required. Prerequisite: BMSC 8230. Recommended background: Undergraduate degree in biology, chemistry, or a related field.

BMSC 8233. Integrative Bioinformatics. 3 Credits.

Bioinformatics techniques for analysis of macromolecular sequences, structures, gene expression arrays, and proteomics. Systems biology approaches to research problems. Permission of the instructor required prior to enrollment. Prerequisite: BMSC 8230. Recommended background: Undergraduate background in biology, computer sciences, biochemistry, or a related field.

BMSC 8234. Seminar in Systems Biology. 2 Credits.

. Prerequisites: permission of the instructor.

BMSC 8235. Applied Biostatistics for Basic Research. 2 Credits.

The handling and interpretation of large data sets, including biological data and genomic data. Permission of the instructor required prior to enrollment.

BMSC 8998. Readings and Research. 1-12 Credits.

May be repeated for credit. Restricted to doctoral candidates preparing for the general examination.

BMSC 8999. Dissertation Research. 3-12 Credits.

Limited to Doctor of Philosophy candidates. May be repeated for credit.

BIostatistics (BIOS)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

BIOS 5099. Variable Topics. 1-99 Credits.**BIOS 6295. Reading and Research. 1-12 Credits.**

May be repeated for credit.

BIOS 6998. Thesis Research. 3 Credits.**BIOS 6999. Thesis Research. 3 Credits.****BIOS 8998. Advanced Reading and Research. 1-12 Credits.**

Limited to students preparing for the Doctor of Philosophy general examination. May be repeated for credit.

BIOS 8999. Dissertation Research. 3-12 Credits.

Limited to Doctor of Philosophy candidates. May be repeated for credit.

Business Administration (BADM)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

BADM 1001. First-Year Development Course I. 1 Credit.

Understanding strengths, values, and interests, and managing one's own academic and career goals. No alternative to this course will be accepted to fulfill the GWSB signature course requirement. Restricted to first-year students in the School of Business. Prerequisites: n/a.

BADM 1002. First-Year Development Course II. 1 Credit.

Students develop as leaders through networking opportunities and community engagement and perform service within the District of Columbia. No alternative to this course will be accepted to fulfill the GWSB signature course requirement. Restricted to first-year students in the School of Business.

BADM 1003. Transfer Student Development Course. 1 Credit.

Designed to help transfer students in the School of Business succeed both in and outside of the classroom. Developmental experiences designed to enhance the educational experience and assist with career preparation. Focus on understanding strengths, values, and interests, managing one's own academic and career goals, and developing leadership skills. No alternative to this course will be accepted to fulfill the GWSB Signature course requirement. Restricted to transfer students in the School of Business.

BADM 1004. The Age of Globalization. 3 Credits.

A multidisciplinary foundation in the globalization of people, markets, and firms. Required for all School of Business students. No alternative to this course will be accepted to fulfill the GWSB Signature course requirement.

BADM 1099. Variable Topics. 1-36 Credits.**BADM 1900. Special Topics. 1-3 Credits.****BADM 2001. Markets and Politics. 3 Credits.**

Economic and political resource allocation; social and political influences on business organizations; contemporary problems and issues. No alternative to this course will be accepted to fulfill the GWSB Signature course requirement.

BADM 2001W. Markets and Politics. 3 Credits.

Economic and political resource allocation; social and political influences on business organizations; contemporary problems and issues. No alternative to this course will be accepted to fulfill the GWSB Signature course requirement. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

BADM 2099. Variable Topics. 1-36 Credits.**BADM 2301. Management Information Systems Technology. 3 Credits.**

An introduction to data and information processing concepts and systems viewed from a contemporary management perspective. Emphasis on uses and applications as well as emerging managerial issues with the potential to reshape the form and function of information systems. Lab required. Prerequisites: Basic knowledge of Microsoft Word, Excel, and PowerPoint.

BADM 3001. Career Management Strategy. 1 Credit.

The career development process, including job search strategies and formulation of a career management plan, with practice in producing a resume and interviewing for a position. No alternative to this course will be accepted to fulfill the GWSB signature course requirement. Restricted to juniors in the School of Business.

BADM 3099. Variable Topics. 1-36 Credits.**BADM 3101. Human Resource Management. 3 Credits.**

Global and strategic implications of human capital policies and practices, including human resource planning, recruitment, selection, training, development, compensation, and collective bargaining. Prerequisite: PSYC 1001.

BADM 3102. Business and Government Relations. 3 Credits.

Economic and legal environment of business enterprise; social and political influences; contemporary problems and issues.

BADM 3102W. Business/Government Relations. 3 Credits.

Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Same As: BADM 3102.

BADM 3103. Human Capital in Organizations. 3 Credits.

An introduction and integration of concepts drawn from human resource management and organizational behavior. Application of these concepts to individual, group/team, and organizational scenarios through experiential exercises, cases, and projects. Development of skills in analyzing and evaluating human capital problems and determining appropriate solutions.

BADM 3401. Contemporary Marketing Management. 3 Credits.

Consumer and organization buying behavior. Strategic marketing processes. Product development, brand management, valuation and pricing, channel/logistics management, integrated marketing communications, and e-commerce.

BADM 3501. Financial Management and Markets. 3 Credits.

Introduction to financial markets, investment analysis, and financial management. Financial analysis, risk management, working capital management, capital budgeting, financial structure, cost of capital, and dividend policy. Prerequisites: ECON 1012 or HONR 2044; MATH 1221 or MATH 1231 or MATH 1252; and APSC 3115 or DNSC 1001 or STAT 1051 or STAT 1053 or STAT 1111.

BADM 3601. Operations Management. 3 Credits.

Production planning concepts and analytical tools. Designing and managing production processes: facilities, equipment, process control systems. Design issues, demand forecasting, material planning, acquisition techniques. Managing the factory floor: scheduling, total quality management, continuous improvement concepts and methods. Prerequisites: STAT 1051, STAT 1053, STAT 1111 or APSC 3115 or DNSC 1001.

BADM 4001. Leadership and Career Launch. 1 Credit.

Experiential capstone that may include an approved internship, participation in GWSB's Research Experience for Undergraduates, select student leadership positions in GWSB, or approved community service. Prerequisites: BADM 3001 or permission of the instructor.

BADM 4101. Business Ethics and the Legal Environment. 3 Credits.

Introduction to practical reasoning at the intersection of business and society. Emphasis on application of ethics frameworks and key dimensions of the legal environment to problems of individual, organizational, and social responsibility in business. Restricted to juniors in the School of Business.

BADM 4101W. Business Ethics and the Legal Environment. 3 Credits.

An introduction to practical reasoning at the intersection of business and society. Emphasis on application of ethics frameworks and key dimensions of the legal environment to problems of individual, organizational, and social responsibility in business. No alternative to this course will be accepted to fulfill the GWSB Signature course requirement. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

BADM 4801. Strategy Formulation and Implementation. 3 Credits.

An integrative capstone course to develop skills in diagnosing organizational problems, formulating and selecting strategic alternatives, and recognizing problems inherent in strategy implementation. BA, BAccy, and SEAS business concentration programs. Recommended for juniors and seniors. Prerequisites: ACCY 2001 and BADM 3501 and (BADM 3103 or BADM 3401/3401W, or BADM 4101 or IBUS 3001).

BADM 4900. Special Topics. 3 Credits.

Experimental offering; new course topics and teaching methods.

BADM 4900W. Special Topics. 3 Credits.

Experimental offering; new course topics and teaching methods. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

BADM 4950. Internship. 0 Credits.

School of Business undergraduates may register for this course when they wish to have an internship recorded on the transcript. The supervisor must verify that the internship has been completed for a minimum of six hours per week. An administrative fee is charged. May be repeated each semester if desired.

BADM 4995. Independent Study. 1-6 Credits.

Assigned topics with interdisciplinary focus. Admission by prior permission of advisor. May be repeated once for credit but in a separate semester.

BADM 5099. Variable Topics. 1-99 Credits.

CANCER BIOLOGY (CANC)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses

- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CANC 8214. Cancer Biology Seminar. 1 Credit.

Current and emerging topics with presentations and discussions facilitated by leading experts from GW and outside institution; student-led journal club and oral presentation opportunities. Prerequisites: BMSC 8210 and BMSC 8212.

CANC 8221. The Basic Science of Oncology. 3 Credits.

Epidemiology, genetics, viruses, oncogenes, chemical carcinogenesis, radiation carcinogenesis, tumor growth, metastasis, biochemistry of cancer cells, tumor markers, hormones and cancer, cancer immunobiology, radiotherapy, and chemotherapy and immunotherapy. Prerequisites: BMSC 8210, BMSC 8212 and BMSC 8230.

CANC 8222. Molecular Oncology and Cancer Epigenetics. 3 Credits.

Topics in molecular oncology, including epidemiology, genetics and epigenetics, carcinogenesis, tumor growth and metastasis, biochemistry of cancer cells, tumor markers, hormones and cancer, cancer immunobiology, radiotherapy, chemotherapy, and immunotherapy. Prerequisites: BMSC 8210 and BMSC 8212.

CANC 8223. Immunology and Immunotherapy of Cancer. 3 Credits.

Tumor immunology, approaches for cancer immunotherapy, current clinical progress and limitations of cancer immunotherapies. For graduate students, translational researchers, and scientists and practicing clinicians. Prerequisites: BMSC 8210 and BMSC 8212.

CANC 8998. Advanced Reading and Research. 1-12 Credits.

Restricted to doctoral candidates preparing for the qualifying examination. May be repeated for credit.

CANC 8999. Dissertation Research. 3-12 Credits.

May be repeated for credit. Restricted to IBS students.

CAPITAL MARKETS (CAMA)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students

- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CAMA 6001. Capital Markets, Instruments and Institutions. 3 Credits.

Debt instruments, markets where they are traded and institutions which actively participate and maintain those markets. Theoretical foundation for interest rate theories, term structure and credit risks. Roles played by financial institutions, various instruments, the central banks and financial regulations. Basic risk management tools critically important in managing those institutions. Restricted to students enrolled in the Graduate Certificate in Capital Markets program.

CAMA 6002. Corporate Finance and Risk Management. 3 Credits.

Introduction to concepts of corporate finance and risk management. Bond valuation, stock valuation, determining cost of capital and risk management, with an emphasis on emerging markets and small and medium enterprises. Restricted to students enrolled in the Graduate Certificate in Capital Markets program.

CAMA 6003. Capital Markets, Financial Crises and the Global Economy. 3 Credits.

Open economy macro and linkages between financial markets and other markets. Causes and impacts of financial crises. Policy options. Current approaches to reduce risks associated with financial markets and concomitant regulations, nationally and globally, to deal with banking related issues. Implications of volatile capital flows. Restricted to students enrolled in the Graduate Certificate in Capital Markets program.

CAMA 6004. Quantitative Thinking for Capital Market Decision Makers. 3 Credits.

The conceptual foundations and practical computational methods needed to extract insights from financial data and inform decision making. Restricted to students enrolled in the Graduate Certificate in Capital Markets program.

CHEMISTRY (CHEM)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CHEM 1000. Dean's Seminar. 3 Credits.

Contemporary topics in chemistry.

CHEM 1003. Contemporary Science for Nonscience Majors. 3 Credits.

Contemporary topics in physical, biological, and medical science. CHEM 1003 is not a prerequisite to CHEM 1004. Laboratory fee.

CHEM 1004. Contemporary Science for Nonscience Majors. 3 Credits.

Continuation of CHEM 1003. Contemporary topics in physical, biological, and medical science. CHEM 1003 is not a prerequisite to CHEM 1004. Laboratory fee.

CHEM 1099. Variable Topics. 1-36 Credits.

CHEM 1110. Fundamentals of Chemistry. 2 Credits.

Central concepts of chemistry including the metric system, unit conversions, classification of matter, periodicity, atomic structure, chemical bonding, chemical reactions, stoichiometry, and chemical equilibrium. Emphasis on mathematical and analytical skills required for effective problem solving. Restricted to students who successfully completed high school algebra prior to matriculation and have completed the ALEKS chemistry preparatory course at GW without achieving at least 95 percent mastery.

CHEM 1111. General Chemistry I. 4 Credits.

Atomic structure and properties; stoichiometry; gas, liquid, and solid state; chemical bonding; solutions; chemical kinetics and equilibria; thermodynamics; acids and bases; electrochemistry; descriptive chemistry. Restricted to students who have successfully completed high school algebra prior to matriculation and have completed the ALEKS chemistry preparatory course at GW and achieved at least 95 percent mastery.

CHEM 1112. General Chemistry II. 4 Credits.

Continuation of CHEM 1111. Atomic structure and properties; stoichiometry; gas, liquid, and solid state; chemical bonding; solutions; chemical kinetics and equilibria; thermodynamics; acids and bases; electrochemistry; descriptive chemistry. Laboratory fee. Prerequisite: CHEM 1111.

CHEM 1113. General Chemistry for Engineers. 4 Credits.

Basic quantitative chemistry concepts, atomic and molecular structure, chemical kinetics, chemical equilibrium, acid-base chemistry, electrochemistry, thermodynamics and nuclear chemistry. Restricted to Students in applied science and technology, biomedical engineering, environmental engineering, or pre-med track should take CHEM 1111 and CHEM 1112 in lieu of this course. Recommended background: High-school algebra and at least 95 percent (learned and mastered) in the department's ALEKS chemistry prep course.

CHEM 2000. Sophomore Colloquium. 3 Credits.

Sophomore colloquia are small, seminar-type classes that deeply engage CCAS second-year students in a discipline, focus on a narrow issue of high interest and impact, and require independent research projects. May be repeated provided topic differs. Consult the Schedule of Classes for more details. Restricted to CCAS sophomores.

CHEM 2010. History of Chemistry. 2,3 Credits.

CHEM 2085. Environmental Chemistry. 3 Credits.

Chemistry and physics of the environment, with emphasis on water and air pollution; environmental analysis and modeling and their limitations.

CHEM 2118W. Practicing Science Communications. 3 Credits.

Development of science communications methods through frequent practice with instructor and peer feedback: presentations, video, policy briefings, editorial, and short review articles. Tips for different audience types, from experts to public. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

CHEM 2122. Introductory Quantitative Analysis. 3 Credits.

Theory and practice of quantitative analysis by modern methods; evaluation of analytical data emphasizing detection and correction of experimental errors. CHEM 2123 may be taken as a corequisite. Prerequisite: CHEM 1112.

CHEM 2123. Introductory Quantitative Analysis Laboratory. 1 Credit.

Laboratory complement to CHEM 2122. Laboratory fee. CHEM 2122 may be taken as a corequisite. Prerequisite: CHEM 2122.

CHEM 2123W. Introductory Quantitative Analysis Laboratory. 1 Credit.

Laboratory complement to CHEM 2122. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Laboratory fee. CHEM 2122 may be taken as a corequisite. Prerequisite: CHEM 2122.

CHEM 2151. Organic Chemistry I. 3 Credits.

Systematic treatment of the structure, preparation, properties, and reactions of the principal classes of organic compounds. Fundamental principles of stereochemistry, reaction mechanisms, and spectroscopic methods of analysis. Prerequisite: CHEM 1112.

CHEM 2152. Organic Chemistry II. 3 Credits.

Continuation of CHEM 2151. Systematic treatment of the structure, preparation, properties, and reactions of the principal classes of organic compounds. Fundamental principles of stereochemistry, reaction mechanisms, and spectroscopic methods of analysis. Prerequisite: CHEM 2151.

CHEM 2153. Organic Chemistry Laboratory I. 1 Credit.

Laboratory component of CHEM 2151. Introduction to and practice in basic skills of synthesis, separation, purification, and identification of organic compounds. CHEM 2151 may be taken as a corequisite. Laboratory fee. Prerequisite: CHEM 2151.

CHEM 2154. Organic Chemistry Laboratory II. 1 Credit.

Continuation of CHEM 2153. Laboratory component of CHEM 2152. Introduction to and practice in basic skills of synthesis, separation, purification, and identification of organic compounds. CHEM 2152 may be taken as a corequisite. Laboratory fee. Prerequisites: CHEM 2152 and CHEM 2153.

CHEM 3099. Variable Topics. 1-12 Credits.

CHEM 3140. Geochemistry. 3 Credits.

Chemical systems and processes on the planet Earth; origins and interactions among and within the Earth's lithosphere, oceans, and atmosphere; origin, distribution, and behavior of the elements; radioactive and stable isotope systems. Aqueous geochemistry; geochemical cycles. Prerequisites: GEOL 1001 or GEOL 1005; and CHEM 1111 and CHEM 1112. Same As: GEOL 3140.

CHEM 3165. Biochemistry I. 3 Credits.

Introduction to the chemistry of living cells; structure and function of proteins, lipids, carbohydrates, and nucleic acids; enzyme structure, mechanism, and regulation. Credit toward the degree cannot be earned for both CHEM 3165 and BIOC 3261 or BISC 3261. Prerequisites: CHEM 2151 and CHEM 2152. Same As: BISC 3165. Credit cannot be earned for this course and BIOC 3261, BISC 3261.

CHEM 3166. Biochemistry II. 3 Credits.

Continuation of CHEM 3165. Introduction to the chemistry of living cells; structure and function of proteins, lipids, carbohydrates, and nucleic acids; enzyme structure, mechanism, and regulation. Credit toward the degree cannot be earned for both CHEM 3166 and BIOC 3263/BISC 3263. Prerequisite: CHEM 3165.

CHEM 3166W. Biochemistry II. 3 Credits.

Continuation of CHEM 3165. Introduction to the chemistry of living cells; structure and function of proteins, lipids, carbohydrates, and nucleic acids; enzyme structure, mechanism, and regulation. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Credit toward the degree cannot be earned for both CHEM 3166W and BIOC 3263/BISC 3263. Prerequisite: CHEM 3165.

CHEM 3170. Introduction to Physical Chemistry. 3 Credits.

Thermodynamics, chemical and physical equilibria, kinetics, and spectroscopy. Examples taken from biological systems. May not be taken for credit by students who have received credit for CHEM 3171 and CHEM 3172 or an equivalent course. Restricted to non-chemistry majors. Prerequisites: CHEM 1111 and CHEM 1112; and MATH 1231; and PHYS 1012 or PHYS 1022 or PHYS 1026; or permission of the instructor. Credit cannot be earned for this course and CHEM 3171, CHEM 3172.

CHEM 3171. Physical Chemistry I. 3 Credits.

Gas laws, chemical thermodynamics, chemical equilibrium, kinetics, quantum chemistry, atomic and molecular spectra, structure of solids, liquids, and macromolecules. Prerequisites: CHEM 1112, MATH 1231 and PHYS 1022; or permission of the instructor.

CHEM 3172. Physical Chemistry II. 3 Credits.

Continuation of CHEM 3171. Gas laws, chemical thermodynamics, chemical equilibrium, kinetics, quantum chemistry, atomic and molecular spectra, structure of solids, liquids, and macromolecules. Prerequisite: CHEM 3171.

CHEM 3173. Physical Chemistry Laboratory. 2 Credits.

Laboratory complement to CHEM 3171 and CHEM 3172. Exploration of molecular structure and bonding as revealed through observation. CHEM 2123 and CHEM 3171 may be taken as a corequisite. Laboratory fee. Prerequisites: CHEM 2123 and CHEM 3171.

CHEM 3262. Biochemistry Laboratory. 2 Credits.

Study of common experimental techniques used in life science laboratories to separate and characterize biological macromolecules. Same as BIOC 3261/ BISC 3261. Prerequisite: CHEM 3165 or BIOC 3261/ BISC 3261. Laboratory fee.

CHEM 3263W. Special Topics in Biochemistry. 2 Credits.

Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

CHEM 3564. Lipid Biotechnology. 2 Credits.

Study of common experimental techniques used in life science laboratories to separate and characterize biological macromolecules. Laboratory fee. Prerequisites: BIOC 3261 or BISC 3261 or CHEM 3165. (Same as BIOC 3564).

CHEM 4113. Chemical Instrumentation. 3 Credits.

Electronic analog measurements and control of electrical quantities in chemical instrumentation; digital and analog data conversion and optimization of electronic measurements in chemical instrumentation; computer interfacing and programming using PC-based systems. Prerequisite: CHEM 3172 and CHEM 4122. Laboratory fee.

CHEM 4122. Instrumental Analytical Chemistry. 3 Credits.

Theory of instrumental methods in qualitative and quantitative analysis, determination of structure, with emphasis on atomic and molecular spectrophotometry, infrared spectroscopy, nuclear magnetic resonance, mass spectrometry, chromatography, and electroanalysis. Corequisite: CHEM 4123. CHEM 3171 may be taken as a corequisite. Prerequisites: CHEM 3171 or permission of the instructor.

CHEM 4123. Instrumental Analytical Chemistry Laboratory. 2 Credits.

Laboratory complement to CHEM 4122. CHEM 3171 and CHEM 4122 may be taken as a corequisite. Laboratory fee. Prerequisites: CHEM 3171 and CHEM 4122.

CHEM 4134. Inorganic Chemistry. 3 Credits.

Periodic trends and structure and reactivity of transitional metal complexes. Prerequisite: CHEM 2122.

CHEM 4195. Undergraduate Research. 1-3 Credits.

Research on problems approved by the staff. Approval must be obtained prior to registration. A final written report on the work is required. For students requesting Special Honors in chemistry, a poster or oral presentation is also required. May be repeated for credit. Majors are encouraged to take the course for two semesters. Laboratory fee.

CHEM 4195W. Undergraduate Research. 1-3 Credits.

Research on problems approved by the staff. Approval must be obtained prior to registration. A final written report on the work is required. For students requesting Special Honors in chemistry, a poster or oral presentation is also required. May be repeated for credit. Majors are encouraged to take the course for two semesters. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Laboratory fee.

CHEM 5099. Variable Topics. 1-99 Credits.**CHEM 6221. Spectrochemical Analysis. 3 Credits.**

Theory and application of recent spectrometric methods of analysis, including advances in optimization techniques, optical instrumentation, atomic spectrometry, laser-based analytical techniques, X-ray methods, and surface analysis techniques. Prerequisite: CHEM 4122.

CHEM 6222. Biomedical Mass Spectrometry. 3 Credits.

Principles, instrumentation, methods, and applications of mass spectrometry; selected state-of-the-art methods demonstrate basic principles to show how new methods of analysis are developed; typical applications highlight solutions of biomedical problems, including proteomics and metabolomics. Prerequisite: CHEM 4122.

CHEM 6233. Organometallic Chemistry and Catalysis. 3 Credits.

Transition metal organometallic chemistry, including structure and bonding, ligands, their reactivity and application to catalysis. Students design and synthesize organometallic complexes applicable to organic synthesis and industrial catalysis and evaluate improvement in efficiency and environmental impact. Prerequisites: CHEM 2151, CHEM 2152 and CHEM 4134. Recommended background: prior completion of college-level organic and inorganic chemistry.

CHEM 6235. Advanced Inorganic Chemistry I. 3 Credits.

Application of modern chemical theories to inorganic substances and reactions; detailed study, developed from the periodic table, of the chemistry of the more common elements; electronic spectra and reaction mechanisms of complexes; organometallic chemistry; homogeneous and heterogeneous catalysis; bioinorganic chemistry. Prerequisites: CHEM 3172 and CHEM 4134.

CHEM 6236. Advanced Inorganic Chemistry II. 3 Credits.

Continuation of CHEM 6235. Application of modern chemical theories to inorganic substances and reactions; detailed study, developed from the periodic table, of the chemistry of the more common elements; electronic spectra and reaction mechanisms of complexes; organometallic chemistry; homogeneous and heterogeneous catalysis; bioinorganic chemistry. Prerequisites: CHEM 3172 and CHEM 4134.

CHEM 6238. Chemistry of Inorganic Materials. 3 Credits.

Synthesis, structure, and properties of materials such as ceramics, superconductors, ionic conductors, nanomaterials, and magnetic, optical, and electronic materials. Emphasis on traditional and low-temperature routes. Prerequisites: CHEM 3171 and CHEM 3172.

CHEM 6251. Advanced Organic Chemistry I. 3 Credits.

Synthesis, reactions, and properties of organic compounds; fundamental theories of organic chemistry, emphasis on reaction mechanisms. Prerequisite: CHEM 2152.

CHEM 6252. Advanced Organic Chemistry II. 3 Credits.

Continuation of CHEM 6251. Synthesis, reactions, and properties of organic compounds; fundamental theories of organic chemistry, emphasis on reaction mechanisms. Prerequisite: CHEM 6251.

CHEM 6256. Medicinal Chemistry. 3 Credits.

Introduction to topics in drug design and discovery. Fundamental mechanisms of drug action, and techniques of drug design and drug development. Prerequisites: CHEM 2151 and CHEM 2152.

CHEM 6257. Physical-Organic Chemistry. 3 Credits.

The transition state theory of chemical kinetics, applications to reaction mechanisms; kinetic isotope effects, linear-free energy relationships, concentrated and "super" acids, Woodward-Hoffman rules, free radical reactions. Prerequisites: CHEM 6251 or permission of the instructor.

CHEM 6259. Polymer Chemistry. 3 Credits.

A study of the preparation, properties, and structure of macromolecules. Prerequisites: CHEM 2152 and CHEM 3170; or CHEM 3171; or permission of the instructor.

CHEM 6273. Chemical Thermodynamics. 3 Credits.

Application of thermodynamics to chemical problems. Emphasis on statistical calculation of thermodynamic properties. Prerequisite: CHEM 3172 or CHEM 6372.

CHEM 6277. Chemical Bonding. 3 Credits.

Quantum mechanics, approximate methods, electron spin, Pauli principle, atomic and molecular structure. Prerequisite: CHEM 3172 or CHEM 6372.

CHEM 6278. Molecular Spectroscopy. 3 Credits.

Applications of quantum mechanics and group theory to the interpretation of electronic, vibrational, rotational, and magnetic resonance spectroscopy. Prerequisite: CHEM 6277.

CHEM 6280. Energy and the Environment. 3 Credits.

Fundamentals of energy conversion in thermomechanical, thermochemical, electrochemical, and photoelectric processes in existing and future power and transportation systems, with emphasis on efficiency, environmental impact, and performance.

CHEM 6281. Environmental Chemistry: Air, Water, and Soil. 3 Credits.

Survey of the behavior, movement and impact of natural and man-made chemicals in all layers of the environment in the context of the atmosphere, hydrosphere, and lithosphere; the effects of acid rain, sewage treatment, ozone destruction, anthropogenic climate change, air pollution, and eutrophication.

CHEM 6282. Green Industrial Chemistry. 3 Credits.

Introduction to the basic design principles for greener chemical technologies; widely used practices, including catalysis, use of renewable starting materials, minimization of energy inputs, and use of greener solvents.

CHEM 6283. Chemical Toxicology and Rational Design of Safer Chemicals. 3 Credits.

Introduction to the basic tools and paradigms of toxicology in the context of chemical design for minimizing potential toxicity of commercial chemicals; computational methods for prediction of bioavailability, reactivity, bioaccumulation and different types of toxicity; application of in silico methods to the rational re-design of functional and safer chemicals.

CHEM 6284. Environmental Analytical Chemistry. 3 Credits.

Advanced analytical methodology for environmental assessment; analytical instrumentation, techniques for remote measurements, determination of trace atmospheric constituents of anthropogenic and natural origin, measurement uncertainty analysis, detection and identification of organic and inorganic pollutants in air, water, soil and biota, and the determination of heavy metals and radionuclides in the environment.

CHEM 6298. Capstone Seminar in Environmental and Green Chemistry. 3 Credits.

Group projects carried out with an external partner or client—such as a government agency, nonprofit group, or chemistry laboratory research project—that identify and solve real world scientific problems related to environmental and green chemistry.

CHEM 6314. Fundamental-Computational Chemistry. 3 Credits.

CHEM 6315. Computational Chem-Biomolecule. 3 Credits.

CHEM 6318. Science Communications in Practice. 3 Credits.

Communicating science beyond one's immediate peers can prove challenging. This course will provide examples and plenty of opportunities for students to develop (science) communications skills, including presenting to non-scientist audiences.

CHEM 6320. Selected Topics in Analytical Chemistry. 1-3 Credits.

Advanced topics offered in a modular format to allow an in-depth examination of a self-selected field of analytical chemistry. One to three topics may be chosen for a given semester. May be repeated for credit.

CHEM 6330. Selected Topics in Inorganic Chemistry. 1-3 Credits.

Advanced topics offered in a modular format to allow an in-depth examination of a self-selected field of inorganic chemistry. One to three topics may be chosen for a given semester. May be repeated for credit.

CHEM 6350. Selected Topics in Organic Chemistry. 1-3 Credits.

Advanced topics offered in a modular format to allow an in-depth examination of a self-selected field in organic chemistry. One to three topics may be chosen for a given semester. May be repeated for credit.

CHEM 6358. Synthesis and Structure Determination in Organic Chemistry. 3 Credits.

The design of syntheses for complex organic molecules; survey of modern synthetic methods, including asymmetric induction; spectroscopic methods of structure determination. Prerequisites: CHEM 6251 or permission of the instructor.

CHEM 6370. Selected Topics in Physical Chemistry. 1-3 Credits.

Advanced topics offered in a modular format to allow an in-depth examination of a self-selected field of physical chemistry. One to three topics may be chosen for a given semester. May be repeated for credit.

CHEM 6371. Physical Chemistry I. 1-3 Credits.

Gas laws, chemical thermodynamics, chemical equilibrium, kinetics, quantum chemistry, atomic and molecular spectra, structure of solids, liquids, and macromolecules. Students enrolled at the graduate level are expected to do additional work. Permission of the department required prior to enrollment.

CHEM 6372. Physical Chemistry II. 1-3 Credits.

Continuation of CHEM 6371. Basic concepts of quantum chemistry and molecular spectroscopy; application of modern physical chemistry theory to exploration of a wide range of physical properties for open and closed chemical systems in the gas and condensed phases. Restricted to students with permission of the department. Prerequisite: CHEM 6371. Same As: CHEM 3172.

CHEM 6390. Selected Topics in Chemistry. 3 Credits.

Advanced topics offered in a modular format to allow an in-depth examination of a self-selected field in chemistry. One to three topics may be chosen for a given semester. May be repeated for credit.

CHEM 6395. Research. 1-12 Credits.

Limited to master's degree candidates. Survey of a topic approved by departmental staff and resulting in a written report and presentation of a seminar. Open to qualified students with advanced training. May be repeated for credit.

CHEM 6998. Thesis Research. 1-9 Credits.

Limited to students in the master's degree program.

CHEM 6999. Thesis Research. 3 Credits.

Limited to students in the Master's Degree program.

CHEM 8998. Advanced Reading and Research. 1-12 Credits.

May be repeated for credit. Restricted to doctoral candidates preparing for the general examination.

CHEM 8999. Dissertation Research. 3-12 Credits.

May be repeated for credit. Restricted to doctoral candidates.

CHINESE (CHIN)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CHIN 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester; see department for more details.

CHIN 1001. Beginning Chinese I. 4 Credits.

Basic functional and communicative proficiency in Chinese. Development of listening and speaking skills, reading and writing abilities, and cultural awareness.

CHIN 1002. Beginning Chinese II. 4 Credits.

Continuation of CHIN 1001. Basic functional and communicative proficiency in Chinese. Development of listening and speaking skills, reading and writing abilities, and cultural awareness. Prerequisites: CHIN 1001 or equivalent.

CHIN 1011. Intensive Beginning Chinese. 8 Credits.

Intensive beginning course equivalent to CHIN 1001 and CHIN 1002.

CHIN 1088. E-Learning Tools for Chinese. 1 Credit.

Basic training for using computer programs, software, or web tools for Chinese word processing. Prerequisites: CHIN 1001.

CHIN 1099. Variable Topics. 1-36 Credits.

CHIN 2003. Intermediate Chinese I. 4 Credits.

Continuation of grammar, with emphasis on speaking, reading, and writing. Prerequisites: CHIN 1002 or CHIN 1011.

CHIN 2004. Intermediate Chinese II. 4 Credits.

Continuation of CHIN 2003. Continuation of grammar, with emphasis on speaking, reading, and writing. Prerequisites: CHIN 2003.

CHIN 3099. Variable Topics. 1-12 Credits.

CHIN 3105. Intermediate Chinese III. 3 Credits.

Augmentation of vocabulary, with emphasis on communicative proficiency development. Prerequisite: CHIN 2004.

CHIN 3106. Intermediate Chinese IV. 3 Credits.

Continuation of CHIN 3105. Augmentation of vocabulary, with emphasis on communicative proficiency development. Prerequisite: CHIN 3105.

CHIN 3109. Introduction to Classical Chinese I. 3 Credits.

Students explore the basic grammar and vocabulary of literary Chinese. Selections are based on the students' interests and level of proficiency, and include such genres as prose, short stories, performance texts, ci poetry and qu. Graduate students who are taking CHIN 6109 demonstrate their problem-solving and reading abilities through a 15 to 20 annotated translation at the end of the semester. Equivalent courses may be accepted for the prerequisite. Prerequisites: CHIN 2004. Same As: CHIN 6109.

CHIN 3110. Introduction to Classical Chinese II. 3 Credits.

Students explore the basic grammar and vocabulary of literary Chinese. Selections are based on the students' interests and level of proficiency, and include such genres as prose, short stories, performance texts, ci poetry and qu. Graduate students who are taking CHIN 6109 and CHIN 6110 demonstrate their problem-solving and reading abilities through a 15 to 20 annotated translation at the end of the semester. Equivalent courses may be accepted for the prerequisite. Prerequisites: CHIN 2004. Same As: CHIN 6110.

CHIN 3111. Chinese Literature in Translation I. 3 Credits.

An introductory survey of Chinese literature read in English translation, including fiction, poetry, drama, essays, diaries, testimonials. The pre-modern period. Credit cannot be earned for this course and CHIN 6111.

CHIN 3112. Chinese Literature in Translation II. 3 Credits.

Continuation of CHIN 3111. An introductory survey of Chinese literature read in English translation, including fiction, poetry, drama, essays, diaries, testimonials. The modern period. Same As: CHIN 6112.

CHIN 3116. Language Policy of China. 3 Credits.

Language policy and planning in China in the context of relations between the national language, Chinese dialects, and minority languages. Policy origins and their implementation from a sociolinguistic and historical perspective.

CHIN 3123. Introduction to Chinese Linguistics. 3 Credits.

Structure of the Chinese language. Sounds and words, sentence meaning and structure, the writing system, adaptation of foreign vocabulary, pragmatics, variation, and change. Conducted in English.

CHIN 3124. Introduction to Chinese Linguistics. 3 Credits.

Continuation of CHIN 3123. Structure of the Chinese language. Sounds and words, sentence meaning and structure, the writing system, adaptation of foreign vocabulary, pragmatics, variation, and change. Conducted in English. Prerequisites: CHIN 3123.

CHIN 3136W. Chinese Women in Myth, Literature, and Film. 3 Credits.

Women's position in Chinese cultural and political life from prehistoric myth to the present time. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Conducted in English. (Same as WGSS 3136, WGSS 3136W).

CHIN 3151. Developing Chinese Literacy. 1-2 Credits.

Provides an overview of the history and development of Chinese characters and reinforces Chinese language learning by building on vocabulary acquired during the first two years of the Chinese language curriculum. Prerequisites: CHIN 2003 or appropriate score on the placement examination. Corequisites: CHIN 2004.

CHIN 3162. Chinese Culture Through Film. 3 Credits.

Survey of the Chinese cultural heritage presented through films. Topics include literature, philosophy, art, religion, and social history from prehistorical times to the modern era. Course conducted in English.

CHIN 3163. Taiwanese Literature and Film. 3 Credits.

A introductory survey of modern and contemporary Taiwanese literary and cinematic works. Readings include poetry, folk lyrics, dramas, novels, and memoirs that bear distinctive marks of Taiwan's diverse literary trends. Films include those by internationally renowned directors such as Hou Hsiao-hsien, Ang Lee, Edward Yang, and Tsai Ming-liang. Same As: CHIN 6163.

CHIN 3171. Poetry of the Tang and Song Periods. 3 Credits.

Reading of works of leading poets. Discussion of content and style. Prerequisite: CHIN 3109. Credit cannot be earned for this course and CHIN 6171.

CHIN 3172. Poetry of the Tang and Song Periods. 3 Credits.

Continuation of CHIN 3171. Reading of works of leading poets. Discussion of content and style. Prerequisites: CHIN 3109.

CHIN 3173. Chinese Drama and Theatre. 3 Credits.

Chinese drama and theatrical genres. Topics include the relation between theatrical performance and ritual practice, gender identities, and cross-cultural exchange. Course conducted in English.

CHIN 3175W. Dream of the Red Chamber. 3 Credits.

The world of the Chinese masterwork of prose fiction, *Dream of the Red Chamber*. Class readings and exercises aim at fostering a deeper understanding of premodern Chinese value systems through artistic, as well as literary, representations. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

CHIN 3188. Confucian Religion. 3 Credits.

CHIN 3841. Religion and Politics in China. 3 Credits.

The changes, destructions, and reconstructions of Chinese religions from the late nineteenth century to the present. The relationship between the (re)making of Chinese religions and the making of a modern Chinese nation state. Same As: REL 3841.

CHIN 4107. Readings in Modern Chinese I. 3 Credits.

Readings in newspapers, social science materials, and documentary materials. Prerequisite: CHIN 3106.

CHIN 4108. Readings in Modern Chinese II. 3 Credits.

Advanced study of standard (Mandarin) Chinese with a focus on reading comprehension. Students gain reading skills through work with advanced authentic texts and exercises designed to guide comprehensions and strengthen reading strategies. Prerequisites: CHIN 3106 or equivalent.

CHIN 4119W. Business Chinese. 3 Credits.

Basics of business-related communication in both oral and written form. Integrated language skills. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: CHIN 4107 or CHIN 4121.

CHIN 4121W. Advanced Conversation and Composition I. 3 Credits.

Productive skills at the advanced discourse level, topic-specific practice of commonly used speech patterns and writing formats. Permission of the instructor is required prior to enrollment. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: CHIN 3106.

CHIN 4122W. Advanced Conversation and Composition II. 3 Credits.

Productive skills at the advanced discourse level, topic-specific practice of commonly used speech patterns and writing formats. Permission of the instructor is required prior to enrollment. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

CHIN 4179. Twentieth-Century Chinese Literature. 3 Credits.

Selected works of major twentieth-century writers, including Lu Xun, Lao She, Zhang Ailing, Bai Xianyong, and others. Lectures and discussion in Chinese. Prerequisites: CHIN 4107.

CHIN 4180W. Twentieth-Century Chinese Literature II. 3 Credits.

Continuation of CHIN 4179. Selected works of major twentieth-century writers, including Lu Xun, Lao She, Zhang Ailing, Bai Xianyong, and others. Lectures and discussion in Chinese. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisite: CHIN 4107.

CHIN 4185. Directed Reading I. 3 Credits.

Reading of material in the student's field of interest. Permission of the instructor required prior to enrollment.

CHIN 4186. Directed Reading II. 3 Credits.

Continuation of CHIN 4185. Reading of material in the student's field of interest. Permission of the instructor required prior to enrollment.

CHIN 4186W. Directed Reading II. 3 Credits.

Continuation of CHIN 4185. Reading of material in the student's field of interest. Permission of the instructor required prior to enrollment. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

CHIN 4198. Proseminar: Readings for the Major in Chinese Language and Literature. 3 Credits.

Recommended for all majors. Preparation for advanced research in Chinese sources. One-on-one tutorials, seminar meetings, and practice in consulting Chinese reference works, both traditional and modern. Literary criticism; keeping abreast of sinological scholarship. Prerequisite: CHIN 3106.

CHIN 4199. Proseminar: Readings for the Major in Chinese Language and Literature. 3 Credits.

Continuation of CHIN 4198. Recommended for all majors. Preparation for advanced research in Chinese sources. One-on-one tutorials, seminar meetings, and practice in consulting Chinese reference works, both traditional and modern. Literary criticism; keeping abreast of sinological scholarship. Prerequisite: CHIN 4198.

CHIN 4201. Special Topics in Advanced Chinese. 3 Credits.

Development of linguistic proficiency and area content knowledge regarding China and Chinese. Topics vary by semester. May be repeated for credit provided the topic differs. See the Schedule of Classes for more information. Prerequisites: CHIN 4107 or CHIN 4119W or CHIN 4121W.

CHIN 6109. Introduction to Classical Chinese I. 3 Credits.

Students explore the basic grammar and vocabulary of literary Chinese. Selections are based on the students' interests and level of proficiency, and include such genres as prose, short stories, performance texts, ci poetry and qu. Graduate students who are taking CHIN 6109 demonstrate their problem-solving and reading abilities through a 15 to 20 annotated translation at the end of the semester. Equivalent courses may be accepted for the prerequisite. Prerequisites: CHIN 2004. Same As: CHIN 3109.

CHIN 6110. Introduction to Classical Chinese II. 3 Credits.

Students explore the basic grammar and vocabulary of literary Chinese. Selections are based on the students' interests and level of proficiency, and include such genres as prose, short stories, performance texts, ci poetry and qu. Graduate students who are taking CHIN 6109 and CHIN 6110 demonstrate their problem-solving and reading abilities through a 15 to 20 annotated translation at the end of the semester. Equivalent courses may be accepted for the prerequisite. Prerequisites: CHIN 2004. Same As: CHIN 3110.

CHIN 6111. Chinese Literature in Translation. 3 Credits.

A survey of the literatures and cultures of pre-modern China, from the origin of Chinese civilization through the last imperial dynasty including the works of representative writers as well as major literary modes, such as historical documents, philosophical writings, poetry, folktale, short story, drama, and novel. Graduate students taking CHIN 6111 demonstrate their ability in conducting independent research by writing a 15 to 20 page research paper. Credit cannot be earned for this course and CHIN 3111.

CHIN 6112. Chinese Literature in Translation. 3 Credits.

A survey of the literatures and cultures of China, from late Qing (the last imperial dynasty) to contemporary China and the Chinese-speaking world. Students are introduced to works of representative writers as well as major literary genres, including fictions, poetry, dramas, and essays. Students taking CHIN 6112 develop the ability to conduct independent research on the primary text, and to evaluate the significance of the works in cross-cultural, comparative context, by writing a 15 to 20 page term paper. (Same as CHIN 3112).

CHIN 6115. Chinese Sociolinguistics. 3 Credits.

Language use in China from a sociolinguistic perspective. Standardization of Modern Chinese, multilingualism in China, language policy and planning, linguistic variation based on geography, and social stratification.

CHIN 6123. Structure of Chinese. 3 Credits.

Introduction to the structure of Chinese from the perspective of linguistic analysis; serves to prepare students for more advanced graduate level courses in Chinese linguistics. Coursework includes introductory readings, readings from the primary linguistics research literature, and hands-on problem solving, etc.

CHIN 6125. History of the Chinese Language. 3 Credits.

The methodologies and theories in Chinese historical phonology and syntax. Students read materials in the original language, e.g. Classical Chinese, Vernacular writing, and etc. Students work towards a term research paper throughout the semester on a topic of their own choice. For graduate students, there is one extra question on all of the assignments throughout the semester including the homework problem sets, midterm exams and final exam.

CHIN 6126. Chinese Phonology. 3 Credits.

The theory and practice in Chinese phonology. Students will be provided with fundamentals of articulatory phonetics (the study of how speech sounds are produced) and phonology (the study of sound systems), which they apply to the study of phonetic and phonological properties of standard Chinese. Prerequisites: CHIN 1001 or equivalent.

CHIN 6128. Chinese Semantics. 3 Credits.

The formal approaches to semantics and interface issues between semantics and syntax and phonology, with an emphasis on aspects related to Chinese, such as quantificational isomorphism, modality, focus, question semantics, adjectival semantics and etc. Graduate students taking this course will turn in a research paper by the end of the semester to demonstrate their understanding of a certain topic and ability to do independent research.

CHIN 6163. Taiwanese Literature and Film. 3 Credits.

Taiwanese literature and film in its historical, social and cultural contexts; course materials include various genres (poetry, folk lyrics, dramas, novels and memoirs) that bear distinctive marks of Taiwan's lively and diverse cultural trends. (Same as CHIN 3163).

CHIN 6171. Poetry of the Tang and Song Periods I. 3 Credits.

Examination of exemplary works of leading Tang and Song poets, including Li Bo, Du Fu, Han Shan, Du Xunhe, and Bai Juyi. Undergraduate students must have the instructor's permission to enroll. Prerequisite: CHIN 3109. Credit cannot be earned for this course and CHIN 3171.

CHIN 6172. Poetry of the Tang and Song Periods II. 3 Credits.

Continuation of CHIN 6171. Examination of exemplary works of leading Tang and Song poets, including Li Bo, Du Fu, Han Shan, Du Xunhe, and Bai Juyi. Undergraduate students must have the instructor's permission to enroll. Prerequisites: CHIN 3109.

CHIN 6173. Traditional Chinese Theatre and Drama. 3 Credits.

Traditional Chinese Theatre and Drama is a multimedia-enhanced course, which examines dramas and theatrical genres of China of pre-modern time. Students are introduced to the history of Chinese theatre, the aesthetics of theatrical performances, as well as works of representative playwrights in major dramatic genres. Students develop the ability to conduct independent research by writing a 15 to 20-page research paper on the primary text, and to evaluate the significance of the works in cross-cultural, comparative context. Permission of the instructor required prior to enrollment of undergraduate students.

CHIN 6180. Twentieth-Century Chinese Literature II. 3 Credits.

Introduction to the literature of twentieth-century China through close reading and discussion of representative literary works from the era. All readings and class discussion are in Chinese. Graduate students taking CHIN 6179 demonstrate their ability in conducting independent research by writing a 15 to 20 page research paper. Permission of the instructor required prior to enrollment of undergraduate students. Equivalent courses may be accepted for the prerequisite. Prerequisite: CHIN 4107.

CHIN 6199. Graduate Seminar. 3 Credits.

Preparation for advanced research in Chinese sources. One-on-one tutorials, seminar meetings, and practice in consulting Chinese reference works, both traditional and modern. Literary criticism; keeping abreast of sinological scholarship. Students research a selected topic in Chinese literature or philosophy, and prepare a research paper of 25 or more pages on this topic. Restricted to individualized curriculum; admission by instructor approval.

CHIN 6201. Second Language Acquisition of Mandarin Chinese. 3 Credits.

This course is an overview of, and introduction to, the theoretical foundations of second language (L2) acquisition in general and the acquisition of Chinese as a foreign language in particular. It is designed to deepen the understanding of the Chinese language from the perspective of L2 learners. Research papers focusing on the L2 acquisition of Mandarin Chinese from various perspectives, such as psycholinguistics, cognitive linguistics, pedagogical theories, are introduced in this class.

CHIN 6210. Introduction to Teaching Chinese as a Foreign Language. 3 Credits.

Gain knowledge of TCFL essentials including Chinese pedagogical grammar, instructional design, technology application, and testing and assessment. Discuss National Standards and assessment guidelines for proficiency development, and current studies of second language acquisition (SLA). Examine key issues, studies, and practices on the teaching and acquisition of difficult areas of Chinese, such as the pronunciation and writing systems, as well as topics of general interest. Explore language-teaching methodologies and techniques, and Chinese language testing and assessment. Permission of the instructor required prior to enrollment.

CHIN 6310. Practicum in Chinese Language Instruction. 3 Credits.

Develop basic skills for teaching Chinese as a foreign language (TCFL) through classroom observation, group discussion, lesson planning, syllabus writing, test designing, and supervised field experience in Chinese instruction. Gain knowledge of classroom management. Required seminar and practice sessions. Permission of the instructor required prior to enrollment. Prerequisites: CHIN 6210 or permission of the instructor.

CHIN 6550. Independent Study for Chinese Language and Culture. 1-3 Credits.

Students explore a topic of interest under the supervision of a faculty member and develop research and, in some cases, applied skills. Permission of the instructor and program director is required prior to registration.

CHIN 6841. Religion and Politics in China. 3 Credits.

Changes, destructions, and reconstructions of Chinese religions from the late nineteenth century to the present day. The relationship between the (re)making of Chinese religions and the making of a modern Chinese nation-state. (Same as CHIN 3841, REL 3841).

CIVIL ENGINEERING (CE)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CE 1010. Introduction to Civil and Environmental Engineering. 1 Credit.

An introduction to the profession of civil and environmental engineering. Field visits and laboratory exercises complement classroom instruction. (Fall).

CE 1020. Introduction to a Sustainable World. 1 Credit.

The science underlying the basic processes that gave rise to the world we live in and that maintain its viability for human life. Ecosystem-functioning environmental issues, such as greenhouse gas emission and ozone, with current efforts to resolve them. Technological innovations in the context of sustainability.

CE 1098. Variable Topics. 1-36 Credits.

CE 1099. Variable Topics. 1 Credit.

CE 2210. Engineering Computations. 3 Credits.

Numerical methods for engineering applications. Methods for solving systems of linear equations, root finding, curve fitting, and data approximation. Numerical differentiation and integration and numerical solution of differential equations. Computer applications. Prerequisites: APSC 2113 and CSCI 1121. (Spring).

CE 2220. Introduction to the Mechanics of Solids. 3 Credits.

Stress and strain, axial load problems, torsion, shear force and bending moment, pure bending of beams, shearing stresses in beams, compound stresses, analysis of plane stress and plane strain, combined stresses, deflection of beams, statically indeterminate problems, columns, energy methods. Prerequisites: APSC 2057 and APSC 2113. (Fall and spring, Every Year).

CE 2510. Environmental Sustainability. 3 Credits.

An introduction to environmental sustainability with focus on the nexus of water, energy, and climate; energy demands of water systems, water footprints of energy generation, and how the two valuable resources are limiting each other; technologies and research frontiers toward a sustainable water and energy supply.

CE 2710. Introduction to Transportation Engineering. 3 Credits.

Transportation system components; roadway traffic capacity and network performance measures; signalized and unsignalized intersections; monitoring techniques, instruments and data processing. Sustainability issues and environmental impact of transportation systems with focus on urban design, planning and regulation. Prerequisite: MATH 2233. (Spring, Every Year).

CE 3110W. Civil Engineering Materials. 2 Credits.

Mechanical properties and behavior of civil engineering materials such as metals, concrete, and fiber-reinforced polymer composites. Properties range from plastic deformations of metallic materials to crushing of confined and unconfined concrete. Basis of the strength of materials. Concepts of creep, fatigue, fracture, and crack propagation. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: CE 2220 and CHEM 1111. (Fall, Every Year).

CE 3111W. Civil Engineering Materials Lab. 1 Credit.

Measurement of stress-strain characteristics and study of failure modes in ductile steel, brittle concrete, and anisotropic composite materials. Experiments include data collection, data analysis, and interpretation and presentation of results regarding tension, compression, bending, impact, and shear properties. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. CE 3110W may be taken as a corequisite. Prerequisites: CE 3110W. (Fall).

CE 3230. Structural Theory I. 3 Credits.

Theory of statically determinate structures; stability and determinacy; influence lines and moving loads. Analysis of beams, frames, trusses, and arches. Calculation of deflections. Prerequisites: CE 2210 and CE 2220. (Fall, Every Year).

CE 3240. Structural Theory II. 3 Credits.

Theory of statically indeterminate structures using matrix methods and classical approaches such as moment distribution and slope-deflection; influence lines; energy methods. Prerequisite: CE 3230. (Spring, Every Year).

CE 3310. Reinforced Concrete Structures. 3 Credits.

Properties of concrete and reinforcement; design of flexural reinforcement, shear reinforcement; development of reinforcement; design of columns, floor slabs; ethics and professionalism in design. A design project, including the use of computer software and a detailed report, is required. CE 3240 may be taken as a corequisite. Prerequisite: CE 3240. (Fall and spring, Every Year).

CE 3520. Environmental Engineering I: Water Resources and Water Quality. 3 Credits.

Physical and chemical analyses of water quality and characteristics. Microbiology of water and pathogens. Introduction to water treatment processes involving coagulation, flocculation, filtration, and disinfection. Prerequisites: CE 3610 and CHEM 1111. (Spring, Every Year).

CE 3521. Environmental Engineering Laboratory. 1 Credit.

Laboratory experiments for physical and chemical analyses of water and wastewater. Measurement of turbidity, alkalinity, dissolved oxygen, BOD, COD, suspended solids, and optimum coagulant dose using jar tests. Corequisite: CE 3520.

CE 3610. Hydraulics. 3 Credits.

Fluid statics: pressure forces, buoyancy, and flotation. Application of kinematic principles; flow fields, stream tubes, and flow nets. Fluid dynamics: applications to pipe flow, hydraulic models, measurement of pressure, and velocity. Open channel flow: applications to water resources engineering. Prerequisites: CE 2210 and MAE 3126. (Spring, Every Year).

CE 3611. Hydraulics Laboratory. 1 Credit.

Laboratory experiments and demonstrations of hydraulics in pipe and open-channel flow. Topics include center of pressure, floating bodies, Bernoulli's theorem, discharge coefficients, velocity profile, and head losses. Prerequisite or corequisite: CE 3610.

CE 3720. Highway Engineering and Design. 3 Credits.

Road vehicle performance. Principles of highway design: horizontal and vertical alignments, roadside design; drainage and drainage structures, earthwork, intersections, interchanges, parking facilities; basic traffic models; highway materials. Application of safety standards. APSC 3115 and CE 2220 may be taken as a corequisite. Prerequisites: APSC 3115, CE 2220 and MATH 2233. (Fall and spring, Every Year).

CE 4320. Metal Structures. 3 Credits.

Principles of the design of metal structures, structural elements, connections, specific problems of analysis including the use of computer software, methods of construction, professionalism in design. Prerequisite: CE 3240.

CE 4330W. Contracts and Specifications. 3 Credits.

Law of contracts, construction contracts, specifications, bidding, insurance and bonds, professional liability, arbitration of disputes, litigation. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Restricted to juniors and seniors. (Spring, Every Year).

CE 4341. Senior Design Project I. 1 Credit.

First in a two-course sequence for the senior design project in civil and environmental engineering. Outcomes include team formation, project selection, task formulation and assignments, preliminary design validation and/or prototyping. Restricted to students in the civil engineering program with senior standing. (Fall, Every Year).

CE 4342. Senior Design Project II. 3 Credits.

Second in a two-course sequence for the senior design project in civil and environmental engineering. Application of civil and environmental engineering concepts in the design of a project that integrates the concepts and technical knowledge learned in two or more of the following disciplines: engineering mechanics, materials, environmental engineering, geotechnical engineering, structural engineering, transportation engineering, and water resources engineering. Restricted to students in the civil engineering program with senior standing. Prerequisite: CE 4341. Recommended background: Knowledge of structural analysis of indeterminate structures, reinforced concrete and structural steel design, and soil mechanics. (Spring, Every Year).

CE 4410. Introduction to Geotechnical Engineering. 3 Credits.

Soils and rock formation, soil composition, permeability, seepage and flow net analysis, stresses in soil medium, consolidation and settlement, shear strength of soil, analysis of lateral earth pressures, soil compaction. Prerequisites: CE 2220, CHEM 1111 and MAE 3126. (Fall, Every Year).

CE 4411. Geotechnical Engineering Laboratory. 1 Credit.

Laboratory experiments to evaluate liquid and plastic limits, grain-size distribution, shear strength, compressibility, permeability, and moisture-density relationship of soils. CE 4410 may be taken as a corequisite. Prerequisite: CE 4410. (Fall and spring, Every Year).

CE 4450. Introduction to Geo-environmental Engineering. 3 Credits.

Characterization of soils and wastes, engineering properties of soils and geo-synthetics, fundamental concepts of fate and transport of contaminants, common practice in design and construction of waste containment systems, current methods for remediation of contaminated groundwater and soils. Prerequisites: CE 3520 and CE 4410. (Spring, Every Year).

CE 4530. Environmental Engineering II: Water Supply and Pollution Control. 3 Credits.

Introduction to wastewater treatment systems including clarification, suspended and attached growth processes. Use of dissolved oxygen models. Water supply and wastewater collection systems, applied hydraulics of pipelines and pumps. Planning to meet quality needs and regulatory requirements. Prerequisite: CE 3520.

CE 4620. Hydrology and Hydraulic Design. 3 Credits.

Descriptive hydrology: hydrologic cycle, precipitation, stream flow, evaporation, and transpiration. Quantitative hydrology: hydrograph analysis, hydrographs of basin outflow, storage routing. Probability concepts in hydrology: flood frequency, rainfall frequency, stochastic hydrology. Culverts and stilling basins. APSC 3115 and CE 3610 may be taken as a corequisite. Prerequisites: APSC 3115 and CE 3610. (Fall and spring, Every Year).

CE 4810. Research. 1-8 Credits.

Applied research and experimentation projects, as arranged. Prerequisite: junior or senior status. (Fall and spring, Every Year).

CE 4820. Special Topics. 1-6 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

CE 5099. Variable Topics. 1-99 Credits.**CE 6101. Numerical Methods in Engineering. 3 Credits.**

Eigenvalue problems. Numerical solution of systems of equations and ordinary differential equations. Solution techniques for elliptic, parabolic, and hyperbolic partial differential equations. Numerical methods for solving finite element equations. Introduction to solution of fluid-flow problems. Prerequisite: CE 2210.

CE 6102. Application of Probability Methods in Civil Engineering. 3 Credits.

Uncertainty in real-world information; basic probability concepts and models; random variables; useful probability distributions, statistical estimation of distribution parameters from observed data; empirical determination of distribution models; testing hypothesis; regression and correlation analyses; decision theory. Prerequisite: APSC 3115.

CE 6110. Contracts and Specifications In Construction Engineering. 3 Credits.

Overview of contracts, specifications, and the legal environment for engineers; construction contracts, specifications, bidding, contract administration, bonds and securities, dispute resolution. Restricted to graduate students or with approval of the department. Recommended background: bachelor's degree in engineering, sciences, and related fields. (Fall and spring, Every Year).

CE 6111. Project Management For Construction. 3 Credits.

Principles of project management in construction industry. Elements of project management such as structural organization, planning, scheduling, communications, bidding, change orders, contractual relationship, and labor relations and related activities in construction. Restricted to graduate students or with approval of the department. Recommended background: bachelor's degree in engineering, sciences, and related fields. (Fall and spring, Every Year).

CE 6112. Construction Project Acquisition. 3 Credits.

Basic principles used in the procurement and tendering stages of projects up to delivery; construction management activities, financial activities, and cost estimating software and techniques. Restricted to graduate students or with approval of the department. Recommended background: bachelor's degree in engineering, sciences, and related fields. (Fall, Every Year).

CE 6113. Construction Contracts, Insurance, and Bonds. 3 Credits.

Common laws used in construction such as contract, tort and statutory/regulatory laws. Elements of project dispute avoidance, subcontracts, project delivery, and insurance and performance and payment bonds. Restricted to graduate students or with approval of the department. Recommended background: bachelor's degree in engineering, sciences, and related fields. (Fall and spring, Every Year).

CE 6114. Construction Methods, Materials, Equipment, and Systems. 3 Credits.

Principles of construction methods, machinery and equipment selection, and production estimation. Restricted to graduate students or with approval of the department. Recommended background: bachelor's degree in engineering, sciences, and related fields. (Fall and spring, Every Year).

CE 6115. Project Planning and Scheduling. 3 Credits.

Fundamentals of project planning and scheduling, scoping estimation risk analysis with a focus on the tools and techniques available to a project planner for mitigation of project risks. Restricted to graduate students or with approval of the department. Recommended background: bachelor's degree in engineering, sciences, and related fields. (Fall and spring, Every Year).

CE 6116. Green Building Design and Construction. 3 Credits.

Sustainability issues and green building design and delivery with a focus on development of commercial and institutional high performance green buildings; LEED ratings and accreditation. Restricted to graduate students or with approval of the department. Recommended background: bachelor's degree in engineering, sciences, and related fields. (Fall and spring, Every Year).

CE 6117. Construction Finance and Engineering Economics. 3 Credits.

Fundamentals of financing construction projects. Commonly used business models, life cycle cost analysis, and software tools for construction project cost control. Restricted to graduate students or with approval of the department. Recommended background: bachelor's degree in engineering, sciences, and related fields. (Fall and spring, Every Year).

CE 6118. Advanced Construction and Computer-Aided Design. 3 Credits.

Integration of construction techniques and computer-aided design; building information modeling and other technologies in various phases of construction management. Restricted to graduate students or with approval of the department. Recommended background: bachelor's degree in engineering, sciences, and related fields. (Fall, Every Year).

CE 6119. Construction Safety And Quality Control. 3 Credits.

Principles and importance of construction quality assurance and contractor quality control. Quality control methods to assess design activities in design-build contracts. Overview of hazardous situations that may arise in the construction jobsite and methods for mitigation these dangerous situations. Restricted to graduate students or with approval of the department. Recommended background: bachelor's degree in engineering, sciences, and related fields. (Fall and spring, Every Year).

CE 6121. Construction Project Control. 3 Credits.

Basic principles of scope, cost, schedule, risk, and quality management; the organization of construction firms at the general corporate level and the project level, flow of information between parties in the project, scheduling software. Restricted to graduate students or with approval of the department. Recommended background: bachelor's degree in engineering, sciences, and related fields. (Fall and spring, Every Year).

CE 6201. Advanced Strength of Materials. 3 Credits.

Deflection of beams using singular functions, unsymmetrical bending of beams, beams on elastic foundation. Beam-column problems, shear center for thin-walled beam cross sections, curved beams. Applications of energy methods, torsion, basic equations for theory of elasticity, thin- and thick-walled cylinders, stress concentration, and failure criteria. Prerequisites: CE 2220 and CE 3240. (Spring, Every Year).

CE 6202. Methods of Structural Analysis. 3 Credits.

Theory and applications of modern methods of structural analysis, direct stiffness approach, energy and variational methods, elastoplastic analysis of frames, P-delta effects, application of commonly available structural analysis software. Prerequisites: CE 2220 and CE 3240. (Fall, Every Year).

CE 6203. Reliability Analysis of Engineering Structures. 3 Credits.

Probability theory, theory of structural reliability, probabilistic analysis of strength and loads, risk and reliability function, empirical distribution, probability plot. The design service life, method of perturbation, Monte Carlo simulation. Fatigue and fracture, proof testing, inspection and repair-replacement maintenance. Prerequisite: APSC 3115.

CE 6204. Analysis of Plates and Shells. 3 Credits.

Bending and stretching of thin elastic plates under loading with various boundary conditions, continuous plates and plates on elastic foundations, theory of folded-plate structures. Theory of curved surfaces; general linear bending theory and its simplification to membrane theory; bending stresses in shells of revolution, shallow-shell theory. Prerequisites: CE 2220 and CE 3240. (Spring, odd years).

CE 6205. Theory of Structural Stability. 3 Credits.

General criteria for stability, buckling of elastic and inelastic columns and frames, torsional and lateral buckling, variational methods. Buckling of plates and shells under static loads, stability of stiffened structures, effect of imperfections and boundary conditions. Prerequisites: CE 2220 and CE 3240. (Fall, Every Year).

CE 6206. Continuum Mechanics. 3 Credits.

Introduction to the mechanics of continuous media. Tensor calculus; kinematics; stress and stress rate, conservation of mass, conservation of linear and angular momentum, energy balance, second law of thermodynamics; constitutive theory; linear and nonlinear elasticity, newtonian fluids, micropolar elasticity. Prerequisites: CE 2220. (Fall, spring, and summer, even years).

CE 6207. Theory of Elasticity I. 3 Credits.

Introduction to Cartesian tensors; deformation, stress, constitutive relations for linear elasticity; formulation of boundary value problems, variational principles, torsion and bending of prismatic rods, plane problems. Prerequisites: CE 2220. (Same as MAE 6207) (Spring).

CE 6208. Plasticity. 3 Credits.

Introduction to the continuum theory of plastic deformation. Physical basis of rate-independent plasticity. Concepts of yield, strain hardening and softening, reverse yield, and cyclic plasticity. Constitutive equations describing plastic deformation. Prerequisite: CE 6201 or CE 6206.

CE 6209. Mechanics of Composite Materials. 3 Credits.

Stress-strain relationship for orthotropic materials, invariant properties of an orthotropic lamina, biaxial strength theory for an orthotropic lamina. Mechanics of materials approach to stiffness, elasticity approach to stiffness. Classical lamination theory, strength of laminates. Statistical theory of fatigue damage. Prerequisite: CE 3240. (Spring, even years).

CE 6210. Introduction to Finite Element Analysis. 3 Credits.

Calculus of variations. Variational formulation of the finite element method. Weighted residual techniques. Computer implementation of the finite element method. Application to problems in heat transfer, stress analysis, fluid flow, and structural analysis. Prerequisites: Proficiency in one computer language; and CE 2220 and CE 3240. (Fall, Every Year).

CE 6301. Design of Reinforced Concrete Structures. 3 Credits.

Structural behavior of reinforced concrete structures, ultimate strength and deformation characteristics; design of structural components including beams, columns, floor slabs, deep beams, corbels, and composite slab/beam systems. Prerequisite: CE 3310.

CE 6302. Prestressed Concrete Structures. 3 Credits.

Structural behavior and failure modes of prestressed concrete structures; design in prestressed concrete, including long-span structures, bridges, and precast systems. Prerequisite: CE 3310.

CE 6310. Advanced Reinforced Concrete Structures. 3 Credits.

Conception, analysis, and design of low-rise and high-rise buildings by ultimate-strength methods, precast systems, progressive collapse, earthquake considerations, domes, folded plates, shell-type structures, and special topics. Prerequisite: CE 6301.

CE 6311. Bridge Design. 3 Credits.

Application of basic design procedures for reinforced and prestressed concrete bridges, according to AASHTO bridge specifications. Various types of concrete bridges, design superstructure bridge elements (deck slab, girders, bearing pads), and development of superstructure/substructure details. Prerequisite: CE 6302.

CE 6320. Design of Metal Structures. 3 Credits.

Structural behavior of metal structures and composite girders. Conception, analysis, and design of low-rise and high-rise buildings by elastic and inelastic methods. Earthquake considerations and special topics. Prerequisite: CE 4320.

CE 6321. Advanced Metal Structures. 3 Credits.

Conception and design of advanced structural components and systems, hysteretic behavior, plastic design principles, box-type girders, cable systems, and unique structural systems. Prerequisite: CE 6320. (As arranged).

CE 6340. Structural Dynamics. 3 Credits.

Vibration of continuous systems: membranes, beam plates, and shells; approximate methods of vibration analysis; methods of integral transform; analysis of nonlinear systems; wave propagation. Prerequisites: APSC 2058 and CE 3240. (Fall, odd years).

CE 6341. Random Vibration of Structures. 3 Credits.

Introduction to random processes, responses of linear structures to stationary and nonstationary random inputs. Structural responses to earthquakes, waves, boundary-layer turbulences, wind loads, etc. Failure analysis of structures under random loads. Prerequisites: APSC 3115 and CE 6340. (Spring, even years).

CE 6342. Structural Design to Resist Natural Hazards. 3 Credits.

Prediction of forces due to earthquakes and strong winds; generalized codes; pseudostatic methods for preliminary design; codes based on spectra, energy absorption and ductility; influence of foundations; ground failures; static and aeroelastic effects of strong winds. Design project. Prerequisites: CE 3240 and CE 4340; and CE 6340 or CE 6701. (Spring, Every Year).

CE 6350. Introduction to Biomechanics. 3 Credits.

Fundamentals of continuum mechanics as they apply to biological materials: concepts of stress, strain, and equilibrium; elastic and viscoelastic properties of solids; physiological fluid mechanics and bioheat and mass transfer. Fundamentals of solid mechanics of soft tissues and bone structures. Development of computer models and applications. Prerequisite: CE 2220. (Fall, Every Year).

CE 6401. Fundamentals of Soil Behavior. 3 Credits.

Soil mineralogy, clay-water-electrolyte systems, soil composition, fabric, structure, volume change behavior, permeability, coupled phenomena, in-situ evaluation of soil behavior. Prerequisite: CE 4410. (Fall, even years).

CE 6402. Theoretical Geomechanics. 3 Credits.

Porous media, stress-strain behavior of soil skeleton, elastic and elastoplastic models for soil behavior, critical state concept, cam clay, strength of soils, stress-dilatancy, stress paths. (Fall, odd years).

CE 6403. Foundation Engineering. 3 Credits.

Principles of soil mechanics applied to the analysis and design of mat foundations, pile foundations, retaining structures including sheeting and bracing systems, and waterfront structures. Foundations on difficult soils and reinforced earth structures. Prerequisite: CE 4410. (Spring, Every Year).

CE 6404. Geotechnical Earthquake Engineering. 3 Credits.

Ground motion, wave propagation, foundation isolation, site response analysis, seismic stability of retaining structures, soil structure interaction. Prerequisite: graduate standing.

CE 6405. Rock Engineering. 3 Credits.

Classification and properties of rock; nature of rock masses and rock discontinuities; field exploration; methods of excavation; design and applications to foundation slopes, tunnels, and chambers in rock. Prerequisite: CE 4410.

CE 6501. Environmental Chemistry. 3 Credits.

Principles of thermodynamics and kinetics, acid-base chemistry, alkalinity, coordination chemistry, precipitation, adsorption, redox chemistry. Prerequisites: CHEM 1111 and CHEM 1112. (Fall, Every Year).

CE 6502. Advanced Sanitary Engineering Design. 3 Credits.

Elements of design, including basic parameters and hydraulic requirements; layout and design of water supply and wastewater systems, pumping stations, and treatment plants; plant expansions and modifications. Prerequisite: CE 4530. (Spring, Every Year).

CE 6503. Principles of Environmental Engineering. 3 Credits.

Principles of chemical equilibrium and reaction kinetics, acid-base and redox reactions, chemical transport, and reactors. Reactor design of ozone contactor, air stripping tower, activated carbon adsorption, and membrane filtration by the principle of mass balance. Prerequisite: CE 3520. (Fall, Every Year).

CE 6504. Water and Wastewater Treatment Processes. 3 Credits.

Theory and application of commonly used processes. Sedimentation, coagulation, filtration, disinfection, gas transfer, activated sludge, trickling filters, oxidation ponds, sorption, and sludge stabilization and disposal. Process combinations to produce treatment systems. Nanotechnology and water reuse systems. Prerequisite: CE 3520. (Spring, Every Year).

CE 6505. Environmental Impact Assessment. 3 Credits.

Public policy and legislation on environmental quality. Methods for assessing impacts of engineering projects. Technology for assessing impacts on air, water, and land environments, applied to transportation facilities, water and wastewater facilities, industrial and community development. Prerequisites: CE 3520. (Fall).

CE 6506. Microbiology for Environmental Engineers. 3 Credits.

Principles of microbiology and their applications to biological processes in the natural environment and engineered systems. Engineering applications, principles of biochemistry and microbiology of drinking water quality, waste and wastewater treatment, and bioremediation. Prerequisite: CE 3520. (Spring, even years).

CE 6507. Advanced Treatment Processes. 3 Credits.

Principles and applications of advanced treatment systems for water, waste-water, and hazardous wastes, including: biological nutrient removal, oxidation-reduction processes, stripping, sorption, membrane processes, chemical precipitation, others. Prerequisite: CE 6504. (Fall and spring, Every Year).

CE 6508. Industrial Waste Treatment. 3 Credits.

Types of industries, waste sources. Characteristics, measurements, and evaluation. Minimization and reuse. Treatment process selection, development, and design. Regulations, permits, standards, monitoring, and pretreatment. (Fall, Every Year).

CE 6509. Introduction to Hazardous Wastes. 3 Credits.

Regulations, including RCRA and Superfund; transport and fate of hazardous substances; elements of environmental toxicology, risk assessment, and hazard ranking; monitoring, data collection, and evaluation; waste minimization. Prerequisite: CE 3520. (Spring, Every Year).

CE 6601. Open Channel Flow. 3 Credits.

Types and regimes of flow; energy and momentum principles, uniform flow, gradually varied flow, spatially and rapidly varied flow. Flow in nonprismatic channels. Unsteady flow; dam break problem, flood routing. Prerequisite: CE 3610.

CE 6602. Hydraulic Engineering. 3 Credits.

Hydraulic design of conveyance, regulating, and measurement structures. Design for spillways, energy dissipators, inlet and outlet works related to dams. Forces on hydraulic structure and stability analysis. Hydraulic turbines and pumps. Design considerations for flow through pipes. Transients and cavitation. Prerequisite: CE 3610.

CE 6603. Design of Dams. 3 Credits.

Project planning and investigations. Types of dams; design of earth-rock fill dams; stability analysis, foundation treatment, wind-wave protection. Construction methods for dams. Reservoir sedimentation. Safety inspection of dams. Prerequisite: CE 3610.

CE 6604. Advanced Hydrology. 3 Credits.

Precipitation, evaporation, and transpiration. Soil physics; stream flow, drainage basins, hydrograph analysis, and stream-flow routing. Design criteria, flood frequency statistics and analysis, flood forecasting and control, water supply forecasting. Prerequisite: CE 4620.

CE 6605. Ground Water and Seepage. 3 Credits.

Permeability theory of groundwater flow, flow nets, analogs, computer solutions; applications to engineering problems such as excavation dewatering, flow through dams, stabilization of earth slopes. Prerequisites: CE 4410. (Spring).

CE 6606. Mechanics of Water Waves. 3 Credits.

Irrrotational theory for deep- and shallow-water waves, reflexion, refraction, diffraction, attenuation. Water waves of finite amplitude: shallow-water theory, tides, bores, long-waves theory, conoidal and solitary waves. Wave generation by wind. Wave breaking and reflexion. Prerequisites: APSC 6213 and permission of the instructor. (Fall and spring, Every Year).

CE 6607. Water Resources Planning and Control. 3 Credits.

The parameters of water resources planning and control, economics of water resources and related natural resources, economics of water-quality control, physical parameters of water resource development, water resources law. Prerequisite: CE 4410. (Fall and spring, Every Year).

CE 6608. Hydraulic Modeling. 3 Credits.

Dimensional analysis and similitude. Types of models—physical, mathematical. Distortions in physical models. Erodible bed models. Prerequisite: CE 3610.

CE 6609. Numerical Methods in Environmental and Water Resources. 3 Credits.

Use of microcomputers in water resources. Elements of finite difference schemes, basic operations, convergence, stability, and consistency. Nonuniform flow and error analysis; unsteady laminar flow; diffusion problems; unsteady flow in open channels; water hammer, seepage flow, and diffusion-dispersion problems. Prerequisites: CE 2210 and MAE 3126. (Spring, Every Year).

CE 6610. Pollution Transport Systems. 3 Credits.

Distribution of pollutants in natural waters and atmosphere, diffusive and advective transport, mathematics for stream pollutant deoxygenation rates, groundwater pollution transport, sediment transport, thermal transport, numerical simulation of pollutant transports in streams and estuaries. Prerequisites: CE 3610 and MAE 2131. (Fall and spring, Every Year).

CE 6701. Analytical Mechanics. 3 Credits.

Fundamental principles, particle and rigid-body dynamics, generalized coordinates, variational principles and Lagrange's equations, nonholonomic systems, Hamilton's equations, theory of small oscillations. Prerequisites: APSC 2058 and APSC 2113. (Fall, Every Year).

CE 6702. Vehicle Dynamics. 3 Credits.

Engineering principles and analytical methods explaining the performance of an automotive vehicle. Basic mechanics governing vehicle dynamic performance in longitudinal, ride, and handling modes. Engineering analysis techniques applied to basic systems and subsystems to derive the governing equations. CE 6701 may be taken as a corequisite. Prerequisite: CE 6701. (Spring, even years).

CE 6705. Nonlinear Finite Element Modeling and Simulation. 3 Credits.

Rigid and flexible body methods for modeling crashes. Application of dynamic nonlinear finite element methods with contact algorithms for modeling crash phenomena. Modeling and simulation of vehicles, airbags, safety restraining systems, and highway barriers. (Spring).

CE 6706. Pavement and Runway Design. 3 Credits.

Pavement types, wheel-load characteristics; stresses in pavements and subgrades; empirical methods of design of flexible and rigid highway and airfield pavements; general principles of runway design. (Spring, odd years).

CE 6707. Systems Dynamics Modeling and Control. 3 Credits.

Introduction of concepts in control theory and applications to solve problems in civil and transportation engineering dealing with single-input/single-output and multi-input/multi-output systems. Review of classical control theory in the frequency and time domain, state-space analysis, system optimization, and non-linear control. (Fall).

CE 6721. Traffic Engineering and Highway Safety. 3 Credits.

Roadway traffic capacity and network performance measures; steady and unsteady traffic flow phenomena; traffic control signalization theory and practical implementation; monitoring techniques, instruments, and data processing for highway safety. Traffic related highway safety design concepts. (Fall).

CE 6722. Intelligent Transportation Systems. 3 Credits.

Commands, controls, and communications in modern multimodal transportation; infrastructure/highway and vehicle automation, advanced traffic management, vehicle control and safety systems; information, data, and sensory requirements; practical applications and projects. Prerequisites: CE 2710 or CE 3720. Recommended background: Basic knowledge of transportation engineering. (Spring, Every Year).

CE 6730. Sustainable Urban Planning. 3 Credits.

Human and physical processes shaping urban ecologies and environments; human-environment interactions in the context of an urban region; urban land use, transport, and planning. Departmental approval is required prior to enrollment. Prerequisites: CE 2710. (As arranged, Every Year).

CE 6800. Special Topics. 1-6 Credits.

Topic to be announced in the Schedule of Classes.

CE 6801. Civil and Environmental Engineering Graduate Internship. 1 Credit.

May be repeated once for credit. Additional prerequisites may be required for a specific internship as determined by the research supervisor. Restricted to graduate students in the civil and environmental engineering program. Prerequisites: Required courses in the area of focus and permission of the department. (Fall and spring, Every Year).

CE 6808. Research. 1-12 Credits.

Basic research projects, as arranged. May be repeated for credit.

CE 6998. Thesis Research. 3 Credits.**CE 6999. Thesis Research. 3 Credits.****CE 8320. Theory of Elasticity II. 3 Credits.**

Application of integral transform and analytic function theory to solution of plane problems; elastic wave propagation. Three-dimensional elasto-statics. Prerequisites: APSC 6211 and CE 6207. (Spring, Every Year).

CE 8321. Nonlinear Mechanics of Continua. 3 Credits.

Polar decomposition, invariance, isotropy, representation theorems for invariants and isotropic tensor functions. Deformation, kinematics, stress, balance principles. Principles for constitutive relations. Applications to nonlinear elasticity and non-Newtonian fluids. Prerequisite: CE 6206.

CE 8330. Advanced Finite Element Analysis. 3 Credits.

Review of variational formulation of the finite element method. Formulation of various continuum and structural elements. Application to static and dynamic problems in elasticity, plasticity, large deflection, and instability in plates and shells. Recent developments in finite element methods. Prerequisites: CE 6206 and 6210; or MAE 6210 and MAE 6286. (Same as MAE 6288) (Fall and spring, Every Year).

CE 8350. Sedimentation Engineering. 3 Credits.

Problems of erosion and sedimentation. Properties of sediment. Initiation of motion. Suspension of sediment and sediment discharge theories. Sedimentation measurements. Economic and legal aspects. Prerequisites: CE 6601 or permission of the department. (Fall and spring, Every Year).

CE 8351. Mechanics of Alluvial Channels. 3 Credits.

Physical processes in drainage basins and channels. Channel forms and bed forms. Hydraulics and sediment transport in alluvial channels. Design of stable channels. Qualitative and quantitative response of rivers. Channel stabilization, navigation channels. Case studies including environmental impacts. Prerequisites: CE 6601 or permission of the department. (Fall and spring, Every Year).

CE 8352. Advanced Hydraulics. 3 Credits.

Theory of unsteady flow. Diffusion and dispersion through pipes and open channels. Numerical solutions using finite element and finite difference methods. Prerequisites: CE 6601 or permission of the department. (Fall and spring, Every Year).

CE 8370. Intelligent Systems Theory and Applications. 3 Credits.

Overview of artificial intelligence, neural networks, genetic algorithms, fuzzy systems, and hybrid intelligent systems and their integration with other information processing methods. Intelligent systems applications; examples are drawn from ITS and traffic engineering, vehicle safety, remote sensing, and structural design optimization. Prerequisite: CE 6707.

CE 8380. Advanced Biomechanics. 3 Credits.

Historical overview of biomechanics and biomaterials. Fundamental concepts in mechanics as applied to the treatment of biological systems. Approaches to the mechanical analysis of the human structure under physiological and non-physiological loading conditions. Constitutive laws for biological materials. Finite element applications. Prerequisite: CE 6206. (Fall and spring, Every Year).

CE 8998. Advanced Reading and Research. 1-12 Credits.

Doctoral candidates preparing for qualifying examination. (Fall and spring, Every Year).

CE 8999. Dissertation Research. 1-12 Credits.

Doctoral candidate research. Restricted to doctoral candidates. (Fall and spring, Every Year).

CLASSICAL STUDIES (CLAS)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CLAS 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester; see department for more details.

CLAS 1001. Ancient Mediterranean Civilizations. 3 Credits.

Overview and brief introduction to the civilizations of the ancient Mediterranean world ca. 6000 BCE through ca. 476 CE. Aspects of the political, social, cultural, economic, diplomatic, military, artistic, and religious history of the ancient Near East, Egypt, Israel, Greece, and Rome. Restricted to freshmen.

CLAS 1099. Variable Topics. 1-36 Credits.**CLAS 2104. Ancient Medicine and Modern Medical Terms. 3 Credits.**

The formation of medical terms derived from Greek and Latin, along with principles that govern the derivation of their meaning. The course includes a survey of ancient medical centers and practices.

CLAS 2105. Special Topics. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details.

CLAS 2105W. Special Topics. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

CLAS 2106. Mythology of the Classical World. 3 Credits.

The creation of the world, the nature of the gods, and the adventures of heroes as described in various Greek and Roman literary sources (e.g., epic, drama, hymns) and as shown in ancient art.

CLAS 2106W. Mythology of the Classical World. 3 Credits.

The creation of the world, the nature of the gods, and the adventures of heroes as described in various Greek and Roman literary sources (e.g., epic, drama, hymns) and as shown in ancient art. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

CLAS 2107. Greek and Roman Drama. 3 Credits.

Study of Greek and Roman tragedy and comedy; the nature and setting of dramatic performance in classical antiquity.

CLAS 2112. History of Ancient Greece. 3 Credits.

A political and social survey of Bronze Age Minoan and Mycenaean civilizations, the Iron Age, Archaic Period, Classical Greece through Alexander the Great. (Same as HIST 2112).

CLAS 2113. The Roman World to 337 A.D.. 3 Credits.

Prehistoric Italy; rise and decline of the Roman Empire and Latin civilization; cultural, social, and political developments in the Greek world under Roman rule. Same as HIST 2113.

CLAS 2114. Sport and Society in Ancient Greece. 3 Credits.

Understanding the place of ancient Greek athletics and sports in their civilization leads to the religious, political, and economic contexts of athletics. Issues of class, gender, nationalism, and ethnicity. Credit cannot be earned for this course and HIST 2114.

CLAS 2802. Gods and Goddesses of the Ancient Near East. 3 Credits.

Focus on texts from ancient Mesopotamia, Egypt, Syria, Phoenicia, Israel, and the Hittites. Readings from primary sources translated into English as well as secondary literature.

CLAS 2803. The Ancient Near East and Egypt to 322 B.C.. 3 Credits.

Survey of Egyptian, Mesopotamian, Anatolian, West Semitic, and Iranian civilizations from the Neolithic period to Alexander's conquest. Credit cannot be earned for this course and HIST 2803.

CLAS 2804. History of Ancient Israel. 3 Credits.

The history of ancient Israel from the Patriarchs through the Romans. Topics include historical, archeological, political, social, cultural, religious, diplomatic, military, economic, and intellectual events, movements, and relationships. Same as HIST 2804.

CLAS 3099. Variable Topics. 1-12 Credits.

CLAS 3104. Dead Sea Scrolls. 3 Credits.

Manuscript discoveries and excavations at Khirbet Qumran with some attention to additional sites in the region of the Dead Sea. Focus on the history and diversity of Second Temple Judaism, Second Temple hermeneutical methods, Jewish apocalypticism, Jewish messianism, the development of the canon, and textual criticism of the Hebrew Bible.

CLAS 3105. Topics in Classical Studies. 3 Credits.

CLAS 3107. Law and Diplomacy in the Ancient Near East and Mediterranean. 3 Credits.

Focus on texts from ancient Mesopotamia, Egypt, Syria, Phoenicia, Israel and Judah, and the Hittites, as well as Moab and Ammon. Readings from primary sources translated into English as well as secondary literature.

CLAS 3111. Topics in Ancient History. 3 Credits.

May be repeated for credit provided the topic differs. Same as HIST 3111.

CLAS 3112. Art and Archaeology of Pompeii. 3 Credits.

Introduction to the Roman world and Roman daily life through study of evidence found in the exceptionally well-preserved ancient town of Pompeii.

CLAS 3113. Greece and Rome in the Art and Architecture of Washington D.C.. 3 Credits.

The influences of Classical Greek and Roman architecture, design, and symbols on urban design, public architecture, and civic sculpture in late eighteenth, nineteenth, and early twentieth century Washington, D.C. within their historical, political, and cultural contexts. At least one third of this course involves field trips, including walking tours and visits to monuments and museums.

CLAS 3114. Topics in Ancient Literatures and Cultures. 3 Credits.

May be repeated for credit provided the topic differs.

CLAS 3115. Topics in Ancient Art and Archaeology. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details.

CLAS 3116. Identity in the Greco-Roman World. 3 Credits.

Questions of identity surrounding the Romans and non-Romans who populated the ancient Mediterranean world in classical antiquity and whose culture is considered the cornerstone of Western civilization.

CLAS 3117. Alexander The Great. 3 Credits.

Close reading of ancient primary sources reveals the complex personality and remarkable deeds of Alexander the Great (356-323 BCE); the nature of Alexander's military success, lasting effects of his conquests, and long-term impact on the varied people and lands of his empire. Prerequisites: AH 3101 or HIST 2112. (Same as HIST 3117).

CLAS 3119. The Ancient Economy. 3 Credits.

This course introduces students to the sources and approaches to the study of the economic history of ancient Greece and Rome. Key issues that we will explore in this course include the "ecologies" of the Mediterranean region, trade and transport, the invention of coinage and monetization, taxation, food production, consumption, and slavery.

CLAS 3901. Directed Project. 1-3 Credits.

Individual advanced reading or research, to be arranged with a member of the faculty. May be repeated for credit. Permission of the instructor and the department required prior to enrollment.

CLAS 3901W. Directed Project. 1-3 Credits.

CLAS 4111. Capstone Study. 3 Credits.

The capstone study seminar enables junior or senior majors to design, in consultation with a Classical Studies faculty member, a culminating project aligned with their interests, previous curricular experience, and/or future goals. The results of a student's capstone study is submitted as a written report and shared with all Classical Studies majors in a presentation that might include written, oral, and/or digital formats. Capstone studies should demonstrate that a student can locate and evaluate information about the ancient world in both traditional and digital forms and present their findings clearly and logically. Restricted to juniors or seniors in the classical studies program.

CLAS 4901. Directed Project. 1-3 Credits.

Continuation of CLAS 3901. Individual advanced reading or research, to be arranged with a member of the faculty. May be repeated for credit. Permission of the instructor and the department required prior to enrollment.

CLAS 5099. Variable Topics. 1-99 Credits.

CLINICAL EMBRYOLOGY AND REPRODUCTIVE TECHNOLOGY (CERT)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses

- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CERT 3004. Endocrinology for Health Sciences. 3 Credits.

How hormones control the flow of information between different cells and tissues with an emphasis on the human reproductive system; classes of hormones, sources and synthesis of hormones, receptors and target tissues, mechanisms of action and regulation, and methods used in endocrinology. Prerequisites: BISC 1111.

CERT 3005. Topics in Biomedical Science. 1 Credit.

Topics vary by semester. May be repeated for credit provided topic differs. See Schedule of Classes for more details. Prerequisites: BISC 1111 or BISC 1112.

CERT 4010. Clinical Human Embryology. 3 Credits.

Physiology of the female reproductive system; gamete biology, fertilization and early embryo development; embryo culture techniques, intracytoplasmic sperm Injection (ICSI), and embryo selection and transfer. Proctor fee. Prerequisites: BISC 1111.

CERT 4011. Human Embryology Laboratory. 1 Credit.

Techniques used in the clinical embryology laboratory, including embryo culture, oocyte retrievals, selection and egg denudation, sperm preparations for in vitro fertilization (IVF), and intracytoplasmic sperm injection (ICSI) procedures. CERT 4010 may be taken as a corequisite. Laboratory fee. Prerequisites: CERT 4010.

CERT 4012. Clinical Human Andrology. 3 Credits.

The physiology of the male reproductive system; sperm anatomy and motility, seminal plasma, and male gamete biology. Proctor fee. Prerequisites: BISC 1111.

CERT 4013. Human Andrology Laboratory. 1 Credit.

Techniques used to analyze semen for assisted reproduction procedure; sperm morphology, motility and vitality, sperm preparation, and chromatin assessment. CERT 4012 may be taken as a corequisite. Laboratory fee. Prerequisites: CERT 4012.

CERT 4014. Human Reproductive Cryobiology. 3 Credits.

Theory and methods used to freeze sperm, testicular tissues and embryos for use during in vitro fertilization procedures. Cryo-injuries and vitrification solutions. Proctor fee. Prerequisites: BISC 1111.

CERT 4015. Human Cryobiology Laboratory. 1 Credit.

Freezing techniques for assisted reproductive technologies; sperm and embryo freezing, embryo stage vitrification, blastocyst slow freezing, and testicular sperm freezing. CERT 4014 may be taken as a corequisite. Laboratory fee. Prerequisites: CERT 4014.

CERT 4016. Preimplantation Genetic Diagnosis Laboratory. 1 Credit.

The role of preimplantation genetics procedures for use in reproductive medicine; embryo biopsies at different developmental stages and trophectoderm cell biopsy at the blastocyst stage. MLS 4171 may be taken as a corequisite. Laboratory fee. Prerequisites: MLS 4171.

CERT 4017. Clinical Experience in Embryology. 3 Credits.

Application of embryology techniques in a clinical assisted reproductive technology (ART) laboratory facility. Proctor fee. Prerequisites: MLS 4010 and MLS 4011.

CERT 4018. Clinical Experience in Andrology. 3 Credits.

Application of andrology techniques in a clinical assisted reproductive technology (ART) laboratory facility. Proctor fee. Prerequisites: MLS 4012 and MLS 4013.

CERT 4019. Clinical Experience in Cryobiology. 3 Credits.

Application of cryobiology techniques in a clinical assisted reproductive technology (ART) laboratory facility. Proctor fee. Prerequisites: MLS 4014 and MLS 4015.

CERT 4020. Clinical Experience in Preimplantation Genetic Diagnosis. 3 Credits.

Application of preimplantation genetic diagnosis techniques in a clinical assisted reproductive technology (ART) laboratory facility. Proctor fee. Prerequisites: MLS 4016 and MLS 4171.

CLINICAL MANAGEMENT AND LEADERSHIP (CML)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CML 2140. Management of Human Resources in Health Sciences Organizations. 3 Credits.

Builds on concepts introduced in HSci 104. Theory and application of management and leadership as they affect the management of human resources in health sciences organizations. Focus is on leadership, ethics, and organizational dynamics in a changing health care environment.

CML 2141. Planning and Marketing in Health Sciences. 3 Credits.

The role of planning and marketing in the management and promotion of health sciences services, products, and organizations. Focus on the theory and application of quality principles in assessment of on-going organizational effectiveness, concepts and techniques of project planning, and methods for identifying and addressing customer needs.

CML 2142. Financial Management in the Health Sciences. 3 Credits.

An overview of accounting and financial concepts for management of health sciences organizations. Budgeting, cash management, reimbursement guidelines, and financial management.

CML 2143. Current Issues in Health Sciences Management. 3 Credits.

Evaluation of major problem areas in the management of health sciences organizations. Discussions include legal, technological, managerial, organizational, and leadership issues in the changing health care environment.

CML 4144. Seminar in Health Science Leadership. 3 Credits.

CML 5099. Variable Topics. 1-99 Credits.

CML 6020. Fundamentals of Correctional Health Care. 3 Credits.

General overview of the U.S. criminal justice system; the legal framework underpinning correctional health care; defining elements of the correctional standard of health care; and ethical dilemmas facing the correctional health care administrator. Restricted to students in the graduate certificate in correctional health administration program or with the permission of the instructor.

CML 6021. Correctional Health Care Administration for Special Populations. 3 Credits.

Health care policy and programmatic requirements for managing incarcerated populations with special health care needs, including women, juveniles, detainees, sexual minorities, the elderly, disabled persons, and persons with serious mental illness (SMI) and chronic addiction. Restricted to students in the graduate certificate in correctional health administration program or with the permission of the instructor.

CML 6023. Correctional Health Care Fiscal Management. 3 Credits.

Essential fiscal management responsibilities of the correctional health care administrator; cost efficient health care staffing, budgeting and inventory management, contract development and oversight, cost containment strategies, and the effective use of financial metrics. Restricted to students in the graduate certificate in correctional health administration program or with the permission of the instructor.

CML 6025. Correctional Health Care Oversight. 3 Credits.

Essential policy and programmatic requirements that ensure effective oversight of a correctional health care program; health care governance, quality improvement, infection prevention and control, and risk management. Restricted to students in the graduate certificate in correctional health administration program or with the permission of the instructor.

CML 6050. Correctional Health Care Delivery. 3 Credits.

Key operational responsibilities of the correctional health care administrator; policy development, staffing, and managing a multidisciplinary health care team; ensuring access to efficiently run sick call and chronic care services; and providing necessary oral health care and ancillary support services. Restricted to students in the graduate certificate in correctional health administration program or with the permission of the instructor.

CML 6202. Human Resource Development. 3 Credits.

Methods, techniques and policies appropriate for the development and management of human resources complementary to an organization's vision, strategy, and desired culture. Managerial knowledge, skills and behaviors required for the effective management of people to promote and maintain a professional health care organization are explored.

CML 6203. Health Information Quality and Outcomes. 3 Credits.

Approaches to medical informatics to support managerial decision making, patient care, and quality improvement in clinical practices. Ethical, legal, and social dimensions of health care information technology.

CML 6204. Marketing Clinical Services. 3 Credits.

The marketing process from the viewpoint of clinical practice managers. Needs assessment, environmental analysis, planning, distribution, pricing, promotion.

CML 6205. Case Studies in Clinical Management and Leadership. 3 Credits.

Integrative case-based approach to the analysis of complex problems in the management and leadership of clinical practice services.

CML 6274. Health Economics and Finance. 3 Credits.

Issues of health care economics, financial management, and budgeting that relate to managerial decision-making. Applied financial management, management control systems, budgeting, staffing, and cost accounting.

CML 6275. Leadership and Change in Clinical Management. 3 Credits.

Theories and models of leadership and change from a systems perspective. The development of leadership solutions to problems in clinical organizations; integration of all field course work into implementation plans for health care system changes.

CLINICAL OPERATIONS AND HEALTHCARE MANAGEMENT (COHM)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

COHM 2141. Marketing for Healthcare Leaders. 3 Credits.

Skills needed by health care leadership to promote services and strategic change; theory and application of marketing principles for the purpose of project planning, organizational growth, and public relations. Restricted to students in the graduate certificate in correctional health administration program or with the permission of the instructor.

COHM 2142. Finance for Health Care Managers. 3 Credits.

Introduction to key finance competencies necessary for clinical and healthcare operations; costs, expenditure, and reimbursement of services. Restricted to students in the clinical operations and health care management program.

COHM 4145. Case Studies for Clinical Healthcare Management and Leadership. 3 Credits.

Builds on prior coursework to apply clinical operations and health care management practices to a case studies format. Students analyze and discuss real-life operational case studies from various health care organizations. Recommended background: students in the clinical operations and health care management program.

COHM 4150. Practicum in Clinical Operations. 1-3 Credits.

Supervised field work in clinical operations and health management, arranged in consultation with the program director. May be repeated for credit. Restricted to students in the clinical operations and health care management program. Prerequisites: CML 4144 and COHM 4145.

COHM 6107. Economics of Health Care Systems. 3 Credits.

Economic principles as they apply to health policy in the public and private sectors. Restricted to students in the health services and outcome research program.

COHM 6210. Strategic Communications. 3 Credits.

Using effective communication in the health care environment to maximize operational outcomes; critical evaluation of personal communication styles. Recommended background: COHM major.

COHM 6215. Population Health for Health Care Innovators. 3 Credits.

Key concepts of population health; historical perspective on health care in the United States; public health as a health system; regulations and laws; the health workforce infrastructure; interventions.

COHM 6220. Finance for Health Care Operations. 3 Credits.

Applied health economics, finance and policy for high-quality, value-based health care operations; costs, expenditure, and reimbursement of services; strategic financial planning tools. Restricted to students in the clinical operations and health care management program.

COHM 6235. Leadership Development in Health Care Systems. 3 Credits.

Overview of principles related to leadership, including theories and styles, organizational management and values, communication strategies, and change in the context of health care systems. Credit cannot be earned for this course and HSCI 6223.

COHM 6245. Strategic and Operational Decision Making for Health Care Leaders. 3 Credits.

Overview of business principles related to health care systems and leadership, focusing on strategic management of health care service delivery in various settings. Credit cannot be earned for this course and HSCI 6241.

COHM 6320. Informatics for Operational Leadership and Health Care Quality. 3 Credits.

The life cycle of clinical informatics from a systems theory perspective; clinical informatics and its affiliated data, governance, and interoperability structures. Restricted to students in the clinical operations and health care management program.

COHM 6430. Health Care Systems Operations. 3 Credits.

Management in the health care industry; systems and functions required for planning, producing, and delivering high-quality, patient-centered health care services. Restricted to students in the clinical operations and health care management program.

COHM 6465. Practicum in Clinical Operations. 1-3 Credits.

Supervised field work in clinical operations and health management, arranged in consultation with the program director. May be repeated for credit. Program approval and completion of 9 credits in graduate-level clinical management and leadership (CML) coursework are required prior to enrollment. Restricted to students in the clinical operations and health care management program.

COHM 6470. Applications in Clinical Operations and Health Care Management. 3 Credits.

Builds on prior coursework to apply clinical operations and health care management practices; analysis and discussion of real-life operational case studies from a diverse array of health care organizations. Restricted to students in the clinical operations and health care management program. Prerequisite: COHM 6430.

CLINICAL RESEARCH ADMINISTRATION (CRA)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CRA 2101. Basics of Clinical Research. 3 Credits.

Fundamental concepts, trends, regulations, and practices in clinical research. An overview of industry and government practices and policies in the development of patient care products (drug, devices, biologicals, and diagnostics) and treatment protocols.

CRA 2102. Processes of Clinical Research. 3 Credits.

The key process steps involved in the design, implementation, analysis, and approval of investigational new products with an emphasis on the operational steps involved in conducting clinical trials.

CRA 2103. Good Clinical Practices. 3 Credits.

The organization and management of data, documents, materials and findings resulting from clinical research as prescribed by governmental institutions, regulatory agencies, industry sponsors, and research organizations. Audit standards and mechanisms are introduced, and practice audits are conducted.

CRA 2104. Business of Clinical Research. 3 Credits.

Fiscal and managerial components of clinical research, including the budgeting processes, fiscal management, software applications, legal and contractual issues, and recruitment of personnel and subjects. Examination of all entities involved in clinical research, including drug, device, biological, and diagnostics sponsors; academic medical centers; and contract research organizations, site management companies, physician-run organizations, and health delivery organizations.

CRA 2105. Capstone in Clinical Research Administration. 3 Credits.

Identification, analysis, and application of the various administrative aspects of clinical research associated with the development and implementation of a clinical trial for an investigational product.

CRA 2107. Introduction to Monitoring Clinical Trials. 3 Credits.

Introduction to the role of monitoring in clinical research administration to ensure valid, reliable, and accurate clinical data and adherence to good clinical practices by sponsors and study sites.

CRA 4106. Clinical Research Administration Internship. 3 Credits.

.

CRA 5099. Variable Topics. 1-99 Credits.

CRA 6201. Critical Analysis Clinical Research. 3 Credits.

Analyses of the essential components of clinical research including good clinical practice, human subject protection, study design, and trials administration.

CRA 6202. Medicines Development. 3 Credits.

Examination of nonclinical, clinical, commercial, regulatory and risk assessment strategies required to develop a clinical development plan for an approvable, marketable new therapeutic and propose life cycle management strategies.

CRA 6203. Partnerships with Human Subjects. 3 Credits.

Regulatory, policy, ethical, and practical considerations associated with the engagement, recruitment, retention, and interaction with human research subjects.

CRA 6204. The Clinical Research Industry. 3 Credits.

Integration of project management principles, decision making models, cross-cultural competency, and interdisciplinary team dynamics to facilitate effective and efficient conduct of clinical trials.

CRA 6205. Clinical Investigation. 3 Credits.

Analysis and evaluation of study design strategies and current practices for major therapeutic areas of clinical research (e.g., vaccine development, cardiovascular disease, anti-infectives, CNS, etc.).

CRA 6208. International Clinical Research. 3 Credits.

Analysis of the strategies and methods of clinical research in international settings; explore cultural and ethical consideration in global clinical research projects.

CRA 6209. Quality and Risk Management. 3 Credits.

Managing risk and safety assessments to ensure quality in clinical research.

CRA 6210. Medical Writing/Clinical Research. 3 Credits.

Strategies and practices in writing documentation related to clinical research administration.

CRA 6211. Monitoring, Auditing, and Oversight in Clinical Research. 3 Credits.

Key stakeholder roles, responsibilities, and processes associated with monitoring, auditing, and oversight in clinical trial conduct. Recommended background: MSHS in CRA or graduate certificate student status.

CRA 6212. Teaching Strategies in the Health Professions. 3 Credits.

Teaching skills pertinent to the delivery of education in health sciences professions. Course design illustrates teaching and learning practices grounded in andragogy, contributing to curriculum program objectives of enhancing teaching skills. (Same as EHS 6212).

CRA 6213. Curriculum Development in Health Professions. 3 Credits.

Curriculum development and assessment skills in the health professions. Variables that affect the manner in which individuals learn and interact within professions and organizations.

CRA 6275. Leadership and Change in Clinical Research Administration. 3 Credits.

A capstone course focusing on the concept of leadership within the contexts of health professionals, health systems, and health policy.

CLINICAL TRANSLATIONAL SCIENCE (CTS)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CTS 6201. Critical Analysis in Clinical Research. 3 Credits.

Analyses of the essential components of clinical research including good clinical practice, human subject protection, study design, and trials administration.

CTS 6202. Research Methods for Clinical and Translational Research. 2 Credits.

The design and conduct of clinical research with an emphasis on the types of studies most relevant to health care professionals.

CTS 6203. Legal and Ethical Issues in Clinical and Translational Research. 1 Credit.

Legal and ethical issues that arise in the design and conduct of clinical and translational research.

CTS 6205. Clinical Investigations. 3 Credits.

Analysis and evaluation of study design strategies and current practices for major therapeutic areas of clinical research, including vaccine development, cardiovascular disease, anti-infectives, CNS, and others.

CTS 6261. Foundations in Clinical and Translational Research. 3 Credits.

Overview and analysis of translational research principles and practice; analysis and integration of basic clinical community health and health services research concepts as applied to key diseases.

CTS 6264. Clinical and Translational Research Capstone Project. 3 Credits.

Application of the knowledge gained during the course of the program through the completion of a mentored independent research project.

CTS 6265. Grantsmanship in Translational Health Science. 3 Credits.

Writing grant proposals to fund clinical research, with an emphasis on translational research proposals; persuasive communication, conceptually-based hypotheses, and research methods and the grant application process.

CTS 6266. Grant Writing for the Individual Investigator. 3 Credits.

The complete process of research grant proposal development; organizing collaborators, mentors and advisory committees, and negotiating those relationships. Designed for early independent investigators (MD/DO, EdD, PhD, or other terminal degree) who are prepared to develop a grant for submission.

CTS 6273. Bioinformatics for Genomics. 3 Credits.

Bioinformatics tools for different analytical situations; strengths and limitations of the most common bioinformatics strategies. Generalizing acquired knowledge and its underlying principles and techniques to other types of big data applications for the purpose of interpretation of results. Same As: HSCI 6273.

CTS 6275. Transdisciplinary Research Proposal. 3 Credits.

Integration of the competencies acquired throughout the program. Development and submission of a transdisciplinary research proposal that responds to a call for proposals from an external sponsor, such as the National Institutes of Health.

CTS 6285. Collaboration and Team Science in Practice and Research. 3 Credits.

Approaching health, technology, social, and environmental problems with cross-disciplinary engagement and collaboration. Foundational and practical principles and their impact on collaborative and team science engagements. Credit cannot be earned for this course and HSCI 6285.

COLLEGE OF PROFESSIONAL STUDIES (CPS)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work

- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

COLUMBIAN COLLEGE OF ARTS AND SCIENCES (CCAS)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CCAS 0920. Continuing Research - Master's. 1 Credit.

CCAS 0940. Continuing Research - Doctoral. 1 Credit.

CCAS 1001. First-Year Experience. 1 Credit.

Designed to assist CCAS students in developing their personal, academic, and career goals. Includes three core components: service learning, academic planning, and personal/professional development with content delivered by a variety of means. Restricted to first-year students.

CCAS 1005. GWECP Advising. 0 Credits.

CCAS 1200. Caminos al Futuro. 3 Credits.

Survey of social and cultural dimensions of Latinidad in the United States. Topics include the history of Hispanic/Latino immigration in the United States and the intersection of race and ethnicity, among others. Restricted to students in the Caminos al Futuro pre-college summer program.

CCAS 2154. Elective Internship. 3 Credits.

Fieldwork and academic work carried out under faculty supervision. Students contract with agency, faculty, and Columbian College. Restricted to students of at least sophomore standing who have obtained approval from the Columbian College Undergraduate Studies Office.

CCAS 2190. Special Interdisciplinary Topics. 1-3 Credits.

May be repeated for credit provided the topic differs.

CCAS 2190W. Special Interdisciplinary Topics. 1-3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

CCAS 3001. Undergraduate Research. 3 Credits.

Open to undergraduates at any level. Focused exploration of an idea, question, or issue, under the guidance of a research mentor/supervisor, culminating in a report about the experience. Students must find a sponsoring faculty member and receive approval from the Office of Undergraduate Studies in the Columbian College of Arts and Sciences. Zero-credit option is graded on a P/NP basis only and is available only during summer sessions. Restricted to students who find a faculty mentor/supervisor and receive CCAS approval.

CCAS 4191. Special Interdisciplinary Major Capstone. 3 Credits.

Required of all students completing a special interdisciplinary major.

CCAS 5099. Variable Topics. 1-99 Credits.

CCAS 6154. Elective Internship. 3 Credits.

Fieldwork and academic work carried out under faculty supervision. Students contract with agency, faculty, and Columbian College. May be repeated to a maximum of 6 credits. Admission by permission of Columbian College. Graded on a P/NP basis only. Zero credit option available only during summer sessions.

CCAS 8920. Continuing Research - Masters. 1 Credit.

N/A.

COMMUNICATION (COMM)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

COMM 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester; see department for more details.

COMM 1025. Introduction to Communication Studies. 3 Credits.

Introduction to historical and intellectual development of the field. Students survey the origins of contemporary theory; learn about fundamental concepts, models, investigative tools, and contexts of communication; and explore a variety of professional opportunities awaiting communication graduates.

COMM 1040. Public Communication. 3 Credits.

Study and practice of the basic techniques of public speaking used to inform, to entertain, and to persuade audiences. Emphasis on the speech-building process: audience analysis, research, development, composition, organization, style, delivery, and criticism.

COMM 1041. Interpersonal Communication. 3 Credits.

Study and practice of verbal and nonverbal communication in ritual, information and perspective sharing, problem solving, and relationship formation, maintenance, and dissolution. Designed to raise awareness of the complexity and power of the communication process in daily life and to help students develop interpersonal skills cognitively, affectively, and behaviorally.

COMM 1042. Business and Professional Speaking. 3 Credits.

Study of the communication process in business and professional organizations; practice in interviewing, small group communication, and public presentations. For non-majors and non-minors only.

COMM 1099. Variable Topics. 1-36 Credits.**COMM 2000. Sophomore Colloquium. 3 Credits.**

Topic vary by semester. See the Schedule of Classes for more detailed information. Restricted to CCAS students with sophomore standing.

COMM 2100. Communication Theory. 3 Credits.

The nature and function of communication theory as a framework for the study of communicative behavior; analysis of paradigmatic approaches in rhetorical, interpersonal, and mass communication theories and models. Restricted to students in the communication program. Prerequisite: COMM 1025.

COMM 2120. Small Group Communication. 3 Credits.

The study and practice of communication in small groups, focusing on problem solving, norms, roles, and leadership. Prerequisite: COMM 1025 or permission of the instructor.

COMM 2140. Nonverbal Behavior. 3 Credits.

Introduction to predominant theories, principles, and problems in the study of nonverbal behavior; application of research results to everyday life. Topics include facial expression, eye behavior, physical appearance, body movement and gestures, tactile messages, vocal characteristics, use of time, spatial dynamics, gender and life-stage differences.

COMM 2162. Sociology of the Family. 3 Credits.

Examination of the stages of family life: birth, childhood, premarital relationships, marriage and sex roles in marriage, retirement, and old age. Special emphasis on development and maintenance of interpersonal relations. Prerequisites: SOC 1001 or SOC 1002 or COMM 1025. (Same as SOC 2162).

COMM 3099. Variable Topics. 1-12 Credits.**COMM 3110. Research Methods in Communication. 3 Credits.**

Processes of inquiry within interpersonal and public communication. Framing research questions, conducting literature reviews, developing a research design, using qualitative and quantitative research tools, and interpreting research results. Restricted to students in the communication program. Prerequisites: COMM 2100.

COMM 3170. Organizational Communication. 3 Credits.

Exploration of the philosophy, process, problems, and potential of human communication within organizational contexts. May involve experiential workshops and fieldwork.

COMM 3171. Professional Communication. 3 Credits.

Principles and theories of communication applied to situations encountered in organizational and professional environments. Development of knowledge and abilities for workplace tasks, such as interviewing, facilitating meetings, providing performance appraisals, designing and delivering instructional materials and other professional presentations.

COMM 3172. Health Communication. 3 Credits.

Exploration of the nature, functions, and impact of relational communication in the context of health care. Both formal (health care organizations) and informal (family communication) systems may be studied. Topics can include provider-patient interaction, media and health, confirmatory communication. Prerequisites: COMM 1041 or COMM 2100 or permission of the instructor.

COMM 3173. Communication in a Mediated World. 3 Credits.

An exploration of human-to-human communication mediated by computer technology. Traditional communication theories are applied and adapted to the computer-mediated realm; newer theories of computer-mediated communication are addressed.

COMM 3174. Intercultural Communication. 3 Credits.

Exploration of the process, trends, rewards, and difficulties of human communication in intercultural contexts, with an eye toward establishing guidelines for mitigating miscommunication across cultures. May involve fieldwork.

COMM 3175. Strategic Communication. 3 Credits.

Exploration of the strategies and techniques employed in successful communication in the face of obstacles such as shrinking budgets and technological expansion. Emphasis on the principles of communication planning through a strategic matrix in an evolving communication environment.

COMM 3176. Issues and Image Management. 3 Credits.

The issues and image management function in corporate, professional, and nonprofit organizations. Assignments may include in-class collaboration on case studies of communication campaigns and crisis communication strategies, interviews with professionals in the practice of communication management, and a communication audit of strategies and messages of a selected organization.

COMM 3177. Corporate Ethical Communication. 3 Credits.

How businesses analyze their communication methods in the context of internal ethical standards. General codes of ethics, marketing ethics, corporate social responsibility, consumer protection, environmental protection, and ethical issues that corporate decision makers face in developing policies that affect employees, customers, and society as a whole.

COMM 3179. Sexual Communication. 3 Credits.

Exploration of sexual communication addressing behaviors, attitudes, and knowledge; the formation of sexual norms, negotiating sexual intimacy and safer-sex, gender roles in sexual relationships, sexual health communication campaigns, and parent-child sexual communication. Same As: COMM 6179.

COMM 3180. Communication Criticism. 3 Credits.

Evaluation of communication paradigms along critical dimensions of analysis. Prerequisites: COMM 1040 or COMM 4150 or permission of the instructor.

COMM 3190. Selected Topics. 1-3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

COMM 4150. Persuasion. 3 Credits.

In-depth study of the principles and techniques of persuasion from both production and consumption perspectives, in both personal and mediated contexts. Emphasis on the common-premise model, with consideration of such topic areas as pathos/ethos/logos, attitude and behavior change, effectiveness, ethics, and subconscious influence. Restricted to students in the communication program. Prerequisite: COMM 1025.

COMM 4196. Independent Study. 1-3 Credits.

Independent research and special projects. Before students are permitted to register, they must submit a written proposal of the plan of study and obtain approval of the faculty member who directs the study and of the program chair. Restricted to seniors and juniors in the communication program; juniors must receive permission of the department prior to enrollment.

COMM 4197. Internship. 3 Credits.

Student-secured internships in public or private communication-related organizations in the metropolitan area. Students spend at least 15 hours per week doing communication-related work. Meetings, reports, and/or analysis paper are required. Permission of the program required prior to enrollment. Graded on a Pass/No Pass basis. Restricted to students in the communication program.

COMM 4199W. Senior Seminar. 3 Credits.

Capstone course in which students work on an individually designed research project to be presented in a major paper. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Restricted to students in the BA in communication program. Prerequisites: COMM 2100 and COMM 3110.

COMM 5099. Variable Topics. 1-99 Credits.**COMM 6100. Communication Theory. 3 Credits.**

Theories of human communication; interpersonal, small group, intercultural, and media communication. Additional work is required when taken for graduate credit. Restricted to students in the MA in communication management program.

COMM 6110. Research Methods in Communication. 3 Credits.

Graduate-level study of communication-based quantitative and qualitative research methods. Restricted to students in the MA in communication management program.

COMM 6150. Persuasion. 3 Credits.

Principles, techniques, and ethics of persuasion from both sender and receiver perspectives, and across both personal and mediated contexts; the common-premise model with special consideration of such topics as audience analysis; systems of ethics; persuasive claims; pathos/ethos/logos; attitude and behavior change; sender, message, channel, and receiver characteristics; subconscious influence. Restricted to students in the MA in communication management program.

COMM 6165. Organizational and Communication Networks. 3 Credits.

The application of tools of social network analysis to organizational settings and behavior as well as communication processes, both within and among organizations. Restricted to graduate students.

COMM 6171. Professional Communication. 3 Credits.

Principles and theories of advanced public communication used in organizational and professional environments; job interviewing, providing performance appraisals, designing and delivering instructional materials, facilitating and participating on panels, and other professional presentations. Restricted to graduate students.

COMM 6172. Health Communication. 3 Credits.

Health communication theory, methods of health communication research, and practices of effective health communication campaigns. Restricted to graduate students.

COMM 6174. Intercultural Communication. 3 Credits.

A multidisciplinary examination of the conceptual foundations of culture, the effects of culture on communication in comparative and multicultural contexts, and the suggested guidelines for communication competence in intercultural communication settings. Restricted to graduate students.

COMM 6179. Sexual Communication. 3 Credits.

How public and private communication about sex reflects and affects sexual attitudes, behaviors, and knowledge; health communication, interpersonal communication, and mass communication theories, with consideration of topics such as sexual norms, negotiating sexual intimacy and safer sex, gender roles, and parent-child sexual communication. Restricted to graduate students. (Same as COMM 3179).

COMM 6189. Intercultural Negotiation. 3 Credits.

Introduction to negotiation and dispute resolution in intercultural contexts. Students hone their negotiation and conflict management skills through a series of simulation exercises. Theoretical and methodological issues related to the study of negotiation in intercultural contexts. Open to undergraduate students with permission of the instructor.

COMM 6190. Leadership Communication. 3 Credits.

Leadership as a function of human communication; theories of leadership and communication strategies employed by leaders in a variety of contexts; leadership as a form of social action; effectiveness and social implications of the strategies employed in leadership communication. Open to undergraduate students with the permission of the instructor. Restricted to graduate students.

COMM 6196. Independent Study. 1-12 Credits.

Directed research and study in a specific area of communication management, which must be pre-approved by department faculty prior to registration. Restricted to graduate students.

COMM 6242. Organizational Communication and Conflict Management. 3 Credits.

Models for effective organizational communication and constructive conflict resolution; organizational communication principles and theoretical and practical approaches to conflict analysis, management, and resolution. Restricted to graduate students. (Same as ORSC 6242).

COMM 6999. Master's Thesis. 3-6 Credits.

Students must identify a member of the full-time faculty to serve as thesis adviser prior to enrollment. May be repeated for credit. Restricted to students in the MA in communication management program who have selected the thesis option.

COMPUTER SCIENCE (CSCI)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CSCI 1010. Computer Science Orientation. 1 Credit.

Introduction to the field of computer science. Basic and emerging concepts and applications of computer science. Hands-on experiments and team projects. Technical resources, professional ethics, writing, and presentation.

CSCI 1011. Introduction to Programming with Java. 3 Credits.

An introductory course in programming a computer, using the Java language. Object-oriented programming, classes, applets, methods, control structures, inheritance, overriding, GUI widgets, containers, and exceptions.

CSCI 1012. Introduction to Programming with Python. 3 Credits.

Introduction to programming a computer using the Python language; variables, types, assignment, conditionals, loops, lists, and program units. (Fall, spring, and summer, Every Year).

CSCI 1020. Applications Software. 3 Credits.

Introduction to the use of microcomputer hardware and software for word processing (e.g., Word), spreadsheets (e.g., Excel), and database management (e.g., Access), with emphasis on the use of computers to solve typical problems in academia and business.

CSCI 1021. Introduction to Computers and the Internet. 3 Credits.

Survey of computers and languages. Introduction to computer programming. History of computing and networking. The effects of computing and the Internet on our lives. E-commerce and new technologies. Concepts of web page design. (Fall and spring).

CSCI 1022. Introduction to Internet Technology. 3 Credits.

An introductory course for non-technical students who wish to obtain a better understanding of the hardware and software that comprise the Internet. Information transfer over fiber, routing and switching of packets, methods of information transfer, protocols, software, ISP, web pages and multimedia.

CSCI 1023. Introduction to Web Software Development. 3 Credits.

Introduction to the Internet. Topics include address and URL to find your way, linking to a URL, HTML and web programming, building a web page, building a home page, client-server techniques. (Fall and spring).

CSCI 1030. Technology and Society. 3 Credits.

Historical, social, and ethical issues of the technological age. Ethical principles and skills and social analysis skills needed to evaluate the design and implementation of complex computer systems. Privacy, computer crime, equity, intellectual property, professional ethics. Data collection, analysis, and presentation; technical writing and oral communication skills.

CSCI 1030W. Technology and Society. 3 Credits.

Historical, social, and ethical issues of the technological age. Ethical principles and skills and social analysis skills needed to evaluate the design and implementation of complex computer systems. Privacy, computer crime, equity, intellectual property, professional ethics. Data collection, analysis, and presentation; technical writing and oral communication skills. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. (Fall and spring, Every Year).

CSCI 1041. Introduction to FORTRAN Programming. 3 Credits.

Structured programming with high-level language using FORTRAN. Control structures. Different data types with emphasis on real and complex number computations. Arrays used with vector and matrix manipulation to solve simultaneous equations. External subroutines for mathematical and graphical applications. MATH 1220 or MATH 1231 may be taken as a corequisite. Prerequisites: MATH 1220 or MATH 1231. (Fall and spring, Every Year).

CSCI 1099. Variable Topics. 1-36 Credits.

CSCI 1111. Introduction to Software Development. 3 Credits.

Introduction to the solution of problems on a digital computer using the Java language. Object-oriented programming concepts; documentation techniques; design of test data. Writing, debugging, and running programs in an interactive computing environment.

CSCI 1112. Algorithms and Data Structures. 3 Credits.

Object-oriented software. Inheritance, exceptions, development of classes, event-driven programming. Data structures such as trees, lists, stacks, queues, and strings. Sorting and searching. Introduction to algorithm performance prediction. May be taken for graduate credit by students in fields other than computer science. Prerequisites: CSCI 1111 with a minimum grade of C; and MATH 1220 or MATH 1231. (Spring, Every Year).

CSCI 1121. Introduction to C Programming. 3 Credits.

Structured programming with the C language; control structures; data types; use of pointers; matrix manipulation to solve simultaneous equations; external subroutines for mathematical and graphical applications; introduction to C++; complex number representation. Co-requisites: MATH 1220 and MATH 1231. (Spring, Every Year) Credit cannot be earned for this course and ECE 1120.

CSCI 1131. Introduction to Programming with C. 3 Credits.

Intensive introductory course for students with a science, mathematics, or other quantitative background. Solution of numerical and nonnumerical problems on a digital computer using C programming language in a Unix environment. Recommended for graduate and advanced undergraduate students in other departments. Prerequisite: MATH 1232.

CSCI 1132. Data Structures and Software Design. 3 Credits.

Data structures such as trees, lists, stacks, queues, and strings. Big-O notation and introduction to algorithm performance analysis. Solutions of numerical and non-numerical problems. Use of I/O libraries. Application development and software testing. Prerequisite: CSCI 1121.

CSCI 1311. Discrete Structures I. 3 Credits.

Mathematics for computer science. Sets, functions, sequences. Propositional and predicate calculus, formal proofs, mathematical induction. Matrices, semigroups, groups, isomorphism. Relations, partitions, equivalence relations, trees, graphs. May be taken for graduate credit by students in fields other than computer science. Prerequisites: MATH 1220 or MATH 1231. (Fall).

CSCI 2113. Software Engineering. 3 Credits.

Programming techniques and software development in one or more programming languages; application development with GUIs, database access, threads, web programming. Prerequisites: CSCI 1112 with a minimum grade of C; and MATH 1221 or MATH 1231. (Fall and spring, Every Year).

CSCI 2312. Discrete Structures II. 3 Credits.

Basic discrete techniques in computer science; proofs, algebraic structures, number theory, graph theory, (coloring and planar graphs, communication networks), advanced recurrences, advanced sums, approximations and asymptotics. Students must have received a minimum grade of C in CSCI 1311. Prerequisites: CSCI 1311; and MATH 1220 or MATH 1231; and MATH 1221. (Fall, Every Year).

CSCI 2441. Database Systems and Team Projects. 3 Credits.

Design of relational database systems, relational query languages, normal forms, and design of database applications. Team software development, integration, and testing. Professional code of ethics, intellectual property, privacy, and software copyrights. Students cannot receive credit for both CSCI 2441 taken while an undergraduate and CSCI 6441 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 2541 and CSCI 6441. (Fall and spring, Every Year).

CSCI 2441W. Database Systems and Team Projects. 3 Credits.

Design of relational database systems, relational query languages, normal forms, and design of database applications. Team software development, integration, and testing. Professional code of ethics, intellectual property, privacy, and software copyrights. Students cannot receive credit for both CSCI 2441W taken while an undergraduate and CSCI 6441 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 2441W and CSCI 6441. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Corequisite: CSCI 2113. (Spring, Every Year).

CSCI 2460. Introduction to Computer Systems. 1,2 Credit.

Introduction to computer organization and computer systems. Data representation; computer organization; processor instruction sets and assembly programming; language translation; memory; input/output; introduction to operating systems. Restricted to students in the BA and minor programs in computer science. Prerequisites: CSCI 1112; and CSCI 1311 with a minimum grade of C. Corequisites: CSCI 2113. Recommended background: introductory coursework and background in computer science, programming, and discrete mathematics. (Spring, Every Year).

CSCI 2461. Computer Architecture I. 3 Credits.

Number representation, computer arithmetic, digital logic, and circuit design. Computer organization, micro-architecture and processor datapath, assembly and machine language programming. Introduction to memory organization and the hardware-software interface. Implementation of high-level language constructs. Prerequisites: CSCI 1112 and CSCI 1311. (Fall, Every Year).

CSCI 2501. Ethical Issues in Computing. 1 Credit.

Introduction and analysis of the ethical issues of the technological age; ethical principles and skills and social analysis skills needed to evaluate future consequences of the design and implementation of complex computer systems; application of professional ethics codes in decision-making in professional practice. Restricted to computer science majors. Prerequisites: CSCI 1010 and CSCI 1011. (Fall and spring, Every Year).

CSCI 2541W. Database Systems and Team Projects. 3 Credits.

Design of relational database systems, relational query languages, Introduction to Not just SQL (NoSQL) database systems, normal forms, and design of database applications. Team software development, integration, and testing. Students cannot receive credit for both CSCI 2541W taken while an undergraduate and CSCI 6441 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 2541 and CSCI 6441. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Corequisite: CSCI 2113. Prerequisite: CSCI 1311. (Spring, Every Year).

CSCI 3212. Algorithms. 4 Credits.

Core concepts in design and analysis of algorithms, data structures, and problem-solving techniques. Hashing, heaps, trees. Graph algorithms, searching, sorting, graph algorithms, dynamic programming, greedy algorithms, divide and conquer, backtracking. Combinatorial optimization techniques. NP-completeness. Prerequisites: CSCI 1311 and CSCI 2113. (Fall and spring, Every Year).

CSCI 3221. Programming Languages. 3 Credits.

Programming language and software design fundamentals. Writing programs in a non-procedural programming language. Closures; procedure and data abstraction; object-oriented, procedural, and declarative programming; continuation compilation and interpretation, and syntactic extension. Advanced control structures appropriate for parallel programming. Prerequisite: CSCI 2113.

CSCI 3240. Pre-Senior Design with Research. 3 Credits.

For students who wish to combine a research project with their Senior Design project. The goal is to complete the research, under a faculty mentor, within three semesters. Prerequisites: CSCI 3212, CSCI 3313, CSCI 3411 and permission of the instructor. (Fall and spring, Every Year).

CSCI 3313. Foundations of Computing. 3 Credits.

Introduction to the theory of computing and automata theory. Formal languages and automata; regular expressions, context-free languages; finite state automata and pushdown automata; Turing machines and computability, recursive function theory, undecidability. Prerequisites: CSCI 1311, CSCI 2113, and CSCI 2461. (Fall and spring, Every Year).

CSCI 3362. Probability for Computer Science. 3 Credits.

Introduction to probability and statistics for computer scientists; random variables; conditional probability, independence, correlation; applications to computer science, including information theory, data compression, coding, inference, Markov chains, randomized algorithms. Students cannot receive credit for both CSCI 3362 taken while an undergraduate and CSCI 6362 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 3362 and CSCI 6362. Prerequisites: CSCI 1311 and MATH 1232. (Spring, Every Year).

CSCI 3410. Systems Programming. 3 Credits.

Concepts underlying all computer systems. Processor operation, hierarchical memory systems, embedded boards, data acquisition, actuation, and systems software such as compilers, linkers, and operating systems from the programmer's perspective. Use of embedded platforms to examine how programs interact with and are constrained by hardware. Prerequisites: CSCI 2461 and CSCI 2113. (Fall and spring, Every Year).

CSCI 3411. Operating Systems. 4 Credits.

Process management, process state, concurrent processing, synchronization, events; operating system structure, the kernel approach, processor scheduling, task switching, monitors, threads; system management, memory management, process loading, communication with peripherals; file systems; socket programming, packets, Internet protocols. Prerequisites: CSCI 2113 and CSCI 2461. (Fall, Every Year).

CSCI 3462. Computer Architecture II. 3 Credits.

Computer organization; design of computer components and of a simple computer. Instruction set and assembly language of a pipelined RISC processor; introduction to high-performance processors; design of cache, main memory, and virtual memory systems; program performance models and system performance; I/O structure and peripherals. Prerequisites: CSCI 2113 and CSCI 2461. (Spring, Every Year) Credit cannot be earned for this course and ECE 3515.

CSCI 3571. Introduction to Bioinformatics. 3 Credits.

An introduction to the use of computational techniques in molecular biology, genetics, and evolution. Techniques and software for database searching, sequence alignment, gene finding, phylogenetics, genomics, and proteomics. May be taken for graduate credit. Prerequisites: BISC 1111 or BISC 1115 and BISC 1125; and BISC 1112 or BISC 1116 and BISC 1126. (Same as BISC 2584) (Spring, Every Year).

CSCI 3907. Special Topics. 1-3 Credits.

Topic to be announced in the Schedule of Classes. (Fall and spring).

CSCI 3908. Research. 1-3 Credits.

Applied research and experimentation projects, as arranged. Restricted to juniors and seniors. (Fall and spring, Every Year).

CSCI 4222. Theory of Computer Translators. 3 Credits.

Lexical and syntax analysis, regular expressions, context-free grammars, parsing techniques, top-down parsing, efficient parsing, syntax-directed translation, intermediate formats, flow of control, block structures, procedure calls, symbol tables, run-time storage, error-detection and recovery, code optimization, code generation. Prerequisites: CSCI 3313 and CSCI 3462. (Fall and spring, Every Year).

CSCI 4223. Principles of Programming Languages. 3 Credits.

Fundamental concepts underlying design of programming languages. Detailed study of functional and object-oriented computational models. Types, evaluation, abstraction, control flow, modules, mutation, laziness, polymorphism, subtyping, inheritance. Practice learning new languages. Students cannot receive credit for both CSCI 4223 taken while an undergraduate and CSCI 6223 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4223 and CSCI 6223. Prerequisites: CSCI 1311 and CSCI 2113. (Spring, odd years).

CSCI 4235. Development of Open-Source Software. 3 Credits.

Design, process, tools, and culture of open-source software development. Cross-platform development and testing. Geographic dispersal, social and team dynamics, licenses (GPL, BSD, other); code reuse (modular code, shared libraries); very-large-scale distributed development techniques (CVS, Bugzilla, release-management, mailing-lists). May be taken for graduate credit. Prerequisite: CSCI 2113 or CSCI 6221.

CSCI 4237. Software Design for Handheld Devices. 3 Credits.

Design of interactive software for handheld devices. Event driven programming, user interface design practices, memory management, handheld debugging techniques. May be taken for graduate credit. Prerequisite: CSCI 2113 or CSCI 6221.

CSCI 4243. Capstone Design Project I. 3 Credits.

Planning, design, and construction of the capstone project. Economic analysis of the project. Application of software engineering principles, including software requirements, specification, requirements engineering, reuse, documentation, verification/validation, testing, configuration management. Report writing and presentations. Prerequisite: senior status.

CSCI 4243W. Capstone Design Project I. 4 Credits.

Planning, design, and construction of the capstone project; economic analysis of the project; application of software engineering principles, including software requirements, specification, requirements engineering, reuse, documentation, verification/validation, testing, configuration management. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: CSCI 3212 and CSCI 3411. (Fall, Every Year).

CSCI 4244. Capstone Design Project II. 4 Credits.

Continuation of CSCI 4243. Planning, design, and construction of the capstone project. Economic analysis of the project. Application of software engineering principles, including software requirements, specification, requirements engineering, reuse, documentation, verification/validation, testing, configuration management. Restricted to seniors. Prerequisites: CSCI 4243W or CSCI 4243. (Spring, Every Year).

CSCI 4314. Discrete Analysis-Computer Science. 3 Credits.

Combinatorial theory: permutations and combinations, generating functions, recurrence relations, the principle of inclusion and exclusion. Block designs. Applications to the analysis of algorithms, computer organization, VLSI placement, coding theory, simulation, and other problems. May be taken for graduate credit. Prerequisites: CSCI 1311 or permission of the instructor. (Fall, Every Year).

CSCI 4331. Cryptography. 3 Credits.

Algorithmic principles of cryptography from Julius Caesar to public key cryptography. Key management problems and solutions. Cryptographic systems and applications. Students cannot receive credit for both CSCI 4331 taken while an undergraduate and CSCI 6331 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4331 and CSCI 6331. Prerequisites: CSCI 2312, CSCI 3212 and CSCI 3313. (Spring, Every Year).

CSCI 4341. Continuous Algorithms. 3 Credits.

Structures in continuous mathematics from a computational viewpoint; continuous system simulation, computational modeling, probability, statistical techniques, next-event simulation, algorithms for continuous optimization, machine learning, neural networks, statistical language processing, robot control algorithms. Students cannot receive credit for both CSCI 4341 taken while an undergraduate and CSCI 6341 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4341 and CSCI 6341. Prerequisites: CSCI 1311 and CSCI 2113. (Spring, Every Year).

CSCI 4342. Computational Linear Algebra and Applications. 3 Credits.

Application of linear algebra to computer science and engineering, with a computational perspective; points, vectors, matrices, and their programming representations; algorithms for 3D transformations, pose and viewpoint estimation; linear equations, independence, rank; algorithms for matrix decompositions, reduction of dimension; computation with large matrices, under and over-determined systems; applications to large data, computer vision, text processing. Students cannot receive credit for both CSCI 4342 taken while an undergraduate and CSCI 6342 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4342 and CSCI 6342. Prerequisite: CSCI 2113. (Spring, Every Year).

CSCI 4361. Simulation Methods. 3 Credits.

Computational methods for continuous and discrete system simulation; effects of computer software and hardware architectures on computational precision and accuracy requirements. Random-number generation and testing; calibration and scaling technique; verification and validation technique. May be taken for graduate credit. Prerequisite: CSCI 2113 or permission of the instructor. (Spring, Every Year).

CSCI 4364. Machine Learning. 3 Credits.

Overview of core machine learning techniques: nearest-neighbor, regression, classification, perceptron, kernel methods, support vector machine (SVM), logistic regression, ensemble methods, hidden Markov models (HMM), non-parametrics, online learning, active learning, clustering, feature selection, parameter tuning, and cross-validation. Students cannot receive credit for both CSCI 4364 taken while an undergraduate and CSCI 6364 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4364 and CSCI 6364. Prerequisites: CSCI 3212, CSCI 3362 and MATH 2184. (Fall, Every Year).

CSCI 4414. Introduction to Blockchain Technology and Applications. 3 Credits.

Introduction to blockchain concepts. Illustrates applications in both technical and business contexts. May be taken for graduate credit. Recommended background: prior coursework and background in computer science disciplines, programming, security protocols, machine learning, and distributed systems is helpful. (Fall and spring, Every Year).

CSCI 4415. Real-Time and Embedded Systems. 3 Credits.

Development of software for real-time control of physical systems; reliability and fault tolerance, exceptions and exception handling, reliability and concurrent processes, timeouts, deadline scheduling, shared-memory and message-based device drivers. May be taken for graduate credit. Prerequisite: CSCI 2113. (Spring, Every Year).

CSCI 4417. UNIX System Programming. 3 Credits.

Exposure to UNIX internals. Use of UNIX system calls and utilities in conjunction with script and C programs. RFCs, GNU project, and other collaborative traditions in the UNIX community. May be taken for graduate credit. Prerequisite: Senior status or 1 year of C programming and UNIX user experience.

CSCI 4418. UNIX System Administration. 3 Credits.

System administration for the stand-alone system or small networks. Installation of two or more UNIX variants (Linux, FreeBSD, Solaris) on Intel or Sparc platforms. Configuration of mail, name services, and other network utilities. Backup and recovery, security and ethics. May be taken for graduate credit. Prerequisite: CSCI 4417.

CSCI 4431. Computer Networks I. 3 Credits.

Higher-layer protocols and network applications on the Internet, such as session layer, presentation layer, data encryption, directory services and reliable transfer services, telnet, network management, network measurements, e-mail systems, and error reporting. Students cannot receive credit for both CSCI 4431 taken while an undergraduate and CSCI 6431 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4431 and CSCI 6431. Prerequisites: CSCI 2113 and CSCI 2461. (Fall, Every Year).

CSCI 4431W. Computer Networks I. 3 Credits.

Higher-layer protocols and network applications on the Internet, such as session layer, presentation layer, data encryption, directory services and reliable transfer services, telnet, network management, network measurements, e-mail systems, and error reporting. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: CSCI 2113 and CSCI 2461. (Fall and spring, Every Year).

CSCI 4432. Computer Networks II. 3 Credits.

Computer networks and open system standards. Network configurations and signals, encoding and modulation, transmission media, connection interfaces, error detection and correction, signal compression, switching, link layer control, ISDN, X.25, frame relay, ATM, and Sonet. Bridges, routers, and routing algorithms. Prerequisite: CSCI 4431.

CSCI 4455. Computer Game Design and Programming. 3 Credits.

Principles, techniques, and design of computer games. Graphic game engines, modeling, motion, AI and interaction; sound design and synthesis; real-time software and hardware issues. May be taken for graduate credit. (Fall).

CSCI 4511. Artificial Intelligence Algorithms. 3 Credits.

Knowledge representation and reasoning, propositional logic and predicate calculus. Logic programming; search, game trees, backtracking; planning. May be taken for graduate credit. Prerequisites: CSCI 3212 and CSCI 3221. (Spring, Every Year).

CSCI 4521. Introduction to Mobile Robotics. 3 Credits.

Overview of autonomous mobile robotics. Sensing, localization, calibration, mapping, perception, decision making, planning, and control. Emphasis on algorithmic rather than hardware aspects of robotics. Development of algorithms that can operate autonomous mobile platforms in complex, real-world environments. Prerequisites: MATH 1232 and MATH 2184; and CSCI 3362 or CSCI 4341. (Fall and spring, Every Year).

CSCI 4525. Autonomous Robotics: Manipulation. 3 Credits.

Introduction to robot manipulation. Core principles necessary to program robots for autonomous operation in dynamic and typically human-centric environments. Transdisciplinary concepts from computer science (reinforcement learning, perception), mechanical engineering (kinematics, dynamics), and electrical engineering (control theory). Prerequisites: Permission of the instructor. (Fall and spring, Every Year).

CSCI 4527. Introduction to Computer Vision. 3 Credits.

Introduction and overview of computer vision. Image-formation signal processing and filtering. Saliency, image features and feature extraction, tracking, stereo disparity estimation, structure from motion, photogrammetry, optic flow, homography estimation and warping, scene segmentation, place recognition, object recognition, robust estimation, and camera calibration. Prerequisites: MATH 1232 and MATH 2184; and CSCI 3362 or CSCI 4341. (Spring, Every Year) Same As: CSCI 6527.

CSCI 4531. Computer Security. 3 Credits.

Risk analysis, cryptography, operating system security, identification and authentication systems, database security. Students cannot receive credit for both CSCI 4531 taken while an undergraduate and CSCI 6531 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4531 and CSCI 6531. Corequisite: CSCI 4331. Prerequisite: CSCI 3411. (Spring, Every Year).

CSCI 4532. Information Policy. 3 Credits.

Roles, issues, and impacts of computer-based information systems in national and international arenas, focusing on privacy, equity, freedom of speech, intellectual property, and access to personal and governmental information. Professional responsibilities, ethics, and common and best practices in information use. Students cannot receive credit for both CSCI 4532 taken while an undergraduate and CSCI 6532 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4532 and CSCI 6532. (Fall, Every Year).

CSCI 4541. Network Security. 3 Credits.

Security protocols and applications in local, global, and wireless networks; IPSec and packet-level communication security systems; network authentication and key-exchange protocols; intrusion detection systems and firewalls; secure network applications; network worms and denial-of-service attacks. Students cannot receive credit for both CSCI 4541 taken while an undergraduate and CSCI 6541 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4541 and CSCI 6541. Prerequisite: CSCI 4531. (Spring, Every Year).

CSCI 4551. Concepts and Applications of Computer Graphics. 3 Credits.

Introduction to computer graphics without programming; building 3-D geometry and rendering; computer animation; virtual reality and computer games; hands-on projects in modeling, rendering, and animation using commercial software; hands-on projects in photo and video manipulation.

CSCI 4552. Design of Computer Animation I. 3 Credits.

Use of commercial 3-D computer animation packages to create digital artistic works. Principles of animation, including timing, exaggeration of motion, and anticipation; use of a storyboard; modeling; motion; rendering and editing. (Fall, Every Year).

CSCI 4553. Design of Computer Animation II. 3 Credits.

Use of commercial 3-D animation packages to create artistic works and visualizations. Process-spanning concepts of development through pre-production, production, and post-production. Emphasis on developing original content and attaining high production values. Prerequisite: CSCI 4552.

CSCI 4554. Computer Graphics I. 3 Credits.

Graphics primitives; 2D, 3D, and viewing transformations; hierarchical modeling and animation; illumination and shading; texture mapping; shaders; visibility and collision detection; sampling and anti-aliasing; global illumination; projects using OpenGL graphics API. May be taken for graduate credit. Prerequisites: CSCI 2113 or CSCI 6221. (Spring, Every Year).

CSCI 4561. Design of User-Interface Programs. 3 Credits.

Structure of interactive programs. Widgets, windows, and input devices. Client-server model, event-driven programming, and callbacks. Window systems (e.g., Xwindows) and dialog control. May be taken for graduate credit. Prerequisite: CSCI 2113 or CSCI 6221.

CSCI 4572. Computational Biology. 3 Credits.

Pairwise alignment and scoring. Multiple sequence alignment. Fragment assembly, physical mapping of DNA. Phylogenetic trees. Molecular structure prediction and protein folding. Microarrays and microarray data, image comparison. Clustering. Overview of biological databases, PDB, MMDB, GenBank. Draft genomes and genome browsers. Pathway databases. May be taken for graduate credit. Prerequisite: CSCI 3571 and CSCI 3212 or CSCI 6212.

CSCI 4576. Introduction to Biomedical Computing. 3 Credits.

A survey of the problems and solutions in biomedical computing. Application of computers in medicine. Patient care and monitoring systems, electronic medical records, digital imaging and analysis. Telemedicine, medical ethics, health care regulations and organizations.

CSCI 4577. Biomedical Computing. 3 Credits.

Computing issues in epidemiology and biosurveillance, decision support, medical imaging and visualization, image-guided surgery; medical databases, issues in system integration, mobile medical computing. May be taken for graduate credit. Corequisite: CSCI 2441. Restricted to graduate students. Prerequisites: CSCI 2113 and CSCI 4576. (Spring, Every Year).

CSCI 5099. Variable Topics. 1-99 Credits.

CSCI 6001. Introduction to Computer Programming and Software Development. 3 Credits.

Introduction to concepts and skill development in programming and software development, including problem solving on a digital computer and writing, debugging, and executing programs. Restricted to students in select programs; departmental permission is required. (Fall, spring, and summer, Every Year).

CSCI 6002. Introduction to Data Structures and Their Applications. 3 Credits.

Introduction to core computer science data structures including: arrays, lists, linked structures, stacks, queues, and trees. Sorting, searching, and comparison of algorithmic performance. Restricted to students in select programs; departmental permission is required. (Fall, spring, and summer, Every Year).

CSCI 6003. Introduction to Software Design and Engineering. 3 Credits.

Introduction to objects and object-oriented programming. Software development for applications including development with GUIs, database access, threads, web programming. Restricted to students in select programs; departmental permission is required. (Fall, spring, and summer, Every Year).

CSCI 6010. Introduction to Computer Science Fundamentals. 3 Credits.

Review of programming in a high-level language using Java or C++ Introduction to objects and object-oriented programming: static and dynamic objects, inheritance, dynamic method invocation. Data structures: 2D-arrays, linked-lists, stacks, queues, trees, hashing. Discrete structures: sets, graphs, permutations and combinations. Restricted to students whose letter of admission stated that the course is required. (Fall and spring, Every Year).

CSCI 6011. Introduction to Computer Systems. 3 Credits.

Introduction to basic concepts underlying all computer systems; processor operation, hierarchical memory systems, elementary logic circuits, and systems software such as compilers, linkers, and operating systems from the programmer's perspective. Students must have completed one year of coursework in programming in C, C++, or Java prior to registration. Restricted to students whose letter of admission stated that the course is required. (Fall and spring, Every Year).

CSCI 6012. Cybersecurity and Privacy. 3 Credits.

Overview of cybersecurity and privacy, including cryptography, authentication, malware, viruses, network security, anonymity, privacy and online privacy, risk management; common cyberattacks and techniques for detection and defense; policy and legal perspectives for managing cybersecurity missions supporting private sector and government; cyber technologies as applied to the stability of global information and communications infrastructure; government cybersecurity policies. (Fall, spring, and summer).

CSCI 6013. Security in Mobile Computing. 3 Credits.

Relationship between security strategic plan and business strategic plan; mobile device solutions (MDS) to access enterprise corporate data; bring your own device (BYOD) paradigm; mobile device management (MDM) best practices, policies, network controls to identify countermeasures, and risk mitigation strategies against common threats. Overview of mobile security solutions for classified processing and communications. Prerequisites: CSCI 6012. (Fall, spring, and summer).

CSCI 6015. Cyber Forensics. 3 Credits.

Acquiring, preserving and analyzing digitally stored information while ensuring that this information is admissible as evidence in a court of law. Principles and techniques for cyber forensics investigations using industry-standard forensic process. Restricted to SEAS online students. (As arranged, Every Year).

CSCI 6016. Applied Network Defense. 3 Credits.

Computer security: protection aspects of the Internet. Cryptographic tools to provide security, such as shared key encryption (DES, 3DES, RC and more), public key encryption, key exchange, and digital signature. Internet protocols and applications. Restricted to SEAS online students. (As arranged, Every Year).

CSCI 6018. Cloud Application Architecture. 3 Credits.

Cloud application design guidelines and software patterns. Survey of cloud services for scalable secure cloud applications. Trade-offs in cloud application design, container vs virtual machine deployments, and monolithic vs microservice. Restricted to SEAS online students. (As arranged, Every Year).

CSCI 6114. Introduction to Computer Systems and Systems Programming. 3 Credits.

Introduction to basic concepts underlying all computer systems; processor operation, hierarchical memory systems, elementary logic circuits, and systems software such as compilers, linkers, and operating systems from the programmer's perspective. Software development with the C programming language. Students cannot receive credit for this course and CSCI 6011. Restricted to students in select programs; departmental permission is required. Prerequisites: CSCI 2113 or CSCI 6003. (Fall, spring, and summer, Every Year).

CSCI 6115. Application Development I. 3 Credits.

Client-server programming, web development, front end design, back-end server development, introduction to databases. Front and back-end languages, server administration and tools. Students cannot get credit for this course and CSCI 2441, CSCI 2441W, CSCI 2541, or CSCI 2541W. Restricted to students in select programs; departmental permission is required. Prerequisites: CSCI 2113 or CSCI 6003. (Fall, spring, and summer, Every Year).

CSCI 6116. Advanced Application Development. 3 Credits.

Design of large software systems and installable applications, development frameworks, integration of components and services, cloud and web programming, and mobile device development; software specification and testing. Prerequisites: CSCI 6115, CSCI 6431 and CSCI 6441. (Fall, spring, and summer, Every Year).

CSCI 6212. Design and Analysis of Algorithms. 3 Credits.

Design and analysis of algorithms; Turing machines; NP-complete theory; algorithmic techniques: divide-and-conquer, greedy, dynamic programming, graph traversal, backtracking, and branch-and-bound; applications include sorting and searching, graph algorithms, and optimization. Students are expected to know data structures and possess general programming skills in one or more procedural/OOP language such as C/C++/Java, and to have a good mathematical background such as discrete math and some calculus, prior to registration. (Fall, spring, and summer, Every Year).

CSCI 6221. Advanced Software Paradigms. 3 Credits.

Object-oriented, procedural, functional, and concurrent software design paradigms; design patterns; software life cycle concepts; tradeoffs between compiled and interpreted languages; examples from Java, C, C++ and Perl. Restricted to graduate students. (Fall, spring, and summer, Every Year).

CSCI 6223. Principles of Programming Languages. 3 Credits.

Fundamental concepts underlying design of programming languages; detailed study of functional and object-oriented computational models; types, evaluation, abstraction, control flow, modules, mutation, laziness, polymorphism, subtyping, inheritance. Students cannot receive credit for both CSCI 6223 taken while a graduate and CSCI 4223 taken while an undergraduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4223 and CSCI 6223. (Spring, odd years).

CSCI 6231. Software Engineering. 3 Credits.

The life-cycle model. Requirements and specifications. Design models, structured and object-oriented design. Program development, PDL's tools, configuration control. Program, unit, and integration testing. Program verification. Other development models. Development metrics. Computer-aided software engineering (CASE). Prerequisites: CSCI 6221 and CSCI 6212. (Fall and spring, Every Year).

CSCI 6232. Software Engineering Development. 3 Credits.

Formal methods in software engineering. First-order logic, basic specification elements, rigorous proofs, formal development process, concurrency. Prerequisites: CSCI 6461 and CSCI 6212. (Fall and spring, Every Year).

CSCI 6233. Software Testing and Quality. 3 Credits.

Flow graphs and path testing, transaction flow testing, data flow testing, software metrics, system testing, test planning and documentation, reliability, statistical testing. Prerequisite: CSCI 6231. (Fall and spring, Every Year).

CSCI 6234. Object-Oriented Design. 3 Credits.

Object-oriented systems, software reusability, software modularity, top-down and bottom-up approaches, object classification, genericity, metaprogramming, concurrent object-oriented programming languages. Prerequisite: CSCI 6221.

CSCI 6235. Component-Based Enterprise Software Development. 3 Credits.

Component-based software development for enterprise applications. Component models, multi-tier architecture. Specific case studies may include topics such as Enterprise Java Beans, DCOM, and COBRA. Prerequisite: CSCI 6221.

CSCI 6311. Theory of Computation. 3 Credits.

Theoretical foundations of computer science. Formal languages and automata; regular expressions, context-free languages, parsing; Turing machines and complexity; partial recursive functions; undecidability; program correctness; fixed-point theory; formal specifications of software. Prerequisite: CSCI 6212.

CSCI 6312. Graph Theory and Applications. 3 Credits.

Undirected and directed graphs. Connectivity, partitions, cycles and matchings. Edge and vertex coloring, chromatic polynomials, and the four-coloring problem. Planar graphs and Kuratowski's theorem. Properties of random graphs. Applications to a variety of problems. Prerequisite: CSCI 6212. (Fall and spring, Every Year).

CSCI 6318. Complex Systems. 3 Credits.

The edge-of-chaos phenomenon, phase transitions, power laws, small-world networks, Boolean networks, cellular automata, and complex dynamics. Applications to networks and biological systems. Prerequisite: CSCI 6212.

CSCI 6331. Cryptography. 3 Credits.

Review of mathematical theory for cryptography; classical ciphers; modern block and stream ciphers; symmetric and asymmetric systems; digital signatures; public key infrastructure; authentication. Students cannot receive credit for both CSCI 4331 taken while an undergraduate and CSCI 6331 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4331 and CSCI 6331. Prerequisite: CSCI 6212. (Spring, Every Year).

CSCI 6341. Continuous Algorithms. 3 Credits.

Structures in continuous mathematics from a computational viewpoint; continuous system simulation, computational modeling, probability, statistical techniques, next-event simulation, algorithms for continuous optimization, machine learning, neural networks, statistical language processing, robot control algorithms. Students cannot receive credit for both CSCI 4341 taken while an undergraduate and CSCI 6341 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4341 and CSCI 6341. (Spring, Every Year).

CSCI 6342. Computational Linear Algebra and Applications. 3 Credits.

Linear algebra applied to computational problems in computer science and engineering; points, vectors, matrices, and their programming abstractions; 3D transformations, pose and viewpoint estimation; linear equations; algorithms for matrix decompositions, dimension reduction, computation with large matrices, under- and over-determined systems; applications to big data, computer vision, text processing. Students cannot receive credit for both CSCI 4342 taken while an undergraduate and CSCI 6342 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4342 and CSCI 6342. (Spring, Every Year).

CSCI 6351. Data Compression. 3 Credits.

Background on signals, information theory, transforms, human vision, and metrics. Lossless and lossy compression techniques. Video compression. Compression standards. Progressive transmission. Prerequisite: CSCI 6212.

CSCI 6362. Probability for Computer Science. 3 Credits.

Concepts of probability and statistics used in computer science; random variables; conditional probability, independence, correlation; law of large numbers, central limit theorem; applications to computer science, including entropy, information theory, data compression, coding, inference, Markov chains, randomized algorithms. Students cannot receive credit for both CSCI 3362 taken while an undergraduate and CSCI 6362 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 3362 and CSCI 6362. (Spring, Every Year).

CSCI 6364. Machine Learning. 3 Credits.

Machine learning algorithms: nearest-neighbor, regression, classification, perceptron, kernel methods, support vector machine (SVM), logistic regression, ensemble methods, boosting, graphical models, hidden Markov models (HMM), non-parametrics, online learning, active learning, clustering, feature selection, parameter tuning, and cross-validation. Students cannot receive credit for both CSCI 4364 taken while an undergraduate and CSCI 6364 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4364 and CSCI 6364. Prerequisites: CSCI 6212 and CSCI 6362. (Fall, Every Year).

CSCI 6365. Advanced Machine Learning. 3 Credits.

Theory and algorithms for machine learning research; in-depth focus on advanced machine learning topics such as clustering, learning from data streams, and climate informatics. Prerequisite: CSCI 6364. (Spring, Every Year).

CSCI 6411. Advanced Operating Systems. 3 Credits.

Fundamentals of operating system design and structure, resource management, and system support for multi-core. Topics include scheduling, synchronization, system structure, virtual address spaces, memory management, I/O management, and systems abstractions for modern multi-core architectures. The course involves an implementation component and requires substantial programming experience. This course can be taken for credit by undergraduates who have taken CSCI 3411. Prerequisite: CSCI 6461 or CSCI 2461.

CSCI 6412. OS Design and Implementation. 3 Credits.

Builds on CSCI 6411 to provide students with the knowledge to build parts of modern operating systems, which is studied and motivated from the viewpoint of practical design and implementation. Students learn how operating system's components for resource management and abstraction are built from the ground up and integrated into working systems considering the challenges of reliability, multi-core, and security. The course has a significant implementation component; substantial low-level programming experience is required. Prerequisite: CSCI 6411. (Fall and spring, Every Year).

CSCI 6418. Unix Systems Administration. 3 Credits.

System administration for the stand-alone system or small networks; installation of two or more UNIX variants (Linux, FreeBSD, Solaris) hardware platforms; configuration of mail, name services, and other network utilities; backup and recovery, security and ethics. Students cannot receive credit for both CSCI 4418 taken while an undergraduate and CSCI 6418 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4418 and CSCI 6418. Prerequisites: CSCI 6114; or CSCI 6010 and CSCI 6011. (Fall, spring, and summer, Every Year).

CSCI 6419. Advanced Systems Administration. 3 Credits.

Administration of large systems, non-Unix platforms, web document systems, website administration, cloud and web services, user and IT personnel components, and economics of IT support. Prerequisite: CSCI 6418. (Fall, spring, and summer, Every Year).

CSCI 6421. Distributed and Cluster Computing. 3 Credits.

Algorithmic and implementation challenges in building large scale distributed applications; distributed coordination, scheduling, consistency issues, and fault tolerance algorithms; fundamental distributed systems concepts applied to both high performance computing and cloud computing environments. Prerequisite: CSCI 6212. Recommended background: Substantial programming experience. (Fall, Every Year).

CSCI 6431. Computer Networks. 3 Credits.

Fundamental concepts in the design and implementation of computer communication networks and internet, their protocols, and applications; layered network architectures, applications, network programming interfaces, transport, routing, data link protocols, local area networks, network management, and network security. Students cannot receive credit for both CSCI 4431/CSCI 4431W taken while an undergraduate and CSCI 6431 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4431/CSCI 4431W and CSCI 6431. Prerequisite: CSCI 6461. (Fall, Every Year).

CSCI 6433. Internet Protocols. 3 Credits.

Understanding of the layered protocols for the Internet. Interconnection of networks. The IP protocol and routing algorithms, switches, bridges, and routers. The transmission control protocol (TCP). Addressing and names. Application-specific protocols, FTP, TELNET, SMTP, SNMP, HTTP. Domain name services. Prerequisites: CSCI 6221 and CSCI 6431. (Fall and spring, Every Year).

CSCI 6434. Design of Internet Protocols. 3 Credits.

Protocol specifications and formal description methods. Finite-state descriptions of Internet protocols. Specification and Description Language. Implementation of protocol specifications. Prerequisites: CSCI 6212 and CSCI 6433. (Fall and spring, Every Year).

CSCI 6441. Database Management Systems. 3 Credits.

Design and architecture of relational database management systems; query languages, data models, index structures, database application design. Students cannot receive credit for CSCI 2441W or 2541W taken while an undergraduate and CSCI 6441 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for CSCI 2441W or CSCI 2541W and CSCI 6441. Prerequisites: CSCI 6221 and CSCI 6461. (Spring, Every Year).

CSCI 6442. Database Systems II. 3 Credits.

Concepts in database systems. Relational database design. Editing, report generation, updating, schema refinement, tuning. Construction of database management systems. Conceptual and logical design of a database. Prerequisite: CSCI 6441.

CSCI 6443. Data Mining. 3 Credits.

Fundamental concepts of data mining. Algorithm techniques for data mining, including classification, clustering, association rules mining. Prerequisites: CSCI 6441 or permission of the instructor. (Fall and spring, Every Year).

CSCI 6444. Introduction to Big Data and Analytics. 3 Credits.

Big data, its properties, technology, and the types and classes of analytics that can be applied to it; associated storage and programming systems. Students gain practical experience through focused projects to apply different analytics to a data set. Prerequisite: CSCI 2113 or CSCI 6221. (Fall, spring, and summer).

CSCI 6451. Information Retrieval Systems. 3 Credits.

Information organization and retrieval of natural language data by digital computer systems; statistical, syntactic, and logical analysis of natural language; dictionary and thesaurus systems; searching strategies and cataloging. Large-scale file structures. Prerequisites: CSCI 6221 and CSCI 6461. (Fall and spring, Every Year).

CSCI 6461. Computer System Architecture. 3 Credits.

Concepts in processor, system, and network architectures; architecture of pipeline, superscalar, and VLIW/EPIC processors; multiprocessors and interconnection networks; cache coherence and memory subsystem design for multiprocessor architectures; parallel and distributed system architecture; internetworking. Restricted to graduate students. (Fall, spring, and summer, Every Year).

CSCI 6511. Artificial Intelligence. 3 Credits.

Representation and space search; heuristic search; predicate calculus; knowledge representation and knowledge engineering for expert systems; rule-based, hybrid, and O-O systems; semantic nets, frames, and natural language; theorem provers; planning, learning, neural nets; use of AI languages. Prerequisite: CSCI 6212. (Spring, Every Year).

CSCI 6515. Natural Language Understanding. 3 Credits.

The state of the art of natural language parsing and semantic understanding by computer systems. Review of formal, context-free, and transformational grammars and parsing. Augmented transition networks: problems of complexity, semantics, and context. Deterministic parsing and semantic parsing. Prerequisite: CSCI 6511.

CSCI 6521. Introduction to Mobile Robotics. 3 Credits.

Concepts of autonomous mobile robotics with emphasis on algorithmic aspects. Sensing, sensor fusion, localization, calibration, mapping, perception, decision making, planning, behavior-based control, world modeling, and navigation. Development of algorithms that can operate autonomous mobile platforms in complex, real-world environments. Prerequisites: MATH 1232 and MATH 2184; and CSCI 6362 or CSCI 4341. (Fall and spring, Every Year).

CSCI 6525. Autonomous Robotics: Manipulation. 3 Credits.

Manipulation and autonomous operation in dynamic, human-centric environments. Reinforcement learning, perception, optimization algorithms, kinematics, dynamics, control theory. Prerequisites: CSCI 6362 and MATH 2184; or permission of the instructor. (Fall and spring, Every Year).

CSCI 6527. Introduction to Computer Vision. 3 Credits.

Image signal processing and filtering. Saliency, features and feature extraction, tracking, stereo disparity estimation, structure from motion, photogrammetry, optic flow, homography estimation and warping, scene segmentation, place recognition, object recognition, robust estimation, and camera calibration. Current research topics. Prerequisites: MATH 1232 and MATH 2184; and CSCI 6362 or CSCI 6341. (Fall and spring, Every Year).

CSCI 6531. Computer Security. 3 Credits.

Functional description of cryptographic primitives; risk analysis; policy models; design principles; assurance; malicious logic. Students cannot receive credit for both CSCI 4531 taken while an undergraduate and CSCI 6531 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4531 and CSCI 6531. Prerequisite: CSCI 6461. (Spring, Every Year).

CSCI 6532. Information Policy. 3 Credits.

Roles, issues, and impacts of computer-based information systems in national and international arenas, focusing on privacy, equity, freedom of speech, intellectual property, and access to personal and governmental information. Professional responsibilities, ethics, and common and best practices in information use. Students cannot receive credit for both CSCI 4532 taken while an undergraduate and CSCI 6532 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4532 and CSCI 6532. (Fall, Every Year).

CSCI 6534. Information Security in Government. 3 Credits.**CSCI 6541. Network Security. 3 Credits.**

Security protocols and applications in local, global, and wireless networks; IPSec and packet-level communication security systems; network authentication and key-exchange protocols; intrusion detection systems and firewalls; secure network applications; network worms and denial-of-service attacks. Students cannot receive credit for both CSCI 4541 taken while an undergraduate and CSCI 6541 taken while a graduate student. Students in the combined BS/MS program cannot receive credit for both CSCI 4541 and CSCI 6541. Prerequisite: CSCI 6531. (Spring, Every Year).

CSCI 6542. Computer Network Defense. 3 Credits.

Offensive and defensive information warfare operations. Simulation of various attacks on and defenses of computer systems. Laws related to information warfare. History and literature related to information warfare attacks. Prerequisite: CSCI 6541.

CSCI 6545. Software Security. 3 Credits.

Security for software systems. Theory and practice of designing and implementing secure software. Security in the context of software engineering. Practical experience with building a software system and securing it, with emphasis on correctness and robustness. Requires substantial prior programming experience. Prerequisites: CSCI 6461 or CSCI 6411; and CSCI 6531 or EMSE 6540; or permission of the instructor. (Fall and spring, Every Year).

CSCI 6547. Wireless and Mobile Security. 3 Credits.

Mobile agents, wireless Web, WAP, WEP, peer-to-peer computing; secure routing; intrusion detection and authentication on wireless networks; security for handheld devices; encryption and cryptographic measures for wireless; real-time wireless security; security measures for embedded devices. Prerequisites: CSCI 6431 and CSCI 6531. (Spring, Every Year).

CSCI 6548. E-Commerce Security. 3 Credits.

Advanced technical topics in e-commerce security. Key security threats. Authentication and authorization models, directory services, cloud based IAM, federated identity. Public key cryptography and PKI. Mobile payment methods, digital currencies, blockchain. Technologies and applications for securing web commerce. Web service security standards. Prerequisites: CS 4531 or CS 6531. (Fall and spring, Every Year).

CSCI 6554. Computer Graphics II. 3 Credits.

Algorithmic aspects of computer graphics; 3D viewing transformation; shape modeling; shading and illumination models; visible-surface determination; curves and surfaces; sampling and aliasing; global illumination, ray tracing and radiosity; shadows; image manipulation and texture mapping; procedural models. (Spring, Every Year).

CSCI 6555. Computer Animation. 3 Credits.

Euler angles and quaternions; articulated figure motion; forward and inverse kinematics; kinematic, physics based, and behavioral motion control; character animation; motion capture; temporal aliasing; sound synthesis and synchronization. (Fall, Every Year).

CSCI 6561. Design of Human-Computer Interface. 3 Credits.

Design of dialogues for interactive systems. Psychological, physiological, linguistic, and perceptual factors. Advantages and disadvantages of various interaction techniques, command language syntaxes, and data presentations. Design methodology and guidelines. Case studies, research readings, and projects. Prerequisite: CSCI 6221.

CSCI 6562. Design of Interactive Multimedia. 3 Credits.

History, theory, and development of multimedia concepts. Hardware components, platforms, and authoring tools. Scientific, technical, and cognitive foundations of various media including text, sound, graphics, and video. Interface design. Use of a media taxonomy as a design and evaluation tool. Completion of a multimedia portfolio required. Prerequisite: CSCI 6221.

CSCI 6572. Computational Biology Algorithms. 3 Credits.

Algorithms and models for DNA and protein sequence alignments, gene finding, identification of gene regulatory regions, sequence evolution and phylogenetics, RNA and protein structure, microarray and/or proteomics data analysis. Prerequisites: CSCI 6212; and programming experience in C/C++ or Java. (Spring, Every Year).

CSCI 6900. Colloquium. 0 Credits.

Lectures by outstanding authorities in computer science. Topics to be announced each semester. (Fall and spring).

CSCI 6907. Special Topics. 3 Credits.

Topics vary by semester. May be repeated for credit if the topic differs. See department for details. (Fall and spring, Every Year).

CSCI 6908. Research. 1-12 Credits.

Applied research and experimentation projects, as arranged. May be repeated for credit.

CSCI 6998. Thesis Research. 3 Credits.**CSCI 6999. Thesis Research. 3 Credits.****CSCI 8211. Advanced Topics in Algorithms. 3 Credits.**

Graph algorithms, strongly connected components, biconnected components, dominators in acyclic graphs, ordered trees, network flow, planarity testing, bipartite matching, theory of NP completeness, NP-complete problems. Design and analysis of approximation algorithms for NP-complete problems. Prerequisite: CSCI 6212.

CSCI 8231. Advanced Topics in Software Engineering. 3 Credits.

Seminar on current research and developments in software engineering. Students develop a software package with the aid of available software tools such as requirement tool, design tool, code generators, testing tools, measurement tools, cost estimation tools. Prerequisites: CSCI 6232 and CSCI 6233. (Fall and spring, Every Year).

CSCI 8331. Advanced Cryptography. 3 Credits.

Linear and differential cryptanalysis. Cryptanalysis of AES. Factorization and primality. Computational and information-theoretic secrecy. Theory of secrecy. Zero-knowledge proofs. Secret sharing. Cooperative distributed cryptography. Provable security. Prerequisite: CSCI 6331.

CSCI 8401. Advanced Topics in Systems. 3 Credits.

Seminar on current research and developments in computer operating systems. May be repeated for credit. (Spring, even years).

CSCI 8431. Advanced Topics in Computer Networks and Networked Computing. 3 Credits.

Seminar on current research and developments in computer networks, Internet, networked computing, mobile computing and pervasive computing. May be repeated for credit. Prerequisites: CSCI 6461, CSCI 6212 and CSCI 6433. (Fall and spring, Every Year).

CSCI 8440. Advanced Topics in Data Management. 3 Credits.

Seminar on current research and developments in computer database systems and information retrieval. May be repeated for credit. Prerequisite: CSCI 6442 or CSCI 6451.

CSCI 8531. Advanced Topics in Security. 3 Credits.

Seminar on current research and developments in information assurance. May be repeated for credit. Prerequisite: CSCI 6531.

CSCI 8554. Advanced Topics in Computer Graphics. 3 Credits.

Seminar on current research and developments in computer graphics. Spatial and temporal anti-aliasing: hidden-surface algorithms: illumination models, radiosity, textural mapping. May be repeated for credit. Prerequisite: CSCI 6554.

CSCI 8900. Advanced Selected Topics. 3 Credits.

Topics announced in the Schedule of Classes.

CSCI 8901. Research and Evaluation Methods. 3 Credits.

Required for all computer science doctoral candidates. The scientific method; research/design requirements and objectives: qualitative, quantitative, and case studies; performance metrics; design procedures and control; sources of error and bias; evaluation tools; formal validation methods; documentation standards. Prerequisite: APSC 3115.

CSCI 8998. Computer Science Research. 1-12 Credits.

May be repeated for credit. Restricted to doctoral candidates preparing for the qualifying examination. (Fall and spring, Every Year).

CSCI 8999. Dissertation Research. 1-12 Credits.

Doctoral candidates performing dissertation research. Restricted to doctoral candidates. (Fall and spring, Every Year).

CORCORAN ART HISTORY (CAH)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000s to 4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CAH 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester. Consult the Schedule of Classes for more details. Credit cannot be earned for this course and AH 1000.

CAH 1001. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester; see department for more details. Same As: AH 1000.

CAH 1031. Survey of Art and Architecture I. 3 Credits.

Selective survey of painting, sculpture, architecture, and material culture in Europe, Asia and the Mediterranean before 1300 CE; theoretical, analytical and critical approach to works of art in relation to their greater historical, cultural, political, economic, and religious contexts. Includes visits to area museums. Credit cannot be earned for this course and AH 1031.

CAH 1032. Survey of Art and Architecture II. 3 Credits.

History of art through the study of major monuments, art movements, and concepts in relation to their historical, cultural, political, economic, and religious contexts. Early Renaissance through the Baroque and modern eras. Includes visits to area museums. Credit cannot be earned for this course and AH 1032.

CAH 1070. The American Cinema. 3 Credits.

History and criticism of American films; recognizing and evaluating cinema techniques; and the role of films in the context of American culture. (Same as AMST 1070).

CAH 1090. Art History I: Art Now, Contemporary Perspectives in the Visual Arts. 3 Credits.

Through a focused study of artworks, exhibitions, and critical writings, students are introduced to the major ideas and issues in modern and contemporary art and design as they explore what it means to be an artist today and how the arts evolved into the diverse media landscape of the present.

CAH 1091. Art History II: Historical Perspectives in the Visual Arts. 3 Credits.

The history of art and architecture produced by cultures around the world from prehistory to the end of the nineteenth century; works of architecture, sculpture, and painting both in the process of their creation and meaning in cultural context.

CAH 1099. Variable Topics. 36 Credits.**CAH 1135. History of Spanish Art From the Golden Age to Goya. 3 Credits.**

Spanish cultural history of the early modern period connecting developments in art and architecture with social, intellectual, and political history; interpretation of images through direct analysis of works of art. Offered through the GW Madrid program. Credit cannot be earned for this course and AH 1135.

CAH 2001. Special Topics. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. See department for more details. Same As: AH 2001.

CAH 2001W. Special Topics. 3 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. See Schedule of Classes for topics. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Same As: AH 2001W.

CAH 2071. Introduction to the Arts in America. 3 Credits.

Survey of American art from the period of colonial exploration and settlement to the postmodern present; political and social meanings of painting, sculpture, architecture, prints, and photographs; the relationship of art to religion and nationalism; issues of class, race, and gender. Credit cannot be earned for this course and AH 2071, AMST 2071.
